PROCEEDINGS AND DEBATES OF THE 91st CONGRESS, SECOND SESSION

SENATE—*Tuesday, September 1, 1970*

The Senate met at 8 a.m. and was called to order by Hon. JAMES B. ALLEN, a Senator from the State of Alabama.

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Eternal God, who revealed Thyself in a carpenter and forever made all work a divine vocation, prepare our hearts to honor the workmen and women of this Nation. Bless all who labor by hand or brain for the common good, granting unto them inner compensation for work well done and the comforting knowledge of service faithfully rendered. Preserve the spirit of reconciliation and good will between those who labor and those who manage that being united in one body the few may serve the welfare of the many in an orderly Nation of justice and peace.

Be graciously near all Members of this body in the coming days. Give journeying mercies to all who travel. Give all a respite from daily cares, ample rest for the body and renewal of the spirit. Watch over us while we are absent one from the other and bring us together in future service to the Nation.

In the Redeemer's name we pray. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication from the President pro tempore of the Senate (Mr. RUSSELL).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., September 1, 1970.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. JAMES B. ALLEN to perform the duties of the Chair during my absence.

RICHARD B. RUSSELL,
President pro tempore.

Mr. ALLEN thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Monday, August 31, 1970, be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that all committees be authorized to meet during the session of the Senate today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of bills on the calendar to which there is no objection, beginning with Order No. 1158 and including No. 1171.

The ACTING PRESIDENT pro tempore. The clerk will state the first measure.

CONFEDERATED BANDS OF UTE INDIANS AND THE UNCOMPAHGRE BAND OF UTE INDIANS

The bill (S. 3997) to provide for the disposition of funds appropriated to pay a judgment in favor of the Confederated Bands of Ute Indians in Court of Claims case 47567, and a judgment in favor of the Ute Tribe of the Uintah and Ouray Reservation for and on behalf of the Uncompahgre Band of Ute Indians in Indian Claims Commission docket No. 349, and for other purposes was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 3997

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the unexpended balance of funds on deposit in the Treasury to the credit of the Confederated Bands of Ute Indians appropriated by the Act of May 13, 1966 (80 Stat. 141), pursuant to the final judgment entered in Court of Claims case numbered 47567; and the funds on deposit to the credit of the Ute Tribe of the Uintah and Ouray Reservation, for and on behalf of the Uncompahgre Band of Ute Indians, that were appropriated by the Act of April 30, 1965 (79 Stat. 81), to pay a judgment by the Indian Claims Commission in docket numbered 349; and the interest thereon, less attorney fees and litigation expenses, shall be available for use by the respective tribes in accordance with the Act of August 21, 1951 (65 Stat. 193; 25 U.S.C. 672), the Act of August 12, 1953 (67 Stat. 540; 25 U.S.C. 674), the Act of June 28, 1954 (68 Stat. 300; 25 U.S.C. 676), and the Act of August 27, 1954 (68 Stat. 868; 25 U.S.C. 677), as amended.

SEC. 2. Any portion of the funds distributed per capita to the members of the respective tribes shall not be subject to Federal or State income tax.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1141), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of S. 3397 is to authorize the use of a judgment against the United States recovered by the Confederated Bands of Ute Indians in Court of Claims docket No. 47567, and the use of a judgment against the United States recovered by the Ute Tribe of the Uintah and Ouray Reservation in Indian Claims Commission docket No. 349. The division is as follows:

COURT OF CLAIMS CASE NO. 47567—CONFEDERATED BANDS OF UTE INDIANS—INDIAN CLAIMS COMMISSION DOCKET NO. 349 UNCOMPAHGRE BAND [1]

[Case No. 47567, $4,479,498.52; final judgment, Feb. 8, 1966; appropriated, May 13, 1966 (80 Stat. 141); docket No. 349 $300,000; final judgment, Feb. 18, 1965; appropriated, Apr. 30, 1965 (79 Stat. 81)]

- Confederated Bands of Ute Indians
  - Ute Indian Tribe of the Uintah and Ouray Reservation — 60 percent
    - Constituent bands: Uncompahgre Band, Uintah Band, White River Band
      - Ute Indian Tribe of the Uintah and Ouray Reservation (Utah) — 72.83814 percent—$1,829,911.69 (47567); 196,662.98 (349)
      - Ute Distribution Corp. — 27.16186 percent—$701,305.77 (47567); 73,337.02 (349)
    - Constituent bands: Southern Ute Band, Ute Mountain Band
      - Southern Ute Tribe of the Southern Ute Reservation (Colorado) — 46.3229 percent—$730,244.07 (47567)
      - Ute Mountain Ute Tribe of the Ute Mountain Reservation (Colorado, New Mexico, Utah) — 53.6771 percent—$846,177.24 (47567)
  - Southern Utes — 40 percent

[1] Ute Tribe of the Uintah and Ouray Reservation for and on behalf of the Uncompahgre Band.

The net amounts available, after division between the three Ute Tribes entitled to share and including interest are as follows:

Ute Indian Tribe of the Uintah and Ouray Reservation	$2,371,546
Southern Ute Tribe	830,000
Ute Mountain Tribe	963,017

NEED

Funds to satisfy the judgments have been appropriated. However, language contained in the annual appropriations act for the Department of the Interior precludes the use of the money until specifically authorized by Congress. S. 3397 provides such authorization.

The bill provides that the funds from both judgments shall be available to the respective tribes for expenditure under existing authorities for the use of tribal funds of the Confederated Bands of Ute Indians. The Ute Indian Tribe of the Uintah and Ouray Reservation proposes to pool this judgment money with several other tribal funds, and to establish three investment funds, the earnings from which will be used for educational grants, tribal government operations, and per capita payments to members.

The Ute Mountain Tribe proposes to invest approximately $662,706 in an economic development fund for the reservation, and to use the balance to make a $300 per capita payment to its members.

The Southern Ute Tribe proposes to invest its funds until a specific program for their use has been developed. The Department of the Interior has agreed that secretarial approval for the use of the funds will not be given until more detailed plans are submitted for approval by Congress.

COST

Enactment of the bill will require no additional appropriation.

UINTAH INDIAN IRRIGATION PROJECT

The bill (H.R. 16416) to reimburse the Ute Tribe of the Uintah and Ouray Reservation for tribal funds that were used to construct, operate, and maintain the Uintah Indian irrigation project, Utah, and for other purposes, was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1148), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of H.R. 16416 is to authorize the Secretary of the Interior to reimburse the Ute Indian Tribe for tribal funds that have been used for the construction, operation, and maintenance of the Uintah Indian irrigation project, Utah. It also authorizes the payment of interest on the tribal funds used. The bill also transfers the title to four pieces of land purchased by the United States in connection with this project to the United States to be held in trust for the Ute Indian Tribe. The committee considered and heard testimony on a companion bill, S. 1736, introduced by Senator Moss.

NEED

The reservation was established by Executive orders of October 3, 1861, and September 1, 1867. In 1901, it contained approximately 2,039,040 acres.

The act of May 27, 1902 (32 Stat. 263), and subsequent acts provided for the allotments to the Indians and for the restoration of the unallotted lands to the public domain for settlement by non-Indians.

Allotments to Indians, aggregating approximately 103,265 acres, were approved on July 18, 1905. On August 28, 1905, unreserved and unallotted land amounting to approximately 1,004,258 acres was opened to entry.

The act of June 21, 1906 (34 Stat. 375) authorized the construction of the irrigation project by the Federal Government.

The records show that over the years both tribal and appropriated funds were expended for the construction, operation, and maintenance of the project.

In addition, tribal funds were also used to reimburse the Federal Government for Federal expenditures in construction, operation, and maintenance. A substantial portion of these tribal funds was derived from the sale of ceded lands.

In 1914 Congress changed the policy for Indian irrigation projects, so that the cost would not be borne by the tribe as a whole, but would be assessed against the water users. In accordance with this change in policy, a 1916 statute (30 Stat. 141) reimbursed three tribes (Blackfeet, Flathead, and Fort Peck) for tribal funds that had been used to construct and operate their projects. The effect was to convert tribal expenditures into Federal expenditures, and the United States was expected to recover its costs from the individual water users instead of from the tribe.

This change in policy was recognized and applied by the Comptroller General in an opinion dated February 27, 1926, with respect to a fourth tribe—Wind River, Wyo. The Comptroller General refused to allow the Federal expenditures to be reimbursed from tribal funds.

The Ute case, which is the subject of the pending bill, will be the fifth tribe to be reimbursed.

In addition to reimbursement of the principal sum, the bill provides for payment to the tribe of interest on its money at 4 percent from the date of expenditure to the date the bill is enacted. There is one precedent for this payment of interest (the Flathead Tribe—act of May 25, 1948; 62 Stat. 269, 272), and payment is also justified by the fact that the tribal funds used by the Government were in a 4-percent-interest-bearing account, and the tribe would have received interest on the funds if they had not been used for the irrigation project.

COST

Enactment of the bill will require an appropriation of $3,539,792, plus interest accruing since January 1, 1970, to reimburse the tribe. Of this amount, $773,560 (representing principal without interest) will be a reimbursable charge against the Indian land. An additional appropriation will be needed to reimburse individual Indians who sold nonirrigable land for irrigation charges that were improperly assessed and collected from the sales prices. The amount has not been determined, but will be something less than $218,000.

CITIZEN BAND OF POTAWATOMI INDIANS

The bill (H.R. 14097) to authorize the use of funds arising from a judgment in favor of the Citizen Band of Potawatomi Indians of Oklahoma in Indian Claims Commission Docket No. 96, and for other purposes, was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1149), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of H.R. 14097 is to authorize the use of a judgment against the United States recovered by the Citizen Band of Potawatomi Indians of Oklahoma in Indian Claims Commission Docket No. 96. The net amount available is $723,111.

NEED

The money has been appropriated and most of it has been invested temporarily in U.S. Treasury bills. The Indians may not use the money, however, until Congress has approved their plans.

The tribe consists of about 10,150 Indians. Only 1,320 of them live in or near the former reservation. The others are highly acculturated, have small amounts of Indian blood, and are widely scattered. Under these circumstances, a per capita distribution of the money is the only feasible course to follow, and that is the tribe's plan. The per capita will be about $70. The tribe also has on hand about $270,000 from a prior judgment, and it plans to distribute that money per capita also, which will mean an additional $27 for each person.

The tribe has recovered two prior judgments, and both have been distributed per capita. The tribe has 11 claims still pending, and a possibility of sharing in an additional 15 claims.

COST

No additional Federal appropriation will be required.

SAC AND FOX TRIBES

The bill (H.R. 14827) to provide for the disposition of funds to pay a judgment in favor of the Sac and Fox Tribes of Oklahoma in Indian Claims Commission docket No. 220, and for other purposes, was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1150), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of H.R. 14827 is to authorize the use of a judgment against the United States recovered by the Sac and Fox Tribes of Oklahoma in Indian Claims Commission Docket No. 220. The net amount available, including accrued interest, is $703,345. The committee also considered a companion measure, S. 3245, introduced by Senator Harris of Oklahoma.

NEED

The money has been appropriated and most of it has been invested temporarily in interest-bearing securities. Because of language contained in the annual appropriations act for the Department of the Interior, the Indians may not use the money until Congress has approved their plans.

The tribe consists of about 1,900 members. Only 30 percent of them live within the area of their former reservation, and the rest are scattered throughout the United States. The tribe owns only 805 acres of land, and the members of the tribe own only 18,814 acres.

S. 3245 provides that the judgment funds may be advanced, deposited, expended, invested, or reinvested for any purposes that are authorized by the tribal governing body and approved by the Secretary of the Interior.

The tribe adopted a resolution proposing that 80 percent of the current judgment funds be distributed per capita to the tribal members. The tribe proposes to hold 10 percent of the judgment funds in interest-bearing escrow for 4 years and 1 day from the date of the act to defend or pay any claims which might arise regarding distribution of the money, and to distribute per capita any sum remaining at the expiration of the escrow period. The remaining 10 percent of the judgment money is earmarked for programming. It is anticipated that these funds will supplement approximately $335,000 set aside from a previous award for the construction of a community building, grants for higher education and vocational training, industrial development and low-cost housing for elderly tribal members.

The committee believes that, since such a small number of resident members would benefit from the reservation programs the tribe proposes, a per capita distribution of the larger portion of the judgment funds is equitable to the interests of the great majority who live away from the former reservation area.

COST

Enactment of the bill will not require additional Federal appropiations.

HUALAPAI TRIBE

The bill (H.R. 13434) to provide for the disposition of judgment funds on deposit to the credit of the Hualapai Tribe of the Hualapai Reservation, Arizona, in Indian Claims Commission Dockets Nos. 90 and 122, and for other purposes, was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1147), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of H.R. 13434 is to authorize the use of a judgment recovered against the United States by the Hualapai Tribe of Indians in Indian Claims Commission Docket No. 90. The net amount available is $2,974,612.

NEED

The money has been appropriated and most of it has been invested temporarily in U.S. Treasury bills. The Indians may not use the money, however, until Congress has approved their plans.

The Hualapai Tribe consists of approximately 1,035 Indians. About 750 of them live within the service area of their reservation. The remainder live away from the reservation.

The tribe proposes to distribute 25 percent of the judgment equally among the members of the tribe. This amounts to about $70 each. For the members who need assistance, the money may be used only pursuant to a family plan approved and supervised by the tribe. The others could assume full responsibility for the use of their funds.

The tribe proposes to use $991,250 of the judgment to develop tribal resources and create job opportunities.

About $1 million will be retained by the tribe for investment. Two-thirds of the revenue from the investment will be used for education, and one-third will be used for the administration of tribal government.

These figures are estimates which may be modified as experience dictates.

COST

Enactment of the bill will involve no additional Federal appropriations.

CHEMEHUEVI TRIBE

The Senate proceeded to consider the bill (S. 4033) to provide for the disposition of funds appropriated to pay a judgment in favor of the Chemehuevi Tribe of Indians which had been reported from the Committee on Interior and Insular Affairs with amendments on page 2, line 17, after the word "purpose", insert "The determination of the Secretary regarding the utilization of available rolls or records and the eligibility for enrollment of an applicant shall be final."; on page 3, line 3, after "Sec. 3.", strike out "(a)"; after line 12, strike out:

(b) Any individual aggrieved by a determination of the Secretary under this Act shall be given an opportunity to be heard upon reasonable notice in accordance with the provisions of chapter 5 of title 5, United States Code. Unless such individual otherwise agrees, the hearing shall be held in the State of California within sixty days of the date of notice. An individual aggrieved by the decision rendered after such hearing shall be entitled to judicial review of such decision in accordance with sections 701 706 of title 5, United States Code.

In line 24, after the word "income", strike out "taxes or any lien, debt, or attorney fees" and insert "taxes"; and, on page 4, after line 3, insert a new section, as follows:

SEC. 6. The Secretary may make appropriate withdrawals from the judgment funds and interest thereon, using interest funds first, to pay costs incident to carrying out the provisions of this Act.

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the funds on deposit in the Treasury of the United States to the credit of the Chemehuevi Tribe of Indians which were appropriated (by the Act entitled "An Act making supplemental appropriations for the fiscal year ending June 30, 1965, and for other purposes", approved April 30, 1965 (79 Stat. 81)), to pay the judgment awarded by the Indian Claims Commission (dockets numbered 351 and 351–A), together with interest thereon, shall be distributed by the Secretary of the Interior (hereafter in this Act referred to as "Secretary") in equal shares to those persons whose names appear on the roll prepared in accordance with section 2 of this Act.

SEC. 2. (a) (1) The Secretary shall prepare a role of all persons—

(A) who were born on or prior to and living on the date of enactment of this Act;

(B) who are lineal descendants of members of the Chemehuevi Tribe as it existed in 1860; and

(C) whose name or the name of a lineal ancestor appears as a Chemehuevi Indian on any available census roll or other record or evidence acceptable to the Secretary.

(2) Applications for enrollment must be filed in the manner and within the time limits prescribed by the Secretary for that purpose. The determination of the Secretary regarding the utilization of available rolls or records and the eligibility for enrollment of an applicant shall be final.

(b) Any person who has applied for and has been determined as eligible to share in the awards granted by the Indian Claims Commission in dockets numbered 88, 330, and 330–A, to the Southern Paiute Indian Nation or in dockets numbered 31, 37, 80, 80–D, 176, 215, 333, and 347, to "Certain Indians of California" shall not be entitled to share in the awards granted under this Act.

SEC. 3. (a) The Secretary shall distribute a share payable to a living enrollee directly to such enrollee. The Secretary shall distribute the per capita share of a deceased enrollee to his heirs or legatees upon proof of death and inheritance satisfactory to the Secretary. Sums payable to enrollees or their heirs or legatees who are less than twenty-one years of age or who are under a legal disability shall be paid in accordance with such procedures, including the establishment of trusts, as the Secretary determines to be appropriate to protect their best interests.

SEC. 4. No part of any funds distributed under this Act shall be subject to Federal or State income taxes.

SEC. 5. The roll prepared by the Secretary of the Interior pursuant to this Act shall not be deemed to constitute the membership roll of the Chemehuevi Tribe.

SEC. 6. The Secretary may make appropriate withdrawals from the judgment funds and interest thereon, using interest funds first, to pay costs incident to carrying out the provisions of this Act.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1145), explaining the purposes of the measure.

There being no objection, the excerpt was orderd to be printed in the RECORD, as follows:

PURPOSE

The purpose of S. 4033 is to authorize the disposition of funds appropriated to pay a judgment in the amount of $996,834.81 awarded to the Chemehuevi Tribe of Indians in Indian Claims Commission dockets numbered 351 and 351–A. Funds were appropriated April 30, 1965. The bulk of these funds are in U.S. Treasury bills drawing interest at between 7 and 8 percent per annum.

NEED

The annual appropriation act for the Department of the Interior prohibits the use of judgments awarded to Indian tribes until further authorizing legislation is enacted. S. 4033 provides that authorization.

The bill directs the Secretary of the Interior to prepare a descendancy roll of Chemehuevi Indians and further provides for a per capita distribution of the funds, plus interest, to those enrolled.

The Chemehuevi Tribe, as an organized modern entity, has not existed for a number of years. A sizable number of individuals, although probably still a minority, are present-day members of the Colorado River Indian Tribes. The Chemehuevi people voted favorably on a constitution and bylaws on February 14, 1970, as a preliminary step to forming a new tribal organization. It is estimated that there are approximately 1,200 to 1,400 Indians of Chemehuevi ancestry who will be eligible to share in this present award.

AMENDMENTS

The committee has adopted several technical amendments recommended by the Department of the Interior in its report.

COST

No additional Federal expenditures will result from the enactment of the bill.

CONVEYANCE OF LAND, WYOMING

The Senate proceeded to consider the bill (S. 2735) to provide for the conveyance of certain public lands in Wyoming to the occupants of the land which had been reported from the Committee on Interior and Insular Affairs with an amendment strike out all after the enacting clause and insert:

That the Secretary of the Interior is hereby authorized to convey to the grantees of Ferne M. McNeil all right, title, and interest of the United States, except right, title, and interest in deposits of oil and gas, in lands in lots 38C, 38D, and 38F, section 25, township 52 north, range 103 west, sixth principal meridian, Park County, Wyoming, lying east and south of the Cody Canal. Such conveyance shall be made only upon application therefor within six months after the date of this Act, and upon payment of the fair market value of the land as of May 13, 1949, plus the administrative costs of making the conveyance, as determined by the Secretary of the Interior, within one year after notification by the Secretary of the Interior of the amount due. In determining the fair market value of the land, the Secretary of the Interior shall not include any values added to the land by Ferne M. McNeil or her grantees or their heirs. Any conveyance made pursuant to this Act shall reserve to the United States all deposits of oil and gas in the lands, together with the right to mine and remove the same, under applicable laws and regulations established by the Secretary of the Interior.

SEC. 2. Acceptance by Ferne M. McNeil or her grantees or their heirs of any conveyance made hereunder shall constitute a waiver and release by them of any and all claims against the United States arising out of the operation, maintenance, or construction of the Buffalo Bill Reservoir as now or hereafter authorized, including, without limitation, by reason of enumeration, claims for seepage, wave action, blowing silt, or increase in ground water level."

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

SNOHOMISH TRIBE, UPPER SKAGIT TRIBE, AND THE SNOQUALMIE AND SKYKOMISH TRIBES

The Senate proceeded to consider the bill (S. 4078) to provide for the disposition of funds appropriated to pay judgments in favor of the Snohomish Tribe in Indians Claims Commission docket No. 125, the Upper Skagit Tribe in Indian Claims Commission docket No. 92, and the Snoqualmie and Skykomish Tribes in Indian Claims Commission docket No. 93, and for other purposes which had been reported from the Committee on Interior and Insular Affairs with an amendment on page 2, line 4, after the word "litigation," strike out "expenses, and such expenses as may be necessary in effecting the provisions of this Act" and insert "expenses", so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the funds appropriated by the Act of May 29, 1967 (81 Stat. 30, 42), to pay a judgment to the Snohomish Tribe in Indian Claims Commission docket numbered 125, and the Act of October 21, 1968 (82 Stat. 1190, 1198), to pay judgments to the Upper Skagit Tribe in Indian Claims Commission docket numbered 92, and the Snoqualmie and Skykomish Tribes in Indian Claims Commission docket numbered 93, together with the interests thereon, after payment of attorney fees and litigation *expenses,* shall be distributed as provided herein.

SEC. 2. The Secretary of the Interior shall prepare separate rolls of all persons born on or prior to and living on the date of this Act who are lineal descendants of members of the Snohomish Tribe, of the Upper Skagit Tribe, including the allied Suiattle-Sauk Band, and the Snoqualmie and Skykomish Tribes, as they were constituted in 1855.

SEC. 3. Applications for enrollment must be filed with the Superintendent, Western Washington Agency, Bureau of Indian Affairs, at Everett, Washington, in the manner and within the time limits prescribed for that purpose. The determination of the Secretary of the Interior regarding the utilization of available records and rolls, and the eligibility for enrollment of an applicant, shall be final.

SEC. 4. The judgment funds of the respective tribes shall be distributed per capita to the persons whose names appear on the roll of the respective tribe prepared in accordance with section 2 of this Act.

SEC. 5. Sums payable to adult living enrollees or to adult heirs or legatees of deceased enrollees shall be paid directly to such persons. Sums payable to enrollees or their heirs or legatees who are less than twenty-one years of age or who are under legal disability shall be paid in accordance with such procedures, including the establishment of trusts, as the Secretary of the Interior determines appropriate to protect the best interests of such persons.

SEC 6. The funds that are distributed per capita under the provisions of this Act shall not be subject to Federal or State income tax.

SEC. 7. The Secretary of the Interior is authorized to prescribe rules and regulations to carry out the provisions of this Act, including the establishment of deadlines.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1144), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of the bill, introduced by Senators Jackson and Magnuson, by request, is to dispose of three separate awards of the Indian Claims Commission to the Snohomish, Upper Skagit, and Snoqualmie-Skykomish Tribes, in the total amount of $779,335.50.

NEED

The money has been appropriated and most of it has been invested in U.S. Treasury bills. By reason of language contained in the annual appropriations act for the Department of the Interior, the Indians may not use the money until Congress has approved their plans.

None of the tribes has a reservation which is exclusively its own. Groups of Indians of the respective tribes identified themselves as the Snohomish Tribe of Indians, Upper Skagit Tribe, and Snoqualmie Tribal Organization. These organizations have not been recognized by the Federal Government as tribal entities. They have, however, been recognized for the purposes of pressing their land claims against the United States. Individual members of these organizations are considered descendants of members of former tribes rather than present-day members of successor tribes. There is no organization known as the Skykomish Tribe. There are, however, persons of Skykomish descent who are among the present-day Snoqualmie tribal membership.

The beneficiaries in each of the three awards have been determined to be the scattered living lineal descendants of members of the respective tribes as they existed in 1855, and include both reservation-affiliated and nonreservation-affiliated descendants. Entitlement is solely on the basis of descent. There is no blood degree restriction. Neither are persons of mixed tribal ancestry precluded from enrolling in more than one award, provided they meet the eligibility requirements for enrollment.

The bill provides for the preparation of separate rolls of the respective tribes, and the distribution of the funds per capita. The shares of minors and persons under legal disability are to be disposed of under Secretarial direction.

The exact number of persons who will share in each judgment is not known. It is estimated, however, there will be 2,450 enrollees participating in the Snohomish award of $136,165.79; between 1,000 to 1,500 enrollees, including Suiattle-Sauk Indians, in the Upper Skagit award of $385,471.42, and between 1,000 to 1,500 enrollees in the Snoqualmie-Skykomish award of $257,698.29.

COMMITTEE AMENDMENT

The committee has amended the first section of the bill to delete language that would have required a deduction from the funds to be distributed to the Indians to pay for the cost of the rolls which the Secretary of the Interior is required to prepare. In most judgment bills of this nature, where tribes have received substantial awards, it has been the practice of the Congress to provide that the cost of the rolls would be deducted from the principal sum. However, where, as in the present case, the judgment is comparatively small and the number of enrollees is very high, it is not believed equitable to further reduce the principal by charging the roll cost to the Indians.

STATEMENT OF INVESTMENTS

A current statement on investments of funds awarded these tribes was submitted by the Bureau of Indian Affairs at the time of the hearing on S. 4078. The statement is as follows:

Snoqualmie and Skykomish award fund docket No. 93—Statement as of COB July 9, 1970

Award–14X7445 awards of Indian Claims Commission, Snoqualmie Tribe of Indians on its behalf and in behalf of the Skykomish Tribe of Indians, docket 93	$257,698.29
Interest accrued on funds held in the U.S. Treasury through Dec. 31, 1969	2,057.64

U.S. TREASURY BILLS

Date acquired: January 8, 1970.
Maturity date: July 31, 1970.
Percent annual yield: 8.19.
Face amount: $236,000.
Principal cost: $225,665.41.
Income received: None.
Income accrued but not received: $9,119.

PREVIOUS AND CURRENT INVESTMENT OF AWARD AND JUDGMENT FUNDS

Tribe Snoqualmie and Skykomish docket 93

Certificate of deposit

1. Date of investment: (1) December 19, 1968, matured June 17, 1969 (180 days); (2) June 17, 1969, matured December 15, 1969 (181 days); (3) May 25, 1970, matures May 25, 1971 (365 days).

2. Amount invested: (1) $226,698.29, (2) $233,837 95, (3) $22,866.07.

3. Rate of interest (1) 6.25 percent compounded quarterly, (2) 6.25 percent compounded quarterly, (3) 7.5 percent compounded quarterly.

4. Earnings: (1) $7,139.66, (2) $7,405.72, (3) $1,791.28.

5. Disposition of earnings: (1) invested in TCD 52169 (2) deposited in U.S. Treasury interest account 147945, (3) to be reinvested or deposited into interest account.

Other information

The Snoqualmie and Skykomish Tribes are not federally recognized tribes and are organized for claims purposes only. While no written commitments were obtained, the chairmen of the tribes were consulted. Normally these groups meet on a yearly basis or upon special notices being sent to its members. Members are scattered throughout the State of Washington.

No preference as to bank was indicated by either tribe. Accordingly, on May 25, 1970, funds were invested with the First National Bank of Oregon for a period of 6 months. The maximum rate of interest was obtained, plus compounding of interest on a quarterly basis.

During the past 5 years this office has been investing funds with the following banks: U.S. National Bank of Oregon, First National Bank of Oregon, Bank of Idaho, National Bank of Washintgon.

These banks are within the three States covered by the Portland area office.

In order to obtain the most competitive rates, it has been the policy of this office to equalize our investments among the foregoing banks. Our normal procedure for the selection of the bank is to approach the bank that has the lowest amount of tribal funds in time deposits. If they are willing to meet the maximum rate of interest payable under regulations established by the Board of Governors of the Federal Reserve System, then such funds are invested with that bank without further solicitation from other banks.

At the time the investment was made, bank yields were higher than Treasury bills.

Income accrued but not received: $13,835.

PREVIOUS AND CURRENT INVESTMENT OF AWARD AND JUDGMENT FUNDS

Tribe Upper Skagit, docket 92, appropriated October 21, 1968

Certificate of Deposit

1. Date of investment: (1) December 19, 1968, matured June 17, 1969 (180 days); (2) June 17, 1969, matured December 15, 1969 (181 days); (3) May 25, 1970, matures May 25, 1971 (365 days).

2. Amount invested: (1) $343,471.42, (2) $354,288.75, (3) $29,411.86.

3. Rate of interest: (1) 6.25 percent compounded quarterly, (2) 6.25 percent compounded quarterly, (3) 7.5 percent compounded quarterly on 360-day factor.

4. Earnings: (1) $10,817.33, (2) $11,220.52 (3) $2,301.10.

5. Disposition of earnings: (1) invested in TCD 52168, (2) deposited in U.S. Treasury to interest account 147944, (3) to be reinvested or deposited in interest account.

Other information

The principal portion of the award is invested in Treasury bills expiring July 31, 1970. The amount invested in time deposits represents interest earned and a small balance of the principal. In order to obtain maximum interest for the tribe the amount stated was grouped with other tribal amounts.

No preference as to bank was indicated by the tribe. Accordingly, on December 19, 1968, funds were invested with the First National Bank of Oregon for a period of 6 months. The maximum rate of interest was obtained, plus compounding of interest on a quarterly basis.

During the past 5 years this office has been investing funds with the following banks: U.S. National Bank of Oregon, First National Bank of Oregon, Bank of Idaho, National Bank of Washington.

These banks are within the three States covered by the Portland area office.

In order to obtain the most competitive rates, it has been the policy of this office to equalize our investments among the foregoing banks. Our normal procedure for the selection of the bank is to approach the bank that has the lowest amount of tribal funds in time deposits. If they are willing to meet the maximum rate of interest payable under regulations established by the Board of Governors of the Federal Reserve System, then such funds are invested with that bank without further solicitation from other banks.

The Upper Skagit Tribe is not a federally recognized tribe and is organized for claims purposes only. While no written commitments were obtained, the chairman of the tribe was consulted. Normally this group meets on a yearly basis or upon special notices being sent to its members. Members are scattered throughout the State of Washington.

COST

No additional Federal appropriation will be required.

RENO-SPARKS INDIAN COLONY

The Senate proceeded to consider the bill (S. 3196) to declare that certain federally owned lands in the State of Nevada are held by the United States in trust for Reno-Sparks Indian Colony, and for other purposes, which had been reported from the Committee on Interior and Insular Affairs with an amendment, on page 4, line 10, after the word "sanitary", strike out "regulations, in the absence of State civil and criminal jurisdiction over" and insert "regulations for the use of"; so as to make the bill read:

S. 3196

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That all the right, title, and interest of the United States in the lands described below and all easements, right-of-way, and other appurtenances thereto are hereby declared to be held by the United States in trust for the Reno-Sparks Indian Colony, subject to all valid, outstanding interests, and rights-of-way:

RENO-SPARKS INDIAN COLONY

Two tracts of land located in section 7, township 19 north, range 20 east, Mount Diablo base and meridian, Washoe County, Nevada, more particularly described as follows:

Beginning at a point on the north county road right-of-way fence line, as it existed on January 22, 1927, being 1,268 feet east and 30 feet north of the west quarter corner of said section 7, said point being at the intersection of the boundary fence between L. M. Christensen and A. L. Hensen, as it existed on January 22, 1927, with said north county road right-of-way line:

thence north 00 degrees 08 minutes west 490.30 feet;

thence west, 787.74 feet;

thence south 00 degrees 12 minutes west, 490.30 feet to said north county road right-of-way fence line;

thence east along said fence line, 373.16 feet;

thence north, 104.35 feet;

thence east, 208.71 feet;

thence south, 104.35 feet to said north county road right-of-way fence line;

thence east along said fence line, 208.71 feet to the point of beginning; containing 8.38 acres, more or less; also.

Beginning at the intersection of the east line of the west half southwest quarter of said section 7 with the south line of Scott Street Road as it existed on March 8, 1917, said point being 30 feet south of the northeast corner of said west half southwest quarter;

thence south 89 degrees 35 minutes west, along the south line of said Scott Street Road, 361.2 feet;

thence south and parallel with the east line of said west half southwest quarter, 2,326.18 feet to the north line of Glendale Road, as it existed on March 8, 1917;

thence south 64 degrees 30 minutes east, along the north line of said Glendale Road, 400 feet to the east line of said west half southwest quarter;

thence north along said east line 2,501 feet, to the point of beginning; containing 20 acres, more or less.

The above-described lands contain an aggregate of 28.38 acres, more or less, known as the Reno-Sparks Indian Colony site.

SEC. 2. The governing body of the colony named in section 1 of this Act, with the approval of the Secretary of the Interior, may dedicate land to the public for streets, alleys, or other public purposes under those laws of the State of Nevada that are applicable to the dedication of land for public purposes.

SEC. 3. The governing body of the colony named in section 1 of this Act, with the approval of the Secretary of the Interior, may contract with the State of Nevada, or its political subdivisions, for the furnishing of water, sewage, law enforcement, or other public services on terms and conditions deemed advantageous to the colony and its occupants.

SEC. 4. The governing body of the colony named in section 1 of this Act, with the approval of the Secretary of the Interior, is hereby authorized to enact zoning, building, and sanitary regulations for the use of such colony site, and said governing body may contract with political subdivisions of the State of Nevada for assistance in preparing such regulations.

SEC. 5. In addition to any authority now existing, the governing body of the colony named in section 1 of this Act, with the approval of the Secretary of the Interior, may lease lands to members of the colony for homesite purposes for terms of not to exceed ninety-nine years, inclusive of all renewals.

SEC. 6. The governing body of the Reno-Sparks Indian Colony, with the approval of the Secretary of the Interior, may take such actions as may be necessary to quiet title to lands within the described boundaries of the colony including issuance of deeds for the purpose of extinguishing title to erroneous descriptions within the area and accept title in the name of the United States in trust for the Reno-Sparks Indian Colony in order to establish proper boundaries of the property.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1143), explaining the purposes of the measure.

There being no objection, the exerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of S. 3196 is to grant to the Reno-Sparks Indian Colony in Nevada the beneficial interest in and to 28.38 acres of land the colony has been using and occupying since the land was acquired by the Federal Government by purchase from private individuals for use as homesites for nonreservation Indians. The bill also authorizes the governing body of the colony, with the approval of the Secretary of the Interior, to make long-term leases of land to members for homesites, dedicate lands for public purposes, contract for public facilities and other services, enact zoning building, and sanitary regulations, and take action to establish proper boundaries of the colony lands.

NEED

The colony site consists of two tracts of land, one of which was acquired in 1917 and the other in 1927 pursuant to authority of, and with funds made available by, two acts of Congress for the purpose of procuring home and farm sites for the nonreservation Indians in the State of Nevada. Title to the land was taken in the name of the United States.

On June 10, 1935, the Indians residing in the colony voted to accept the Indian Reorganization Act of June 18, 1934, and later adopted a constitution and bylaws which was approved by the Secretary of the Interior on January 15, 1936. Article I of the constitution and bylaws provides that the organized colony shall have jurisdiction over all of the land within the boundaries of the colony site, except as otherwise provided by law.

The property since its purchase has been used almost exclusively for homesite pur-

poses by the colony members. There are now located on the land over 100 cottages and mobile homes. The value of these improvements, which are in varying degrees of repair and maintenance, has been estimated at approximately $125,000 to $150,000.

When purchased, the land was rural in character and location. In the intervening years the city of Reno has grown until the colony is completely surrounded on all sides. Nearly the whole acreage of the colony has been plotted into lots which have been assigned to members on an approved assignment form. Although the colony has domestic water and waste disposal facilities, which were completed in 1968, there is need for modernization and improvement of the housing and community facilities and services.

With the formal transfer of the beneficial ownership from the United States to the colony, any doubt of the rights and interest of the colony in and to the land and its authority to contract for improvements on or to the land and to make in-kind contribution toward the Neighborhood Facilities project will be resolved. The colony will also have authority to make long-term leases to its members for homesite purposes and thus enable the members to mortgage or otherwise hypothecate their leasehold interests as security for improvement loans and through this procedure effect an improvement in their housing conditions.

Although the constitution and bylaws adopted by the colony provide that the Indian council may exercise certain specified authorities, including the promulgation and enforcement of ordinances, to safeguard and promote the peace, safety, and general welfare of the colony, attempts of tribal governing bodies in this general area of autonomy have often given rise to serious questions. Accordingly, it is deemed desirable that this bill be enacted to remove any doubt as to the authority of the Indian council of the colony to take the actions therein authorized as and when the needs are indicated.

AMENDMENT

The committee has adopted an amendment to section 4 of the bill, recommended by the Department of the Interior, which makes clear that the assumption of civil or criminal jurisdiction by a States does not confer on that State either directly or indirectly the power to regulate the use of Indian trust land, but leaves such power with the Indian governing authority. The constitution and bylaws provide that the Indian council may exercise certain specified authorities, including the promulgation and enforcement of ordinances, to safeguard and promote the peace, safety, and general welfare of the colony.

COST

No additional Federal expenditures will result from the enactment of S. 3196.

COEUR D'ALENE INDIAN RESERVATION

The Senate proceeded to consider the bill (S. 3487) to authorize the sale and exchange of certain lands on the Coeur d'Alene Indian Reservation, and for other purposes which had been reported from the Committee on Interior and Insular Affairs with amendments on page 2, at the beginning of line 21, strike out "ownership to the Coeur d'Alene Tribe or to other Indians" and insert "ownership to the Coeur d'Alene Tribe, to any member thereof, or to any other Indian having an interest in the land involved,"; on page 3, at the beginning of line 10, strike out "Sec. 6. Any tribal land may, with the approval of the Secretary of the Interior, be encumbered by a mortgage or deed of trust and shall be subject to foreclosure or sale pursuant" and insert "SEC. 6. The business council of the Coeur d'Alene Tribe may encumber any tribal land by a mortgage or deed of trust, with the approval of the Secretary of the Interior, and such land shall be subject to foreclosure or sale pursuant"; and on page 4, at the beginning of line 2, strike out "115), is hereby further amended by inserting the words 'the Coeur d'Alene Indian Reservation.' " and insert "415), is further amended by inserting immediately after 'the Fort Mojave Reservation.' the words 'the Coeur d'Alene Indian Reservation,' "; so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That for the purpose of effecting consolidations of land situated within the Coeur d'Alene Indian Reservation in the State of Idaho into the ownership of the Coeur d'Alene Tribe and its individual members and for the purpose of attaining and preserving an economic land base for Indian use, alleviating problems of Indian heirship and assisting in the productive leasing, disposition, and other use of tribal and individually allotted lands on the Coeur d'Alene Reservation, the Secretary of the Interior is authorized in his discretion to:

(1) Sell or approve sales of any tribal trust lands, any interest therein, or improvements thereon.

(2) Exchange any tribal trust lands, including interests therein or improvements thereon, for any lands or interests in lands situated within such reservation.

SEC. 2. The acquisition, sale, and exchange of lands for the Coeur d'Alene Tribe pursuant to this Act shall be upon request of the business council of the Coeur d'Alene Tribe, evidenced by a resolution adopted in accordance with the constitution and bylaws of the tribe, and shall be in accordance with a consolidation plan approved by the Secretary of the Interior.

SEC. 3. Any moneys or credits received by the Coeur d'Alene Tribe in the sale of lands shall be used for the purchase of other lands, or for such other purpose as may be consistent with the land consolidation program, approved by the Secretary of the Interior.

SEC. 4. The Secretary of the Interior is authorized to sell and exchange individual Indian trust lands or interests therein on the Coeur d'Alene Reservation held in multiple ownership to the Coeur d'Alene Tribe, to any member thereof, or to any other Indian having an interest in the land involved, if the sale or exchange is authorized in writing by owners of at least a majority of the trust interests in such lands; except that no greater percentage of approval of such trust interests shall be required under this Act than in any other statute of general application approved by Congress.

SEC. 5. Title to any lands, or any interests therein, acquired pursuant to this Act shall be taken in the name of the United States of America in trust for the Coeur d'Alene Tribe or individual Indians and shall be subject to the same laws relating to other Indian trust lands on the Coeur d'Alene Reservation.

SEC. 6. The business council of the Coeur d'Alene Tribe may encumber any tribal land by a mortgage or deed of trust, with the approval of the Secretary of the Interior, and such land shall be subject to foreclosure or sale pursuant to the terms of such a mortgage or deed or trust in accordance with the laws of the State of Idaho. The United States shall be an indispensable party to any such proceedings with the right of removal of the cause to the United States district court for the district in which the land is located, following the procedure in section 1446 of title 28, United States Code: *Provided,* That the United States shall have the right to appeal from any order of remand in the case.

SEC. 7. The second sentence of section 1 of the Act of August 9, 1955 (69 Stat. 539), as amended (25 U.S.C. 415), is further amended by inserting immediately after "the Fort Mojave Reservation," the words "the Coeur d'Alene Indian Reservation,".

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-1146), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The bill authorizes the Secretary of the Interior to approve the sale, exchange, or encumbrance of tribal lands and to sell or exchange individually owned trust lands or interests therein held in multiple ownership to other Indians if the sale or exchange is authorized by the owners of at least a majority of the interests in such lands. It would also provide authority for long term leasing of trust lands up to 99 years.

NEED

The Coeur d'Alene Reservation, located in the northwestern part of Idaho in Benewah and Kootenai Counties, originally consisted of approximately 345,000 acres of tribal land. In 1909 approximately 102,570 acres were allotted to members of the tribe, 330 acres were reserved for administrative purposes, and the remaining lands comprising an area of over 242,000 acres were opened to settlement. Since allotment of the reservation lands and opening of the surplus lands to settlement approximately 80 percent of the land has passed from Indian ownership. As of June 30, 1969, there were 53,063 acres of trust land in individual ownership and 16,236 acres in tribal ownership.

The Coeur d'Alene Tribe adopted a land acquisition, consolidation, and development program in 1965 and put it into effect on the reservation at that time. To implement this program the Indians need additional authority for the acquisition and disposal of lands or interests in lands. The Coeur d'Alene Indians voted to reject the application of the Indian Reorganization Act of June 18, 1934, to their affairs. Consequently, the authorities contained therein with respect to acquisition, sale, and exchange of trust lands are not available to them.

The tribe set aside $1,150,000 from a 1958 award of the Indian Claims Commission in Docket No. 81. During the past 5 years the tribe has purchased over 3,000 acres of land at a cost of little over $450,000. Thirteen purchases are presently pending which will require an expenditure of about $300,000. The tribe is now planning a farming enterprise, and land consolidation is of much importance.

At the time of the approval of the land program the tribe owned 13,362 acres of trust land which consisted primarily of acreages restored pursuant to the act of May 19, 1958. This act also contained authority for the sale or exchange of the restored lands. However, the restored land is outside the general farming area and is not useful for trading and unitization purposes. The authority contained in S. 3487 will enable the tribe to dispose of these parcels and use the funds to acquire other tracts within the farming enterprise area or elsewhere on the reservation and assist tribal members in consolidating and unifying their individual interests thereby alleviating to some extent the heir-

ship problem. Further, it will be able to exchange lands with tribal members so that both the tribe and the members will have more economical and manageable units.

Although the tribe does not now have an urgent need for long term leasing authority, it does anticipate this authority will be needed within the foreseeable future. The tribe will endeavor to lease land for industrial purposes and has in mind that eventually it is going to become involved in some enterprises in the Coeur d'Alene Lake area.

AMENDMENTS

The Department of the Interior has suggested several clarifying amendments which were adopted by the committee.

No additional expenditure of Federal funds will result from the enactment of S. 3497.

HEALTH INSURANCE FOR FEDERAL EMPLOYEES AND ANNUITANTS

The Senate proceeded to consider the bill (S. 1772) to provide that the Federal Government shall pay one-half of the cost of health insurance for Federal employees and annuitants, which had been reported from the Committee on Post Office and Civil Service with an amendment, strike out all after the enacting clause and insert:

S. 1772

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, except as provided by subsection (b) of section 8906 of title 5, United States Code, effective from the first day of the first pay period which begins on or after July 1, 1970, and continuing until the first day of the first pay period which begins on or after January 1, 1971, the biweekly Government contribution for health benefits for an employee or annuitant enrolled under a health benefits plan under chapter 89 of title 5, United States Code, shall be equal to 40 percent of the average of the subscription charges in effect on the beginning date of the adjustment, with respect to self alone or self and family enrollments, as applicable, for the highest level of benefits offered by—

"(1) the service benefit plan;

"(2) the indemnity benefit plan;

"(3) the two employee organization plans with the largest number of enrollments, as determined by the Commission; and

"(4) the two comprehensive medical plans with the largest number of enrollments, as determined by the Commission.".

SEC. 2. Effective January 1, 1971, section 8906(a) of title 5, United States Code, is amended to read as follows:

"(a) The Government contribution for health benefits for employees or annuitants enrolled in health benefits plans under this chapter shall be adjusted on the first day of the first pay period of each year to an amount equal to 40 percent of the average of the subscription charges in effect on the beginning date of the adjustment, with respect to self alone or self and family enrollments, as applicable, for the highest level of benefits offered by—

"(1) the service benefits plan;

"(2) the indemnity benefit plan;

"(3) the two employee organization plans with the largest number of enrollments, as determined by the Commission; and

"(4) the two comprehensive medical plans with the largest number of enrollments, as determined by the Commission.".

SEC. 3. (a) Section 8901(3)(B) of title 5, United States Code, is amended to read as follows:

"(B) a member of a family who receives an immediate annuity as the survivor of an employee or of a retired employee described by subparagraph (A) of this paragraph;".

(b) Section 8901(3)(D)(i) of title 5, United States Code, is amended by striking out ", having completed 5 or more years of service,".

SEC. 4. (a) Section 8907(a)(B) of title 5, United States Code, is amended by inserting "and the Panama Canal Zone" immediately before the semicolon at the end thereof.

(b) Section 8901(1)(ii) of title 5, United States Code, is amended by inserting "and the Panama Canal Zone" immediately before the semicolon at the end thereof.

SEC. 5. (a) The Retired Federal Employees Health Benefits Act (74 Stat. 849; Public Law 86-724) is amended as follows:

(1) Section 2(4) is amended by inserting immediately before the period at the end thereof a comma and the following: "and includes the Social Security Administration for purposes of supplementary medical insurance provided by part B of title XVIII of the Social Security Act";

(2) Sections 4(a) and 6(a) are each amended by adding at the end thereof the following sentence: "The immediately preceding sentence shall not apply with respect to the plan for supplementary medical insurance provided by part B of title XVIII of the Social Security Act."; and

(3) Section 9 is amended by adding at the end thereof the following subsection:

"(f) Notwithstanding any other provision of law, there shall be no recovery of any payments of Government contributions under section 4 or 6 of this Act from any person when, in the judgment of the Commission, such person is without fault and recovery would be contrary to equity and good conscience.".

(b) The amendments made by subsection (a) of this section shall become effective on October 1, 1970.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91-1151), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

S. 1772 will increase the amount paid by the Federal Government toward the cost of the premium charged for health insurance authorized by the Federal Employees Health Benefits Act from $1.62 (for self only) or $3.94 (for family coverage) for each biweekly pay period (which in practice is about 24 percent of the average cost of high option family insurance) to a permanent level of 40 percent of the average premium charged for high option coverage offered by the six largest insurance programs operating under the act.

STATEMENT

The Federal employees health insurance program was enacted in 1959 to provide a comprehensive health insurance protection for all Federal employees, members of their families, and employees and their families after retirement from the Federal service. Nearly 8 million employees and family members are now covered and more than 3½ billion dollars in benefits have been paid during the 10 years of the programs operation.

Under the act, there are two Government-wide insurance programs, one based on a "service benefit" scheme (Blue Cross) and the other based on indemnification to the employee for medical expenses incurred (Aetna). Health insurance programs offered by Federal employee unions and associations or by local or regional health insurance carriers approved by the Civil Service Commission are also eligible to offer insurance to employees and participate in the program.

Nearly all eligible Federal employees are covered by health insurance. When the program was established in 1960, two basic plans were developed and offered: a "low option" plan giving basic protection for medical, hospital, and surgical expenses at very reasonable rates; and a "high option" plan, designed to appeal to employees who desire very broad and reasonably expensive insurance. Based on the evidence available at the time, including the testimony of Federal employee unions before the Senate Post Office and Civil Service Committee, it was assumed that most employees would choose low option insurance.

To share the cost of the program, the organic act provided that the Government would contribute a specific dollar amount at that time estimated equal to one-half of the cost of the least expensive Government-wide program. Employees who choose high option protection or any other protection which costs more than twice the Government contribution bear the full cost of the additional expense.

Experience has proven that employees prefer high option protection. Today, close to 90 percent of all employees elect high option coverage even though the Government's contribution amounts to only 24 percent of the average cost of high option family protection. Apparently, employees prefer the greater insurance protection of the high option plans and are willing to pay for it.

By 1966 the Government's contribution had dropped from its original 38 percent of high option cost to less than 30 percent. In Public Law 89-504, the Congress increased the dollar amount of the Government's contribution so that the Government's share rose to 37 percent of high option cost. Since that time, premium increases have reduced the Government's contribution to 24.2 percent of the average cost of high option protection.

JUSTIFICATION

As introduced, S. 1772, provided that the Government's contribution be permanently set at 50 percent of the cost of the least expensive Government-wide high-option plan and that annual adjustments be made in the Government contribution to maintain that level. Since our hearing on this legislation in April 1969, the House Committee on Post Office and Civil Service reported legislation establishing the Government's contribution at 50 percent of the average cost of high option insurance offered by the two Government-wide programs, the two largest Federal employee union programs, and two comprehensive medical plans designated by the Civil Service Commission. The Commission has endorsed the theory of relating the Government's contribution to the average cost of the most heavily subscribed programs and relating the Government's contribution to high option, rather than low option, because of the overwhelming preference which employees have consistently demonstrated for high-option protection.

The committee therefore recommends an amendment to S. 1772 to conform to the recommendations included in the House bill, which is also unanimously endorsed by Federal employee unions and associations. But we recommend that in order to control the substantial costs involved, the Government contribution be set at 40 percent of the premium rather than 50 percent as originally contained in S. 1772 and as recommended by the House.

Evidence presented to the committee in its hearings on S. 1772 demonstrates beyond reasonable question that employers in the private sector of the economy generally pay a far greater percentage of the cost of health

insurance than does the Federal Government. An accurate comparison of insurance protection is very difficult to make because of the difference in protection offered under individual plans, but the committee has examined enough evidence of the kind of medical protection offered by major employers in the private sector of the economy to recommend without reservation a substantial increase in the Government's contribution to the overall cost of the program.

OPPORTUNITIES TO CHANGE ENROLLMENT

The Federal Employees Health Benefits Act provides that an employee on annuitant may transfer his enrollment at such times and under conditions prescribed by regulations of the Civil Service Commission. These regulations specify 13 events (such as a change in family status, assignment to or from overseas, or attainment of age 65) which permit an employee to transfer his enrollment. These events recognize that an employee's circumstances may change so as to require a change in his coverage, but they are generally outside the direct control of the employee so that he cannot manipulate changes in his enrollment to his best advantage and adversely to the plans which participate in the program.

Additionally, the regulations require that an "open season" during which any employee may freely change plans, options and type of coverage, be held at least once every 3 years. Benefits and premium changes for all the plans are announced and publicized by the Commission in advance of an open season so that each employee has an opportunity to review the benefits and costs being offered by all the plans available to him and to reselect the coverage that best suits his needs. Including the initial enrollment in the spring of 1960, the Commission has declared six open seasons at irregular intervals ranging from 1 to 3 years. The latest open season was held in the fall of 1969, 3 years after the preceding open season.

The committee believes that, because of continuing new developments in medical care and in health benefits coverage and because of sharp and frequent increases in premium, employees should have timely opportunities to adjust their coverage. Of particular concern is the question of whether an employee should be afforded an opportunity to change if his plan has a premium increase. We therefore urge the Commission to reexamine the opportunities afforded employees to adjust their coverage through open seasons, without sacrificing the safeguards against adverse selection (such as a change from low to high option when serious illness or hospital confinement can be anticipated) which could impair the financial soundness of a plan and result in extraordinary premium increase for employees remaining in that plan.

HEALTH INSURANCE COSTS AND SERVICE

The committee is seriously concerned about the continuing increase in the costs of medical, surgical, and hospital services under this program. Our schedule for the remainder of the 91st Congress does not permit time to initiate a significant study of even the major aspects of this problem, but the groundwork should be begun now for a very thorough analysis of Federal employees health benefits and the implications of recent developments in the field of health protection for Federal employees.

The program authorized by the Federal Employees Health Benefits Act will cost more than a billion dollars in premiums next year and the Congress should have adequate data to evaluate the total effectiveness of the program as an insurance system.

As a beginning, the committee instructs and specifically authorizes the majority and minority staff of the committee jointly to carry out a preliminary investigation of the entire program. The staff is authorized to investigate any matters which it may determine should be brought to the committee's attention and to call upon the Commission and the insurance carriers to obtain the kind and quality of information upon which the committee can rely in developing a formal committee investigation, report, and possible proposed legislation.

COVERAGE FOR VISION CARE SERVICES

The American Optometric Association has pointed out that services rendered by a licensed optometrist which would be covered under most health insurance plans offered by carriers if the service were rendered by a doctor of medicine are not paid for because the insurance carriers do not define the practice of optometry.

The Civil Service Commission has heretofore refrained from attempting to require a carrier to identify individual fields of medical or quasi-medical service for coverage on the grounds that the carrier should have freedom to determine what types of medical care should be covered.

The committee appreciates the position of the Commission; but in practice, permitting the insurance carriers to be the sole judge of what practitioners are covered results in charging the employee with costs for services which, had they been rendered by a different practitioner, would have been paid for by the carrier. The employee, therefore, loses protection which he has a right to expect as a subscriber and participant in the plan.

The committee instructs the Civil Service Commission to consult with carriers to determine what steps can be taken to correct this situation. If carriers express unwillingness to recognize additional practitioners of these covered services, the Commission should advise the committee what legislation will be necessary to insure that employees have covered services paid for by their health benefits insurance.

COSTS

The present cost of the Federal employees health insurance program is $958 million a year. Assuming an increase of 12 percent in the cost of insurance effective in January 1971, the cost for the year 1971 to the Government because of the enactment of S. 1772 will be approximately $169 million.

PUBLIC HEARINGS

Public hearings on S. 1772 were held before the Subcommittee on Health Benefits and Life Insurance on April 29 and 30, 1969. The hearings were printed and are available.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended, so as to read: "An act to increase the contribution by the Federal Government to the cost of health benefits insurance and for other purposes."

Mr. BYRD of West Virginia subsequently said: Mr. President, I ask unanimous consent that the action of the Senate taken this morning in passing the bill (S. 1772), to provide that the Federal Government shall pay one-half the cost of health insurance for Federal employees and annuitants, be vacated.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADJUSTMENT OF GOVERNMENT CONTRIBUTION FOR FEDERAL EMPLOYEE HEALTH BENEFITS

The bill (H.R. 16968) to provide for the adjustment of the Government contribution with respect to the health benefits coverage of Federal employees and annuitants, and for other purposes was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1084), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The major purpose of the legislation is to relieve employees and annuitants from continuing to bear a disproportionately large share of the premium charges under the Federal Employees' Health Benefits program.

It is also the purpose to extend coverage under this program and the Federal Employees' Group Life Insurance program to non-citizen employees of the United States in the Panama Canal Zone; to permit Part B of Medicare to be a qualifying plan under the Retired Federal Employees' Health Benefits program; and to correct an inequity with respect to the survivors of employees who have less than five years of service.

SUMMARY OF H.R. 16968

Government contributions.—H.R. 16968 provides that effective in January 1971, and each year thereafter, the Government's share of the premiums charged under the Federal Employees' Health Benefits program will be pegged to the high-option level of benefits, using a premium base representative of the different kinds of plans that participate. Each year the unweighted average of the high-option premiums for self only or for self and family of the two Government-wide plans, the two largest employee-organization plans, and the two largest prepayment group practice plans will be used to determine the maximum Government contribution to all plans and options. These six plans currently represent approximately 90 percent of all enrollments. The maximum Government contribution for all employees and annuitants would be fixed at 50 percent of such average. The Government contribution could not, however, exceed 50 percent of the premium charges for a plan's low-option level of benefits.

This proposal eliminates the maximum dollar amounts and expresses the Government contribution in terms of a percentage of total subscription charges. It has the added advantage of annual automatic adjustment. To illustrate, if it were applied to current 1970 high-option premiums, the monthly Government contribution for family enrollments would increase from $8.88 to $19.85, and for individual enrollments from $3.64 to $7.80. Beginning next January, though, premiums probably will be increased further, and the average for the six plans would be recomputed, with the Government contribution adjusted upward beyond the amounts cited.

It is the judgment of the Committee that to do less would perpetuate the unfair practice of requiring retirees and employees to bear the "lion's share" of incessantly rising costs. This legislation will put meaning into the funding formula by updating it in a manner to assure that the Government is at least striving to match private industry's trend toward providing its workers and pensioners cost-free health insurance.

Short-term employees.—The existing health benefits laws requires that in order for the surviving spouse or children of a deceased Federal employee to retain the health benefits protection accorded them during his lifetime, the decedent must have completed at least five years of service. However, Public Law 91–93, approved October 20, 1969,

amended the civil service retirement law to grant annuity benefits to such survivors of employees who die in active employment after completing at least 18 months of service. To conform to that length of service modification, H.R. 16968 provides for the continuance of health benefits coverage to the survivor annuitants of such short-term employees. The amendment also applies to the survivors of an employee who dies as a result of a job-incurred injury or illness, and who are eligible for employee compensation benefits.

Canal Zone noncitizens.—From the enactment of the Federal Employees' Group Life Insurance Act in 1954 and the Federal Employees' Health Benefits Act in 1959, all noncitizen employees whose permanent duty stations are outside the United States have been excluded from coverage under both programs.

Noncitizen employees have constituted the bulk of our Government's work force in the Canal Zone during the digging of the Panama Canal and since its opening in 1914. They have performed loyally and well for the United States.

These exclusions have not been in consonance with the repeatedly enunciated public policy of assuring to Panamanian citizens employed by our Government in the Canal Zone equality of treatment with United States-citizen employees stationed in Panama. The promise of parity has been only partially achieved, primarily in the areas of wages and retirement coverage.

To fulfill the long-standing commitments of the United States contained in treaty negotiations and reaffirmed in subsequent Memoranda of Understandings—to make available to Panamanian employees the same governmental health and life insurance benefits as are available to United States-citizen employees—this legislation extends coverage under both the Federal Employees' Health Benefits and Federal Employees' Group Life Insurance programs to non-citizens actively employed by the United States in the Panama Canal Zone. This amendment, however, has no application to noncitizens permanently employed in other worldwide areas outside the United States and the Panama Canal Zone.

Part B, Medicare for certain retirees.—The Retired Federal Employees' Health Benefits Act, applicable to pre-July 1960 retirees and survivors, restricts a direct Government contribution to only those annuitants who subscribe to health insurance plans offered by nongovernmental organizations, and denies such contribution in the event he or she receives a Government contribution toward another plan.

This legislation amends Public Law 86–724 to the extent that Part B of the Medicare program will constitute a qualifying plan. Thus, some of this class of annuitants who are not receiving the Government contribution otherwise authorized, and some who are using it for nongovernmental-sponsored plans, will be eligible to receive the respective $3.50 or $7.00 monthly contribution to apply in payment of their share of supplementary medical insurance under the Medicare program.

The bill also authorizes the Civil Service Commission to waive the recovery of any such direct payments when, in the Commission's judgment, the annuitant is without fault and when recovery would be contrary to equity and good conscience.

BACKGROUND—FEDERAL EMPLOYEES' HEALTH BENEFITS PROGRAM

The Federal Employees' Health Benefits Act of 1959 (Public Law 86–382, approved September 28, 1959, chapter 89 of title 5, United States Code) established the largest voluntary group health insurance plan in existence in the United States, effective July 1, 1960. It made basic and major health protection available to Federal employees in active service on and after July 1, 1960, and to their families. Such group coverage was also extended to those (and their families) who would retire from active service thereafter.

The primary purpose of the legislation was to facilitate and strengthen the administration of the activities of the Federal Government generally and to improve personnel administration by providing a measure of protection for civilian Government employees against the high, unbudgetable, and, therefore, financially burdensome costs of medical services through a comprehensive Government-wide program of insurance for Federal employees and their dependents, the costs of which were to be shared by the Government, as employer, and its employees.

Since its inception, employees have had a free choice among plans in four major categories, including (1) a Government-wide service benefit plan offered by Blue Cross-Blue Shield, (2) a Government-wide indemnity plan offered by the insurance industry, (3) one of several employee organization plans, and (4) a comprehensive prepayment plan. The two Government-wide plans must offer at least two levels of benefits—a low option or "standard" policy and a high option or "preferred" policy. While the current 36 employee organization and prepayment plans may offer two levels of benefits, only 14 do so, the remaining 22 offering only a high option level. All plans allow for coverage for self alone, or for self and family.

Perhaps the program is unique when compared with traditional patterns in private industry, in that the employee has a broad range of choice between carriers and levels of benefits, and, to a lesser degree, may continue coverage into retirement. While the law prescribes, in general, the types of benefits to be provided under all plans, it authorizes the Civil Service Commission to contract with qualified carriers for such services, subject to any maximums, limitations, or exclusions considered necessary or desirable. However, it stipulates that the rates charged under all plans reasonably and equitably reflect the cost of the benefits provided, and that the rates of the two Government-wide plans be determined on a basis which is consistent with the lowest schedule of basic rates generally charged for new group plans issued to large employers.

In the development of the enabling legislation, congressional proponents favored a 50–50 employee-employer sharing of all costs and such a rate of contribution was included. However, because of the unknown factors inherent in an entirely new area of Federal employee fringe benefits in which the Government had no previous experience, and because of fiscal considerations, a limitation was placed on the maximum contribution to be paid by the Government. This maximum was geared to the least expensive Government-wide low option plan and a dollar limitation was imposed which, at that time, contemplated that a "standard" policy which would be adequate for most employees' needs could be purchased on a 50–50 sharing basis. It provided, further, that "preferred" policies be made available, but that those employees enrolling in high option or more expensive prepayment plans would pay the entire costs of the additional richer benefits.

In 1960 the initial distribution of enrollments between self-only and family coverage, between high and low options, and among the various 30-odd plans resulted in the Government's contributing approximately 38 percent of the aggregate premiums for all enrollments, with employees contributing 62 percent.

As time went on, this 38 percent Government share of the aggregate premium gradually diminished for two main reasons: (1) employees gravitated toward the more adequate high options; and (2) high-option premiums increased because the cost of medical care increased, improved benefits were made available, and a relatively high morbidity was experienced. In contrast, experience of the low options was very good because there was a strong tendency for healthy employees with healthy families to choose this less expensive coverage. Until recently, low-option premium rates remained fairly stable and the Government contribution, which was geared to these rates, could not be increased to reflect the increasing cost of medical care.

By 1966 the Government's share of the program's cost was down from 38 percent to 28 percent of the total average premium. Effective in August of 1966, Public Law 89–504 (5 U.S.C. 8906(a) and (b)) increased the maximum Government contribution so as to restore it, in effect, to the less-than-ideal initial 1960 level of 38 percent. However, premium increases (primarily for high options) in January of 1967, 1968, 1969, and 1970, have again diminished the Government's contributions to approximately 24 percent of present aggregate premiums. In fact, there are now only a few low-option plans in which the Government's contribution equals one-half of the total premium charges.

RETIRED EMPLOYEES' HEALTH BENEFITS PROGRAM

The Retired Federal Employees' Health Benefits Act of 1960 (Public Law 86–724, approved September 8, 1960) established a health benefits program, effective July 1, 1961, for Federal retirees and their dependents who were not eligible to enroll in the Federal Employees' Health Benefits program because of their retirement prior to July 1, 1960.

Experienced gained from implementing the 1959 Act indicated the desirability of establishing (1) a single uniform Government-wide plan, rather than the multiplicity of plans developed under the active employee program; and (2) in order to meet the varying needs of retirees, to grant the option of a person retaining or enrolling in a private health benefits plan (subject to certain qualification requirements), with the Government's contribution to the cost being paid directly to the annuitant.

Pursuant to the statutory authority, the Civil Service Commission entered into a contract with the insurance industry (Aetna) for a uniform plan, in which the retiree had the option of electing a basic policy and/or a major policy. While the law provides a minimum $3 and a maximum $4 monthly Government contribution for self-only coverage, the Commission allows a Government contribution for self-and-family of $3.50 per month. The Government contributions for self-and-family is twice that amount, or $7 per month. These same contributions are generally paid to annuitants who elect a direct payment.

Subsequent to the advent of Medicare, the total premium charges for the Uniform plan have been substantially reduced, but the Government contribution has remained constant. In some cases the Government contribution is as much as two-thirds, whereas in others it ranges from one-third to one-half of the total charges.

This particular program will eventually cease to exist when the pre-July 1, 1960, retirees and their survivors become deceased.

STATEMENT

The Committee on Post Office and Civil Service considers the operation of the Federal employees' and annuitants' health benefits programs to be one of its most important responsibilities. In fulfillment of this responsibility, its Subcommittee on Retirement, Insurance, and Health Benefits recently conducted public hearings to review and evaluate the experience and administration of these programs, which are

of vital importance to both the active and retired Federal workforce.

Enrollments under these programs approximate 2.8 million employees and annuitants, over 5½ million dependents, or a total of almost 8½ million persons. Benefits valued at approximately $800 million were provided during the calendar year 1969.

Under the Federal Employees' Health Benefits program, the two Government-wide plans account for 79 percent of total enrollment; employee organizations plans 15 percent; and prepayment plans 6 percent. About 84 percent of all enrollments are in the high option levels, and three-fourths of all enrollments are in the family category. Under the Retired Federal Employees' Health Benefit program, enrollments in the Uniform plan account for slightly less than half of the total persons covered.

The Committee has had a continuing concern over the sky-rocketing costs of providing health benefits protection under the programs within its jurisdiction. Medical care costs, including the cost of hospitalization, surgery, physician and nursing fees, drugs and medicines, and laboratory services, have spiraled in recent years and continue to accelerate faster than the prices of any other commodities or services.

In the post-World War II period charges for medical care have risen persistently. From 1946 thru 1969 the medical care component of the Consumer Price Index increased by 158 percent, to 258 percent of what it was in 1946. During the same years the index for all consumer items rose at a much slower rate, increasing comparatively by 88 percent.

Increases in medical care costs have particularly occurred since 1959. With a base period of 1957–59 equaling 100, the medical care index rose from 104.4 in 1959, the year in which the Federal Employees' Health Benefits program was enacted, to 159.0 in January of 1970. The "all items" index increased from 101.5 in 1959 to 131.8 in January of 1970. While the medical care index rose by an average rate of 4.7 percent annually during the 1950's, it is slowed somewhat during the early 1960's as medical care prices followed the generally slower rise of all service industry prices. In the late 1960's, however, medical care prices have increased at a much faster rate, rising 6.6 percent in 1966, 6.4 percent in 1967, 6.1 percent in 1968, and 6.9 percent in 1969.

A particularly disturbing fact is that daily hospital rates have been increasing more rapidly than any other component of the medical care price index, which increased 595 percent in the post-war period; that is, they increased to 695 percent of what they were in 1946. While physicians' fees increased 142 percent over the same period, the index for all consumer items increased 88 percent. Within the medical care component, hospital room rates rose especially sharply, increasing by 16.5 percent in 1966, and leaping further by an additional 15.5 percent in 1967.

The problem of escalating health care costs is common to all segments of the Nation, and it is apparent that the Committee's scope of activity cannot, unfortunately, effectively stop or minimize spiraling costs of medical care. Premiums must be sufficient to pay for the benefits provided, and rate increases must be approved annually in order to maintain the financial soundness of the plans participating in the Federal Employees' Health Benefits program.

As heath care costs rise, the portion of them not covered by insurance constitutes a greater burden for Government employees and annuitants. As premium charges rise to cover such costs, an additional financial burden is imposed upon these employees and retirees. Our concern is heightened by the fact that the enrollees have been repeatedly forced to assume all of the premium increases attributable to spiraling hospital and medical costs, due to the obsolete dollar limitations imposed upon the Government contribution in years past.

Since the inception of the program, the Government has made a uniform dollars-and-cents contribution to the enrollees' selected health insurance plan. In 1960 that monthly contribution of a self-and-family plan was $6.76, which was 50 percent of the cost of the least expensive Government-wide low option plan. Most participants did not choose low option benefits, however, but selected the more adequate high option coverage. Such preponderance of selection resulted in employees sharing more than 60 percent of the cost of their respective plans. As premium charges increased thereafter, because of the fixed maximum contribution, the Government's relative percentage of contribution declined to an average of 28 percent of total charges.

The individual's plight was slightly alleviated in 1966 when the uniform monthly Government contribution was increased to $8.88. Within a period of five short months, because of continuously rising premium charges, the Government's relative share again began to decline below an average of 38 percent of charges. In fact, during the program's ten-year history premium costs have increaesd by more than 120 percent, but enrollees' costs have increased by over 175 percent, while the Government's contribution, as a percentage of the total, has declined by 40 percent. The real inequity, attributable to the Government's fixed dollar contribution, is that employees and annuitants are presently paying over 75 percent of the costs of their medical insurance, whereas the Government is paying less than 25 percent of the total costs.

The Committee takes cognizance of a recent actuarial evaluation of the program made by Milliman and Robertson, Inc., regarded by the insurance industry as one of the country's leading consultants in the field. The consulting actuaries report stated:

It would seem desirable for the government to pay a larger part of the premium since the limitations now imposed have resulted in the decreasing percentage of contribution observed.

Recognizing the traditionally conservative nature of actuarial authorities, particularly in submitting such a report to the Government, the Committee feels the suggestion to be most compelling, the variable being the relative percentage of costs that the Government will equitably assume. In an apparent effort to indicate what funding role the Government should play, the actuarial consultants reported:

A review was made of seven very large employer plans that had been recently revised, and which have benefits comparable to the government-wide plans.

In all instances the employer paid part of the cost; in three instances the entire premium for both employees and dependents was paid by the employer; in only one case was the employee contribution more than $3.00 for an individual enrollment or $7.00 for a family enrollment.

It is the opinion of the Committee, supported by voluminous testimony, that the Federal Government, as a major employer, is lagging far behind major employers in the private sector in this important area of employee benefit programs. Evidence, confirmed by official Government statistics and analyses, shows that major industrial employers are paying most, if not all, of the cost of comparable health benefits protection for their workers. In acknowledging this relative position, and agreeing that an increase in the Government contribution is justified, the Administration recommended a measure of partial relief—that is, to increase the Government's contribution to a level comparable to what it was 10 years ago.

It is the consensus of the Committee, however, that the Government's maximum contribution under the Federal Employees' Health Benefits program be increased to a level at which it will share equally with most of the program's enrollees the premium charges for coverage, and that such cost-sharing ratio be maintained in future years.

COMMENTARY

During the course of hearings on this legislation, information was developed that the Service Benefit Plan sponsored by Blue Cross-Blue Shield still provides, in certain geographic areas, only a limited basic surgical-medical benefit if the subscriber's income exceeds a certain amount. Stated differently, the plan, in affected areas, provides the same dollar benefit for all subscribers. However, if the subscriber is under the income ceiling, the participating doctor must accept the benefit as payment in full; if the subscriber is over the income ceiling, the doctor can impose an additional charge which may be partly covered by supplemental benefits or not covered at all.

The Committee is aware that income ceilings at one time were the *modus operandi* of all local Blue Shield plans, but that income ceilings have been abandoned except in a very few localities, notably the local Blue Shield Plan in the Washington, D.C., metropolitan area—which probably serves more Federal employees than any other local plan. The Committee believes that income ceilings are an anachronism, that they discriminate against Federal employees in areas where they are still applied, and strongly urges that they be eliminated forthwith.

Representations have been made to the Committee by the American Optometric Association that plans which participate under the Federal Employees' Health Benefits program do not include optometrists in their definition of the term "doctor". The significance of this exclusion is that a Federal employee who chooses to be treated by an optometrist for a condition that would be covered if treated by a physician, receives no health benefits for the expense involved.

The Committee views the recognition of various practitioners of the healing arts for licensing and insurance purposes, as falling within local or State, rather than Federal, jurisdiction and believes it inappropriate for the Congress to legislate concerning this matter. It is the Committee's understanding that the laws of many States already require insurance carriers to pay for the services of optometrists, who are not physicians, when these services would be covered if provided by a physician.

Although the Committee is not, for the reasons indicated, recommending legislation on this point, it is of the opinion that a Federal employee should not be denied benefits for a covered service because he chooses to have it performed by an optometrist, rather than a physician. It is recommended that the Civil Service Commission take appropriate action to inform carriers that the fact they are administering a Federal contract is no reason for circumventing compliance with applicable State laws.

The Committee also observes the favorable experience of the Retired Federal Employees' Health Benefits program's Uniform Plan. The hope is expressed that with such continued experience the Civil Service Commission will find it feasible to further reduce those annuitants' contributions and/or improve the extent of benefits provided, without any diminution of the Government contribution.

It is the Committee's belief that an educational program, well-conceived and widely broadcast among all participants and all carriers, will be of value in somewhat limiting the incessant trends toward increased costs. A resulting abatement of these trends may presumably result from the elimination of some unnecessary utilization of medi-

cal services or excessive charges for certain services. It is felt that such a program would be mutually beneficial to the employees and annuitants, the taxpayers, and the carriers. Should it not be feasible for the Civil Service Commission to conduct a program of this nature directly, it is recommended that the Commission exert its influence and prestige upon the participating carriers toward its development and implementations.

EFFECTIVE DATES

The amendments made by sections 1 and 4 are effective as specified in the sectional analysis. The amendments made by sections 2 and 3 are effective on the date of the enactment of this legislation.

COAST GUARD RESERVE LAWS

The bill (H.R. 13716) to improve and clarify certain laws affecting the Coast Guard Reserve was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1152), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of the bill is to modify in several respects the law affecting the Coast Guard Reserve. In general, the modifications are designed not only to meet the particular problems of the Coast Guard, but also to conform more closely to practices obtaining in the other armed services.

The major change involves the substitution of a best qualified system of promotion as used in the other armed services for the present fully qualified system now in operation in the Coast Guard. The need for this arises from the composition of the Coast Guard Reserve which was established in 1941. A disproportionate number of officers entering at that time have arisen to the ranks of captain, commander, and lieutenant commander. The presense of large numbers of officers in those grades has seriously inhibited the promotion of younger officers from junior grades and has prevented the proper operation of the running-mate system. That system established a relationship between individual Reserve officers and those in the Regular Establishment. By reason of the disproportionate number of higher grade officers in the Reserves, the reservists are up to 4 years behind their running-mates in promotions and the gap is widening.

By the substitution of the selection method of best qualified, it is anticipated that this problem will be solved in a reasonable time and will increase the quality of the Reserve Officers Corps.

In view of the small size of the Women's Reserve, it is not practicable to utilize a corresponding system and, as a result, it has been determined that the continuation of a fully qualified promotion system with some modifications is most desirable. To achieve the best results, the fully qualified method of selection is retained, through the grade of lieutenant commander, and best qualified is substituted as the test above that grade. Again, in an effort to relieve the present stagnation, it is proposed to eliminate those officers who have twice failed of selection to a higher grade, thus making openings for the promotion of younger junior officers.

Another provision would assign an officer on the active duty promotion list as the running mate of a reservist not on the active duty promotion list, and it is believed that this will effect an administrative improvement. In this connection, the House of Representatives adopted a single amendment to H.R. 13716 with respect to Reserve officers who are commissioned on one date but not called to active duty until some later date. In order to correct an inequity that might otherwise occur in that situation, the House amended the bill to provide that the effective date of the reserve commission was the date of appointment.

Another provision is that Reserve admirals are limited to an active status for not more than 5 years. This will increase the opportunity of promotion for captains to flag rank and it is believed that such a time limit is desirable.

The committee is of the opinion that the bill will serve to increase the effectiveness of the reserve system in the Coast Guard.

COST OF LEGISLATION

Enactment of the legislation is projected to result in additional cost for pay and allowances of $38,000 in the first year of enactment. This cost should increase to zero over the next 4 years. The bill will also result in additional cost of $18,000 per year in retirement pay, to commence approximately 8 years in the future.

WATER RESOURCES RESEARCH ACT AMENDMENTS

The Senate proceeded to consider the bill (S. 3553) to amend the Water Resources Research Act of 1964 to increase the authorization for water resources research and institutes, and for other purposes, which had been reported from the Committee on Interior and Insular Affairs, with amendments, on page 1, at the beginning of line 6, strike out "'$250,000', and (B) by adding a sentence at the end of the subsection to read as follows: 'The amounts authorized to be appropriated by this subsection to assist each participating State shall be increased or decreased in fiscal year 1972 and each year thereafter in proportion to the average increase or decrease of the costs of such research and training as determined by the Secretary of the Interior in accordance with a suitable formula to reflect the average increase or decrease adjustments in Federal employee salaries as determined by the United States Civil Service Commission based on findings derived from Bureau of Labor Statistics figures comparing Federal salaries with industrial salaries.'" and insert "'$200,000.'"; and on page 2 after line 23, insert a new section, as follows:

SEC. 3. Section 306 of the Water Resources Research Act of 1964 is amended by inserting immediately before the period at the end thereof a comma and the following: "the District of Columbia, and the territories of the Virgin Islands and Guam."

So as to make the bill read:

S. 3553

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 100(a) of the Water Resources Research Act of 1964 (78 Stat. 329; 42 U.S.C. 1961a), is amended (A) by striking out "$100,000" and inserting in lieu thereof "$200,000."

SEC. 2. The second sentence of section 100 (b) of the Water Resources Research Act of 1964 (78 Stat. 329; 42 U.S.C. 1961a) is amended by inserting after the word "problems", the following: "and scientific information dissemination activities, including identifying, assembling, and interpreting the results of scientific and engineering research deemed potentially significant for solution of water resource problems, providing means for improved communication regarding such research results, including prototype operations, ascertaining the existing and potential effectiveness of such for aiding in the solution of practical problems, and for training qualified persons in the performance of such scientific information dissemination;".

SEC. 3. Section 306 of the Water Resources Research Act of 1964 is amended by inserting immediately before the period at the end thereof a comma and the following: "the District of Columbia, and the territories of the Virgin Islands and Guam."

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–1153), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE MEASURE

As introduced, S. 3553 would amend the Water Resources Research Act (78 Stat. 329) to increase the amount authorized to be appropriated for a water resources research center in each of the States from $100,000 to $250,000 annually for each center. It also would provide for future automatic adjustments in the authorized amounts based upon Civil Rights Commission salary studies.

Section 2 of S. 3553 would provide for the establishment of information retrieval and dissemination activities at each research center.

The committee also considered another bill, S. 1051, which as introduced would amend the act to authorize the Consortium of Universities of the Washington, D.C., metropolitan area to receive institute grants.

The Water Resources Research Act was enacted July 17, 1964. The principal concepts of the act grew out of the recommendations of the Senate Select Committee on National Water Resources. Section 200 of the act was amended in 1966 (80 Stat. 129) to increase the amounts authorized to be appropriated for the Title II grant program, which is not directly related to the research centers.

The major provisions of the act in its present form are as follows:

Title I provides for grants of $100,000 annually to each of the States (and Puerto Rico) to assist in establishment and operation of a water resources research institute, center, or equivalent entity. It further authorizes $5 million annually for matching fund research grants administered through the institutes.

Title II authorizes appropriations of $10 million for each of fiscal years 1972–1976 (lesser amounts for earlier fiscal years) for research grants to educational institutions and private foundations, firms, and individuals not directly related to the centers established by title I.

Title III contains miscellaneous provisions. Among them are establishment of a Federal center to catalog water resources research being conducted under Federal and non-Federal programs. Section 306 defines the term "State" as used in the act as including Puerto Rico.

PRESENT LEGISLATION

S. 3553 was introduced by Senator Moss on March 5, 1970. The Subcommittee on Water and Power Resources held a hearing on July 20, 1970. At that time the subcommittee also took testimony on S. 1051, a bill introduced by Senator Bible on February 18, 1969, which has the purpose of including the District of Columbia as a State for the purposes of the act. The comments

of the Department of the Interior and the Office of Management and Budget on both measures are included later in this report. The committee has included the amended subject matter of S. 1051 within S. 3553 as reported.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. MONDALE. Mr. President, I have received a letter from the distinguished dean of the Graduate School, University of Minnesota, which I shall place in the RECORD.

The Senate today indicated its support of State water resources research institutes by passing S. 3553 which increased annual allotments from $100,000 to $200,000 per State.

Dean Crawford's letter outlines the kinds of needs to be met by this vital legislation, and the importance of adequate funding for these programs seeking the scientific knowledge by which to better protect our precious water resources.

I believe that his letter is a valuable document in support of State water resources research, and should become part of its legislative record.

I ask unanimous consent that the letter from Dean Bryce Crawford be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

UNIVERSITY OF MINNESOTA GRADUATE SCHOOL,
Minneapolis, Minn., August 10, 1970.

Senator WALTER F. MONDALE,
Senate Office Building,
Washington, D.C.

DEAR SENATOR MONDALE: Recently bills have been introduced into Congress to amend the Water Resources Research Act of 1964 (S. 3553 and H.R. 15957, 16274, 16279, 16285) by increasing the authorized annual allotments for State Water Resources Research Institutes from $100,000 to $250,000 and authorizing programs for the transfer of research results into practice. The amendments have been endorsed by the National Association of State Universities and Land Grant Colleges, the Universities Council on Water Resources and the President's Science Advisor.

In my opinion, expansion of the scope of the proposed legislation is appropriate; inflation has substantially reduced the annual allotment research program and there is at present a lack of clear-cut authorization and funding for the additional activities necessary to effectively move the research results into the hands of the ultimate user.

I would like to bring to your attention the way in which programs under the Water Resources Research Act of 1964 are being utilized by the University of Minnesota through our Water Resources Research Center. Our Center was established in the Graduate School on September 1, 1964. The government, management, and control of the Center and its affairs are vested in an Advisory Committee and a Consulting Council composed of 34 representatives of 15 units of our University and 19 Federal, State, local and private organizations in Minnesota concerned with water resources. All State and private colleges in the State are encouraged to participate in its programs and research is now being conducted on the campuses of St. Mary's College at Winona, Bemidji State College, at Bemidji, St. Cloud State College at St. Cloud, Winona State College at Winona, and Gustavus Adolphus College at St. Peter.

Our Center has pioneered in efforts to bring the research capabilities of the State's Universities and colleges to bear on State water problems. Methods used include seminars, conferences, short courses, study committees, newsletters, information circulars and bulletins. Dialogue with Federal, State, local and private agencies has been enhanced through the efforts of our Center's Director who served on a part-time basis during the period June 1967 to November 1969 as Water Resources Planning Director, Minnesota State Planning Agency and as Governor LeVander's representative on the Great Lakes Basin Commission, Souris-Red-Rainy River Basins Commission and Upper Mississippi River Basin Coordinating Committee.

One of the purposes of the Center is the stimulation of educational offerings for students which will prepare them for careers in the field of water resources. Since the Center was established, 26 new courses bearing on water resources have been developed at our University. A new graduate option in hydrogeology has been announced and a program of graduate education in water resources has been established.

Research conducted through the Center is highly relevant to water resources problems in Minnesota and the Nation. The main thrust of the Center's programs has been directed toward:

Establishing a practical baseline of water quality for Lake Superior through the use of the continuous plankton recorder technique; the analysis & interpretation of existing Federal, State, and local water resources legislation and court decisions and ways and means for improving water laws in Minnesota; ascertaining the physiological and ecological requirements of the algal species responsible for severe blooms on lakes scattered throughout the State to assist in controlling the excessive productivity of polluted lakes; determining methods for rain fall-runoff predictions which are based on the physical characteristics of ungaged small watersheds and rainfall characteristics of ungaged small watersheds; reconciling and integrating water quality management with the ecological and social-economic objectives of the total water resources management in Minnesota; determining the role of potholes in the groundwater recharge; formulation of an economic optimizing model for water quality and sewage disposal on selected stretches of the Upper Mississippi River; investigation of programs that appear to have special merit relative to hydrologic analysis for determination of design floods and for design of spillways and related structures; investigation of soil dynamic changes when interacting with water to assist in solving water problems such as infiltration, water spreading and flow properties in soils; determination of runoff-time distribution for a variety of watershed sizes and slopes; determining the role of bottom sediments in the phosphorus cycle for lakes of different types to assist in devising corrective measures for overfertilized lakes; development of techniques that will pinpoint polluted areas in reaches of the Upper Mississippi River where algacides might be profitably administered to control pollution; investigation of mist irrigation as a method of reducing water stress in potato crop production and thereby reducing transpiration; and investigation of the mechanics of soil moisture movement and retention to assist water resources developers and managers in estimating recharge to groundwater reservoirs and the effect of soil moisture movement on surface water runoff; inventorying, appraising, and evaluating water resources administration in Minnesota to provide background information for legislative action concerning reorganization of State water resources agencies; biomass determination and productivity measurements in the west end of Lake Superior to assess the extent of euthrophication; investigation of the ecology of the periphyton in the wavewashed and near-shore areas of the west end of Lake Superior for detection of advancing eutrophication in the lake; study of citizens groups involved at the grass roots to improve the water resources environment in the Minneapolis-St. Paul, Miami and environs, and two other metropolitan areas and environs in the USA; and determining existing ecological conditions in the Mississippi River near Monticello, Minnesota before operation of a large nuclear power plant and monitoring environmental changes due to the thermal discharge from the power plant generator.

Minnesota has provided on the average about $30,000 per year to defray overhead and indirect costs associated with the Center's annual allotment programs. The State has continuously provided non-federal funds to match federal funds associated with the Center's matching grant programs. Non-federal funds provided in fiscal year 1970 amounted to about $107,000. In addition, the University has provided office space for the Center.

Past development and management practices in Minnesota, as substantial as they are, have not kept pace with the steadily growing demands placed upon water and related land resources. Many undesirable and serious, but not critical problems have emerged associated with pollution, water-oriented recreation, floods, water supply, navigation, and land use. With the prospect that within 50 years water and related land resources demands and needs may approach or exceed the availability of resources and existing facilities in some areas, the State cannot expect to continue to avert critical problems without an acceleration in resource research, development, and management. The University of Minnesota through the Center has demonstrated its interest and its capability and it is willing to further develop a truly outstanding water resources research facility for Minnesota. It has provided the mechanism for unifying water resources research throughout our State.

While substantial progress has been made in assuring that research results are made available to prospective users in forms that are comprehensible to the variety of disciplines and levels of skill involved in water resources, the Center's capability to transfer research results into practice needs to be strengthened. The present annual allotment is far too small for research alone irrespective of related needs to facilitate the utilization of new research information.

I sincerely hope the information presented in the letter will be useful in your assessment of the proposed amendments. You are urged to encourage the enactment of amendments; it would be helpful if you were to arrange for the text of this letter to be inserted in the Congressional Record (see CONGRESSIONAL RECORD, pp. 15701 to 15703).

Sincerely yours,

BRYCE CRAWFORD, Jr., *Dean.*

EXECUTIVE SESSION

Mr. MANSFIELD. I ask unanimous consent that the Senate go into executive session to consider nominations on the Executive Calendar.

There being no objection, the Senate proceeded to the consideration of executive business.

The ACTING PRESIDENT pro tempore. The nominations on the Executive Calendar will be stated.

AMBASSADORS

The assistant legislative clerk proceeded to read sundry nominations of ambassadors.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

INTERNATIONAL MONETARY FUND

The assistant legislative clerk read the nomination of Charles R. Harley, of Maryland, to be U.S. Alternate Executive Director of the International Monetary Fund.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

ASIAN DEVELOPMENT BANK

The assistant legislative clerk proceeded to read the nomination of Artemus E. Weatherbee, of Maine, to be U.S. Director of the Asian Development Bank.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

DEPARTMENT OF LABOR

The assistant legislative clerk proceeded to read sundry nominations in the Department of Labor.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

U.S. ARMY

The assistant legislative clerk proceeded to read sundry nominations in the U.S. Army.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

NOMINATIONS PLACED ON THE SECRETARY'S DESK, IN THE AIR FORCE, IN THE ARMY, IN THE NAVY, AND IN THE MARINE CORPS

The assistant legislative clerk proceeded to read sundry nominations in the Air Force, in the Army, in the Navy, and in the Marine Corps, which had been placed on the Secretary's desk.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to, and the Senate resumed the consideration of legislative business.

LABOR, HEW APPROPRIATIONS, 1971—AMENDMENT

AMENDMENT NO. 875

Mr. JAVITS. Mr. President, I submit an amendment to H.R. 18515, the Labor-HEW appropriations bill for fiscal year 1971, to increase from $744,494,000 to $780,894,000 the appropriations for manpower development and training activities under the Manpower Development and Training Act of 1962, an increase of $36,400,000. The increase is necessary to maintain the Neighborhood Youth Corps summer jobs program at the same funding level for next summer as it is this summer. The program, conducted by the Department of Labor, provides work and training opportunities for disadvantaged 14- to 21-year-olds during the summer months.

The ACTING PRESIDENT pro tempore. The amendment will be received and appropriately referred.

Mr. JAVITS. Mr. President, the administration has requested a total of $146,500,000 for next summer to fund a total of 310,400 opportunities under the authority of the Economic Opportunity Act. No funding has been requested under the authority of the Manpower Development and Training Act of 1962, a traditional source of additional funding for these programs.

The program is funded this summer at a total level of $182,900,000, which consists of an initial appropriation of $147,900,000 and a supplemental appropriation of $35,000,000. A total of 414,000 opportunities are being provided.

Accordingly, there is a "shortfall" of $36,400,000 for these programs for the summer of 1971, compared with the current summer. The result will be that approximately 100,000 fewer youths will receive opportunities next year compared with this year.

Mr. President, even last summer's opportunities fell short by 145,173 opportunities of what the cities then showed they effectively use. I ask unanimous consent that there be included in the RECORD at this point a letter dated May 7, 1970, from the U.S. Conference of Mayors, together with a city-by-city chart indicating that documented need.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. CONFERENCE OF MAYORS,
Washington, D.C., May 7, 1970.

Hon. JACOB K. JAVITS,
Old Senate Office Building,
Washington, D.C.

DEAR SENATOR JAVITS: In response to your request for information, we have made inquiries as to the cities' 1970 needs for the summer Neighborhood Youth Corps slots beyond those allocated to them to date. The information we have received from the fifty largest cities shows that the total number of additional slots that these cities could effectively utilize this summer is 165,298.

On the basis of our contacts with a sample of the smaller cities, we estimate their need and capacity to utilize additional slots to be approximately 30 percent above their present allocation. This would mean an additional 61,875 slots needed by the smaller cities.

Combining these figures, the present real need for summer 1970 is 227,173 additional slots nation-wide.

I trust that these statistics will be helpful to you in pointing up the critical need for an enlarged appropriation for the summer Neighborhood Youth Corps program.

Sincerely,

JOHN J. GUNTHER,
Executive Director.

1970 SUMMER NEIGHBORHOOD YOUTH CORPS PROGRAM—THE NEEDS OF THE 50 LARGEST CITIES

[1] Miami.
[2] Including Long Beach.

Mr. JAVITS. Mr. President, the situation is particularly unfortunate in view of the current unemployment level and its devastating effect on the young and the black. While the overall unemployment rate was 5 percent in July, the rate for persons between 16 and 21 was 15.7 percent. The Bureau of Labor statistics has reported that for black youths between 16 and 21, the unemployment rate approaches 30 percent.

While we can surely expect these levels of unemployment to continue into next summer as a result of the administration's efforts to fight inflation, a need for additional funds exists irrespective of the special economic circumstances in which we find ourselves. In each of the past 3 years the "target" population for this program has at all times exceeded 1,400,000 youths; accordingly, maintaining the program at last year's level will reach less than a third of those normally eligible.

We can therefore fully expect that the needs for next summer will be at least equal to, and will no doubt exceed, those of the current summer. Already, a preliminary survey of the mayors and youth coordinators across the country have indicated that at least a maintenance of funding effort will be required. I ask unanimous consent that a letter dated August 27, 1970, from John J. Gunther, executive director of the U.S. Conference of Mayors, indicating that need, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. CONFERENCE OF MAYORS,
Washington, D.C., August 27, 1970.

Hon. JACOB JAVITS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR JAVITS: In response to your recent inquiry, we have consulted with the Mayors and Youth Coordinators across the country and it is their considered judgment that the number of Neighborhood Youth Corps applicants for positions in the summer of 1971 will exceed those in the current summer.

In every instance local officials have urged that we do everything possible to encourage you and the Administration to see to it that 1971 fund commitments are made available at the earliest possible time, preferably before the end of the calendar year. This would permit more effective utilization of the program and funds next summer.

Sincerely,

JOHN J. GUNTHER,
Executive Director.

Mr. JAVITS. Mr. President, the President has recently installed an "inflation alert" system. With respect to the youth in our country—especially the blacks—I submit that we should declare an "unemployment alert" in connection with next summer.

The time to plan for next summer is this summer and fall, and I urge the administration to take the following steps in order to head off a job crisis next summer:

First, I urge the Department of Labor to submit a revised budget estimate to the Congress—in connection with the regular HEW-Labor appropriations bill now before the Senate—sufficient to insure that the funding for next summer is at least at the same level as in the current summer.

Second, I urge the Department of Labor to canvass its regional offices to determine any additional amount that will be necessary, and to seek that amount in a budget request for funding under the first supplemental appropriations bill, which will originate in the House of Representatives this fall; additional funds are very likely to be necessary to meet the needs of additional youths.

Third, I urge the President's Council on Youth Opportunity—which did not issue its report on this summer's job situation until June 6, 1970—to issue a comprehensive report early this fall as to the projected summer job opportunities from all sources for 1971, together with recommendations to the Congress. Under Executive Order No. 11330, the President's Council is responsible for "assuring effective program planning for summer and other youth programs of the Federal Government."

I also urge the National Alliance of Businessmen, which has made voluntary efforts to provide opportunities in the private sector, to begin now their efforts to secure pledges for next summer.

There is always a critical dimension to this problem because of the social, as well as economic factors. As noted by John Herbers, in an article entitled "Jobless: The Young, Especially the Blacks, Hard Hit" appearing in the New York Times on Sunday, August 3, 1970:

There is the question of violence in the cities. And no one familiar with the dislocations of American society today could be at ease while great bands of rejected youths are idle in the streets. In recent years the Federal and local governments and private interests have provided summer jobs to keep the cities peaceful and there is evidence that the efforts have paid off . . .

Mr. President, every summer for the last four summers it has become necessary to seek additional funds for this important program in the context of the second supplemental appropriations bill, with the result that funds have not become available until the summer program is in midstream—usually in middle or late July. In short, the usual response of the Congress to these needs—which are in full view—has been too little and too late.

I urge the administration and Congress to plan now to meet next summer's needs. As Mr. Grunther noted in his letter of August 27, 1970, which I have inserted into the RECORD:

In every instance local officials have urged that we do everything possible to encourage you and the Administration to see to it that 1971 fund commitments are made available at the earliest possible time, preferably before the end of the calendar year. This would permit more effective utilization of the program and funds next summer.

Mr. President, I ask unanimous consent that there be printed in the RECORD a copy of the article from the New York Times, to which I referred, along with the text of the amendment which I have submitted.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Aug. 23, 1970]

JOBLESS: THE YOUNG, ESPECIALLY THE BLACKS HARD HIT

(By John Herbers)

WASHINGTON.—In Wichita, Kan., a few days ago, Merlyn Hatcher, employment director for the city, estimated that 75 per cent of the teenagers who searched for jobs this summer were still out of work. In Tacoma, Wash., employment officials said that in addition to teenagers they were overrun with ex-servicemen looking for jobs. In many areas June college graduates by the thousand were reported to be unemployed.

The Labor Department confirmed last week what was apparent across the country—the slowdown in the economy and the increasing scarcity of jobs is being felt with particular force among the young. While the over-all unemployment for July was 5 percent of the labor force the rate for persons between 16 and 21 was 15.7 per cent. Last summer it was 12.8 per cent. In the 20–24 age group the jobless rate in July was 9.1 per cent, up from 7.2 per cent in June.

The figures told only part of the story. The Bureau of Labor Statistics said the prospects for employment were so bleak at the beginning of the summer that youths by the hundreds of thousands who desired jobs did not even bother to look. In areas hit particularly hard by the slowdown in the economy—cities such as Wichita, Tacoma and Brockton, Mass., which have in excess of 6 per cent unemployment—the national figures looked good by comparison.

HIGHLY VISIBLE

For black youths, of course, the job shortage was even worse. The Bureau of Labor Statistics showed that for Negroes between 16 and 21 the unemployment rate rose to 30.2 per cent from 24.8 per cent last summer. In many black poverty neighborhoods across the country, the jobless rate was far above that.

Black and white, the young out of work are highly visible. They are seen in the lines at the public employment offices, in the streets and amusement places looking, as one middle-aged city official said, "alienated from the rest of us."

One does not find in Wichita or Brockton much evidence of an increase in poverty. Unemployment insurance, savings and other income has kept most of the new jobless from undue hardship.

But many thousands who are being turned away are the sons and daughters of the chronically poor. And no one familiar with the dislocations of American society today could be at ease while great bands of rejected youths are idle in the streets.

There is the question of violence in the cities. In recent years the Federal and local governments and private interests have provided summer jobs to keep the cities peaceful and there is evidence that the efforts have paid off. This year, due to the economic slump and other factors, the summer job programs fell short of their goals just as many additional youths were entering the labor market.

"JUST TURNING OFF"

So far, there is evidence the lack of jobs has contributed to civil disorders in economically depressed cities such as New Bedford, Mass. But the long-range effects could be worse. "They're just turning off, that's all," said a staff member of the Model Cities project in Wichita. "In a way, it would be better if they would be a little violent and get it out of their system. We don't know what these kids will be doing 10 years from now."

A pickup of the economy, which many experts say is beginning, will of course restore jobs. But even at the peak of prosperity the unemployment rate for teenagers, particularly the disadvantaged, has been high. This has been a chronic problem in the United States.

Sentiment is growing in Congress and elsewhere for the Government to create public service jobs, to be the employer of last resort. Some in Congress would subsidize jobs in hospitals, schools, local governments and nonprofit organizations, all of which are

short of personnel. For example, Senators Abraham Ribicoff of Connecticut and Fred R. Harris of Oklahoma, both Democrats, offered an amendment last week to the Nixon Administration's family assistance legislation that would create at least 30,000 jobs in the public service.

One line of reasoning is that in a prosperous country youths who wish to honor the work ethic should be able to find work.

The amendment (No. 875) which reads as follows, was referred to the Committee on Appropriations:

AMENDMENT No. 875

On page 2, lines 6 and 7, strike "$744,494,000" and insert in lieu thereof the following: "$780,894,000".

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. At this time in accordance with the previous order, the distinguished Senator from Iowa (Mr. HUGHES) is recognized for not to exceed 10 minutes.

PROGRESS IN TREATMENT AND REHABILITATION OF ARMY DRUG ADDICTS

Mr. HUGHES. Mr. President, last Thursday and Friday three members of the Special Subcommittee on Alcoholism and Narcotics—the Senator from Colorado (Mr. DOMINICK), the Senator from Pennsylvania (Mr. SCHWEIKER), and I—visited Fort Bragg, N.C., to see in operation the Army's only project in this country for the treatment and rehabilitation of drug addicts within its ranks. We were inspired, and our hopes were raised, by what we saw.

With about 46,000 troops, many of them Vietnam veterans, Fort Bragg is one of the Army's largest installations. The trend there, we were told, is away from marihuana and toward heroin, contrary to what we understand the situation to be in Vietnam. It has created problems of such magnitude that a great many men have been affected and, in some cases, corrupted. The drug abuse problem, we were told, appears to be most acute in the 82d Airborne Division, an illustrious unit of approximately 9,000 troops—about half of whom have served in Vietnam, the other half destined to go there.

Fortunately for the Army, and certainly for the country, one man above all saw fit to confront the problem head on, rather than imagine that it did not exist. Under the leadership of Lt. Gen. John J. Tolson, the commanding general of Fort Bragg and of the XVIII Airborne Corps, a major overhaul has begun—in the areas of drug abuse education, law enforcement, and treatment and rehabilitation of addicts at Fort Bragg. What has emerged is the beginning of a multisided attack on the problem in the Fort Bragg-Fayetteville area that has been dubbed "Operation Awareness."

A unique feature of "Operation Awareness" is the treatment and rehabilitation project, which accepted its first patients only last May. It is conducted in two abandoned barracks buildings in the old hospital area by a staff that took on this job strictly as extra duty, with the major responsibility being taken by Maj. Richard Crews, the chief of psychiatry and neurology at Womack Army Hospital at Fort Bragg. Major Crews is a dedicated officer who learned the drug scene at firsthand while at Letterman Army Hospital in San Francisco during the heyday of Haight-Ashbury.

Apart from the buildings and the staff, plus the few supplies from the Womack Hospital, the budget for the rehabilitation program is something on the order of $2,000, half contributed by the Fort Bragg Officers' Wives' Club and the remainder by an onpost service organization known as the Thrift Shop.

Through detoxification, techniques such as group therapy and an elaborate "point" system designed to reward good performance and punish bad behavior, as well as a selective conditioning process in which so-called "needle freaks" are permited to "shoot" short-acting barbiturates at the the cost of nausea later—through such means, over a period of several weeks, doctors and technicians in the rehabilitation project are attempting to restructure the behavior patterns of soldier drug addicts and turn them away from drugs. That essentially was the program as it was last week. Tomorrow, it may be entirely different; for, Mr. President, this is strictly an experimental program and, for that reason, no one need expect dramatic statistics or news of a spectacular cure out of Fort Bragg perhaps for some time to come.

But, as General Tolson says, "we are trying." And that is the important point. Simply to do that—to start to try—has required a degree of initiative on the part of General Tolson and his staff that, unfortunately, is not so prevalent in our society as one might wish it to be. Military regulations require, in effect, that a drug addict be administratively discharged, with no provision for attempted rehabilitation, and it is all too easy for any military commander to exercise that privilege against an addict in the name of the "good of the service." He might well be justified in making that decision. The Fort Bragg response has been to suspend that requirement and grant immunity from discharge to any drug addict who asks for help—the first step toward rehabilitation, as anyone who understands true correction will recognize.

So far, only a handful of addicts at Fort Bragg have availed themselves of this alternative.

There are estimated to be several hundred on the post. It may be that they still fear reprisal if they "turn themselves in," so to speak. But I hope and believe that, as soon as "Operation Awareness" begins to turn out "graduates" who have kicked the drug habit and become good soldiers again, others will follow their example. For, as I believe the other two Senators will attest, General Tolson means what he says when he offers drug addicts this better way toward a more responsible life as soldiers and as citizens. General Tolson is a man of compassion all the way down to his toes, and no addict who wants to get that big monkey off his back will ever be turned away if the general can help it.

As I say, no one can predict whether this project will be a total success. But it is a truly commendable undertaking and one which I feel is worthy of the strongest encouragement from the Congress. That was the purpose of our visit—to see for ourselves and to let General Tolson and his people know that we are behind him and will do all we can to support him in this effort.

I think it is extremely important that the Members of the U.S. Senate be aware that on this base at Fort Bragg the commanding officer has undertaken a project which is unique, which shows an innovation, and which has required some risk. It is a major step in the right direction.

When a man simply gets an administrative discharge from the service around an army base, he seldom leaves the area. He stays in the vicinity if he is a narcotics addict, because he does not want to lose his contacts.

As a result, administrative discharges of personnel simply place in civilian life people who do not go home, but who stay in the immediate vicinity of the base and have to steal to supply their habit.

Not only has General Tolson taken a position which will have men stay in the service and become good and decent soldiers of the U.S. Army, but he has also taken a step which is so important in the returning of honorably discharged men to their home communities, unburdened by a habit that they cannot rid themselves of.

I think this is a display of magnificent insight by the commander of Fort Bragg. I think also that it is a display of courage to go against the current at a time when it is not at all popular to believe that a narcotics addict is worth saving, particularly if he is in the U.S. Army and has the potential of being a great liability.

Mr. STENNIS. Mr. President, I hate to interrupt the Senator, but will the Senator yield to me quite briefly?

Mr. HUGHES. I am happy to yield to the distinguished Senator from Mississippi.

Mr. STENNIS. Mr. President, I commend very highly the work that the Senator is doing in this field with our servicemen and their problem. He is very knowledgeable on the subject. He knows how, for instance, to cooperate with this general.

I want to go with the Senator from Iowa down to Fort Bragg just as soon as I can get out of the predicament I am in now and follow through and learn more and more about this remarkable work that the Senator is doing.

I feel that he is on the right road and will get excellent results.

Mr. HUGHES. Mr. President, I thank the distinguished chairman of the Armed Services Committee. It was under his auspices that my special subcommittee of the Labor and Public Welfare Committee has undertaken investigations and gone into the problems caused by alcohol, drugs, and narcotics in the Armed Forces.

Mr. STENNIS. Mr. President, I am very pleased with the Senator's headway.

Mr. HUGHES. Mr. President, I am very hopeful that this will give us an insight into the problem we have in the Nation. What we see at Fort Bragg is a microcosm of Americans from all strata of life and society.

In the controlled way of life inside an Army post—if we have the initiative and are willing as a Congress to supply this commanding officer with the funds he needs—a program such as he has authorized could prove to be of great benefit to the country.

This commanding officer is operating as I first operated in the subcommittee, without any money.

Mr. President, I think it is vitally important that we support General Tolson and what is being done at Fort Bragg.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. HUGHES. I yield.

Mr. JAVITS. Mr. President, I am the ranking minority member of the subcommittee which is so effectively headed by the distinguished Senator from Iowa.

I would like to join the Senator from Mississippi (Mr. STENNIS) in stating that I think the work of the Senator has been splendid. The subcommittee has really been brought to a fine mission through his excellent leadership, which I have had the honor to join.

The Senator has made a unique province of this problem of narcotics addiction in the armed services and he has worked nobly and promises to do a great deal more.

I am deeply impressed with what I know about this effort of General Tolson. I shall do my utmost to help him to see that the necessary funds and assistance are given the general.

Daily this problem becomes the largest single source of crime and the largest single source of urban decay in my city of New York, and, I believe, in many other cities in this country.

When one considers what it takes to make massive and necessary changes in this field, even in a financial sense, it is our responsibility for not sooner having brought this matter to the attention of the country. I think the country will support what needs to be done.

I hope the Senator will be moved, and I shall work with him, as I already have, to present the measure, which we are considering in the subcommittee, at the earliest possible moment to the full committee and then to the floor of the Senate. We have done that in connection with alcoholism; this is the next problem in line.

I know it is a burden, but in addition to his work in connection with the Armed Services Committee, which I laud unreservedly, I say to the Senator I want us to be purposeful to bring about major legislation so urgently needed in the narcotics field, as it affects crime in the cities.

Mr. HUGHES. I thank the distinguished Senator from New York. He has given many long hours of his personal time, and he has been present at the hearings. He has lent his staff to every measure of serious investigation we have done, and he has given the greatest support in this area, which is really epidemic in this country.

This is a problem which is frightening, and not only when one measures the crime, which totals about a million dollars a day in the District of Columbia. I do not know what it is in New York but undoubtedly it is much more.

Mr. JAVITS. At least 10 times.

Mr. HUGHES. But of far greater importance is the value of the human life and the individual dignity of the human soul which in a compassionate society we must deal with. These boys down there are 19- and 20-year-olds. They are from all over the country. I talked with boys who were from Indiana, Michigan, and Connecticut. Not all of them are from large cities; many are from the countryside. Contrary to common belief, they are not 50 percent black; they are 75 percent white. Many people believe this is a black problem which spilled over from the ghettos years ago and is spreading rapidly all over America. The trend is away from marihuana and to methedrine and heroin, which is a frightening prospect.

I thank the Senator from New York for his able support and help over many months. I wish to indicate to him that we are going to continue our efforts, and we will produce massive legislation and, with the Senator's support, hopefully we will get it through Congress.

Mr. JAVITS. I thank the Senator.

Mr. PERCY. Mr. President, will the Senator yield?

Mr. HUGHES. I yield.

Mr. PERCY. Mr. President, I was delighted to be at the Senator's "sunrise service" this morning. I thank the distinguished Senator for raising such a profound subject. I think the interviews and the work of the subcommittee have been very important in this field under the leadership of our distinguished colleague from Iowa (Mr. HUGHES).

The need for legislative oversight in this area was very apparent to me on a trip to Vietnam several years ago. I was up near the DMZ and I sought out the fine son of one of our distinguished colleagues, the Senator from Virginia (Mr. BYRD), who was serving in the U.S. Marines. He was operating as part of a command running a brig in the vicinity of Danang. I had a good discussion with him as he traveled with me part of the day. I talked to him about the nature of the offenses of the servicemen who filled the brig. He indicated to me at the time that the use of marihuana was one of the main problems that they faced up there. It was freely available and passed out by the enemy, obviously for the purpose of putting our duty guards into a condition of lethargy at our outposts where they are many times on a very dull duty and yet where alertness is required.

On my final day in Vietnam I discussed this matter with the top command of our armed services. I was surprised to find that a young marine, out on the line, was far more aware of the conditions there than our own command. In fact, the command seemed to know little about the nature and extent of the problem. They said they would look into it and investigate it, and I am sure they subsequently have. I have followed with a great deal of interest what has been revealed since then.

I look on this as one further tragic aftermath of our involvement in Vietnam. We will never know the cost to society of the kind of problem where many young men are engaged in a war who are not convinced they should be there, and seek out any sort of escape which they find available to them.

I commend many volunteer groups in this country for their alertness and devotion to the problem inside America. A church in my community in Georgetown is open nearly every night making its assistance, counsel, and advice available to young people.

There is a volunteer group in my own city, Project Straight Dope, under the leadership of Mrs. Ralph Falk, which seeks to prevent drug addiction before it starts. She has worked with the advertising community to have time available on all the news media to bring this problem to the attention of young people, to point out the great dangers involved, as well as the responsibilities of parents.

I commend the Senator for his great leadership in this field and I shall support his efforts in every way possible.

The ACTING PRESIDENT pro tempore. The time of the Senator has expired.

Mr. HUGHES. Mr. President, I ask unanimous consent that I may proceed for 1 additional minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUGHES. Mr. President, I thank the distinguished Senator from Illinois for his kind comments and sincere concern about this great problem in the United States.

I have been quick to criticize the Department of Defense and the Pentagon for many of the things I feel they are doing wrong. I want to be quick to encourage them in this major area where one of their commanding generals and the subordinate staff there are doing the right thing. Our studies indicate that they are underway in an all-out investigation in an endeavor to understand the problem. I encourage them to do that. I hope that we support them and give them the money for the needs they have. We rush to cut their budgets every time they turn around; I hope we will be as quick to give them assistance in this endeavor to meet one of the greatest problems this country has.

I appreciate the statements of support which have been made on the floor of the Senate this morning. I hope as the days and weeks go by that we will reenforce that support, particularly with respect to what General Tolson needs at Fort Bragg.

Mr. PERCY. I thank the Senator.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. At this time, in accordance with the previous order, the Chair recognizes

the Senator from Ohio (Mr. YOUNG) for not to exceed 20 minutes.

Mr. YOUNG of Ohio. Mr. President, late last evening I informed an attaché of the Senate that I would relinquish my time and that I would not speak this morning. However, I am thankful to you, Mr. President for recognizing me.

SUPPORT FOR THE McGOVERN-HATFIELD AMENDMENT

Mr. YOUNG of Ohio. I wish to speak briefly and to the point on the important matter before the Senate today. I shall take great pride later today in voting in favor of ending our war in Vietnam just as soon as we can. Of course, I shall record my vote in favor of the amendment pending before us.

It was the most horrendous mistake ever made by any President of the United States to involve us in a war in Vietnam—a little country of no importance whatsoever to the defense of the United States.

I feel that I am able to speak with some authority on this matter for the reason that in 1965 I spent nearly a month in Southeast Asia. I was in every area of South Vietnam. Also, I was in Korea and Thailand as well. At that time, despite the fact that we had guaranteed the neutrality of Laos, our war planes, disguised, were bombing areas of Laos.

In 1968 I was again in every area of South Vietnam. I went by helicopter to every region of Laos. At that time our war planes were openly bombing the forces seeking national liberation in Laos.

As a member of the Armed Services Committee, my vote, on most occasions, has been a minority vote. I am happy to report, however, that the distinguished senior Senator from Missouri (Mr. SYMINGTON), and the distinguished Senator from Hawaii (Mr. INOUYE) and I filed the first minority report ever filed with respect to authorizations for military appropriations.

In the Committee on Armed Services, time after time I have heard Senators, considered the greatest war hawks in this body, say that we should never have been involved in the war in Vietnam, but since we are in there we should see it through. Confucius, the great Chinese philosopher, centuries before the birth of our Saviour, said:

A man who makes a mistake and does not correct it makes another mistake.

That is also true of a nation. If a nation like ours makes a serious mistake and then does not correct it, it makes another mistake.

Sometimes we hear about the commitments we have made to South Vietnam. Let us know something about those commitments. We should remember that General Thieu, President of South Vietnam, and Vice President Ky, that flamboyant air marshal, with other militarists overthrew the duly elected Government of South Vietnam in a midnight coup and seized power. That is the military regime we are supporting in Vietnam.

Ky said:

We did not invite you here, and Americans should get out.

A survey in depth was held among the Vietnamese—we in the United States would call it a Gallup poll—and about 5 percent of the South Vietnamese wanted the Americans to remain in that country, and most of them were from Saigon. So Ambassador Ellsworth Bunker, sought to suppress it.

With respect to these so-called commitments, our initial commitment in South Vietnam made by President Eisenhower in 1954, in a letter to the then President of South Vietnam, Diem, who had been installed as the puppet president, stated:

I am instructing the American Ambassador . . . to examine with you . . . How an intelligent program of American aid . . . can serve to assist Vietnam in its present hour of trial.

Then President Eisenhower added:

The purpose of this offer is to assist the government of Vietnam in developing and maintaining a strong, viable state capable of resisting attempted subversion and aggression through military means . . . The U.S. government hopes that such aid, combined with your own continuing efforts, will contribute effectively toward an independent Vietnam endowed with a strong government.

Vice President Ky of South Vietnam himself was born and reared in Hanoi. He fought with the French, as did other generals of the present Saigon regime, against their own forces seeking national liberation. Can anyone claim that this militarist regime in Saigon, or any preceding regime, has established a strong, viable government in South Vietnam?

Evidently President Eisenhower did not believe it, because on the day he left the White House we had 685 military advisers in Vietnam, no combat troops. On that sad day when President John F. Kennedy was assassinated in November 1963, we had 16,200 military advisers in South Vietnam, no combat troops.

But what happened soon after President Johnson became President? We have witnessed this in the Senate in recent years. It is evident that President Johnson was given poor advice by generals of the Joint Chiefs of Staff and Secretary of State Rusk.

He yielded deference and devotion to the military. This has also been demonstrated under President Nixon. He was elected largely because he promised the people of this country that he had a secret plan to end the war in Vietnam. That is still his secret. Instead of the war nearing an end, it has been expanded and extended and our combat planes and our B–52's are dumping napalm bombs and explosive bombs throughout Southeast Asia.

The war is no longer called our intervention in Vietnam, or the Vietnam war, it is the Indochina war. We are carrying on where the French left off.

We have an opportunity today in the Senate of the United States to give voice to the fact that 35 or 40 Senators—or more, I hope—are giving notice that we intend to refuse to vote for any appropriations unless this war or involvement over there is ended by the end of next year.

Now, having made it crystal clear that President Eisenhower's commitment, so-called, was a very "iffy" commitment indeed, what commitment did the late President John F. Kennedy make?

President Kennedy said on September 3, 1963, shortly before his assassination:

I don't think that unless a greater effort is made by the Government to win popular support that the war can be won out there. In the final analysis, it is their war. They are the ones who have to win it or lose it. We can help them, we can give them equipment, we can send our men out there as advisers, but they have to win it—the people of Vietnam—against the Communists. We are prepared to continue to assist them, but I don't think that the war can be won unless the people support the effort, and, in my opinion, in the last 2 months the government had gotten out of touch with the people.

Also, on another occasion, our late, great President John F. Kennedy said:

Transforming Vietnam into a Western redoubt is ridiculous.

Therefore, it is evident that we are not fighting a land war in Southeast Asia because of commitments made by Presidents Eisenhower and Kennedy.

Walter Lippmann once stated that we are fighting in Vietnam to save face. Mr. President, that was an important statement, and we must not forget it.

Of course, Mr. President, historically there has been no such thing as a North Vietnam and a South Vietnam; and the Geneva accords of 1954 specifically stated that the military demarcation line at the 17th parallel is provisional, and should not in any way be considered as constituting a political or territorial boundary.

Over thousands of years, the Vietnamese people have repelled the hordes of Mongol invaders who invaded what is now North Vietnam. Had that area not been divided by the Geneva accords, it would have been a fine buffer state to protect Southeastern Asia.

Mr. President, there are very few Members of this body who would say otherwise. More than 50,000 priceless American lives have been lost fighting in this undeclared unpopular war in Southeast Asia.

I think those all-out warhawk Senators would do well to go to Walter Reed Hospital, as I did sometime back, and see a shocking sight—a young veteran from Ohio with both legs off, one above the knee and one below the knee, and one of his arms off, and with some fragments of shells still in his skull. Some of those men will be living 50 years from now.

We who are here in Congress must be liberal in making appropriations for more Veterans' Administration hospitals to look after and see that decent treatment is given to those who have been permanently injured in combat, and also for those who are suffering and will suffer as long as they live from the effects of malaria fever and other jungle diseases. We have that responsibility, Mr. President.

I hope that by a strong vote today on the pending McGovern-Hatfield amendment, we will indicate to the people of this country that a large number—a very large number—of Senators say that

we must get out of Vietnam with all of our combat troops, and we must get out of Vietnam next year. We should never have been there with such a vast number of our Armed Forces. We should never have suffered the terrible losses in men and money, to the neglect of desperately needed things that we must take care of for our own people. We must get out. So I hope that by the vote today whether the amendment is adopted or not—40 or more Senators will stand up and be counted in favor of immediate withdrawal from this involvement and then give top priority to immediate needs at home.

I yield the floor.

TRANSACTION OF ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. At this time, in accordance with the previous order, the Senate will proceed to the transaction of routine morning business, with a time limitation of 3 minutes on statements therein. The period for the transaction of routine morning business will expire at 9 a.m., at which time the unfinished business will be laid before the Senate.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The ACTING PRESIDENT pro tempore (Mr. ALLEN) laid before the Senate the following communication and a letter, which were referred as indicated:

PROPOSED AMENDMENT TO THE BUDGET, 1971 (S. Doc. No. 91-100)

A communication from the President of the United States, transmitting an amendment to the budget for the fiscal year 1971, in the amount of $1,650,000, in the funds appropriated to the President, for the protection of visiting foreign dignitaries attending the observance of the 25th anniversary of the United Nations (with an accompanying paper); to the Committee on Appropriations.

REPORT OF THE COMPTROLLER GENERAL

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the high turnover of managers directing major research and development projects, Department of the Army, dated August 31, 1970 (with an accompanying report); to the Committee on Government Operations.

PETITIONS

Petitions were laid before the Senate and referred as indicated:

By the ACTING PRESIDENT pro tempore (Mr. ALLEN):

Resolutions of the Senate of the Commonwealth of Massachusetts; to the Committee on Finance:

"RESOLUTION OF THE COMMONWEALTH OF MASSACHUSETTS

"Resolutions memorializing the Congress of the United States to reverse the action of the House Ways and Means Committee prohibiting the President of the United States from increasing oil imports and to adopt the recommendations of the Presidential Cabinet Task Force on oil imports

"Whereas, New England has in recent years been the victim of great discrimination in the price of home heating oil because of the existing national oil import quotas; and

"Whereas, As a result of such quotas there has been a serious shortage of #2 home heating oil in the New England area; and

"Whereas, Massachusetts consumers alone use 2.2 billion gallons of home heating oil annually; and

"Whereas, Recent action of the United States House of Representatives Ways and Means Committee prohibits the President from increasing oil imports and adopting the recommendations of the Presidential Cabinet Task Force on oil imports; and

"Whereas, Such action by the Ways and Means Committee prevents a reduction in the price of oil in New England and interferes with the availability of an adequate supply of such oil; now, therefore, be it

"Resolved, That the Massachusetts Senate memorializes the Congress of the United States to reverse the action of the United States House Ways and Means Committee prohibiting the President from increasing oil imports and adopting the recommendations of the Presidential Cabinet Task Force on Oil Imports; and be it further

"Resolved, That copies of these resolutions be forwarded by the State Secretary to the President of the United States, to the presiding officer of each branch of Congress and to each member thereof from the Commonwealth.

"Senate, adopted, August 17, 1970."

A joint resolution of the Legislature of the State of California; to the Committee on Interior and Insular Affairs:

SENATE JOINT RESOLUTION NO. 36—RELATIVE TO OPEN HEARINGS

"Whereas, The Los Padres National Forest is a valuable land owned and operated by the federal government in the State of California; and

"Whereas, The U.S. Gypsum Co. has applied for a mineral extraction lease on certain portions of the forest in the Sespe Creek Watershed of Ventura County under terms of the Federal Mineral Leasing Act of 1920 and proposes to excavate approximately 400 acres within a 2,434-acre lease to a depth of 50 to 400 feet and a length of four or more miles for open-pit mining of phosphate compounds; and

"Whereas, There is much public concern that the proposed mining operation and associated roads, processing plants and other facilities may adversely affect the environment, water purity, air quality, and wildlife and recreation use of the forest; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the Congress of the United States and the Secretary of the Interior to order the Bureau of Land Management to hold public hearings into the matter of the proposed lease for open-pit mining by the U.S. Gypsum Co. in the Sespe Creek Watershed of the Los Padres National Forest; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to the Secretary of the Interior, and to each Senator and Representative from California in the Congress of the United States."

A resolution adopted by the City Council of Youngstown, Ohio, praying for a total integration of transportation on a national scale; to the Committee on Commerce.

Petitions signed by sundry citizens of Huron County, Mich., expressing concern for the prisoners of war and the men missing in action; to the Committee on Foreign Relations.

A resolution adopted by the American Bar Association, Chicago, Ill., praying for the enactment of legislation to eliminate hunger and malnutrition; to the Committee on Labor and Public Welfare.

S. 4316—SMALL BUSINESS AMENDMENTS ACT OF 1970—REPORT OF A COMMITTEE (S. REPT. NO. 91-1158)

Mr. McINTYRE, from the Committee on Banking and Currency, reported an original bill (S. 4316) to clarify and extend the authority of the Small Business Administration, and for other purposes, and submitted a report thereon; which bill was placed on the calendar, and the report was ordered to be printed.

AIRCRAFT NOISE—RESOLUTIONS BY THE MASSACHUSETTS GENERAL COURT

Mr. KENNEDY. Mr. President, Massachusetts is continuing to suffer from the noise of aircraft at our airports. Recently, the General Court of my State memorialized the Congress to enact more stringent legislation to minimize aircraft noise. I ask unanimous consent that the resolutions be printed in the RECORD, and appropriately referred.

The PRESIDING OFFICER (Mr. EAGLETON). Without objection, the resolutions will be printed in the RECORD, and will be appropriately referred.

The resolutions were referred to the Committee on Commerce, as follows:

RESOLUTION FROM THE COMMONWEALTH OF MASSACHUSETTS

Resolutions memorializing the Congress of the United States to enact legislation to minimize aircraft noise

Whereas, Use of jet aircraft has created a serious national aircraft noise problem which will become more serious with the expansion of jet service and the development of supersonic service; and

Whereas, The aircraft noise problem cannot be solved at the local governmental level and properly is a problem for national concern by virtue of federal statutes defining airspace as being within the public domain and subject to the jurisdiction of the federal government; and

Whereas, Numerous bills dealing with the problem have been introduced in Congress; now, therefore, be it

Resolved, That the general court of the commonwealth of Massachusetts respectfully urges the Congress of the United States to enact legislation establishing criteria for levels of aircraft noise acceptable to persons on the ground; making it necessary for civil transport aircraft to meet such standards as a condition of federal certification of airworthiness; authorizing establishment of such rules and regulations as may be required to impose such criteria; and providing financial assistance to municipalities and other public bodies which operate airports for the necessary expansion thereof to help resolve the noise problem; and be it further

Resolved, That a copy of these resolutions be transmitted forthwith by the State Secretary to the President of the United States, to the presiding officer of each branch of Congress and to the members thereof from the Commonwealth.

Senate, adopted, April 30, 1970."

ENROLLED BILL SIGNED

The ACTING PRESIDENT pro tempore (Mr. ALLEN) announced that on today, September 1, 1970, he signed the

enrolled bill (H.R. 17133) to extend the provisions of title XIII of the Federal Aviation Act of 1958, as amended, relating to war risk insurance, which had previously been signed by the Speaker of the House of Representatives.

S. 4319—TEMPORARY EXTENSION OF CLEAN AIR AND SOLID WASTE DISPOSAL ACT—REPORT OF A COMMITTEE (S. REPT. NO. 91-1159)

Mr. MUSKIE, from the Committee on Public Works, reported an original bill (S. 4319) to extend the Clean Air Act, as amended, and the Solid Waste Disposal Act, as amended, for a period of 90 days, and submitted a report thereon; which bill was considered, by unanimous consent, passed, without amendment, and the report was ordered to be printed.

(The remarks of Mr. RANDOLPH when the bill was considered appear later in the RECORD under the appropriate heading.)

BILLS AND A JOINT RESOLUTION INTRODUCED OR REPORTED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred or placed on the calendar, or passed, as follows:

By Mr. GORE:

S. 4310. A bill to assist in alleviating the shortage of coal and electrical energy by removing provisions of the income tax laws which are conducive to restricting the supply thereof, by temporarily relieving the Tennessee Valley Authority from certain repayment obligations, by imposing export controls on coal, and by preventing the monopolization of the sources of energy; to the Committee on Finance.

(The remarks of Mr. GORE when he introduced the bill appear below under the appropriate heading.)

By Mr. SCHWEIKER:

S. 4311. A bill to authorize the Secretary of Defense to lend certain Army, Navy, and Air Force equipment and to provide transportation and other services to the Boy Scouts of America in connection with the World Jamboree of Boy Scouts to be held in Japan in 1971, and for other purposes; to the Committee on Armed Services.

By Mr. FONG:

S. 4312. A bill to amend the Immigration and Nationality Act to provide that parents of permanent residents be eligible to file for the second preference category and to include sons and daughters within the provision relating to waiving the exclusion from the United States for fraud; to the Committee on the Judiciary.

By Mr. ALLEN (for himself and Mr. SPARKMAN):

S. 4313. A bill to provide for the issuance of a special series of postage stamps in commemoration of the 100th Anniversary of the city of Birmingham, Ala., and the 75th anniversary of the selection of Vulcan, the mythological Roman god of fire and iron, as a symbol of the unity of the working people, natural resources, the steel and iron industry, capital, and economic growth and progress in Birmingham, Ala., and throughout the Nation; to the Committee on Post Office and Civil Service.

(The remarks of Mr. ALLEN when he introduced the bill appear below under the appropriate heading.)

By Mr. MONDALE:

S. 4314. A bill for the relief of Miss Inkeri Perkkio; and

S. 4315. A bill for the relief of Doris Ann Janzen; to the Committee on the Judiciary.

By Mr. MCINTYRE:

S. 4316. A bill to clarify and extend the authority of the Small Business Administration, and for other purposes; placed on the calendar.

(See reference to the bill when reported by Mr. MCINTYRE which appears earlier in the RECORD.)

By Mr. PEARSON:

S. 4317. A bill to amend Federal Aviation Act of 1958, as amended, to authorize the establishment of a class of limited air carriers, and for other purposes; to the Committee on Commerce.

(The remarks of Mr. PEARSON when he introduced the bill appear below under the appropriate heading.)

By Mr. MONDALE:

S. 4318. A bill for the relief of Indarjit Ramnarine; to the Committee on the Judiciary.

By Mr. MUSKIE:

S. 4319. A bill to extend the Clean Air Act, as amended, and the Solid Waste Disposal Act, as amended, for a period of 90 days; reported, considered, and passed.

(See reference to the bill, when reported by Mr. MUSKIE, which appears earlier in the RECORD under the appropriate heading.)

By Mr. GOODELL:

S. 4320. A bill to amend chapter 3 of title 3, United States Code, to provide for the protection of foreign diplomatic missions; to the Committee on Public Works.

(The remarks of Mr. GOODELL when he introduced the bill appear later in the RECORD under the appropriate heading.)

By Mr. HRUSKA (for himself and Mr. TYDINGS):

S. 4321. A bill to amend title 28, United States Code, relating to the annuities of widows of Supreme Court Justices; to the Committee on the Judiciary.

(The remarks of Mr. HRUSKA when he introduced the bill appear below under the appropriate heading.)

By Mr. JAVITS (for himself, Mr. DOMINICK, Mr. PROUTY, Mr. WILLIAMS of New Jersey, and Mr. YARBOROUGH):

S.J. Res. 234. Joint resolution to authorize and request the President to proclaim the period September 12, 1970, through September 20, 1970, as "Myasthenia Gravis Week"; to the Committee on the Judiciary.

(The remarks of Mr. JAVITS when he introduced the joint resolution appear later in the RECORD under the appropriate heading.)

S. 4310—INTRODUCTION OF A BILL TO ALLEVIATE THE FUEL SHORTAGE AND PROVIDE FOR ENERGY CONSERVATION AND AVAILABILITY

Mr. GORE. Mr. President, coal stocks at many of TVA's generating plants, as well as plants of many utilities around the country, both privately and publicly owned, stand at dangerously low levels. A national crisis in energy impends.

On August 27—just last week—there was only enough coal on hand at two of TVA's plants, Colbert and John Sevier, to run at full capacity for 4 days. At the Johnsonville and Kingston plants there was a 5-day supply of coal. Widows Creek had 6 days of coal on hand. Other TVA plants were somewhat better off. Overall, TVA had on hand last week about one-fifth the supply of coal it considers appropriate, necessary and prudent to insure uninterrupted service.

The slightest interruption in day-to-day deliveries would necessitate shutting down several generating plants. And this would, in turn, mean not only discomfort and inconvenience for thousands of homeowners, but also the loss of jobs for thousands of employees in industries and commercial establishments which cannot operate without electricity.

This sorry situation did not develop overnight. It has been in the making for several years, even though it has become apparent to the general public with disconcerting suddenness. And it has come about not by chance, but through the careful planning of some of our major corporations, and with the knowledge and tacit approval, if not the open support, of the Nixon administration.

Several Senators have proposed studies and investigations of various sorts. I, too, want this matter thoroughly studied, for its long-range implications are even more serious than now readily apparent. I have joined in sponsorship of some of these study and investigation proposals.

But action is needed now to forestall a big increase in electric rates. There are specific actions which can be taken immediately without waiting for more studies, and I have prepared a bill which I send to the desk for introduction and referral. This bill would provide for an immediate attack on this problem of fuel shortage—really fuel control by a few big corporations—for electric power generation.

The need for maintaining a steady growth in the supply of cheap electricity is so obvious as not to require elaboration. All modern industrial societies are economically based in part on electricity. The continued growth of our economy and the continuing comfort and high standard of living of our people demand the continued availability of fuel, particularly coal, in ever-increasing supply, for our generating plants. Coal is also directly essential to the production of steel, cement, chemicals; without an ever-increasing supply of cheap coal and other fuels, our standard of living will begin to fall, and drastically.

The remarkable economic growth we have enjoyed since World War II is closely related to the expansion of facilities and capacity for generation of electric power. At present rates of growth, electric generating capacity must double every 10 years. But at this moment in time, we are simply not prepared to keep up.

For we face right now, today, a fuel shortage which threatens our economic health as well as our physical well-being this winter.

The key fuel, insofar as electric power generation is concerned, is coal. Excluding hydropower, coal accounts for 63 percent of fuel used by our electric utilities. This may be reduced as time goes on as more nuclear generating capacity is brought into operation, but at the present time and for several years to come we must continue to depend on coal to a great extent. And the coal companies, until quite recently, have met the challenge of production. Generating plants use four times more coal now than they did at the end of World War II, and the independent coal companies have heretofore increased output through

advances in mining techniques and mechanization. One man now produces almost 20 tons of coal per day, compared to 5.8 tons at the end of World War II.

Our other sources of energy—oil, natural gas, hydropower, and nuclear energy—are also important, but they, too, are either in short supply or with limited production.

Production of domestic oil is regulated by the various States. A rather tight lid is kept on production in order to insure a good price. And, while foreign oil importation could relieve the production and price problem, a tight import quota system remains in effect.

Natural gas is in short supply—at least where it is needed. While producers complain that Government regulations inhibit sufficient gas production and exploration, there are reports that gas is being artificially held back from would-be consumers.

Coal production is more than 10 million tons short of probable consumption this year. And the coal companies no longer independently controlled, show no signs of wanting production to catch up with consumption.

Nuclear power has not come on as fast as had been predicted. Overall, the program is 2 or 3 years behind. Of the 65 nuclear powerplants scheduled for service between 1970 and 1976, 23 have already been delayed by up to a year.

Hydropower seems about to have nearly reached its limits. New sites are extremely scarce. Some progress may be made in pump-storage procedures to allow some extra generation during peak-load hours, but this appears to be about all that can be done in this direction now.

To sum up, we must depend on oil, gas, coal, and nuclear energy to meet increased electricity demand. And the frightening thing about all of this is that we now have a quasi-monopoly in these fuels. The big oil companies are making a determined effort to attain control of all energy sources. In fact, they already, with help from the Nixon administration, manage effective control.

During the past 5 years, the oil companies have been busily buying up the larger coal producers. They have also been busy in the nuclear area, and may soon even be in a position to dominate absolutely the production of nuclear fuels.

Already, the squeeze on the consumer is tight. Coal prices are being raised at the rate of 56 percent per year; fuel oil is up about 48 percent. Already, the additional cost to the consumer from these fuel price increases amounts to a billion dollars per year through higher electric bills.

And the worst is yet to come—unless President Nixon or Congress acts. The people can hardly expect salvation from the executive branch, as we have seen in so many instances. So Congress should act and hope for Presidential cooperation.

Several reasons have been advanced for our sudden shortage of coal. It has been suggested that there is a shortage of freight cars, and there is a shortage. It is felt by some that the Federal Coal Mine Health and Safety Act of 1969 has been responsible for closing some mines and increasing cost of coal. Some smaller mines are closed, although there has been a spurt in strip mining. There has been an increase in exportation of coal, and this has been felt both in the supply and in the price. Some feel there is a shortage of manpower for mining.

But I submit that an overriding reason for coal shortages and increased prices lies in the concentration of ownership of our Nation's coal supplies and producers in a few giant corporations which also own oil and gas operations.

The concentration of ownership of fuel sources in a few hands should be cause for concern to all who value our system of competitive, free enterprise. And the Nixon administration, which prates about the preservation of our free enterprise system, has taken absolutely no steps to correct this dangerous situation. Rather, through continuation of the oil import quota program, through the recent and thoroughly unjustified hike in the cost of nuclear fuel enrichment, through failure to enforce the antitrust laws, through resistance to true tax reform, and by creating a climate conducive to further big business grabs, much is being done actually to destroy competitive, free enterprise.

Beginning in 1965, the independent coal companies began to disappear. This disappearance was not brought about through failure to make a profit or inability to continue in business. The disappearance was, rather, brought about by consolidations and acquisitions. And, most disturbing to me was the fact that many of the largest coal companies were being bought up by oil companies. I warned Congress and the people of my State about this threat of monopoly in 1966. Moreover, I tried to strike down the tax favoritism that spanned the fuel monopoly.

Perhaps I am overly sensitive to the depredations of big oil companies. I have fought them consistently since I have been in Congress, and, in turn, they have fought me and continue to do so.

The alarming fact we now face is the ownership of a large part of our coal reserves by oil companies, and other giant conglomerates not primarily concerned with coal production. Eight of our 10 largest coal companies are owned by oil or mineral corporations. And, according to TVA power manager James Watson, the oil companies are not particularly concerned about selling coal.

Coal companies, under their now ownership and new management policies, simply refuse to bid when asked to do so. A recent experience by TVA had been duplicated, I understand, in other parts of the country. TVA asked for bids for delivery of 140,000 tons of coal per week for one of its new steam plants. It received only one bid, and that for only 20,000 tons. And the price was very high.

TVA has announced a whopping 23-percent increase. This is a sharp blow to homeowners and industries in the Tennessee Valley. TVA lacks the flexibility of a privately owned utility, a matter I shall go into in some detail in a few minutes.

An electric utility, public or private, must meet its increased costs sooner or later. And these increases, brought about largely through increased cost of fuel and through higher interest rates, must be paid by the consumer.

In the case of TVA, the 23-percent increase in rates will bring in $115 million per year. This is a heavy burden on the people of Tennessee.

But, suppose TVA tries to switch to oil or gas. It must largely deal with the same capital interests.

In the last few years, many of our major oil companies have acquired holdings in competing fuels. Of course, they have always had a tight grasp on gas. They made a real breakthrough in coal in 1966 when Continental Oil took over Consolidation Coal—a deal I unsuccessfully fought. The pace of acquisition quickened after that and today, as I have said, eight of the 10 largest coal producers are owned by oil, mineral, or other industrial giants.

I tried, as I have said, to put a stop to the acquisition of Consolidation Coal by Continental Oil, particularly since that acquisition was undertaken through the use of a most reprehensible and indefensible tax loophole. I was not successful in stopping that one, although this tax loophole has now been pretty well closed up. I have discussed this particular matter several times in the Senate, and will not review it at this time.

Now, with the oil companies controlling most of the fossil fuels, the only remaining hope for competition rests with nuclear fuel. And whose tracks do we find in the nuclear field?

According to testimony presented to the Senate Antitrust Subcommittee, oil companies now control 45 percent of known uranium reserves. Oil companies control uranium milling. Oil companies own four out of five plants for reprocessing used nuclear fuel elements.

About the only operation in the nuclear field not already dominated by oil companies is the enrichment process which the Federal Government now controls. President Nixon, true to form, has been busying himself to find a way to "sell" these enrichment plants at Oak Ridge, Paducah, and Portsmouth to private enterprise. I have spoken out on this matter many times, as have other Members of the Senate, particularly those who are on the Joint Committee on Atomic Energy. I will not repeat what I have already said. I will say at this point only that I will continue to oppose to the utmost of my ability the President's planned giveaway of the people's assets in the nuclear processing plants.

The Nixon administration recently announced a 10-percent rise in the cost of enriching nuclear fuel. This was wholly unnecessary, and can serve only to underpin the oil companies' price increases on fossil fuels, as well as to prepare the way further for a profitable commercial operation of nuclear fuel enrichment

when the contemplated giveaway of the enrichment plants finally does materialize—probably after the fall elections.

As if the monopolistic grasp on fossil fuels by the oil companies were not enough, the Nixon administration continues to help these giants by continuing the oil import quota program.

And, at the same time, exports of coal have taken a sudden jump.

Now, ordinarily I am in favor of increased exports, of increased world trade. We need to correct our always dangerous balance-of-payments deficit. But we must do this in an orderly fashion, and without crippling domestic industry.

The Export Control Act authorizes control over exports for three purposes—national security, foreign policy, and short supply. It is obviously in the national interest at this time of fuel shortage to control exports of coal, since this commodity is definitely in short supply.

At the present time, the only commodities subject to short supply controls are copper and nickel. The President should take steps immediately to place coal on this list. I call upon the President to do so as the first step to forestall the announced increase in TVA electric rates.

Exports of coal now amount to about 9 percent of production. Exports to Japan have taken a particularly sharp rise in the last few years.

The time for action has arrived. Consumers must not be burdened with what amounts to a transfer of taxes from the oil companies to them. Utilities such as TVA must be allowed to operate in a more truly competitive situation in the purchase of fuel.

The Nixon administration talks a great game of "free enterprise." I now call on President Nixon to help preserve free enterprise by restoring competition to the fuel field. How can he continue to ignore this shaky situation in fuels brought on by oil company concentration?

Export controls should be placed on coal. I would not deny any exports at all, but they should be held down to the level of recent years before the big jump in 1968–69. Our own needs come first. That is why we have the Export Control Act.

Next, antitrust action is obviously the first step to be taken. The hold of the oil companies on our fuel supply must be broken. The giant conglomerates involving coal producers must be broken up and at once. I call upon the administration for this needed action.

Third, tax changes which would discourage conglomerates should be adopted. This would require congressional action which I urge.

Fourth, the import quota program on oil should be discontinued. The President extended this import quota only a few days ago. I call upon the President to rescind this in the public interest.

And, lastly, at least as a measure of temporary relief, the payback provision of the TVA Self-Financing Act should be suspended until interest rates are brought down to reasonable levels. This payback provision perhaps requires some explanation for those colleagues not entirely familiar with TVA's self-financing of its power operations.

It will be recalled that under the Eisenhower administration, TVA was ruthlessly attacked. Dismemberment and ultimate disposition was the plan. When that failed, due to the resistance of some of us in the Senate, the attack was continued through refusal of the administration to ask for funds for construction of additional electric generating facilities. Congress finally enacted a self-financing bill under which TVA could sell its own bonds and build its own power facilities.

But administration hostility dictated stringent terms to be imposed on TVA. Not only was TVA required to pay for its future construction by going into the marketplace, it was also required to pay a high rate of return on amounts already appropriated. Now, this might be regarded as something of a dividend to the American people as the owners of this utility. But the amount of this dividend was to be determined by the future cost of money, not by the cost of the money used to build the original facilities when money was much cheaper.

Another provision which was also included, and which is never required of a privately owned utility, required that TVA repay to the Federal Government its original investment in TVA's power facilities.

This latter requirement, comparable to requiring a private corporation to repay equity capital, should never have been imposed on TVA, but it was necessary at the time in order to get the agreement of the Eisenhower administration to the continued existence and growth of TVA. This payback provision surely should be suspended during these unusual times of abnormally high fuel and artificially high interest rates. I call upon President Nixon to help suspend this burden as a partial means of preventing the planned increase from going into effect.

Now, Mr. President, with this brief but unavoidably somewhat tedious background, I have sent to the desk a bill which will, if enacted, do much for the immediate relief of TVA and other utilities, and I would hope it would also be of material assistance in restoring a measure of competition necessary for the survival of free enterprise in our country.

Title I of the bill contains proposed changes in tax law, changes which should discourage further acquisition and consolidation of coal operations and reserves. I discussed these tax changes on August 19 of this year, and my colleagues may find this discussion beginning on page 29502 of the CONGRESSIONAL RECORD.

Title II would suspend the payback provision for TVA until interest rates come down to a decent level. This suspension would enable TVA to reduce materially its most recent rate increase.

Title III would limit coal exports to the level of the average of the 5 years 1964–68, prior to the more recent spurt in exports.

Title IV would amend the antitrust laws to insure the coverage of conglomerates involving the fuels industries, and it would also strongly urge the President to see to it that the Justice Department proceeds immediately to enforce this new law.

Now, Mr. President, I am not sure that what I am now proposing is all that needs to be done. As I said earlier, I have also joined many of my colleagues in sponsoring proposals for more detailed studies and investigations. But I would certainly hope that the obvious and timely steps I am today recommending will not be put off until a more thorough solution is found.

I am concerned, seriously concerned, over the concentrated control which now exists in fuels. This is most dangerous to the national welfare, both in the short and in the long run. It must not be tolerated. Government, as the agent for the whole society, must act for the common good. This is the purpose of government. Why else should we tolerate such an expensive, wasteful, irritating thing as our National Government? We tolerate its shortcomings in the expectation that it will, on occasion, move to our defense. This is such an occasion.

The ACTING PRESIDENT pro tempore (Mr. ALLEN). The bill will be received and appropriately referred.

The bill (S. 4310) to assist in alleviating the shortage of coal and electrical energy by removing provisions of the income tax laws which are conducive to restricting the supply thereof, by temporarily relieving the Tennessee Valley Authority from certain repayment obligations, by imposing export controls on coal, and by preventing the monopolization of the sources of energy introduced by Mr. GORE, was received, read twice by its title, and referred to the Committee on Finance.

S. 4313—INTRODUCTION OF A BILL RELATING TO ISSUANCE OF A SPECIAL SERIES OF POSTAGE STAMPS IN COMMEMORATION OF THE 100TH ANNIVERSARY OF THE CITY OF BIRMINGHAM, ALA.

Mr. ALLEN. Mr. President, I introduce for myself and the distinguished senior Senator from Alabama (Mr. SPARKMAN) a bill to provide for the issuance of a special series of postage stamps to commemorate both the 100th anniversary of the city of Birmingham, Ala., and the 75th anniversary of the selection of Vulcan, the mythological Roman god of fire and iron, as the symbol of the Birmingham iron and steel industry.

Mr. President, in 1971 the city of Birmingham, Ala., will celebrate its 100th anniversary. In anticipation of this event, the mayor, Hon. George G. Seibels, Jr., and members of the city council on August 11, 1970, and the president of the county commission of Jefferson County, Ala., Hon. W. Cooper Green, and members of the county commission on August 25, 1970, adopted resolutions both of which call upon the President of the United States, the Postmaster General, and the Post Office Department to issue a commemorative stamp bearing a likeness of Vulcan. The reasons underlying the selection of this symbol for a com-

memorative stamp are numerous and interesting both from a historical point of view and from the viewpoint of symbolic meaning.

Mr. President, Vulcan is the largest cast iron statue ever built in the United States. It is situated on top of a mountain of iron ore more than 100 miles long and is located in a Birmingham public park on which the city is currently spending $1 million to further beautify.

The statue was built by public subscription with substantial contributions from business and civic leaders including the United Mine Workers of America, Building and Trades Council, and many women's civic organizations. The park is open and free to all.

The resolutions make a strong case for issuance of the Vulcan commemorative stamp and I ask unanimous consent that they be printed in the RECORD as a part of my remarks.

The PRESIDING OFFICER (Mr. HOLLINGS). The bill will be received and appropriately referred; and, without objection, the resolutions will be printed in the RECORD.

The bill (S. 4313) to provide for the issuance of a special series of postage stamps in commemoration of the 100th anniversary of the city of Birmingham, Ala., and the 75th anniversary of the selection of Vulcan, the mythological Roman god of fire and iron, as a symbol of the unity of the working people, natural resources, the steel and iron industry, capital, and economic growth and progress in Birmingham, Ala., and throughout the Nation introduced by Mr. ALLEN (for himself and Mr. SPARKMAN), was received, read twice by its title, and referred to the Committee on Post Office and Civil Service.

The resolutions presented by Mr. ALLEN are as follows:

RESOLUTION BY THE COUNTY COMMISSION OF JEFFERSON COUNTY

Whereas, the year 1971 marks the 75th Anniversary of the adoption of Vulcan, mythological god of fire and metal work, as a symbol of the Birmingham iron and industry; and

Whereas, 1971 marks the 100th Anniversary of the City of Birmingham, Alabama; and

Whereas, the people of Birmingham did in 1903 conceive and construct the world's largest statue, a 60 ton Vulcan, this being a monumental achievement of our American workmen; and

Whereas, this Iron Man, Vulcan, is the largest statue ever built in the United States and the largest cast statue in the world; and

Whereas, Vulcan has been a national and world tourist attraction from the time of its construction; and

Whereas, the Government of the United States does promote the idea of "DISCOVER AMERICA" and national tourism; and

Whereas, the City of Birmingham is currently spending more than one million dollars to further enhance this great historical and tourist attraction.

Now, therefore, we the County Commission of Jeffersor County, Alabama, do resolve, and respectfully call upon The President of the United States, and The Honorable Postmaster General of the United States, and The Post Office Department, to cause to be issued in the Year 1971, in Birmingham, Alabama, a postage stamp commemorating the 75th Anniversary of Vulcan, as a symbol of the working people of Birmingham and The United States, and the steel and iron industry of the South, and for the other unique attributes of the statue and the City.

Adopted unanimously this the 25th day of August, 1970.

W. COOPER GREEN,
President.
E. H. (EDDIE) GILMORE,
Associate.

RESOLUTION BY THE CITY COUNCIL OF BIRMINGHAM, ALA.

Whereas, the year 1971 marks the 75th Anniversary of the selection and promulgation of Vulcan, mythological Roman god of fire and iron, as a symbol of the Birmingham iron and steel industry and that of the South; and

Whereas, the year 1971 marks the beginning of the 100th Anniversary of Birmingham, Alabama, the recognized steel and iron center of the South; and

Whereas, the greatest progress of the United States took place following the emergence of Southern steel and iron industry; and

Whereas, a combination of people from New York, New Jersey, and Alabama, under the guidance of the great Italian artist, Guiseppe Moretti, produced the world's largest Iron Man, Vulcan, which was, and is, rated of high artistic merit; and

Whereas, this Iron Man represents a product of American Democracy at its best, being the most monumental achievement of the American Iron Industry, and an important memorial to America's working men, and those of Birmingham in particular; and

Whereas, this Iron Man was built by public subscription, including those of business, citizens, The United Mine Workers, Building and Trades Council, women's civic organizations, and others, and is open and free to all; and

Whereas, Vulcan has been a national and international tourist attraction from its inception, being viewed by more than 19,000,000 people in the first six months of its existence, and untold millions since; and

Whereas, the Government of The United States does promote "Discover America", and tourism from foreign countries, in consideration of international friendship and balance of trade; and

Whereas, this statue is an American phenomenon, being the largest statue ever built in the United States, towering more than 600 feet above sea level, atop a mountain of iron ore more than 100 miles long; and

Whereas, the statue of Vulcan will enjoy its 25th Anniversary as a unique promoter of traffic safety in the United States in the year 1971; and

Whereas, we wholeheartedly support the announced issuance of the Stone Mountain, Georgia Stamp, as being in the best American traditions, promoting our history, and tourist attractions; and

Whereas, the statue of Vulcan is a tourist and historical attraction of equal, or greater magnitude; and

Whereas, The City of Birmingham is currently spending more than one million dollars to further beautify Vulcan and its surrounding public parks, and is free to all; and

Whereas, The City of Birmingham, aside from owning and building Vulcan, did further grow from zero population to a district of over 200,000 people in thirty years, justly earning the title "Magic City"; and

Whereas, The City of Birmingham deserves the honor of recognition for these important anniversaries, and has just received the further honor of being a finalist in the nomination for "All-American City" award, which honor will encompass the year 1971, if received, in this national awards contest; and

Whereas, The City of Birmingham feels this recognition justly deserved for itself and the State of Alabama.

Now, therefore, we the City Council of The City of Birmingham, Alabama, with the Mayor concurring, do resolve, and call upon The President of The United States, The Honorable Postmaster General of The United States, and The Post Office Department, to cause to be issued in the Year 1971, in Birmingham, Alabama, a postage stamp commemorating the 75th Anniversary of Vulcan, as a symbol of the working people of Birmingham and The United States, and the steel and iron industry of the South, and for the other unique attributes of the statue and the City.

Adopted unanimously this the 11th day of August, 1970.

GEORGE G. SEIBELS, Jr.,
Mayor.
JOHN E. BRYAN,
Council Member.
LISTON A. CORCORAN,

Acting City Clerk.

S. 4317—INTRODUCTION OF THE LIMITED AIR CARRIER ACT OF 1970

Mr. PEARSON. Mr. President, small communities across this Nation are vitally dependent upon adequate transportation. Just as our cities are faced with critical problems of congestion, pollution, and other dilemmas related to transportation, so are small- and medium-size towns affected by the lack of fast and efficient service surface and air transportation. It is my conviction that the future of the United States depends on how well we accomplish the redistribution of our population away from our major hub cities. And as I have stated here many times before, the key to this dream of rural development is transportation.

Unfortunately, the present transportation picture in Small Town U.S.A., is not particularly attractive, as many of us know. In Kansas and in other parts of the country rail transportation is deteriorating and disappearing. Bus transportation remains inadequate. Increasingly, air transportation is vital to the growth of our small- and medium-sized communities.

However, our Aviation Subcommittee of the Senate has been alarmed to note that instead of increasing the number of flights, many regional carriers are suspending or abandoning service to many towns on their systems. Last week

our subcommittee held hearings in my State in an effort to determine the magnitude of this problem at representative communities across the Nation. The record developed at those hearings has prompted me to introduce this legislation in an effort to insure that small- and medium-sized communities will be afforded reliable air service for the future.

The special and urgent need for this legislation is demonstrated by our experience with regional air carriers—originally known as "feeder airlines." These carriers originally flew aircraft of small capacity, such as air taxi operators and commuter air carriers now operate. However, as pressure from Congress urged reduction in subsidy payments, these carriers began using larger aircraft in an effort to operate more profitably. And as larger aircraft were utilized, regional carriers gradually "outgrew" many of the small towns on their systems. The result of this cycle of decreased subsidy and increased costs was a substantial cutback in service to those communities which the regional carriers had originally served. We are now faced, Mr. President, with an extremely large gap in our air transportation system, a gap that can only be filled through the use of smaller capacity aircraft providing frequent, reliable service.

Accordingly, the legislation I am introducing today is intended to achieve the following objectives:

Create and maintain a class of air carriers that can serve that portion of the public that has not and cannot be served by present classes of certificated air carriers by granting the Civil Aeronautics Board the authority to establish a limited air carrier certificate;

Provide the opportunity for the development of new routes and service for the many communities that have suffered from inadequate service;

Provide the stability necessary for a class of air carriers that has been suffering financial losses and failures;

Establish on a solid, legal basis an important segment of our airline industry that is now operating on a temporary basis of questionable validity;

Provide a means by which subsidy to the airline industry may be reduced while service to the public may be increased and improved; and

Provide increased safety and reliability for the industry by encouraging the design of an aircraft to serve a predictable market.

Mr. President, I ask unanimous consent that this bill and an explanation of it be printed in the RECORD.

The PRESIDING OFFICER (Mr. CASE). The bill will be received and appropriately referred; and, without objection, the bill and explanation will be printed in the RECORD.

The bill (S. 4317) to amend Federal Aviation Act of 1958, as amended, to authorize the establishment of a class of limited air carriers, and for other purposes, introduced by Mr. PEARSON, was received, read twice by its title, referred to the Committee on Commerce, and ordered to be printed in the RECORD, as follows:

S. 4317

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Limited Air Carrier Act of 1970".

SEC. 2. The Federal Aviation Act of 1958, as amended, is further amended by adding the following:

(a) Section 101 (49 U.S.C. 1301) is amended by redesignating paragraphs (34) and (35) as (36) and (37) and by inserting the following new paragraphs:

"(34) 'Limited air carrier' means an air carrier holding a certificate authorizing it to engage in limited air transportation.

"(35) 'Limited air transportation' means air transportation by aircraft rendered pursuant to a certificate of authority issued to section 401(d)(4) of this Act to provide scheduled service with aircraft of limited capacity."

(b) Section 401 (49 U.S.C. 1371) is amended by adding the following new paragraph to subsection (d) thereof:

"(4) In the case of an application for a certificate to engage in limited air carrier transportation the Board may issue a certificate to any applicant not holding a certificate under paragraph (1), (2) or (3) of this subsection, authorizing the whole or any part thereof, and for such periods as may be required in the public interest, if it finds that the applicant is fit, willing and able properly to perform the transportation covered by the application and to conform to the provisions of this Act and the rules, regulations, and requirements of the Board hereunder.

"In determining whether an applicant is fit, willing and able, the Board may reach this determination on the basis of information furnished the Board in writing and without a hearing. The submission by an applicant of information either on the original application or in the form of any supplemental information furnished in connection with such application shall constitute representation that such information is true and correct to the best of the applicant's information and belief. Upon the finding that any material representation so furnished is not correct, or is untrue the Board may deny the application or suspend or revoke any certificate issue pursuant to such application.

"In the event (i) an applicant is conducting operations as a limited air carrier on the effective date of the Limited Air Carrier Act of 1970 and (ii) such application has been filed with the Board within 30 days after such effective date, then such applicant may conduct such limited air carrier operations until such time as the Board shall have ruled upon the application.

"The Board shall not be required to find that public convenience and necessity require the issuance of a limited air carrier certificate, but shall adopt such rules and regulations and requirements as it may deem in the public interest to implement and enforce the policies set forth in section 102 of this Act.

"Any certificate issued pursuant to this paragraph shall contain such limitations as the Board shall find necessary to assure that the service rendered pursuant thereto will be in accordance with the purpose of limited air transportation."

(c) Section 401 (49 U.S.C. 1371) is amended by adding before the period at the end of subsection (e)(4) the following: ", or in a certificate for limited air transportation, as required by subsection (d)(4) of this section, the Board shall limit the capacity of the aircraft to be used."

(d) Section 401 (49 U.S.C. 1371) is amended by adding the following new subsection:

"(o)(1) No certificate to engage in limited air transportation shall be issued or remain in effect unless the applicant for such certificate or the limited air carrier, as the case may be, complies with regulations or orders issued by the Board governing the filing and approval of policies of insurance, in the amount of such insurance, amounts for which such applicant or such limited air carrier may become liable for bodily injuries to or the death of any person, or for loss or damage to property of others, resulting from the negligent operation or maintenance of aircraft under such certificate.

"(2) If any service authorized by a certificate to engage in limited air transportation is not performed to the minimum extent prescribed by the Board, it may by order, entered after notice and hearing direct that such certificate shall thereupon cease to be effective to the extent of such service.

"(3) The requirement that each applicant for a certificate to engage in limited air transportation must be found to be fit, willing and able properly to conform to the provisions of this Act and the rules, regulations and requirements of the Board under this Act, shall be a continuing requirement applicable to each limited air carrier with respect to the transportation authorized, by and currently furnished or proposed to be furnished under, such carrier's certificate. The Board shall by order, entered after notice and hearing, modify, suspend, or revoke such certificate, in whole or in part, for failure or such carrier (A) to comply with the continuing requirement that such carrier be so fit, willing and able, or (B) to file such reports as the Board may deem necessary to determine whether such carrier is so fit, willing and able.

"(4) The Board shall prescribe such regulations and issue such orders as may be necessary to carry out the provision of this subsection."

(e) Section 403 (49 U.S.C. 1373) is amended by inserting in the first sentence of subsection (a) after the words "Every air carrier:" the following: ", except a limited air carrier"; and, by inserting in the second sentence after the word "prescribe" the following: ", except that a limited air carrier need not file, post or publish tariffs unless directed by the Board to do so,".

(f) Section 406 (49 U.S.C. 1376) is amended by adding the following before the period at the end of subsection (a): ": *Provided,* That a hearing shall not be required in fixing the mail rates for limited air carriers and that special rules and procedures may be established by the Board for fixing mail rates and authority for limited air carriers."

SEC. 3. This Act shall become effective ninety days after date of enactment.

The explanation presented by Mr. PEARSON is as follows:

EXPLANATION OF AMENDMENTS TO FEDERAL AVIATION ACT OF 1958

The purpose of these proposed amendments is to establish a new and separate class of scheduled air carrier. The Civil Aeronautics Board would be given adequate authority to regulate this class in such a manner as to permit its growth, expansion, and stability. The method to be used is patterned after that followed by Congress and the Civil Aeronautics Board in the adoption of the provisions which established the supplemental air carrier industry in 1962.

Just as Congress defined the supplemental air carrier and defined supplemental air transportation, so do I propose definitions for the limited air carrier and limited air transportation (Section 101 (34) (35)).

The Board in establishing the supplemental air carrier amended Section 401 (d) by adding subsection (3). This language would follow that pattern by adding to Section 401 (d), Subsection (4), which is designed to establish a class of carrier which can en-

ter into business with minimum costs and restrictions. The fit, willing and able requirement remains, but the requirement of public convenience and necessity is eliminated. Further, the fit, willing and able requirement may be established without a hearing. Thus, the Board is given reasonable flexibility to establish such rules and requirements as it considers will permit this segment of the industry to serve those communities and that portion of the public that have been and are now without adequate air service.

The policy established by Congress for the supplemental air carrier is followed with respect to the limited air carrier. This policy is included in a new subsection (o) which has been added to Section 401.

With respect to tariffs, the Board would be authorized to eliminate the filing of tariffs or require them in such degree and form as the Board might from time to time consider in the public interest. This is provided for in amendments to Section 403.

BACKGROUND AND NEED FOR LEGISLATION

During the past ten years the Board has permitted the development of a new and separate class of scheduled air carrier through the use of its exemption authority under Section 416. In previous years, the Board also has used this section to establish another class of air carrier—the supplemental air carrier. When the authority under this exemptive section was no longer available because of the growth of the supplemental industry, the Board endeavored to establish a supplemental air carrier certificate without additional legislation. This effort was held invalid by the courts. However, the need and purpose was valid, and through the cooperation of the Board, the industry and Congress, the law was quickly amended granting the Board the necessary authority to certificate and properly regulate the supplementals.

We are in a similar position today with respect to the air commuter industry. In the opinion of many knowledgeable people, the Board has exceeded its authority in its present use of Section 416. Therefore, we should benefit by past experience. We should not wait for difficulties to arise which can be most harmful for the public's service and detrimental to the industry. By the application of our knowledge and experience we can eliminate these difficulties. This legislative proposal is designed to affirmatively provide the Board with adequate authority to establish this new class of air carrier. By so doing, we can provide service to that substantial segment of the public which has not, will not and cannot be economically served except by such a class of air carrier using limited capacity aircraft and operating under regulations designed to fit the service it performs.

Accordingly, it is essential for the continued growth and stabilization of our national transportation system that the Board be given authority and encouragement by Congress to establish this class of carrier as a permanent, rather than a temporary exempt, segment of the air transportation industry. To accomplish this goal, the Board must have authority to determine the capacity of the aircraft which these carriers shall operate in order to assure that there will be adequate service for the traveler, that little or no federal subsidy may be required, and that service may be provided without creating wasteful or destructive competition for the trunk and regional air carrier. The intent of this legislation is to allow the Board sufficient flexibility to ensure that as traffic needs change, as aircraft and route structures change, there will always be a class of dependable carrier to serve small communities with frequency and adequacy at a cost the public can afford.

S. 4320—INTRODUCTION OF A BILL TO PROVIDE FOR THE PROTECTION OF FOREIGN DIPLOMATIC MISSIONS

Mr. GOODELL. Mr. President, I introduce, for appropriate reference, a bill to provide for the protection of foreign diplomatic missions—including consulates—in the United States, its territories, and possessions. This bill gives the Federal Government primary responsibility for the protection of embassies and missions of foreign nations. This would relieve local police departments of the responsibility and free them to attend to their primary duties of protecting the residents and property of their respective communities.

Earlier this year, we passed legislation which created the Executive Protective Service, an expanded version of the White House police force. The EPS now guards foreign diplomatic missions located in the metropolitan area of the District of Columbia. Accordingly, the District of Columbia Metropolitan police force has been relieved of this responsibility.

However, the Federal Government must also assume its responsibility for the protection of foreign diplomatic missions located outside of Washington, D.C. It must assume responsibility for the protection of embassies and consulates located in New York City and other municipalities.

Last December, the Senate Subcommittee on Public Buildings and Grounds held hearings on legislation which provided for the establishment of the Executive Protective Service. At that time Mr. James Rowley, the Director of the Secret Service, stated:

> The responsibility of protecting foreign diplomatic missions rightly and properly belongs to the Federal Government.

I fully concur with Mr. Rowley's judgment.

The legislation I introduce today would increase the area of authority of the EPS. I have asked the Secretary of the Treasury for an estimate of what the authorized statutory strength of the EPS should be if authority of the EPS is increased as I propose. The legislation I propose takes account of this and provides that the statutory size of the EPS be determined by the Secretary of the Treasury.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD. I also ask unanimous consent that the following documents be printed in the RECORD:

A statement which I delivered on the steps of the 19th Police Precinct, 153 East 67th Street, New York City, on August 12, 1970.

Statements by Mayor John V. Lindsay and Police Commissioner Howard Leary. These statements support my bill.

An editorial from the New York Post, dated August 15, 1970. This editorial supports my bill.

A WCBS radio editorial aired August 27, 1970, and August 28, 1970. This editorial supports my bill.

Articles from the New York Times, dated August 6, 1970, August 14, 1970, August 20, 1970, and August 21, 1970. These articles describe problems which beset the city of New York due to the Federal Government's failure to protect foreign diplomatic missions.

A letter, dated August 4, 1970, from Mr. William J. Diamond, chairman of Community Board No. 8, city of New York, to Police Commissioner Howard R. Leary. Mr. Diamond's letter describes the problems which beset the community.

A statement entitled, "Where Are Your Foot Patrolmen?", issued by concerned police officers of the 19th precinct.

A letter I wrote on August 12, 1970, to the Honorable David M. Kennedy, Secretary of the Treasury.

A response to my letter of August 12, 1970, from James E. Smith, Special Assistant to the Secretary of the Treasury.

The PRESIDING OFFICER (Mr. BELLMON). The bill will be received and appropriately referred; and, without objection, the bill and documents will be printed in the RECORD.

The bill (S. 4320) to amend chapter 3 of title 3, United States Code, to provide for the protection of foreign diplomatic missions, introduced by Mr. GOODELL, was received, read twice by its title, referred to the Committee on Public Works and ordered to be printed in the RECORD, as follows:

S. 4320

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the second sentence of section 202 of title 3, United States Code, is amended by striking out clauses (4) and (5) and inserting in lieu thereof "and (4) foreign diplomatic missions (including consulates) located in the United States, its territories, and possessions.".

(b) Section 203 (a) of title 3, United States Code, is amended by striking out the words "as may be necessary but not exceeding eight hundred and fifty in number" and inserting in lieu thereof "as the Secretary of the Treasury determines is necessary to carry out the provisions of this chapter".

The material presented by Mr. GOODELL is as follows:

STATEMENT BY SENATOR CHARLES E. GOODELL PROPOSING LEGISLATION TO RELIEVE NEW YORK CITY POLICEMEN OF EMBASSY GUARD DUTY

For years, the Federal Government has neglected its responsibility in matters pertaining to the protection of foreign diplomatic missions located in New York. As a result, the City of New York has had to assume this responsibility. Unfortunately, the City's resources are limited—Thus, the people of New York have received less police protection than their tax dollars provide for. As a result, the crime rate in the area from 59th to 86th Streets, and from Fifth Avenue to the East River has increased more rapidly than in other areas of the City. 450,000 people live in this area; they are entitled to adequate police protection. Hundreds of merchants do business in this area; they too are entitled to adequate police protection. I, therefore, support this community's effort to put New York City police back on the street.

To this end, I will introduce legislation which will require the Federal Government to assume its responsibility for the protection of foreign diplomatic missions in areas other than Washington, D.C.

Today, New Yorkers pay more than $1.5 million a year in salaries to more than 150 police officers who serve as security guards at foreign diplomatic missions. The legislation I propose will put these officers back on the streets of New York.

The legislation I offer will transfer this responsibility to the Executive Protective Service, the division of the Secret Service which provides security guards to foreign diplomatic missions in the Nation's capital.

STATEMENTS BY MAYOR JOHN V. LINDSAY AND POLICE COMMISSIONER HOWARD LEARY IN SUPPORT OF LEGISLATION PROPOSED BY SENATOR CHARLES E. GOODELL

MAYOR JOHN V. LINDSAY

New York City bears the heavy burden of protecting foreign diplomatic missions with police officers who are desperately needed to fight crime on the streets of our city. Guarding foreign missions is the responsibility of the Federal Government. Under no circumstance should it tie up our local police.

For several years we have tried to get the Federal government to accept its responsibility. Therefore I strongly support Senator Goodell's legislative proposal which would accomplish this.

POLICE COMMISSIONER HOWARD LEARY

The assignment of policemen to fixed posts outside embassies has placed a financial burden upon the taxpayers of the city of New York, and a manpower drain upon their police department.

There can be no question as to the merits of providing protection for the public, including embassy staffs, on the sidewalks and streets outside of diplomatic missions. The question is should New York City assume the full burden of responsibility.

I am hopeful that Senator Goodell will be successful in his efforts to transfer this dual burden from the city government to the Federal government.

THE WRONG BEAT

The city is spending an estimated $1.57 million yearly for a special police program on Manhattan's East Side, but the citizens of that section of town are getting less protection as a result of it. The money is expended to keep patrolmen posted outside the consulates and U.N. legations that dot the area. While the safety of these buildings is thereby secured, crime against people on the neighborhood's unattended streets is rising alarmingly.

Sen. Goodell (R-N.Y.) has come forward with a sensible solution to the problem. He plans to propose legislation which would place responsibility for guarding missions here and in other cities in the hands of the new federal Executive Protection Service. Members of this force, created last March by Congress, are about to relieve Washington policemen of the task of guarding embassies in the capital.

Mayor Lindsay and Police Commissioner Leary both back the bill, and patrolmen on the East Side picketed last month in support of such an arrangement. The residents and merchants there welcome the presence of diplomats in their neighborhood, but they would also welcome the sight of more men in blue along their streets.

DIPLOMATIC PROTECTION

While the crime rate rises steadily on the East Side of Manhattan, as well as elsewhere in New York City, the police department has to carry an additional and unfair burden.

It is the protection of the United Nations and foreign government missions and consulates.

Policemen have been picketing against these fixed assignments which virtually make doormen of them. Shopkeepers on the East Side protest that the foreign mission security assignments are diverting needed police officers from walking beats.

The cost of this police protection is being shouldered by the taxpayers of New York City and is a manpower drain on the police department. More than 100 patrolmen have been assigned to the fixed posts. The financial cost alone, for the City, is nearly two million dollars a year, according to Controller Abraham Beame.

For several months, the Lindsay administration has pursued discussions with the State Department in an effort to arrange for Federal help.

But with one exception, under present laws foreign mission protection is provided only on a local basis, except in cases of "extreme gravity." And then, only on a temporary basis. The exception is Washington, where the Executive Protection Service was created recently to guard the White House and foreign embassies.

In the meantime, New York Police Commissioner Howard Leary has announced action of his own. Police protection for foreign government interests in New York City will be cut almost in half.

Along with the burden of housing the tax-exempt United Nations and its delegations, we believe the protection of all foreign missions in this country should be assumed by the Federal government.

PRIVATE GUARDS PATROL THE EAST SIDE

Along the leisurely avenues and the shaded side streets of the Upper East Side, clusters of small shops display their expensive temptations. But these days the window-shopper who wants to look more closely, or maybe buy, is likely to find the shop door locked and the proprietor wary.

The reason, shopkeepers say, is a lack of foot patrolmen during business hours that has made them vulnerable targets for robbery. A high incidence of crime had led some shopkeepers to band together to hire private guards, others to protest to the Police Department and many to keep their doors locked until they are satisfied that the person seeking admission intends to pay for the merchandise.

The crime problem is not a new one to the affluent area. By the end of 1967, when the robbery and burglary rate were already rising more quickly in that area than in the rest of the city, some shopkeepers had already installed special locks on their doors and taken more valuable merchandise out of shop-windows. But the persistence of crime has worried an increasing number of storekeepers.

ROLE OF POLICE STRESSED

At the 19th Precinct, which patrols the area from 59th to 86th Street between Fifth Avenue and the East River, a group of patrolmen say they, too, are concerned with the lack of protection they are able to give the shopkeepers. They have been protesting their assignments to guard the many consulates and United Nations missions in their area and they ask that they be allowed instead to return to foot patrol.

"The residents and shopkeepers are being discriminated against," said Patrolman Francis Hughes, a spokesman for the group. "The police are primarily an investigative and prevention unit, not a guard agency."

The patrolmen contend that the fixed guard-duty posts account for about 85 men daily, leaving, usually, only a couple of men available to walk a beat.

A Police Department official said that enough men are assigned to any given precinct to permit the fulfillment of all its functions adequately. If the police were no longer to be used for such guard duty, he said, the men would probably be reassigned to another precinct.

But at many shops, such as Vanity Lane, a small dress shop, in the East Eighties, the door is kept locked.

"I've been robbed twice in the last 10 months," said Mrs. Arthur Harris, the owner. "What else can I do? The only way to keep robbers and shoplifters out is to lock the door."

Before a customer is admitted to Mrs. Harris's shop, he is scrutinized by her. If she does not like his looks, he is not admitted.

A check of 26 shops along Madison Avenue, between 60th and 64th Streets—antique stores, boutiques, jewelers—found only four still maintaining an open-door policy, two drug stores and two shoe stores.

There are some businesses, of course, that cannot easily keep their doors locked, such as that of Everett DeFrees, the owner of the Squires Coffee Shop on East 60th Street.

Mr. DeFrees said he had been robbed six times in the last six months, losing a total of about $20,000 in cash and two diamond rings.

"I never see a policeman," Mr. DeFrees said. "There should be a cop on every block, but they can't do that because there aren't enough of them."

He pointed out a scar above his left eye, saying it was the result of a blow he received during a robbery two months ago. As a result, he said, he has lost some of the vision in the eye.

According to William J. Diamond, the chairman of Community Board No. 8, which is supporting the patrolmen's efforts to release more men for street patrol there are no men on foot patrol between 4 P.M. and 8 A.M., and only six men between 8 A.M. and 4 P.M. on a normal day.

At the police station on East 67th Street, however, Lieut. Nicholas Ferrari said there was no fixed number of men assigned to foot patrol. Last night, for instance, he said he would have eight men assigned, and "tomorrow night, maybe none."

Lieutenant Ferrari said that the number of men available depended partly on what else was going on—and the 19th Precinct has many demonstrations.

The lieutenant mentioned not only the Soviet Mission to the United Nations as a frequent target for demonstrations, but also the headquarters of the Federal Bureau of Investigation, on 69th Street, and Hunter College, on Park Avenue between 68th and 69th Streets, as places that have required police presence in recent months.

Mr. Diamond's board has requested a meeting with police officials to discuss what can be done, citing statistics showing that the precinct has the borough's second highest burglary rate and the fourth-highest overall crime rate.

The board also recommended the use of Federal or United Nations law-enforcement officers to replace city policemen outside the missions, or possible legislation to enable retired, physically fit New York City Policemen to do such work.

One group of 100 Madison Avenue merchants, the Madison Avenue General Ideas Committee, or MAGIC, has already hired unarmed, uniformed guards from Interstate Security Service, Inc., to patrol the avenue between 60th and 72d Streets.

Martin S. Wiener, a spokesman for MAGIC, is distressed by the fact that the guards are unarmed.

Harry Budhoo, one of the Interstate guards, feels that, armed or not, his presence has helped reduce crime. "There's not as much shoplifting now," he said. "When they see us they might think again," he said as he walked north along Madison.

LEARY ASKS WASHINGTON TO HELP IN PROTECTING CONSULATES HERE

Police Commissioner Howard R. Leary yesterday called for Federal assistance to guard

foreign consulates and missions here because local protection was placing a "burden on the taxpayers and a manpower drain on the police department."

But there was little hope of immediate assistance, local and Federal officials said, because current laws limit Federal Government protection to "extraordinary cases of extreme gravity," and even then only on a temporary basis.

Mr. Leary's statement followed a meeting yesterday morning with residents of Manhattan's East Side who contend that the shift of police personnel in the 19th Precinct for use at consulates and missions has contributed to a rise in the neighborhood's crime rate.

Last month, about 40 off-duty policemen in the 19th Precinct picketed the station house to protest the use of local officers to guard the missions. William J. Diamond, chairman of Community Board No. 8, supported the policemen's protest and was one of those who met with the Police Commissioner yesterday.

A mayoral spokesman said after the meeting that the Lindsay administration has sought Federal assistance to protect the missions, but that discussions with Washington have revealed that present laws do not permit such help on a regular basis.

Mayor Lindsay, the spokesman said, will support a bill to be introduced by Senator Charles E. Goodell, Republican of New York, that would expand the Executive Protective Service for such a purpose. The service was created last March to guard the White House and foreign embassies in Washington.

Mr. Diamond, the East Side community leader, said yesterday he felt Mr. Leary's statement was "most unsatisfactory." He suggested that the Mayor could issue an ultimatum to Washington by withdrawing local police protection from the embassies, thereby creating an emergency situation and the need for Federal forces.

"Senator Goodell's bill is an excellent bill," said Mr. Diamond, "but you and I know it will be many months, if at all, before it can be effective. In the meantime, we've got to do something about crime on the East Side."

Mr. Diamond's proposal was ruled out by Mr. Leary, who said he was "hopeful that the city will be successful in its efforts to transfer this burden from the city government to the Federal Government." Jay L. Kriegel, the Mayor's special counsel specializing in Police Department affairs, said he had not seen Mr. Diamond's proposal and could not comment on it.

NEW POLICE FORCE IN CAPITAL GUARDS EMBASSIES

WASHINGTON, Aug. 19—The new blue car cruising in northwest Washington carried no printed legend but had seven large red lights on its roof, an extra radio antenna and a special license plate. Inside were two officers wearing sunglasses and with gold braid on the right shoulder of their white shirts.

A longhaired youth watched from in front of a quick-food hangout as the car passed.

"Who are they fooling?" he asked. "Who do they think they are? What are they? Supercops?"

In fact, they were two members of the Executive Protective Service, Washington's newest police force, created to protect foreign embassies and resident diplomats in the capital.

The protective service was created in response to demands from at least 50 countries for better security for the 100 foreign missions here.

In recent years, diplomats have been among the victims of robberies and muggings, and in recent months there has been an increase in political attacks against missions.

The metropolitan police had been giving special attention to embassy security, but at the same time had to respond to all city crime.

The new protective force—an expanded version of the White House Police—is not hampered in this respect and will be able to devote its full resources to the diplomats.

24-HOUR GUARD POSTED

An example of this availability was demonstrated last week after two United States citizens had been kidnapped in Uruguay and one executed. The new service was able to post a 24-hour guard at the Uruguayan chancery here.

The metropolitan police had lacked the manpower even to station a patrolman permanently in front of the Russian Embassy and had depended on short patrols instead.

Eventually, there will be 850 men in the Executive Protective Service, available to guard the diplomats. About 250 of these will continue to guard the White House and the Executive Office Building next to it.

They will all wear the uniform of the White House police, and their blue patrol cars will be marked with a likeness of the White House as soon as the insignia arrive.

Changing the name of the White House police to Executive Protective Service was explained as an effort to avoid any suggestion that the White House or the President was personally involved in any situation that might develop.

The officers will operate as the Foreign Missions Division of the Secret Service under the operational control of a former Washington police captain, Earl L. Drescher.

The metropolitan police had no official comment on this latest Federal police force.

New York City's Police Commissioner, Howard R. Leary, asked last week for Federal assistance for his department's job of guarding the consulates and foreign missions to the United Nations, many of which are clustered within the 19th Police Precinct, on the Upper East Side of Manhattan.

Senator Charles E. Goodell is reported to be planning to introduce a bill that would expand the Executive Protective Service for just this purpose. The shopkeepers and residents of the affluent neighborhood complain that the manpower drain caused by the guard duties has contributed to a rise in the neighborhood's crime rate.

Last month, a group of patrolmen in the 19th Precinct picketed the stationhouse to protest their use as consulate and mission guards.

At a meeting of the Organization of American States this morning, several ambassadors unofficially praised United States timing in increasing embassy security just as political kidnappings seemed to be on an upsurge.

CITY CUTS GUARD FOR FOREIGNERS

(By Robert D. McFadden)

Police Commissioner Howard R. Leary announced yesterday that police protection for foreign government interests here would be cut nearly in half, starting at midnight tonight.

While patrols outside the major United Nations missions and consulates will be maintained at present levels, the Commissioner's order will call for the withdrawal of 50 of the 106 patrolmen assigned to diplomatic posts and the elimination of protection at 17 of 37 locations housing foreign interests.

In recent weeks, policemen have picketed to protest assignment at fixed diplomatic posts, shopkeepers on the East Side have complained that such assignments are keeping patrolmen off walking beats and the Lindsay administration has unsuccessfully sought Federal assistance in providing protection for foreign missions and consulates.

In a statement issued at Police Headquarters, Mr. Leary said the reduced protection had been under consideration for several months and was ordered only after "extensive discussion" with the State Department and the United States Mission to the United Nations.

The statement did not specify the reasons for the reduced protection, but in calling last week for Federal assistance to guard foreign consulates and missions, Mr. Leary characterized such protection as a "burden on the taxpayers and a manpower drain on the Police Department."

Controller Abraham D. Beam said last month that police protection for consulates and missions was costing the city $1.9-million a year.

Current laws limit Federal Government protection to "extraordinary cases of extreme gravity," and even then only on a temporary basis. However, Senator Charles E. Goodell, Republican of New York, has proposed legislation that would expand the Executive Protection Service to provide protection here. The service was created last March to guard the White House and foreign embassies in Washington.

Under the revisions announced by Commissioner Leary yesterday, the Police Department will discontinue all assignments to locations where foreign personnel do not have diplomatic immunity thus eliminating police guards at private buildings where foreign governments have purely financial or political interests.

In addition, policemen will no longer be assigned inside private buildings housing missions or consulates. Instead, walking beats, a block or two in length, will be set up outside some of the buildings, while others will be watched by men in patrol cars.

Foot patrolmen, who will be equipped with walkie-talkies, will give the missions and consulates on their beats special attention—but not their exclusive attention, Mr. Leary pointed out.

PROTECTION TO BE VARIABLE

The Commissioner said the Police Department would "continue to provide special attention to missions, consulates and private locations which may become the target for reprisals as world conditions change."

In an emergency, Mr. Leary said, patrolmen will be assigned to private locations where foreign governments have financial or political interests when those "normally in charge of the premises" are not available, such as during nonoffice hours or on Sundays or holidays.

But such emergency assignments will be automatically discontinued after 24 hours, the Commissioner said, "inasmuch as this should provide sufficient time for the company concerned to hire private security if they so desire."

PRESIDENT OF THE BOROUGH OF MANHATTAN, CITY OF NEW YORK,
August 4, 1970.

Hon. HOWARD R. LEARY,
Commissioner, Department of Police, New York, N.Y.

DEAR COMMISSIONER LEARY: Community Board #8 which is the official spokesman for the east side of Manhattan in the area of the 19th Police Precinct strongly supports those 19th Precinct police officers who are protesting the absence of foot patrolmen in the precinct due to their assignment to guard duty at Missions to the United Nations, consulates and foreign country information offices.

We understand that in two of the three eight hour shifts between 4 p.m. and 8 a.m. each day there are a total of 50 patrolmen on guard duty while there are *no policemen* on patrol duty in the precinct. During the third shift from 8 a.m. to 4 p.m. there are 25 men on guard duty and only six men on foot traffic duty. In addition, we understand

that there are a maximum of eight radio cars per eight hour tour each with two men. It is apparent, therefore, that the overwhelming weight of police effort in the 19th Precinct (which covers the area from 59th to 86th Street from Fifth Avenue to the East River) is concentrated on guard duty rather than on protection of the four hundred and fifty thousand citizens who live in this community.

This is even more disturbing in the face of an increased crime rate in this precinct. The latest figures available from your department show that the 19th Precinct had the *second highest burglary* rate in Manhattan and the *fourth highest burglary* rate city wide. The 19th Precinct also had the *highest auto theft* rate in Manhattan and its total incidence of reported *crime of all types* made it the *fourth* highest in the city.

In light of these upsetting statistics we recommend the following:

1. Use of federal or United Nations policemen for guard duty as was done recently in Washington, D.C. or,

2. Full reimbursement by the federal government in the annual sum of approximately $1,000,000.00 so that *additional* policemen can be assigned to the 19th Precinct if New York City policemen must continue to perform guard duty or,

3. Use of retired but physically fit New York City policemen for guard duty.

To solve the aforesaid vital problems, I hereby request that a meeting between high level police officers and community representatives be scheduled as soon as possible.

Only in this way can we be assured of adequate police protection on Manhattan's upper east side.

Very truly yours,

WILLIAM J. DIAMOND,
Chairman, Community Board #8.

WHERE ARE YOUR FOOT PATROLMEN?

In the 19th Precinct, there are approximately 25 men per shift, guarding the various foreign consulates to the U.N., or approximately 75 men per day.

This represents approximately $1,000,000.00 taxes in the form of police officers' salaries, for police officers not performing police patrol functions. His "Honor" the Mayor said he would put the cop back on the street, he failed to do so in the 19th Precinct. There are no foot patrolmen, while about 25 non-paying and often as not non-friendly countries are afforded a private doorman in the form of a New York City patrolman.

Demand the coverage you are entitled to, that you are paying excessive taxes for!

Insist on the United Nations police protecting these consulates, or that the consulates hire their own guards. The Metropolitan Police Department in Washington, D.C., no longer guard embassies, the Treasury Department has assumed the duty.

Return the dignity of the police officers, put them back on patrol in the streets of the Nineteenth Precinct, patroling for the people who pay the bills. The 19th Precinct has about 450,000 residents, and an unknown amount of visitors and people here on business, without the luxury of a police officer on "their" post. The 25 man average represents about 50 foot patrol posts or about 200 blocks patroled by those 25 men, each and every shift!

Take a good look at Madison Avenue, shops paying astronomical rents and taxes having to pay additional fees for private guards to walk the streets, guards with no authority, or weapons, or more important, moral obligation to even get involved. Why? Because the police in the 19th Precinct are saddled with the burden of protecting the consulates instead of the "paying public" he was hired to protect.

Demand your rights, get vocal, contact the Mayor, care of City Hall, Commissioner Howard Leary, at 240 Centre Street, New York, N.Y. 10013, Council President Garelik, and your Council members, also your State representatives, demand this burden on your taxes, and the officers of the 19th Precinct be placed elsewhere.

Don't complain you can not find a cop, now you know where they are. Do something.

We have the support of the Yorkville Chamber of Commerce, and the Avenue Associations. Now you as an individual can do something.

THE CONCERNED POLICE OFFICERS OF THE NINTEENTH PRECINCT.

U.S. SENATE, COMMITTEE ON BANKING AND CURRENCY,
Washington, D.C., August 12, 1970.

Hon. DAVID M. KENNEDY,
Secretary of the Treasury, Treasury Building, Washington, D.C.

DEAR MR. SECRETARY: I intend to introduce legislation that would give the Executive Protective Service the responsibility for the protection of foreign diplomatic missions in the United States, its territories and possessions, on a *permanent* basis.

This legislation would amend Chapter 3 of Title 3 of the U.S. Code to increase the present authority of the Executive Protective Service. Accordingly, the statutory strength of the Executive Protective Service will have to be increased.

I would appreciate an estimate of what the authorized statutory strength of the Executive Protective Service should be if the authority of the Service is increased as I propose.

Please direct this information to Mr. Robert Sachs of my staff at your earliest convenience.

With kindest regards, I am

Sincerely,

CHARLES E. GOODELL.

OFFICE OF THE SECRETARY OF THE TREASURY,
Washington, D.C., August 13, 1970.

Hon. CHARLES E. GOODELL,
U.S. Senate,
Washington, D.C.

DEAR SENATOR GOODELL: For the Secretary, I am acknowledging your letter of August 12 in which you request an estimate of the authorized statutory strength requirement of the Executive Protective Service if increased in accordance with your proposed legislation to amend Chapter 3 of Title 3 of the U.S. Code.

You will have a further reply as promptly as possible.

Sincerely yours,

JAMES E. SMITH,
Special Assistant to the Secretary, Congressional Relations.

S. 4321—INTRODUCTION OF A BILL RELATING TO ANNUITIES FOR WIDOWS OF SUPREME COURT JUSTICES

Mr. HRUSKA. Mr. President, for myself and the senior Senator from Maryland (Mr. TYDINGS) I introduce, for appropriate reference, a bill to amend title 28, United States Code, to provide a contributory survivorship annuity for Justices of the Supreme Court of the United States.

By a quirk in existing law widows of Supreme Court Justices are required to live on a $5,000 annuity dating back to 1937 and not increased thereafter. During this same time pensions have been provided and upgraded for widows of all Federal judges except members of the highest court in the Nation. It is to correct this situation that this bill is introduced today.

The survivorship annuity plan presently in existence for Federal judges provides benefits for surviving widows and dependents equivalent to those then provided the survivors of Members of the Congress. The annual contribution required from a judge who elects to bring himself within the purview of the plan is a sum equal to 3 percent of his salary. This contribution is to fund survivors' benefits only. Retirement is dealt with separately.

It is proposed by this bill that Justices of the Supreme Court shall hereafter become eligible to participate in the survivorship annuity plan under the same terms and conditions as presently prevail for all other judges of the Federal courts. The bill provides that the option to join in the plan shall be available to presently living Justices of the Supreme Court including those who have retired or resigned, for a period of 6 months after the date of enactment. The bill further provides that a Justice who exercises this option shall thereby irrevocably waive the benefits of the law providing a $5,000 annual pension to widows of Justices.

This bill reflects the view that it is right and proper that Justices of the Supreme Court should have an opportunity to join in a survivorship annuity program for their survivors and to contribute to the cost thereof in the same manner as other judges of the Federal courts and Members of the Congress.

Mr. President, it is time that the existing injustice with regard to our highest-ranking judges be eliminated. For this reason, it is hoped that the Judiciary Committee will give this bill prompt and favorable consideration. I ask unanimous consent that at the conclusion of my remarks the text of the bill be printed in the RECORD.

The PRESIDING OFFICER (Mr. SAXBE). The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 4321) to amend title 28, United States Code, relating to the annuities of widows of Supreme Court Justices, introduced by Mr. HRUSKA (for himself and Mr. TYDINGS), was received, read twice by its title, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

S. 4321

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, section 375 of title 28, United States Code, as amended, is amended by adding at the end thereof the following new subsection:

"(c) If a justice of the United States gives notice in writing to the Director of the Administrative Office of the United States Courts of his desire to become subject to section 376, the widow of such justice shall be ineligible to receive an annuity under this section."

SEC. 2. Section 376 of title 28, United

States Code, as amended, is amended by inserting "justice or" prior to the word "judge" wherever that word appears therein, except in section 376(q).

SEC. 3. A justice of the United States, in regular active service on the date of the enactment of this Act, or who resigned or retired prior to the date of enactment of this Act and who on that date is receiving salary under section 371, of title 28, United States Code, as amended, shall be entitled within six months after enactment of this Act to make the election authorized by and to receive the benefits of section 376.

SEC. 4. Section 604(a)(7) or title 28, United States Code, as amended, is amended to read as follows:

"(7) Regulate and pay annuities to widows and surviving dependent children of justices and judges, Directors of the Federal Judicial Center, and Directors of the Administrative Office, and necessary travel and subsistence expenses incurred by judges, court officers and employees, and officers and employees of the Administrative Office, and the Federal Judicial Center, while absent from their official stations on official business."

SEC. 5. (a) Item 376 of the analysis of chapter 17 of title 28, United States Code, is amended to read as follows: "376. Annuities to widows and surviving dependent children of justices and judges."

(b) The catchline to section 376 of title 28, United States Code, is amended to read as follows:

"§ 376. Annuities to widows and surviving dependent children of justices and judges."

SENATE JOINT RESOLUTION 234—INTRODUCTION OF A JOINT RESOLUTION TO AUTHORIZE AND REQUEST THE PRESIDENT TO PROCLAIM THE PERIOD SEPTEMBER 12, 1970, THROUGH SEPTEMBER 20, 1970, AS MYASTHENIA GRAVIS WEEK

Mr. JAVITS. Mr. President, on behalf of myself, Mr. DOMINICK, Mr. PROUTY, Mr. WILLIAMS of New Jersey, and Mr. YARBOROUGH, I introduce, for appropriate reference, a joint resolution to authorize the President of the United States to issue a proclamation designating September 12, 1970, through September 20, 1970, as Myasthenia Gravis Week.

This proposal has the support of the Myasthenia Gravis Foundation, Inc., a nonprofit voluntary health agency established in 1952.

Myasthenia gravis—a neuromuscular disease—comes from the Greek and Latin words meaning serious muscle weakness and was first noted as early as 1672—almost 300 years ago—but the first important research and patient care were not instituted until 1938 and it was not until the organization of the foundation in 1952 that specific diagnostic procedures and drug therapy were established. The advances made possible through research and education programs have saved many lives and permitted thousands to lead more normal lives. Heading the list of achievements is the lowering of the mortality rate from 85 to 15 percent. This is a spectacular achievement in itself and justifies faith in the importance of the work being done.

The exact incidence of myasthenia gravis is not known since it is not among diseases which must be reported to public health authorities. However, surveys estimated it occurs in one in 10,000 of the general population. Since some cases are not recognized, the actual incidence may be still higher.

The drugs used to control myasthenia gravis are very expensive. To help ease the financial burden faced by the patient who must take 20 to 30 pills a day, pill banks have been set up where the pills can be purchased at a greatly reduced cost.

Prior to the foundation's grants-to-clinics program which was established in 1954, only one specialized diagnostic and treatment center for myasthenics existed in the United States. There are now 23 clinics in key cities. Here, where personal relationship with the patient is stressed, individualized treatment under strict supervision is given.

The clinics located in universities and medical centers provide an important environment for research and offer a central source for the latest information and most promising new techniques.

To correct many misconceptions about myasthenia, and to help the patient adjust to his disability and fulfill his capabilities, education of the patient, relatives, employers, and others directly or indirectly concerned with the problems of the patient is vital. Efforts to bring proper evaluation, care and public awareness of the myasthenic patient are uninterrupted. A public information program, therefore, is another major undertaking of the foundation's nationwide programs.

A national observance—through a Presidential proclamation of September 12–20, 1970, as Myasthenia Gravis Week will support and encourage basic research into the cause and cure of myasthenia gravis; and in the establishment of additional treatment centers and assist in the dissemination of information among the members of the medical profession as well as the general public.

I commend this joint resolution to my colleagues and urge their support.

The ACTING PRESIDENT pro tempore (Mr. ALLEN). The joint resolution will be received and appropriately referred.

The joint resolution (S.J. Res. 234) to authorize and request the President to proclaim the period September 12, 1970, through September 20, 1970, as Myasthenia Gravis Week, introduced by Mr. JAVITS, was received, read twice by its title and referred to the Committee on the Judiciary.

ADDITIONAL COSPONSORS OF BILLS

S. 3

At the request of the Senator from Massachusetts (Mr. KENNEDY), the Senator from Michigan (Mr. HART) was added as a cosponsor of S. 3, the police insurance bill.

S. 3186

At the request of the Senator from Delaware (Mr. BOGGS), the Senator from New York (Mr. JAVITS) was added as a cosponsor of S. 3186, to clarify the status of funds of the Treasury deposited with the States under the act of June 23, 1836.

S. 3281

At the request of the Senator from New Mexico (Mr. MONTOYA) the Senator from Nevada (Mr. CANNON) was added as a cosponsor of S. 3281, relating to the Interstate System.

S. 4039

At the request of the Senator from Nevada (Mr. BIBLE), the Senator from Kansas (Mr. DOLE) was added as a cosponsor of S. 4039, to amend the Internal Revenue Code of 1954 to provide income tax simplification, reform and relief for small business.

S. 4208

Mr. MURPHY. Mr. President, on August 10, I introduced a bill that will lay the groundwork for providing the medical manpower needed to meet the rising health demands of the country. S. 4208, the Family Physician Scholarship and Fellowship Program Act, would provide scholarships to young men and women who agree to practice medicine in areas designated as physician-shortage areas, or who agree to serve migrant agricultural workers and their families. For each year of the scholarship, 1 year of service would be required by the student in physician-shortage areas. Intern and residency fellowships would also be granted.

Mr. President, in addition to Senators JAVITS, PROUTY, DOMINICK, and SAXBE, who initially cosponsored the measure with me, I ask unanimous consent that, at the next printing, the names of the Senator from Alabama (Mr. ALLEN), the Senator from Colorado (Mr. ALLOTT), the Senator from Utah (Mr. BENNETT), the Senator from Delaware (Mr. BOGGS), the Senator from Kentucky (Mr. COOPER), the Senator from New Hampshire (Mr. COTTON), the Senator from Kansas (Mr. DOLE), the Senator from Mississippi (Mr. EASTLAND), the Senator from Arizona (Mr. FANNIN), the Senator from Hawaii (Mr. FONG), the Senator from Michigan (Mr. GRIFFIN), the Senator from Oregon (Mr. HATFIELD), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Kansas (Mr. PEARSON), the Senator from Pennsylvania (Mr. SCOTT), the Senator from Illinois (Mr. SMITH), the Senator from Alaska (Mr. STEVENS), the Senator from South Carolina (Mr. THURMOND), and the Senator from Texas (Mr. TOWER) be added as cosponsors of S. 4208.

The PRESIDING OFFICER (Mr. EAGLETON). Without objection, it is so ordered.

S. 4238

At the request of the Senator from Hawaii (Mr. INOUYE), the Senator from Wisconsin (Mr. NELSON) was added as a cosponsor of S. 4238, universal enrollment bill.

S. 4260

At the request of the Senator from West Virginia (Mr. RANDOLPH), the Senator from New Jersey (Mr. WILLIAMS) was added as a cosponsor of S. 4260, to authorize appropriations for the fiscal years 1972 and 1973 for the construction

of certain highways in accordance with title 23 of the United States Code and to provide for statewide public works planning, and for other purposes.

S. 4265

At the request of the Senator from Oregon (Mr. HATFIELD), the Senator from Maryland (Mr. TYDINGS), the Senator from Oregon (Mr. PACKWOOD), the Senator from Kansas (Mr. PEARSON), the Senator from Montana (Mr. METCALF), the Senator from Colorado (Mr. DOMINICK), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from Tennessee (Mr. BAKER), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Alaska (Mr. STEVENS), the Senator from Arkansas (Mr. FULBRIGHT), and the Senator from South Carolina (Mr. THURMOND), were added as cosponsors of S. 4265, to assist sewer projects in rural areas and small towns.

ADDITIONAL COSPONSORS OF RESOLUTIONS

SENATE RESOLUTION 444

At the request of the Senator from Oklahoma (Mr. BELLMON), the Senator from Nebraska (Mr. CURTIS), the Senator from North Carolina (Mr. ERVIN), the Senator from Florida (Mr. GURNEY), and the Senator from Wyoming (Mr. HANSEN) were added as cosponsors of Senate Resolution 444, relating to the legal accountability of members of the Armed Forces of the United States under certain circumstances.

SENATE RESOLUTION 455

At the request of the Senator from Pennsylvania (Mr. SCHWEIKER), the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of Senate Resolution 455, designating January 22 as Ukrainian Independence Day.

DEPARTMENTS OF LABOR, AND HEALTH, EDUCATION, AND WELFARE, AND RELATED AGENCIES APPROPRIATION BILL, 1971—AMENDMENT

AMENDMENT NO. 875

Mr. JAVITS submitted an amendment, intended to be proposed by him, to the bill (H.R. 18515) making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies for the fiscal year ending June 30, 1971, and for other purposes, which was referred to the Committee on Appropriations and ordered to be printed.

(The remarks of Mr. JAVITS when he submitted the amendment appear earlier in the RECORD under the appropriate heading.)

DISASTER ASSISTANCE ACT OF 1970—AMENDMENT

AMENDMENT NO. 876

SUBMISSION OF AN AMENDMENT TO S. 3619, TO MAKE SECTIONS 231, 232, AND 233 RETROACTIVE TO AUGUST 1, 1969

Mr. YARBOROUGH. Mr. President, I submit an amendment intended to be proposed by me, to S. 3619, the Omnibus Disaster Assistance Act, which would apply retroactively sections 231, 232, and 233 of this bill to August 1, 1969. The purpose for this amendment is to insure that the victims of all major disasters declared by the President from August 1, 1969, to the date of this important bill receive the benefit of the increased cancellation or provisions with regard to disaster loans made by the Small Business Administration, Farmers Home Administration, and Veterans' Administration. By making these provisions applicable to the victims of Hurricane Camille, the Lubbock and Plainview tornadoes, the San Marcos flood, and Hurricane Celia, we in Congress will be showing the people who suffered so much in these great tragedies that they will not be denied these important benefits simply because the disaster that wrecked their homes and businesses occurred before this bill becomes law.

The present law, Public Law 91–79, was enacted in the wake of the tragedy of Hurricane Camille, which ravished Alabama, Louisiana, and Mississippi, and caused serious flooding in Virginia and West Virginia. As part of this law, it was provided that the Small Business Administration and Farmers Home Administration could cancel up to $1,800 of any disaster loan in excess of $500 made to a victim of a major disaster. Since Public Law 91–79 was only intended as a temporary measure, it will expire on December 31, 1970. The bill that is now on the calendar of the Senate, S. 3619, sets forth a permanent and comprehensive plan of disaster assistance. This bill has been needed for years, and I am proud to be a cosponsor of it. It provides many excellent programs which are aimed at dealing with the myriad of human problems associated with a major disaster.

One of the most significant advances in the bill is the increase in the amount of a disaster loan that can be canceled. The bill increases this amount from $1,800 to $2,500. Thus under S. 3619, a disaster victim who receives a loan from the SBA or FHA in the amount of $3,000 would be entitled to have $2,500 of it canceled. As under Public Law 91–79, the borrower is still obligated for the first $500 of any loan he receives. The cancellation feature only applied to loans in excess of $500. I am very much in favor of this increase in the amount that can be canceled on such loans; however, I feel that it would be extremely unfortunate if this significant benefit was denied those victims of major disasters since August of 1969.

During the period from August of 1969 to the present, 19 States have experienced major disasters. Many of these States have had more than one disaster during this period. The States in which one or more major disasters have occurred during this period are: Alabama, Alaska, Arkansas, California, Florida, Illinois, Iowa, Kentucky, Louisiana, Maine, Minnesota, Mississippi, New York, North Dakota, Pennsylvania, Texas, Vermont, Virginia, and West Virginia.

Of these major disasters, Hurricane Camille, the California floods, the Lubbock tornado, and Hurricane Celia were particularly devastating.

In all of these areas, there are homeowners, farmers and businessmen who have borrowed money from the SBA or FHA to repair or restore their homes, businesses, and farms. The majority of these loans are still outstanding since they are installment loans. For example, the SBA has authority to defer payment of such loans from 5 months to 3 years, depending on financial ability of the borrower. Loans made to farmers by FHA for replacement of livestock are repayable over a 7-year period, and loans to repair farm buildings or other improvements are payable over periods up to 20 years. Since these loans are still active, it seems only just that these disaster victims have the benefit of the extra $700 provided by S. 3619 to apply against their indebtedness.

Applying benefits retroactively is not a new or unique idea. When Public Law 91–79 was enacted, it provided that the law, including the $1,800 cancellation feature, would be retroactive until June 30, 1967. If that law can be applied retroactively, there is no reason why applying these provisions of S. 3619 should pose any insurmountable problem. One objection that has been raised is that if these provisions are applied retroactively, all the loans made by SBA and FHA would have to be rewritten. However, an examination of the loan application forms and promissory notes used by the SBA and FHA reveals that nowhere on these loan papers is there any mention of the cancellation of any part of the loan.

Mr. President, the amendment I am offering today is a fair and just measure, and I urge that it be adopted. I also ask unanimous consent that this amendment be printed in the RECORD.

The PRESIDING OFFICER (Mr. HART). The amendment will be received and printed, and will lie on the table; and, without objection, the amendment and other matters, requested by the Senator from Texas, will be printed in the RECORD.

The amendment (No. 876) is as follows:

AMENDMENT NO. 876

On page 98, line 9, after "section 226(c)," insert the following: "231, 232, 233,".

DISASTER ASSISTANCE ACT OF 1970—AMENDMENT

AMENDMENT NO. 877

Mr. YARBOROUGH. Mr. President, I submit an amendment intended to be proposed by me to S. 3619, the Disaster Assistance Act of 1970, which was reported to the Senate yesterday by the Committee on Public Works.

This amendment pertains to the Hurricane Beulah disaster which struck the Texas east coast on the morning of September 20, 1967, which was declared a natural disaster by President Johnson on September 28, 1967. Local officials of Cameron and Willacy Counties, two of the most seriously devasted counties in the disaster area, immediately pursued rehabilitation efforts, making every ef-

fort to comply with the guidelines of the Office of Emergency Preparedness.

Despite the good faith efforts of these counties and the performance of work by contractors, there has been constant disputing over the reimbursement of expense relating to the rehabilitation efforts, even though the Governor of the State of Texas has certified these costs as well as the local governments. The Governor has also appealed the determinations of the Office of Emergency Preparedness, but unsuccessfully.

The circumstances of this problem are fairly simple. There was a hurricane, and relying on indications that the area would be declared a natural disaster, the counties began the emergency rehabilitation as they should. After the fact and after obligations were made by the counties, OEP made their own damage survey estimate and denied the claims after the obligations had already been incurred.

This is an unforgivable situation in which the OEP has a contractual obligation to reimburse for reasonable sums expended in performance of eligible work under the Federal Disaster Act and the counties expended substantial sums in reliance on this commitment. There is no allegation that the counties did not make every effort to comply with all the guidelines of OEP, yet their claims have been denied.

If these costs are not reimbursed then it would be unreasonable to assume that any contractor would assist in rehabilitation efforts until he had the cash in hand, since the Government's contracts would be meaningless. It is my understanding that this amendment would cost no new money, since $10 million was allocated for the relief following Hurricane Beulah and there is more than enough remaining to pay these remaining claims.

Mr. President, I ask unanimous consent that the text of my amendment be printed at this point in the RECORD.

The PRESIDING OFFICER (Mr. HART). The amendment will be received and printed, and will lie on the table; and, without objection, the amendment will be printed in the RECORD.

The amendment (No. 877) is as follows:

AMENDMENT NO. 877

On page 65, line 5, after "Act." insert the following:

"Funds allocated for the relief of areas devastated by major disasters occurring between July 1, 1967, and December 31, 1970, shall be expended on the basis of costs as certified by State and local governments and shall not be limited to costs estimated by damage surveys made after obligations have been incurred."

Mr. YARBOROUGH. Mr. President, I further ask that telegrams from the local officials of Cameron and Willacy Counties asking for this action be printed at this point in the RECORD.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

BROWNSVILLE, TEX.,
August 20, 1970.

Senator RALPH YARBOROUGH,
Old Senate Office Building,
Washington, D.C.:

We urgently need your help to obtain the additional cost incurred during Beulah disaster in any way possible by legislation.

ADOLPH THOMAS,
Commissioner, Precinct 3.
T. R. HUNT,
Commissioner, Precinct 1.

RAYMONDVILLE, TEX.,
August 20, 1970.

Senator RALPH W. YARBOROUGH,
Senate Office Building,
Washington, D.C.:

We respectfully request your legislative assistance in securing full costs incurred by Willacy County, Texas, in the rehabilitation process following the Hurricane Beulah disaster of 1967.

We have not been reimbursed for full cost incurred in work performed solely by Willacy County.

Within a few days we will inform you of the approximate Willacy County amount.

I understand that George Consolidated, Inc., has not been reimbursed for the full costs of their expenses incurred in work performed within Willacy County. We will greatly appreciate your aid in adjusting these matters.

ART BAUGHMAN,
Commissioner, Precinct 1, Willacy County.

RAYMONDVILLE, TEX.,
August 19, 1970.

Senator RALPH W. YARBOROUGH,
Senate Office Building,
Washington, D.C.

DEAR SENATOR YARBOROUGH: We urgently request your assistance in any legislation act which will enable us to recover costs as a result of the storm Beulah disaster.

BILL RAPP,
County Judge, Willacy County, Tex.

RAYMONDVILLE, TEX.,
August 20, 1970.

Senator RALPH W. YARBOROUGH,
Senate Office Building,
Washington, D.C.:

We respectfully ask for your assistance in any legislation that will enable Willacy County to recover costs incurred by Hurricane Beulah.

FRED STONE,
County Commissioner, Precinct 2,
Willacy, Tex.

RAYMONDVILLE, TEX.,
August 19, 1970.

Senator RALPH W. YARBOROUGH,
Senate Office Building,
Washington D.C.:

Legislation is needed so Willacy and Cameron Counties can secure full payment to reimburse them for expenditures as a result of "Beulah" 1967.

CHARLES R. JOHNSON.

BROWNSVILLE, TEX.,
August 19, 1970.

Senator RALPH W. YARBOROUGH,
Senate Office Building,
Washington, D.C.:

Urgently request your help in making additional funds available for paying Hurricane Beulah costs through appropriate legislative act.

JOHNNY N. CAVAZOS,
Cameron County Commissioner.

ANNOUNCEMENT OF HEARINGS ON OIL SUPPLIES

Mr. McINTYRE. Mr. President, I wish to announce that the Subcommittee on Small Business of the Committee on Banking and Currency will commence hearings on the problems of small businesses attempting to obtain adequate supplies on fuel oil at reasonable prices in the Northeast and Great Lakes regions commencing on September 21, 1970. The week of September 21–25 has been set aside by the subcommittee for the hearings.

Any person interested in presenting statements to the subcommittee may so inform Mr. Reginald Barnes, associate counsel to the Committee on Banking and Currency, room 5300, New Senate Office Building, Washington, D.C. 20510, or Mr. Alan Novins, legislative counsel in my office.

ADDITIONAL STATEMENTS OF SENATORS

THE SENATE'S RECORD AND THE NATION'S CONCERNS

Mr. MANSFIELD. Mr. President, after 8 months of almost uninterrupted work, the Senate is on the threshold of taking a brief recess. Some of our Members may spend the next few days after tomorrow in a respite; some of our Members may spend them primarily engaged in professional pursuits; all of us, I hope, will try to manage to combine both business and relaxation in the week off. For all Senators, the short respite will, I believe, be invigorating. It is my expectation that after the Labor Day recess, we shall return to the Senate in good cheer, with enhanced perspective and with the knowledge that, in the remaining time of the second session of the 91st Congress, we have much left to accomplish.

In achieving a substantial record of achievement, we are well on our way. Certainly, Members of the Senate throughout the year have pursued their tasks with tenacity and diligence. Witness the number of rollcall votes we have had. As of September 1—and, in fact, even as of some 10 days ago—there had been more rollcall votes in the Senate this year than there were in all of 1969. Not since 1964 has the Senate by September 1 exceeded that voting pace. Witness the days the Senate has been in session this year: today will be the 149th day; as of the comparable period last year, we had been in session only two-thirds that number. Last year, at this juncture, hours in deliberation had totaled some 449 hours; this year the Senate has met more than double that amount of time. Witness, too, the results of Senate committee activity as denoted by a legislative calendar that has seldom been in search of an item of significant import.

When the Senate record for 1970 is reviewed, what will clearly appear will be the relevance of that record to the Nation's concerns. The people of this Nation have been concerned about the economy, education, the environment, efficiency in essential services and in the Government, an end to the Vietnam war and American involvement in Southeast Asia, and equality for all Americans. In all these areas, the Senate has responded by passing many legislative proposals of

significance, and it will continue to act on such proposals until its adjournment sine die.

The Senate's record to date speaks for itself. I ask unanimous consent, Mr. President, to have printed in the RECORD at the conclusion of my remarks a summary of the Senate's major legislative activity during the second session of the 91st Congress.

At this time, however, I do wish to highlight some of the major actions we have taken this session.

THE ECONOMY

Reflecting the concerns Americans have about the economy, Congress has acted to extend the coverage of unemployment compensation to 4.7 million workers while at the same time supporting programs to enable segments of our citizenry to become employable. On its initiative, Congress promulgated an Emergency Home Finance Act to make it possible for low- and moderate-income families to purchase homes. The Senate also joined with the House of Representatives in furnishing the President with authority for standby wage, price, salary, and rent controls. The Senate, too, has endeavored to tighten up the loose spending practices of such Government entities as the Department of Defense. It has also acted to provide protection for the American consumer, and to feed hungry children and aid the Nation's needy.

EDUCATION

The people of this Nation also have been concerned about the quality and needs of its educational system. Among the educational measures Congress has approved have been elementary and secondary education amendments. To emphasize the importance it attaches to education, Congress also overrode the President's veto of the education appropriations bill.

ENVIRONMENT

Noting the people's concern about the environment, the Congress approved Federal water pollution control amendments and established an Office of Environmental Quality. Moreover, it has cleared for a conference with the House a much-desired resource recovery bill.

In addition to the ecological problems of the environment, there is also concern with health problems afflicting segments of our population as a result of alcohol, cigarettes, and drug abuse. The Senate has approved an Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act as well as a bill to control the traffic in drugs and a Cigarette Smoking Act. Moreover, our citizens are concerned about the rising costs of, and inadequacies in, health care. Congress approved community mental health centers legislation, and the Senate has passed major mental retardation and allied health professions bills. Congress also stressed construction and modernization of health facilities by overriding the President's veto of amendments to the Hill-Burton Act.

Americans also are gravely concerned about public security in this Nation which has appeared to continue to grow more uncertain. In response to this situation, the Senate passed the organized crime control bill, as well as a number of other crime measures. It also provided for a complete reorganization of the court and criminal procedure system in the District of Columbia this year.

EFFICIENCY IN ESSENTIAL SERVICES AND IN GOVERNMENT

The people of this Nation have a right to expect a degree of efficiency in Government services upon which they depend. In that connection, Congress recently approved a thorough reorganization of the postal service. Also enacted into law has been the Airport and Airways Development Act. A Rail Passenger Service Act was passed by the Senate, along with an urban mass transportation bill, and a railway safety bill.

The Senate has acquiesced in two reorganization plans proposed by the President designed to improve operations of the Government. Also under consideration in congressional committees at the present time are two additional reorganization plans. The Senate has scrutinized with care Supreme Court nominees, thus underscoring the public's desire that high caliber personnel be chosen to serve on that High Court.

ENDING THE WAR

Another profound anxiety of Americans has been that of ending the Vietnam war and preventing its enlargement into a wider conflict in Southeast Asia. During careful consideration of both the military sales and military procurement bills, the Senate has explored and opened for exploration issues relating to the war. The Senate also voted—on two occasions, I might add—to repeal the Gulf of Tonkin resolution. At the same time, the Senate has also been mindful of the Nation's defense needs. By just approving the military procurement bill, the Senate has indicated a willingness to provide adequately for the Nation's defense and support of troops at war abroad.

EQUALITY

Equality for all American citizens is also the Nation's concern. Congress extended the Voting Rights Act of 1965 for an additional 5 years and approved extending the franchise to 18-year-olds. The Senate voted to fund the Civil Rights Commission and pending on the Senate Calendar is legislation to provide for electoral reform, equal employment opportunity, and equal rights for men and women.

Awaiting action when we return from the Labor Day recess are such questions as electoral reform and congressional representation for the Nation's Capital; the establishment of a Joint Committee on the Environment; family medicine needs and research on heart disease, cancer, and stroke; manpower training and equal employment opportunities for American workers; a farm bill to insure food and fiber for our populace and a constitutional amendment to guarantee equal rights for men and women in the United States. It is the intention of the Democratic leadership to call up for consideration prior to the adjournment of Congress any family assistance plan which may reach the legislative calendar. We will also consider promptly the remaining appropriations bills. Other important measures which will reach the calendar will also be acted upon.

The Senate's legislative responses to the Nation's concerns could not have become a reality had it not been for the contributions and collective efforts of both Democratic and Republican Senators. To my Republican counterpart, the distinguished minority leader (Mr. SCOTT), I wish to acknowledge my gratitude for his unfailing consideration and cooperation in helping make it possible to move the Senate's legislative program along in an expeditious and orderly way. If this has been an effective Senate, to date—and, in my judgment, it has—it is due to the effort of both Republican and Democratic Members.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request of the Senator from Montana?

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

Senate legislative activity, 91st Cong., 2d sess.

(By Senate Democratic policy committee)

Days in session	149
Hours in session	954 : 48
Total measures passed	535
Public laws	200
Treaties	5
Confirmations	37,841

Symbols: P/H—Passed House; P/S—Passed Senate.

Folowing is a brief summary of major Senate activity:

AGRICULTURE

Apple marketing orders.—Extended to apples those provisions of the marketing law which now authorize paid advertising to be provided for in marketing orders for cherries, carrots, citrus fruits, onions, Tokay grapes, fresh pears, dates, plums, nectarines, celery, sweet corn, limes, olives, pecans, and avocados. Public Law 91-363.

Conservation and development projects.—Authorized the Secretary of Agriculture to bear part of the cost of installing public fish and wildlife or recreational developments in so-called resource conservation and development projects but not to exceed one-half the cost of the land and minimum basic public facilities needed in connection with such development. Public Law 91-343.

Custom slaughtering.—Amended the Federal Meat Inspection Act to permit custom slaughterers to engage in buying and selling meat and meat food products without losing their exemption as custom slaughterers; exempted from inspection requirements the custom preparation for the use of the owners and their households of carcasses and parts of carcasses of (i) cattle, sheep, swine, and goats slaughtered by their producers, and (ii) game animals; and permitted the Secretary of Agriculture to exempt custom slaughtering and processing performed by an inspected establishment. Public Law 91-342.

Dairy products donation.—Amended the Agriculture Act of 1949 to provide that dairy products acquired by the Commodity Credit Corporation through price support operations may be donated, prior to any other disposition, for use in the United States in

nonprofit school lunch and other non-profit child feeding programs, in the assistance of needy persons, and in charitable institutions, including hospitals. Public Law 91–233.

Egg Products Inspection Act.—Prohibits the distribution of unwholesome shell eggs or their use in food products and makes mandatory continuous inspection of egg product processing plants; applies regulatory provisions to intrastate as well as interstate and foreign commerce; provides for specific exemptions, identification of egg products not intended for human food, recordkeeping, and Federal-State cooperation; prohibits States from imposing requirements conflicting with the act or certain other Federal laws; requires imports to meet the same requirements as domestic products; makes the cost of inspection, with certain exceptions, a Federal Government expense, at an estimated cost of about $5 million annually; and prescribes penalties for violations under the act. S. 2116. P/S 2/2/70.

Emergency assistance to provide nutritious meals to needy children.—Amended the National School Lunch Act, as amended, to provide funds and authorities to the Department of Agriculture for the purpose of providing free or reduced-price meals to needy children not now being reached; authorized the Secretary of Agriculture to use $30 million of funds from Section 32 of the Act of August 24, 1935, to supplement funds heretofore made available to carry out programs during the fiscal year 1970 to improve the nutrition of needy children in public and nonprofit private schools participating in the National School Lunch Program under this Act or the school breakfast program under the Child Nutrition Act of 1966. Public Law 91–207.

Guam Agricultural Services.—Continues through June 30, 1975, authority for the Secretary of Agriculture to maintain an agricultural program in Guam, which authority expired September 7, 1969. S. 2991. P/S 5/11/70.

Hawaiian papayas—advertising.—Amended the Agricultural Marketing Agreement Act of 1937 to add Hawaiian papayas to the list of commodities for which paid advertising can be provided for in marketing orders. Public Law 91–384.

International animal quarantine station.—Authorized the Secretary of Agriculture to establish an international animal quarantine station within the territory of the United States, through which animals may be moved from any foreign country into this country to make it possible to improve livestock breeds; provided measures to prevent the introduction of and dissemination within this country of livestock or poultry disease or pests; and set penalties applicable to the bringing in of animals to the station or subsequent movement of animals therefrom to other parts of the United States contrary to regulations to be issued by the Secretary of Agriculture. Public Law 91–239.

Production research.—Amended the Agricultural Marketing Agreement Act to authorize inclusion in marketing orders for commodities other than milk of provisions for production research supported by handler assessments and to make such research and development projects as now authorized by the Act, a purpose of the Act. Public Law 91–292.

Rural telephone bank.—Creates a Rural Telephone Bank to provide supplemental financing for rural telephone systems and provides that the rural telephone account is to consist of such net collections from the 2-percent telephone loan program received after July 1, 1968, as may be necessary to provide for the Government's investment in the Bank. S. 3387. P/S 4/2/70. H.R. 7. H. Cal.

School lunch and child nutrition amendments.—Improved and revised the child feeding programs conducted under the National School Lunch Act and the Child Nutrition Act of 1966 to provide better child feeding operations reaching all children, particularly the poor. The bill provided: authorization of appropriations 1 year in advance; school lunch apportionment based on lunches served 2 years prior; apportionment of nonfood assistance based on need; nutritional training and education and studies of food service requirements; direct distribution of foods to schools and service institutions; matching requirements (beginning at 4 percent and rising to 10 percent); free and reduced price (not more than 20 cents) lunch for any public school child in a household which has an income below the poverty level, determined by the Secretary of Agriculture; publicly announced policies regarding free or reduced price lunches; no overt identification of children receiving free or reduced cost meals; apportionment of funds to States based on the number of children aged 3 to 17 in households with incomes of less than $4,000 per year and to schools on the basis of need; Federal funding of 100 percent of the program costs; annual plans describing the proposed extended State lunch program; semi-annual estimates of eligible children; monthly reports of the numbers receiving free lunches and reduced price lunches; special developmental projects; a National Advisory Council on Child Nutrition; an increased appropriation authorization for fiscal 1971 for the breakfast program (from $12 million to $25 million); and other changes. Public Law 91–248.

Special milk program extension.—Permanently extended the authority for the special milk program which would expire June 30, 1970, at the current authorization level of $120 million. Public Law 91–295.

Tobacco allotments.—Made permanent the authority for leasing of tobacco acreage allotments as provided by section 316 of the Agricultural Adjustment Act of 1938; subjected such leasing to the discretion of the Secretary of Agriculture and to a determination by him that it will not impair the operation of the marketing quota or price support program; provided for extension of such leasing authority; excepted specified tobaccos from section 316; and extended the maximum duration of leases to 5 years. Public Law 91–284.

Tomato advertising.—Amends the Agricultural Adjustment Act to add tomatoes to the list of commodities for which paid advertising can be provided in promotional programs under marketing orders. S. 1862. P/S 1/30/70.

Wheat referendum deferral.—Permitted the wheat marketing quota referendum for the 1971 crop to be deferred until the earlier of October 15, or 30 days after the adjournment of Congress. Public Law 91–348.

APPROPRIATIONS

1970

Continuing Appropriations

Continued appropriations through February 28, 1970. Public Law 91–193.

Made further continuing appropriations for the fiscal year 1970 to provide for authorized salary and compensation payments provided for in the Second Supplemental Appropriations Act, 1970. Public Law 91–257.

Foreign aid.—Appropriated a total of $2,502,413,000 for foreign assistance and related agencies. Public Law 91–194.

Labor-HEW.—Appropriated a total of $19,747,153,200 for the Departments of Labor and Health, Education and Welfare, and related agencies. H.R. 13111. President vetoed 1/26/70. House sustained veto 1/28/70.

Labor-HEW.—Appropriated a total of $19,381,920,200 for the Departments of Labor and Health, Education and Welfare, and related agencies. Public Law 91–204.

Second supplemental.—Appropriated $6,021,535,005 for the fiscal year ending June 30, 1970, for various program supplementals, pay increase costs due to comparability adjustments and resulting from the enactment of the Federal Employees Salary Act of 1970; and revised the ceiling on 1970 budget outlays. Public Law 91–305.

1971

Agriculture.—Appropriated a total of $8,475,935,100 for the Department of Agriculture and related agencies. H.R. 17923. P/H 6/9/70. P/S amended 7/9/70.

Continuing Appropriations

Continued appropriations through July 31, 1970. Public Law 91–294.

Continued appropriations through October 15, 1970. Public Law 91–370.

District of Columbia.—Appropriated a total of $636,118,200 for the District of Columbia. The appropriated Federal payment is $108,938,000. Public Law 91–337.

Education.—Appropriated a total of $4,420,145,000 for the Office of Education. Public Law 91–380. Congress overrode Presidential veto.

Independent Offices—Housing and Urban Development.—Appropriated a total of $18,655,019,500 for sundry independent executive bureaus, boards, commissions, corporations, agencies, offices, and the Department of Housing and Urban Development. H.R. 17548. President vetoed 8/11/70. House sustained veto 8/13/70.

Interior.—$2,028,524,700 grand total, new budget (obligational) authority and appropriations to liquidate contract authority. Public Law 91–361.

Legislative.—Appropriated a total of $413,054,220 for the Legislative Branch. Public Law 91–382.

Public works—Atomic Energy Commission.—Appropriates a total of $5,258,695,000 for public works for water, pollution control, and power development and the Atomic Energy Commission. H.R. 18127. P/H 6/24/70. P/S amended 8/24/70.

State, Justice, Commerce, the judiciary, and related agencies.—Appropriates a total of $3,122,080,500 in new budget (obligational) authority for the fiscal year 1971. H.R. 17575. P/H 5/14/70. P/S amended 8/24/70.

Treasury, Post Office, and Executive Office.—Appropriates $9,537,429,000 for the Treasury and Post Office Departments, the Executive Office of the President, and certain independent agencies. H.R. 16900. P/H 4/13/70. P/S amended 9/1/70.

ATOMIC ENERGY

Atomic Energy Commission authorization, 1971.—Authorized appropriations of $2,290,907,000 for fiscal year 1971 ($2,013,307,000 for operating expenses and $277,600,000 for plant and capital equipment). Public Law 91–273.

Western interstate nuclear compact.—Gives congressional consent and approval to a compact between the States of Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming to enter the western interstate nuclear compact. S. 1628. P/S 6/26/70.

CONGRESS

Library of Congress—James Madison Memorial Building.—Increased from $75 million to $90 million the authorization contained in the Act of 1965 providing for the construction of the third Library of Congress Building to be known as the James Madison Memorial Building and provided that nothing in the Act shall be construed to authorize the use of the building for general office building purposes. Public Law 91–214.

Library of Congress—office equipment and furniture.—Transferred from the Architect

of the Capitol to the Librarian of Congress the authority to purchase office equipment and furniture for the Library of Congress. Public Law 91–280.

Library of Congress security.—Extended the present authority of the Library of Congress for policing the Library of Congress buildings to embrace the rental space it utilizes at certain other locations in Washington, D.C. Public Law 91–281.

Senate office space.—Authorizes the Architect of the Capitol to acquire on behalf of the United States, the Plaza Hotel property in square 724 in the District of Columbia to be held to meet future office needs of the Senate. S. 3594. P/S 5/21/70.

CRIME

Controlled Dangerous Substances Act.—Authorizes Federal regulation and control over defined "controlled dangerous substances" to help manage the drug abuse problem and criminal traffic in drugs on the international, national and State levels and repeals essentially all of the existing narcotic and dangerous drug laws. The bill vests authority for control of the enumerated substances with the Attorney General and requires that he seek advice from the Secretary of Health, Education, and Welfare and from the newly-established Scientific Advisory Committee concerning certain matters; establishes criteria for the control and classification of drugs into several schedules based largely on the degree of their abuse potential, known effect, harmfulness and level of accepted medical use; provides requirements for registration of persons involved in the manufacture, distribution, and dispensing of controlled drugs; controls and restricts importation and exportation of controlled dangerous substances; designates offenses and penalties for unlawful manufacture, distribution, dispensing, possession with intent to manufacture, distribute, or dispense, importation, exportation, and simple possession of controlled dangerous substances, and eliminates mandatory minimum penalties for all violations except for a newly-created and defined class of professional criminals involved mainly in the distribution, sale and importation of controlled dangerous substances; vests enforcement personnel of the Bureau of Narcotics and Dangerous Drugs with broader enforcement powers; provides, under certain conditions, for "no knock" search warrants for felonious violations; authorizes the appointment of a Committee on Marihuana to conduct a study on all aspects of marihuana use and also establishes a Committee on Nongovernmental Drug Abuse Prevention; authorizes the appropriation of sums necessary to carry out the Act, and specifies the date the act shall take effect. S. 3246. P/S 1/28/70.

Criminal Justice Act Amendments.—Amends the Criminal Justice Act of 1964 relating to representation of defendants financially unable to obtain an adequate defense in criminal cases in United States courts, by expanding its coverage from the arrest stage to appeals, post-conviction proceedings, and ancillary proceedings related to the criminal trial; provides for the creation of Federal defender offices operating under the guidance of the district and appellate courts, but independent of both the Federal judicial and prosecution systems; increases the hourly rate to $30 an hour and the total compensation limits available to attorneys providing representation; and changes various other provisions to improve the operation of the Act. S. 1461. P/S 5/1/70.

Executive protective service.—Changed the name of the White House Police force to the Executive Protective Service; placed the force under the direction of the Director of the U.S. Secret Service; increased the scope of the Protective Service's duties to include protection of foreign diplomatic missions located in the metropolitan area of the District of Columbia and such other areas of the United States, its territories and possessions, as the President, on a case-by-case basis, may direct; and provided that the size of the new Executive Protective Service may consist of up to 850 members. Public Law 91–217.

Organized Crime Control Act.—Embodies a comprehensive, integrated program designed to deal with the menace of organized crime in the United States. Establishes, in addition to regular grand juries, special grand juries to sit in major population areas or elsewhere by designation of the Attorney General; unifies and expands existing Federal law dealing with the granting of immunity from self-incrimination in legislative, administrative, and court proceedings; deals with recalcitrant witnesses; creates a new false declaration provision applicable in grand jury and court proceedings; authorizes the Attorney General to protect and maintain Federal or State organized crime witnesses and their families; authorizes, subject to constitutional safeguards, the taking of depositions in criminal cases; provides a statute of limitations on determining the derivative evidentiary consequences of law enforcement conduct; respecting syndicated gambling—contains special findings dealing with the effect of such gambling on interstate commerce, makes it unlawful to engage in a scheme to obstruct the enforcement of State law to facilitate an "illegal gambling business," as defined, or to engage in the operation of such a business, and provides penalties for violations, as well as providing electronic surveillance in aid of enforcement of these prohibited "business" activities; establishes, effective in 2 years, a Presidential Commission to conduct a comprehensive review of present Federal and State gambling law enforcement policies and their alternatives; makes unlawful certain "racketeering activity" and provides penalties for violations; and provides for increased sentencing (up to 30 years) for defined dangerous adult special offenders. S. 30. P/S 1/23/70.

DEFENSE

Civil Defense Act.—Amended the Federal Civil Defense Act of 1950 to extend from June 30, 1970, to June 30, 1974, the President's standby authority to deal with the effects of an enemy attack upon this Nation. Public Law 91–299.

Coast Guard Authorization, 1971.—Authorizes appropriations of $100 million for the Coast Guard for fiscal year 1971 ($62,295,000 for vessels, $12,865,000 for aircraft, and $24,840,000 for shore facilities and aids to navigation and pollution control equipment). Public Law 91–261.

Coast Guard Officers—interservice transfers.—Places the Coast Guard on the same parity as their counterparts in the military department by providing that the Coast Guard officers be included within the stipulation that the President may, within authorized strengths, transfer any commissioned officer with his consent from his service branch to, and appoint him in, another service branch. H.R. 9052. Public Law 91– .

Coast Guard omnibus.—Revised titles 14, 10 and 37 of the United States Code to make more uniform the laws relating to the Coast Guard and the other Armed Forces. Public Law 91–278.

Coast Guard Reserve laws.—Modified the law affecting the Coast Guard Reserve, the modifications generally not only being designed to meet the particular problems of the Coast Guard, but also to conform more closely to practices obtaining in the other Armed Services. H.R. 13716. Public Law 91—.

Command of the U.S.S. "Constitution" by retired U.S. Navy officers.—Permitted a retired officer of the U.S. Navy to command the U.S.S. "Constitution," a historic naval vessel maintained "in commission, active status," and permanently berthed at the Boston Naval Shipyard. H.R. 8662. Public Law 91—.

Defense Production Act extensions.—(See Economy and Finance).

Disposal from national and supplemental stockpiles.—Authorized disposal from the national and supplemental stockpiles of various materials, as follows:

Asbestos: Chrysotile, 2,844 short tons. Public Law 91–329.

Bauxite: Surinam-type metallurgical grade, 2,600,000 long dry tons. Public Law 91–326.

Bismuth: 300,000 pounds. Public Law 91–318.

Cadmium: 4,180,000 pounds. Public Law 91–314.

Castor Oil: 18,500,000 pounds. Public Law 91–319.

Chromite: Refractory grade, 826,000 short dry tons. Public Law 91–328.

Cobalt: 40,200,000 pounds. Public Law 91–317.

Corundum: 1,952 short tons. Public Law 91–330.

Fluorspar: Acid grade, 212,637 short dry tons. Public Law 91–320.

Graphite: Natural Ceylon amorphous lump, 386 short tons. Public Law 91–327.

Magnesium: 12,000 short tons. Public Law 91–321.

Manganese, Type A: Chemical grade, 111900 short dry tons. Public Law 91–322.

Manganese, Type B: Chemical grade, 65,800 short dry tons. Public Law 91–323.

Manganese Ore: Natural battery grade, 173,800 short dry tons. Public Law 91–331.

Molybdenum: 3,500,000 pounds. Public Law 91–333.

Shellac: 4,300,000 pounds. Public Law 91–324.

Tungsten: 100 million pounds. Public Law 91–325.

Headstones or markers for Medal of Honor recipients.—Authorized the furnishing of headstones to mark the graves of Medal of Honor recipients regardless of the character of the discharge granted for their last term of service. H.R. 6265. Public Law 91 ——.

Leave for uniformed services members in hostile fire areas: Extended until June 30, 1972, the authority to grant a special 30-day leave for members of the uniformed services who voluntarily extend their tours of duty in hostile fire areas. Public Law 91–302.

Marine Corps Band.—Removed the restrictions on the grades of the director and assistant director of the Marine Corps band (now limited to lieutenant colonel and captain, respectively) to eliminate an inequity in their promotion opportunities. Public Law 91–197.

Military claims.—Provided that the authority for payment of military claims under title 10 of the United States Code be increased to $15,000, the amount authorized for foreign claims, and that a similar provision for partial payment be provided for such claims. Public Law 91–312.

Military procurement authorization, 1971.—Authorizes appropriations of $11,892,389,000 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles; $7,016,500,000 for research, development, test, and, evaluation; and $334,000,000 for military construction authority for the Safeguard antiballistic missile system; continues the authority for merging military assistance financing for South Vietnam and other free world forces and local forces in Laos and Thailand, with the funding of the Department of Defense; authorizes the personnel strengths for fiscal year 1971 for the Selected Reserve of each of the Reserve components of the Armed Forces; imposes certain limitations with regard to specific procurement actions; provides certain addi-

tional legislative authorities; and contains other provisions. H.R. 17123. P/H 5/6/70. P/S amended 9/1/70.

Naval Flight Officers' Command.—Amended title 10, United States Code, to permit naval flight officers, in addition to naval aviators, to be eligible for command of naval aviation schools, naval air stations, or naval aviation units organized for flight tactical purposes; provided eligibility for similar Marine Corps commands by naval flight officers of the Marine Corps. Public Law 91–198.

Savings deposit program for certain uniformed services members.—Removed the $10,000 limit on deposits which may be made to the Uniformed Services Savings deposit program in the case of any member of the uniformed services who is a prisoner of war, missing in action, or in a detained status during the Vietnam conflict. Public Law 91–200.

Selection boards.—Provided that the number of active duty officers who serve on selection boards for the grades of rear admiral to captain may be increased from the current number of nine, and removed the requirement that members of selection boards for nonactive duty promotions have a permanent grade higher than those being considered for promotion, in order to make a greater number of officers eligible to serve on such boards. Public Law 91–199.

Transportation to home ports.—Entitled a member of the Navy, Coast Guard, or Environmental Science Services Administration, whose dependents are residing at his home port to round trip transportation to the home port where he is permanently attached to a ship overhauling away from the home port. Public Law 91–210.

United States flags—presentation to parents of deceased servicemen.—Provided that United States Flags may be presented to parents of deceased servicemen, in addition to flags presented to the surviving spouse or next of kin. H.R. 13195. Public Law 91– .

War Claims Act amendments.—Authorized payment under the War Claims Act of 1948 to members of the Armed Forces captured and held prisoner by the forces of North Vietnam, and to persons captured by North Korea while assigned to duty on board the U.S.S. "Pueblo", for the period of their captivity at the rate of $5 per day of captivity, and provided for payment to civilian American citizens held by the forces of North Vietnam at the rate of $30 per month. Public Law 91–289.

DISTRICT OF COLUMBIA

Anatomical Gift Act.—Provided in the District of Columbia a comprehensive and uniform legal environment for organ donation and transplantation consistent with the recommendations of the National Conference of Commissioners on Uniform State Laws made in 1968. Public Law 91–268.

Bail Agency Act.—Removed the ceiling of of $130,000 on the annual authorization of appropriations for the District of Columbia Bail Agency. Public Law 91–232.

Blood components transfer.—Authorized the Commissioner of the District of Columbia to determine that blood platelets and other blood components in general use in the States may be transferred from local licensed blood banks in which they are produced to licensed physicians, to District of Columbia hospitals, and to licensed private hospitals and other medical facilities within the District, thereby placing the District in the same position as the States, all of which permit the intrastate transfer of blood components within their borders. Public Law 91–256.

Cooperative Association Act amendments.—Exempted from the District of Columbia laws regulating the loaning of money and interest rates cooperative associations formed under the District of Columbia Cooperative Association Act and their financing transactions with members. Public Law 91–385.

Court Reform and Criminal Procedure Act.—Completely reorganized the present court system in the District of Columbia, including provision for a local court system for the adjudication of all local criminal and civil matters, and added a number of new judgeships, as well as providing for modern court administration; transformed the Legal Aid Agency into a Public Defender Service to provide legal counsel for up to 60 percent of all indigent criminal defendants and to aid the courts in establishing an effective court-appointed counsel system for the remaining 40 percent; expanded the Bail Agency and enables it to make recommendations to the courts on the full range of pretrial release conditions and to supervise persons released on non-financial conditions; replaced the existing three-judge juvenile court with an expandable Familiy Division; established a modern juvenile code; made various changes in criminal procedure and provided revisions in sentencing practice, including new sentencing alternatives for habitual criminals; contained an improved wiretapping and electronic surveillance law; provided for no-knock search warrants under certain conditions; permitted a pretrial detention alternative for certain dangerous defendants; authorized an additional $5 million Federal payment to the District of Columbia to defray the first-year costs of court reorganization and to aid in the payment for other crime control provisions of the legislation; and made other reforms. Public Law 91–358.

Fees.—Vests authority in the District of Columbia Council, after public hearing, to set a variety of municipal fees, including fees for certain licenses and permits; license and user fees are presently fixed by statute, and many fees have not been adjusted over the years to reflect current costs for performing the governmental duties related to the activity for which the fee is charged. S. 3906, P/S 8/13/70.

Freeway airspace utilization.—Authorizes the Commissioner of the District of Columbia to lease airspace above and below freeway rights-of-way within the District of Columbia to allow fuller utilization of space by making available for private and public purposes such airspace as will not impair the full and safe use of freeways. S. 3647. P/S 7/30/70.

Health services improvement.—Improves health services and regulatory functions of the Public Health Department of the District of Columbia; authorizes commitment of mentally ill persons, previously sent only to public hospitals, to other equally suitable health facilities; eliminates duplication of inspection of milk producers and dairy farms between the District and other jurisdictions within the Washington "milk shed"; provides for detection of tuberculosis for school children in the District through mandatory tuberculin testing of all children entering school for the first time; allows the District government to enforce liens against recoverable moneys as to persons under care at Glenn Dale Hospital, Maryland; allows physicians licensed in another State to obtain a license in the District, although once failing the District examination. S. 3648. P/S 7/30/70.

Housing Revolving Fund and Unclaimed Property Act.—Establishes in the District of Columbia a revolving fund for the development of housing for low- and moderate-income persons and families in the District of Columbia and provides for the disposition of unclaimed property in the District of Columbia. S. 3011. P/S 5/13/70.

Industrial Safety Act amendments.—Provides for a more general application of the rules and regulations of the safety code of the District of Columbia to protect employees and restores the jurisdiction of the Industrial Safety Board to enforce the code. S. 2820. P/S 5/5/70.

Metropolitan Area Transit Act.—Grants congressional consent to the public acquisition and operation of mass transit bus facilities in the Washington metropolitan area and authorizes payments by the District of Columbia government to assist in maintaining reasonable fares for District residents. S. 1814. P/S 4/15/70.

Mortgages and loans.—Temporarily permits, through March 31, 1971, mortgages insured by the Federal Housing Administration and the Veterans' Administration to be made in the District of Columbia even when the effective rate of interest therein exceeds the 8 percent ceiling provided in the District of Columbia interest and usury laws. S. 3313. P/S 4/1/70.

Pay increase for police, firemen and teachers.—Increased by an average of 13 percent retroactive to July 1, 1969, the salaries of police and firemen and Executive Protective Service; increased by an average of 13 percent, retroactive to September 1, 1969, the salaries of teachers; revised the personal income tax of District of Columbia residents and authorized a special Federal payment of $8 million to the District of Columbia to help defray the costs of the pay increases; and made other changes in existing law. Public Law 91–297.

Protective eye devices.—Requires students, teachers and observers in the District of Columbia to wear protective devices while participating in or observing certain courses of study or types of training in public or private facilities wherever there is a condition hazardous to the eyes in connection with educational or training programs. H.R. 9528. P/H 11/24/69. P/S amended 5/7/70.

Protestant Episcopal Church Vestry Act.—Conforms applicable law to changes recently enacted by the General Assembly of Maryland with respect to the Protestant Episcopal Church to repeal those anachronistic sections of the so-called Vestry Act which deal with the internal organization and operation of the Church, but to leave intact those provisions which establish general corporate powers and which may affect title to property held by the church. S. 2336. P/S 8/13/70.

Rental of space for District of Columbia Agencies and activities.—Enables the government of the District of Columbia to more efficiently lease privately owned space in buildings or in improved or unimproved property for the accommodation of District agencies and activities, thus allowing the District government to compete for space in the open market on the same terms as the Federal Government. S. 3649. P/S 7/1/70.

Revenue.—Provides that the annual Federal payment authorization be established at 30 percent of the District of Columbia general fund tax revenues and authorizes a special one-time Federal payment supplement of $5 million for fiscal year 1970 to be used for law enforcement activities in the District. The new formula proposal would authorize a 1971 Federal payment estimated at $130.4 million or an increase of $25.4 million over the present annual $105 million authorization. S. 3903. P/S 8/13/70.

Taxation of regulated investment companies.—Conformed the provisions of the District of Columbia Income and Franchise Tax Act of 1947 to the provisions of the Federal Internal Revenue Code relating to the treatment to be given to dividends paid by regulated investment companies which qualify for the dividends-paid deductions under section 852(b)(2)(D) and section 852(b)(3)(A)(ii) of the Internal Revenue Code of 1954 to make clear that investment companies domiciled in the District of Columbia will be accorded treatment under the laws

of the District similar to that they are accorded under Federal law. H.R. 15381. Public Law 91–

Teachers' retirement amendments of 1970.—Amended the District of Columbia Teachers' Retirement Act so as to provide the same retirement benefits for the teachers and other professional employees of the District of Columbia Board of Education as are presently afforded the classified employees of the Federal and District of Columbia governments who retire under the Civil Service Retirement Act as amended by Public Law 91–93. Public Law 91–263.

Water and sanitary sewer rates.—Makes it possible for the District of Columbia City Council, by appropriate increases in the rates to be charged for water and sewer services, to meet operating costs and debt retirement need involved in furnishing these municipal services; and eliminates the maximum rate restrictions imposed on water and sewer rates and leaves the setting of such rates to the discretion of the District of Columbia Council on the basis of recommendations by the Commissioner. S. 3905. P/S 8/13/70.

Economy and Finance

Consumer Products Warranty and Guaranty Act.—Requires a supplier of a consumer product or service actually costing more than $5 who decides to warranty or guaranty his product against defect or malfunction to follow certain guidelines; requires a clear and conspicuous disclosure of the contents of warranties and guaranties and requires that a written warranty or guaranty must be designated a "full" or "partial" warranty; and provides remedies for failure to comply with certain provisions of the legislation. S. 3074. P/S 7/1/70.

Credit unions—independent agency status.—Elevated the Bureau of Federal Credit Unions (currently in the Department of Health, Education and Welfare) to the status of an independent agency in the executive branch to be known as the "National Credit Union Administration," and provided for an Administrator to be the chief executive officer of the Administration and to function in close and constant cooperation with a newly created National Credit Union Board to consist of a chairman and one member from each of the Federal credit union regions, the Administrator and Board members to be appointed by the President by and with the advice and consent of the Senate. Public Law 91–206.

Defense Production Act extension; standby wage, price, salary and rent controls.—Extended the Defense Production Act until June 30, 1972; provided for the establishment of uniform cost accounting standards for certain defense contracts to be promulgated by a five member Cost-Accounting Standards Board appointed by the Comptroller General who would be designated as Chairman of the Board; limited loan guarantees under the Act to a maximum of $20 million per contractor, except with congressional approval; and gave the President standby authority until February 28, 1971 to stabilize prices, wages, salaries, and rents at levels not less than those prevailing on May 25, 1970, except that adjustments can be made to avoid inequities. Public Law 91–379.

Defense Production Act temporary extensions

Extended the effectiveness of the Defense Production Act of 1950 to July 30, 1970. Public Law 91–300.

Extended the effectiveness of the Defense Production Act of 1950 until August 15, 1970. Public Law 91–371.

Eisenhower dollar.—Authorizes the minting of not to exceed 150 million silver dollars, of 40% silver content, to be minted only as uncirculated coins and proof coins and sold at a premium price, and authorizes the simultaneous minting of cupro-nickel dollars, expected to circulate as a medium of exchange, all bearing the likeness of the late President of the United States, Dwight David Eisenhower. S.J. Res. 158. P/S 10/15/69. P/H amended 10/15/69. Senate concurred in House amendment with an amendment in the nature of a substitute 3/19/70.

Eligibility of American Samoa banks for Federal deposit insurance.—Establishes the eligibility of the banks in American Samoa for Federal deposit insurance by amending sections 3 and 7 of the Federal Deposit Insurance Act in accordance with the provisions governing U.S. territories. S. 3366. P/S 7/1/70.

Federal National Mortgage Association.—Clarifies the payment of certain accounts owed by the Federal National Mortgage Association (FNMA) to the Secretary of the Treasury in connection with the reorganization of the FNMA. S. 3207. P/S 1/30/70.

Gold and silver content.—Amended the National Gold and Silver Stamping Act to protect consumers by providing a civil remedy for misrepresentation of the quality of articles composed in whole or in part of gold or silver. Public Law 91–366.

Public debt limit increase.—Provided an increase in the permanent debt limitation from $365 billion to $380 billion, and provided for a temporary additional increase of $12 billion, making an overall limitation of $395 billion for fiscal year 1971. Public Law 91–301.

Public Works and Economic Development Act extension.—Amended the Public Works and Economic Development Act of 1965 to extend the authorization of funds for titles I through IV through fiscal year 1971, and authorized to be annually appropriated $770 million through June 30, 1971 ($500 million for grants for public works and development facilities and $170 million for other financial assistance; $50 million for technical assistance research and information; and $50 million for economic development districts). Public Law 91–304.

Purchase of U.S. obligations by Federal Reserve banks.—Extended for 1 year, from June 30, 1970, to June 30, 1971, the authority of the Federal Reserve banks to purchase U.S. obligations directly from the Treasury. Public Law 91–360.

Savings bond—Interest increase.—Increased from 5 to 5½ percent the rate of interest payable on series E savings bonds. Public Law 91–388.

Securities Act exemption from registration for small businesses.—Amends the Securities Act of 1933 to assist small businesses in raising capital by giving the Securities and Exchange Commission power by rule or regulation to increase the size of an offering of securities that may be made without compliance with the full registration requirements of the Securities Act from the present amount of $300,000 to $500,000. S. 336. P/S 8/13/70.

Securities Exchange Act—Additional consumer protection.—Amends the Securities Exchange Act to provide additional protection for investors by augmenting the provisions of Public Law 90–439 to encompass acquisitions of and tender offers for equity securities of insurance companies; to extend the act's full disclosure provision to acquisitions and tender offers of over 5 percent of a company's stock; to extend the substantive provisions which protect stockholders involved in cash acquisitions and tender offers to stock for stock exchange offers; to give the Securities and Exchange Commission additional rulemaking power to deal with certain types of fraudulent, deceptive, and manipulative practices; and to give the Commission rulemaking power to differentiate between control persons and issuers in applying certain requirements of section 13(e) of the Securities Exchange Act. S. 3431. P/S 8/18/70.

Silver certificates.—Authorizes further adjustments in currencies outstanding which were issued after June 30, 1929; permits the writeoff of Federal Reserve bank notes and national bank notes; and removes the limitation of $200 million on the aggregate face value of silver certificates outstanding that the Secretary of the Treasury is authorized by law to write off after he has determined that they have been lost or destroyed, or are held in collections, and will never be presented for redemption. S. 3825. P/S 6/17/70.

Unsolicited credit cards.—Prohibits the issuance of unsolicited credit cards except in renewal of, or in substitution for, an accepted credit card; limits consumer liability for a lost or stolen card to not more than $50, unless there is a lesser liability under other applicable law or under an agreement with the card issuer; amends the definition of a card issuer to include not only the person who issues the card but also any agent of the issuer; set penalties for unauthorized use of credit cards. S. 721. P/S 4/15/70. H.R. 16542. H. Cal.

EDUCATION

Demonstration elementary school for the deaf.—Authorizes the Board of Directors of Gallaudet College to maintain and operate, including necessary renovation, construction and equipment, the Kendall School as a demonstration elementary school for the deaf to serve primarily the National Capital region and authorizes the School to provide day and residential facilities for elementary education for persons who are deaf in order to prepare them for high school and other secondary study, and to provide an exemplary educational program to stimulate the development of similar excellent programs throughout the Nation. S. 4083. P/S 8/11/70.

Elementary and secondary education amendments.—Authorized approximately $24.5 billion for fiscal years 1971 through 1973 for carrying out various educational programs; amended the Elementary and Secondary Education Act of 1965 (special educational needs of educationally deprived children; school library resources, textbooks, and other printed and published materials; supplementary educational centers and services; strengthening State departments of education; bilingual education programs; school dropout prevention; school nutrition and health services for children from low-income families); extended and amended impacted areas programs legislation; amended the Adult Education Act; enacted a "General Education Provisions Act" relating to the administration of education programs and the operation of the Office of Education; extended and revised provisions of present law relating to cancellation and repayment of loans under Federal student loan programs; created, as an independent act, the "Education of the Handicapped Act"; amended and extended vocational education programs; and made miscellaneous amendments to various education laws. Public Law 91–230.

Impacted areas aid.—Authorized the Secretary of Health, Education and Welfare to make to local educational agencies emergency payments for the current school year to provide 100 percent funding for fiscal year 1970 for the education of 3–A children (children whose parents live or work on Federal property) under Public Law 874, the aid to impacted areas program; and authorized for this purpose the expenditure of $2.5 million out of existing appropriations. Public Law 91–237.

Land-grant status for College of the Virgin Islands and the University of Guam.—Gives land-grant status to the College of the Virgin Islands and the University of Guam; authorizes endowment grants of $1,019,000 to the University of Guam and $714,000 to the College of the Virgin Islands; provides eligibility for annual grants to each college. S. 1148. P/S 4/15/70.

National Commission on Libraries and Information Science.—Established a 15-mem-

ber National Commission on Libraries and Information Science as an independent agency in the executive branch to develop and recommend overall plans for carrying out the national policy with respect to libraries and information science, and authorized $500,000 for fiscal year 1970 and $750,000 for fiscal year 1971 and each succeeding year to carry out the provisions of the Act. Public Law 91–345.

FEDERAL EMPLOYEES

Air traffic controllers.—Changes in the computation factor for determining civil service retirement benefits from 1.0 to 1.4 for each year of air traffic controller service and provides that the special provision apply only to air traffic controllers and "first-line" supervisors directly supervising such controllers; makes a controller or a supervisor eligible to retire after completing 30 years of service regardless of age if he has at least 10 years of such service in such a capacity. S. 3959. P/S 7/13 70.

Federal firefighters.—Extends to Federal employees whose duties "are primarily to perform work directly connected with the control and extinguishment of fires or the maintenance and use of firefighting apparatus and equipment" the same hazardous-duty retirement provisions of title 5, United States Code, now provided for certain Federal law-enforcement officers. S. 578 P/S 8/18/70.

Federal pay legislation.—Provided 6-percent across-the-board increases for the salaries of Federal employees who are paid under statutory salary systems (the postal field service, the general schedule of the classified civil service, the Department of Medicine and Surgery in the Veterans' Administration and the Foreign Service) and employees paid under other salary systems (legislative employees; judges of the District of Columbia, Court of General Sessions, Court of Appeals, and Tax Court; and staffs of former Presidents), except wage board employees in the legislative, executive and judicial branches of the Government; and provided a 6-percent increase to military personnel under the provisions of Public Law 90–207; made pay retroactive to the first day of the first pay period which began December 27, 1969. Public Law 91–231.

Foreign Service retirement adjustments.—Brought the retirement benefits and financing of the Foreign Service Retirement and Disability System into line with those contained in legislation relating to the Civil Service Retirement System which became effective on October 20, 1969 (Public Law 91–93). Public Law 91–201.

Government Printing Office—Overtime compensation. — Authorized the Public Printer to grant employees paid on an annual basis compensatory time off from duty instead of overtime pay for overtime work. Public Law 91–369.

Government Printing Office—Special policemen.—Authorized the Public Printer or his delegate to designate employees of the Government Printing Office to serve as special policemen to protect persons and property in premises and adjacent areas occupied by or under the control of that office. Public Law 91–359.

Health benefits.—Increases the amount paid by the Federal Government toward the cost of the premium charged for health insurance authorized by the Federal Employees Health Benefits Act from $1.62 (for self only) or $3.94 (for family coverage) for each biweekly pay period (which in practice is about 24 percent of the average cost of high option family insurance) to a permanent level of 40 percent of the average premium charged for high option coverage offered by the six largest insurance programs operating under the act. S. 1772. P/S 9/1/70.

Job Evaluation Policy Act.—Improved position classification systems within the executive branch by establishing an orderly procedure for the study of ways to improve current classification with a view to the establishment of a comprehensive plan for the establishment of a coordinated system of job evaluation and ranking and by providing for the appointment by the Civil Service Commission of a special organizational unit within the Commission to prepare the plan and requiring the Commission to submit to the President and Congress within one year an interim report and to complete its activities within two years at which time it shall submit its recommendations to the President who shall submit recommendations to Congress. Public Law 91–216.

Protecting privacy and the rights of Federal employees.—Prohibits indiscriminate executive branch requirements that employees and applicants for Government employment disclose their race, religion or national origin; attend Government-sponsored meetings and lectures or participate in outside activities unrelated to their employment; report on their outside activities or undertakings unrelated to their work; submit to questioning about their religion, personal relationships or sexual attitudes through interviews, psychological tests, or polygraphs; support political candidates or attend political meetings; makes it illegal to coerce an employee to buy bonds or make charitable contributions; prohibits officials from requiring an employee to disclose his own personal assets, liabilities, or expenditures, or those of any member of his family unless, in the case of certain specified employees, such items would tend to show a conflict of interest; provides a right to have a counsel or other person present, if the employee wishes, at an interview which may lead to disciplinary proceedings; accords the right to a civil action in a Federal court for violation or threatened violation of the act; and establishes a Board on Employees' Rights to receive and conduct hearings on complaints of violation of the act and to determine and administer remedies and penalties. S. 782. P/S 5/19/70.

GENERAL GOVERNMENT

Alaska Native Claims Settlement Act of 1970.—Provides for final legislative settlement of the claims of the Alaska Native people to the lands which now comprise the State of Alaska and extinguishes all Native claims to said lands; provides as compensation for the extinguishment of these claims substantial land grants to both individuals and to Native village corporations; appropriates Federal funds of $500 million to be paid over a 12-year period; grants the Alaska Native people a right to share in revenues derived from the mineral resources of Alaska until $500 million has been received; provides for the organization of corporate enterprises to administer funds granted by the bill; protects subsistence resources used by Alaska Native people; and authorizes the Secretary of the Interior to dispose of oil and other leasable minerals on the public lands in Alaska by competitive bid where there is competitive interest in the lands to be leased. S. 1830. P/S 7/15/70.

American Revolution Bicentennial Commission.—Authorizes appropriations of $373,000 for fiscal year 1971, for the Commission's activities. S. 3630. P/S 6/26/70. H.R. 16408. H. Cal.

Bankruptcy Laws Commission.—Established a Commission on the Bankruptcy Laws of the United States to study, analyze, evaluate and recommend changes in the Bankruptcy Act and to submit a comprehensive report of its activities and recommendations to the President, Chief Justice, and Congress within 2 years of enactment. Public Law 91–354.

Canal Zone Government: Cash relief payments.—Amended the Canal Zone Code to adjust cash relief payments (to be paid from Canal tolls at no cost to the Federal government) to noncitizen former employees of the Canal Zone Government whose services terminated prior to 1958 by providing for adjustment of future payments on the basis of cost-of-living under provisions of the United States Code pertaining to civil service retirement annuities and extended the eligibility for cash relief payments to surviving widows of such former employees. Public Law 91–355.

Coalinga Canal, California.—Changed the name of the Pleasant Valley Canal, a feature of the San Luis unit of the Central Valley project in California, to the Coalinga Canal. Public Law 91–336.

Commission on Population Growth and the American Future.—Established a commission to be called the Commission on Population Growth and the American Future to conduct and sponsor studies and research and to make such recommendations as may be necessary to provide information and education to all levels of government in the United States, and to the public, regarding a broad range of problems associated with population growth and their implication for America's future. Public Law 91–213.

Disposition of executive records.—Abolished the Joint Committee on the Disposition of Executive Papers and transferred its functions to the General Services Administration, operating in collaboration with the National Archives, and provided for the disposal of Government records insufficiently valuable to merit retention. Public Law 91–287.

Family planning services and population research activities.—Makes comprehensive, voluntary family planning services and related information available to all persons in the United States desiring such services; provides greatly increased support for biomedical, behavioral, and operational research relevant to family planning and population; provides for development and dissemination of information on population growth; provides for coordination and centralization of the administration of family planning and population research programs conducted by the Department of Health, Education, and Welfare (HEW); authorizes $89.750 million in fiscal year 1971, rising in increments of $53.250 million per year to $307.750 million in fiscal year 1975 for a new 5-year program of grants and contracts administered by HEW; establishes an Office of Population Affairs in HEW, headed by the Deputy Assistant Secretary for Population Affairs, to exercise direct authority and control over family planning grants and population research programs operated by HEW, to coordinate and evaluate other HEW family planning and population-related programs, and to provide liaison with other Federal agencies carrying out programs in this field; requires HEW to submit to Congress a 5-year plan for extension of services to all persons having need of them, for research programs, and for training programs and provides for annual reports to Congress on progress under the plan. S. 2108. P/S 7/14/70.

Fire protection contracts on public lands.—Confers on the Secretary of Interior authority parallel to that of the Secretary of Agriculture with respect to the suppression of fires on large areas of the public lands and allows him to enter into contracts for tanker aircraft, and for other kinds of aircraft, supplies, and services, for an entire fire season, and to renew such contracts not more than twice. S. 3777. P/S 7/1/70.

Fire research and safety act authorization.—Authorizes to be appropriated to the Department of Commerce such sums as may be necessary for fiscal years 1971 and 1972 (not to exceed a total of $5 million) and such sums as may be necessary for succeeding fiscal years to carry out the purposes of the Fire Research and Safety Act of 1968. S. 3766. P/S 7/31/70. H.R. 16538. H. Cal.

Franklin Delano Roosevelt Memorial Commission.—Authorized $75,000 for the con-

tinued operation of the Franklin Delano Roosevelt Memorial Commission. H.R. 15351. Public Law 91– .

Government systems and equipment purchasing.—Authorizes the Administrator of General Services to determine the systems and equipment required for standard passenger motor vehicles (sedans and station wagons) to be completely equipped for operation, and to purchase such additional systems and equipment as he finds to be other than customary for standard passenger motor vehicles, without regard to the maximum price limitations established by law. S. 2763. P/S 5/28/70. H. Cal.

"Johnny Horizon" symbol.—Protects the symbol of Johnny Horizon (created by the Bureau of Land Management as part of an intensive public service antilitter program, with the theme: "This Land is Your Land—Keep it Clean") from unauthorized use and permits the Department of the Interior to license its use for commercial purposes with the provision to collect royalties. S. 3838. P/S 7/7/70. H. Cal.

Land Conveyance, Eglin Air Force Base, Florida.—Authorized the Secretary of the Air Force to donate, grant, and convey to the Board of Public Instruction of the county of Okaloosa, Florida, all right, title, and interest of the United States in and to approximately 135 acres of land; such land shall be used for the construction of school facilities in the vicinity of Eglin Air Force Base to alleviate the severe overcrowding of schools in that area. Public Law 91–347.

Mountain Standard Time zone.—Authorized the Secretary of Transportation to place El Paso and Hudspeth Counties, Texas, in the mountain standard time zone. Public Law 91–228.

National Foundation on the Arts and the Humanities Act amendments.—Authorized $40 million, $60 million, and $80 million for fiscal years 1971, 1972, and 1973, respectively, for the National Foundation on the Arts and the Humanities, provided that from the sums appropriated for any fiscal year, not less than $65,000 shall be allotted to each State and that any funds remaining after such an allotment shall be distributed among the States in equal amounts; and made other amendments to the Act. Public Law 91–346.

National Science Foundation authorization.—Authorized appropriations to the National Science Foundation for the fiscal year 1971 in the amount of $537,730,000 out of money in the Treasury not otherwise appropriated and $2 million in foreign currencies which the Treasury Department determines to be in excess to the normal requirements of the United States. Public Law 91–356.

Oil and gas leases.—Conferred discretionary authority on the Secretary of Interior to prevent, administratively, termination of certain oil and gas leases on Federal lands and to reinstate terminated leases under certain limitations and conditions. Public Law 91–245.

Plymouth-Provincetown Celebration Commission.—Creates a commission to develop suitable plans for and conduct of the celebration in 1970 of the 350th anniversary of the landing of the Pilgrims at Provincetown and Plymouth, and authorizes $100,000 for the Commission's work. S. 2916. P/S 6/26/70.

Postal Reorganization Act.—Established the United States Postal Service as an independent establishment within the executive branch; provided that all powers of the Postal Service shall be directed and exercised by an eleven-member Board of Governors, nine of whom shall be appointed by the President (no more than five of whom may be members of the same political party), the Postmaster General to be appointed a governor by the nine, and the Deputy Postmaster General to be a governor chosen by those ten; established a thirteen member Advisory Council to advise the Postal Service on all aspects of postal operations; authorized collective bargaining over wages, hours, grievance procedures, seniority rights, promotions and other matters subject to collective bargaining in the private sector, with final and binding arbitration to resolve impasses in lieu of the right to strike; provided that right-to-work laws shall be applicable to postal employees; made postal employees members of the Postal Career Service, which shall be a part of the Civil Service; prohibited political influence in the selection or promotion of postal personnel; empowered the Postal Service to raise up to $10 billion through the issue of bonds; required that postal rates to afford the annual revenues necessary to operate the Postal Service be recommended to the Board of Governors by an independent five-member Postal Rate Commission, subject to veto by a unanimous decision of the Board or by the Courts; prescribed an annual appropriation of approximately 10 percent of the postal budget to be phased out over a 12-year period; and provided an 8 percent salary increase to postal employees to be effective retroactively to the first day of the first pay period that begins on or after April 16, 1970. Public Law 91–375.

Postal Service.—Makes technical changes in the references to certain provisions of law relating to the postal service which are codified in the United States Code; made no substantive changes in law. S. 3396. P/S 3/4/70.

Sea Grant College and Program Act amendments.—Provided for further funding of the National Sea Grant College and Program Act through fiscal year 1973, authorizing $20 million, $25 million, and $30 million for fiscal years 1971, 1972, and 1973, respectively. Public Law 91–349.

Smithsonian Institution

Additional members of board of regents.—Authorizes the appointment of three additional citizen regents to the Board of Regents of the Smithsonian Institution, increasing the membership of the Board from 14 to 17 members. H.R. 14213. P/H 12/16/69. P/S amended 8/18/70.

Facilities construction.—Authorized the Board of Regents of the Smithsonian Institution to plan and construct museum support and depository facilities; limited the authorized appropriations to $500,000; specified that the proposed museum facilities be constructed on land presently within the metropolitan area of the District of Columbia; and limited the use of the appropriated funds to preliminary planning and design of the facilities. S. 209. P/S 7/17/70.

Museum programs authorization.—Authorizes $1 million for each of fiscal years 1972, 1973, and 1974 for purposes of the National Museum Act of 1966, and an additional $300,000 for each of those fiscal years for museum assistance programs to be allocated equally among specified museum assistance programs of the Smithsonian Institution, the National Foundation on the Arts, and the National Foundation on the Humanities. S. 704. P/S 8/7/70.

Trust territory of the Pacific Islands.—Increases the authorization from $50 million to $60 million for the fiscal year 1971 and authorizes $60 million for fiscal year 1972 for the Trust Territory of the Pacific Islands for civil works and administrative programs. S. 3479. P/S 5/18/70. H.R. 15978. H. Cal.

Use of personal checks to pay postal services.—Permits the acceptance of checks and nonpostal money orders in payment for postal charges and services; relieves postal employees of personal financial liability for accepting personal checks from postal patrons in the course of business; provides penalties for presenting bad checks and bad postal money orders in payment for postal charges and services. S. 3397. P/S 3/4/70.

HEALTH

Air pollution compacts

Mid-Atlantic States—Gives Congressional consent and approval to a compact between the States of Connecticut, New Jersey, and New York to enter into an interstate compact on air pollution and grants consent to the Commonwealth of Pennsylvania and the State of Delaware to join in such compact. S.J. Res. 53. P/S 6/26/70.

Ohio-West Virginia—Gives Congressional consent to the interstate compact on air pollution between the States of Ohio and West Virginia and grants consent to the Commonwealth of Pennsylvania and the State of Kentucky to join in the compact. S. 2707. P/S 2/2/70.

Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970.—Establishes a National Institute for the Prevention and Control of Alcohol Abuse and Alcoholism within the Public Health Service, through which the Secretary of Health, Education, and Welfare shall coordinate all Federal health, rehabilitation, and other social programs related to the prevention and treatment of alcohol abuse and alcoholism and administer the programs established by the bill; provides for extensive Federal assistance to State and local programs in order to promote effective treatment and rehabilitation programs for alcoholics throughout the country; authorizes for formula grants to States $20 million, $25 million, and $30 million for fiscal years 1971, 1972, and 1973, respectively, for project grants to State and local agencies $60 million, $100 million, and $160 million for fiscal years 1971, 1972, and 1973, respectively; requires the utilization of all existing Federal legislation providing for Federal or federally assisted research, prevention, treatment, or rehabilitation programs in such fields as health, education, welfare, and highway safety in order to effectively reduce the incidence of alcohol abuse and alcoholism throughout the Nation. S. 3835. P/S 8/10/70.

Cancer Conquest.—Expresses the sense of Congress that the conquest of cancer is a national crusade to be accomplished by 1976 as an appropriate commemoration of the two hundredth anniversary of the independence of our country and that sufficient funds be appropriated to carry out said crusade so that the citizens of this land and other lands may be delivered from the greatest medical scourge in history. H. Con. Res. 675. P/H 7/15/70. P/S amended 8/28/70.

Clean Air Act and Solid Waste Disposal Act Extensions.—Extended the authorization for the Clean Air Act and Solid Waste Disposal Act programs for 60 days through August 31, 1970, at their present level. Public Law 91–316.

Community mental health centers amendments.—Improved and extended for 3 years the Community Mental Health Centers Act; authorized for construction grants $80 million, $90 million, and $100 million for fiscal years 1971, 1972, and 1973, respectively; authorized for grants for initial operation of community mental health centers $45 million, $50 million, and $60 million for fiscal years 1971, 1972, and 1973, respectively; extended the program for facilities and services for alcoholics and narcotic addicts for 3 years and authorized therefor $30 million, $35 million, and $40 million for fiscal years 1971, 1972, and 1973, respectively, and reduced the authorization for fiscal 1970 from $25 million to $15 million; added a program of special facilities, personnel and services for children and authorized therefor $12 million, $20 million and $30 million, for fiscal years 1971, 1972, and 1973, respectively. Public Law 91–211.

Developmental Disabilities Services and Facilities Construction Act.—Extends and amends the Mental Retardation Facilities

Construction Act of 1963; authorizes $100 million, $125 million, and $150 million for fiscal years 1971, 1972, and 1973, respectively, for grants to assist States in developing and implementing a comprehensive and continuing plan for providing services to persons affected by mental retardation and other developmental disabilities; expands the program for the construction and development of university-affiliated facilities and authorizes therefor $7 million, $11 million and $15 million for fiscal years 1971, 1972, and 1973, respectively, for demonstration and training grants, and $20 million for each of fiscal years 1971 through 1975 for construction grants; and places special emphasis on the need for facilities and services for the retarded in areas of urban and rural poverty. S. 2846. P/S 4/13/70. P/H amended 7/30/70. In conference.

Health Training Improvement Act of 1970.—Extends for 5 years and improves the Allied Health Professions Personnel Training Act of 1966 and authorizes for training of allied health professions personnel $79.25 million for fiscal year 1971, $97 million for fiscal year 1972, $118.25 million for fiscal year 1973, $138.5 million for fiscal year 1974, and $158.75 million for fiscal year 1975. Such funds are allocated to the categories of construction grants, basic improvement grants (formula), special project grants, advanced traineeships, development of new methods, utilization of educational talent, scholarship grants, work-study programs, and student loans; additionally creates a new emergency 1-year $100 million program of special project grants for certain medical and dental schools in financial distress. S. 3568. P/S 7/13/70. P/H amended 7/30/70. In conference.

Medical facilities construction and modernization amendments.—Authorized $1.29 billion in grants to the States for construction or modernization of hospitals and other health facilities for fiscal years 1971, 1972, and 1973; established a new 3-year program of guaranteed loans to cover up to 90% of the cost to private nonprofit agencies for medical facility construction or modernization and a program of direct loans for construction or modernization of public facilities and for such loans authorized $1.5 billion for fiscal years 1971, 1972, and 1973, but not more than $500 million per year; provided a new 3-year $20 million per year program of project grants to assist in the modernization or construction of emergency rooms in general hospitals and transportation systems; provides for reports on the health consequences of the use of marihuana; and made other legislative changes. Public Law 91–296.

Medical Library Assistance Extension Act.—Extended for 3 years the current program to provide financial assistance for the construction of health library facilities; to support training of health librarians and other information specialists; to expand and improve health library services through the provision of grants for library resources; to support projects of research and development in the field of health communications, and related special scientific projects; to support the development of a national system of regional medical libraries; and to support selected biomedical scientific publications projects; and authorized for funding these programs $63 million for fiscal years 1971 through 1973. Public Law 91–212.

Migrant health services.—Extended until June 30, 1973, the authority of the Public Health Service Act to improve health services and the health conditions of domestic agricultural migratory workers and their families, and provided for this purpose increased funding authorizations of $20 million for fiscal year 1971, $25 million for fiscal year 1972, and $30 million for fiscal year 1973. Public Law 91–209.

Poison Prevention Packaging Act.—Amends the Federal Hazardous Substances Act to provide for child-resistant packaging to protect children from serious personal injury or serious illness resulting from handling, using, or ingesting any hazardous household substance; authorizes the Secretary of Health, Education and Welfare to determine those substances to be specially packaged and to establish packaging performance standards; sets penalties for failure to conform to those standards; and creates a technical advisory committee to advise the Secretary. S. 2162. P/S 5/11/70.

Public Health Cigarette Smoking Act.—Prohibited all broadcast advertising of cigarettes after January 1, 1971; strengthened the warning on cigarette packages by changing it from "Caution: Cigarette Smoking May Be Hazardous to Your Health" to "Warning: The Surgeon General Has Determined That Cigarette Smoking is Dangerous to Your Health"; prohibited States from regulating cigarette advertising; and suspended until July 1971 a Federal Trade Commission rule which would require warnings in print cigarette advertising. Public Law 91–222.

Public health training.—Amended the Public Health Services Act to extend for three additional fiscal years the authority to make formula grants to schools of public health and authorized therefor $9 million, $12 million and $15 million for fiscal years 1971, 1972 and 1973, respectively; to extend through fiscal year 1973 project grants for graduate or specialized training in public health and authorized therefor $14 million, $15 million and $16 million for fiscal years 1971, 1972, and 1973, respectively; to extend for two fiscal years project grants for traineeships for professional health personnel and authorized therefor $16 million and $18 million for fiscal years 1972 and 1973, respectively. Public Law 91–208.

Water pollution compact

Potomac Valley Conservancy District Compact amendments.—Grants the consent of Congress to the States of Maryland and West Virginia and the Commonwealths of Virginia and Pennsylvania and the District of Columbia, as signatory bodies, for certain amendments to the compact creating the Potomac Valley Conservancy District and establishing the Interstate Commission on the Potomac River Basin. S.J. Res. 67. P/S 8/14/70. H.J. Res. 1179. H. Cal.

HOUSING

College housing debt service grants.—Provides an additional $2.6 million authorization for college housing interest subsidy grants, thereby making the total available for fiscal year 1971 $6.8 million. S.J. Res. 196. P/S 5/15/70.

Emergency Home Finance Act.—Increased the availability of mortgage credit for the financing of urgently needed housing; authorized $250 million to subsidize the interest on loans made by Federal home loan banks to savings and loan associations and other member borrowers of the Federal Home Loan Bank Board (FHLBB) system, and required the FHLBB to establish a maximum "spread" between the rate charged by the home loan bank and that charged by the savings and loan association, thus passing maximum benefits to the home buyer; expanded the scope of the Federal National Mortgage Association (FNMA) to include conventional as well as Federally insured and guaranteed mortgages in its secondary market operations; established an identical secondary market institution through the FHLBB for conventional and Federally insured and guaranteed mortgages; contained new Government National Mortgage Association (GNMA) special assistance authority amounting to $750 million and transferred another $750 million from the congressional authority to Presidential authority, and removed the existing par purchase restriction on the use of the $2 billion balance of funds now under congressional authority of the GNMA, thus making available for immediate use a total of $2.750 billion for Federally assisted low and moderate income housing; established a new interest subsidy program for middle-income housing through FNMA; renewed the authority of the Secretary of Housing and Urban Development to set the maximum allowable interest rates for FHA and VA mortgages; made technical changes designed to assist savings and loan associations to increase their deposits and thus make more mortgage funds available to the housing market. Public Law 91–351.

Loans to lessees of nonfarm rural land.—Authorizes the Farmers Home Administration to make rural housing loans under title V of the Housing Act of 1949 to lessees of nonfarm rural land. S. 3330. P/S 8/28/70.

Paraplegic housing program.—Authorizes the Veterans' Administration to make direct loans to eligible disabled veterans for assistance in acquiring specially adapted housing as defined in chapter 21 of title 38, United States Code. S. 3775. P/S 8/28/70.

INDIANS

Chemehuevi Tribe.—Authorizes the disposition of funds appropriated to pay a judgment in the amount of $996,834.81 awarded to the Chemehuevi Tribe of Indians in Indian Claims Commission dockets which funds were appropriated April 30, 1965. S. 4033. P/S 9/1/70.

Cherokee, Chickasaw, Choctaw and Seminole Nations of Oklahoma.—Provided that when a member, or the descendant of a member, of the Cherokee, Chickasaw, Choctaw, and Seminole Nations of Oklahoma dies without a will and has no heirs, his interest in any trust or restricted land, or in the rents therefrom, will escheat to the tribe. Public Law 91–240.

Choctaw Tribe, Oklahoma.—Repealed the act of August 25, 1969, with respect to the final disposition of the affairs of the Choctaw Tribe, Oklahoma. Public Law 91–386.

Coeur D'Alene Indian Reservation.—Authorizes the Secretary of the Interior to approve the sale, exchange, or encumbrance of tribal lands and to sell or exchange individually owned trust lands or interests therein held in multiple ownership to other Indians if the sale or exchange is authorized by the owners of at least a majority of the interests in such lands. S. 3487. P/S 9/1/70.

Confederated Tribes of the Umatilla Indian Reservation.—Authorized the Confederated Tribes of the Umatilla Indian Reservation to use a $2,450,000 judgment recovered against the United States in the Indian Claims Commission, and accumulated interest. Public Law 91–259.

Confederated Tribes of Weas, Piankashaws, Peorias and Kaskaskias.—Provided for a per capita distribution of 3 judgments by the Indian Claims Commission totaling $2,049,273 that have been recovered on behalf of the Confederated Tribes of Weas, Piankashaws, Peorias and Kaskaskias and provided that any per capita share the Secretary of Interior is unable to deliver within two years shall revert to the Peoria Tribe. Public Law 91–364.

Educational facilities for Indian children.—Authorizes the appropriation of $27,400,000 annually for each of fiscal years 1971, 1972 and 1973 to aid public school districts near Indian reservations in the construction of classrooms, housing and other necessary educational facilities for Indian children attending these schools. S.J. Res. 144. P/S 5/19/70.

Five Civilized Tribes and Osage Tribe of Oklahoma.—Amends certain Federal laws relating to the administration of the affairs of members of the Five Civilized Tribes and of the Osage Tribe in Oklahoma to remove a hiatus brought about by the adoption in Oklahoma of a constitutional amendment establishing a new judicial department for that State. S. 2362. P/S 4/30/70.

Five Civilized Tribes of Oklahoma.—Authorizes the Secretary of the Interior to convey to certain individual members of the Five Civilized Tribes interests in former restricted lands that were acquired by the United States pursuant to the Oklahoma Indian Welfare Act of 1936. S. 1498. P/S 4/27/70.

Five Civilized Tribes of Oklahoma.—Authorizes each of the Five Civilized Tribes of Oklahoma (Cherokee, Choctaw, Creek, Seminole and Chickasaw) to popularly elect their principal officers and makes clear that for purposes of developing election procedures the current leadership shall bear responsibility. S. 3116. P/S 4/27/70.

Fort Belknap Indian Irrigation Project, Montana.—Authorized the Secretary of the Interior to transfer title for the facilities of the Brown unit of the Fort Belknap Indian irrigation project to the owners of the lands served by the unit; provided that the landowners assume responsibility for operation and maintenance; cancelled all outstanding operation and maintenance charges and deferred construction charges on the project. Public Law 91–251.

Fort Belknap Indian Reservation, Montana.—Amends the Act of March 3, 1921, which provided for allotment of lands on the Fort Belknap Reservation, to provide for the reservation of all minerals for the benefit of tribal members in common. S. 786. P/S 5/15/70.

Fort Berthold Reservation, North Dakota.—Authorizes the mortgaging of tribal land on the Fort Berthold Reservation acquired after the date of enactment of this legislation and provides that resulting funds are to be used to buy lands within the reservation to improve the tribal land base. S. 774. P/S 5/11/70.

Hopi Indian Tribe, Arizona.—Gave the governing body of the Hopi Tribe the authorities it needs to develop the Hopi Industrial Park. Public Law 91–264.

Hualapai Tribe, Arizona.—Authorized the use of a judgment recovered against the United States by the Hualapai Tribe of Indians in Indians Claims Commission Docket No. 90. The net amount available is $2,974,612. H.R. 13434. Public Law 91– .

Inter-Tribal Council, Inc., Miami, Oklahoma.—Authorizes and directs the Secretary of the Interior to convey without consideration 114 acres of surplus Federal land in Oklahoma to an organization known as the Inter-Tribal Council Incorporated, Miami, Oklahoma, which will encourage labor-oriented industries to locate on this acreage, thus raising the socioeconomic level of the tribal members residing in the area through the creation of jobs and better housing. S. 886. P/S 5/15/70.

Lac Du Flambeau Band of Lake Superior Chippewa Indians, Wisconsin.—Conveys the beneficial interest in 40 acres of federally owned land to the Lac du Flambeau Tribe of Wisconsin, subject to valid existing rights-of-way and the right of the State of Wisconsin to use the fire observation tower located on the land for so long as needed and provides that the Indian Claims Commission will determine the extent to which the value of the beneficial interest conveyed should or should not be set off against any claims against the United States Government determined by the Commission. S. 1751. P/S 4/30/70.

Loans to Indian Tribes.—Provided authority for the Farmers Home Administration (FHA) to make loans to Indian tribes for the purchase of land within their reservations; permitted any tribe to mortgage its land as security for such a FHA loan; permitted the tribe to waive immunity from suit without its consent as a part of its loan agreement; excepted trust lands from the FHA Act provision that land mortgaged to secure a loan shall be subject to local taxation; permitted the title to land acquired with loan funds to be taken in trust; provided that in addition to making direct loans from its direct loan account the FHA may insure loans to tribes made by commercial lending institutions; specified that the eight Indian Reorganization Act corporations in Alaska are eligible for loans to buy land although they do not have reservations. Public Law 91–229.

Potawatomi Indians.—Authorized the use of a judgment against the United States recovered by the Citizen Band of Potawatomi Indians of Oklahoma in an Indian Claims Commission Docket, the net amount available being $723,111. H.R. 14097. Public Law 91– .

Quapaw Indians, Oklahoma.—Extended for an additional period of 25 years from March 3, 1971, the restrictions, tax exemptions, and limitations affecting lands of the Quapaw Indians in Oklahoma that were extended to that date by the act of July 27, 1939. Public Law 91–290.

Reno-Sparks Indian Colony, Nevada.—Grants to the Reno-Sparks Indian Colony in Nevada the beneficial interest in and to 28.38 acres of land the colony has been using and occupying since the land was acquired by the Federal Government by purchase from private individuals for use as homesites for nonreservation Indians, and authorizes the governing body of the colony, with the approval of the Secretary of the Interior, to make long-term leases of land to members for homesites, dedicate lands for public purposes, contract for public facilities and other services, enact zoning, building, and sanitary regulations, and take action to establish proper boundaries of the colony lands. S. 3196. P/S 9/1/70.

Sac and Fox Tribes of Oklahoma.—Authorized the use of a judgment against the United States recovered by the Sac and Fox Tribes of Oklahoma in an Indian Claims Commission Docket, the net amount available, including accrued interest, amounting to $703,345. H.R. 14827. Public Law 91– .

Sioux Tribe of the Fort Peck Indian Reservation, Montana.—Provided for a per capita distribution among the members of the tribe of a judgment of $1,161,354.41 against the United States recovered by the tribe. Public Law 91–283.

Snohomish, Upper Skagit, and Snoqualmie-Skykomish Tribes.—Disposes of three separate awards of the Indian Claims Commission to the Snohomish, Upper Skagit, and Snoqualmie-Skykomish Tribes, in the total amount of $779,335.50. S. 4078. P/S 9/1/70.

Tlingit and Haida Indians of Alaska.—Authorized the disposition of funds (previously appropriated, invested and amounting to $7 million) awarded to the Tlingit and Haida Indians of Alaska by a judgment against the United States for land taken, principally the Tongass National Forest. Public Law 91–335.

Tulalip Reservation, Washington.—Gave the Tulalip Tribes of the Tulalip Reservation in Washington additional authority to acquire, manage, and dispose of tribal property. Public Law 91–274.

Ute Tribe.—Authorized the Secretary of the Interior to reimburse the Ute Indian Tribe of the Uintah and Ouray Reservation for tribal funds that have been used for the construction, operation, and maintenance of the Uintah Indian irrigation project, Utah; authorizes the payment of interest on the tribal funds used; and transfers the title to four pieces of land purchased by the United States in connection with this project to the United States to be held in trust for the tribe. H.R. 16416. Public Law 91– .

Ute Tribes.—Provides for the disposition of funds appropriated to pay a judgment in favor of the Confederated Bands of Ute Indians in the Court of Claims, and a judgment in favor of the Ute Tribe of the Uintah and Ouray Reservation for and on behalf of the Uncompahgre Band of Ute Indians in an Indian Claims Commission docket. S. 3997. P/S 9/1/70.

Washoe Tribe of Nevada and California.—Set aside 80 acres of public domain in Alpine County, California, to carry out a program to assist certain Washoe Indians. Public Law 91–362.

Yakima Tribes.—Provides for the disposition of three awards totaling $2,210,991.40 awarded to the Yakimas by the Indian Claims Commission as compensation for the value of reservation lands omitted through erroneous surveys of the boundaries of the Yakima Indian Reservation established by the treaty of June 9, 1855. S. 3337. P/S 5/15/70. H.R. 15469. H. Cal.

Yavapai-Prescott Community Reservation, Arizona.—Authorized lands on the Yavapai-Prescott Community Reservation to be leased for periods up to 99 years if a long-term lease will be in the best interest of the Indian owner. Public Law 91–275.

INTERNATIONAL

American Prisoners of War in Southeast Asia.—Placed the Congress on record in support of humane treatment for the United States prisoners of war and focused world attention on the failure of North Vietnam and the National Liberation Front to comply with the provisions of the Geneva Convention on the treatment of prisoners of war. H. Con. Res. 454. House adopted 12/15/69. Senate adopted 2/18/70.

Arms Control and Disarmament Act Amendments.—Authorized the appropriation of $17.5 million for fiscal years 1971 and 1972 for operations of the Arms Control and Disarmament Agency. Public Law 91–246.

Convention of offenses and certain other acts committed on board aircraft—implementing legislation.—Amends the Federal Aviation Act of 1958 to permit the United States to implement certain provisions of the Tokyo Convention, which was approved by the Senate on May 13, 1969 and is designed to promote aviation safety through establishment of continuity of jurisdiction over criminal acts occurring onboard aircraft. S. 2176. P/S 8/13/70.

Convention relating to arbitral awards—implementing legislation.—Implemented the Convention on the Recognition and Enforcement of Foreign Arbitral Awards which was approved by the Senate on October 4, 1968, creating a new chapter under title 9 of the United States Code (the Federal Arbitration Act) dealing exclusively with the recognition and enforcement of awards pursuant to the provisions of the convention. Public Law 91–368.

Gulf of Tonkin Resolution—termination.—Provides that under the authority of section 3 of the joint resolution commonly known as the Gulf of Tonkin Resolution and entitled "Joint resolution to promote the maintenance of international peace and security in Southeast Asia", such joint resolution shall be terminated effective upon approval of both Houses of Congress. S. Con. Res. 64. Senate adopted 7/10/70.

International biological program.—Authorizes all Federal departments and agencies having functions or objectives related to the International Biological Program (IBP) to obligate or transfer money from appropriate funds and to provide such other support as may be appropriate to that effort; expresses the support and endorsement of the Congress for the International Biological Program; and declares that the provision by the United States of adequate financial and other support for the IBP is a matter of priority. H.J. Res. 589. P/H 11/12/69. P/S amended 8/3/70.

International expositions.—Established a Federal procedure for determination of endorsement of and participation in international expositions held in the United States; called on the President to make findings as to official recognition of a domestically pro-

posed international eposition and to submit to Congress such proposals considered appropriate for Federal participation; and authorized appropriations not to exceed $200,000 in any fiscal year. Public Law 91–269.

Military sales—limitations on United States involvement in Cambodia.—Authorizes $250 million for foreign military sales for each of fiscal years 1970 and 1971 and sets a credit ceiling of $300 million in each of those fiscal years; places limitations on United States involvement in Cambodia; repeals the Gulf of Tonkin resolution effective at the end of the second session of the 91st Congress; requires that any sale or grant of the "International Fighter" aircraft, other than to Vietnam or sales through commercial channels, be made under the regular military grant aid and sales programs; places a $35 million ceiling on the amount of excess defense articles that may be given to foreign countries in any fiscal year; and makes other changes in, or additions to, existing law. H.R. 15628. P/H 3/24/70. P/S amended 6/30/70. In conference.

Pan American Institute of Geography and History.—Authorized an increase in the United States annual contributions to the Pan American Institute of Geography and History from $90,300 to $200,000 and authorized the appropriation of $386,050 for the payment of arrearages incurred during fiscal years 1965–1969. Public Law 91–340.

Peace Corps Act amendments.—Authorized $98.8 million for activities of the Peace Corps in fiscal year 1971; proposed new authorities to attract more highly skilled married volunteers with children; broadened the language of the Peace Corps Act to encourage the development of, and participation in, international voluntary service programs and activities and authorized up to $300,000 therefor in fiscal year 1971. Public Law 91–352.

Retirement age for Foreign Service career ministers.—Amends the Foreign Service Act of 1946 to lower the mandatory retirement age of career Ministers from age 65 to 60 except while serving in positions to which they have been appointed by the President, by and with the advice and consent of the Senate; and to provide for a retirement schedule for those career Ministers who are now past the mandatory retirement age. S. 3691. P/S 6/19/70.

Suspension of further deployment of offensive and defensive nuclear strategic weapons systems.—Expressed the sense of the Senate that prompt negotiations between the Governments of the United States and the Soviet Union to seek agreed limitations of both offensive and defensive strategic weapons should be urgently pursued, and that the President of the United States should propose to the Government of the Soviet Union an immediate suspension by the United States and the Soviet Union of the further deployment of all offensive and defensive nuclear strategic weapons systems, subject to national verification or such other measures of observation and inspection as may be appropriate. S. Res. 211. Senate adopted 4/9/70.

Treaties

Convention on the Privileges and Immunities of the United Nations.—Accords certain privileges and immunities to the United Nations, as an organization, and to the representatives of its Members, officials of the United Nations, and experts on missions for the United Nations; for the most part, these privileges and immunities have already been conferred upon the United Nations through the Internation Organizations Immunities Act of 1945 and the Headquarters Agreement of 1947. Ex. J (91st, 1st). Resolution of ratification agreed to 3/19/70.

Extradition treaty with New Zealand.—This treaty follows generally the form and content of extradition treaties recently concluded by the U.S. Government. Under its coverage are 32 extraditable offenses including, for the first time, aircraft hijacking and offenses relating to narcotics and other dangerous drugs. Ex. C (91st, 2d). Resolution of ratification agreed to 5/27/70.

Intellectual and industrial property conventions.—Both of the following refer to patents and copyrights: (1) The Convention Establishing the World Intellectual Property Organization is to be responsible for the overall administrative activities of related organizations and the promotion of the protection of intellectual property on a worldwide basis, and (2) the Paris Convention for the Protection of Industrial Property revised the Industrial Property Convention to bring its finances and structure and that of its Secretariat into line with the more modern principles of international organization. Ex. A (91st, 1st). Resolution of ratification agreed to 2/28/70.

Protocol to the Northwest Atlantic Fisheries Convention.—Provides for the removal of the Convention's current restrictions relating to (1) the number of commissioners on each of the special panels established by the Convention; and (2) the kinds of measures which the International Commission for the Northwest Atlantic Fisheries may propose in order to achieve optimum utilization of fish stocks in the Convention area. Ex. I (91st, 1st). Resolution of ratification agreed to 3/19/70.

Radiotelephone stations agreement with Canada.—Provides for the reciprocal issuance of permits by the United States and Canada to licensed private operators of radiotelephone stations of one country while temporarily in the jurisdiction of the other. Ex. A (91st, 2d). Resolution of ratification agreed to 5/27/70.

United Nations Headquarters expansion.—Authorizes a $20 million appropriation to the Secretary of State for a grant to be made to the United Nations to defray a portion of the cost of the expansion and improvement of its headquarters in New York City. S.J. Res. 173. P/S 7/10/70.

U.S.-U.S.S.R. political exchange program.—Assists governmental officials of the United States and the Soviet Union through means of exchange of visits in making better informed judgments about world affairs involving the two countries; authorizes travel to the U.S.S.R. for not more than 1,000 elected U.S. officials—including Members of Congress—and their spouses during a period of 5 years beginning February 1, 1971; provides for efforts to facilitate comparable trips to the United States by Soviet officials; authorizes up to $5 million for the program over the 5-year period. S. 3127. P/S 4/20/70.

Water pollution research—Fifth International Conference.—Seeks the cooperation of the Federal and State Governments and all interested persons and organizations to assist in the Fifth International Conference on Water Pollution to be held in San Francisco, California, from July 26 through August 1, 1970, and which will be reconvened in Honolulu, Hawaii, from August 2 through August 5, 1970. S.J. Res. 162. P/S 3/19/70.

JUDICIAL

Additional district judges.—Provided for the creation of 58 new permanent district judgeships throughout the United States and made amendments to the Judicial Code to enable the Federal courts more efficiently and expeditiously to handle the business brought before them. Public Law 91–272.

Civil Rights Commission authorization.—Increases the annual authorization of the Civil Rights Commission from $2,650,000 to $3.400,000 for each fiscal year, beginning with fiscal year 1970, and ending with January 31, 1973, the termination date of the Commission, to reflect statutory pay increases and other increases in expenses; increases the per diem amount payable to Commission members and consultants from $75 to $100; amends the Civil Rights Act of 1957 to provide that any person defamed, degraded, or incriminated by a Commission report shall be provided an opportunity to answer the charges or allegations contained therein, and that said answer shall be annexed to the Commission report. S. 2455. P/S 7/14/70. H. Cal.

Copyright protection extension.—Continues until December 31, 1971 the renewal term of any copyright subsisting on the date of this resolution, or the term as previously extended by Public Law 87–668, Public Law 89–442, Public Law 90–141, Public Law 90–416, Public Law 91–147. S.J. Res. 230. P/S 8/17/70.

Customs Courts Act.—Modernized procedures in the Customs Court and related administrative processes in the Bureau of Customs so that the Court and the Bureau will be better able to cope effectively and expeditiously with their rapidly expanding workload. Public Law 91–271.

Federal Youth Corrections Act.—Amended the Federal Youth Corrections Act to permit examiners to conduct interviews with youth offenders. Public Law 91–339.

Immigration and Nationality Act amendments.—Facilitated the entry into the United States of certain classes of non-immigrant aliens and altered the provisions of the Act regarding the applicability of the two-year foreign residence requirement for aliens in the United States as exchange visitors. Public Law 91–225.

Immigration and Nationality Act amendments.—Struck from section 213 of the Immigration and Nationality Act the requirement that cash accepted by the Attorney General, under his discretionary authority to admit certain excludable aliens upon the giving of a bond or posting of cash, be deposited in the postal savings system and provided instead that the cash received as security on bonds be deposited in the Treasury with interest thereon payable at a rate not to exceed 3 percent per annum. Public Law 91–313.

Jurisdiction of U.S. courts—contract claims.—Provided courts of the United States with jurisdiction over contract claims against the following nonappropriated fund activities: Army and Air Force Exchange Service; Navy, Marine Corps, and Coast Guard exchanges; and exchange councils of the National Aeronautics and Space Administration and required that the United States be reimbursed for any judgments it pays as a result of a contract claim against one of the specified instrumentalities of the United States. Public Law 91–350.

Mississippi District Court

Provided for holding terms of the United States District Court for the Southern District of Mississippi at Gulfport, Mississippi. S. 3122, P/S 6/26/70.

Provided for holding terms of the United States District Court for the Western Division of the Southern District of Mississippi at Natchez, Mississippi. S. 3225. P/S 8/20/70.

Newspaper Preservation Act.—Provided, under certain conditions, for exempting from the antitrust laws, price fixing, profit pooling, and market division by competing newspapers if not more than one newspaper involved is a newspaper other than one "in probable danger of financial failure" or at the time a joint newspaper operation was entered into not more than one of the newspapers involved "was likely to remain or become a financially sound publication." Public Law 91–353.

United States land titles.—Amends section 355 of the Revised Statutes, as amended, to provide that the Attorney General is to be responsible for the approval of the sufficiency of titles to land acquired by the United States and that he may delegate this authority to other departments and agencies,

subject to his general supervision and regulation; to preserve the existing law permitting the Tennessee Valley Authority to approve land titles as to land acquired by that Authority; and for other purposes. H.R. 15374. Public Law 91– .

Voting Rights Act Extension.—Extended the Voting Rights Act of 1965 for 5 years; extended the suspension of literacy tests and of other tests and devices to all states; limited residence requirements for voting in presidential elections by establishing nationwide, uniform standards for such elections; and lowered the voting age to 18 in Federal, State and local elections. Public Law 91–285.

LABOR

Railroad Adjustment Board.—Amended the Railroad Labor Act to revise the organizational structure of the first division of the National Railroad Adjustment Board made necessary by the merger of unions representing the trainmen, firemen, conductors, and switchmen into a new union, the United Transportation Union. Public Law 91–234.

Railroad Retirement.—Provided for a tax on railroad employers to cover the costs of the supplemental annuity program for employees; placed that program on a permanent basis; and provided that any individual who renders service as an employee for compensation after the "supplemental annuity closing date" applicable to him will not be entitled to a supplemental annuity. Public Law 91–215.

Railroad Retirement Act Amendments.—Amended the Railroad Retirement Act of 1937 to provide temporarily (until June 30, 1972) a 15 percent increase in annuities retroactive to January 1, 1970; provided that a study of the railroad retirement system and its financing shall be made by a 5-member Commission which is to submit its recommendations to the President and to Congress no later than July 1, 1971; and, in order to produce additional income for the retirement account, provided for a change in the procedure under which special obligations issued to the retirement account are redeemed to make benefit payments, as well as a change in the interest computation rate on obligations to the account. Public Law 91–377.

Railway labor-management dispute.—Prevented a nationwide strike on railroads throughout the United States scheduled to occur at midnight, March 3, 1970, and provided that for the 37-day period beginning with the enactment of this legislation (until April 11, 1971), strikes and lockouts occurring as a result of this dispute were prohibited. Public Law 91–203.

Railway labor-management dispute.—Prevented a nationwide strike on railroads throughout the United States which was previously prohibited by Public Law 91–203 by putting into effect a "memorandum of understanding," dated December 4, 1969, which memorandum was agreed to by the railroads and negotiators for the four shopcraft unions involved in the dispute and which is subject to renegotiation commencing September 1, 1970, for changes effective on or after January 1, 1971. Public Law 91–226.

MEMORIALS AND TRIBUTES

Apollo 13 astronauts.—Expressed the Senate's commendation of the Apollo 13 astronauts—James Lovell, John L. Swigert, Jr., and Fred W. Haise, Jr.—for their fortitude and courage; extended support to their families, friends and all involved in their mission; and urged all who wished to and could comply to pause at 9 a.m., April 14, 1970, to ask the help of God in assuring the safe return of the astronauts. S. Res. 388. Senate adopted 4/14/70.

Commendation of heroism of airline pilots.—Expressed the sense of the Senate that Eastern Airlines Captain Robert M. Wilbur, Jr., and his co-pilot, the late James E. Hartley, be commended for their heroic action in averting a major air disaster on March 17, 1970. S. Res. 375. Senate adopted 3/24/70.

Everett McKinley Dirksen Building.—Named the existing Federal Office Building and United States Courthouse in Chicago, Illinois, in memory of the late Everett McKinley Dirksen, who served as a Member of Congress from Illinois from 1933 to 1969. Public Law 91–237.

Goddard Rocket and Space Museum.—Provides congressional recognition of the Goddard Rocket and Space Museum of the Roswell Museum and Art Center, Roswell, New Mexico, as a fitting memorial to Dr. Robert H. Goddard, an outstanding pioneer in American rocketry. S. Con. Res. 49. Senate adopted 4/7/70. H. Cal.

Harry S. Truman Dam and Reservoir, Missouri.—Renamed the Kaysinger Bluff Dam and Reservoir, Osage River Basin, Missouri, in honor of the 33rd President of the United States, the Honorable Harry S. Truman. Public Law 91–267.

Honor America Day.—Granted Congressional recognition to the importance of the July 4, 1970, Honor America Day celebrations and called upon the people of the United States to observe such celebrations with appropriate ceremonies and activities. H. Con. Res. 669. House adopted 6/29/70. Senate adopted 7/1/70.

Jose Antonio Navarro Commemorative Medals.—Authorized the Secretary of the Treasury to strike and furnish to the San Antonio Conservation Society, without cost to the Federal Government, not more than 100,000 medals in commemoration of the many contributions to the founding and early development of the State of Texas and the city of San Antonio by Jose Antonio Navarro. Public Law 91–244.

Mary McLeod Bethune memorial.—Extended for 4 years the existing authority for the erection in the District of Columbia of a memorial in honor of Mary McLeod Bethune, a prominent Negro educator, and in commemoration of the 100th anniversary of the signing of the Emancipation Proclamation. Public Law 91–277.

Newt Graham Lock and Dam.—Designates lock and dam No. 18 on the Verdigris River, Oklahoma, as the Newt Graham lock and dam, and the lake created thereby as the Newt Graham Lake, in honor of Newton R. Graham who contributed to the comprehensive development of the Arkansas River Basin. S. 1500. P/S 5/25/70.

Ohio Northern University Commemorative Medals.—Authorized the Secretary of the Treasury to strike and furnish to Ohio Northern University not more than 16,000 national medals commemorating the 100th anniversary of the founding on August 15, 1871, of Ohio Northern University, located in Ada, Ohio. Public Law 91–381.

Ohio Northern University's 100th anniversary.—Extended Congress' congratulations and greetings to Ohio Northern University on the occasion of the 100th anniversary of its founding. H. Con. Res. 575. House adopted 4/29/70. Senate adopted 6/26/70.

Ohio State University's 100th anniversary.—Extended Congress' congratulations and greetings to Ohio State University on the occasion of the 100th anniversary of its founding. H. Con. Res. 573. House adopted 4/29/70. Senate adopted 6/26/70.

Peruvian earthquake.—Extended the sympathy of the Senate to the President and the people of Peru in the hour of their suffering and distress resulting from an earthquake on May 31, 1970, causing loss of thousands of lives and destruction or devastation of many towns and villages, rendering homeless and destitute many thousands of people. S. Res. 424. Senate adopted 6/29/70.

Pick-Sloan Missouri River Basin program.—Designates the comprehensive Missouri River Basin development program as the Pick-Sloan Missouri Basin program in honor of W. G. Sloan and General Lewis A Pick who contributed to the development of the water resources of the Nation and the Missouri River Basin. S. 1100 P/S 5/25/70.

Senate Majority Leader Mike Mansfield.—Extended to Mike Mansfield the gratitude and admiration of the Senate for his outstanding performance as a Senator and as a Majority Leader, whereas he completed, on June 19, 1970, 9 years and 167 days as Majority Leader of the United States Senate, a period of service exceeding that of any previous Majority Leader in the history of the United States Senate. S. Res. 423. Senate adopted 6/25/70.

Stone Mountain Memorial Medals.—Authorized the Secretary of the Treasury to strike and furnish to the Stone Mountain Memorial Foundation, without cost to the Federal Government, not more than 500,000 medals in commemoration of the completion of the carvings on Stone Mountain, Georgia, depicting heroes of the Confederacy. Public Law 91–254.

Tribute to General Omar N. Bradley and Allied World War II victory in Europe.—Expressed the sense of Congress that, on the occasion of the 25th anniversary of V–E Day, and the formal opening of the General Omar N. Bradley historical collection, appropriate ceremonies be conducted at Carlisle Barracks, Pennsylvania. H. Con. Res. 207. House adopted 5/19/69. Senate adopted 2/10/70.

U.S.S. "Utah".—Authorizes the Secretary of the Navy to take such action as is necessary to provide for erection of a flagpole on the remains of the battleship, U.S.S. "Utah", the flying of the American flag over the remains of such battleship and the raising and lowering of such flag each day—such action in honor of the heroic men entombed in her hull on December 7, 1941. S. 583. P/S 7/10/70.

William "Bill" Dannelly Reservoir, Alabama.—Changes the name of the Miller Ferry lock and dam, Alabama River, Alabama, as a tribute to Judge William "Bill" Dannelly, for his role in the development of the water resources of the Alabama-Coosa River Basin. S. 528. P/S 5/22/70.

William G. Stone Navigation Lock, California.—Designates the lock on the Sacramento deepwater ship channel in the State of California as the William G. Stone navigation lock in honor of the late William G. Stone, whose efforts contributed so much to the development of this important project. S. 3192. P/S 7/21/70.

Harry A. Blackmun to be an Associate Justice of the Supreme Court of the United States—Nomination confirmed 5/12/70. (94–0).

George Harrold Carswell to be an Associate Justice of the Supreme Court of the United States.—Nomination rejected 4/8/70 (45–51).

Admiral Thomas H. Moorer to be Chairman of the Joint Chiefs of Staff for a term of two years.—Nomination confirmed 6/17/70 (78–2).

PROCLAMATIONS

American prisoners of war and servicemen missing in action in Southeast Asia.—Expressed the sense of Congress that May 1, 1970, be commemorated as a day for an appeal for international justice for all American prisoners of war and servicemen missing in action in Southeast Asia; that avenues be sought to insure treatment of these men in accord with the Geneva Convention standards; that every possible effort be made to secure their early release from captivity; and that the President designate Sunday, May 3, 1970, as a National Day of Prayer for humane treatment and the safe return of these brave Americans. H. Con. Res. 582. House adopted previous Majority Leader in the history of House agreed to Senate amendments 4/28/70.

Clean Waters for America Week.—Authorizes the President to issue annually a proclamation designating the first full cal-

endar week in May of each year as "Clean Waters for America Week." S.J. Res. 172. P/S 2/17/70.

International Clergy Week.—Authorized and directed the President to issue a proclamation designating the week commencing February 1, 1970, as "International Clergy Week in the United States." Public Law 91–192.

International Petroleum Exposition.—Authorizes and requests the President to invite by proclamation or otherwise the States and foreign nations to participate in the International Petroleum Exposition to be held in Tulsa, Oklahoma, from May 15 through May 23, 1971, for the purposes of exhibiting machinery, equipment, supplies, and other products used in the production and marketing of oil and gas and bringing together buyers and sellers for the promotion of foreign and domestic trade and commerce for such products. S.J. Res. 127. P/S 2/17/70.

Mineral Industry Week.—Authorized and requested the President to issue a proclamation designating the period of February 13–19, 1970, as "Mineral Industry Week." Public Law 91–195.

National Arbor Day.—Authorized the President to proclaim the last Friday of April 1970 as "National Arbor Day" and called upon the people of the United States to observe such day with appropriate ceremonies and activities. Public Law 91–236.

National Machine Tool Week.—Authorized the President to designate the period beginning September 20, and ending September 26, 1970, as "National Machine Tool Week." H.J. Res. 1194. Public Law 91– .

National park centennial year.—Requested the President to issue a proclamation designating 1972 as "National Park Centennial Year" and created a special commission to prepare and execute the plans for the commemoration of the 100th anniversary of the establishment of the world's first national park, Yellowstone, on March 1, 1872. Public Law 91–332.

RESOURCE BUILDUP

Anadromous Fish Conservation Act amendments.—Extended and expanded the program for the conservation, development, and enhancement of the Nation's anadromous fish and the fish in the Great Lakes that ascend streams to spawn; and authorized for the program $6 million, $7.5 million, $8.5 million and $10 million for fiscal years 1971, 1972, 1973, and 1974, respectively. Public Law 91–249.

Arches National Park, Utah.—Establishes the Arches National Park in the State of Utah, consisting of some 73,154 acres, the greater part of which are now in Federal ownership, and protects, for a limited period, existing uses respecting grazing and the trailing and water of livestock. S. 532. P/S 7/1/70.

Canyonlands National Park, Utah.—Extends the boundaries of the Canyonlands National Park by adding to the park approximating 257,640 acres four additional tracts which, for the most part, are public lands totaling approximately 79,618 acres. S. 26. P/S 7/15/70.

Cape Cod National Seashore, Massachusetts.—Authorized the appropriation of an additional $17,401,000 to assure the acquisition of all remaining non-Federal lands needed to make the Cape Cod National Seashore a meaningful unit of the national park system. Public Law 91–252.

Capitol Reef National Park, Utah.—Establishes the Capitol Reef National Park in the State of Utah and provides for a total park area of 230,837 acres. S. 531. P/S 7/1/70.

Central and Western Pacific Tuna Fishery Development Act.—Authorizes the Secretary of the Interior to institute a 3-year program for the development of latent tuna resources of the central and western Pacific and authorizes to be appropriated for the period July 1, 1970, to June 30, 1973, the sum of $3 million to remain available until expended. S. 3176. P/S 5/22/70.

Classification and Multiple Use Act and the Public Land Sale Act extensions.—Extends the Classification and Multiple Use Act and the Public Land Sale Act for a period of 5 years to December 31, 1975. S. 3728. P/S 7/8/70.

Coral reefs conservation.—Authorizes the Secretaries of Interior and the Smithsonian Institution to expend $4.5 million until June 30, 1970 in cooperation with the territories of Guam, American Samoa, the Trust Territory of the Pacific Islands, other United States territories in the Pacific Ocean, and the State of Hawaii, for the conservation of their protective and productive coral reefs. The bill is designed to control the devastating crown of thorns starfish which has been destroying coral reefs. S. 3153. P/S 4/27/70. H. Cal.

Craters of the Moon National Monument, Idaho.—Designates 40,785 acres of the Craters of the Moon National Monument in Idaho as part of the national wilderness preservation system, pursuant to provisions of the Wilderness Act (Public Law 88–577). S. 1732. P/S 6/15/70.

East Greenacres Unit, Rathdrum Prairie Project, Idaho.—Authorized construction, Idaho, which unit would supply irrigation water to 5,230 acres and municipal and industrial water, and provide fish and wildlife conservation and public recreation benefits. Public Law 91–286.

Everglades National Park, Florida.—Provides for acquisition by the National Park Service of the remaining inholdings within the Everglades National Park boundaries consisting of some 58,400 acres of privately owned lands and for such land purchases authorizes an additional $20 million. S. 2565. P/S 7/10/70.

Falls of the Ohio Interstate Park compact.—Granted the consent of Congress to the Falls of the Ohio Interstate Park Compact to carry out an agreement between Indiana and Kentucky to create and develop an interstate park known as Falls of the Ohio Interstate Park, located on the Ohio River in Clark and Floyd Counties, Indiana, and Jefferson County, Kentucky, and to create a six-member commission to operate the park. H.R. 13971. Public Law 91– .

Federal Water Pollution Control Act amendments.—Amended the Federal Water Pollution Control Act to declare a U.S. policy that there should be no oil discharges into navigable waters of the U.S., adjoining shorelines or waters of the contiguous zone; to authorize the President to determine by regulation what harmful quantities of oil cannot be discharged without violation of the Act, and to designate those discharges, other than oil, which constitute dangerous substances; to provide penalties for failure to give proper notification of a knowing discharge of oil and violation of restrictions; to authorize the President to act to remove oil unless properly done by the responsible owner or operator; to provide for a National Contingency Plan for removal of oil; to provide, in the event a marine disaster has created a substantial threat of a pollution hazard, for removal of the threat; and, unless an act of God, war, U.S. government negligence or an act or omission of a third party be shown, liability to the U.S. for a discharge shall be not to exceed $100 per gross ton or $14 million, whichever is lesser, for a vessel and $8 million for an onsore or offshore facility, unless the discharge resulted from willful negligence or misconduct, when there shall be full liability for the costs. The Act also includes provisions for control of sewage from vessels, area acid and other mine water pollution control demonstrations; pollution control in the Great Lakes; training grants and contracts with institutions for training in water quality control; Alaska village demonstration projects; cooperation by all federal agencies in the control of pollution; and establishment of an Office of Environmental Quality. Public Law 91–224.

Fisheries Loan Fund extension.—Amended the Fish and Wildlife Act of 1956 to extend the life of the fisheries loan fund an additional 10 years, from June 30, 1970, until June 30, 1980. Public Law 91–387.

Ford's Theatre National Historical Site.—Designated Ford's Theatre, the Lincoln Museum, and the House Where Lincoln Died, as the Ford's Theatre National Site, and added to that complex certain property in the District of Columbia adjacent to the Theatre. Public Law 91–288.

Glen Canyon National Recreation Area, Arizona and Utah.—Affords permanent, statutory protection to the scenic Glen Canyon National Recreation Area, which is presently administered under an Executive Order. S. 27. P/S 7/15/70.

Golden Eagle program.—Renewed until December 31, 1971, the Golden Eagle passport program but increased from $7 to $10 the annual cost of the permit allowing entry into Federally administered outdoor recreation areas and provided advance contract authority to enable Federal agencies to acquire land for outdoor recreation. Public Law 91–308.

Historic properties.—Extended the national historic preservation program established by Congress in 1966 (Public Law 89–665) and authorized appropriations of $7 million, $10 million and $15 million for fiscal years 1971, 1972 and 1973, respectively; provided for an increase in the size of the Advisory Council on Historic Preservation; authorized limited United States participation in the International Centre for the Study of the Preservation and Restoration of Cultural Property, and in this connection, authorized a maximum appropriation of $100,000 in each of fiscal years 1971, 1972, and 1973. Public Law 91–243.

Homestead National Monument, Nebraska.—Provides for the addition of the Freeman School and the 1.2 acres of land on which it is situated to the Homestead National Monument of America in Nebraska. S. 58. P/S 4/27/70.

Hudson River compact negotiations.—Extended until 1973 provisions of the act of September 26, 1966, which expired on September 26, 1969, with respect to applications for a license for an activity which may affect the resources of the Hudson Riverway and required the Secretary of the Interior to report on the progress of the negotiations on the Hudson River Compact by July 1, 1970, and annually thereafter. Public Law 91–242.

Lake Tahoe, Nevada and California.—Authorizes the Secretary of the Interior to study the feasibility and desirability of establishing a national lakeshore on Lake Tahoe in the State of Nevada and California with the objective of providing legislation to preserve in perpetuity the superb scenic and recreational facilities available in the Lake Tahoe area. S. 2208. P/S 5/13/70. H. Cal.

Marine Resources and Engineering Development Act Amendments.—Designed to extend to June 30, 1971 the National Council on Marine Resources and Engineering Development which expired on June 30, 1970. S. 3617. P/S 7/10/70. H.R. 16607. H. Cal.

Middle Snake River.—Suspends for 8 years the authority of the Federal Power Commission to accept applications or grant licenses or permits under the Federal Power Act for the construction of hydroelectric power projects on the reach of the Middle Snake River extending along the Idaho-Oregon and Idaho-Washington borders for 100 miles between the existing Hells Canyon Dam and the authorized Asotin Dam. S. 940. P/S 5/15/70.

Missouri River Basin.—Authorized appropriations of $32 million for fiscal years 1971 and 1972 (including $13,838,000 in the fiscal year 1971 budget) to continue the program of the Bureau of Reclamation for investigations and construction of the comprehen-

sive plan for the Missouri River Basin project. Public Law 91-218.

Missouri River Basin Project, Minot Extension, Garrison Diversion Unit, North Dakota.—Authorizes construction, operation, and maintenance of the Minot extension of the Garrison diversion unit, Missouri River Basin project. S. 2808. P/S 7/10/70. H.R. 16987. H. Cal.

Mount Baldy, Pine Mountain, and Sycamore Canyon Wilderness, Arizona.—Designates areas in three national forest primitive areas in Arizona as the Mount Baldy Wilderness, the Pine Mountain Wilderness, and the Sycamore Canyon Wilderness, as part of the national wilderness preservation system, in accordance with the provisions of the Wilderness Act of September 3, 1964. S. 710. P/S 6/12/70.

Narrows Unit, Missouri River Basin Project, Colorado.—Authorized construction, operation, and maintenance of the Narrows unit of the Missouri River project, which would be located on the South Platte River, in northwestern Colorado to supply supplemental irrigation water to 166,370 acres and to provide flood control, fish and wildlife conservation, and recreation benefits and potential future municipal and industrial water supplies; authorized $68,050,000 for construction of the Narrows unit. S. 3547. Public Law 91- .

National Park System Administration.—Updated and clarified the law with respect to the administration by the Secretary of the Interior of the various units of the national park system. Public Law 91-383.

Pacific marine fisheries compact amendments.—Granted the consent and approval of the Congress to amendments to the Pacific marine fisheries compact as follows: by recognizing the adherence of the States of Idaho and Alaska to the compact in addition to the three original member States (California, Oregon, and Washington); modifying the reference to the Pacific Ocean by the additional wording "and adjacent waters" in recognition of the State of Alaska's jurisdiction over the Bering Sea; and providing a more equitable way of apportioning costs of the activities of the Pacific Marine Fisheries Commission. Public Law 91-315.

Point Reyes National Seashore, California.—Authorized the appropriation of an additional $38,365,000 to assure the acquisition of all remaining non-Federal lands needed to make the Point Reyes National Seashore a meaningful unit of the national park system. Public Law 91-223.

Public ownership of lands in Federal reclamation projects.—Clarified the acreage limitation provisions of the Federal reclamation laws with respect to lands owned by a State or local government entity or subdivision. Public Law 91-310.

Resource Recovery Act of 1970.—Amends the Solid Waste Disposal Act to emphasize recycling, local planning, and training functions; authorizes research programs of $31.5 million, $40.5 million, $40 million and $38.5 million for fiscal years 1971, 1972, 1973 and 1974, respectively; replaces 50 percent State grants for planning activities with 66⅔ percent grants to single municipalities and States, and 75 percent grants for planning solid waste programs in the area of more than one municipality or State; provides that grants may be used for (1) making surveys of solid waste problems, (2) preparing solid waste disposal plans for the area (especially those emphasizing recycling), (3) developing proposals for demonstration system grants, and (4) preparing plans for collecting and recovering abandoned motor vehicle hulks; provides for grants to varying sizes of communities to demonstrate resource recovery systems and authorizes therefor annual appropriations of $20 million, $30 million, $50 million and $55 million for fiscal years 1971, 1972, 1973, and 1974, respectively; directs the Secretary of Health, Education and Welfare to prepare guidelines on solid waste management practices for circulation to State and local governments and requires him to recommend model codes and ordinances and issue technical information on solid waste and resource recovery methods to solid waste agencies; provides training grants to assist in the development of personnel trained in the design, operation and maintenance of solid waste disposal and recovery equipment and systems; requires Federal installations and federally licensed activities to meet solid waste guidelines; authorizes a two-year study to create a system of national disposal sites for hazardous materials; creates and authorizes $2 million for a National Commission on Materials Policy which is to make a report by June 30, 1973; authorizes $2 million for a 2-year study of issues in resource recovery; and authorizes such sums as may be necessary through June 30, 1964 to carry out the purposes of the Act, excluding those funds specifically provided therein. H.R. 11833. P/H 6/4/70. P/S amended 8/3/70.

River basin plans and civil works.—Authorized additional appropriations of $810 million to cover a period of two years ending calendar year 1971 for certain comprehensive river basin plans previously approved by Congress for flood control, navigation, and other purposes. Public Law 91-282.

Riverton extension unit of the Missouri River Basin project, Wyoming.—Consolidates the Riverton reclamation project, presently in operation, and the lands of the former Riverton extension unit of the Missouri River Basin Project now in Federal ownership within a single authorized unit of the Missouri River Basin Project to provide a new repayment plan for the entire unit including necessary rehabilitation and betterment of existing facilities, write-off of costs associated with the development of lands found to be nonproductive, and provision of repayment assistance from power revenues of the Missouri River Basin Project. S. 434. P/S 4/27/70. H.R. 7521. H. Cal.

Rogue River Basin project, Oregon.—Authorized the construction, operation, and maintenance of the Merlin division, Rogue River Basin reclamation project in Josephine County, Oregon, which division is a multiple-purpose water resource development serving irrigation water to more than 9,000 acres, for public outdoor recreation, fish and wildlife conservation, area redevelopment, and flood control. Public Law 91-270.

Saline water conversion program.—Authorized an appropriation of $28,873,000 for fiscal year 1971 to continue the desalting research program of the Office of Saline Water, Department of the Interior. Public Law 91-221.

Toiyabe National Forest, Nevada.—Extended the boundaries of the Toiyable National Forest to include 12,920 acres along the Nevada side of Lake Tahoe to aid in the protection and management of the various resources of the area, including the protection, improvement, and maintenance of the watershed, wildlife, recreation, and natural environment values of the lands in the Lake Tahoe Basin, and to promote the management and protection of these lands under the principles of multiple use and sustained yield. Public Law 91-372.

Touchet-Walla Walla project, Oregon-Washington.—Authorized $22,774,000 for the construction and operation of the Touchet division of the Walla Walla reclamation project in southeastern Washington which will supply irrigation water to approximately 9,960 acres of land. Public Law 91-307.

Volunteers in the park program—establishment.—Authorized the Secretary of the Interior to enlist the services of volunteers in programs directly related to the public service mission of the National Park Service and authorized $100,000 annually for this purpose. Public Law 91-357.

Water resources research act amendments.—Amends the Water Resources Research Act to increase the amount authorized to be appropriated for a water resources research center in each of the States from $100,000 to $200,000 annually for each center; provides for the establishment of information retrieval and dissemination activities at each research center; and makes the District of Columbia, Guam, and the Virgin Islands eligible to receive grants. S. 3553. P/S 9/1/70.

Wichita Mountain Wilderness, Oklahoma.—Places 8,900 acres of the 59,000 acre Wichita Mountains National Wildlife Refuge in Oklahoma within the National Wilderness Preservation System, including the 5,000 acre Charons Garden Unit and the 3,900 acre North Mountain Unit. S. 3222. P/S 4/27/70.

Youth Conservation Corps.—Established a 3-year pilot Youth Conservation Corps program for young men and women, 15 through 18 years of age, who would participate in summer work and educational projects in our national parks, forests, recreation areas, wildlife refuges and other public lands administered by the Departments of Interior and Agriculture. Public Law 91-378.

Yuma Mesa Irrigation District, Arizona.—Amends Public Law 394, 84th Congress, to authorize for the Yuma Mesa Irrigation District, Gila Project, Arizona, "irrigation works and facilities" to be constructed in addition to drainage facilities and to authorize the existing repayment contract to be amended accordingly. S. 2882 P/S 3/18/70. H.R. 9804. H. Cal.

NASA authorization, 1971.—Authorized the appropriation of $3,410,878,000 for fiscal year 1971 to the National Aeronautics and Space Administraton ($2,693,100,000 for research and development, $34,478,000 for construction of facilities, and $683,300,000 for research and program management). Public Law 91-303.

TAXATION

Discriminatory State taxation of interstate carriers.—Eliminates the long-standing burden on interstate commerce resulting from discriminatory State and local taxation of common and contract carrier transportation property by (a) amending the Interstate Commerce Act to declare unlawful, as an unreasonable and unjust discrimination against and an undue burden upon interstate commerce, a State or local tax rate, assessment, or collection upon the transportation property of a common or contract carrier at a higher level than upon property in the same taxing district, and (b) procedurally, by providing a remedy in the Federal courts for common and contract carriers against the collection of the excessive portion of any tax based upon such unlawful assessment or rate. S. 2289. P/S 1/30/70.

Duty suspensions

Copper.—Continued from July 1, 1970 through June 30, 1972, the present suspension of duties applicable to unwrought copper (except nickel silver), copper waste and scrap, and copper articles imported to be used in remanufacture by melting; and continued the suspension of the additional duties applicable to the copper content of certain copper-bearing ores and materials for the same period. Public Law 91-298.

Dyeing and tanning materials.—Continued for 3 years, until the close of September 30, 1972, the period during which certain dyeing and tanning materials may be imported free of duty. Public Law 91-388.

L-Dopa.—Amended the Tariff Schedules of the United States by adding a new item to suspend for a period of 2 years the duty on L-Dopa, a new drug used in the treatment of Parkinsonism. Public Law 91-309.

Manganese ore.—Continued until June 30, 1973, the existing suspension of duties on manganese ore. Public Law 91-306.

Employment security amendments.—Extended coverage of the unemployment com-

pensation program to more than 4.7 million additional jobs; established a permanent program of extended benefits for people who exhaust their regular State benefits during periods of high unemployment; improved the financing of the unemployment compensation program; and made other changes to strengthen the unemployment compensation system. Public Law 91-373.

U.S.S. "Pueblo" crew—taxes.—Provided that, for purposes of the Internal Revenue Code of 1954, members of the crew of the U.S.S. "Pueblo" who were illegally detained during 1968 by the Democratic People's Republic of Korea shall be treated as serving in a combat zone and will receive an exclusion from income tax for their pay for service in the Armed Forces; waived unpaid income taxes and Federal death taxes for the member of the crew killed during this period; and extended the time for filing tax returns paying taxes, etc. for all personnel on the ship. Public Law 91-235.

TRANSPORTATION AND COMMERCE

Accessibility of public facilities to physically handicapped.—Provided that buildings and structures which must be used by the general public such as subway stations and surface stations constructed under the authority of the National Capital Transportation Acts of 1960 and 1965, or title III of the Washington Metropolitan Area Transit Regulation Compact, be so designed and constructed as to be accessible to the physically handicapped. Public Law 91-205.

Airport and Airways Development Act.—Provided for the expansion and improvement of the Nation's airport and airway systems; repealed the Federal Airport Act; required the Secretary of Transportation to formulate and recommend to Congress within one year a national transportation policy; established a Presidential Aviation Advisory Commission; authorized expenditures of $75 million for planning grants, at $15 million each year; $250 million for air carrier and reliever airport development for each of 5 fiscal years beginning in fiscal year 1971, and $30 million for non-air carrier airport development for each of such fiscal years, and beginning in fiscal year 1971, contract authority up to $840 million for 5 fiscal years, with each obligation of $280 million restricted to 3 years, and $250 million for air navigation facilities for each of 5 fiscal years; imposed new or increased user taxes as follows: 7 cents a gallon tax on gasoline and other fuels used in noncommercial aviation; 8 percent on gross amounts of domestic airline passenger fares; 5 percent tax on air freight waybills; $3 tax per person using international travel facilities; an annual civil aircraft user tax, plus an additional poundage tax in the case of certain aircraft. Revenues from the aviation user taxes are to be placed in a new Airport and Airway Trust Fund similar in nature to the existing Highway Trust Fund. Public Law 91-258.

Aviation war risk insurance extension.—Extended the authority to provide aviation war risk insurance and reinsurance under title XII of the Federal Aviation Act of 1958 for 5 years through September 7, 1975. H.R. 17133. Public Law 91- .

Cruise ship regulations.—Amended the Merchant Marine Act of 1936, as amended, to eliminate certain provisions of existing law which unnecessarily restrict cruise operations of subsidized American-flag passenger vessels, to enable these vessels to compete more effectively with foreign-flag passenger vessels, and to vest permissive authority in the Secretary of Commerce to make available regularly scheduled vessel passenger service to the public, including service in some areas which now have none. Public Law 91-250.

Federal Low-Emission Vehicle Procurement Act.—Channels and augments the motor vehicle procurement expenditures of the Federal Government in such a way as to stimulate the development, production and distribution of motor vehicle propulsion systems which emit few or no pollutants; seeks to achieve this stimulation by requiring the Federal Government to purchase available low-emission vehicles in lieu of other vehicles, thereby creating a guaranteed market which additionally provides controlled conditions for field testing of new concepts in automotive propulsion; authorizes annual appropriations of $50 million to carry out the provisions of this Act. S. 3072. P/S 3/26/70.

Fishing fleet improvement.—Extended and broadened the construction assistance program under the United States Fishing Fleet Improvement Act to include reconditioning, conversion, and remodeling; increased the authorization for appropriations from $10 million annually to $20 million for fiscal years 1970, 1971, and 1972; provided for a class differential rather than the present individual determination, and eliminated several time-consuming provisions resulting in savings of time and administrative costs. Public Law 91-279.

High-Speed Ground Transportation Act extension.—Extends the High-Speed Ground Transportation Act for an additional year, until June 30, 1972, and authorizes $21,700,000 for fiscal year 1971. S. 3730. P/S 7/30/70. H.R. 17538. H. Cal.

International Travel Act amendment.—Amends the International Travel Act of 1961 in order to improve the balance of payments by further promoting travel to the United States; provides Federal grants to assist States, cities, and regional groupings of States in attracting foreign visitors, and sets the Federal share of cost of any relevant program at 50 percent of its cost; establishes in the Commerce Department a United States Travel Service to be headed by an Assistant Secretary of Commerce for Tourism (to replace the present Travel Service headed by a Director); creates a National Tourism Resources Review Commission to study and make recommendations to the President and Congress regarding travel needs and policies and authorizes $1,250,000 for this purpose; and authorizes appropriations of $15 million for each of fiscal years 1971, 1972 and 1973 to carry out the provisions of the Act. S. 1289. P/S 3/26/70. H.R. 14685. P/H 5/14/70; P/S amended 5/21/70. Senate agreed to conference report 7/15/70. House rejected conference report 7/16/70.

Maritime authorization, 1971.—Authorized the appropriation of $429,420,000 to the Maritime Administration for the fiscal year 1971 ($199,500,000 for acquisition, construction or reconstruction of vessels, and construction—differential subsidy and cost of national defense features incident to the construction, reconstruction or reconditioning of ships; $193 million for payment of obligations incurred for shipping operation subsidies; $19 million for research and development expenses; $4,675,000 for reserve fleet expenses; $6.8 million for operation of the Merchant Marine Academy at King's Point, New York; $2,445,000 for financial assistance to State marine schools; and $4 million for continued operation of the nuclear ship "Savannah"). Public Law 91-247.

National Traffic and Motor Vehicle Safety Act amendments.—Authorized appropriations of $23 million for fiscal year 1970 and $40 million for each of fiscal years 1971 and 1972; broadened the definition of "motor vehicle equipment" to include related automotive safety devices used exclusively to safeguard motor vehicles and passengers, and other highway users from risk of accident, injury or death; provided that the Secretary of Transportation obtain information relating to agricultural tractor safety and report findings and recommendations thereon to Congress; and amended the act in several other respects. Public Law 91-265.

Political broadcasting.—Amends section 315 of the Communications Act of 1934, as amended, to repeal the equal-time broadcasting requirement relative to presidential and vice-presidential candidates; limits the charges for use of broadcasting stations by candidates for public office to no more than the station's lowest unit charge for the same amount of time; and places a ceiling of $20,000 on the amount candidates for Federal elective office, or others on their behalf, may spend on electronic media in a general election. S. 3637. P/S 4/15/70. P/H amended 8/11/70. Conference report filed 8/13/70.

Public Broadcasting Financing Act of 1970.—Amends the Communications Act of 1934 to authorize annual appropriations of such sums as may be necessary for fiscal years 1971, 1972 and 1973 for the continued financing of the Corporation for Public Broadcasting, and to direct the Federal Communications Commission to prescribe regulations for broadcast stations receiving assistance under Title II of the Public Broadcasting Act. S. 3558. P/S 5/19/70. H.R. 17982. H. Cal.

Rail Passenger Service Act of 1970.—Establishes a National Rail Passenger Corporation to provide for the operation of passenger trains, to commence service on March 1, 1971, and authorizes for fiscal year 1971 appropriations of $40 million to the corporation, as well as a guarantee of $60 million in 20-year loans to the corporation to finance the upgrading of roadbeds and the purchase and rehabilitation of rolling stock and for other corporate purposes. The bill also authorizes the appropriation of $75 million for loans or loan guarantees to provide emergency financial assistance for railroads operating passenger service. S. 3706. P/S 5/6/70.

Railroad Safety Act and Hazardous Materials Transportation Control Act.—Designed to promote safety in all areas of railroad operation, to reduce railroad related accidents, and to reduce death and injuries to persons and to reduce damage to property caused by accidents involving any carrier of hazardous materials. S. 1933. P/S 12/19/69. P/H amended 8/6/70.

Shipper's recovery of a reasonable attorney's fee.—Puts the shipping public, especially small shippers, householders, and travelers in a more equal bargaining position with carriers in settlement negotiations for recovery of damages sustained in the transportation of property by permitting a successful plaintiff to recover his attorney's fees if he allowed the carrier a reasonable period of time to settle the claim. S. 1653. P/S 1/26/70.

Urban Mass Transportation Assistance Act.—Provides a Federal commitment for $10 billion in funds over a period of 12 years for urban mass transportation programs; authorizes the Secretary of Transportation to incur contractual obligations up to $3.1 billion for all authorized programs under the amended 1964 act, restricting disbursement by limitations from a maximum of $80 million prior to July 1, 1971, which is increased by specified limitations for subsequent years reaching a maximum of $1.86 billion on July 1, 1975, and $3.1 billion thereafter, with further authorization requests, and recommendations for adjustment in the schedule of liquidating appropriations, to be submitted by the Secretary at 2-year intervals before July 1, 1972 through 1982. Changes use of the discretionary fund from $12.5 million to 1.5 percent of the aggregate amount of funds authorized to be obligated, except that an additional 6 percent may be used if it shall not

prejudice or delay pending projects of other States, but in such case no State shall receive more than 25 percent of the grant funds made available by the exception, and authorizes a new program of 1-year loans to States and local public bodies, and agencies thereof, for the acquisition of real property reasonably expected to be needed and used for urban mass transportation purposes within a reasonable period. S. 3154. P/S 2/3/70. H.R. 18185. H. Cal.

VETERANS

Definition of "child" for veterans' benefit purposes.—Revised the definition of "child" for veterans' benefit purposes to recognize an adopted child as a dependent from the date of issuance of an interlocutory decree. Public Law 91-262.

Group life insurance.—Increased from $10,000 to $15,000 the amount of servicemen's group life insurance for members of the uniformed services. Public Law 91-291.

Medical benefits for older veterans.—Provides that a veteran who is in receipt of a Veterans' Administration pension would no longer be required to sign under oath a statement of inability to defray the necessary expenses of hospital or domiciliary care in order to gain admission to a VA hospital for a non-service-connected disability. H.R. 693. P/H 6/2/69. P/S amended 10/21/69. House agreed to Senate amendment with an amendment 5/4/70.

Recoupment of disability severance pay.—Liberalized the conditions under which the Administrator of Veterans' Affairs is required to effect recoupment from disability compensation otherwise payable to certain disabled veterans. Public Law 91-241.

Special health care benefits for certain surviving dependents.—Permits the surviving dependents of members of the Armed Forces who die while eligible for receipt of hostile fire pay, or from a disease or injury incurred while eligible for such pay, who are receiving benefits under the special program for the physically handicapped or mentally retarded provided the civilian health and medical program of the uniformed services (CHAMPUS) to continue to receive such benefits until they pass their 21st birthday. S. 4148. P/S 8/14/70. H.R. 8413. P/H 2/16/70.

Specialized medical resources.—Provides greater flexibility in the Veterans' Administration hospital and medical care program by providing the Administrator with greater administrative discretion in the appointment of nurses, in the internship and residency program, and in the appointment of dentists of high academic and research standing on a temporary full-time or part-time basis. H.R. 9634. P/H 6/2/69. P/S amended 10/21/69. House agreed to Senate amendments with amendments 5/4/70.

Veterans' Administration Regional Office in the Philippines.—Extended for 4 years, until July 3, 1974, the authority of the Veterans' Administration to operate and maintain a regional office in the Philippines. Public Law 91-338.

Veterans' disability compensation increase.—Increased by 8 percent the compensation payments to veterans rated 10, 20 and 30 percent disabled; increased by 11 percent the compensation payments to veterans rated 50 percent to 90 percent disabled; increased by 12 percent the compensation payments for the totally disabled; increased the allowance to dependents of disabled veterans whose disability is rated at 50 percent or higher; made the compensation increases effective July 1970; established a presumption in the case of any veteran who served for 90 days and who was held as a prisoner of war for not less than 6 months during World War II, the Korean conflict or the Vietnam era that a disability suffered from dietary deficiencies, forced labor, or inhumane treatment is service connected if the disability is related to malnutrition, or if the veteran became psychotic within 2 years of separation from military service; permitted a remarried widow to revert to her earlier eligibility for compensation, pension, and education benefits when her second marriage is ended by death or divorce; clarified Congressional intent that all decisions of the Administrator of Veterans' Affairs on questions of entitlement are final and not subject to judicial review. Public Law 91-376.

Veterans Education and Training Amendments Act.—Increased by 34.6 percent the basic "GI bill" monthly educational assistance allowance rates for veterans, and the allowances for farm training and apprenticeship programs; increased by 22.7 percent the vocational rehabilitation training subsistence allowance; provided a special supplementary assistance allowance for educationally disadvantaged veterans; established a predischarge educational program to assist servicemen in preparing for future education while still on active duty; and expanded the veterans' outreach service program covering the Veteran Administration's counseling services to advise veterans of their entitlements and assist them in gaining employment. Public Law 91-219.

Social security and railroad retirement benefit.—Extends for 4 months the period for States to assure aged, blind, and disabled social security beneficiaries who also receive welfare an increase of at least $4 in their combined income from social security and welfare, and accords similar treatment to increases in railroad retirement benefits which may become law in 1971. Public Law 91-306.

BRIDGING THE GENERATION GAP

Mr. KENNEDY. Mr. President, there has been no shortage of discussion recently over the emergence of a "generation gap" in our society. But all too much of this discussion has been inflamed, angry, or, perhaps worst of all, ill-informed.

Last week, however, the American Broadcasting Co., telecast a program that adds a new and very valuable perspective on the phenomena we call the "generation gap." In a program entitled "Anatomy of Youth," ABC News featured the distinguished anthropologist Dr. Margaret Mead presenting some of her observations on what people under 25 are thinking. Dr. Mead has rightly seen our youth movement as part of a worldwide phenomenon that is the result of fundamental changes in 20th century society.

I think we need to cut through the peripheral issues of long hair and bizarre dress, which are simply the more distracting features of today's youth culture. Instead, to understand youth, we need to take a longer and larger look, very much as Dr. Mead has done, for when we do I think we will have come a long way toward bridging, if not eliminating, the generation gap.

To all Members of Congress concerned with establishing contact with our constituents under 25, I commend the perceptive remarks of Dr. Mead and ask unanimous consent that the full transcript of the ABC program, "Anatomy of Youth," be printed in the RECORD.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

ANATOMY OF YOUTH WITH DR. MARGARET MEAD

MARGARET MEAD: If all the people who grew up before World War II realized that they were different, and that the kids are different, and that this isn't about parents and children, and it isn't about teachers and students. It's just about all the people under twenty-five, and all the people over.

And once they realize it, they won't feel it's their problem, that they didn't bring their kids up right, or there's something wrong with their kids, or they shouldn't have sent them to that college, or something of the sort.

We realize this is a world-wide phenomenon. It's happening everywhere, it's happening to everybody. So it's up to everybody to work it out in their own particular situation. Learn who the kids are, because they're going to have to live in the world together for a good long time from now.

ANNOUNCER. "Now," the American adventure, the people and events shaping our lives and our times, now. This week, Anatomy of Youth, anthropologist Margaret Mead's observations of youth and the generation gap.

Here is ABC News correspondent Gregory Jackson.

GREGORY JACKSON: Margaret Mead is, of course, world famous as an anthropologist, writer and teacher. And she has a particular interest in youth; in fact, she's recently written a study on the generation gap, called "Culture and Commitment." And that's why we asked her to join us here in Central Park, New York City, where on summer weekends young people by the thousands gather.

Many of those young people are what most of us would call extraordinary, atypical, far out, largely because of their dress. At least nothing like the clean cut kids most of us know.

Well, in the next thirty minutes we'll hear Dr. Mead's own view of those youngsters, as well as her observations on what people under twenty-five are thinking. And finally some ideas from her on how to reestablish communication with America's youth.

SINGER: "Look at all the silly people/ Wanting to find out/if there's somewhere to be happy./Everyone's in doubt."

JACKSON: In summer the morning quiet of Central Park in the heart of New York City gives way, about noon, to a colorful youth happening. We asked Dr. Margaret Mead to tell us about that scene.

MEAD: Well, we're talking about New York City, in Central Park, a park that people were afraid to go into ten years ago it had become so dangerous.

Kids come here for many reasons; some have bought their clothes for the occasion. From one point of view it's a masked ball.

Then when you get on to the kids who come for the concerts on the mall now, these are all kinds of kids who come to listen to the music. (Rock music)

Some of them are going to school, some of them are working all summer in supermarkets. And they dress up for the occasion too. And it's a dressed up occasion, which people are saying a lot of things with their clothes. They're even saying, "I have a right to be here," you know, "at least for the day. I won't be conspicuous." Or they're saying, "I'm the kind of person who likes rock music." Or they're saying, "Isn't it fun to roll here together." (Rock Music)

I prefer it outdoors. I can enjoy it outdoors. Indoors it hurts my ears, unless I get in the middle and dance. Then my ears take the next trip.

There have always been generations, and there have always been kids rebelling against older people; or older people saying, "You know, it was like that when I was younger," "It wasn't like that when I was younger."

We're talking about something different now, we're talking about something that happened after World War II, happened only once. We don't think we'll have another gen-

eration gap like this. But it's gone right around the world, and we have a group of young people who were born into such a different world that there's real gap between them and all older people, not just their parents or their teachers, but people in their own society.

You know, we have had gaps between parents and children, or gaps between teachers and their students. And gaps in one part of society. Or when immigrants came from Europe there was a big gap between their children and the parents that came over here. Lots and lots of little gaps around the world.

The thing that's unique about this one is that the youngsters who grew up after World War II grew up in a different world everywhere in the world. So that nowhere anywhere are there older people that have had the same experiences they've had. And this is what cuts them off.

JACKSON: What made the world so different in 1945?

MEAD: Well, to begin with we discovered all of it. We began knowing we were in a whole world at once. The bomb, so that we knew that we now held the life of the world in our hands, as we never had before. Television, which means that people could see what was happening on one side of the world, or somewhere else, immediately. Computers, and space exploration. All these things happened at once, and they made such a big change that now there's a real gap. It's around—the oldest are around twenty-five now, you know.

For thousands and thousands of years all societies were what we call post-figurative. Change was so slow, and people knew so little about it, that children learned from their grandparents what their lives were going to be like. So when you were born your future was already laid out in front of you, in the presence of the old people, you know, watching them.

Then when we got change we had what I call a configurative society, where you learn quite a little from your own age mates. Although you still learn a lot from old people.

And now we're in a society where we have to learn from the children, because they're the only people who've lived here.

(Rock music.)

JACKSON. Again, Dr. Margaret Mead on what young people are telling us.

MEAD: They're trying to get through the idea that we do live on one planet, and that its resources are limited. We have to look after it. You know, we thought it was so big we never explored it, we'd never flown around it, we'd never seen it from the moon. And we thought it was an enormous place with inexhaustible resources.

Oh, you might use up some of our good land in the dust bowl, or you might cut down most of the trees in Australia. But in general there was plenty everywhere.

And now we've seen the earth from the moon, which is the way the kids have grown up. And they know how small this planet is, and how limited its resources. So they want us to take care of it better than we did. And from that comes Earth Day, and all of these things.

They've grown up to realize that we're all members of the same species. And whereas their grandparents didn't know this, they really didn't. And they thought people with different skin color or different kind of hair really were different genetically and biologically in a way that mattered.

The kids know this isn't true. When you go into discussions with them, you find that on the whole they have the same position around the world. They're against war. They know we're all one human race. They know the bomb could destroy us all and every living thing. So they're against war in a very different way from the way people used to be against war before.

Despair is a very important element in young pepole today, and it will be as long as the Vietnam war goes on. Because they know the bulk of the American people don't want the war; they know they elected President Nixon because he said he'd end it, and hasn't ended it.

And they only know this Administration. They haven't known other Presidents, and they don't know how slow things are. So they say the whole system has to be destroyed. But they don't really know what they mean when they said this.

And, you know, they don't really want to destroy the system. It's a way of talking, because they don't know what else to do with the plaguey thing.

Authority is wobbling today. Authority was based not only on the belief in authority—you know, that you honored your father, or honored your teacher, or honored elected officials, and things—it was also based on the fact that they did know more, they actually did know more.

Now there are things that they don't know more about. If they'd stop talking about the things they don't know about, they'd get their authority back.

JACKSON: Dr. Mead, aren't the youngsters prone to violence?

MEAD: The young people are not prone to violence.

There has been violence in some confrontations that were badly handled. And there've been rocks thrown. But for every rock that was thrown, there've been thousand and thousands of kids who marched, and stood, or stood vigils, or sat up for nights, and nights, and nights talking, trying to straighten things out. But they never get recorded, they never get in the mass media.

Only violence gets into the mass media. And I don't blame parents for thinking they're all violent, because that's the only thing they ever see.

JACKSON: Why is there this general stigma attached, then, that they are violent, and that they are prone to so-called overthrow the system?

MEAD: Because they're questioning the system. At the outside, there are about four percent of college students that are interested in political activism in the whole country—that's four percent of college students, not of all young people in the country.

There are some violent, or advocate some violence among young people, just as there are among many older people also.

JACKSON: This whole talk, largely from the youngsters too, about dropping out, about leaving the system—is that valid? Do you think they will?

MEAD: A very few people leave the system. They're a criticism of the system when they leave it. This country is made up of dropouts. Everybody who came to this country in the early days was a dropout from the system, who came here and wanted to found some other kind of life. So that the kids that articulately drop out are criticizing the system, you know, their criticism of it.

It doesn't mean that this is what most young people want. It means that the mass media always seize on what is dramatic, what is extreme, what is unusual, and if possible what is violent.

JACKSON: Sargent Shriver, whose son, as you know, was recently arrested, says that young people are under tremendous pressure, with what he called fantastic temptations, and he blames it on, in his words, "almost libertine society." What do you think?

MEAD: I think that is at present a pretty libertine society, and the libertines are middle aged and older. They grew up in a puritanical society; and when you just remove a few of the restraints, the people who grew up puritanical go in for lust. And there are a lot of old libertines around, no young ones.

JACKSON: How does the older generation . . . the authorities . . . approach the question of drugs?

MEAD: We're endangering people terribly . . . with heroin, with LSD, with speed. We're endangering people permanently. We tell them that pot is one of the these. Then they try pot and they find that nothing happens. And they're addicted. And they don't trust the adult world anymore when they say that speed is dangerous, that LSD is terribly dangerous and that heroin is a terrible habit to have. They don't trust their elders because their elders have lied to them about pot. And that's the reason I want to separate pot off from the others, and repeal the laws against pot and put it in another box.

There's a lot of emphasis on not wearing formal costumes, you know. They want people to be free of all kinds of bans and confining things. They're the rag-tag and bob tail of previous fashions; Indian head bands, or old jackets, or crocheted animacassars worn over people's shoulders, and things.

They're picking up things from the past, all sorts, because they live in a world where the whole world's being hurled at them at once in fragments, and they take the fragments and make clothes out of them. And make a few statements when they do that.

They're saying, "We belong to this generation, and for goodness sakes, people have been saying things with hair ever since anybody can remember." You know, you'd think nobody knows any history. They have forgotten what it was like when I cut my hair, in 1920, and the whole barber shop wept. You know, it was the end of womanhood when we cut off our long hair.

But we didn't have TV in those days. People only had to deal with the bob-haired girl next to them. Or in England when the Roundheads came in they didn't have mass media. And today the hair styles and all of these things get on mass media, and they're much more of a statement than they would have been then.

They've been filmed all their lives. They were filmed in their cradles, you know. They've had Christmas morning tape, they've heard their voices on a tape recorder all their lives. They've none of the shyness that we had the first time we heard our voices, or saw ourselves in a film. It was horrible. They've grown up that was in a kind of reflexive, circular world.

After all, in this kind of a show here in the Park, anyway, they're on the stage. They're dressed up for a stage. And if you're on a stage you don't object to having spectators. In fact, you want them. (Rock Music)

You see blacks and whites going around together, treating each other like people. And perhaps not quite forgetting the difference. Enjoying it a little, enjoying the fact that they are stating that we're all human beings, and all the same in God's sight. That's one position.

Then you have the other, you have young blacks together, magnificently dressed, with their hair standing up on their heads. They've proud of what they look like.

So when it's carnival, and everybody's happy, and everybody's singing, you don't get this kind of confrontation between police and young people. And in fact, at Woodstock the police were highly protective.

But of course they realize that young people who look like this have been involved in other kinds of demonstrations, and the cops take an awful beating sometimes. They were brought up to deal with the robbers, not to deal with college kids.

(Rock music)

JACKSON: Dr. Mead, I've heard you often say in the past conversation that one of the ways to reestablish communication with the youngsters is to talk to them. On the other hand you hear so frequently from parents

that they can't talk to their kids. What do you tell them to do?

MEAD: To listen.

JACKSON: Well, they won't talk.

MEAD: No, that isn't so, you see, because the parents don't listen. They don't have much practice listening, and very little practice listening to kids. He'll find if he watches himself that every time the kid says something he gives him a lecture. He moralizes, and tells him he never knew what the Depression was like.

You have to give up remembering your own youth and thinking that will explain things, because it won't. You have a tendency to believe the world's still something like the world you grew up in, and you're kidding yourself. You see, they've never known another world. I mean, you'll get fourteen year old boys now saying, "I used to be interested in space exploration," you see. It's part of their childhood, they're tired of it. This is a difference from people who just stood breathless when the first man landed on the moon, because it still was a marvel to them.

Listen, understand something that they're about. Otherwise we have a great big segmented society that we don't understand, and that many people are afraid of. You're always afraid of things you don't understand.

If the older people listen, then the kids will listen. They're fair.

JACKSON: At this point it's traditional to say, on the one side you've heard this, and on the other side you've heard that, and both sides are worthy of your deepest consideration, and so on. But tonight that cannot be the case.

To be honest, it's been largely all one view through one lens. Quite simply, Dr. Mead says, we must reverse the trend of recorded history and learn from the children. Largely because of the bomb, and television, and space, she says that those born after World War II are different from any other generation ever known.

They are, in effect, the first to know their earth by looking at it from the moon.

Dr. Mead agrees authority is wobbling. But, in a line, she summed up her thoughts when she said, "If those—the elders—would stop talking about the things they don't know about, they'd get their authority back." And then she proposed legalizing marijuana.

In all fairness, we must point out that many doctors strongly oppose this point of view . . . that very little medical evidence has been collected on either side of the pot question . . . and that, in all events, marijuana is, at present, illegal.

But what to say of Dr. Mead's views on youth? Is this kindly anthropologist . . . who is, incidentally, also a grandmother . . . as confusing as the youngsters? That's for you to decide. But it does seem that we Americans are quick, even eager, to believe our experts when they're talking about the natives of New Guinea, or explaining the life styles of the Fiji Islands, but rarely appreciate such analysis at home. And there seems to be a moral to that. But good sense suggests that Dr. Mead have the last word—which she will in a moment.

(Music).

MEAD. If all the people who grew up before WW II really realize that they are different, and that the kids are different, and that it isn't about parents and children and it isn't about teachers and students. It's just about all the people under 25 and all the people over. And once they realize it, they won't feel its their problem, that they didn't bring their kids up right, or there's something wrong with their kids, or they shouldn't have sent them to that college, or something of the sort.

We realize this is a world wide phenomenon that's happening everywhere, and it's happening to everybody. So it's up to everybody to work it out, in their own particular situation.

You know, when people are in an earthquake, and everybody's in the earthquake, they don't go around blaming each other, or blaming themselves. There's an earthquake, they deal with it.

And this is like an earthquake. It's something that's universal, that affects everybody, and everybody has to learn to work with it.

Learn who the kids are, because they're going to have to live in the world together for a good long time from now.

(Music).

ANNOUNCER. This has been a presentation of ABC News.

THE FULBRIGHT-McGOVERN NBC TELECAST

Mr. MANSFIELD. Mr. President, last evening, over the National Broadcasting Co. television network, the distinguished Senator from Arkansas (Mr. FULBRIGHT) and the distinguished Senator from South Dakota (Mr. McGOVERN) addressed themselves to the overriding issue that faces the country—the tragic war in Southeast Asia.

No more articulate spokesmen—men with great honor and deep conviction—could have been chosen to present this view to the American people.

I ask unanimous consent that the transcript of their remarks be printed in the RECORD.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

THE NATIONAL BROADCASTING CO. PRESENTS A REPLY TO PRESIDENT NIXON ON THE SUBJECT OF SOUTHEAST ASIA

(By Senator J. W. FULBRIGHT and Senator GEORGE McGOVERN)

Mr. MONROE. In the past nine months President Nixon has made five television speeches about our policy in Vietnam. NBC has provided extensive coverage to both sides of the Vietnam debate in its regular and special news programs. Recently the Federal Communications Commission ruled that an equal time answer is not required every time the President makes a talk, but in view of Mr. Nixon's five televised talks on Vietnam, the FCC also said that as a matter of fairness the networks should provide some special program time to his opponents on that issue—A Reply to the President.

Tonight we will hear from two of the most prominent critics of our Vietnam policy: Senator J. W. Fulbright, the Arkansas Democrat who is Chairman of the Senate Foreign Relations Committee; and Senator George McGovern, Democrat of South Dakota, who is co-author of an amendment to require American withdrawal from Vietnam.

Now, Senator Fulbright.

Senator FULBRIGHT. During the past several years, much has been written, spoken and filmed about the war in Indo China. So much, in fact, has been said that it is not easy to filter the truth from the great mass of information, misinformation and pure propaganda, and to assess the full effect of this war upon the personal lives of our people here at home.

Tonight I shall try to focus our attention as clearly as I can upon those aspects of the war which I believe are of first importance to the American people.

In view of our experiences in recent years, is it not appropriate to look inside our hearts and minds, to ask ourselves some searching questions? Two fundamental questions are: What kind of country do we want America to be: and what kind of people do we wish to be?

Generally we have been proud of our common sense. In Arkansas, we sometimes say we have horse sense. We like to think we are generous, friendly and tolerant of other people. We have thought we are sensible and hardheaded, not given to visionary schemes beyond our capacities, and not subject to religious or political obsessions, or bitter hatreds which in endless wars have plagued the lives of so many less fortunate people.

We have been proud of our tremendous success in developing our country, in our technological and scientific knowhow, and our ability, through private business enterprises, to bring the material benefits of this knowledge to more of our people than any other society in the world has ever done.

We have believed we are capable of distinguishing a good investment from a bad investment, of knowing what policy is in our national interests and what is not.

I suggest to you tonight that the war in Indo China is a bad investment of our resources and of our talents. It is contrary to common sense, it is a departure from our best traditions, and it offends our inherent sense of decency.

That is why there is such general dissent, such widespread disillusionment, and such a lack of confidence in the wisdom of our actions. Such confusion and hesitation about what we should do now.

Depending upon the news of the day, the debate about the war focuses on certain questions: Will Vietnamization work? Was the Cambodian invasion justified? Is the President exceeding his powers? What is to be done about crime in the streets and violence on the campus? Why are unemployment rates so high, interest rates so exhorbitant and houses so scarce? And why, with all our wealth and technical genius, have we had so much difficulty in making or cities fit places to live, with good schools and safe streets, fresh air and clean water?

Underlying each of these questions that divide and distract us, may I repeat, is the basic question of what kind of country we want America to be. Do we wish to be the greatest, proudest military power the world has ever known, the world policeman who rushes into the breach whenever and wherever trouble arises, or would we rather be known to future generations for our success in solving human problems, for our practice of democracy at home, and, in foreign policy, or willingness to cooperate with other countries in the United Nations?

I do not know what our choice is going to be, but of one thing I am certain: We cannot be both the policeman or the nursemaid of the world and a flourishing democracy at home. War undermines democracy, and America has been in a full-scale war for 12 of the last 30 years. Three decades of war and crisis have put a great strain on our democracy. War has necessitated the diversion of vast sums of money from urgent domestic needs. And with one war following another, the agenda of domestic neglect has grown dangerously long.

More difficult to measure but no less important has been the drain on our moral and political energies. A President who spends much of his working day trying to win support for his war policy does not have much time nor energy to deal with poverty and crime, housing, schools and pollution. A Congress burdened with war costs and war measures has that much less time, money and spirit for the work-aday tasks of studying social and economic problems and legislating programs to meet them. Worst of all is the loss of spirit and optimism which has affected so many of us. For the first time in history, Americans of all ages are showing signs of cynicism and disillusion about the future of their country.

As the mayor of one of our large cities said after one of the great urban riots of recent years, "We may be able to pacify every village in Vietnam over a period of years, but what good does it do if we can't pacify the American cities?"

These are the real questions arising out of our war in Indo China, and I regret very much that we have been diverted from them by questions of national courage, or of our possible defeat and humiliation.

Courage is a personal quality, not one belonging to nations apart from their individual citizens. It takes no individual courage, for example, for a President, a Vice President, or a Senator to send young men to risk, or to give their lives in a jungle 10,000 miles from home. It takes great moral courage, on the other hand, for Senator McGovern to acknowledge a mistake and to take an initiative to end the war in Indo China, just as it took physical courage when he flew 36 combat missions as a B–26 bomber pilot in World War II, for which he was awarded the Distinguished Flying Cross.

It diverts us from the real question when the President invokes the spector of "This first defeat in American history." We are not really in any danger of being militarily defeated in Indo China. Everyone, including the enemy, knows that. Within hours, if we choose to do it, we could wipe those little countries and every living thing within them off the face of the map.

It is not weakness that prevents us from doing that, but decency and civilized restraint. A war is not a football game which you play to win for the sake of winning. A war is fought for political objectives, and when it is recognized that those objectives are unattainable at a reasonable cost, the appropriate course of action to end that war in an orderly but expeditious way. Correcting a mistake is not a defeat or a humiliation, but a rational and honorable way of coming to grips with reality.

The real questions to be asked about any war are whether it is essential to our security, whether it serves any other useful purpose, and whether the cost is commensurate with the gain. My own view is that the war in Indo China is unjustified on all these counts. I would like to explain why, starting with the question of security.

North Vietnam is a small and poor country which could only be a threat to the United States if it were the spearhead of a far larger power, or unified international movement which was hostile to the United States. Within the framework of a fractured, divided Communist world, North Vietnam is a sovereign Communist country, dependent on Russia and China for military equipment but politically dominated by neither, and far too small and poor to pose a threat to the security of the United States. This is the view of expert witnesses, including distinguished military men who have testified before the Senate Committee on Foreign Relations.

In the plain words of General Shoup, the former Commandant of the Marine Corps, it is "pure unadulterated poppycock" to regard North Vietnam and the Viet Cong as a threat to America's security.

If the North Vietnamese and the Viet Cong pose no serious threat to American security, the question arises as to whether they are a threat to other non-Communist countries with whom we are allied. On the basis of their grudging minimal contributions to the fighting in Vietnam, it would appear that our Asian and Pacific allies either do not take the threat very seriously, or are content to let the United States do their fighting for them, or are willing to fight only if they are paid lavish subsidies by the United States.

Former Secretary of Defense Clark Clifford has said that his own initial doubts about the war arose when none of our allies were willing to make additional troop contributions as we requested. If the countries closest to Vietnam do not care enough to voluntarily send their boys to fight and die in Vietnam, why should we send our boys to fight and die for them?

For all these reasons, I am convinced that this war is mistaken from the standpoint of both our own security and the security of our allies.

I return then to the question which I believe to be the most important of all, the effect of this war upon our own country and our people. The American people are angry and divided, and some of our young people now say that they have lost faith in the American system. I am not referring to that small misguided minority who have resorted to criminal acts of violence, but the great majority of decent, law-abiding and idealistic young people who used to join VISTA and the Peace Corps before they lost faith, and who now return gladly to active constructive participation in their country's affairs if they saw their national leaders returning seriously to the task of rebuilding our country.

I do not share President Nixon's view that our choice is between Vietnamization and precipitate withdrawal. I believe this war can be ended by an honorable negotiated settlement. To get negotiations going, two things are required of the United States: Our willingness to take away from President Thieu the veto he presently exercises over American policy, and our willingness to commit ourselves to a phased but total American military withdrawal from Vietnam to be completed by a specified date.

But the Administration clings to its policy of Vietnamization. And because it is unwilling to offer the key concessions, there is no progress in the Paris talks.

Vietnamization is only the latest of a series of military strategies. It may make the war more tolerable for Americans by reducing the level of our own participation, but it will not extricate us completely. It will keep us involved indefinitely, while condemning the Vietnamese people to the blood bath of continuing warfare.

In any case, I do not think that Vietnamization is going to work, because as General Ridgway, distinguished former Army Chief of Staff has asserted about Vietnam, "A military solution is not now and never has been possible under conditions consistent with our interests."

In the absence of strong leadership by the Administration to end the war through political compromise, it has seemed appropriate and urgent for Congress to take the initiative for peace. One of the ways we propose to do that will be explained by Senator McGovern.

In conclusion, I emphasize again my own belief that a great deal more is at stake than the fate of a poor and now utterly devastated little country in Southeast Asia. The issue is nothing less than the survival of the kind of America we love and the kind of country we want it to be in the years ahead.

Thank you.

Senator McGovern. I am grateful to NBC for inviting me to share this time with you and with Senator Fulbright, a distinguished statesman who has served as Chairman of the Senate Committee on Foreign Relations longer than any other man in our national history.

Four years ago Senator Fulbright wrote a thoughtful book in which he discussed the subject of patriotism. "To criticize one's country," he said, "is to do it a service and pay it a compliment. It is a service because it may spur the country to do better than it is doing. It is a compliment because it evidences a belief that the country can do better than it is doing. Criticism is more than a right. It is an act of patriotism, a higher form of patriotism."

So we are here tonight as patriots who love our country, who cherish its personal freedom and its Constitutional government. We are here because we cannot forget that young men are still dying in a jungle 10,000 miles from home. We are here because too many young men have gone to Asia filled with hope and strength, only to come home in coffins or hospital ships with their legs missing, without their arms, their faces, or their hopes.

It is one of the troubling paradoxes of history that in this war, as in others, young men are condemned to fight the wars that older men begin. So we are here with a special burden to make sure that those young men did not die in vain. We must end this terrible war, but beyond that, we must learn its lessons so that we do not repeat its mistakes with other multitudes of young men.

We are here, too, because we cannot forget the heavy costs of this war in our own society—the wartime inflation which drives up prices, increases interest rates, raises our taxes, elevates our national debt and delays the reconstruction of our society. While this brief telecast is in progress, we will spend another $1 million on the Vietnamese engine of war. One million dollars every half-hour. A million dollars that we need in America to fight crime, to end pollution, to create jobs, to build houses and hospitals and schools.

We are here, too, because we cannot forget that a million Vietnamese have died in this war, and they, too, are the children of God. Thousands of them killed by the destructive power of our own weapons.

This war began in Vietnam a quarter of a century ago as an effort on the part of the Vietnamese people to throw off the yoke of French imperialism. It has continued as a struggle by one Vietnamese faction competing with another for control of Saigon. Since 1954, we have invested some 50,000 American lives and $150 billion trying to help one side of this Vietnamese conflict to defeat the other.

For many years I have believed that it was a mistake to require American boys to die in defense of a political regime in Saigon that has never commanded the respect and support of its own people. What then are the realities we face tonight? First of all, we must recognize it is impossible for us to control events in a society so different from our own, so far from our sphere of influence. We have in effect been drawn into a family quarrel where it is almost impossible to distinguish friend from foe. They are all Vietnamese. They all share the same history, the same language, the same essential outlook on life and death. They have lived and fought and struggled with each other for a thousand years, and no matter how long we stay, when we finally go home they will live and struggle with each other for another thousand years.

So this brings us to the second reality, that our interests in this war are different from the interests of our ally in Saigon. We had hoped from the beginning that the South Vietnamese rulers would carry out reforms that would bring to them the support of their own people, but instead, the politicians and generals of Saigon have feathered their own nests with American money and with bribes demanded from their own people. We had hoped that they would establish political freedom, but instead they have filled their jails with tens of thousands of their own citizens, not because they were Communists, but because they had the courage to point to the failures and corruption of their own government.

We had hoped that they would use the billions of dollars we have given them in aid to build a strong defense for themselves, but instead, an army that now numbers five times the size of the enemy force in the field still lacks the capacity to stand on its own.

We have expressed our willingness to see the various competing groups in South Vietnam get together in a coalition government and end the fighting. But General Thieu, our ally in Saigon, says that never will he participate in such a coalition where he must share his power with his challengers.

Another reality we face is that the longer we stay in Vietnam, the more we play into the hands of the Communists and weaken our own society. The two great centers of Communist power in the world are Russia and China. Yet while we have poured out our substance in Vietnam for ten years, not one Chinese or Russian has been expended in that conflict.

If Peking or Moscow had been in charge of American foreign policy for the past decade, they could not have devised a policy to hurt us more than the one we have chosen for ourselves. Where, then, do we go from here? How do we stop the blood bath now raging in Vietnam? How do we stop playing into the hands of the Communists? How do we end this war that is destroying Vietnam and weakening our own society?

Two courses have been suggested, one by President Nixon, and one by some of us in the United States Senate.

The President's course is called Vietnamization. As I understand it, that means staying in Vietnam until the Vietnamese forces can continue the war without us. The President, to be sure, has withdrawn some American forces. He promises to reduce more. He indicates that 280,000 will still remain a year from now. That is a very large force. The President indicates that they will stay until the Saigon rulers are ready for us to leave.

The trouble with that formula is that General Thieu and his government are never likely to want us to leave. They owe their power to American military and financial presence. The Saigon generals have ignored, and our military command has suppressed a recent poll indicating that 65 percent of the people of Vietnam want us to withdraw from their country now.

The Vietnamization formula is also an invitation for the enemy to continue attacking our troops. Why should he stop his military effort if he believes that Vietnamization is a plan to exclude him from power in South Vietnam.

I believe the formula offered by a group of us in the Senate, called "The Amendment to End the War" is a better approach. What does it provide? Its essence is a definite withdrawal date. It says that all American forces must be out of Vietnam, out of Laos, out of Cambodia, by the end of next year. It provides an emergency clause that would give the President the power to extend the deadline for 60 days. Any further extension would require the approval of the Congress of the United States of your representatives in that assembly.

The amendment also authorizes funds to cover the costs associated with the release of prisoners, with asylum for those Vietnamese who might be jeopardized by our withdrawal, and for assistance for the people of Vietnam in rebuilding their war ravaged country. This amendment builds squarely on the Constitution of the United States, a Constitution which gives the Congress the power to declare war and to decide both the scope and the length of American commitments.

The Senate amendment formula serves notice on the Saigon generals that we are definitely coming home at a set time. It says to them: You have no more than 16 months to broaden and strengthen your government, either for the purpose of taking over the war or negotiating a settlement with your challengers.

If this amendment were enacted, I fully believe it would end the war. I am convinced that Saigon would move quickly toward a political settlement with their challengers, once they knew that they no longer could depend on American blood and treasure.

The Senate amendment would also be an invitation to the enemy to stop his military operations and begin negotiations. With the assurance that our forces were being withdrawn, Hanoi would certainly find less reason to attack and harass American troops during that interim period. Indeed, it would be in their interests to hasten our withdrawal and reduce their own casualties by making it easy for us to leave.

The writers of our Constitution intended that the Congress and the President together should conduct the great issues of war and peace. Article I, section 8 of our Constitution says: "The Congress shall have power to declare war . . . to raise and support armies . . . but no appropriation of money to that use shall be for longer than two years."

Unfortunately, the Congress in recent years has not fulfilled that Constitutional obligation, to review our military operations with a critical eye and an independent point of view. We have instead shifted our responsibilities to the President of the United States.

The Amendment to End the War would help restore Constitutional government. It would place on the Congress part of the burden now being carried by the President. It would reduce the danger of post-war scapegoating by broadening the base of decision for ending this unpopular war short of victory.

Tomorrow morning at 10 o'clock, the Senate of the United States, your representatives, will vote on this Amendment to End the War. I regard that vote as the most important one I have cast in my service in the Senate, and the most important legislative proposal I have offered.

As we prepare to vote tomorrow, I pray that all of us in the Senate will remember the admonition of Edmund Burke, the great British parliamentarian of an earlier age: "A conscientious man would be cautious how he dealt in blood."

Mr. MONROE. We have heard from Senator George McGovern of South Dakota, and from Senator J. W. Fulbright of Arkansas. With me is Paul Duke, NBC News Capitol Hill Correspondent, who covers the activities of these gentlemen and other Congressmen and Senators.

Paul, it seems to me that Senator Fulbright and Senator McGovern didn't say anything particularly new tonight, but maybe it is not possible to say anything new at this stage of the debate on Vietnam.

I was interested and somewhat surprised in Senator McGovern winding up with what seemed to be a pitch in behalf of the Hatfield-McGovern amendment, surprised because it seems likely, as I understand it, that the Hatfield-McGovern amendment, the so-called "Amendment to End the War," will be rejected by the Senate tomorrow, and thus Senator McGovern runs the risk in emphasizing it that his colleagues will seem to be rejecting in a few hours what he and Senator Fulbright have had to say.

What is the possibility for passage of the Hatfield-McGovern amendment?

Mr. DUKE. I would say there is no possibility at all, Bill. We can say with assurance the amendment will be beaten tomorrow. But the goal of Senator McGovern and the other sponsors, now, is not passage of the amendment, but a show of strength. Their hope is to get as many as 40 votes. They hope by getting 40 votes to do three things. They hope that this will show the Administration that many members of the Senate and the House as well are opposed to the dragged-out fighting, and they would like to speed up an end to the war. They hope it also will remind the Administration, will remind the White House, that many Senators now want a greater share in the formulation of foreign policy.

Additionally, they hope that if they can get 40 votes, that President Thieu and the South Vietnamese government will then be convinced of the opposition that continues in this country and that the Thieu regime may take a more flexible view toward working out a peaceful settlement. Those are the real goals of the sponsors of the amendment.

Mr. MONROE. Perhaps we should also mention an unusual thing about this broadcast. It comes in response to an FCC ruling that if the President makes five speeches on a particular subject, the other side should have some time to answer him. It sort of upsets a theory of the networks that the President is a unique figure voted on by all the people, President of all the people, and therefore should have time whenever he asks for it. But the FCC more or less says in effect that the President is also about 20 percent politician. And I wonder in the future if the President might be a little bit inhibited in asking for time as much as he has in the past if he feels he is building up a necessity for the opposition to answer him.

Mr. DUKE. I don't know about the President being inhibited, but I think we can say, Bill, that many senators will not be inhibited because of the FCC's recent ruling. I think we can also say that many Senators regard themselves as unique figures. We are getting various proposals in Congress now for Congress to respond to the President. Senator Fulbright, himself, for example, has one suggestion. That is he would have an authorized representative of Congress appear on television four times a year to state the views of the Congress. But the question here is, who would represent Congress? Would it be Senator Fulbright, or would be be Senator Stennis, who heads the Armed Services Committee and has an opposite viewpoint?

Mr. MONROE. That might take a little deciding.

Thanks very much, Paul.

I am Bill Monroe. On behalf of Paul Duke and myself, good night for NBC News.

ESSAY BY JOHN K. DAVIDSON, ATLANTA, GA.

Mr. GURNEY. Mr. President, it is reassuring to read the measured words of a young man who I feel captures the sentiments of a majority of young people today. John K. Davidson, of Atlanta, Ga., recently wrote an award winning essay that I feel deserves the attention of all of us. As high schools and universities begin to open their doors I think Mr. Davidson's essay is particularly timely and cogent. I ask unanimous consent that John Davidson's poignant and thoughtful essay be reprinted in the RECORD.

There being no objection, the essay was ordered to be printed in the RECORD, as follows:

A MATTER OF POTENTIAL

(By John K. Davidson)

One great educator became so enraged with what he called the "licentious, outrageous, and disgraceful" behaviour of his students that he quit in disgust. The city was Carthage, the year 383 A.D., and the teacher, by his narrative in *Confessions*, was Saint Augustine. Nowadays, as students across America and throughout the world are engaging in an enthusiastic and seemingly idealistic mission against the leaders, institutions, and most cherished beliefs of civilizations, the example of Saint Augustine may suggest that adolescent upheaval is not a particularly new or novel historical concern. Nevertheless, the response of society to the youth rebellion, as anthropologist Margaret Mead has pointed out, could involve some of the most significant decisions of our time.

The ferment of the current student revolutionaries, on and off campus, is of enormous benefit to society. There is a unique oppor-

tunity to assimilate the age, experience, money and organization of the elders with the energy, idealism and social consciousness of the young; but a prime requirement is the courage to listen to a youth who has seen his civilization as it really is, burning in poverty and injustice, and seeks the necessary remedies. He is willing to talk with older persons, even those who could be regarded as associates of the "Establishment," but only if he senses that they are genuinely interested in him. His thoughts are rarely senseless babble. They are, in fact, supported by the astonishing public access to new concepts and information which illuminate the subtler shadings and contradictions that scar modern civilization. With the very accomplishments of previous years—in technology, communications, and affluence—focusing the young person's attention on what the parents have actually failed to accomplish, it would be a symptom of grave illness in our social order should the voice of dissent remain silent.

Not all of the youths' concern is admirably expressed, of course. An influential minority have pledged themselves not only to the restructuring of society as a whole but, to quote Winston Churchill, "the thorough disintegration of all that remains of the old". Fortunately, their number is very minute and motley, and their aspect as professional hoodlums is a manageable legal problem. Indeed, young people—all—who break the law as a symptom of protest must be willing, in the comment of a prominent New England statesman, to "pay the penalty and hope for ultimate vindication." But to limit the issue to this ruling will be acknowledgment of defeat. In the repression of dissent, the responsibility for violence shall hang as much on society as those who protest, and the burden of revolt may too soon become crushing.

The prime area to benefit from student activism could well be the educational system itself. As Sputnik advanced the emphasis on square root instead of square dancing, perhaps the increasing concern of the young with the world they are destined to inherit can invoke—in the universities, at least—a less aloof consideration of the desperate nature of the external globe, and the moral responsibilities that accompany existence upon it. "Black study courses" are outstanding applications of this much-needed attitude.

The students are a minority group by distinction of age, and, as it is, their constructive strength is severely limited. Therefore, they need to be impressed not just of their potential but of the faults and exercises that can terminate it. For example, they should be advised to exercise greater restraint in their diplomacy than the bigoted, self-righteous arrogance of "non-negotiable demands". Otherwise, the universities will hold every right to follow suit; they won't negotiate. Concurrently, there should be a watering down of their youthful pride in being so "independent", and more recognition of the value of cooperation with those people they ordinarily assume to be least attuned to joint operation: the parents, the teachers, and the government.

As well, students must realize that they are not the divine inventors of social consciousness, that the world had witnessed its Bonus Marchers and Abolitionists (it was Irwin Cobb who said: "The trouble with the younger generation is that it hasn't read the minutes of the last meeting"). By doing so, they can plot the most profitable courses of action, weigh their own chances of success, and obtain invaluable perspective into the historical denominators that send them in search of dragons to destroy. And above all, *relevance*—they must extend their outlook. The discharging of energies into the harassment of ROTC officers and debating the merits of sexually integrated dormitories seems laced with touches of the sin of selfishness. The fact, as an example, that Biafra is an ocean away, but the Dean's office just across the campus, does not excuse failure to ponder the truly paramount issues facing an entire world, issues that do not smell of trivia, but concern peoples' beliefs, their freedoms, and their lives.

Yet, even the noblest soul can benefit neither itself nor society through the inclination to violence. The colleges must convince students that they will not be permitted to believe there will be no consequences for their actions; the nature of the institutions fail in this obligation, the results of such a *folie a trois*—the college replicating the parental abdication of authority—might not be clarified until the advent of the next generation, but there is a potential for social destruction, and it is indeed immense.

BISHOP JAMES E. WALSH

Mr. TYDINGS. Mr. President, many persons across the Nation shared in the joy of the release of Bishop James E. Walsh after serving 11 years of a 20-year sentence in a Communist Chinese prison.

A native of Cumberland, Md., Bishop Walsh was a missionary in China in 1960 when he was accused of espionage against the People's Republic of China.

Among those who rejoiced most about Bishop Walsh's return were his fellow Maryknollers. Bishop Walsh was one of six students in the first class at Sunset Hill, the Hudson River complex of Maryknoll, a missionary order of Catholic priests and nuns.

As I expressed in a telegram to Bishop Walsh's family in Cumberland at the time of his release, it is indeed unfortunate that Communist China took 11 years to release a man who has served the better part of his life as a missionary of love and peace.

Pope Paul VI rejoiced over the eminent bishop's release. His fellow Maryknollers rejoiced. His family and friends in Cumberland, Md., rejoiced. Indeed, all who honor love and peace, the message that the bishop spread, rejoiced.

I ask unanimous consent that the article from the September 1970 Maryknoll magazine, an article in the August 25, 1970, Baltimore Evening Sun about the meeting of the bishop with Pope Paul VI in Italy, and the text of the Pope's remarks be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

[From Maryknoll magazine, September 1970]

FREE AT LAST!

(By Moises Sandoval)

It didn't look like a day for good news. Morning came but the darkness lingered, held in by black, threatening clouds, and thunder rumbled in the distance. The kind of a day when you hate to get up and, when you do, don't venture a "good morning" to anyone.

But there was no avoiding the smiles in the long, dark seminary corridors. No one passed without greeting you.

"Did you hear the news?"

"Yes."

"Isn't it great?"

Several hours before, Maryknoll Bishop James E. Walsh, for 12 years in a Red Chinese prison, had crossed the border bridge to freedom at Hong Kong.

So there was joy and excitement at the breakfast table. "I wonder how he'll feel about all the changes," said one priest for whom the changes must have come hard.

By now the rain was coming down hard. But the priests and Brothers of Maryknoll paid it no heed. No rain was going to spoil this day. By their happiness, it might well have been one of those clear days when you climb the seminary tower and see—well, not forever—but 35 miles down the Hudson River to Manhattan and several pleats of green Catskills to the north. It was Bishop Walsh's day. And Maryknoll's day. July 10, 1970.

For someone not a Maryknoller it might be difficult to understand the emotion generated by Bishop Walsh's return. But he was to Maryknoll what one of the founding fathers was to the United States. Imagine, then, the excitement if, say a resurrected Thomas Jefferson were to arrive in Washington to counsel with present government leaders and kindle the spirit of a troubled nation!

True, Bishop Walsh was not the founder. But he was the second of six students in the first class. He came here when Sunset Hill, site of the sprawling Maryknoll complex, had only wooden farm buildings badly in need of repair. Perhaps he, more than any of the early Maryknoll missioners, was able to describe and articulate and live the vision and ideal of what the Maryknoll missioner should be and do. He was, perhaps, much larger than life—tough, wiry, stubborn.

Alone, he chose to remain at his post in China despite pressure from the Communists and uncertainty about the wisdom of his decision.

"I cannot estimate the good I may be doing, apart from the settled missionary rule that kept me here," he wrote his superior. "In any case a priest seldom knows if he is an asset to the Church in his particular place at any time. I encourage some, alarm others. I do little more than say my prayers and walk the streets to show my Roman collar.

"The problem really is: are the reasons valid and grave enough to set aside the established principle that a priest ignores adversity and remains at his post?"

Harassed since the Reds took Shanghai in 1949, his Catholic Central Bureau closed in 1951, under house arrest from then until he was finally imprisoned, Bishop Walsh lived the following ideal:

"In the fight for a world, the victory will go to the strong. That fight is going to be won and through the Cross. . . . We must bear and love the Cross as it blisters and burns and bites in order to pour into us its divine strength.

"Sacrifice is needed to make us strong. This is not a time for half measures. We must seek the Kingdom of God and His justice and we must seek them at the cost of any violence to ourselves."

But now Bishop Walsh was coming home and no one awaited his return with more anticipation than Farther Bernard Meyer. At 79, the same age as the bishop, Father Meyer seems to be from the same hardy mold. He is spry, precise, good-humored, articulate, steeped in memories of 31 years in China. They were two of the first four Maryknoll missionaries to go to China in 1918 and worked together for years.

Father Meyer returned from China in 1949. He now resides at Maryknoll's St. Teresa's Residence.

"We will have a lot of things to talk over," he said. "I am looking forward to hearing his reactions to the many changes which have occurred in the Church and in the world since he was imprisoned. They will be typically his very own."

The bishop's release came as a complete surprise. Maryknollers seemingly had resigned themselves to not seeing him again. He was 68 when he was sentenced to 20 years in prison in 1960 on charges of espionage against the People's Republic of China.

Hardly anyone would have dared hope that he would one day walk out.

His brother William, Cumberland, Md., saw him in 1960 for what he thought was the last time. Over three days he was allowed to visit the bishop for two hours and 35 minutes. When they said goodbye, William voiced the thought in their minds. Bishop Walsh replied:

"Then we will meet again in heaven."

Bishop Walsh himself received no hint that July 8 would be a special day. But at 8 a.m. he was told to pack his bags and a doctor came to check his physical condition. His jailers told him that although he was a great criminal, he was being released because of the leniency of the government and out of respect for old age and good behavior. By 10 a.m. he was aboard an air conditioned train from Shanghai accompanied by a doctor, two interpreters, a photographer and three policemen.

With no previous announcement, he walked across the railroad bridge at Lowu. "I have been in China a very long time and I am glad to get out," Bishop Walsh told Hong Kong border authorities.

Arriving at Our Lady of Maryknoll hospital by ambulance, Bishop Walsh said he looked forward to celebrating his first Mass in 12 years. Doctors found him in good health. Drinking his first cup of coffee since his imprisonment, he said, "That tastes as good as this freedom."

Two days later, he celebrated Mass in Latin in his hospital room in the presence of Maryknoll Sisters Patricia Fitzmaurice, a doctor, Katherine Byrne, a nurse, and Father John J. Sullivan, Maryknoll Superior in Hong Kong. Afterward he remarked: "Oh, I forgot to go to Confession." Then, with a smile: "I guess I have no sins."

The only news he read in 12 years were in Chinese magazines in English. His recollections of prison were positive. "He is humble as always," said Father Sullivan.

Father John J. McCormack, superior general of Maryknoll, went to Hong Kong to see Bishop Walsh, returning through Rome where he would see Pope Paul VI. Bishop Walsh and Father McCormack concelebrated Mass in Hong Kong. There were happy telephone calls between Bishop Walsh and his brother and sisters.

"He never gave up hope," said his sister Mary. "He had complete faith in God." An editorial in *the New York Times* following his release said:

"There is stirring human drama in the saga of Bishop James E. Walsh who walked to freedom in Hong Kong yesterday. . . . So indomitable was Bishop Walsh's spirit, so strong his faith, that he has survived and is now free at the age of 79." Similar tributes came from many other people.

Pope Paul VI, in a talk to pilgrims, rejoiced over Bishop Walsh's release. He sent the bishop a special apostolic blessing and hoped that this portended better days "for freedom and religion, as well as for the sake and honor and prosperity of that immense nation (China) which the Church has never ceased to love."

So it was back to Sunset Hill for Bishop Walsh, but, in Thomas Wolfe's phrase, he could not go home again. Because many, many changes have come since he left home in 1946. And of Sunset Hill as he first saw it in 1912 and its farmhouse seminary, perhaps only the magnificent view remains. Gone are the buildings, the streetcars which brought him and others to the base of the hill to begin the priestly life and the other great men who first gave life to the mission of Maryknoll.

Many of the changes would be happy ones. For one, Maryknoll has grown much. The number of Maryknoll priests, Brothers and Sisters has tripled since 1946. There are now about 1,200 priests and Brothers and 1,312 Sisters in 16 countries in Asia, Africa and Latin America. Each major city in the country has its Maryknoll House staffed by priests who serve Maryknoll's large family of concerned Christians who contribute money, prayers and vocations—literally millions of people. New wings have been added to the seminary. New buildings have gone up on Sunset Hill.

Bishop Walsh would probably also rejoice in the added emphasis on professional competence in many fields, always a Maryknoll trademark, but now more than ever a reality. Many of the priests, Brothers and Sisters are not only schooled in the typical curriculum specializing in philosophy and theology but also have special competence in agronomy, medicine, journalism, education, community organization, nursing, labor, management, cybernetics and many other areas. Almost daily, it seems, men return from the field for refresher courses to improve the quality of their service.

All this fits in with Bishop Walsh's vision of what the Maryknoller should be. In a description of a missioner written several decades ago when he was vicar apostolic of Kongmoon, China, he wrote:

"He (the missioner) will do his best praying not in the quiet of his chapel, but treading forest paths and poking into farmhouses and hobnobbing in the market places, where the zeal of his vocation should eternally take him in an unceasing quest for souls. His own soul is saved only by saving others."

The Maryknoller now more than ever sees himself as the modern Good Samaritan. He is not like the priest of the Scripture story who passed by the wounded man on the roadside doubtless because he had to go preach somewhere. Rather, the Maryknoller is the stranger who stops to bind up the wounds of all those along the roadsides of this world who are robbed of their health, dignity or opportunity for the full life of faith to which they are entitled as sons of God. And in coming to serve rather than to be served, to act, to make life better now rather than just promise pie in the sky, the Maryknoll missioner walks in the footsteps of Jesus.

There would be many other changes evident to Bishop Walsh—the new rubrics of the Mass, now in the language of each nation, the ferment in the Church in general, the ever evolving concept of what priesthood is, the changing images and expectations of priests, Sisters and laymen and new perspectives even on moral principles.

And perhaps Bishop Walsh will find that there is to be no luxury of retirement, what with the demands that will be made on his time for articles, memoirs, television interviews. But he long ago resigned himself to that:

"There is no gentle setting into the pleasant groove of old age for the missioner," wrote Bishop Walsh long ago. "His surroundings fail to recognize and allow for that natural process. . . . He is denied the privileges of growing old. It is true that his teeth fall out, and his hair grows grap; he may look old, and even feel old: but in all the essentials that make the man, he is condemned to eternal youth, for the missions will forever demand of him the resiliency of a rubber ball."

But, if he can't have rest he can at least have the peace of knowing that Maryknoll continues to spread the Gospel with the same zeal and energy and impatience of St. Paul.

[From the Baltimore (Md.) Sun, Aug. 25, 1970]

PONTIFF EMBRACES BISHOP WALSH, LAUDS "ENDURING LOVE, SUFFERING"

CASTEL GANDOLFO, ITALY.—Pope Paul VI tearfully embraced Bishop James Walsh today and thanked him "in the name of Christ for all that you have done and suffered" during his 12 years' imprisonment in Red China.

In an audience, the pontiff told the 79-year-old American missionary:

"We know that your sufferings have not been in vain . . . We are confident that the example of your enduring love will show the world and especially the young the greatness of the missionary calling:"

The Pope spoke in English to the frail, white-haired bishop. It was their first meeting, and they talked alone for 15 minutes. Then Church officials, relatives of Bishop Walsh, and a television crew joined them.

HELPED INTO PALACE

The pontiff gave Bishop Walsh a bishop's pectoral cross.

Bishop Walsh's last visit to Rome was in 1943, when he was received by Pope Pius XII.

Although still weak and fatigued from his long ordeal in China, Bishop Walsh waved away a wheelchair when he arrived at the Pope's summer palace after the 15-mile drive from Rome.

He was helped into the papal palace by Sister Patricia Fitzmaurice, chief surgeon at the Maryknoll Hospital in Hong Kong, who accompanied him to Rome, and Bishop Paul Marchinkus, the Pope's American aide.

With them for the papal audience were two of Bishop Walsh's five sisters, Miss Mary Walsh, 77, and Mrs. Frank L. Werner, 68, both of Cumberland; a niece, Sister Betsy Walsh, of Manhattanville College, N.Y.; Father John J. McCormack, the superior general of Bishop Walsh's Maryknoll Order, and Archbishop Giovanni Benelli, the Vatican under secretary of state.

Bishop Walsh and Sister Fitzmaurice arrived in Rome yesterday from Hong Kong. They are expected to fly to New York next Monday with Father McCormack.

[From the Baltimore (Md.) Sun, Aug. 25, 1970]

TEXT OF POPE'S REMARKS TO WALSH

VATICAN CITY.—Here is the text released by the Vatican of Pope Paul's remarks today to American missionary Bishop James Walsh:

"Dear brother in Christ,

"Over 50 years ago you left your homeland with the first group of Maryknoll missionaries to go and serve the beloved Chinese people. It was from the church of Christ that you received your mission to preach the Gospel in His name.

"WITNESS IN JOY, SORROW

"Today you have returned from your mission, more painful than you perhaps expected. It is the Pope who receives you back and who thanks you in the name of Christ for all that you have done and suffered.

"You have been a witness, authentic and simple, in joy and in sorrow, then in suffering and humiliation, and finally, in separation from the people whom you loved so much. For all of this we thank you also on behalf of the entire church of Christ.

"We cannot let the occasion pass without commenting on the mystery of Christian suffering which has been yours.

"Apart from the responsibility of man that is involved sometimes in suffering, we are convinced that it has great value. You have surely meditated long and often on the teaching of St. Peter;

"SUFFERINGS NOT IN VAIN

"The merit, in the sight of God, is in bearing it patiently when you are punished after doing your duty. This, in fact, is what you were called to do, because Christ suffered for you and left an example for you to follow the way He took. (1 Peter 20–21).

"You have indeed followed nobly in his footsteps. We know that your sufferings have not been in vain but that they are like seeds of Christian virtue that will grow up in God's good time. The extent of their value is known only to the Lord.

"We are confident also that the example of your effective and persevering love will

help to show to the world and especially to the young the greatness of the missionary calling.

"We want to tell you today that our joy is great to have you with us. We assure you of our special and deepest affection in the Christ who called you and sustained you in your trials.

"With fraternal love we give you once again our apostolic blessing."

AQUI NO SE HABLA ESPANOL—DEATH OF REUBEN SALAZAR

Mr. KENNEDY. Mr. President, on Saturday, violence flared in a 10-block area of East Los Angeles known as the Barrio. The city blocks stretching across East Los Angeles encompass the Nation's largest concentration of Spanish-speaking citizens, nearly a million Mexican Americans.

The clash between police and a small percentage of the 20,000 persons who had gathered to protest the war in Southeast Asia has cost the Mexican American community one of its most eloquent and the Nation one of its finest journalists.

Reuben Salazar was killed while relaxing after work. He had covered the antiwar march earlier in the day.

An inquest will determine exactly how he died and who was responsible for his death. But it is enough now to know that he is dead for the Natior to mourn.

Reuben Salazar was a reporter for the Los Angeles Times since 1959, drawing assignments in the Dominican Republic, Mexico, and Vietnam before returning 2 years ago to cover the Chicano community of Los Angeles.

His column in the Los Angeles Times frequently expressed to the non-Spanish speaking society some of the anguish and torment of the Mexican American.

For the U.S. Civil Rights Commission, Reuben Salazar chronicled the series of hearings that exposed overt discrimination against the Mexican American in many parts of the Southwest.

He wrote of being a "Stranger in One's Land" and narrated the Mexican American's first exposure to discrimination in the school system:

You know it almost from the beginning: speaking Spanish makes you different. Your mother, father, brothers, sisters, and friends all speak Spanish. But the bus driver, the teacher, the policeman, the store clerk, the man who comes to collect the rent—all the people who are doing important things—do not. Then the day comes when your teacher—who has taught you the importance of many things—tells you that speaking Spanish is wrong.

Reuben Salazar will be missed not only by his family, friends, and fellow Chicanos but also by those who knew him through his work.

I ask unanimous consent that an article on the subject be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 1, 1970]

DEMAND FOR PROBE FOLLOW NEWSMAN'S DEATH IN LOS ANGELES RIOT

(By Leroy Aarons)

LOS ANGELES, CALIF., August 31.—The strange death of newsman Reuben Salazar, whose head was ripped open by a tear gas projectile designed to pierce barricades, prompted a chorus of demands today for federal intervention.

Reaction among Mexican-Americans, here and nationally, was angry and suspicious.

Demands for a federal investigation were made by City Councilman Thomas Bradley, unsuccessful candidate for Los Angeles mayor a year ago; by the station manager of KMEX-TV, where Salazar worked, and by two national Mexican-American figures.

Salazar, columnist for the Los Angeles Times and news director of the Spanish language station KMEX, was killed by a missile fired into a bar by a Los Angeles County sheriff's deputy during a disorder Saturday in the Mexico-American ghetto of East Los Angeles.

His was the only fatality of the four-hour disturbance which resulted in more than 250 arrests, 74 injuries and possibly $1 million in damage.

MEXICAN PROTEST

Newspapers in Mexico, where Salazar was born 42 years ago, featured news of his death on their front pages. A local coalition of Chicano groups demanded today that Mexican President Diaz Ordaz cancel his scheduled meeting with President Nixon in Coronado, Calif., Thursday until "the police murderers of Reuben Salazar" are brought to justice.

President Nixon called Salazar's death "a very tragic thing," but Press Secretary Ronald Ziegler said no federal intervention was planned while the county sheriff was "appropriately investigating" the incident.

County Sheriff Peter Pitchess, who canceled a scheduled press conference today, released a statement saying he had asked the FBI to determine if there were any violations of federal law during the disturbance. He also called for a coroner's inquest into Salazar's death.

The department maintained an official silence, however, about the nagging question of why four 10-inch long, bullet-shaped tear gas missiles were fired into the barroom at close range by sheriff's deputies. Inscriptions on the projectiles state: "For Driving Out Barricaded Persons. Not to Be Used Against Crowds."

Eyewitnesses at the Silver Dollar Cafe, where Salazar had gone during disturbances along Whittier Blvd., said police fired through the open door of the bar through a curtain operating the entrance from the bar.

Sheriff's spokesmen acknowledged this, saying deputies responded to a report of a man with a gun and fired only after demanding the occupants come out and getting no answer.

KMEX station manager Danny Villaneuva contradicted parts of the police version. He cited accounts by a KMEX reporter and two of the reporter's friends, all of whom he said were in the bar with Salazar.

"They report that no warning to clear the cafe was given," said Villaneuva. "They report that people attempting to leave were forced back inside."

"They report that they insisted to sheriff's officers . . . that Salazar was injured and still inside the cafe, but were . . . told to clear the area immediately."

A sheriff's spokesman said deputies did not learn about the body until they received a citizen's report around 7 p.m., nearly three hours later.

Villaneuva's call for a federal probe was echoed by Manuel Luiz, nominated by President Nixon to the U.S. Commission on Civil Rights.

Also, Domingo Nick Reyes, executive director of the National Mexican-American Anti-Defamation Committee, said in Washington, "No other person has been as dedicated (as Salazar) to articulating to the Anglo community and public at large about the hopelessness, frustration and tensions in the barrios of the Mexican-American community." He called for an FBI investigation.

Salazar left the Los Angeles Times four months ago after a career that took him to Mexico City, Vietnam and the Los Angeles barrios. In recent months, both in a weekly column which he continued to write for the Times and in his work for KMEX, he began to show greater frustration with a system which he warned was encouraging increased militancy among his people.

Recently, his attention turned to police abuses, one of the most volatile issues in East Los Angeles.

One recent incident he emphasized was the mistaken slaying of two Mexican nationals by Los Angeles police in July.

Associates said Salazar was about to embark on an expose regarding a number of Chicanos who had been reported as suicides in cells at a sheriff's substation.

Abe Tapia, president of the Mexican-American political association, said flatly today that in his opinion Salazar had been "pinpointed because of what he was bringing out as to injustices."

Present evidence is police did not know who was inside, but the impression that Salazar was a police target was widespread in the four-mile-square barrio.

Tensions continued high in East Los Angeles and spread to Mexican-American communities in Wilmington, south of the city, and Riverside, about 45 miles to the east.

CRIME PREVENTION TEEN PROGRAM, INC.

Mr. ALLOTT. Mr. President, the August 1–2 weekend edition of the Longmont, Colo., Times-Call contained a most informative guest editorial written by a most unusual editorialist.

The author is Joe Weldon Mitchell III. Mr. Mitchell is an inmate at Colorado State Penitentiary. He is also an exemplary citizen.

Mr. Mitchell and other inmates have organized Crime Prevention Teen Program, Inc., a public service program for deterring crime. This program features cooperation between inmates and service organizations in various communities. Their service organizations organize forums where young people can hear inmates discuss their own lives, their problems, and their clear understanding of the fact that crime does not pay.

Before inmates are allowed to undertake these speaking engagements they must complete a 14-week human relations course. Then they are given a chance to give young people the sort of vivid lecture that will make a lasting and beneficial impression.

Mr. President, so that all Senators may profit from Mr. Mitchell's guest editorial, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

PRISONER EXPLAINS TEEN PROGRAM

(By Joe Weldon Mitchell III)

The Crime Prevention Teen Program, Inc., is a statewide program developed by Colorado inmates in an attempt to deter crime.

They speak throughout the state before numerous groups to encourage youth to not follow the road they have.

Who is qualified to talk on consequences of crime? Who can express the conviction that authoritative presentation demands? Who knows the reality of prison, the inevitable consequences of criminal behavior?

Who can actually establish a line of communication with the "youngster" who may stand on the threshold of those "Little Things" that eventually lead to felony conviction?

Four years ago, these questions caused concern among inmates who wondered how they could deter young people from following them to the penitentiary. The statement was agreed upon that if any of us had understood the consequences of our behavior when we were young, perhaps we would not have come to prison. Thus the idea of convicts telling their lives in crime was born.

Convinced of potential good that such a program could have, Canon City Warden Wayne K. Patterson gave tentative approval and the Crime Prevention Teen Program became reality.

The program was separated into two groups, the "Inside" Committee and "Outside" Committee. The "Inside" phase would talk to groups coming into the institution on tour and the "Outside" would travel around the state to schools, churches, social and civic groups. Successful completion of a 14 week human relations course was made a prerequisite before applying for membership to the "Inside" Committee.

First engagement of the Crime Prevention Teen Program was in Florence, sponsored by the chief of police of Canon City, April 26 1966 to a group of Scouts. Two inmates told their life history, setting themselves up as bad examples and seeking to destroy any hint of excitement that some might think exists in criminal life. They did not advise or counsel but said: "Look at the failure I am and recognize the things I did to get here."

From this engagement, more than a hundred letters were received commending the idea and pledging support.

Since there are no state funds allocated, inmates involved had to at first pay their own way. But soon various civic and church groups began to donate money and since the Crime Prevention Teen Program has been supported through donations. The prison administration does what it can financially but are limited in this respect.

The basic good accomplished can not be measured per se, for how are we to know how many youngsters and adults alike actually change their behavior as a result of hearing a teen presentation. We know of some. One involved a boy who had stolen some money from his mother's purse but after hearing us, he replaced the money.

Our basic sense of accomplishment comes when after talking to a group they make confessions of "wrongs."

I was inspired by acceptance of the program by outside supporters and the sincerity of our members. Often I find, I am listening as intently as the audience to the personal stories, and everytime, see a little bit more of me in the member that is speaking.

The program is twofold. First and foremost—and with a sincere and dedicated effort, we try to convince the youth to "stop and think".

Many of us involved in the program have never done anything for anyone other than ourselves. I would like to think that if I had a son or daughter out there—there would be someone that would take the time to sit and talk with them—at a time that demands that everyone be in a rush. I am proud of the program and proud of the people of Colorado for allowing us to speak with their youth.

We realize that we don't have a "proven" method of deterring crime but we feel confident by telling of our lives, the audience will be able to see in us, the "wrong" choices, and this is what it's all about—"Being able to make the 'Right' choices."

THE ADMINISTRATION'S INFLATION ALERTS

Mr. MUSKIE. Mr. President, recently the Nixon administration issued the first of what it hopes to be several periodic "inflation alerts" on the rate of price increases in the economy. While I welcome this tentative Presidential initiative in the fight against inflation, it does more to tell us where we have been rather than where we are going.

I think we need standards in this area which will tell us the rules of the inflation fight. The President should institute a system of voluntary wage-price guidelines so business and labor know what are proper wage and price increases. If there are no specific standards on an industry-by-industry basis, how do we know if we are winning the fight? It is time to point out the specific causes of an inflation which robs groups already the most vulnerable on our society, the elderly, the poor, the blue-collar worker.

Not only do we not have a scorecard to measure the success of the administration's game plan, but we lack a schedule of its upcoming opposition. For example, I fail to note any reference in this inflation alert to the recent auto price increases, which certainly will provide pressure on the general price level.

As the alert was issued, employment continued its climb to 5 percent. This makes the matter of voluntary wage-price guidelines doubly important if we are going to take steps to resume economic growth without further inflation.

From where I stand, the primary tool the President has at his command is that of persuasion. He should pick up this tool and use it.

MINORITY BUSINESS ENTERPRISES

Mr. MURPHY. Mr. President, I wish to discuss the administration's program to assist minority business enterprises.

I have long believed that most of the problems that face this Nation cannot alone be solved merely by programs initiated from Washington. Rather, we must have the commitment and cooperation of our citizens on the local level for these programs to have a meaningful effect.

I invite attention to the success of one such program in Solano County, Calif., as described in the Vallejo Times Herald for August 9, 1970. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MINORITIES AIDED IN STARTING FIRMS

(By Charlotte Pruitt)

Before "Operation Mainstream," few minority persons had the opportunity to own their own businesses.

There was money available to buy cars and perhaps home ownership was possible if you had a steady income . . . but this is where the rainbow ended.

Not many people or loan institutions were willing to take a chance on a black or tan man operating his own company . . . after all it's hard to admit that minority persons manage to exist without handouts from Uncle Sam.

But the old way has changed.

SEARCH START

In fact, a search is on for responsible black men or other minority persons who previously thought it impossible to be in business for themselves.

Operation Mainstream, coordinated locally by the Solano County Business Development Corporation and working in cooperation with the Small Business Administration (SBA) and local banks, has made the change possible.

Big corporations, including the nation's major oil companies, have pledged their support to the federal government's a chance to enter the mainstream of life and enjoy its benefits.

As an example, the oil companies agreed to put 26,000 new dealerships into minority hands.

OFFER LOANS

The program doesn't involve grants . . . it's a matter of qualifying for a loan to be repaid from business revenue.

One man who met the loan criteria is George Wilson of Vallejo . . . the first black man on the West Coast to own a new service station under Operation Mainstream.

And Wilson's Gulf Service Station isn't located in a little neighborhood area but in the mainstream of traffic at 2050 Solano Ave. across from the new Payless Shopping Center.

The handsome station with its attractive landscaping is worth an estimated quarter million dollars and the hard working Wilson has invested some $10,000 in the new venture.

Wilson opened the station on July 3, 1970 and his grand opening "with all the giveaways" was held yesterday with the participation of civic dignitaries.

Wilson, who spent 20 years in the U.S. Navy before moving to Vallejo 10 years ago, couldn't believe his ears when he was asked if he would like to have his own station. At the time he was pumping gas and operating the tow truck service at the Gulf Station on Sears Point Road at Broadway.

HEADS GROUP

He was approached about the new business opportunity by Lestee Ceasar, a Vallejo school teacher who serves without pay as executive director of the Solano County Business Development Corporation (SCBDC). Since the Gulf company had made its pledge to dealerships, Ceasar couldn't imagine why it wouldn't grab the chance to help a man who already was in their employ . . . and he was right. Now all that had to be done was make contact with the SBA and a local bank which is past history.

"People keep bringing their cars back in because they know we're going to treat them fairly . . . whether it's a matter of gas or repair," Wilson said with his engaging grin.

Henry H. Burton Sr., who owns and operates Burton's Radio and TV Service at 1931 Solano Ave., is another black family man who has received help from Operation Mainstream.

BANK LOAN

Burton's loan, arranged by the Bank of America, gave him needed operating capital and funds to buy equipment and expand his busines which has been established in Vallejo since March, 1955.

Burton, a supply specialist at the Benicia Arsensal when he began training for the television repair business, has been in Vallejo since 1946. After receiving his substantial training in the field, Burton began his service on a part-time basis and graduated

into a full-time operation when he quit the Arsenal in 1960.

He is a graduate of Langston University in Oklahoma where he majored in mathematics and spent two and a half years at the University of Kansas before entering the U.S. Army which took up three years of his life.

Burton is director of religious education at Vallejo's Second Baptist Church, is a member Chapter of the Langston Alumni Association and American Legion John King Post 619 as well as treasurer of the SCBDC, a volunteer position.

SERVICE CENTER

"Referral from satisfied customers who enjoy personalized service has been my best advertising," Burton replied when queried about his thriving business. Although primarily a servicing operation, Burton also is a retail outlet for television sets.

Another example of the value of Operation Mainstream is evidenced by Leo Kiel, Vallejo's major industrial caterer.

Kiel received an improvement loan arranged through the Wells Fargo Bank and SBA which made it possible for him to expand his business to make a better living. He employs both Caucasians and minority persons. "If they do a good job, that's who I want," he explained.

Kiel operates three stainless steel catering trucks that take such items as cold sandwiches, juices, coffee and tea and bakery goods to construction sites, schools and service stations. The business operates with regulated routes to areas in Vallejo, Fairfield and Vacaville.

The loan made it possible for him to purchase a huge machine that produces flaked ice which is set up in the backyard of his home on Walnut Street. He previously had to spend $8.50 a day for ice which is used to keep the perishable items colds while they're in the trucks.

NO MONEY

Kiel, who came to Vallejo in 1938, has previously worked in the construction field and restaurant business. He built his own home in 1964 and is one of the original founders of the SCBDC "when we just had a dream and no promise of money." Since this time Kiel has helped many aspiring businessmen get loans.

He is president of the Lofas-Lakeside Improvement Association and also serves as president of the Flosden Development Association.

All of these men who have established good credit while paying back their loans have made it easier for other minority persons to find their place in the business community. There was no SCBDC loan office operating in Vallejo when Kiel started paving the way for other ambitious men to follow.

Each of the stainless steel truck bodies represents a $6,000 investment to Kiel who starts work at 4:30 a.m. each day and finishes up around 7 p.m. "It doesn't matter how long I work, it's something I enjoy doing and it's my own business . . . I want it run right," he declared.

Information on "Operation Mainstream" may be obtained at 627 Maryland St. or by calling 642-8919 or 643-6079.

MRS. THELMA WYATT—RECIPIENT OF THE REGIONAL VOLUNTEER COMMUNITY SERVICE AWARD

Mr. TYDINGS. Mr. President, the purpose of Zeta Phi Beta Sorority's National Community Service Award is to recognize outstanding women who have given volunteer service to their communities to improve living conditions for their neighbors. The selection of Mrs. Thelma Wyatt, from Baltimore, Md., to receive the Atlantic Regional Volunteer Community Service Award represents the culmination of a year's diligent search and review of the credentials of hundreds of worthy women each of whom deserved recognition in her own community.

I congratulate Mrs. Wyatt and the Zeta Phi Beta Sorority for their outstanding service to the communities. I ask unanimous consent that the description of Mrs. Wyatt's many activities from the Zeta Phi Beta Sorority 50th Anniversary Boule National Awards Program on August 4, 1970, as well as a statement on the occasion, be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

ZETA PHI BETA SORORITY, INC., 50TH ANNIVERSARY BOULE

A national award for outstanding volunteer service is to be announced on August 4th, by Zeta Phi Beta, one of the leading national sororities of professional, college women, at a ceremony to be held at 8 p.m. at the Shoreham Hotel, as an important part of the Sorority's Fiftieth Anniversary Celebration.

The national award winner has been selected from a group of 8 regional award winners by a panel of six eminent judges. In each of the Sorority's regions an award winner had been selected from among the candidates nominated by the Sorority's Chapters throughout the country, as the women they believe have made the most outstanding contribution in each of their communities as a volunteer in community service. This includes health, welfare, education, day care, housing, community development, among other programs. All eight regional award winners, one of whom will receive the national award, are members of low income families.

The national judges were:

Mrs. Ruth Atkins, Community Worker, Union Settlement, New York City, and member of the Board, National Federation of Settlements.

Congressman William L. Clay, 1st District, Missouri.

Mr. Sterling Tucker, Executive Director, Washington Bureau, National Urban League; Vice Chairman, District of Columbia City Council.

Dr. Caroline Ware, Community Organization Consultant; former Professor, School of Social Work, Howard University.

Miss Barbara Watson, Administrator, Bureau of Security and Consular Affairs, U.S. Department of State.

Dr. Ellen Winston, former U.S. Commissioner of Welfare; welfare consultant.

Dr. Caroline Ware, Howard University.

The National Community Service Award Committee of the Sorority, which directed the search for the volunteers to be honored, was chaired by Mrs. Mary Dublin Keyserling, a member of the Sorority and former Director of the Women's Bureau. Mrs. Keyserling was among the first white women to be invited to join the previously all Negro women's sorority.

The eight regional award winners will all be present when the national award winner among them will be announced at the ceremony on August 4th. The regional winners are: Mrs. Nancy Elizabeth Brown, Washington, D.C. (Eastern Region); Mrs. Rosemary Cooke, Louisville, Kentucky (Great Lakes Region); Miss Kathlan Latimer, Pittsburg, California (Pacific Region); Mrs. Enola Rawles, New Orleans, Louisiana (Southern Region); Mrs. Minnie Mae Smith, Oklahoma City, Oklahoma (Midwestern Region); Mrs. Dannie Mae Thomas, Daytona Beach, Florida (Southeastern Region); Mrs. Irene R. Washington, Mobile, Alabama (South Central Region); Mrs. Thelma Wyatt, Baltimore, Maryland (Atlantic Region).

Mrs. Keyserling, Chairman of the Sorority's National Community Service Award Committee, describing the region award winners, said, "All eight candidates for the national award are inspiring examples of the extraordinary volunteer service women are rendering in all our communities. All are members of very low income families. One woman is coping with a family income of less than $2,000 a year; three have between $2,000 and $3,000; and the other four only a little more. Most of the women carry large family responsibilities. One has 11 children; another has 10, and a third 8 children. Despite their own problems, they have given unstintingly of themselves to others. It is a moving experience to read the Chapter reports on the meaningful contributions these eight remarkable women have made in their communities. The national judges have reported that so significant is the volunteer work each of the candidates is doing, it was almost impossible to single one out above the others for the national award."

The ceremony, paying tribute to the volunteers and announcing the national award, will be an important part of the Zeta Phi Beta Sorority's 50th Anniversary. Mrs. Mildred C. Bradham, Grand Basileus of the Sorority, who will present the national award and preside over the meetings, said, "Our community service award program exemplifies the concept of service to others which has always been a vital part of our activities."

THELMA WYATT, BALTIMORE, MD.; ATLANTIC REGION

Mrs. Wyatt, mother of four, is presently employed as a Children's Aide in the Baltimore Public Schools. Devoted to children, she has given invaluable service as den mother and Girl Scout leader. She has also spearheaded drives to secure clothing for needy pupils, to secure tutoring services after school in her home and in hospitals. In spite of meager resources, she has provided funds for field trips for pupils.

Mrs. Wyatt has been a consistent worker in P.T.A.s and other organizations. She has given service to senior citizens in hospitals and nursing homes, and has participated in voter registration drives. She serves her church on the state and local level, serving as church secretary, youth and senior leader in church and vacation schools.

Her untiring efforts in behalf of children recently culminated in the appointment of a counselor to the school at which she is employed.

PLUG LOOPHOLES IN QUOTAS AGAINST IMPORTS OF DAIRY PRODUCTS

Mr. HRUSKA. Mr. President, the U.S. Tariff Commission now has before it two actions involving the evasion by foreign shippers of our system of import quotas on foreign dairy products. One action is an investigation under section 22 of the Agricultural Adjustment Act involving interference of the imports with our dairy price support program. The other is based on a resolution adopted by the House Ways and Means Committee and involves an additional group of dairy products, but again it relates to the impact on our dairy price support program.

Mr. President, it is very clear that the products dealt with in these investigations are being imported to take advantage of loopholes in our present quota system. In fact, in many cases these products have been deliberately concocted to specifications that are not cov-

ered by existing quota regulations—so that they can be entered through such loopholes and thus benefit from sale at American price levels, which of course are maintained at support levels through purchase of the surplus by the U.S. Treasury. Any additional surplus from abroad added to the surplus already on the market therefore simply adds to the quantity that must be purchased and taken off the market by the U.S. Government.

With respect to the items covered in the investigation under section 22, which was initiated by the Secretary of Agriculture, a graphic description of the economics of this process is given in the statement filed with the Tariff Commission by the representatives of the Department of Agriculture. In his statement Mr. DeFelice, the departmental spokesman, points out that the CCC purchases of dairy products for the past marketing year cost a total of $232 million. These are not small sums. Any substantial savings in such expenditures would be of real help in bringing the budget closer to balance.

Of equal importance is the impact of these daily product imports on our own dairy producers.

I will give one example. One of the foreign dairy products under investigation by the Tariff Commission is ice cream. Before 1969 there were never any imports of ice cream. However, someone discovered that a rather artificial mixture, with a high percentage of butterfat and milk solids but still classifiable as ice cream, did not fall within the restrictions of any of our quotas on imports. In 1969, imports of this product started, and during the first 5 months of 1970 a total of 2.4 million gallons, containing the equivalent of 112 million pounds of whole milk, was imported. After being imported through this loophole in our regulations, the product will not be eaten as ice cream, of course. It will be used as a mix in the manufacture of dairy products. In doing so, it will displace an equal amount of American-produced milk.

Mr. President, I know of no reason why this country should permit the continued evasions of our import regulatory system by products artificially concocted to get around the regulations in this manner.

Mr. President, I ask unanimous consent to have printed in the RECORD the text of the presentation made to the Tariff Commission by Mr. A. Richard DeFelice of the Foreign Agricultural Service on behalf of the Department of Agriculture.

It is earnestly hoped that there will be early and favorable action by the Tariff Commission on the petition for relief as advocated by the Department of Agriculture.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY A. RICHARD DEFELICE

I am A. Richard DeFelice, Assistant Deputy Administrator, Foreign Agricultural Service, U.S. Department of Agriculture.

In presenting the Department's case, I will emphasize four main points. (1) The Department's dairy price support program is threatened with material interference from imports. (2) There continues to be a world dairy surplus pressing for entry into the United States market. (3) We can identify the forms—the kinds of products—such entry is taking. (4) The threat should be stopped *before* it gets out of control.

This is the third time in the last three years that the Department has appeared before this Commission urging the imposition of controls on certain dairy products. In 1967, controls were placed on Colby cheese, butterfat/sugar mixtures, and frozen cream. In 1968 and 1969, controls were imposed on condensed and evaporated milk; Emmenthaler, Gruyere-process and "Other" cheeses not specially provided for, if priced under 47 cents f.o.b. country of origin; chocolate milk crumb; Italian-type cow's milk cheese not in original loaves; processed Edam and Gouda cheese; butterfat/sugar mixtures ("Junex") in retail packages.

During the past year, new situations have arisen. Imports of products not now covered by controls have increased and threaten to rise further. This is, as in the past, a reaction by the trade to cutting off, by quota controls, of product sources for milkfat and nonfat milk solids. The problems we are encountering mirror the pull of an attractive market in the United States and the push of excessive supplies in the main exporting countries. Let me describe, in brief and general terms, these two situations in turn.

Section 201 of the Agricultural Act of 1949, as amended, authorizes and directs the Secretary of Agriculture "to make available price support to producers for . . . milk, butterfat, and the products of milk and butterfat . . ." at such levels not in excess of 90% nor less than 75% of the parity price as the Secretary determines necessary in order to assure an adequate supply.

This responsibility is carried out through the purchase, under announced terms and conditions, of three manufactured dairy products—butter, Cheddar cheese, and nonfat dry milk. These products account for about three-fourths of the utilization of manufacturing milk. They can be readily stored and utilized in program outlets. The Commodity Credit Corporation's standing offer to purchase these products prevents overproduction of other dairy products which would depress their prices below a level corresponding to the general support level for milk and butterfat.

The milk marketing year runs from April through March. For the present marketing year beginning April 1, 1970, the announced support price is $4.66 per cwt for milk, compared with $4.28 per cwt during the 1969–70 marketing year. The 1970–71 support price for butterfat is 71.5 cents per pound. In 1969–70, it was 68.6 cents per pound. The increase in the butterfat support was necessary to achieve the minimum 75 percent of parity prescribed by law. The support price of $4.66 for milk is the level determined by the Secretary of Agriculture as necessary to achieve the objectives of the law.

Of more pertinence to this investigation are the Commodity Credit Corporation purchases and costs involved in maintaining the announced support level relative to the total supply situation.

Our milk production, although it has declined somewhat in recent years, continues to exceed commercial demand. In 1969 (calendar year), production was 116.2 billion pounds; commercial utilization plus farm use totalled 113.4 billion pounds. Milk production during the first five months of 1970 was slightly more than during the same period of 1969.

If forage and pastures remain normal throughout 1970, total production is likely to rise slightly from the 1969 level. Commercial disappearance of milk in all dairy products, however, continues to decline and 1970 disappearance is expected to be less than 1969, despite a slight increase in the first quarter. In consequence, the outlook this year is for an increase in the extent to which production exceeds commercial demand.

CCC purchases under the support program for the marketing year ending March 31, 1970 were, on a delivery basis, 182 million pounds of butter, 17 million pounds of cheese, and 358 million pounds of nonfat dry milk, at an estimated program cost of $232 million. These purchases amounted to 4.1 billion pounds of milk equivalent as compared with 4.7 billion pounds in 1968–69.

During April–June 1970, CCC purchased (delivery basis) 127.9 million pounds of butter, and 149.9 million pounds of nonfat dry milk, compared with 89.3 and 118.4 million pounds, respectively, for the same period a year ago. These are increases of 43 and 27 percent, respectively, from 1969. The estimated milk equivalent which will be taken from the market in 1970–71 by support activities is 7.3 billion pounds, at a cost of $403 million. This is an increase of 60 and 73 percent, respectively, from 1969–70.

World supplies of dairy products, especially in Europe and Oceania, are in surplus to commercial market demand and increased further in 1969. Milk going to fluid use has not kept pace with increased production. The milk in excess of that needed for fluid use is diverted to the production of manufactured dairy products, thus adding to the continually growing glut of these items. The manufactured dairy product surpluses are seeking outlets at almost any price and in almost any form not specifically restricted by importing countries. Export subsidization is commonplace, with such subsidies in some cases almost as much as the value of the product on the internal market of the exporting country. The subsidized exporting of surplus dairy products has for the past several years kept the world dairy market in a state of turmoil and disorganization.

The surplus situation remains most acute in the European Communities, where enormous surpluses have resulted from the Common Agricultural Policy for dairy—establishing high internal support and restricting access of outside suppliers to the EC market. Surplus butter stocks in the six EC countries on May 1 totalled 675 million pounds; similarly, stocks of nonfat milk are excessive. The rate of accumulation of surplus stocks has slowed, but primarily because of unusual weather conditions last year—drought in the summer and a late spring—which decreased milk production slightly, with a resultant decrease in the amount of surplus moving into manufactured dairy products.

Faced with the present chaotic world dairy market conditions, nearly all countries find it necessary to control dairy product imports by one device or another. In the absence of controls, our domestic market would be inundated. There would be wholesale displacement of domestic supplies, all of which would wind up in the hands of the Commodity Credit Corporation at costs which would quickly become unbearable.

As world dairy supplies have increased, so has the relative attractiveness of the United States market. Recent use of the Section 22 authority has necessarily had the specific intent of restraining importations of foreign dairy surpluses, particularly of products deliberately formulated in order to evade existing dairy import restrictions. Once more we are faced with an increase in imports which again threatens to affect seriously the Department's support program. We are convinced that additional import restrictions are needed.

In my statement before this Commission in 1968, I made the following observation which I believe is basic to the whole problem of imports of dairy products. That is, that we must not lose sight of the fact that the commodity with which we are fundamentally concerned is milk. This is what the farmer produces. It can be processed into a great variety of products—into whatever forms

can be most readily utilized or disposed of. It is a technically simple matter for foreign suppliers to put their surplus milk into any processed form for which an outlet can be found. In the same manner, American dairy manufacturers turn their milk into butter, Cheddar cheese and nonfat dry milk when other dairy products lose their markets to import competition. In short, when commercial outlets are insufficient to absorb the total milk output, the excess goes into the hands of CCC.

This means that the significance of the threat of the specific nonquota products, which are the subject of this investigation, cannot be measured in isolation. Admittedly, the increased trade figures for some of these products look rather small—at least at present—when compared to the figures of total production or trade. The key question is what will be the impact of overall dairy trade total on the price support program if the dairy products which are the subject of this investigation are allowed unrestricted entry. Given the burdensome supplies and depressed prices of the world dairy market, these products are practically certain to be imported into the U.S. in such large quantities as to tend to render ineffective or cause material interference with our price support program. Such imports mean a corresponding displacement of domestically produced milk from commercial channels, and thus corresponding additional purchases by CCC.

Against this background, I now turn to the individual products on which we are asking controls.

1. *Ice cream, as provided for in item 118.25, part 4, subpart D, of Schedule 1 of the Tariff Schedules.*

The most flagrant abuse in the list of dairy products currently free of restriction concerns ice cream. Prior to last year, there have never been any imports of ice cream. In contrast, ingredients for ice cream manufacture in the form of frozen cream, butteroil, or butterfat/sugar mixtures (commonly known as "Junex") are under quota control. The principal Section 22 action in this respect was taken in June 1967, following a heavy and disruptive upsurge of such imports. An exception in that decision for retail packages was subsequently abused, with the result that retail packages were made subject to the quota by Proclamation 3884.

Early in 1969, it became apparent that the economic pressures for bringing in the ingredients of ice cream by one subterfuge or another were again at work. In April of that year, the first shipments of a new putative "ice cream" containing extraordinary amounts of milkfat and nonfat solids were entered. The Bureau of Customs classified the commodity for duty purposes as ice cream. Under present regulations and procedures, such a classification automatically excluded these imports from existing quota control.

These imports were the direct result of the establishment of the Junex quota. In effect, the products are modified Junex mixes. Commercial ice cream normally contains 10–11 percent butterfat, with a 12 percent requirement in one state. These imported products run around 20 percnt butterfat and have been as high as 24 percent butterfat. Total milk solids run between 32 and 40 percent, compared to a normal content of about 21 percent. The products have fancy names like Framil, Petram, Stephanex, Vana Delight, Martex, and Utex. They are not designed for immediate consumption at retail. They are designed as mixes to be processed into ice cream, and that is how they are used.

Imports rose rapidly in the latter part of 1969 and reached a total of over two and one-half million gallons, equal to over 20 million pounds of product and about 44 million pounds of commercial ice cream. Imports represented the equivalent of 120 million pounds of whole milk. Imports have continued upward this year. For January through May, they were 2.4 million gallons, equal to 18.9 million pounds of product, or 112 million pounds of whole milk equivalent. Currently, the supplying countries are New Zealand, Belgium, Netherlands, and Canada. We foresee that, unless controlled, they will reach the proportions attained by Junex.

The incentive, of course, is price. The Bureau of Census data show the price of the imported product at from 73 to 81 cents per gallon. The same product, made at support-level prices with domestic butterfat, nonfat milk solids and sugar, all of which are subject to price support, would be about $1.90 per gallon.

This evasion has become a major leak in the import control structure. A quota on ice cream should be established. We believe that the amount of this quota should properly be zero. As we pointed out, there has been no trade in true ice cream—only trade, beginning in April of last year, in a processing mix masquerading as ice cream. The years of trade history which are really representative of a normal situation are those prior to 1969; in those years, trade was zero.

2. *Chocolate provided for in item 156.30 of part 10 and articles containing chocolate provided for in item 182.95, part 15, Schedule 1 of the TSUS, containing 5.5 percent or less by weight of butterfat (except articles for consumption at retail as candy or confection).*

Our concern here is with a product known as chocolate crumb, which is used in the production of chocolate candy coatings. It is described in the Commission's report TC 211 as follows: "Chocolate crumb consists of incompletely processed chocolate produced by concentrating, under vacuum, fresh whole milk, sugar, and chocolate liquor (the ground mass of roasted cocoa bean nibs). It is shipped in the form of coarse powder, or 'crumb.' The final concentration typically contains 90 percent total solids composed of 55 percent sugar, 30 percent whole milk solids, and 15 percent chocolate liquor."

Proclamation 3884 of January 6, 1969 established an annual import quota on chocolate crumb of 17 million pounds. The quota description contains, as I have just noted, an exception for commodities containing 5.5 percent or less butterfat. The specification of a butterfat content of over 5.5 percent for quota purposes was derived from similar descriptions of other products made from a combination of dairy and non-dairy ingredients; until recently, it had no practical significance since the butterfat content of normal chocolate crumb is 8–12 percent.

Now, however, the 5.5 percent exception has become a loophole for quota evasion. Crumb with a butterfat content just coming within the exception is being manufactured and shipped to the United States from the United Kingdom and Ireland. The sole purpose of the new, hitherto non-existent formulation is to evade, by the narrowest possible margin, the U.S. quota. I might note in passing, as a matter of interest, that there have been a few instances where the manufacturer has cut the line of butterfat content so fine that, by the time the product arrived at the U.S. port, a minor amount of moisture evaporation had shifted the butterfat content from just barely under 5.5 percent to just barely over 5.5 percent—making the shipments subject to quota, after all.

But by and large the shipments have been getting throguh, and at an increasing rate. Imports began in September 1969 and through December totaled at least 478,500 pounds. For January through May 1970, they amounted to approximately 3.4 million pounds. We anticipate that, unless controlled, annual imports of this product will exceed the 45 million pounds of chocolate crumb imported in 1968 and far exceed the present quota for chocolate crumb of 17 million pounds which the President has determined to be needed to protect the price support program.

I should note for the record at this point that trade in chocolate crumb is not reported separately by the Bureau of Census. Chocolate crumb has entered under two TSUS categories (because of differences in chocolate content), both of which are "basket" categories.

Like ice cream, imports of low-fat chocolate crumb are symptomatic of economic pressures operating to exploit every possible means of evading quota control. The change in butterfat content, also, has been accompanied by an increase in the nonfat milk solids content.

The quota which has been established for imports of chocolate crumb should not be vitiated by an obvious subterfuge. We recommend that the exception for chocolate crumb containing 5.5 percent or less by weight of butterfat be eliminated, and that imports of such chocolate crumb be made subject to the present quota of 17 million pounds.

3. *Animal feeds containing milk or milk derivatives, classified under item 184.57, subpart C, part 1 of Schedule 1 of the TSUS.* There are several products falling into this category, but each contains milk solids and is used as a milk replacer for feeding calves. Some of the importations consist of skim milk to which tallow or grease has been added. The mixing is done while the milk is in a fluid state and the product thereafter is dried. Others are a mixture of tallow with partially skimmed milk; these, therefore, contain some butterfat as well as non-dairy fats.

Under the Tariff Act of 1930, such feeds were given a quota classification under Paragraph 708(c) as substitutes for milk or cream. Under the present Tariff Schedules, such feeds had until August 17, 1967 been classified by Customs under the successor item, TSUS 118.30, "Malted milk; and articles not specially provided for, of milk or cream," by reason of milk being the component of chief value. On that date, Customs agreed to a classification request on the basis of "chief use;" this shifted the merchandise to TSUS 184.75, "Animal feeds, and ingredients therefor, not specially provided for: Other," and freed it from quota control.

Imports commenced in January 1968 and in that year totaled 2.4 million pounds, all from Ireland. Imports in 1969 were just under 10 million pounds, with New Zealand and Australia entering the picture as suppliers. (Imports from countries where foot-and-mouth disease is endemic, which includes most continental European countries, are prohibited.) Imports during January–May 1970 were 5.8 million pounds. For reasons which I will explain, we look for this trade to increase very substantially unless brought under control.

The trend of imports of animal feeds containing milk or milk derivatives is in sharp contrast with the authorized quota amounts, which have been on the books since 1953, for the dairy ingredients which go into the manufacture of such feeds. The aggregate amount of permitted imports of dried whole milk, dried buttermilk and whey, and dried skim milk is only a fraction of the amounts of such solids which are allowed to enter ex-quota because tallow or some other non-dairy fat has been added.

These feeds compete with domestic feeding of milk and milk solids, whether such feeding takes the form of whole milk fed directly; fluid skim milk, buttermilk or whey returned from creameries and cheese factories; dry feeds containing milk solids; or nonfat dry milk purchased for feeding purposes. The landed, duty-paid cost of the imported feeds is from 11–15 cents per pound; the minimum (support) price for domestic nonfat skim milk (to which animal fats must

be added) is slightly above 27 cents. With this price difference, there can be little doubt that the imported feeds, unless checked, will gain wide and growing acceptance. The incentive for the farmer is to buy imported milk replacer commercially and send his own milk to the creamery or cheese factory. The domestic feeds industry has already felt the competition of the imported feeds.

The potential for displacement of domestic milk is very large. Of the 10 billion pounds of nonfat milk solids produced in the United States in 1968, an estimated 1.3 billion pounds were fed to animals, as follows:

(a) Milk utilization on farms: 224 million pounds.

(b) Fluid returns from dairy plants: 574 million pounds, of which about two-thirds were whey solids.

(c) Milk solids used in commercial feed production: 466 million pounds.

As I noted at the outset of my remarks, the basic commodity which is supported by the Department of Agriculture is milk. For the purposes of support and for the purposes of this investigation, the forms into which milk solids are processed are of secondary importance. The quotas established in 1953 recognized the interchangeability of the various forms of nonfat milk solids—that is, that imports of certain fractions of nonfat solids were as likely to interfere with the utilization of domestic solids, and therefore to interfere with price support operations, as were imports of nonfat solids in their entirety. Displacement by the current milk replacer imports of *any* of the domestically produced nonfat solids will cause interference with the support program, although in the case of buttermilk and whey such interference will be indirect.

We view the trends of imports as unmistakeable evidence of a growing threat to the support program. Action should be taken now to forestall that threat before it becomes disruptive and costly. We believe that quotas, based on the history of trade in 1968 and 1969, should be established on animal feeds containing milk or milk derivatives. Quotas should be allocated by country of origin in the representative period. Licensing of importers would not be necessary, and administration of the quotas should be by the Bureau of Customs.

4. *Cheese, and substitutes for cheese, containing 0.5 percent or less by weight of butterfat, as provided for in items 117.75 and 117.85 of subpart C, part 4 of Schedule 1 of the TSUS, except articles within the scope of other import quotas provided for in Part 3 of the Appendix to the TSUS; if shipped otherwise than in pursuance to a purchase, or if having a purchase price under 47 cents per pound.*

This item refers to so-called low-fat manufacturing cheese containing 0.5 percent or less butterfat. It is used in the production of processed cheese foods and cheese spreads. It is not used for direct consumption. It is a new product, first imported in February 1969—exactly one month after Proclamation 3884 came into force. In Proclamation 3884, in the import quota for "other" cheese (item 950.10D of the TSUS) an exception was made for "cheese, except cottage cheese, containing no butterfat or not over 0.5 percent by weight of butterfat."

The principal supplier of the low-fat manufacturing cheese is Denmark. Other important suppliers are the United Kingdom, Ireland and Poland. "Low-fat" cheese is apparently not used by the supplying countries and is manufactured solely for export; in some cases, it is not officially considered to be cheese. The sources of supply have largely been determined by the contracting activities of enterprising American importers seeking a low-priced, quota-free product.

From research into the records of the Bureau of the Census, imports of this article in 1969 are placed at approximately 2.9 million pounds. Imports this year for January-May have been 4.5 million pounds.

The potential for the use of imported low-fat cheese as a permissive additive in the processing of cheese foods and cheese spreads is large. Production of these processed cheese foods and spreads (including cold pack cheese) was 327.5 million pounds in 1968. Considering the higher moisture and lower fat requirements for these products, a minimum of 23 million pounds of added nonfat milk solids were used in this production.

In addition to processing convenience over other forms of nonfat solids additives, the imported cheese has a distinct price advantage. The f.o.b. value of the low-fat cheese has ranged from 8 cents to 20 cents per pound, with a median of 17 cents. The average landed duty paid price is in the range of 23–25 cents per pound. The attractiveness of the imported cheese is apparent when these prices are compared to the current quotation of 35 cents per pound of domestic skim milk cheese with 2.0 percent butterfat.

Imports of "low-fat" (0.5 percent or less butterfat) cheese are a circumvention of the 1,807,000 pound annual quota for nonfat dry milk, and also of the quotas covering processing-grade cheeses. Such imports already are larger than the nonfat dry milk quota and are rising. They displace domestically produced dairy products in the production of cheese foods and cheese spreads, resulting in increased purchases under the support program. Interference with the program has already begun. Price incentives are strong and there is nothing to keep imports from becoming very large.

As with the low-fat chocolate crumb, we recommend simply that the exception from quota control for cheese containing 0.5 percent or less butterfat be eliminated and that imports of such cheese be subject to the quota of 25,001,000 pounds, for the cheese category of the TSUS under which they fall, namely, TSUS 117.75 and 117.85.

Let me now summarize our recommendations.

I have discussed four products which are interfering with or threatening to interfere with the Department's price support program for milk and butterfat. Two of them—ice cream and animal feeds containing milk or milk derivatives—enter under tariff classifications for which there are at present no quotas. Quotas should be established for these items. The other two products enter under tariff classifications for which quotas already exist. These products are at present excepted from quota control; the exceptions should be eliminated.

For ice cream, we recommend a quota of zero, which would accurately reflect the amount of trade which has historically taken place in ice cream for consumption at retail. If a representative period is to be specified, this should be 1968 or any previous year.

Imports of animal feeds containing milk or milk derivatives commenced in 1968; we suggest, therefore, that the years 1968 and 1969 may be taken as a representative period. We recommend establishment of quotas by country of origin based on imports during the representative period. If quotas are established, we will recommend to the President that they be on a first-come-first-served basis, to be administered by the Bureau of Customs and without licensing of importers.

For low-fat chocolate crumb, we recommend that the language of the exception promulgated in Proclamation 3884 of January 6, 1969—namely, the words "if containing over 5.5 percent by weight of butterfat"—be eliminated, and that imports of this product be made subject to the existing annual quota for chocolate crumb of 17,000,000 pounds.

For the low-fat cheese, we recommend that the language of the exception promulgated in Proclamation 3884—namely, the words "cheese, except cottage cheese, containing no butterfat or not over 0.5 percent by weight of butterfat"—be eliminated, and that imports of this product be made subject to the existing annual quota for "other" cheese of 25,001,000 pounds.

We urge the Commission's favorable consideration of our proposals and recommendation to the President accordingly.

McGEE SENATE INTERNSHIP CONTEST

Mr. McGEE. Mr. President, for 8 years it has been my pleasure to conduct for high school juniors in my State of Wyoming the McGee Senate Internship contest, which brings to the Nation's Capital one boy and one girl for a week planned to enhance an understanding of the mechanisms and the procedures of a democratic society.

The contest is designed to stir up interest among high school students in national and international questions. Three well-known, nonpolitical people from the State served as the panel of judges in the competition. In their judgment, this year brought the highest level of essays that the many years of the contest have produced.

The subject matter of the required essay this year was conservation, quality living, environmental control. For Wyoming to focus on that question is of great relevance. For here is a part of the world that we call God's country in which one would think there were no pollution problems.

I think what it does say to us in the Rocky Mountain West is that the mistakes of the already polluted parts of the United States may have served as a grim warning to those of us from the high altitudes of the Rockies of at least what to watch for and try to avoid in the future and, at the same time, to come to grips with the first outcroppings of environmental pollution even at the local level.

Of course, it would be impossible for everyone to read all the essays submitted, but I think the most outstanding ones are of interest to us all and should receive wider circulation. For this reason, Mr. President, I ask unanimous consent that two of these essays, written by Sheila McIlnay, of Casper, Wyo., and Harold R. Yungmeyer, Jr., of Laramie, Wyo., which received honorable mention in the McGee Senate Internship contest, be printed in the RECORD.

There being no objection, the essays were ordered to be printed in the RECORD, as follows:

CONSERVATION: IT'S RELEVANCE IN WYOMING

(By Sheila McIlnay, Casper, Wyo.)

Progress. How does one measure progress? In inches, in cubic feet, in dollar signs? In man's progress of social status, financial position or intellectual prestige? Progress can be a funny word that laughs at desecration and calls it advancement. Progress can be a blind word . . . too involved with matters to see, too apathetic to care.

Industrial, status fulfillment, dollar-sign progress in America last year added up to two-hundred million tons of smoke and

fumes dumped into the atmosphere, seven million junked cars left to grace the highways of "America, the Beautiful", seventy million tons of loose paper, forty-five billion cans to add a lasting rusting beauty to our countryside, and twenty-five million bottles to keep the cans company.[1] To suggest, or hope to suggest, that this price of pollution justifies what America calls progress can, indeed, be considered a very myopic sentiment.

Conservation versus pollution is an important national issue and justily so. However, the people of Wyoming can take a slightly different approach to our own conservation programs in comparison to the national campaign against environmental pollution which concerns all of us. The national environmental campaign is directed against the effects of pollution, not just the causes. In other words, that one hundred billion dollar program must deal with a two-fold complication . . . clean-up as well as control of the problem.

Often, people realize too late the benefit of preventative action so that curative measures need never be taken. And all too often the atttiude in Wyoming today, pertaining to important conservation policies, is to cross your fingers, close your eyes, ignore any warnings, turn around slowly three times and wish on the first star you see that nothing will change. Whatever you do, do not under any circumstances "rock the boat"! Wyoming is perfect and if we stay put, so will our natural beauty.

Experience has proved that this method in some prime examples such as California and New Jersey has failed miserably. But do we learn from experience here in Wyoming? Of course not! We stand in our cool breezes under blue skies washed with the miracle of fleecy white clouds; and sit beside mountain streams singing in clarity and sparkling like silver ribbons on green alpine meadows and we dare trust luck to keep it this way!

There are, indeed, many fine conservation organizations in Wyoming and they, and those directing them, must be commended for their outstanding services to the people and wildlife of Wyoming. But too many of the people of this state are absolutely inert when it comes to conservation. Talking something and doing something are two different things.

The people of Wyoming are an independent bunch, but their prized independence may soon be lost to the federal government in such areas as conservation if immediate widespread organized action is not taken.

James R. White of *Wyoming Wildlife* put it rather aptly when he said,

The state is in the best position to administer the game and fish properly and thereby insure to our children the benefits which we now enjoy.[2]

The assumption that people of other locales would never really show up in Wyoming in droves because the sagebrush and prairies take a special 'rugged individual' has been the standing opinion too long. Each year, millions of people come to the state, traveling thousands of miles and spending millions of dollars.

Conservation is as relevant to Wyoming as oil is to Standard. Tourists do not come to this state to take in the same foamy murky mud pits with the same aromatic stench of sulfur and household bleach that they left at home. They come to breathe fresh air, to walk up a mountain path, and to smell the pungent odor of pine drifting from a camp fire on a clear, crisp Wyoming night. For their sakes, as well as our own, we must take care of what we have been given. The tourist business is a big industry in Wyoming and a hat-tip to our Western hospitality, but if we totally commit ourselves economically to tourism, we must be alert that we are exposing ourselves to exploitation by the plastic god of commercialism.

The rancher and the mineral people have always been important to the economy of Wyoming but they must also be aligned with conservation in the state. Diversity of attitude can be found in both groups. Either a zealous, almost radical, concern is taken or a definite apathetic approach is predominant. This is where the middle of the road must be found. Industry is essential to the economic well-being of this state, but as Kip Hinton of the Denver U.S. Forest Service asked,

"How do you measure the value of standing alone listening to the sighing of alpine winds among craggy peaks? [3]

"How many states can boast such marvels and how many states are spending millions to clean up the sewage and junkyards they must now call landscapes? Conservation becomes relevant indeed.

"The present industrial laws concerning environmental pollution in this state are so archaic in value that one wonders why they do not crumble to dust. Sec. 35–500 of the Wyoming Statutes under the Air Quality Act terms pollution violations as misdemeanors which shall not be fined more than $750.00.[4] The laws need to be more stringent and better enforced and the legislatures and politicians need to be forced into immediate action if we are to maintain the natural beauty of 'Wonderful Wyoming.'

"Apathy cannot be stemmed, solutions will not be found, involvement will never become a reality unless, through education, the people of Wyoming are made aware of the pressing needs of conservation. And it is in the youth, from elementary to graduate school in which the hope lies."

Dick Keeney, conservationist and educator in Wyoming, made this comment on conservation education:

"Though these conservation education programs involve a lot of travel and extra time, it is the most rewarding occupation I can imagine. For it enables me to work with two of this country's most precious resources . . . our youth and our wildlife.[5]

"How long will it take, people of Wyoming, before the crossed fingers merely cramp; before we fall from our dizzy blind turning? How long before we no longer can wish upon a star which has long since been ignobly robed in earth's hazy grit?

"The very word 'conservation' implies something worth keeping and Wyoming is worth keeping, we all agree. *How* we keep it is why conservation will never be more relevant to Wyoming than it is right now while we have so much to conserve!"

CONSERVATION: ITS RELEVANCE IN WYOMING

(By Harold R. Yungmeyer, Jr., Laramie, Wyoming)

"The grass thickens and lengthens until it is a lush green lawn of unbelievably vivid color as far as the eye can see. There are patches of pink and blue and lavender made by the forget-me-nots, mariposa lilies, bluebells, larkspur, delphinium. Over all, the heavens deepen into cobalt and are cupped like a bowl. The big, sculptured, white ships of the sky take shape far off in unseen caves, come drifting up from the western horizon, sail slowly across and slide down the eastern slopes. The heavens are patterned with them from north to south and east to west, and the soft wind blowing steadily, but sweat-tempered now and smiling, keeps them ever a-moving."

This was how Mary O'Hara described Wyoming in 1946, in her novel, *Green Grass of Wyoming*. The reaction of most Wyomingites today, upon reading this description, would probably be one of self-satisfaction, because the description is still generally true. For the most part, Wyoming is still beautiful and natural, in a world which has become greatly polluted and worn. A sparse population, a great love for the outdoors and for natural beauty on the part of that population, and the efforts of an advanced and effective conservation program have kept Wyoming that way.

The United States Departments of Agriculture and Interior, along with the various state programs and representatives of the mining, forestry, and agricultural industries, have achieved a high degree of success in areas such as wildlife management, soil conservation, forest and grassland management, and fire prevention and control. In short, government, industry, and people have banded together to make Wyoming an example of the relevance and effectiveness of conservation in keeping a state free from pollution and from wanton depletion of natural resources.

But here a problem arises. Although effective controls are being exercised over Wyoming's traditional industries, the gradual but steady influx of industry into the state is producing new environmental problems for which solutions must be found. Among these industries are oil and gas refineries, cement and asphalt plants, and coal-burning power plants. Foremost among the problems are those which seem to plague every industrialized society, air and water pollution. Although it must be admitted that at the present time neither of these problems is serious, several aspects of the situation must be considered before air and water pollution are dismissed as insignificant.

Obviously, the amount of pollution in the air and water is directly proportionate to the number of pollutant-producing operations in the state. So although the present amount of industry is relatively small and pollution is accordingly only slight, will the present laws of the state of Wyoming be effective in controlling future water and air pollution, which will undoubtedly increase as industry begins its advance on the state? For indeed industry will advance in Wyoming. Wyoming is one of the last great storehouses of natural resources in the continental United States, and it is essential to the economy of the nation that industry utilize these resources. It is even more important to the state of Wyoming that industry be accepted and encouraged, in order to maintain the citizens' standards of living. Perhaps of even more concern, new industry will serve to keep Wyoming's youth in the state.

For these reasons, the idea that Wyoming should entirely prohibit additional industry from the state as a means to control water and air pollution cannot be accepted as a feasible plan. Industry, and with it, the po-

tential for pollution, must grow in Wyoming; the effective control of this industrial growth and its pollutants will depend largely on two factors.

The first, and most obvious factor in controlling Wyoming's future air and water pollution is the effectiveness of the present legislation and of the standards and rules adopted by the Wyoming Air Resources Council and State Health Department. Their success is dependent mainly on three factors, the proof of which is yet to be evident. To begin with, it must be ascertained whether the standards and regulations which have been established will be stringent enough to exercise the degree of control necessary. The second factor centers around the efficiency with which the programs are conducted and with which the regulatory standards are enforced. The third is simply that industry must under no circumstances be allowed to slip by or be exempt from the controls and regulations; no industry is worth the price of uncontrolled water and air pollution. If these three things prove themselves, Wyoming will be halfway toward the goal of industrialization without pollution.

The second factor upon which the effective control of future industrial pollution depends is the willingness and determination of those in authority in the state to continue to act whenever it becomes necessary to add to present legislation. Although the future can hardly be predicted, it is reasonable to foresee the need for further controls as industry develops, thrives, and becomes powerful. And this is certainly not an easy task for Wyoming lawmakers. Pressure will be exerted by industrial lobbyists who would seek to focus their attentions solely on the benefits of business and production, and away from the need for further effective anti-pollution legislation. Added to this will be the pressures of the need for increasing appropriations to finance new and existing programs, so that they may operate efficiently. Such appropriations will put a great deal of strain on Wyoming's treasury and taxpayers. How the governor and legislature react to these and other pressures and circumstances will depend to a great extent on the people of Wyoming. Their concern and demand for effective action will elicit a favorable response from their representatives. So the responsibility ultimately rests on the citizens of the state of Wyoming to inform themselves of the situation, form honest opinions, and inform their representatives of their feelings and desires, to assure the dream of a modern Wyoming—industrialization without pollution.

THE DRUG PROBLEM

Mr. MURPHY. Mr. President, John E. Ingersoll, Director of the Bureau of Narcotics and Dangerous Drugs of the Department of Justice, recently addressed the 70th annual conference of the New York Association of Chiefs of Police.

Since the drug problem has reached epidemic proportions in this country and represents a clear and present danger to all Americans, and particularly to the young, I ask unanimous consent that this timely address be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

ADDRESS OF JOHN E. INGERSOLL

As a nation we certainly haven't yet come to grips seriously with our drug problem. There is plenty of rhetorical heat; there is need for more enlightened, unified, purposeful action. We have only put part of the machinery together to attack one phase of it. A unified law enforcement community understanding its goals, is developing and is proceeding vigorously to eliminate the multitudenous sources of illicit drugs. Law enforcement traditionally has been called upon to fill the breach when other controls have proven ineffective in the solution of serious social conditions.

No less so with this problem.

I don't have to tell you that we have not succeeded in arriving at an overall resolution of the drug problem. Effective law enforcement is being asked, indeed being challenged, to hold the line until more permanent remedies can be developed and applied.

But it is obvious that law enforcement is not enough. While the drug problem is of legal interest, it is also medical, sociological, pharmacological, and a lot of other things as well. We are even applying our diplomatic efforts in unprecedented ways. There is a clear and present need to draw all of these elements together for a unified purpose; each recognizing the values and the limitations of itself and the others.

The response of society is confused. On one hand there are those who see drug abuse as an evil to be stamped out at all costs and on the other, those who question the right of the law to intervene in what they regard as a matter of personal choice and private behavior. The situation is not improved by the mass of conflicting opinion from the rapidly increasing number of "experts."

I'd like to bring to your attention a side of drug abuse that I expect most do not have a lot of information about.

Legalistic controls of abusable dangerous drugs and narcotics raise many contentious issues because the basic purpose is often lost in mountains of rhetoric. The basic purpose is to control those drugs which:

1. Are subject to abuse.
2. Result in damage to the abuser.
3. And, adversely affect society's interests, when abused.

Only one such drug has received general acceptance in our culture, alcohol. The wisdom of that is not at issue today.

Although many of the others may be beneficially used for medicinal and research purposes, they are exceedingly dangerous without proper control and supervision. They are not permitted to be used for purposes of personal "recreation", "enjoyment", or "enlightenment". We do not have, and may never have, the scientific, psychological, or sociological analytical ability capable of determining who could use these drugs for their own pleasure without resultant damage to themselves or others.

Also, it would be difficult, if not impossible, to restrict this unsupervised use only to those certain persons who could qualify. Indeed, it is likely that those who could qualify would be unlikely to resort to such assaults on their physical or emotional stability. Therefore, the laws must prohibit uses of such drugs beyond those situations where the risk of damage is minimized by proper, trained medical supervisors and then under conditions where maximum therapeutic benefits are obtained.

When, however, a regulatory agency such as BNDD imposes new controls over dangerous drugs, there are loud voices objecting because of an imagined interference with medical practice or scientific research.

But let's take a good look at the other side of that allegation.

The fact is that the American medical community has been warned time and again by its own members that it prescribes too many drugs. But many have obviously not heeded those warnings.

If the dispensing of prescription medicine in 1968 was any indicator, the American public apparently was so sick that it required roughly six new or renewed prescriptions for every man, woman, and child. That is one billion, 300 million prescriptions. In the same year the drug manufacturers manufactured 8 billion doses of amphetamines and barbiturates, enough to supply every man, woman, and child with 40 doses of sleeping pills and pep pills. I know at least six people in my own family who have not only not taken their share; but they haven't taken any. I can't help but wonder who did take those 240 doses of depressants and stimulants and under what circumstances and with what results. Also, what happened to the hundreds of millions of others that were manufactured exclusively for *legitimate* medical needs but never used in that way?

It is no wonder that one of the nation's leading publications on drugs and therapeutics, "The Medical Letter", recently felt compelled to remind physicians that life's inevitable anxieties and frustrations do not always require a chemical barrier; that day-to-day living is not a disease that requires frequent treatment.

Recently the AMA's Committee on Alcoholism and Drug Dependence recommended that "strict and rigorous controls" be placed upon the manufacture, import, export, and dispensing, including prescribing the following five drugs: amphetamine, dex-amphetamine, methamphetamine, phenmetrazine, and methylphenidate.

As any youngster knows, these are the most powerful of the synthetic stimulants. They go by such names as "speed, crystal, splash, or if mixed with heroin, bombita". Under trade names they are known as Methedrine, Obedrin, Benzedrine, Dexedrine, Appetrol, Preludin, Ritalin, to mention just a few.

I am hopeful that the Committee's recommendations will be heeded by the Executive Committee of the Association.

I am angered at my inability to do something about the increasing numbers of letters I receive from distraught parents indicating that one of their youngsters died of a methadone overdose or other drug related case when the fatal drug was prescribed or dispensed by a physician.

Just this year, for example, there have been four methadone related deaths in Denver, two in the Washington, D.C. area, and four in Dade County, Florida. How many occurred in other cities? I don't know but when we get better reporting, I'll bet it will shock the nation.

Up to now the opinions of some so-called medical experts have been presented under favorable ground rules of their own choosing without fear of public confrontation or contradiction. I think it is now time that their contentions and supporting rationalizations be subjected to intensive scrutiny. These medical experts expect laymen to accept their dogma at face value. Now is the time to contest their validity and acceptance. Now is the time to expose the opposing contentions of equally well-qualified medical experts and submit them all to the bright light of public review.

Drug abuse is often described as a public health phenomenom by those who earn their livelihood in the health professions. As we all know, however, it has other equally pressing implications; social, legal, safety, well-being. This is as good a reason as any why someone outside the health circles should influence the control of drugs. It is an excellent reason why the concerned Federal policy makers have chosen to leave essential questions of control in the hands of the Attorney General instead of relying exclusively on the health and drug interests.

There are tragic side effects to the perpetuation of modern day medicine man mispractices. There is no proof that people are resting better or staying calmer despite billions of barbiturates. Despite billions of amphetamines, people are not more active, more alert, more energetic; there are not fewer tensions.

Instead, young children are becoming more

drug-oriented and drug-seeking. Many of them first observe the pattern of drug abuse from their pill-popping parents who have legal access to them by over-prescribing physicians supported by an industry that spends millions hawking its wares. Home is frequently a major supply of drugs for kids. Right at home at young ages, they begin using mom's diet pills or dad's sleeping pills on the sly.

How many of them become more and more dependent on these and other drugs, I don't know. I do know that at the other end of the chain of events that can occur, as a nation we are suffering terrible losses.

In New York City as of June 8, 1970, there were 461 deaths directly due or related to the use of narcotics. 72% were directly related (332).

In Philadelphia between January and May of 1970, the Medical Examiner's Office reported 71 drug related deaths, an increase of approximately 86% over the same period of 1969.

In Washington, D.C., there were 18 deaths in the first three months of 1970, double the rate for 1969.

In Dade County, Florida, narcotic deaths have increased from 14 in 1968 to 37 in 1969. During the first six months of 1970, there were 32 deaths due to overdose.

Even smaller areas are infected. During the last two weeks of May, there were 10 cases of heroin overdose reported from the Bakersfield area in California.

This continuing tragedy has to be turned off, before we do grievous harm to our society. And it seems to me that responsible medical practitioners and drug distributors will want to make more of an effort to plug one of the entries into drug dependence.

I raise these issues in this particular forum, not to create division between the various disciplines interested in drug abuse. To the contrary, what we need is a much more unified effort. I would hope that responsible scientists who have thus far been all too silent would move to help us. I would hope that medical practitioners would really analyze their prescribing practices so that no patient could ever get a methadone tablet, or a quantity of amphetamines, or any other drug without a well-considered medical determination that it was necessary for sustaining or restoring good health.

This is all we ask. We do not want to interfere with medical practice. Neither do we want you to have to pick up the dead bodies of youngsters or oldsters for that matter, who were the victims or inexpert care.

The health and lives of our people are too important to permit one to be silent about the matter any longer.

During the next several years, decades, if necessary, we must all work together to achieve an important objective: Reasonable control of all dangerous substances. This means eliminating the illicit traffic at all levels, but it also means awakening the consciences of those who are responsible for the conditions arising from loose professional and commercial practices.

The immortal words of John Donne suggest why we should all be so very much concerned:

"No man is an island entire of itself; every man is a piece of the continent, a part of the main; . . . any man's death diminishes me, because I am involved in mankind; and therefore never send to know for whom the bell tolls; it tolls for thee."

DAVID SUMMER, AUTHOR OF "YOUR FORESTS, THEIR TIMBER"

Mr. METCALF. Mr. President, I invite attention to a misprint in the August 10, 1970, issue of the CONGRESSIONAL RECORD, page 28110 which has been the source of some misunderstanding. Following introductory remarks, I asked that there be printed an article from the Colorado magazine entitled "Your Forests, Their Timber" concerning the conservation activities of the senior Senator from Wyoming (Mr. McGEE). As was obvious from my remarks, the article was not written by Senator McGEE, although it quoted him extensively. The misprint apparently resulted from a quotation of Senator McGEE's ("Why should we make the Rockies like everywhere else, when everywhere else wants to be like the Rockies?") which appeared at the beginning of the article. The author was actually Mr. David Summer, executive editor of Colorado magazine.

I have long since had this unfortunate error corrected in the permanent RECORD, but some confusion still seems to persist from the original printing mistake. Therefore I am taking this opportunity to make quite clear the authorship of the article, and I hope that this dispels any further misunderstanding. I apologize for any inconvenience this may have caused Senator McGEE and I wish only to reemphasize that the article, despite the printing error, points out the Senator's contribution to conservation.

THE PUBLIC'S CONFIDENCE IN PRESIDENT NIXON

Mr. GOLDWATER. Mr. President, two recent editorials have dealt with the public's confidence in President Nixon and their support of the way he is performing his job.

In "The President and the People" the Tucson Daily Citizen commends President Nixon for his efforts to bring the Presidency closer to the people, particularly through his televised press conferences which show his wide range of knowledge and leadership on national and international isues. The editorial states:

Mr. Nixon is showing a competency and a credibility which is reassuring to the American people. Polls are showing, in turn, that the majority of them are giving him their reassuring support.

The Oregonian, in an editorial entitled "Confidence in Nixon," writes about a poll they conducted which showed a majority supporting the President in his Vietnamization program and his troop withdrawal rate. The Oregonian says:

Most Americans, it appears, believe the President is doing his best to resolve America's problems.

I ask unanimous consent that both editorials be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

THE PRESIDENT AND THE PEOPLE

Despite the fact that jet travel has brought the nation's capital within a day's journey from anywhere in the country, Washington, D.C., must still seem very far away to most people. And the President likewise might seem to be an equally remote figure.

But President Nixon has been doing a great deal to break down these barriers of distance and remoteness.

He has been bringing the government to the people around the country with various public affairs and foreign affairs forums, involving top administration officials. And he has been making himself visible in the role of the Presidency by frequent TV appearances.

The televised press conference from Los Angeles last Thursday night was a good demonstration in point. Live and in color, as the networks like to put it, Mr. Nixon stepped before a large gathering of newsmen for a 30-minute unrehearsed, unedited, off-the-cuff and on-the-record session of questions and answers.

It was obvious from his easy manner with the press representatives and from his thoughtful handling of the steady barrage of their questions that he is at his best in such a situation.

After having lost the presidential election narrowly in 1960 because, it was oft asserted, of his poor showng in the Kennedy-Nixon TV debates, Richard Nixon has acquired a talent for television exposure much like Franklin D. Roosevelt's talent for effective use of radio to give his famous "fireside chats."

But the important thing about the other night's television press conference was the way in which it reflected the awesome range of knowledge and leadership expected of the President in these times.

Here, in exact sequence, is the complete list of subjects covered:

Vietnam War, Paris peace negotiations, Mideast peace, Southern school desegregation, inflation, Russia's naval threat, politics in South Vietnam, U.S.-Russian confrontation, East Coast smog, problems of students and communication.

South Korea's situation 17 years after the truce, District of Columbia's new crime laws, objectivity of the nation's press, opportunity for Mexican-Americans in government jobs, the appropriations bills for educational support and for housing, and finally the question of bringing government to the people.

On that last one, President Nixon recognized that there was some criticism because he was away from the White House so much. He countered by remarking that a President never leaves the White House; it goes with him wherever he is. And it does.

Impressively, Mr. Nixon is showing a competency and a credibility which is reassuring to the American people. Polls are showing, in turn, that the majority of them are giving him their reassuring support.

CONFIDENCE IN NIXON

Public opinion polls tend to oversimplify because of their statistical nature and this includes the Bardsley & Haslacher poll taken for The Oregonian (Sunday, Aug. 9, editions). Asked their views on President Nixon's program for turning the war over to the South Vietnamese and withdrawing American forces, Oregon citizens divide this way: 10 per cent said the program was too fast; 45 per cent said it was about right; 32 per cent said it was too slow; 13 per cent were undecided.

Leaving out the undecided, this breakdown tends to show a majority, at least, supporting the President. Of the 10 percent favoring a slower withdrawal (or none at all), most probably accept the President's program as preferable to the faster withdrawal advocated by his chief critics.

This is somewhat remarkable, inasmuch as almost everyone would like to see our men out of Indochina as quickly as possible. The President himself has stimulated public sentiment for withdrawal by starting and continuing the pull-out, by his statement that the Cambodia expedition would speed withdrawal and by his firm declarations of intent to get the United States out of the war. Still, only 32 per cent polled said Mr. Nixon was not pulling out troops fast enough.

The poll for The Oregonian substantiates the last Gallup Poll (July 30) which showed 61 per cent nationwide approving the way Mr. Nixon is serving as President and 28 per cent

disapproving. This vote of confidence, after the withdrawal of troops from Cambodia by the deadline set by Mr. Nixon, was the highest in five months. Most Americans, it appears, believe the President is doing his best to resolve America's problems.

THE HOUSE-PASSED EQUAL RIGHTS AMENDMENT: WHOSO DIGGETH A PIT SHALL FALL THEREIN

Mr. ERVIN. Mr. President, on August 21, 1970, I made some remarks in the Senate on the House-passed equal rights amendment—House Joint Resolution 264. My remarks, which begin at page 29668 of the CONGRESSIONAL RECORD for that date, point out the perils which this proposed amendments poses for the health, safety, privacy, education, and economic welfare of women.

At the same time, I called attention to my proposed substitute for the House-passed equal rights amendment—Senate Joint Resolution 231—which is aptly phrased to abolish all unfair discriminations against women without robbing them of necessary legal protection reasonably arising out of the physiological and functional differences between men and women—differences which cannot be abolished by a constitutional amendment.

The House-passed amendment consists of this abrupt and cryptical phrase:

> Equality of rights under the law shall not be denied or abridged by the United States or by any State on account of sex.

My proposed substitute for the House-passed equal rights amendment lifts this abrupt and cryptical phrase out of the House-passed equal rights amendment and places it in a context which makes it intelligible. It does this by adding to it this additional sentence:

> This article shall not impair, however, the validity of any law of the United States or any state which exempts women from compulsory military service or which is reasonably designed to promote the health, safety, privacy, education, or economic welfare of women, or to enable them to perform their duties as homemakers or mothers.

My proposed amendment is well-phrased to abolish all unfair discriminations against women, without robbing them of necessary legal protection.

When I made my remarks on August 21, 1970, I expressed my conviction that the advocates of the House-passed equal rights amendment were merely desirous of abolishing unfair legal discriminations against women, and for that reason could support my amendment which would accomplish that objective without robbing women of necessary legal protection. Since I made my remarks in the Senate, some militant advocates of the House-passed equal rights amendment have informed me in no uncertain terms that they will not be satisfied with any constitutional amendment which abolishes all unfair legal discriminations against women and at the same time preserves for women reasonable legal protection based upon physiological and functional differences between men and women.

They have informed me that, on the contrary, they demand a constitutional amendment which abolishes every distinction made by law between men and women, no matter how necessary or rational such distinction may be.

In other words, they have advised me that what they want is a constitutional amendment which will undertake to make men and women identical legal beings and compel Congress and the legislatures of the 50 States to make all laws apply in exactly the same manner to men and women under all circumstances.

Let me confess at this point that I am somewhat puzzled as to how this can be done in respect to laws relating to abortion, carnal knowledge of girls under the age of consent, pregnancy, and rape, or the like.

The extreme advocates of the House-passed equal rights amendment assert with great vigor that they resent the Federal laws which exclude women from compulsory military training and the Federal laws whcih deny women the right to enlist voluntarily in the Armed Forces for combat service. They demand that Congress be denied the power to draft men for military service unless it drafts women on exactly the same terms or to enlist men voluntarily in the Armed Forces for combat service unless it enlists women for the same service. Moreover, they demand that the Air Force Academy, the Naval Academy, and West Point be forthwith made coeducational war colleges.

These same militant advocates also complain with much vehemence of many State laws which make legal discriminations between men and women such as State laws making husbands and fathers primarily responsible for the support of their wives and children, State laws providing for alimony or support for wives who are wrongfully forsaken by their husbands, State laws which give wives allowances as widows in their husbands' estates in the event they survive their husbands, and State laws which deny women employment in such hazardous occupations as mining coal.

One exceedingly irate woman has informed me that she intends to have me purged from the Senate if I persist in my efforts to preserve a few legal protections for the millions of women who are too busy performing their duties as homemakers and mothers to come to Washington to lobby Congress for their own protection against their militant sisters. She even made a remark in the course of her remonstrance to me which may be interpreted to be derogatory to the Senate. She asserted that my efforts to preserve legal protection for the women of America will come to naught because a majority of the Senate does not dare to make any substantial amendment to the House-passed equal rights amendment. I am confident that this good lady placed too low an estimate on the courage of Senators.

Despite the assertions of some militant advocates of the House-passed equal rights amendment, I still adhere to the view that the overwhelming majority of women share my view that unfair legal discriminations against women should be abolished, but legal protection based upon reasonable grounds should be continued.

If the militant supporters of the House-passed equal rights amendment could obtain their hearts' desire without having their sisters robbed of their necessary legal protection, I would keep silent. If such were possible, they would merely reap the fate of those mentioned in this verse of the Apocrypha:

> They digged a well, and made it deep, but fell themselves into the pit which they prepared.

Unfortunately, however, the consummation of their hearts' desire requires that the millions of American women who do not wish to be made into identical legal beings with men in all respects would be dragged into the well with them.

Many newspapers have carried editorials or articles expressing misgivings concerning the House-passed equal rights amendment. I ask unanimous consent that the following editorials and articles be printed at this point in the body of the RECORD as a part of my remarks.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

[From the Charlotte News, Aug. 17, 1970]

RIGHTS FOR WOMEN

Proposed Equal Rights Amendment: "Equality of rights under the law shall not be denied or abridged by the United States or any state on account of sex."

Like the "I do" of the marriage ceremony, those 23 words are deceptive in their simplicity, for they sweep across the entire social and legal fabric of American society. Like marriage, the equal rights amendment is not something to be entered into lightly.

The Oliphant cartoon above suggests just one of the many possible untoward side effects of the amendment which has passed the House and is likely to win Senate approval. How far the repercussions of the amendment will reach is almost unknowable. The rights, privileges and responsibilities of women in America are defined in a complex, interweaving of law, custom and social and religious practices that both protect and repress women in varying degrees in every sector of life. More than just the conscious product of male oppression, this definition of "woman's role" has evolved consciously and subconsciously through thousands of years. Through the generations it has become more than just an intellectually held concept. Each generation of women and men has been reared according to the previous generation's concept of the proper role for each sex. While there are changes in each generation—especially in recent decades—there is also great continuity. So pervasive are these concepts, so intertwined with the whole of American culture that to most people the "proper" (traditional) roles for the sexes are as natural and right as gravity itself. In both men and women, the very understanding of who they are is colored by lifelong adaption to a sexual role. To what extent these supposed differences between the sexes are eternal and physiological and to what extent they are only changeable manifestiations of conditioning is the subject of no small argument. But regardless, millions of men and women would find it easier to adjust to new laws of gravity than to new roles for the sexes.

COMPLEX ISSUE

This does not argue against trying to remove the barriers still keeping women from full freedom. It does suggest first that altering the relationship between the sexes is a terribly complex thing and secondly that it be approached with great care so that the steps taken to liberate some women do not

intrude unduly on other women who have different goals. For example, while women's liberationists treat the protestive divorce, alimony and support laws as unwanted badges of inferiority, other women, poorly equipped to support themselves should their husbands leave, find great security in those laws. Satisfying both groups of women will not be easy.

But while lowering the barriers that have restrained women's progress will be difficult, it is also necessary. The statistics make a compelling argument that women are discriminated against in jobs and pay. Not only are women relegated to the least desirable, lowest paid jobs and discouraged from entering some fields at all, the evidence is that they are often paid less than men for the same work. Part of the problem lies in outmoded laws that once protected women by limiting such things as the hours of work but which now serve as an excuse to bar them from supervisory positions which often require long hours. These are easily removed, probably with little risk of harm to anyone. Less easily dealt with are subtle prejudices against women in traditionally male areas, such as aviation and engineering.

FEDERAL GUIDELINES

Progress is being made. The Civil Rights Act of 1964, which banned discrimination on the basis of sex as well as race, is now being given a more vigorous interpretation and actively applied to women's rights cases. The Nixon administration has issued guidelines that require federal contractors not only to give women equal treatment, but to grant maternity leaves and not penalize women who have young children, despite the reality that it is usually the mother who will abandon her job at any hour to tend a sick child. Pending court actions could well provide even stronger tools for achieving true job equality.

In other realms—from New York's McSorley's Old Ale House to the ministry itself—women are entering what was male territory—with what promises to be profound social implications. The society is to a great extent structured to accommodate the traditional family in which the man provides and protects while the woman demurely keeps house and raises a family. While this image has long since been breached by millions of working wives and women active in affairs of the world, the recent progress toward equal employment threatens to precipitate truly fundamental change. For if women are able to contribute half or more of the family support, and are able to work continuously with only short breaks for child bearing, then the economic arrangements that encouraged the traditional male-female relationship will be demolished. The consequences, while unknown, could be stunning.

The question is not will these changes come. They are coming. The growing number of aggressive, educated, capable women demanding a meaningful place in the work world will see to that. The question is whether the changes ought to be speeded unwisely by passing an equal rights amendment of unknown effect. That amendment, after languishing in committee for 47 years, was passed by the House without hearings or even the pretense of debate. The Senate may pass it with equal abandon.

Yet, as Harvard Law School Prof. Paul Freund was quoted as saying recently, "If anything about this proposed amendment is clear, it is that it would transform any provision of law concerning women into a constitutional issue to be ultimately resolved by the Supreme Court. Every statutory and common law provision dealing with the manifold relations of women in society would be forced to run the gauntlet of attack on constitutional grounds. The range of such potential litigation is too great to be readily foreseen."

Which, while not an argument for defeating the amendment, is certainly an argument for urging the Senate to move with more caution than did the House. In no case will the amendment take effect before ratification by three-fourths of the states, so the Senate can surely afford to take time for thorough hearings, to be as certain as is possible that the amendment passed does the best possible job of giving women equality before the law without undue side effects. Women's rights are here. There is no need for a shotgun wedding.

[From the Wall Street Journal, Aug. 13, 1970]

THE LADIES AND THE CONSTITUTION

That Constitutional Amendment liberating women broke on the public consciousness so quickly no one's quite sure what its real effect would be.

"Equality of rights under the law shall not be denied or abridged by the United States or by any state on account of sex," is what it says. Sounds fine, at least until the lawyers and courts get at it, but it's been languishing in Congress since 1923. Lately Congressman Celler, who's against it, has kept it bottled up without even committee hearings. But when Congresswoman Griffiths strong-armed it out on the floor with a discharge petition, it whizzed through the House by 346 to 15.

The upshot is that it was passed with only an hour of debate, which wasn't exactly time enough to clear up all the little hazy areas. Everyone seems to think it would finally implement the unassailable principle that women ought to get the same pay as men for the same work, but someone ought to take time to notice the words do not mention private employers. We were assured that it wouldn't affect such things as maternity benefits or rape laws, somehow. And what with a volunteer army almost here we don't need to worry about its implications for the draft.

Well, we're all for the ladies, but even so, before we write some new words into the Constitution it'd be nice to know what they really do mean.

[From the New York Times, Aug. 12, 1970]

THE HENPECKED HOUSE

Equal rights for women is a proposition so unarguable in principle and so long overdue in practice that it is a pity to have it approached by the House of Representatives as an exercise in political opportunism. For 47 years that body regularly rejected out of hand all proposals for a women's rights amendment to the Constitution. Now it approves, without committee hearings and after only an hour's debate, a constitutional change of almost mischievous ambiguity.

The proposed amendment declares: "Equality of rights under the law shall not be denied or abridged by the United States or by any state on account of sex." The implications and consequences of such language are obscure. There are many laws specifically protecting working women; they cover such subjects as night work, dangerous and heavy work, maximum hours and maternity leave. These laws would be thrown into confusion. So would a great body of law governing divorce, child support, custody, alimony, the age at which a women reaches her majority, and a widow's rights in her husband's estate.

Prof. Paul Freund of the Harvard Law School has warned: "If anything about this proposed amendment is clear, it is that it would transform every provision of law concerning women into a constitutional issue to be ultimately resolved by the Supreme Court. Every statutory and common law provision dealing with the manifold relations of women in society would be forced to run the gauntlet of attack on constitutional grounds. The range of such potential litigation is too great to be readily foreseen."

The prospect of a prolonged and confusing litigation is not necessarily a conclusive argument against the amendment, but it is a powerful argument in favor of holding exhaustive hearings so that an amendment, if one is found necessary, will be carefully drafted and its consequences fully understood by Congress and the states before they act.

It may be perfectly fair to charge that male chauvinism was the only factor that kept the amendment from getting such an essessment through a half-century of total neglect, but that does not wipe out the need for a real evaluation now, no matter how fierce the pressure from the embattled women's lobby.

The clear responsibility of the Senate is to give the amendment the thorough analysis it never got in The House. The Commission and the rights of women are both too important for any further playing to the ladies' gallery.

[From the Durham (N.C.) Morning Herald, Aug. 14, 1970]

MISCHIEF IN RIGHTS AMENDMENT

Men stand to benefit almost as much as women from the "equal rights for men and women" amendment which the House of Representatives passed overwhelmingly (350–15)—and seemingly thoughtlessly—Monday. Indeed women may find themselves the losers if this proposed amendment does eventually become a part of the Constitution.

The intent of the amendment is to prevent discrimination against women and in concept this is desirable. Equal pay with men for comparable work is, for example, a commendable objective. Such specific gains can be attained by legislation. A constitutional amendment is so broad and comprehensive that it will produce undesirable results along with the desirable.

Something of the danger inherent in this amendment has been forcefully put by Paul Freund, professor of law in the Harvard Law School:

"It will open a Pandora's box of legal complications. The amendment expresses noble sentiments, but I'm afraid it will work much mischief in actual application."

Women now enjoy certain considerations because of their sex: greater restrictions on working hours, restrictions on engaging in certain occupations because of the strenuous physical labor involved, exemption from the draft for military service, a lower age limit for marrying, receiving alimony and custody of children in the event of divorce.

Under this amendment, women could be required to work equal hours with men, to do the same work men do, their exemption from the draft could be ended, their age for marrying could be raised to that set for men, they could be made equally responsible for the financial support of the family with their husbands, they could be denied alimony and husbands would get more consideration in determining custody of children.

The considerations given women are based on their anatomical and physical differences from men and the biological requirement that women be the bearers of children and in consequence the nurturers of children (we wonder how the women's liberation organization proposes to get child-bearing shared with men or turned over to them). These factors have been determined by nature and the long experience of the race; to upset them even to the degree proposed in this amendment will be deleterious to emotional health and to the welfare of children.

The more one considers this amendment the sillier it appears. That any Congress would seriously consider it reflects unfavorably on that Congress.

[From the Durham (N.C.) Herald, Aug. 24, 1970]

PROBABLE

Senator Ervin wants to add some qualifications to the so-called "women's rights amendment" to exempt women from compulsory military service and allow the passage of laws "reasonably designed to promote the health, safety, privacy, education, or economic welfare of women, or to enable them to perform their duties as homemakers or mothers."

That's a reasonable and desirable amendment to the amendment. And somewhere the amendment should be amended to prevent it from being interpreted to require a sharing of public toilet facilities by both sexes—as the amendment now stands such an interpretation is possible and with a literal interpretation, probable.

[From the Charlotte (N.C.) Observer, Aug. 16, 1970]

LADIES' BILL LACKS MEANING

That Constitutional Amendment liberating women broke on the public consciousness so quickly no one's quite sure what its real effect would be.

"Equality of rights under the law shall not be denied or abridged by the United States or by any state on account of sex," is what it says.

Sounds fine, at least until the lawyers and courts get at it, but it's been languishing in Congress since 1923.

Lately Congressman Celler, who's against it, has kept it bottled up without even committee hearings. But when Congresswoman Griffiths strong-armed it out on the floor with a discharge petition, it whizzed through the House by 346 to 15.

The upshot is that it was passed with only an hour of debate, which wasn't exactly time enough to clear up all the little hazy areas.

Everyone seems to think it would finally implement the unassailable principle that women ought to get the same pay as men for the same work, but someone ought to take time to notice the words do not mention private employers.

We were assured that it wouldn't affect such things as maternity benefits or rape laws, somehow. And what with a volunteer army almost here we don't need to worry about its implications for the draft.

Well, we're all for the ladies, but even so, before we write some new words into the Constitution it'd be nice to know what they really do mean.

[From the Charlotte (N.C.) Observer, Aug. 23, 1970]

EQUAL RIGHTS AMENDMENT'S EFFECTS NEED SERIOUS STUDY

The constitutional amendment that would accord "equal rights" to women should have the serious and complete consideration in the Senate that it did not get in the House.

The important aims of the Equal Rights Amendment need to be carried out in law. The most vital function of the Senate at this point is to assess what the amendment's practical effects will be as it is now written.

Opponents of the amendment and critics of its language express concern that the new law will create so much legal confusion in the states that it will work more mischief than it will correct.

One of these criticisms comes from Dr. Paul Freund, professor of law at Harvard, who says, "It will open a Pandora's box of legal complications."

The prospect of legal complications and clashes with state laws is not unique to the women's equal rights amendment. Look at the enormous amount of conflict with state laws that came from the Civil Rights Act of 1964. Or from the 14th Amendment.

If wrongs need to be set right through federal law, resulting complications should be considered but should not necessarily be prevailing. Chances are, too, that opponents are taking an excessive alarmist view of the women's equality act—just as others did towards civil rights laws involving race.

The sentiment for a slowdown to take a good look has come about largely because the House was not deliberative in the matter. This seems paradoxical in view of the fact that the amendment has been around since 1923. But Rep. Emanuel Celler of the House Judiciary Committee sat on the amendment this session until it had to be pried out of his hands with a discharge petition. The House passed it on a one-sided vote that showed the members' concern about the political potency of the issue.

ERVIN CAUTIOUS

Sen. Sam Ervin of North Carolina has spoken now with his customary caution about constitutional questions. He is especially disturbed at the thought that the language of the amendment might wipe laws off the books that, for good and practical reasons, take into account the physiological differences between the sexes.

In gallant tones, Senator Ervin speaks of "the memory of mankind (which) runneth not to the contrary" concerning men's responsibility for supporting their families. But here, already, he has touched on what is basic in the equal rights amendment—economic questions that have been made a matter of physiology so that both sexes are victims of discrimination, but women probably more so than men.

With Senate discussion of the amendment set for mid-September, that body should start giving careful consideration to both its need and implications.

The amendment, if passed into law, will affect five general categories of equality: economic (job, promotion, special protection); family (marriage, divorce, child-care); legal (property, legal procedures); professional (education and advancement); and military service.

The economic targets include discriminatory hiring, in-plant treatment, pay scales, promotion, vacation, sick and maternity leaves. With 565 complaints of violations of the Equal Pay Act of 1963 already filed during fiscal 1970, it could be that the amendment will help clear the courts rather than clog the judicial process as has been claimed.

In some cases the amendment would automatically finish an equalization process that has already begun. Such is the situation with discrimination against women in the employ of government, which lags behind Title VII of the Civil Rights Act of 1964 and its banning of bias in businesses engaged in interstate commerce.

State "protective" laws are the focus of most of the opposition to the amendment. This is not an idle concern, although a closer look at these laws might reveal that the protection in many cases is largely illusory.

In North Carolina these laws merely limit the hours of work for a woman to 55 a week, not more than 11 in one day—a limitation not likely to be exceeded even without special laws. A second protection provides chairs for women workers whose job does not require that they stand. Such laws are hardly of sufficient stature to bloc a constitutional amendment of demonstrated need.

A DETERRENT?

Supporters of the amendment contend that many protective laws act today as a deterrent to equal opportunity and treatment.

Liberalization of divorce and abortion laws is already under way in a number of states. Chances are that the amendment will merely speed up the legislative machinery.

The welfare of children surely would continue to be the primary concern of society in divorce laws under the amendment, with financial responsibility imposed on fathers and mothers in accordance with their ability to pay. In cases where a wife's income exceeds her spouse's, it would well be that she would assume the heavier financial burden. And husbands should get a better break on alimony in instances where divorcees can support themselves.

The laws that restrict the rights of married women to engage in business and own property, and the laws that sometimes impose stiffer jail sentences on women than on men, are obviously unfair. Their removal from the books would probably excite little opposition.

More than 100 lawsuits have already been filed by women challenging colleges and universities for bias in admissions quotas and faculty treatment. One such suit is now pending against the University of North Carolina. The amendment should clear the courts of such suits, based on overt and subtle barriers to professional education and advancement. And it should work both ways. There are unreasonable barriers against male admission to some state and local institutions.

DRAFT BOTH?

Finally, there is the question of military service. (The classic objection to the amendment by those who voted against it in the House was from Rep. McCloskey of California who said he didn't want to sit beside some woman in an Army latrine and didn't believe she wanted to sit beside him.)

Equal treatment of the sexes under the draft laws is, indeed, a momentous step for the nation. The question immediately arises as to whether the physiological differences have to be invoked here. To us, the answer is yes—as they must be in retaining laws that forbid sexual assault on females.

This does not mean women shouldn't be conscripted for national service if men continue to be. Other countries exact such services as needed from their young men and women. But the nature of the services and the assignments will have to vary, as it varies now on a basis of the service's need and the individual's ability.

A volunteer army may make the whole problem extraneous.

All these questions need to be looked at in light of the amendment's wording. Nobody said the move to do away with the obvious discriminations in law against women would be easy. But the debate eventually should tend to even out the rights, opportunities and responsibilities of the sexes.

The states called upon to ratify the amendment will be in a clearer and better position to do so if the Senate does the deliberate job the House left undone.

[From the Salisbury (N.C.) Evening Post, Aug. 17, 1970]

GALS GAIN EQUALITY, BUT WHAT IS LOST?

"Equality of rights under the law shall not be denied or abridged by the United States or by any state on account of sex."

Such is the tersely worded but sweeping text of the equal sexual rights amendment passed by the House of Representatives after 47 years of male-chauvinist dillydallying.

While the amendment has yet to be seconded by the Senate (though easy passage is expected there) and by the legislatures of 38 states before it becomes the law of the land as the 26th Amendment to the Constitution, legal experts are already worried about the possible ramifications of the act.

"It will open a Pandora's box of legal complications," warns eminent Harvard law professor Paul Freund. "The amendment expresses noble sentiments, but I'm afraid it will work much mischief in actual application."

What kind of mischief?

Every provision in the law which has a sexual basis, every statute dealing with the manifold relations of men and women in society, would be transformed into a constitu-

tional issue that would ultimately have to be resolved by the Supreme Court, says Freund.

Such laws include those designed to protect women from heavy or hazardous work and limiting their working hours; and immense and varied body of laws governing divorce, child support and inheritance; laws setting the age of consent, which is lower for women than for men in 20 states.

Using this one example, the Wall Street Journal asks: To make things equal, should these states lower the age for men or raise it for women?

Others, with tongues not entirely in cheek, suggest that under the amendment, expectant fathers could demand maternity leave, women would be liable for the draft and divorcees' incomes would be subject to alimony deductions to support ex-husbands.

The more militant women liberationists, like those who recently sexually integrated a for-men-only bar in New York, will say that's fine. In fact, they are eager to assume such liabilities and responsibilities. The sillier objections they dismiss as typical male persiflage.

Not all women are liberationists, however, and not all of them feel oppressed because there are such things as men only clubs and bars. (It can also be guessed that even the most ardent female equalitarian would not graciously welcome the male who demanded the right to take a shower in the ladies' locker room of the YWCA).

Which is to say that there are certain fundamental, inescapable differences between men and women and that to label them all as "inequalities" and to attempt to legislate them away is like passing a law giving women resonant voices, thus making them equally eligible for jobs as radio announcers.

Rep. Leonor K. Sullivan, D-Mo., one of 10 female members of the House, deliberately abstained from voting on the amendment because she fears it will strip women of too many protections she considers necessary and valuable.

It remains to be seen whether she represents a "silent female majority" which will rise up and make itself heard when the issue comes before the several state legislatures.

As Freund says, the amendment expresses noble sentiments. Its basic justice cannot be denied.

But neither can its mischief-making potential be blinked away.

We could be in for an interesting time.

[From the Winston-Salem (N.C.) Sentinel, Aug. 19, 1970]

ERVIN AND THE WOMEN

Sen. Sam Ervin wants to rescue the nation from the worst results of a proposed "woman's rights" amendment which the House of Representatives passed last week with precious little investigation and only superficial debate.

The amendment has powerful support in the Senate, and Ervin apparently is reconciled to its passage in some form. Rather than try to defeat it, which in the name of common sense is what should be done, he is attempting to qualify it in a way that would prevent the invalidation of laws that discriminate in favor of women.

Every state has a considerable number of such laws on the books—laws pertaining, for example, to divorce proceedings and alimony payments. Passage of the amendment likewise would bring into question the federal prohibition against drafting women into the armed services.

There is no indication that the House did much probing into the nature of the existing statutes before acting on the amendment. But it is a fair guess that many such laws would, on the ratification of the amendment, become a matter for adjudication in the courts.

Why this proposal should have such overwhelming support may long remain one of the mysteries of the 91st Congress. This Congress has done a number of foolish things, but not usually with so little thought for the consequences.

Sen. Ervin is an old-fashioned sentimentalist about many things—certainly about the Constitution and probably about women—but if he will stick to his guns maybe can persuade the Senate to repair the damage wrought by the House.

Don't bet on it, however. Earth knows no fury like a woman scorned—except a woman with the city of "liberation" on her lips.

[From the National Observer, Aug. 17, 1970]

LIBERATING WOMEN, OR HARMING THEM?

(By Jude Wanniski)

Rep. Leonor Sullivan was not in Washington last week when her colleagues in the House voted 350 to 15 for an amendment to the Constitution that would give women equality of rights with men and vice versa.

But nonetheless she says "I would not have stood up as the lone woman" of the 10 woman in the House "and spoken against the resolution." She would quietly have voted no. "Men can oppose each other on an issue and nothing is said about it," she says, "but if women do, it becomes a 'cat fight' as far as the news media is concerned. I don't want that."

The Missouri Democrat believes, along with the 15 men who voted against the resolution, that "it will do more harm to women than has been anticipated." Rep. Emanuel Celler, chairman of the Judiciary Committee, which has kept the resolution bottled up without hearings for 47 years, regards it as a "blunderbuss proposal that will wipe out all the good as well as the bad." He, and the other male opponents, believe that it will nullify state and Federal laws that were designed to protect women.

THE LAWS AFFECTED

These include: domestic and marital law concerning age of consent, alimony, divorce, community property, and child custody, support, and maintenance; labor law, concerning arduous work, manual and heavy weight-lifting requirements, night work, and rest periods; laws proclaiming differences in ages of legal responsibility and laws that now apply only to men, as rape and certain types of assault; the military draft.

Congresswoman Sullivan is concerned about the upheaval in the law that a Constitutional amendment would necessarily create. She agrees with Prof. Paul Freund of Harvard Law School who says, "It would transform every provision of law concerning women into a Constitutional issue to be ultimately resolved by the Supreme Court." But Mrs. Sullivan's concern goes beyond this to the social values that underpin the family unit. "I guess I'm old-fashioned, but I don't want to see the responsibility of the father taken away as head of the family and as the main financial support of the family." So many protections that women have now "will be thrown away by the drive for equality, equality in everything," she thinks. She was surprised that only 15 members of the House "had the courage to vote no. It was easier to vote yes and not have to explain why. This has become such an emotional thing."

Mrs. Sullivan is probably right that many congressmen didn't know exactly what they were voting for, but if the ladies wanted it, fine. Rep. Martha Griffiths, Democrat of Michigan, led the fight to get the resolution discharged from Mr. Celler's committee by petition and she didn't seem disturbed by the argument that it would create more troubles than it would dissipate. "None of the horrors which have been conjured up will occur," she said just before the vote.

AN HOUR'S DEBATE

Mrs. Griffiths did not say why they would not occur. But then, since there were no hearings and little over an hour of debate on the House floor, there was little time to explore the amendment's impact. It was assumed that insofar as the military draft is concerned women would not be able to pass the physical for combat duty. Rep. Shirley Chisholm, New York Democrat, didn't seem alarmed if women could pass the physical. "Each sex, I believe, should be liable when necessary to serve and defend this country," she declared. More important, she said, was straightening out the work of the Founding Fathers. "The Constitution they wrote was designed to protect the rights of white, male citizens. As there were no black Founding Fathers, there were no founding mothers—a great pity, on both counts."

The 82-year-old Mr. Celler tried flattery, trying to get the measure back so he could hold hearings: "Neither the National Women's Party nor the delightful, delectable, and dedicated gentlelady from Michigan [Mrs. Griffiths] can change nature. They cannot do it. There is as much difference between a male and a female as between a horse chestnut and a chestnut horse—and as the French say, *vive le difference*."

But that didn't work. Snapped Rep. Edith Green, Oregon Democrat, "I hope that the debate today will not be based on *'vive le difference'* arguments." Rep. Margaret Heckler, Massachusetts Republican, made it clear "I do not have any desire to become one of the boys." But her argument is the strongest one used by the congresswomen. It is that the "protective legislation" Mr. Celler worries about scrapping is primarily restrictive in nature; it contains laws that "may prevent desirable job advancement for women and prohibit women from much sought and desperately needed overtime work and pay [under] an alleged chivalrous code of life."

The resolution has a long way to go to become a proposed Constitutional amendment, of course. The Senate Judiciary Committee will hold hearings next month and report a resolution by Sept. 19. It must pass the Senate by a two-thirds vote, then be ratified by the legislatures of 38 states.

One facet of last week's House action was the first time Southerners, in great numbers, voted for a civil-rights measure. One peculiar rationale, hardly widespread in the Dixie delegation, was offered by Rep. Albert Watson, South Carolina Republican. The vote, he said, "is an indication that the American people want this Congress to re-establish priorities. The day of capitulating to the likes of the Black Panthers is over. The time for rewarding loyal Americans is at hand."

[From the Washington Star, Aug. 16, 1970]

WOMEN'S RIGHTS AMENDMENT: WAIT A MINUTE

(By James J. Kilpatrick)

The House of Representatives voted itself a three-week recess on Friday, but the vote came four days too late. In a monumental display of irresponsibility, far beyond the calls of lunacy, the House on Monday voted 346–15 to approve a "women's rights" amendment to the Constitution.

Gadzooks! Zounds! Horsefeathers! What in the world came over the House?

If you follow the course of constitutional amendments on the Hill, you might suppose this action reflected months of painstaking hearings, testimony by professors of law, studies by constitutional experts. None of this. There had not been a single hour of study in committee.

From the lopsided nature of the vote, you might suppose the amendment had overwhelming public support. Bosh! This constitutional time bomb is the contrivance of a gang of professional harpies, descendents

in zealotry of the late Carry Nation. Her bag was Prohibition; theirs is "women's rights." They are as persistent as Secaucus mosquitoes and they are the biggest bores in town. The 346 who voted for this resolution give or take a handful, had but one purpose in mind—to get these furies off their backs.

Now, mind you, there is an excellent case to be made for "equal rights for women" in certain well-defined areas of law and public policy. It is patently unfair for women to be paid less than men for performing the same work. This is more than unfair: It is unlawful, under the Civil Rights Act of 1964. The Department of Justice recently filed a major case to establish the point. Meanwhile, the Equal Employment Opportunities Commission has won scores of voluntary agreements in industry to halt discrimination against women workers.

The equal protection clause of the existing Fourteenth Amendment also is being widely invoked these days, notably in suits to compel the admission of women on an equal basis with men at state-supported institutions of higher learning. Step by careful step, courts and legislatures are in fact adjusting to the changing status of women in America today.

All well and good. But the reckless action of the House on Monday is the very antithesis of this careful, reasoned approach to social and legal change. The proposed amendment says this: "Equality of rights under the law shall not be denied or abridged by the United States or by any state on account of sex."

Does anyone have even a foggy notion of what this amendment, as a matter of law, would accomplish? No, sir. The House record is as empty as a ping-pong ball. The Senate Judiciary Committee held three days of hearings this past May, but these were mostly my dear lady, how delighted we are to have you here. The hearings have not even been printed.

The most rudimentary study would have required of the House that it look into all the laws of all the states, along with the Federal Government, especially affecting women. It is a fair assumption that hundreds of such laws exist, affecting marriage, divorce, wills and estates, inheritance, abortion, military service, hazardous occupations. If this amendment were ratified in its present form, as Professor Paul Freund has said, it would "transform every provision of a law concerning women into a constitutional issue to be ultimately resolved by the Supreme Court."

Look. This is serious. The U.S. Constitution, just as Gladstone said in his famous phrase, is in truth the most wonderful political work ever struck off at a given time by the brain and purpose of man. It ought never to be amended lightly or frivolously, or to soothe some passionate sopranos.

Perhaps the Senate will bury this proposal, but the resolution has 83 sponsors over there and the prospect seems unlikely. In the end, it may be up to the sovereign states, God bless them, to demonstrate the same courage and common sense shown by the 15 stouthearted men who had the guts on Monday to stand up and vote no.

[From the Wall Street Journal, Aug. 13, 1970]

PROPOSAL TO BROADEN THE RIGHTS OF WOMEN MAY BRING SURPRISES

(By Elliot Carlson)

WASHINGTON.—A new era of opportunity may await the American woman. Soon, perhaps, privileges long denied will be hers: The right to tend bar just like men, the right to work overtime just like men, the right to earn the same pay men get when she performs the same work.

On the other hand, she may be on the threshold of other, more dubious privileges: The right to be drafted into the army, the right to lift heavy weights, the right to pay alimony should she and her husband divorce.

All of these things could result if a long-simmering Constitutional amendment to provide "equal rights for men and women" finally becomes law. Repeatedly introduced in Congress since 1923, the amendment has a good chance of clearing Congress this year. It comes up for a vote in the House today and House leaders expect to win the necessary two-thirds majority. Senate passage later seems assured. Then the measure would have to be adopted by three-fourths of the states.

Proponents—men, as well as many women's rights and women's liberation groups—believe the amendment will eliminate discriminatory practice against women in nearly every phase of life. But a few critics aren't so sure. They worry the new law will create years of legal confusion and, possibly, go too far in altering legal, economic and other relationships between the sexes.

"It will open a Pandora's box of legal complications," warns Paul Freund, professor of law at Harvard Law School. "The amendment expresses noble sentiments, but I'm afraid it will work much mischief in actual application."

A SWEEPING AMENDMENT

Clearly, the amendment's effects would be sweeping. It would render constitutionally suspect most Federal and state laws that make sexual distinctions. Among them: Laws that restrict the rights of married women to establish a legal domicile and, in some cases, engage in business; laws that exclude women from certain state colleges; laws that impose on them stiffer prison sentences; laws that govern the nation's arrangements as to marriage, divorce, alimony and child support; and also laws that exclude women from the military draft.

Paradoxically, many of these changes apparently would benefit men, such as the overturning of laws that now award alimony to ex-wives but not to ex-husbands.

Moreover, the amendment would nullify protective labor legislation for women covering maximum hours, night work, weight-lifting and occupational prohibitions. States no longer could prohibit women from entering such fields as bartending and coal mining, as several now do. Ohio, which has unusually broad sexual restrictions, would be particularly affected: It would have to admit women to the now-closed ranks of bellhops, shoeshiners, pinsetters and meter readers.

Female backers of the amendment argue these so-called protective laws have sharply limited women's opportunities. "If the amendment means women lose certain privileges, so be it," snaps Mrs. Rita Hauser, U.S. representative to the United Nations Commission on Human Rights. "These laws might have been necessary once, but now they simply prevent women from economically improving themselves."

CLOGGING THE COURTS

But some experts fear the new law's chief effect would be to clog the courts with years of litigation over how to interpret it.

A sample problem: What will happen in the 30 states where women may marry without parental consent at an earlier age than men? To make things equal, should these states lower the age for men or raise it for women?

According to proponents, the problem would be solved by simply extending rights enjoyed by one sex to the other sex. But deciding what is and what isn't a right may not turn out to be so simple, says Harvard's Mr. Freund. He observes that lowering the marrying age for men might actually involve their surrendering certain rights—such as the right to annul marriages and contracts on the ground that they entered into them before reaching their majority.

This problem seems mild compared to the question of women and the draft. Some women feel it's unjust for females to be denied eligibility for involuntary induction. "A lot of privileges go along with being in the military," and the opportunities for women to enlist are limited, says Adele T. Weaver, president of the National Association of Women Lawyers. "Men learn trades in the service—women should have this right, too."

Most likely, women would be selected through the same lottery system that selects men, legal experts think. This doesn't mean they would be assigned combat duty (though one woman lawyer argues that "if it turns out women can shoot straight, they should be placed on the front lines"). Most authorities figure women would be assigned duties on the basis of physical suitability, meaning they would end up as clerks, typists, nurses and aides.

But other experts question whether Congress necessarily would interpret the amendment as making women draftable at all. Conceivably, says James J. White, professor of law at the University of Michigan Law School, Congress could set exceedingly rigorous physical standards that would favor men but work against women. "The Government could then say that since so few women qualified, they should be cut out altogether," Mr. White suggests. "The women's lib groups would raise hell, but the courts are going to have to interpret this amendment reasonably or we'll have chaos."

Indeed, much will hinge on whether courts permit to stand any laws that make sexual distinctions. The sweeping and unconditional language of the two-sentence amendment works against this, say some legal authorities.

"The litigation could be endless," concedes Soia Mentschikoff, professor of law at the University of Chicago Law School. "The courts will have to decide whether sex can ever be a reasonable classification. For example, there's always been a certain presumption in favor of the mother in child custody cases. Courts probably won't alter these traditional roles overnight." Despite the sweeping language of the amendment, "the courts will have to deal with reality," she says.

Nonetheless, many experts believe the new amendment would indeed abrogate many age-old legal rules based solely on sex. One example: The common rule that the husband has the primary duty of support of his family. Instead, it would become "the legal duty of either spouse to support the other, more dependent spouse," explains Mrs. Weaver. In states where the law provides for alimony only for wives, courts could, under the new law, start awarding alimony to husbands. Also, both parties would assume responsibility for child support.

The amendment also would have important effects in the area of employment. While Tile VII of the Civil Rights Act of 1964 already bars job discrimination on the basis of sex, the equal rights amendment probably would speed up the securing of employment rights for women. In addition to gaining opportunities to work more hours and of different jobs, women would receive some Social Security benefits that now apply only to men.

A few critics argue that the amendment's language is just too sweeping to be practical Obviously, they say, states aren't going to strike down the sexual distinction in Iowa providing maternity benefits for women only.

Mr. Weaver answers that such distinctions in law really aren't discriminations as to sex, but rather "medical matters."

A male lawyer, who asks to remain unidentified, isn't convinced by this argument. "This is silly—women reintroduce sexual distinctions into the law when it suits their purpose. They just put a different label on them."

Most critics of the equal rights amendment also argue that the same ends could be achieved through rigorous enforcement of the "equal protection" clause of the 14th Amendment—and without throwing into confusion every law involving sexual distinctions. Rep. Martha Griffiths (D. Mich.), who last year introduced the proposed amendment, agrees that the Constitution, if properly interpreted, could protect women's rights. But she says the Supreme Court, despite many opportunities in the past, has never done so.

[From the Washington Star, Aug. 14, 1970]

WOMEN'S RIGHTS AMENDMENT MAY END PROTECTION

(By Richard Wilson)

Reading in the Congressional Record the hour of debate devoted to the so-called women's rights amendment is hard going but worth it for one reason.

The House of Representatives went on record in favor of a constitutional amendment without a very clear idea of what it will mean. When unnumbered millions of women find out that they will lose privileged status so that their militant sisters may claim rights—and responsibilities—equal to men, they may not be very pleased.

The woman who thinks that making a home and raising a family is the greatest career to which she aspires, and wishes to be protected in what she considers to be a noble and natural role, may quite conceivably find that she has lost some of this protection.

Let us take, for example, a young woman of 20 who wishes to marry and settle for a long, rewarding life with children in a comfortable home. First, she may be subject to the draft, although the women in Congress assure us that she will not have to fight if she is not fitted for it. Some girls of 20 are, of course, quite equal to the ardors of military campaigning as they so ably demonstrate in the sports arena, and some of them can shoot straight, too.

Once married, and if things go awry, some young women may find themselves liable to pay alimony to a wronged husband. The responsibility for the financial support of children may lie equally upon her instead of solely upon a wayward husband.

These details are mentioned with hesitancy and deference because we have the assurance of Mrs. Martha Griffiths, the able congresswoman who accomplished the amazing one-hour feat of putting across an amendment pending for 47 years, that 30 million women are at work nowadays and desire equality more than protection.

In practical effect, as under the social security program, this equality will extend to men such privileges as are accorded women. But Mrs. Griffiths has a little different twist on it. She wishes to reserve for women some existing privileges based upon physiological differences. She asserted in the debate that separation of the sexes by law would be forbidden under the amendment except in situations shown to be necessary because of an overriding and compelling public interest. "For example, in our present culture," she said, "the recognition of the right of privacy would justify separate rest room facilities in public buildings."

However, it seems to be admitted on all sides that the equal rights amendment raises hundreds of other questions in many states concerning family relationships, divorce, separation, alimony, age of consent, military service, child custody, bastardy. The contention cannot be dismissed lightly that the equal rights amendment releases men from sole family and public responsibilities that society has traditionally imposed upon them and not upon women.

An overwhelming majority of the House of Representatives set aside these doubts, raised incidentally by orthodox liberals, largely out of the conviction that women are discriminated against in employment. This is demonstrably true and women are unjustly discriminated against in other ways.

Mrs. Griffiths dismisses the idea that any real protection will be lost to women but her opposition raised a great many telling points, which were not explored in debate nor were they the subject of prior hearings in the House of Representaitves.

The amendment was passed over Judiciary Chairman Emmanuel Celler's plea to wait until after hearings he had scheduled in September. It can readily be understood that the women's rights advocates placed no trust in Celler's plea since in all the years he has been chairman of the Judiciary Committee he has been unmoved by continuous pressure for adoption of the amendment.

The House acted, and presumably the Senate will act also, under heavy pressure from women's organizations who desired this "Magna Charta" in tribute to the 50th anniversary of women's suffrage.

But much more seems to be expected from this simple amendment than it actually promises. Other enactments "liberate" women without sacrificing their protection. The prudent women will wish her state legislature to take a long look at the deceptive amendment when the ratifying process begins. It was designed by men to get women's votes nearly a half century ago.

[From the National Observer, Aug. 24, 1970]

LET US SAVE WOMEN FROM FULL EQUALITY

(By Edwin A. Roberts, Jr.)

Long before Voltaire employed it with historic effectiveness in his *Philosophical Dictionary*, the technique of weakening an institution or a movement by relentlessly mocking it was a staple in human arguments. And no cause has been so zealously mocked for so long as has the campaign for women's rights.

Mockery has many advantages. If you set about making fun of a concept, it's often not necessary to go to the trouble of debating the concept on its merits. The act of mocking carries with it the implication that the target is too ridiculous to rate serious analysis.

This is the attitude men have customarily adopted toward the efforts of feminists to win equal political and social rights. It is the attitude most often adopted today in the face of a powerful challenge by various women's groups to dispel many old myths and inequities that still burden the female sex. Women, on one context or another, have been the stuff of male jokes since the dawn of the race; and beneath the veneer of humore has lain a monumental contempt.

Rousseau wrote: "The education of women should always be relative to that of men. To please, to be useful to us, to make us love and esteem them, to educate us when young, to take care of us when grown up, to advise, to console us, to render our lives easy and agreeable; these are the duties of women at all times, and what they should be taught in their infancy."

LORD CHESTERFIELD'S VIEW

And Lord Chesterfield declared: "Women are only children of a larger growth. . . . A man of sense only trifles with them, plays with them, humors and flatters them, as he does with a sprightly, forward child; but he neither consults them about, nor trusts them, with serious matters."

What is remarkable about the state of mind these observations reflect is not that it is a curiosity from the reactionary past, but that it is a state of mind persisting today. Usually without realizing it, most men continue to think of women as splendid, troublesome, useful accessories. They go well with wine and song; they seem to have a knack for housekeeping; and their childlike interest in clothes, gossip, and sentimental stories deserves only the baffled smile of the generously tolerant male.

Such is the prejudice women have been bucking for centuries. It shouldn't be surprising, then, that some particularly ardent feminists have set as their goal an exact equality with men; that is, there would never be sex discrimination, even if that discrimination amounted to a privilege for women. No more alimony. No more male door-holding. No more exclusion from the draft. No more anything that underlines a social distinction between men and women.

Well, it's possible to sympathize with women activists without buying the package insisted upon by their more radical fellows. Women, after all, have come a long way since 1879 when Henrik Ibsen wrote *A Doll's House*, the play that outraged society by laying bare the absurdly subservient role of wives in the Nineteenth Century. Still it was only 50 years ago that American women got the vote, and in England women weren't fully enfranchised until 1928.

The equal-rights amendment recently passed by the House of Representatives has been kicking around for 47 years, but at least it seems to be getting someplace now. Every male human on earth gives lip service to the proposition that women should be paid equally for equal work, and many of the old barriers against women holding more responsible jobs are being dismantled.

DIMINISHING RETURNS

The question, which the feminists have not articulated very well, is at what point in the process of "liberation" would women begin to realize diminishing returns?

If fair-minded people agree that women should be treated equally in the job market, and that the aspirations of women to make the most of their lives and intellects merit something more than mockery, what else can be done? Should the cause of equality be pursued to such an extreme that the subtle tensions in man-woman relationships are destroyed? Those tensions, after all, go far to assuage the travail of living a human life.

Even casual relationships between men and women are different from those between members of the same sex. And no matter what the more radical feminists say, the reason lies not in custom but in nature. Beauty in a woman is forever a distraction to every man she meets; he may admire her other qualities and respect her for them, but he is always aware he is not in the company of a man.

The tension, of course, is reciprocated. A woman may be mindful that the man at the next desk is a proficient worker and an amiable individual, but she is ever conscious that he is a male.

If this is true, then how it is possible to re-engineer society so that men and women will be treated identically? It can't be done. But are women really the losers because of it?

Let me tell a little story. Some years ago a young, single man living in New York made it a practice to go alone to the theater on Thursday nights. About half the time he wound up sitting next to a single woman, a different woman each Thursday night, who had also purchased only one ticket.

It was an easy matter for the man to strike up a conversation and, after the show, to invite the woman out for a post-theater snack. Emerging from the theater, the man would grasp the woman firmly by the arm, guide her to a taxi, see her into it and then climb in himself. Without asking the woman her preferences, he would tell the cabbie the name of the restaurant. Once there, the man would tell the head waiter what table he preferred, and he would then proceed to make some strong suggestions to the woman about what she might enjoy eating and drinking.

With the logistics taken care of, the man

would then settle back and converse with the woman about whatever seemed to interest her. Once they were seated at the table, the man and the women were indeed equals and the conversation took care of itself. The woman, far from resenting the man's control of the situation in getting them from theater to restaurant, was always pleased that that business had been handled by the man. As a result she quickly developed confidence in him while gaining confidence in herself—after all, he went to all that trouble for her.

FEMINISTS WOULD OBJECT

Radical feminists would undoubtedly despise the man's behavior. They would be happier if the couple discussed, in democratic fashion, what corner to head for to catch a taxi, what restaurant to go to, what table to sit at, and what in the world to have to eat. It probably would have been dawn by the time they agreed on what cab to hail.

It is not mockery or in any way belittling to observe that men and women, by nature, ask of each other certain considerations they would not ask of members of their own sex. A woman is no less "equal" for permitting the man to expedite the logistics of a date. Nor is a man contemptuous for assuming such responsibilities.

The feminists, when they hold their 'strike" Aug. 26, would do themselves and society a favor if they made it a point to distinguish between economic sex discrimination and the natural differences between the social behavior of men and women.

That wouldn't settle the matter, but it would help bring the nation's fuzziest debate into far better focus.

[From the Evening Star, Aug. 18, 1970]

RETAIN PROTECTIVE LAWS FOR WOMEN, ERVIN ASKS

Sen. Sam J. Ervin, Jr., D-N.C., who says he wants to give women the best of both worlds, is leading an attack against the House version of a constitutional amendment to guarantee women equal rights.

Ervin, one of the Senate's experts on the Constitution, has no quarrel with the portion of the House-passed amendment that would invalidate laws discriminating against women.

But he plans to introduce a substitute tomorrow that also would retain laws designed to protect women. This provision, for example, would continue to exempt women from the draft.

FEARS CHAOS

He said in an interview that if the amendment which passed the House last week by a 350–15 vote should be approved by the senate and ratified by the states, it would create chaos in the field of constitutional law.

He said constitutional lawyers with whom he has consulted say the proposed amendment—which has been pending in Congress 47 years—either means nothing or would have the effect of invalidating all federal and state laws making any distinction between men and women.

On Ervin's motion, the Senate Judiciary Committee voted Wednesday to take testimony from constitutional authorities and explore all legal ramifications of the House-passed amendment.

PLACED ON CALENDAR

But Majority Leader Mike Mansfield, D-Mont., had it placed on the Senate calendar without being referred to the Judiciary Committee for consideration.

The effect was to put the amendment in position to be called up on the Senate floor at any time.

The substitute Ervin will introduce provides, as does the House-passed amendment, that equality of rights under the law shall not be denied or abridged on account of sex.

PROTECTION ALLOWED

But it also specifically exempts women from compulsory military service and permits passage of any law "reasonably designed to promote the health, safety, privacy, education, or economic welfare of women, or to enable them to perform their duties as homemakers or mothers."

Ervin contends the House version "invalidates all acts of Congress and all state laws making any distinctions between men and women, including a multitude of laws which are reasonably designed to afford necessary protection to women."

He said these include laws making a husband primarily responsible for the support of his wife and children, securing dowery and other property rights to women, barring women from hazardous jobs, and requiring separate restrooms and segregation of men and women in jails.

SECOND ANNIVERSARY OF THE RUSSIAN OCCUPATION OF CZECHOSLOVAKIA

Mr. GURNEY. Mr. President, this week marks the second anniversary of the invasion of Czechoslovakia by the Soviet Union and the beginning of the latest subjugation of the Czechs by Russian might. These days, we hear a great deal about the detente, the thaw between East and West. The signing of the treaty between West Germany and the Soviet Union has been hailed as proof of a new willingness on the part of the Kremlin leaders to end old animosities and to "regularize" relations between Russia and other European states. I imagine the Czech leaders must find cruel irony in this talk. I image their vivid recollection of the Soviet tanks rolling into St. Stanislaus Square in Prague 2 years ago this week must make them wonder about the sincerity of current Soviet protestations of peaceful intentions. The Kremlin leadership has not changed since the Czech invasion: the Soviet leaders who are now assuring the world of their desire for peace and freedom, are the same individuals who ordered the rape of Czechoslovakia 2 years ago this week.

I do not suggest that because of past difficulties we should break off negotiations with the Soviet Union or refuse to deal with the Kremlin. On the contrary, I think we should pursue our efforts for a negotiated settlement of European problems, Middle East problems, and the strategic arms limitations talks. What I do suggest is that "one swallow does not make a spring." In all our dealings with the Soviet Union, we should proceed in the knowledge that Soviet overtures are not always what they seem. In the Middle East, we should remember that even though the Russians have apparently given permission to their Arab puppets to proceed toward a negotiated settlement, Soviet territorial ambitions remain the same. In the SALT talks, we must be vigilant about Soviet intentions and we must not squander our defense in the hope that Soviet "good will" will make disarmament work.

Caution should be the keynote in our dealings with the Soviet Union and I suggest that the Czech invasion of 1968 should be recalled from time to time when our optimism tends to blind us to the real intentions of the Soviet Union. The cruel and bitter memory of that unhappy event, the subjugation of that proud people, should remind us to be wary, to be cautious and prudent in negotiating with the Soviet regime.

I ask unanimous consent to have printed in the RECORD a statement by the Czechoslovakia National Council of America memorializing the unhappy anniversary of the most recent assault on Czech national freedom.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

CZECHOSLOVAK NATIONAL COUNCIL OF AMERICA

On this sad occasion—the 2nd anniversary of the brutal Soviet-led invasion and occupation of the peaceful, freedom-loving country of our ancestors—we, American citizens of Czech, Slovak and Subcarpatho-Ruthenian descent, again remind the entire world of this Soviet violation of principles of international law, incorporated into the Charter of the United Nations.

The Soviet aggression and occupation of Czechoslovakia—

(1) violated the sovereignty of a member state of the United Nations (Article 2, Section 1);

(2) violated Article 2, Section 4, prohibiting the use of military force in the relations between individual members of the United Nations;

(3) violated the principle of self-determination of peoples (Article 1, Section 2);

(4) was in conflict with Article 2, Section 7, prohibiting outside intervention in matters essentially within the domestic jurisdiction of any state; and

(5) was in conflict with a number of resolutions of the General Assembly of the United Nations, particularly Resolution 2131 (XXI) adopted at the meeting of December 21, 1965, upon the Soviet Union's own motion. This resolution prohibits intervention in the domestic affairs of any state, and guarantees the protection of its independence and sovereignty.

The hopes that Czechoslovakia, following the Nazi occupation, would resume its splendid progress toward a modern democracy were first shattered by a communist coup in February, 1948. For the next 20 years, the communist regime lived on reserves accumulated by the 1918 generation, all the time deceiving the very ones in whose name communist revolutions occur: the working class. Czechoslovak workers never were given the promised factories; instead they became prey to communist state-capitalism and Soviet neo-colonialism. Wages gradually were reduced to only about half an adjusted pre-war level as compared to earnings being enjoyed by fellow-workers in the West. The whole nation was politically manipulated, and there was no freedom of press, expression or assembly permitted.

Soviet Russia forced Czechoslovakia to sign lopsided commercial treaties under which that country had to buy low-grade Russian raw materials at world-market prices but sell Russian manufactured goods at below market prices. This kind of operation understandably resulted in tremendous yearly losses for the Czechoslovak economy where foreign trade had been profitable and at least 75% western-oriented. Even under these conditions, Soviet Russia failed to fulfill its trade obligations, and by 1967 owed Czechoslovakia approximately $1 billion for excess deliveries.

The glorious spring of 1968 brought an end to oppression and hypocrisy. Without violence, united behind new, young leaders, Czechs and Slovaks began to explore and correct past blunders . . . until the Soviet war machine mustered half a million troops and

subdued a small peace and freedom-loving country.

In Washington, on the first anniversary of that humiliating aggression and occupation, Czechoslovak democratic organizations called a Protest Meeting which was attended by many representatives of other exile and ethnic groups and won strong endorsement by many United States Senators, Governors, and Congressmen. That Meeting voted, by acclamation: August 21st shall henceforth be called the "Soviet Day of Shame." Similar meetings and demonstrations were held in Chicago and other cities in the U.S.A. and throughout the world.

Now the continued Soviet occupation of Czechoslovakia is another crime against the right of a small country to determine its own destiny and aspirations. The invasion was an intervention by the forces of reactionary communism to prevent the Czechs and Slovaks from establishing their own social order . . . one that did not endanger anyone, and sought to contribute to the building of bridges of understanding across the discords of an ideologically divided world while lending aid to better understanding and cooperation among all nations on the basis of true progress and humanity.

The Soviet Union has tried, subsequently, to justify its crime by the so-called Brezhnev doctrine, which is—in fact—in direct conflict with the Charter of the United Nations. This doctrine tries to sanction aggression, and thereby deliver small countries to the "tender mercies" of the aggressive plans of Soviet imperialism.

The Czechoslovak people, however, are not resigning themselves to these aggressive plans of Moscow. They resisted, and continue to resist and reject, Moscow's claim to a right to intervene in the leadership of the State; and they deny Soviet Russia the right to determine who should govern their country or represent it in foreign relations. August 21, in Czechoslovakia, is being commemorated as the "Soviet Day of Shame."

And those of us here in the United States who are joining our friends in Czechoslovakia, urge the whole civilized world to support the effort to achieve

THE WITHDRAWAL OF SOVIET TROOPS FROM CZECHOSLOVAKIA

Especially at this time we remind representatives of free nations not to lose this opportunity to support the just demands of the people of Czechoslovakia in international meetings and bi-lateral negotiations. We are grateful to President Nixon for his statement of August 7, 1969, rejecting the Brezhnev doctrine and pointing out that he will not be guided by it in cooperating with countries of Eastern Europe. During the forthcoming General Assembly of the United Nations there will be many occasions for denouncing Soviet aggression and repeating demands for the withdrawal of Soviet forces from Czechoslovakia. We hope that representatives of all free nations will not let this opportunity be lost, but will help us solve a problem that endangers not only the peace in Europe but throughout the world.

FOSTER GRANDPARENT PROGRAM

Mr. MURPHY. Mr. President, I have been a strong supporter of the foster grandparent program. When the Older American Act passed the Senate last year, I spoke in favor of the total program, but I particularly praised the foster grandparent program, citing the various examples in my State of the program's effect not only on the grandchildren but also on the grandmother as well.

Today, I received a report from the Pacific State Hospital, Pomona, Calif., describing their foster grandparent program. I ask unanimous consent that the report, together with an article from the Progress Bulletin, entitled "Love Nurtures Child," written by Rosamond Douglas, a staff writer, be printed in the RECORD.

There being no objection, the report and article were ordered to be printed in the RECORD, as follows:

REPORT ON FOSTER GRANDPARENT PROJECT, PACIFIC STATE HOSPITAL

(Sponsored by Economic and Youth Opportunities Agency of Greater Los Angeles)

Project staff

Alvin Walker, M.D., Medical Director.

Mary Jane Roberts, R.N., Program Administrator.

Betty S. Miller, Sr. P.T. II, Project Director.

Ardath Rivera, Stenographer II, Project Secretary.

Project consultants

Mary Jane Roberts, Superintendent of Nursing Services.

Herbert Schenck, Ph.D., Chief Psychologist.

Sheldon J. Brown, Chief Social Worker.

Donald Bowling, Principal, Educational Services.

Martha Bruske, Director, Nursing Education.

Frances Grove, Director, Rehabilitation Services.

PART I—GENERAL OPERATION

The Foster Grandparent Program at Pacific State Hospital has employed 59 foster grandparents during this first six months of 1970. They all have been paid from federal funds. During this period we have been negotiating a contract for the state funds to pay for twelve of the foster grandparents. These funds were included in the 1969–70 Department of Mental Hygiene budget. The finalization of these negotiations were brought about in June, and procedures were put in motion to transfer the funds for these twelve from the general fund in Sacramento to EYOA.

Foster grandparents are assigned to 17 wards. They work with 133 patients; 86 are males and 47 are females. Their ages range from 4 to 16 years. The IQ's range from 1 to 69 with the greatest majority under 35. Eighty-seven of these patients are ambulatory and 46 are non-ambulatory, 10 are blind, and 3 are deaf.

The program has become a very effective part of the hospital's overall treatment plan for the patient. With all the requests for foster grandparents we receive from medical staff, ward personnel, social services staff, and parents of patients, we could use many more foster grandparents. It is especially hard to explain to a child why he doesn't have a foster grandparent when he sees another child go out with a foster grandparent. There is such a great need for all of the patients to have someone to give the individual attention and love the foster grandparents are so willing and able to give.

We continue to have monthly in-service training sessions for the foster grandparents. These sessions include such subjects as behavior shaping, Social Security, and general information sessions. The foster grandparents published their own FGP Newsletter during their period. This has stirred much interest and participation among them. This is a revival of the old FGP Newsletter which they failed to continue. We hope it has a much longer life this time.

The foster grandparents have formed a Social Committee. This committee of four plan social activities for all the foster grandparents. They have planned picnics and luncheons. These were greatly enjoyed by all. In the future there are plans for a fishing trip. These activities help to keep the foster grandparents a very close knit group. For many these activities are their only social participation.

One of our foster grandmothers has been exchanging correspondence with a grandmother from the Foster Grandparent Program at Denton State School, Denton, Texas. They have exchanged pictures of themselves and other grandparents, also stories of their foster grandchildren.

We are very sorry that Mrs. Ardath Rivera, Foster Grandparent Secretary, will be resigning June 30, 1970. Not only is she my right hand, she is extremely well liked by all of the foster grandparents. She will be greatly missed by all.

* * * * *

PART III—COMMENTS

Foster grandparent financial benefits

"I was a cook at a local hospital, and the work was too hard for my age and health. I was out of work and could not make it on my unemployment. I honestly don't know how I would have made it without the Foster Grandparent Program. I might have had to go on welfare. I do much better financially now."

"It has paid for my groceries, utilities, kept up my car, and with my Social Security I have been able to keep up with my taxes and other bills. I can manage very well, providing nothing happens which would entail a large outlay of money all at once."

"Since becoming a foster grandparent, a lot of worry has been taken off my mind. I can now pay my bills and am more able to care for my family."

"My husband was hospitalized and what little pension he had went for hospital bills. He was due to be transferred into a rest home and that was more than his pension, so I became a foster grandparent. I was then able to pay my bills without worry. It was a "God Send" as my husband passed away 3 months after I was employed. All pension checks were stopped and I had only my Social Security."

"Being a foster grandparent has helped tremendously in being able to get things such as eyeglasses and taking care of dental bills."

"I am able to earn a living instead of going on welfare."

Foster grandparent benefits concerning health, happiness, and improved attitudes

"Before I became a foster grandparent, I was just sitting around doing nothing. Now I feel I have been able to make some children happy. This has helped my feelings of usefulness. Physically I have improved for I am now receiving the exercise we all need to stay healthy."

"Without any doubt, I feel one hundred percent better because my mind is always busy with the kids and I love to be with them. When I first started working here, I didn't think I could do very much for these kids, but now I don't think I could do without the love of these kids. I have met the parents of my boys and they are grateful and enthusiastic for what is being done. I feel very proud to be a foster grandparent because deep in my heart I know that I'm doing something really worthwhile."

"There has been a great change in my mental health and some change in my physical health, all for the better. I enjoy being in the *click* again. I enjoy the few hours I'm away from home. Instead of being lonely, I'm always anxious to see my two boys each morning. I feel that I am doing something to make life a little happier for at least two little guys. Before I started to work on the Foster Grandparent Program, I felt I had very few friends, now I feel everyone is my friend."

"Physically, I am stronger. I must walk at least two miles a day out in the fresh air and sunshine, and I count my blessings. There is no time to feel sorry for me when

I am so busy helping others less fortunate than I am."

"According to friends and family, I seem much happier and relaxed. I don't need sleeping or nerve pills anymore."

Benefits to the patients as expressed by Ward personnel

"About eleven months ago, Gretchen was a very shy, withdrawn little girl. She sat alone, preferred to huddle under a table or anywhere in close quarters. When she was touched by the personnel or other patients, it was very apparent that she did not like this and would pull away. She never made eye contact.

"After talking with her mother, we knew that she had been responsive to people at one time. We asked for and were given a member of the Foster Grandparent Program.

"Gretchen was a difficult patient to work with. When Mrs. Sanger began, she was unable to touch Gretchen at all. Gretchen did not want to go for walks, books or toys didn't interest her, and it was very obvious she much preferred to be left alone in her own little world.

"Mrs. Sanger was very persistent in gently coaxing her on walks, and was elated the day Gretchen reached out and touched her hand. This took 1½ months. She has continued to progress. Now she smiles when Mrs. Sanger arrives, is very willing to hold hands, plays and relates to other patients. She is in speech therapy and is showing progress. She relates well with group leader and has become very outgoing." (Glynn Mitchell, Sr. P.T. II.)

"The staff of Ward 29 would like to offer a special 'thanks' to our ward grandpas. We all feel that they are an important part of our ward program.

"In addition to giving the boys they work with that extra special attention that only they can give, they have done many things to help the boys toward preparation for eventual family care placement.

"Learning proper behavior is a first step. The boys know that grandpa will check and if his boy's behavior has not been good that day, he will take another boy. This has been especially effective with several of the boys.

"Grandpa Keller has taught his boys many useful things. When he found that Richard and Wade could not print their names, he brought paper and pencils and practiced with them until they could. He has also taught them to make change. Wade can now make change for $20. Since our boys use only canteen cards in the hospital, they will be very useful when they are able to leave the hospital.

"The latest project that Grandpa Keller has undertaken is teaching the boys to cast a fly rod in preparation for a fishing trip in the near future." (J. Ruth Hughes, Sr., P.T. II.)

"Brett was using a walker at the time Mr. Hernandez started taking him out. He was taken out of the walker and ambulated by holding onto both of Mr. Hernandez's hands and then proceeded to walk by being held by only one hand. He is now able to walk unaided.

"Frank, a new admittance who had trouble adapting to the ward, was accustomed to being spoken to in Spanish. Mr. Hernandez relates to him in Spanish and English. He has adjusted very well to the ward. His temper tantrums have diminished.

"Stuart was having difficulty walking. He is now able to ambulate very well. His personality has become more outoing, due to Mrs. Travilla's attention.

"Brandi was unable to even sit alone on the swing. Since Mrs. Travilla has worked with her, she is now able to swing herself. Also she is now able to walk up and down stairs.

"Daniel was very unresponsive to everything and everyone. Since Mrs. Walker has worked with him, he appears to be taking more of an interest in his peers and his environment.

"Mary cried frequently. Her crying has diminished since going out with Mrs. Walker.

"Pamela has learned to use the swing. Pamela relates to Mrs. McCloskey whereas she related to no one before.

"Robin verbalizes more frequently and is just thrilled when she sees Mrs. McCloskey." (Dolores Quinlan, Psychiatric Nurse.)

"The loving hand of the foster grandmother has bridged the gap from home to the hospital for Candy. Mrs. Becker (Grandma Kay) has formed a good relationship, not only with the patient, but is in close contact with the patient's mother. She escorts Candy to the telephone weekly to call her mother, and has frequently spoken with the mother personally. Grandma Kay has been with Candy since shortly after her admission.

"With Doug, Grandma Kay has spent much time patiently encouraging speech and counting. In the near future there will be "his and hers" bicycles to be used to encourage physical fitness. Under her special loving care, he has begun to talk more and be less destructive to property.

"Mrs. Tracy (Grandma Willie) is the focus of attention for Charlotte. This child has been frequently disturbed and hyperactive. Grandma Willie's slow pace and acceptance of the child has added greatly to the child's sense of belonging and self worth.

"Mrs. Klippen (Grandma Helen) is the apple of the eyes of her two children. Her smiling participation in their games and tolerance of their humorous mischief has done much to brighten their lives. Alice (a diabetic patient) has become lively and talkative with Grandma Helen's encouragement of speech and self expression.

"These three ladies have brightened the lives of their patients and become an integral part of the ward team. They relay pertinent information to personnel on the progress of each of their patients. Their humor and participation has endeared them to all of us." (Doris Bonnette, Sr. Psychiatric Nurse.)

"As we look at our boys on Ward 40, we see their obvious physical growth. It is also apparent there has been growth in other ways. Some who have made really noticeable gains are those boys who have had foster grandparents.

"John has daily visits with Mr. Watson. He has slowly changed from a quiet, shy, unresponsive little boy to one who openly responds to friendship and attention. This is demonstrated by his cooperation in learning daily living tasks rather than by resistance. He is learning that it is pleasant to learn, be cooperative, and rewarded with the approval of his friends.

"Mrs. Groppe spent long hours with Woody without much progress. Then gradually he became aware of the daily presence of genuine warmth and respect in this foster grandmother. With persistence, she replaced balls of dirt, which he collected and rolled in his hands, with small rubber balls. Then she gradually replaced the balls with other toys. In learning acceptable behavior he also learned that he became more acceptable. Since then he has become progressively more aware of and involved in his environment. Best of all, his mask-like facial expression has been replaced by awareness and an occasional real smile.

"All the children who have had the opportunity to be with the foster grandparents have gained immensely. They have grown not only in receiving love but by learning to be able to give affection and responsiveness.

"From first steps in relating to others, several of the boys have been able to form relationships with others that have enabled them to function well with several people. This has led to their leaving the hospital setting and living successfully in family care homes. Several even attend school. Without the consistent, ever-accepting love of their foster grandparents, these children could not have gained and grown to this rewarding way of life." (Virginia Bagnor, Sr. P. T. II.)

[From the Pomona (Calif.) Progress-Bulletin, May 10, 1970]

LOVE NURTURES CHILD

(By Rosamond Douglas)

Biologists and psychologists alike stress one fact about ourselves that we often forget: human beings are a nurtured species. We cannot survive unless the mother takes care of the child.

As a matter of fact we cannot survive unless the mother wants to take care of the child, unless she feels within herself the love that makes her willing and glad to take on these responsibilities for however long it is necessary, shaping her own life meanwhile to the needs of the baby who is growing.

For some women, mothers of handicapped children, this commitment is not possible. Her child is born with or, in some cases, develops basic abnormalities which make it impossible for the mother to fulfill her nurturing role. She must find or seek substitute professional help.

At Pacific State Hospital, thousands of children from all walks of life find the help they need. Here they are trained in the social, moral and emotional disciplines necessary for life in our society. Methods of teaching in general are the same as those used with normal children, but presentation is reduced to its simplest form and patient repetition is the key to success.

The growing child, though mentally retarded, reveals an incredible need for tenderness, patience and love common to the human estate. With this love the child will grow and learn; without it, apathy and deterioration take place.

A project study in this necessary love and tenderness began at Pacific State not quite three years ago, when approximately 19 senior citizens were enrolled in a Foster Grandparent Program. Their purpose—to share themselves and their love with children ages six through 16.

That pilot group has since grown to 58 grandparents with a waiting list of senior citizens eager to join this emotionally and financially rewarding program. The work is not only something the grandparents can do, but something they can do better than young persons, and they receive $1.60 per hour plus a dollar a day for transportation.

They are not there to work. Their job is play. Four hours a day, five days a week, they take "their grandchildren" out for walks, play ball, fly kites, push swings and in general do all the wonderful things that make children feel prized and loved.

It's a personal relationship. Each child recognizes the familiar friend the moment the "grandparent" enters the ward. Anticipation of "good times" fosters joy and optimism between child and "grandparent."

Mrs. Kay Becker has been with Douglas for more than a year. She relates with pride his many accomplishments.

"He loves to climb the hills and he minds beautifully. We love being together and he's very smart."

Stevie, severely retarded, is called quite bright by his grandmother, Mrs. Bertha Groppe. She's been in the program for more than two years and "looks forward to afternoons with my grandchild."

Carole, Mrs. Lois S. Brummer's "granddaughter," has learned not only to walk, but to run and kick a ball since her grandmother took over eight months ago.

Mrs. Carrie Sanger is very attached to Buddy. She's been with him for more than two years. Those two years tell a story of one accomplishment after another resulting from the patient care and teaching of his "grandmother."

All the "grandparents" interviewed told the same stories of growth and accomplishments with their "grandchildren." Some children who had never had a morsel of food enter their mouths (tube fed babies) were now eating on their own. Others who had withdrawn to a world of sleep were now running and playing with other children.

Harold Schmitz, assistant to the medical director of the project, and Betty S. Miller, project director, speaking for themselves and other staff members praised the project highly.

"We have seen profound changes in the children since the Grandmother Program went into effect. Those who never spoke now make an effort to build a vocabulary, others who just stayed in their beds now run and play," Mrs. Miller said.

She added, "The children have blossomed under the one-to-one contact and a number of them have progressed to the point that they are now able to enter family care homes and schools."

Periodic physical examinations reveal that the grandparents have also undergone marked changes since they entered the Grandparents Program.

"Reports show improvement in their health from one examination to another," Mrs. Miller said.

"They are needed and they know it. It's a two-way street. The love they give comes back to them and they blossom in much the same way as the children," she added.

Mr. Schmitz said the "grandparents" find new friends and new interests.

"They give and they receive. I am sure they get as much out of this program as we do."

Needless to say the effect of the Foster Grandparent Program on Pacific State Hospital has been most rewarding for those involved.

The mothers of children at Pacific State Hospital also benefit by the knowledge that their children are receiving the love and tenderness they themselves need to give, but cannot, because they haven't yet reached those relatively "free" senior years.

THE ALL-PROFESSIONAL ARMY

Mr. HART. Mr. President, I regret that the Senate did not approve the Hatfield-Goldwater amendment which would have made it possible to test the feasibility of an all-professional army while the draft system was still in force.

The amendment would have implemented provisions of the President's Commission on an All-Volunteer Army by raising military pay and other benefits.

If the amendment had been adopted, the Nation could have gained valuable experience with an all-professional army before having to decide next spring whether to extend the draft.

That is why I voted for the amendment.

Mr. President, I have not favored going to a large, all-professional army. Having experienced considerable difficulty in stopping the momentum which attaches itself to a large and expensive weapons system, I am concerned about the momentum which might be built up by a large and expensive professional army.

Weighed against that concern, which would be eased by establishment of limits on the size of a professional army, is my concern for the effect the draft in general and the system's inequities in particular have on many of our youth and their families.

Certainly the goal of any draft system should be equal exposure, but when all qualified men are not needed, and all personnel serving will not see combat, then it is indeed impossible to come up with a system that demands the same for everyone.

The answer in that case is to do away with the draft, and that answer is in keeping with the traditions of this Nation.

The administration has said they are moving toward zero draft calls, and that is good. The question which Congress must decide by next June is whether to extend authority for the draft.

Mr. President, I was one of the Senators who agreed to withhold additional reform amendments last year to insure the swift passage of the lottery system last year.

We withheld our amendments with the very explicit understanding that comprehensive selective service hearings would begin no later than February 15, 1970.

When hearings were not held, I asked in June that hearings be scheduled promptly to consider reform and repeal of the draft. At that time I said:

> To put off consideration until the start of the new Congress might, I fear, leave too little time for both Houses to consider all alternatives before being faced with a deadline on the present system.

The situation I feared has come to pass.

We must now explore the complicated questions of draft repeal-reform and achieve agreement of both Houses of Congress in less than a year and without the experience we might have gained had the Hatfield-Goldwater amendment been approved.

Here are just some of the questions which must be answered:

How large an army should we maintain?

If we go to an all-professional army, should there be a phase-in period or should the draft be ended next June?

Should Congress establish an upper limit on the size of a professional army and be required yearly or biannually to review the authorization for the size of the army, whether up to or less than the limit?

While I believe that if we go to a volunteer army, Congress should set a limit and require regular authorization reviews, we must also decide what if any arrangements will be made to expand the army through a draft in periods of national emergency.

Certainly, draft should not be reinstituted without approval of Congress, but how formal a structure should we maintain to allow Congress to authorize resumption of the draft?

Should we do away with registration and start from scratch each time, or should we continue to require registration?

And if we are to continue with the draft, either on a permanent basis or on a standby basis, what action shall Congress take on such reform proposals as the one dealing with selective conscientious objectors?

Mr. President, these are just some of the tough questions facing Congress next year. The question of draft reform-repeal must be one of the first taken up by the new Congress.

And in seeking advice, I hope we will not overlook men such as Col. Arthur Holmes, Michigan selective service director.

In an interview published in the Detroit News of August 23, Colonel Holmes was quoted as saying:

> I would like to see the draft abolished as soon as possible as long as national security is not endangered.

So that his views might receive wider attention, I ask unanimous consent that the interview with Colonel Holmes, whom I know as a friend and respect as a wise counselor in mobilization matters, be printed at this point in the CONGRESSIONAL RECORD.

I ask also that there be printed in the RECORD my press release of June 16, 1970.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

STATE DRAFT BOSS WOULD END DRAFT

(By Allen Phillips)

LANSING.—The man in charge of drafting Michigan's young men for the U.S. armed Forces doesn't approve of the draft, and he doesn't defend the U.S. involvement in Vietnam.

In his 18 years as state selective service director, Col. Arthur Holmes has helped put enough Michigan men into uniform to make up a sizable army, but it doesn't prevent his saying:

"I would like to see the draft abolished as soon as possible as long as national security is not endangered."

After 30 years' experience with the draft program Holmes is convinced that a volunteer army, if it can be done, is the solution.

And if that doesn't startle draft dissenters, as Holmes delights in doing at campus appearances, he will add:

"I wish we were out of Vietnam—or any war—but our nation's leadership is better able to say what we ought to do than I."

On both points Holmes reflects the professional soldier's view that peace is preferable to war, but being a good soldier, he follows orders.

Holmes attends to the administrative details to procure from local boards the requisite number of healthy, reasonably intelligent, morally fit young men to fulfill Michigan's draft quota.

Can the system designed to do this—in wartime destined to send some of these men to their deaths—be humane as well as efficient?

"The draft can't be fair to the extent it pleases everybody. Sure as hell, the man who goes into the Army doesn't think so," Holmes said. "But normally, he doesn't know the reason it's him instead of somebody else."

Even the national lottery, which is supposed to be more equitable, has added to misunderstanding and created some myths of its own.

Two beliefs Holmes said should be dispelled are:

1. That it is a draft only of 19-year-olds. At least half the men called under the lottery have already turned 20.

2. The notion that high lottery numbers assure immunity from the draft. Military manpower needs have a lot to do with this, but it remains a possibility the highest numbers could be reached.

Simply, the lottery works this way: For draft registrants every birthdate of the year is given a number. These are the lottery num-

bers, and the first set were drawn last December for men to be drafted this year.

The December lottery covered births in the period of January, 1944, through December, 1950, spanning the ages 19 to 26. The first numbers drawn were drafted last January. A second lottery drawing last month gave numbers to men with birthdates in 1951 for induction in 1971.

"Some believed in the theory that the lowest third of the numbers would be inducted, the next one-third might face the draft, and the highest third had nothing to worry about," Holmes said.

"Right away I advised young men who had high numbers not to drop their college deferments or drop out of National Guard or Reserve units.

"Don't let anybody tell you because you have a high number you won't be affected."

Holmes' warning was justified. In the first few months this year the draft was only taking men up to lottery No. 30. But in filling draft calls from this group, and the transition from the old system, something went wrong.

Either there were not enough men with those numbers, or a high percentage had deferments. The result was that Michigan failed to meet its quota, shy some 600 men.

The same thing happened in other states. Quickly federal selective service officials jumped up the scale to lottery No. 195, more than half way through all the available birth-dates.

That helped fill the ranks, and so did the June call which turned up hundreds of graduating college students whose deferments expired. Then with military needs tapering off, the Michigan August and September call went only to No. 150.

"I foresee sequence numbers in Michigan going down," said Holmes. "Maybe the numbers will go down to 100, unless the calls increase."

Troop withdrawals in Vietnam and elsewhere, coupled with military strength reductions, will have more than anything else to do with how high the numbers reach.

On an individual basis, however, having a deferment can keep a man with a low number out of uniform indefinitely, at least long enough to weather the decrease in military personnel demands.

On paper, Michigan has a vast reservoir of men. The state has 1,761,151 registrants. But 790,000 are over age 35, 218,900 have deferments for hardship or as fathers, 154,065 have completed military obligation, and 27,000 belong to National Guard or Reserve units.

Narrowing the list further, another 200,000 men have been rejected for service and 75,000 are students. That leaves only about 20,000 men in the "available" pool.

Holmes suspects 20 percent of male college students would shuck their studies if the draft disappeared tomorrow.

For a student deferment the man must be progressing satisfactorily, full time. Deferments for graduate students have been eliminated except for those completing degree requirements.

Yet Holmes estimates that in Michigan between 40–45 percent of men called are rejected. This is almost double the rejection rate in World War II. His explanation is that today's physical standards are much higher.

Draft officials are disturbed by the growing number who evade induction by vanishing, or refuse to take the oath.

At this time about 600 draft evasion cases in Michigan are awaiting federal prosecution, enough men to fill a complete month's quota. They face sentences up to five years in prison and $10,000 fine.

Holmes minimizes the problem. Hundreds of men fail to report because they failed to get notice or they have problems that could easily be cleared up, he said. But the hard-core of draft evaders, he agrees, have been influenced by the Vietnam War.

It is not hard to see why. Virtually all Michigan draftees, after completing physicals at Fort Wayne in Detroit, are shipped off to Fort Knox, Ky., for the Army. A small number are also being sent to the Marine Corps.

PRESS RELEASE OF SENATOR PHILIP A. HART

WASHINGTON.—Senator Philip A. Hart (D-Mich) has asked the Senate Armed Services Committee to hold prompt hearings to consider reform and repeal of the Selective Service System.

In a letter to Senator John Stennis (D-Miss), committee chairman, Hart said the urgency for hearings was prompted by the fact that the draft law expires next year.

"To put off consideration until the start of the new Congress might, I fear, leave too little time for both Houses to consider all alternatives before being faced with a deadline on the present system," Hart warned.

Hart was one of the Senators who agreed to withhold additional reform amendments to ensure swift passage of the lottery system last year.

"We withheld our amendments with the understanding that comprehensive selective service hearings would begin no later than February 15, 1970," Hart said.

He explained:

"Our initial reluctance to withhold additional reform proposals was based on two points:

"First, the proposed lottery system would not correct all inequities in the system.

"Second, passage of the lottery legislation might remove a sense of urgency to press forward promptly with the additional reform.

"Certainly experience with the lottery has justified our first point, and the present lack of movement in Congress for draft reform may suggest the validity of our second concern."

Hart said there was no lessening of interest in draft reform repeal across the country.

He said release of the Gates report calling for an all-volunteer army, Secretary Laird's announcement of a troop reduction and reform recommendations made by the Senate Subcommittee on Administrative Practices and Procedures had increased support for either reform or repeal of the draft system.

"The hearings should consider both draft reform, including those proposals discussed in the subcommittee report, and the creation of an all-volunteer army, including ways of phasing out a conscription army and phasing in a volunteer force," Hart said.

TRIBUTE TO THE 3M CO.

Mr. MONDALE. Mr. President, although Minnesota is often thought of as an agricultural State, we have always been a progressive industrial State as well, particularly with imaginative new industries in electronics and technology.

We have always been immensely proud of the 3M Co.—Minnesota Mining and Manufacturing—and the employment, products, and technology which it has brought to our State, our country, and now to many countries abroad.

Recently, Finance magazine paid tribute to this company and some of the men most instrumental in its phenomenal growth, particularly the current chairman of the board, Bert S. Cross.

I think that this story deserves attention, so I ask unanimous consent that this marvelous example of Minnesota industry and a Minnesota industrialist be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

3M'S MONOLITHIC MONEY MACHINE: THE COMPANY'S SUCCESS FORMULA IS ITS MOST PROPRIETARY PRODUCT

(By John Oliver Gunn)

As the 20th-century industrial successor to Paul Bunyan in the North Woods of its native Minnesota, 3M Company makes some 35,000 individual products, representing 45 major lines. But most of all—first, last, and seemingly always—3M makes money.

It made money during the first World War, multiplying its sales fivefold and emerging from a critically debt-ridden past to move into the half-million-dollar income bracket.

It made money during the '20s, quadrupling sales volume and pushing profits to the point where it could pay two 100 per cent stock dividends within three years (plus regular cash distributions), earn an annual average of 80 cents on the quadrupled shares, and still build up a healthy cushion of retained earnings.

It made money throughout the Great Depression of the '30's, tripling its sales, acquiring two of its major competitors, putting millions into an intensified product-development research program, steadily increasing its staff, and topping the $4 million net income level.

It made money during World War II, tripling sales once more, stepping up pre-tax income some 2¼ times, and doubling stockholders' equity.

Then it began *really* making money. The 24 years from 1946 through 1969 saw sales expand by more than 25 times, net income by over 49 times, and earnings per share by 40 times. In the '60s alone, sales multiplied 3.2 times, net income 2.8 times.

Sales have increased in every year since 1938, while earnings have risen for 18 straight years and for 23 of the last 24 (all but 1951). Cash dividends have been paid for 215 consecutive quarters, extending back to 1916, and have been increased 19 times in the past 17 years, including each of the last 12. The stock split four times in the postwar period—2-for-1 in 1945 and 1956, 3-for-1 in 1960, and 4-for-1 in 1951.

Moreover, 3M is making more money today than ever before. For first-half 1970, its sales of $832.4 million were up six percent, and its $90.6 million net income up 4.7 per cent, over the corresponding six months of 1969. Per-share earnings for the half were $1.62, versus $1.55 a year ago—and the company traditionally steps up both sales and earnings in succeeding quarters, concluding each year with it strongest three-month performance.

This established ability to manufacture profits in ever-increasing volume, year after year and decade after decade, in all seasons and under all species of economic climate and tax atmosphere, obviously is no happenstance. So pronounced a corporate affinity for earnings persuasively suggests the existence, in St. Paul, of a foolproof formula for determining where the market dollars are and divining how to extract them from the purchasers' pocket at minimal cost. But if there is such a 3M formula, it understandably is regarded as a proprietary 3M product, locked safe from prying eyes in the vaults which also house so many process patents.

Despite its extraordinary financial successes and its high degree of market visibility, 3M remains something of an industrial enigma. The principal reason, one strongly suspects, is that it plainly wants to be one. Loose talk has always been shunned at 3M; executives keep their own, and each other's, counsel. In this pragmatic, product-oriented, profit-dominated arena, "corporate image" seems an alien commodity.

NO AD POLICY

For its first 30 years, the company did no publication advertising whatever (except for a management-written series of hard-sell one-column ads in The Saturday Evening Post in 1921), and its multimillion dollar promotional expenditures of today are confined almost exclusively to pushing individual products, rather than selling the organization behind them.

3M-style public relations also is concerned very largely with the nitty gritty of the trade, straight-out product publicity. (A July 1 news release from corporate headquarters, on the unaccustomed subject of a division reorganization, used the term "commensurate with" in place of "commencing", apparently on grounds of syllablic similarity and euphonic preference. Had sales or earnings been involved, such semantic confusion would be unthinkable. The company's internal dictionary is infinitely precise on these matters of moment.)

Thus left to their own devices in fashioning an explanation for 3M's persistent profitability, outside observers generally have concluded the focal point of the company's financial success is to be found in its research laboratories, or in its unique marketing approach.

Certainly, extensive, imaginative, innovative research is a primary 3M activity, and a most rewarding one. The company broke into the field relatively early, in 1916, and has steadily expanded its research operations ever since. Today it employs some 3,000 technicians in 50 laboratories throughout the world. Research and development work consistently receives more than four per cent of 3M's annual revenues, and the percentage has been climbing perceptibly of late, to 4.8 per cent in 1969. The stake involved is large—$285 million in the past five years, $77 million in 1969 alone. So, too, are the returns, for company laboratories have spawned the great majority of 3M's proud stable of patented profitmakers all the way back to Scotch tape. Board Chairman Bert S. Cross estimates that 25 per cent of each year's sales volume comes from products which first left the laboratory less than five years before.

But it should be noted that 3M research bears the same distinctively pragmatic stamp of all other company operations. The emphasis unmistakably is on product development, rather than pure research—on commercial quantity, not scientific quality. Numerically, laboratory output is dominated by multiple improvements and endless new-market adaptations of existing products. There have been remarkably few technological breakthroughs at 3M since Scotch tape itself, and those few have been earthshaking primarily in commercial implication as opposed to scientific magnitude. Not infrequently, 3M products have proved inferior to competitive models subsequently released. Others have displayed field shortcomings variously necessitating laboratory restructuring, redesign, or simple abandonment.

The point, sometimes lost on casual company analysts, is that 3M—as its record spectacularly attests—is a profit-making organization, not a scientific trailblazer. It has made research pay off very handsomely indeed—the return was computed some years ago at $28 sales for every development dollar invested, and today's ratio must be substantially higher—not because 3M researchers are necessarily better than those of competitors, but because its *management* of them is better. From its inception, the 3M laboratory program has operated under multiple management controls installed to assure that research efforts are concentrated on projects affording significant profit potential, and that the resulting developments are released promptly once they reach the stage of marketability.

A MARKETING SPECIALTY

Marketing, too, is (obviously) a 3M specialty—a specialty tailored to a company-developed pattern which is unique in American industry. Visibly, 3M fields a torrent of salesmen, each one assigned not only to a specific segment of a specific market, but also to represent no more than specific products within that market segment.

The apparent duplication gives 3M an army of field representatives who are specialists in the fullest sense—each one knowing all there is to know about his own small group of products, rather than very little if anything about all 35,000 in the (nonexistent) corporate catalog. He is a practicing authority in his own little domain, and as such, he gets beyond the buyer or purchasing agent and into the place where the product is actually used in the plant or sold in the store.

This cements trade relations where they count most. More importantly, it gives the salesman a chance to discover product weaknesses, discuss unmet user needs, and discern additional commercial opportunities for 3M's product-development forces to work on. The comprehensive field reports, which all salesmen are required to file, are probably the genesis of a hundred new 3M products, and entire new product lines, every year.

On the other hand, 3M's brigades of razor-sharp salesmen have scored their greatest triumphs selling patented specialty products, largely of the disposable variety, in a field characterized predominantly by bush-league opposition. Where they have come up against really top-flight competition, like Xerox in office copiers or Eastman Kodak in photographic equipment, their showing has been mediocre at best. (On occasion, it has been considerably worse than that, as in the case of 3M's abortive attempt in 1930–31 to buck DuPont, Simoniz, S. C. Johnson, and others with a "Retsul" line of auto waxes and polishes. The result can only be described as a rout, with the blame somewhat equally distributed between research and sales.)

Despite determined 3M efforts going back a full 10 years (and at least five acquisitions), Kodak still sits alone and effectively unchallenged atop the photography field, while 3M struggles to break even on a minor share of market which seems to be concentrated increasingly in the unglamorous (though potentially lucrative) area of film processing for amateur shutterbugs.

Conversely, a 10-year headstart didn't save 3M when Xerox went after the booming office-copier market in 1961. 3M's Thermo-Fax, previously the dominant machine, was quickly displaced by superior Xerox equipment, and 3M's market penetration has been dropping steadily ever since, to less than 12 per cent today versus Xerox's 50+ per cent, despite the introduction of a series of hopeful new 3M entries—Dual Spectrum copiers, the "Adherography"-process A–09, the VHS, and currently the color-reproducing Color-in-Color" model.

The costly and embarrassing Thermo-Fax experience may have demonstrated a pronounced flaw in 3M research—the disposition, developed during many years without real competitive challenge, to forego potential improvements of a product, once it has been (perhaps prematurely) released for sale, in favor of developmental work on new product opportunities. If so, the company is not publicly conceding the point—although President Harry Heltzer has said that "we just plain didn't see Brand X coming."

In any case, the clashes with Xerox and Kodak effectively explode the myth of 3M marketing invincibility. Yet they also perversely demonstrate the flexibility and strength of the 3M management system. For, despite the severe set-back in the major-equipment copier field, the company nonetheless has steadily increased its sales volume in associated reproduction products and supplies—lithographic plates, microfilm, computer printout systems, sound-slide recorders, overhead projectors, business forms, etc.—on so massive a scale that the Graphic Systems Group, once primarily dependent on Thermo-Fax leadership, was the largest contributor to total corporate revenues and earnings throughout the '60s. Moreover, 3M has by no means abdicated the copier field to Xerox or anyone else. It is making a determind new run at this billion-dollar market, with better machines and a stronger financial base than ever before.

NOT GIVING UP

In photography also, company management is conceding nothing to Kodak. Chairman Cross speaks very confidently of the company's future in this area, pointing out that 3M has made a full-scale lasting commitment to what he calls "the image-forming business"—the whole spectrum of sight communications. Photography obviously is an indispensable component of that field. Cross looks for major industrial-application photographic developments from 3M laboratories in coming months, and he observes with satisfaction: "As always, the research which is undertaken for any one of our divisions may very well show up in another's products. Our new rapid-process X-ray film is a good illustration of the point." Meanwhile, 3M is fast building what may prove to be a very profitable photo-development "sideline," with film processing laboratories throughout the United States and Canada, and in Europe as well.

It thus is perfectly evident from the record that the ultimate source of 3M's extraordinary (and extraordinarily sustained) earnings power is over-all management organizational strength, rather than research orientation or marketing implementation. The company consistently makes money in such copious quantities because its executive structure is channeled single-mindedly toward that all-encompassing objective, and because it has been able to attract and keep the exceptional managerial talents necessary to make the system work. At the heart of that system, logically, is individual monetary incentive.

There currently are four 3M product groups, each headed by a vice president and each comprising five to eight product divisions or subsidiary companies. Every high-potential new product emerging from the laboratory is assigned a manager, with first preference given to the man primarily credited with its research development.

The manager is accorded full responsibility for all aspects of the product's commercial introduction and marketing.

He also receives a compensation package—base salary, stock options, and profit-sharing provision—which is tied directly to the single product's sales and profits. If and when the product's annual sales reach $15 million, it acquires full divisional status, with its own research, manufacturing, and marketing staff, and the manager is properly rewarded—given, in President Heltzer's words, "the same chance that the president had when the whole company was at the $15 million size."

So long as he does not contravene corporate policies or the instructions of the supervising group head, the new division manager has virtually complete operating autonomy—with one all-important exception. One of his division officers does not report to him, but directly to the corporate financial vice president. This is the divisional controller, from whom top management wants to receive the division's fiscal facts undiluted. The manager soon learns, in a series of no-nonsense annual budget meetings with the group vice president and then with the corporate executive committee, that

3M's sales and earnings expectations of his division are pretty demanding. The company generally looks for a pre-tax return in the neighborhood of 23 per cent on sales and 40 per cent on invested capital—and top management points out that these goals reflect no more than a proportionate divisional contribution toward the normal corporate objective of *after-tax* earnings totaling more than 10 per cent of sales and roughly 20 per cent of investment.

CHALLENGES MANAGERS

"Anybody can run an operation for a low margin," Cross has said, "but what challenge is there in that? The risks are greater here, but so are the returns." He adds, meaningfully, that the 3M budgeting procedure is designed to make certain that any lagging division manager feels "uncomfortable" until he gets his division back in step.

Lest too much credit be assigned to the operating-autonomy policy, it should be observed that the company functioned very profitably for many years under a system of strongly-centralized authority, changing to the divisional pattern only in 1948, when it was concluded that decentralization would trigger accelerated growth. The real management keys to 3M's profitability, consistently over the years, have been individual financial incentive and tight central fiscal control.

Those enduring policies were forged during what was perhaps the roughest childhood ever suffered by any major U.S. corporation. 3M was founded in 1902 by five residents of the Lake Superior north-shore region—a doctor, a lawyer, a butcher, and two minor railroad functionaries—each of whom put $1000 into the venture. Its purpose—witness the name, Minnesota Mining & Manufacturing Co.—was to mine what these industrial neophytes considered valuable local reserves of corundum, for sale as a high-grade abrasive to Eastern grinding-wheel manufacturers. It took them some five years to discover (and six additional years to concede publicly) that the ore in question was not corundum at all, but a low-quality, worthless anorthosite.

By early 1905, the company was teetering precariously on the brink of bankruptcy, where it was to remain for another decade, repeatedly rescued at the 11th hour by financial infusions miraculously extracted from a wealthy St. Paul plumbing supplier. This man somehow was led to believe, first that the "corundum" could be used to make commercially-salable sandpaper, then that the company could survive with sandpaper made of inferior garnet imported from Spain.

The $235,000 which Lucius P. Ordway ultimately sank into the struggling enterprise was barely enough to satisfy the most urgent suppliers' bills, but not enough to pay executive salaries nor even, frequently, to meet employee payrolls. In lieu of wages, 3M employees on those occasions were issued scrip convertible into company stock, then the most worthless commodity in town but nonetheless accepted by some St. Paul merchants—primarily bartenders. The going rate of exchange, in stock or equivalent scrip, was two shares for a shot of the cheapest whiskey, worth 15 cents at most. If held to the present day, each of those shares ($1 par value) has become 192 shares, on which dividend payments over the years have totaled $2,897.28 and which are worth (even at today's bargain-basement price) approximately $15,360. Ordway's $235,000 investment was last valued, some years ago, at $272 million worth of stock—held by the Ordway Trust, 3M's largest shareowner.

Emerging from the traumatic beginning—sufficiently painful to leave an indelible mark on the company and succeeding top managements right up to the present—3M developed its first acceptable product (Three-M-Ite cloth, an aluminum-oxide abrasive material) in 1914, paid its first stock dividend in the last quarter of 1916, acquired the patent for a waterproof sandpaper (along with the inventor) in 1921, produced the first masking tape in 1925 and the famous Scotch Brand cellophane tape in 1930, and was off to the races for good.

But the legacy left by the long years of wolf-at-the-door desperation stayed with 3M, ever present in the brilliant mind of its guiding genius for 55 years, William Lester McKnight, who retired in 1966 to become honorary board chairman. Joining the company in 1907 as assistant bookkeeper, McKnight experienced the full brunt of the interminable financial crisis as he rapidly advanced to cost accountant, office manager, sales manager, and (in 1914) general manager. And he determined that, if 3M somehow survived those initial miseries, the company would never again be compelled to live from hand to mouth. He would build for it a Gibraltar-like financial foundation, and a management blueprint designed to safeguard that foundation for all time.

The legendary W. L. McKnight did just that. He created a master plan for progress through profitability which 3M has followed with painstaking precision to this day, and which it can be expected to continue following far into the future. Unyielding consolidated fiscal control is a keystone, of course, as also is the entrepreneurial concept of profit-anchored incentive compensation—and, beginning at the $100-million sales level, reorganization to effect decentralization of operating authority and responsibility.

In terms of additional specifics, as best they can be divined from exhaustive examination of the public records at hand, the cardinal principles of the McKnight blueprint—which 3M understandably is not sharing with outsiders—appear to be these:

Avoid price-cutting under all circumstances and stay out of highly competitive markets in which price discounting is an accepted business practice.

Diversify, to escape excessive reliance on any single market or market combination, and do so through intensive product-development research, constantly policed to assure commercial practicality.

Vigilantly patent and militantly protect from competitive infringement the proprietary products thus developed, licensing such patents to others only under carefully defined conditions and with the assurance of an ample royalty return.

Minimize the risk of outside knowledge and exposure of company plans or developments in progress by confining membership on the board of directors exclusively to company officers, with exceptions restricted to representatives of major-ownership company founders.

Increase sales at least 10 per cent each year, and sustain this growth primarily from within, confining acquisitions to those which are directly related to the company's existing business and favorably priced as well.

Expand production facilities and complete desirable acquisitions as fast as necessary to capitalize fully on growth in sales demand, but finance these developments as completely as possible from retained earnings, avoiding long-term debt and the earnings dilution produced by resorting to recurrent stock issues.

As an essential means of accomplishing the preceding objective, constantly maintain a strong cash position and a conservative dividend payout policy.

Use every reasonable method of keeping employee morale at a level conducive to high productivity and unswerving loyalty, specifically including an inflexible ban on nepotism and an invariable policy of promoting from within under all but the most extraordinary circumstances.

Concentrate on the saturation concept—carefully choose a number of high-potential specialized markets, then go after them with saturation salesmanship designed to fill every need for which 3M can profitably develop products. Similarly, carefully develop a key central product, then bombard it with saturation research designed to create every conceivable variant of that basic product for which a profitable market can be found.

That the management formula works very well indeed is self-evident from the record. 3M today is one of the world's largest industrial enterprises, one of the most respected, and certainly one of the most profitable. For calendar 1969, the company ranked 73rd among U.S. corporations in assets, but 59th in revenues, 21st in net income, and 11th in the total year-end market value of its outstanding shares ($6,145,000,000)—and it seems likely to advance all of these relative positions in 1970. No other company of comparable size has as little long-term debt—$22.3 million, just 2.2 per cent of its $1.01 billion total capitalization.

WORLDWIDE EXPANSION

3M has built a single hard-won basic technological competence—precision-coating of one material with another—into a $1.6 billion worldwide business, with plants located in 46 U.S. cities and 15 foreign countries and sales outlets in 175 nations. Its 66,000 employees produce an almost limitless array of products, 35,000 in all (including 600 types of Scotch tape), marketed through five group classifications—graphic systems; tape and allied products; advertising services, protective products, and photographic products; electrical products; and abrasives, adhesives, building-service materials, and chemicals.

Although the company's phenomenal growth has been generated very largely from within, it has acquired 30 companies since 1929, in England, France, Italy, Germany, Argentina, and Canada as well as the U.S. And it has absorbed them all without breaking stride in the steady earnings appreciation which has attracted a current total of over 108,000 common stockholders.

The present is not without its problems for 3M, of course. For one thing, the slowdown in the U.S. economy, first evident in 3M operations during the second half of last year, dropped the company's income/sales ratio from 1968's 11.5 per cent to 11.1 per cent for 1969 and to 10.9 per cent for first-half 1970. No reduction in the rate of earnings appreciation is ever taken lightly by 3M, but the company's displeasure in this instance seems to fall short of genuine concern. Heltzer points out that recent financial results have been somewhat adversely affected by an exceptionally heavy research investment in several unnamed big-ticket developments undergoing intensive preparation for 1971 market introduction, while Cross adds that market demand is off substantially in relatively few of the company's product lines.

More worrisome to 3M, in all probability, is the Anti-Trust Division's interest in company operations. The Justice Department periodically has paid its respects to 3M ever since 1949–50, when it broke up the international Durex combine involving the company, and its antitrust objections scotched a much-coveted merger prospect with Warner-Lambert Pharmaceutical Co. 10 years ago. But these prior attentions were relatively minor compared with the potential implications of a consent judgment entered against the company last fall.

Following a four-year court battle, 3M was enjoined from a prize collection of alleged practices aimed at monopolizing three primary product areas—pressure-sensitive tapes, magnetic recording tapes, and presensitized aluminum lithographic plates. Included in the prohibition are: agreements to fix prices or allocate customers or markets; the filing of damage claims for alleged infringement of 3M patents in any of the three product lines; ac-

quisition of patents from others on an exclusive basis; acquisition of competitors, wholesalers, or suppliers; and conditional sales arrangements preventing the customer from patronizing a competitor. 3M also was ordered to make patent licenses available to all qualified applicants under "reasonable" royalty provisions, not only for every tape and lithographic-plate patent now held by the company but for any additional patents which it obtains during the five year period through 1974.

Still, the near-term future is viewed at the St. Paul general offices with an air of unmistakable confidence—even outright expectancy. Bert Cross, who reaches 65-year retirement age in October after seven years as chief executive officer, and 59-year-old Harry Heltzer, his long-time associate and thoroughly competent successor, both spoke the other day in concrete terms which left no doubt of their mutual conviction that by far the best is yet to come for 3M.

"All aspects of our business life around here are very much alive and alert and on the move," they agreed. Among the "profit centers" to which they look for particularly pronounced earnings appreciation is international sales, already contributing over 30 per cent of total company volume—$535 million in 1969—and headed upward. "These are developing markets," Cross said, "with a very, very substantial potential and the decided advantage of prior U.S. product testing and use. There is no reason why they shouldn't ultimately represent half of our sales."

Much is expected of the January acquisition of the Riker Laboratories Division of Dart Industries—"which gives us a much-expanded medical line, plus an entree to doctors' offices throughout the world, something we have badly needed in the past."

Increased emphasis on retail sales of disposable household items like Rescue soap pads, Scotchbrite sponge laminates, and Scotchgard fabric protectors, in addition to the omnipresent variations of Scotch tape, is evident in the recent establishment of an inter-group Consumers Products Division, charged with marketing them all.

While awaiting the promised 1971 outpouring of major new products on which management has placed so exceptionally large an investment wager for several developmental years, the company also has extraordinary faith in the market potential of at least one 1970 entry, the "driography" flat-surfaced printing plate, which keeps non-image areas free from ink without the use of water—and which, characteristically, carries a premium pricetag and requires a special ink that 3M just happens to have available for sale.

Then, of course, there is the unfinished business of Xerox and Kodak—two names that, somewhat surprisingly, evoke no apparent fright in St. Paul. Perhaps (as always) not telling all it knows, 3M seems confident of a copier comeback built around the VHS, "fastest on the market," and the unique "Color-in-Color" model, for which Heltzer foresees a future reminiscent of color television's, "provided we have the guts which the color TV people had, to stay with it until it takes off—and, believe me, we do." The conversation is equally assured in the photographic field, where Cross says 3M has no intention of revising its estimates of market-penetration potential, "unless Eastman starts to look very bad."

In the unlikely event that there should be a disposition in rival camps to disregard such implied sword-rattling, it might be observed that the most remarkable accomplishment of the 3M management system is its ability to keep a billion-dollar corporation lean, hungry, and spoiling for a fight. A company that has been conditioned to think habitually of today's sale as the indispensable prerequisite for tomorrow's meal has to be a formidable foe for anyone, even a Xerox or Kodak.

There may be caveat-emptor overtones to the 3M approach, but the dominant drumbeat unmistakably reads *Caveat Competitor.*

BERT CROSS: POLLUTION FIGHTER

By his own admission, Bert Cross did not relish receiving the assignment handed him recently by President Nixon—to take charge of the newly created National Industrial Pollution Control Council.

"I was a slow acceptor," says the affable, 64-year-old 3M chairman and chief executive officer. "I was reluctant to walk into a problem like this."

The council, established to advise the Government on industry's pollution control problems, study those problems, exchange information and advise Government on pollution legislation, has already been labeled "industry's lobby on pollution" by one newspaper columnist. The accusation doesn't bother Cross a bit. It was the kind of thing he expected. But in answer to those who have leveled criticism at the council and at him as its head, Cross offers the observation that "it's pretty difficult to say no to the President of the United States when he asks you to take on an assignment like this."

Cross brings his own brand of determination and enthusiasm to the problem of industrial pollution control.

"There isn't any question as to what the possibilities are," he says emphatically. "This is the first time industry has been able to get together in a common room without running into trouble wtih the Justice Department. In fact they'll be in there with us."

The committee Cross heads is a hydra-headed monster composed of the chairman and vice chairmen of about 30 industry committees. But if this is somewhat bulky, it's also probably the most influential committee that can be drawn from the business world. Its members include such men as Edward N. Cole of General Motors, Fred J. Borch of General Electric, George E. Kech of UAL, Inc., Charles Tillinghast of Trans World Airlines, Robert O. Anderson of Atlantic Richfield, and William F. May of American Can.

Cross believes it will take more than just getting industry together to solve the problem. In fact, he feels industry has been more responsive to the problem of pollution than many other segments of society.

"The daily progress is being made," he says. "It's just a matter of time before you begin to see it."

He takes exception to the notion that industry is totally at fault for pollution. In an editorial in one of 3M's publication's Cross recently noted: "Since objective observers estimate that industry produces no more than about a fifth of the total U.S. pollution, it is apparent that other segments of our society such as agriculture, municipalities and private citizens will have to do their part."

For his part, Cross right now will have to be concerned with getting some specific recommendations out of the council. It probably is too early to predict just what those recommendations will be, but if Cross has anything to say about it, one of the first will be for all levels of Government to get together and establish a common set of standards so that industry will know exactly what is expected. He points out, by way of illustration, that a new nuclear plant in Minnesota is standing idle because the state standards were materially different from those set by the Atomic Energy Commission. "Northern State (the power company) probably has $100 million tied up in that plant. But it will take another $20 million to make the changes the state asked for."

Cross makes it clear that his argument wasn't necessarily with the state's standards but with the overlapping and often different standards set by the two governments.

Just why Cross, who has no special reputation as a pollution fighter, was chosen to head the new council is still a matter of speculation. But up in St. Paul the thinking is that it is because he heads a company that has a reputation for keeping its own backyard clean.

For more than a decade 3M has had a department charged with the responsibility of seeing to it that the company's own manufacturing methods do not contribute to pollution.

Just how successful Cross will be in getting other industries to emulate 3M's example is not known right now, but one man who knows the 3M chairman well remarked, "He's not going to sit on his hands. He's going to get these guys together."

POISONOUS EMISSIONS FROM AUTOMOBILES

Mr. BAYH. Mr. President, the attention of the Nation is at present focused on the urgent need to intensify efforts to curb the poisonous emissions from automobiles. The automobile accounts for over 60 percent of the Nation's air pollution. It is the single most important source of physical damage and health loss due to pollution. As recent events along the eastern seaboard so dramatically indicate, we can expect more and more of these "rehearsals for disaster" unless we can develop a determined national policy and program to produce low-emission automobile propulsion systems.

The Senator from Wisconsin (Mr. NELSON), long an advocate of clean air legislation, has proposed a number of legislative measures to set a national deadline for abating automobile pollution. The challenge that Senator NELSON proposes has received widespread editorial support across the country and is substantially embodied in the clean air legislation soon to be reported by the Committee on Public Works.

Mr. President, I ask unanimous consent that the editorials and an article by James J. Kilpatrick be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

[From the Christian Science Monitor, Aug. 22, 1970]

CLEAN AIR RACE

There's an air of high jinks about the transcontinental, intercollegiate Clean Air Race, scheduled to start Monday. About 40 autos, powered by steam or electricity or other innovative engines, will carry the 3,600 miles from the Massachusetts Institute of Technology campus on the East Coast to California Institute of Technology on the West.

This race has a six-day deadline.

But there's another race in the background, with a five-year deadline. It is a far soberer affair. And where the collegiate competition will cost its promoters and entrants tens of thousands of dollars, the stakes in the larger race reach into the billions.

This race was laid out by Sen. Gaylord Nelson (D) of Wisconsin earlier this month: a ban on the internal-combustion engine in new cars after 1974. Another Senate bill calls for a 90 percent cutback in engine pollutants by the same deadline.

It is hard for the engineering layman to judge whether the Nelson course is possible to cover. The auto companies have said

they're doing what they can to temper the polluting by present engines. They say they're working on alternatives to the internal combustion engine. And so far only the smallest of the automakers, American Motors Corporation, has come out fighting against the gas engine ban deadline. "Impossible," AMC says.

Of course, one would expect the automakers to resist such a proposal. They have billions of dollars invested in the engine they now use. If the proposal were passed by Congress and upheld by the courts, it would mean that the companies had lost a huge chunk of decisionmaking power. The Nelson proposal would even ban yearly styling changes, to compel a diversion of auto resources into finding a pollution solution. The big automakers will likely join AMC in fighting the deadline.

The layman is fascinated, however, with yet another development on the auto clean air scene. Japan's Datsun autoworks has just announced it will begin mass production of a safe-exhaust car in 1973. It will be powered by freon, the gas used in refrigerants. The competition of a successful nonpolluting foreign car could have a swifter impact on Detroit than the threat of legislation.

In any event, the race to clear the air of auto emission is on, at a number of levels. And society—more than collegians, or foreign or domestic automakers—stands to be the biggest winner.

[From the Miami Herald, Aug. 5, 1970]

SURVIVAL IS THE ISSUE: WHAT COST IS TOO MUCH?

Sen. Gaylord Nelson of Wisconsin, one of the hardier hawks on air pollution, wants the manufacture and sale of internal combustion engines to end by 1975 under the laws of Congress.

This is the only way, he reasons, to compel the automobile industry to produce a new pollution-free engine in quantity. The auto on today's road, he explains, is causing 60 to 90 per cent of the nation's air pollution at a cost of $30 billion.

We have a hunch that he is ever so right. The word "smog" was coined as long as 65 years ago and the auto as an air polluter was identified first in 1912.

What's happened since? Really, not very much. Year by year every inhabited place is infiltrated by dirtier and dirtier air. No community is safe; today's gasoline piston engine carries its filth everywhere.

Although pollution-free engines of several types exist, the auto makers have resisted putting them in new model cars. The cost is one argument: conversion from the internal combustion engine to something else is estimated at $3 billion to $5 billion; the buying public would balk.

But would it?

Last week's infestation of smog along the Atlantic seaboard almost literally from Maine to Florida must have thrown a scare in every American who gave it a thought. But here again there is resistance. It comes from taxpayers and governments with distorted ideas of priorities. The New York Times estimates that "the typical urban taxpayer—the father of two, making $10,000 a year—paid $19 for space exploration last year and only $1 for mass transportation. This taxpayer paid $26 for more federal highways to accommodate more automobiles and only $4 to fight pollution of both the air and water."

If the message of Sen. Nelson and other terribly concerned Americans gets to Mr. Average Taxpayer he might start asking questions. As S. Smith Griswold, air pollution consultant, put it to the American Society of Newspaper Editors last May, "Public indignation at paying for ineffective controls will force industry and government to pay more attention to policing the motor vehicle control program and there will be call-backs on engine-carburetor-transmission combinations which do not consistently meet federal emission standards while in public use."

Rapidly the issue in America is becoming human survival—no more, no less. What is it worth to conscientious industry? To the taxpayer? To government which tends to be government-as-usual?

[From the National Observer, Aug. 10, 1970]

CARS AND SMOG

Air pollution, unlike most national problems, is equally a threat to liberals and conservatives, Democrats and Republicans, monarchists and anarchists. So one would think that a great consensus could be arrived at without protracted contention. Smog burns the eyes of all, ergo let's get rid of it.

To get rid of it, however, the nation must be prepared to endure severe dislocations in the economy, and this is where various protagonists begin to part company. Smog or no smog, it's not feasible in an industrial, urban society to shut down power plants because they smoke up the sky. Without electricity almost everything stops. We can survive longer with smog than without electricity.

Similarly, the automobile. The internal-combustion engine is variously described as causing 60 per cent to 90 per cent of all air pollution. Closing some city streets to auto traffic would relieve the air in small areas, but that's obviously only a token measure.

Nor is it realistic to suggest that a nation—especially this nation—abandon its automobiles. But what about banning the major culprit, the internal-combustion engine?

This is what Senator Nelson of Wisconsin proposes to do. He has introduced legislation that would prohibit the sale of any vehicle with an internal-combustion engine after Jan. 1, 1975. At the same time the measure would bar auto makers from making style changes until they had developed a low-pollution substitute for today's engines. Senator Nelson's idea is that Detroit could use the money saved by not retooling for the research and development of a less noxious propulsion system.

Because the internal-combustion engine, as presently designed, is the major cause of foul, hazardous air, there can be no solution to the smog problem until that engine is either banned or improved in such a way that its exhaust is no longer a menace.

To accomplish this, the experts say, will cost billions of dollars. We are not convinced that such a huge bill should be paid only by the auto makers. Just as all Americans, through the Federal Government, help pay for innovations in air, sea, and rail travel, it seems appropriate that the many more of us who benefit directly from motor vehicles should subsidize the expensive transition from one kind of engine to another.

We can think of few subsidy programs that would be so worthy of popular support. Americans want cars to drive, and they want decent air to breathe—and they want and need both far more than they want or need, say, a supersonic airliner.

It is understandable and appropriate that Congress consider drastic measures to launder the air around us. The poisonous vapors that spew from busy streets are more than irritants to the senses. They mock our ingenuity, insult our wisdom, and threaten our lives.

If Americans are as resourceful as we like to think, Senator Nelson's target year of 1975 for correcting the auto-exhaust problem seems entirely reasonable. But we think so radical a transition deserves Federal financial support. Then the high but necessary cost will be distributed among all of us who regularly turn an ignition key and give 'er the gas.

[From the Oshkosh (Wis.) Paper, Aug. 15–16, 1970]

CLEARING THE AIR

The president of American Motors has struck back against a proposal to ban the sale of cars with internal combustion engines after Jan. 1, 1975.

This deadline, proposed by Wisconsin Sen. Gaylord Nelson, was called unreasonable and unrealistic by William V. Luneburg, AMC president.

". . . I am astonished by his proposal. I can only conclude, regardless of the sincerity of his intentions, that the senator has little or no knowledge of automotive design or manufacturing and apparently hasn't taken the trouble to find out—a somewhat shocking situation—in view of the fact that this state's economy is importantly dependent on the automotive industry," Luneburg said.

He continued: "The harmful effect of all this is a growing number of American people are beginning to believe that the automotive industry is callously indifferent to the need and problems associated with its product."

Considering his position, Luneburg's defense of the auto industry is understandable. However, it does not diminish the fact that air pollution is a serious problem and that 60 per cent of this pollution is caused by emissions from car, truck and bus engines.

Almost everyone agrees that something has to be done. How much time we have left is another question. About 80 per cent of the smog in Los Angeles is blamed on auto emissions held down by atmospheric inversions and acted on by sunlight. Other cities have similar problems.

There also have been instances where persons were killed, children prevented from playing and forests destroyed by smog. All of this indicates that we don't have much time and that giving the auto industry until 1975 may be overgenerous.

In spite of Luneburg's statements, it would appear that Sen. Nelson has a good case. It also is apparent that the auto industry will not voluntarily meet the 1975 deadline and will need some government prodding.

Ralph Nader, the consumer advocate, Mayor John Lindsay of pollution-plagued New York City and even the United Auto Workers have accused both the auto industry and the government of dragging their feet on the internal combustion engine.

As for alternatives, the gas turbine looks the most promising. Steam cars, electric cars and cars powered by natural gas are other possibilities. Whatever the auto makers come up with, it will be expensive. It will cost them billions of dollars, which will be passed along to the car buyer.

In the meantime, people can help by driving less and walking more. Lump all your errands into one trip. Make the kids walk to school. Take a bus, train or plane.

It also helps to keep your car well-tuned. One fouled spark plug may double the hydrocarbon emissions of your car. Antipollution devices on cars must be checked regularly. They don't help if they don't work.

Beyond that, we must demand action and be ready to pay for it.

Luneburg's rebuttal may be the beginning of a counterattack by the auto industry. Let us hope that concern for the environment will outweigh other concerns. Americans can live with the auto only if it is tamed.

[From the Minneapolis Star, Aug. 10, 1970]

EXTERNAL COMPULSION MIGHT CURE INTERNAL COMBUSTION

(By James J. Kilpatrick)

WASHINGTON.—An experiment in Tokyo, where automobiles were banned for a day, followed close on the heels of John Lindsay's similar experiment on successive Saturdays in New York. In Tokyo, smog levels plummeted throughout the business district; on

Fifth Avenue, a kind of marvelous euphoria prevailed. Encouraged by these responses, the anti-pollution lobby is urging that the same measures be imposed by local edict on the downtown areas of Los Angeles, Boston, Chicago, Philadelphia and Washington. Sens. Nelson of Wisconsin and Goodell of New York are ready to sponsor the group's national legislative package. Perhaps the toughest of the bills would prohibit the sale of any vehicle powered by an internal combustion engine after Jan. 1, 1975.

The spasms of concern are provoking cries of approval or dismay, depending upon one's point of view, from bus companies, retail merchants, city dwellers, highway builders, and automobile dealers. The point may be approaching, after years of hot air and half-measures, when Americans everywhere will begin to take a serious, sober look at their lovely little Frankenstein 8's.

It seems clear—as clear as anything seems in the smog—that something will have to be done. If one projects the same rate of increase in automobiles over the next 20 or 30 years that we have seen in the past 20 or 30 years, and if one then puts this figure against estimates of urban population growth, the answer is chaos. It will not compute. By 2000 no cities, as such, would remain. As far as the bleary eye could see, nothing would exist but cars, trucks, buses, highways, garages and service stations.

Obviously, this is not going to happen. Either new patterns of urban life will be devised, or new limits on transportation will be imposed on the people, but we cannot in the future have both: That is to say, we cannot have liveable cities if we insist upon unlimited use of your little darlings. The desires are incompatible; they cannot coexist.

To state the dilemma and to solve it are two different things. The typical American motorist lives in a peculiar love-hate relationship with his automobile. Its purchase keeps him in debt; its fuel, upkeep and insurance suck at his income. He acknowledges the smog, the danger, the traffic that chews at his nerves. The automobile, he knows, is a woefully inefficient instrument for moving large numbers of people to and from work.

Yet he looks at his gleaming Frankly, and he loves her all the same. As Psychologist Richard I. Evans has written, automobiles tend to become an extension of the personality and the ego of their owners. Behind their own steering wheels, motorists are masters of their own locomotion; deprived of this command, they feel tension, anxiety, unhappiness and distress.

This is the basic reason, in his view, that mass transit has failed to attract the passengers that reason and logic would indicate. The typical commuter would rather fight his way through traffic alone, sweating and fuming but free, than ride to work with captive strangers on a bus. This may be irrational, but who said commuters are rational?

An answer, ultimately, will lie in compulsion—in the compulsions imposed by Tokyo and Manhattan, in restraints upon engines already imposed by California and certain to be tighted by Congress, and in new forms of prohibition not yet invented. One of these days, we may be licensed to use our cars on certain days only. We will thus be coerced into mass transit or car pools. Or we will do our jobs at home.

YOUTH HOUSING OPPORTUNITY PROGRAM

Mr. MURPHY. Mr. President, I invite the attention of the Senate and the country to a most interesting and promising approach to teach young men a trade, while at the same time they are rehabilitating rundown housing. Of course, an added advantage for these individuals is that they are able to earn while they are learning.

This pilot project, the Youth Housing Opportunity program, was initiated by two Los Angeles businessmen, Robert Renz and John Konwiser, both members of the Young Homebuilders Council, the education arm of the Building Industry Association of Southern California. The project also had the support of the unions and the community, and Gibraltar Savings and Loan Association, which financed the home to be rehabilitated.

Before the youngsters began, the home was described by Gibraltar Savings as "uninhabitable, fit for the bulldozer." After 16 Saturdays of work by 20 industrial arts students from Jefferson High School, for which they were paid $1.75 an hour, under the direction of their teacher, Mr. Harold Campbell, the rehabilitation was completed. The home is expected to be sold soon, and it is expected that a profit will be realized which will yield an additional $1,500 seed capital for similar projects.

Mr. President, this is an excellent example of what can be accomplished when private individuals, private industry, and unions put their minds to turning problems into opportunities. The initial project was accomplished totally with private funds and the sponsors want it to stay that way. This California pilot project will, incidentally, be expanded to provide four additional houses, two in southern California and two in Oakland. The sponsors of the initial project see it as ultimately being given high school credits in California and envision the project becoming a national model for training young people in a useful occupation.

Mr. President, I ask unanimous consent that an August article in the Savings and Loan News, a May article from the Journal of the Federal Home Loan Bank Board, and a Los Angeles Times article of March 1, 1970, be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

STUDENTS LEARN A TRADE IN REHAB

A handful of high school students, a deteriorated house and a lot of imagination have been parlayed into a prototype program to train youths in the building trades.

The program's backers, including a savings and loan association, hope it will mushroom into an accredited part of the California school system and be adopted in other states.

The project, called the Youth Housing Opportunity Program, was conceived by two Los Angeles area businessmen, Robert Renz and John Konwiser. Their plan is to rehabilitate run-down housing while training youngsters to do the work—with pay.

They also want the program to be totally financed by private industry. The pilot project was.

Both men are members of the Young Home Builders Council (YHBC), which is the education arm of the Building Industry Association of Southern California. The link with the builders' group is important because from its membership came many of the people who donated construction materials and volunteered to supervise the on-the-job training of the students.

HOUSE DONATED AT COST

Renz and Konwiser searched for a savings and loan association that would provide a house. They were turned down a number of times, says Renz, because "Our project was something they felt couldn't be done. We couldn't drag the interest out of them."

The two builders did, however, find Earle Dumont most receptive to their idea. Dumont, senior vice president of $700 million Gibraltar Savings of Beverly Hills, Calif., says he accepted the proposal "on the spot." The association entered into a joint venture agreement with YHBC and donated a house at cost.

Renz and Konwiser's plan was also rejected by two high schools. According to Herbert J. Young, chairman and president of Gibraltar, "My understanding is that the school people thought it was too simple, that it wouldn't work." He suggests that their attitude may have been influenced by the fact that "The whole program was written on one sheet of paper. I don't know why they think everything has to be complicated."

Jefferson High School, however, found the plan to its liking and was situated in the same neighborhood as Gibraltar's house, an all-black area about five miles from the Watts District of Los Angeles.

In February, 20 industrial arts students from Jefferson arrived at the corner of Trinity and 36th streets and began renovating the 70-year-old, white frame structure. They were under the supervision of their teacher, Harold L. Campbell, and volunteer workers from the building trades. The students worked only on Saturdays and were paid $1.75 per hour. Campbell earned the standard extracurricular rate of the Los Angeles city schools.

It took 16 Saturdays to complete the rehabilitation, which included a stucco exterior, a new heating system, wiring, plumbing, insulation, kitchen flooring, carpeting, roof, front and back porch, and a completely rebuilt garage. The architecture of the house remained as it was.

In mid-June, the project was exhibited by the students at an open house, which attracted about 600 people. The YHBC received eight purchase offers, including three from residents of the neighborhood, according to Young.

No broker is involved in the sale of the house, he adds. "We're waiting for a Federal Housing Administration commitment, but whether we go FHA or conventional is not important."

Whatever profits are realized from the sale will go toward financing similar projects. The cost of labor amounted to about $6,000, and the property had a book value of about $10,000, says Dumont. "The house will probably go for $17,500 or $18,000," thus yielding upward of $1,500 in seed capital.

UNIONS, BUSINESS AID PROJECT

Donations were significant to the success of the project. "Industry and manufacturers were most cooperative," says Renz, and some have agreed to donate supplies wherever the program catches on. He and others want to see similar projects throughout the country so "We're going to hit the major businesses right down the line" for contributions.

Another factor vital to the program was the endorsement of the AFL–CIO Building Trades Council of Los Angeles. The Council's sanction allowed union members to supervise the project without pay and allowed students to renovate the house unhampered by picket lines.

Renz says, "We told the union people what we wanted, and we had their answer in six hours." He sought the endorsement partly because many associations in Los Angeles hold large union deposits. And Renz needed the associations to supply houses for renovation.

PR MILEAGE FOR EVERYONE

Although the unions have an interest in seeing that their members get first crack at jobs, Renz explains that "We hit on some-

thing they could really capitalize on. The project is good PR for them, and they don't have to do anything."

John Cinquemani, executive secretary of the Building Trades Council, says there is unemployment among union members in the area but that he understood the project concerned only one house. "If it were a continuing operation, it might take work away," he says.

Renz says the endorsement also shows that the unions are willing to give minority groups a chance to get into the building trades—although the program is not aimed directly at minority students. In addition, the unions would save money in their pre-apprenticeship training programs by learning beforehand who is interested in becoming a full-fledged journeyman.

Dumont says the project ran smoothly because of the hours spent on "preparatory agreements and arrangements." Such a project, he says, takes "a lot of involvement from people who are knowledgeable, who are higher than the clerical level. You have to have people who are doers."

Renz and other YHBC members, for example, spent more than a year planning the project "before we opened the first door."

ACCREDITED HIGH SCHOOL COURSE SOUGHT

One of the doors was to the office of California's Gov. Ronald Reagan. Renz went to Sacramento with the idea of creating an accredited, statewide high school course based on the Youth Housing Opportunity Program. He says Reagan and state legislators reacted favorably. In addition, he notes that "We're being backed by both Republicans and Democrats."

But Renz sees two problems ahead: "finding instructors and rewriting textbooks." His program to merge the project into the school system is "in the pilot-writing stage." He estimates that a first draft will be ready this September and that the course will have to run three years "before we have everything down." California Assemblyman Bill Greene, a project supporter, says, "From the reception we've gotten this far, I'm optimistic."

Meanwhile, Gibraltar Savings is going ahead with more projects. Young is pleased that all 20 students—and five more who joined in mid-semester—finished the program. "This working project is so logical in concept that it deserves to spread to the other urban areas in the United States," he says.

The association, which is a subsidiary of Gibraltar Financial Corp., is making available two more houses in Los Angeles. Its sister subsidiary in San Francisco, Gibraltar Savings of Northern California, is providing two houses in need of rehabilitation in Oakland. Work on them will coincide with the opening of the school year next month.

Young is of the opinion that the Jefferson project has "engendered pride in the neighborhood." Upon hearing of the project, several associations were concerned about vandalism, he says. "Some windows were broken the first week, but by the second week, when we had our sign up [identifying the project], there was no further damage. Residents became very protective of the project when they found out that kids from their neighborhood were working on the house and getting paid for it."

Three other houses on the block have been painted, adds Young, and rusting hulks that were once cars have been removed from the street.

Renz is busy spreading the word about those and other results of the YHBC project. He has talked with top officials of the U.S. Department of Labor, the Federal Home Loan Bank Board, and the Department of Housing and Urban Development. He has also received "tentative approval from the National Home Builders Association to go ahead with a one-hour educational film" of the project, and a manual with a step-by-step explanation is being prepared.

Government officials have "found it hard to believe" that the project planners didn't want federal, state or city funds, according to Renz.

As for the students, Renz hopes the unions will eventually grant them, or future project participants, some credit toward fulfilling their apprenticeship requirements. Cinquemani of the Building Trades Council says only that such rehabilitation experience may help young men be more easily accepted into apprenticeship programs "if they meet the other qualifications."

Those "other qualifications" are apparently not insurmountable hurdles: Three of the 25 Jefferson students have already gained apprenticeships.

CREATING HUMAN RESOURCES FOR THE HOME-BUILDING INDUSTRY

This Los Angeles training project could become a national model for developing youthful construction skills.

An old white frame house—empty, dirty, and a potential candidate for the bulldozer—has become a test project in Los Angeles for what may be the most important on-the-job high school training program ever undertaken by the free enterprise housing industry.

The Young Home Builder's Council, an aggressive below 40 age group of builders in Southern California, is in the process of rehabilitating the property from basement to roof through the work of paid manual arts students from Los Angeles' Jefferson High School. Cooperating enthusiastically in the project is the Gilbraltar Savings and Loan Association.

Twenty potential contractors and skilled housing craftsmen from Jefferson have been reporting to 36th and Trinity Streets in Los Angeles at 8 o'clock every Saturday morning for the past 2½ months. There they have been working on the complete renovation of the house under the direction of their teacher, Harold Campbell, and earning $1.75 per hour paid by the YHBC.

This unique program, which its backers feel could become a model for adoption in cities throughout the country, was conceived late last fall by John Konwiser, a vice president of Republic Home Corporation of Los Angeles, and Bob Renz, vice president of Safeway Plumbing & Heating, Inc., of nearby Sante Fe Springs.

Concerned about the lack of practical opportunities through which ambitious youths could take first steps toward careers in construction, Konwiser and Renz felt the housing industry should assume the lead in building human resorces in this field for its own future.

As thorough believers in the private enterprise system, they devised a plan for making a contribution to housing construction in this context. They would "borrow" a house for remodeling, train youngsters in a practical way by letting them renovate it, and pay them for their work. Professional construction people would help teach the students on a volunteer basis. Any profit on the remodeled structure would reimburse YHBC for wages and materials, and provide funds for more remodeling projects.

GETTING THINGS STARTED

The YHBC, education arm of the Building Industry Association of Southern California, accepted the Konwiser and Renz concept, and formed the Youth Housing Opportunity program to make the project a reality.

In the beginning, Konwiser and Renz called on Los Angeles area school officials for approval of the project; on members of the building trades for volunteer instructors and building material donations; and finally, on various savings and loan associations for the loan of a house.

Surprisingly, several savings and loan associations turned them down on the latter project. Then one evening Konwiser met Gibraltar senior vice president Earle Dumont at a seminar Dumont was conducting at the University of California at Los Angeles. Konwiser outlined the plan and Dumont accepted it on the spot.

Herbert J. Young, president and board chairman of Gibraltar, not only endorsed the pilot project, but made the present house available and offered YHBC additional houses in Los Angeles and in Northern California if the first project succeeded.

Another surprise awaited Konwiser and Renz when they began to contact high school manual training classes. Two high school districts in Los Angeles county declined to take part in the project. Not until they approached the Los Angeles city school system did they meet with any interest on the part of school officials.

Then, with the endorsement of the AFL-CIO Building Trades Council of Los Angeles and the support of YHBC member firms and others in the building industry, the project began. There was no fanfare, but plenty of muscle and sweat, and clouds of dust involved as all hands put in an 8-hour day cleaning up the property at 36th and Trinity Streets in preparation for a start on rehabilitation.

Volunteer subcontractors for particular trades worked with Konwiser and Renz each Saturday as the rebuilding project followed a plan prepared by Bob Bowen, a licensed architect and director of YHBC.

One of the first steps was to build a chain link fence around the property. This relatively sophisticated task, requiring tension braces, the setting of posts and the placing of gates and garage door openings, was accomplished in one workday by four students under the supervision of the man who delivered the fencing.

Four Saturdays after the project began, the basement had been cleaned out, the floor had been shored up to true level by being raised from 4 to 6 inches in various areas, and a completely new central heating duct system had been installed. Putting new plumbing throughout the house was the next chore—to be followed by general renovation of the building itself. The project is expected to be finished by June 6, the end of the school year.

WORD OF PROJECT SPREADS

Meanwhile, word has gotten around. For the first time in his teaching experience, Harold Campbell has been flooded with requests from students trying to get into his classes. State Assemblyman Bill Greene and Dr. Alex C. Sheriffs, Special Assistant for Education to Governor Reagan, are working toward establishing the YHBC program as the basis for a statewide high school level accredited course in the educational system.

In this connection, Bob Renz recently made a trip to the State capital at Sacramento and succeeded in winning a 15-minute interview with Gov. Ronald Reagan. The interview lasted an hour and a half as Renz showed slides of the project and answered questions about it not only for the Governor but for leading California legislators who also were present. Now it looks as if accreditation is assured.

STAYING ON THE JOB

Meanwhile, all 20 of the original workers are staying strictly on the job. Not one has dropped out.

Typical of them is Joe Northcutt, a senior at Jefferson and an all-league line backer on last fall's varsity football team. Joe adopted construction of the new garage to the house as his special responsibility. The work ranged from tearing down the old garage to final doorhanging on the new one.

Joe Bryant, Jefferson senior and varsity quarterback on the school's '69 football team is another worker. Joe, who also is the star southpaw on the baseball team's pitching staff, wants to become an electrician. He

hopes his brother will have a similar project to work on when he gets into high school.

Then there is Realious Cyprian, a 17-year-old senior who is perhaps the hardest worker of them all. Realious suffered a polio attack some years ago. Despite disability in one arm and leg, he literally swarms all over the house with hammer and saw. He wants to be an electrician, but is learning about *all* of the housebuilding trades while he's at it.

Another worker is Lee Marvin, a drafting student. Lee is determined to become an architect. He echoes the feelings of the entire 20-man work force. The job will be done, and done on time.

What of the future? A house in the Roosevelt High School area has been scheduled by YHBC and Gibraltar for renovation in the fall, along with one or more additional houses in the Jefferson High area. Harold Campbell says that he could handle two such projects simultaneously himself. That would mean Saturday work for 40 Jefferson High students per semester, or 80 students during the school year.

Already Konwiser and Renz have visited the Bay area in Northern California where Gibraltar Savings & Loan of Northern California has earmarked houses in Oakland that it is ready to commit to the program.

Gibraltar's Herb Young is trying to work out arrangements to provide summer learning jobs for up to 250 high school youths. Ultimately, as has been indicated, he envisions a nationwide year-around work training program, supported in its entirety by private enterprise, and providing a tremendous stimulus to both the homebuilding industry and to the economic well-being of a large number of the youths in this and future decades.

"Gibraltar will stay with this program in California," Young says. "We'd like to recommend that other S&L's in this State get into the act. There is every reason why savings and loan associations throughout the country should join in this activity. The YHBC is doing the pioneering right here and will have an inspiring success story to tell in June."

The early experience has shown Renz that high school students are exceedingly apt when it comes to on-the-job learning in how to build and remodel homes.

"We are making a photographic and written record of this project. When we're done, we hope to be able to advise other communities how to proceed with their own programs," he says.

This old white frame house that is taking on new life and strength as each week goes by may truly be the beginning of a meaningful, nationwide partnership between the high school youth of America and private enterprise that is dedicated to the self-help principles basic to all real progress.

HIGH SCHOOL BOYS LEARN BUILDING SKILLS ON PROJECT

(By Dick Turpin)

A good idea, coupled with youthful exuberance, is being demonstrated every Saturday by 20 Jefferson High School boys, bent on practical on-the-job work experience.

The seniors are eager participants in the Youth Housing Opportunity Program of the Young Home Builders Council, education arm of the Building Industry Assn. The plan is designed to attract youth into the building trades and pay them while they learn.

The boys, all black, enrolled in the manual arts class of teacher Harold Campbell, put in a full day's work each Saturday on rehabilitation of a white frame house at 3602 Trinity St. The YHBC pays them $1.75 per hour and Campbell receives the extra-curricular rate of pay of the city school system.

Gibraltar Savings & Loan Assn. owns the home being remodeled. When finished the remodeled dwelling will be sold through FHA or VA terms. The proceeds will pay off the money owed on the property and will reimburse the student payroll costs of the sponsoring YHBC, quartered at 1571 Beverly Blvd.

The program, operating without government funds, is an experiment of the YHBC but its two active program proponents, John Konwiser and Bob Renz, members of the group's education committee, are confident it will be a success.

They have visions of extending the program to other schools and other cities. Don Young, vice president of Gibraltar, is also convinced that the Trinity St. program can be duplicated and has promised the YHBC to provide other homes for remodeling.

Campbell, aided by subcontractors who are donating their time and service to the project—and with the support of the Building Trades Council—directs work each Saturday.

Crowbars, shovels and strong young arms busily do the work of the day, tearing out the interior of the house on the corner as onlookers from the neighborhood wonder at the commotion. Other boys worked on a chain link fence and others worked on a garage foundation.

On a recent Saturday, interested onlookers were Assemblyman Bill Greene (D-Los Angeles), Mike Garrett, former USC and currently Kansas City Chiefs grid star, and Young.

Renz said Greene and many city building and school officials have helped in planning, and labor, through the Building Trades Council, completely supports the program.

He explained that last year the education committee of the YHBC presented three one-day programs at low-income area Los Angeles city high schools in which subcontractor members of the council described opportunities for employment in the building trades.

To carry the plan along, actual on-the-job experience was needed, the committee felt, and proceeded to make arrangements for the experimental rehabilitation project to stimulate boys into undertaking union apprenticeship programs.

The remodeling will require complete rebuilding of the plumbing system and the garage, electrical wiring, lath and plaster, all according to plans drawn by Barry Berkus & Associates, whose home designs are found in many Southern California housing developments.

Konwiser, an executive of Republic Homes Corp., and Renz, of Safeway Plumbing & Heating, Inc., and other council members will be on hand each Saturday to "advise and assist" the students in carrying out their jobs for the day.

Workmen's compensation, liability insurance, payroll deductions and other necessities are being handled by the council.

The education committee hopes to make the program its permanent function and if the industry shown by all parties concerned is a criterion, that is what will happen.

Konwiser may be contacted for further information at his office, 500 S. Main St., Orange, location of Republic Homes Corp., a division of National Environment Corp.

One other essential factor for the continuing experiment:

McDonald hamburgers and soft drinks are provided for the work crew by the Willis-Clark franchise of the food concern.

WOMEN NOT COMPLETELY SOLD ON EQUAL RIGHTS

Mr. ERVIN. Mr. President, Lil Thompson, an enterprising reporter of the Winston-Salem, N.C., Journal and Sentinel, recently interviewed some outstanding North Carolina women on the subject of equal rights. She reported that they have some reservations about the House-passed equal rights amendment. Her story appears in the Journal and Sentinel for August 16, 1970.

The statements listed by Lil Thompson indicate that the millions of women who have not forsaken their other affairs to come to Washington to lobby for the House-passed equal rights amendment will be far happier if the Senate has the good judgment to support my proposed substitute, which abolishes all unfair legal discriminations against women while exempting them from compulsory military service and preserving those Federal and State laws which are reasonably designed to promote the health, safety, privacy, education, or economic welfare of women and to enable them to perform their duties as homemakers or mothers.

I ask unanimous consent that the interview made by Lil Thompson be printed in the RECORD.

There being no objection, the interview was ordered to be printed in the RECORD, as follows:

EQUAL RIGHTS? WOMEN NOT COMPLETELY SOLD

(By Lil Thompson)

Not all women are completely sold on equal rights for women.

Some Tar Heel women, for instance, have reservations about the women's equal rights amendment to the Constitution, which passed the House of Representatives with flying colors last Monday.

And one woman is downright against the amendment.

Mrs. Doris Potter of North Wilkesboro, who is president of the Northwest N.C. Development Association, said:

"I'm not in favor of women being soldiers, and that's what this will mean if they're equal in all fields."

The amendment has been kicking around for 47 years now, and apparently a few of the 11 women interviewed last week wouldn't mind too much if it got kicked around for the next 47.

NEVER GONE OVERBOARD

"I've never gone overboard on this because I think women can get pretty near what they want if they work for it," said Mrs. Bess Warren of Winston-Salem. She is a former Democratic county commissioner.

"Well, to each his own," said Mrs. Will P. Hanes, president of the Winston-Salem Junior League. "It (the amendment) really doesn't affect me. But the working girl, I can see how it would be beneficial to her."

Members of the Women's Liberation Movement would shudder at some of the comments from the women interviewed, who ranged from a 22-year-old housewife to several Establishment types.

"My husband gives me more rights than I want!" said Mrs. Jon Wright of Winston-Salem, a young housewife.

"It takes away from womanhood for them to go out and demand and demand," said Mrs. Warren.

"I very much want the man to be the man," said Mrs. Robert Scott, wife of the governor.

Mrs. Scott, however, along with most of the women interviewed, approves of the amendment in general.

DISAPPROVE OF MILITANTS

Many do not approve, though, of the militant feminists in the Women's Liberation Movement.

State Sen. Geraldine Nielson, a Republican, summed them up this way: "Being unladylike."

As to why men haven't given women equal rights long before this . . .

"It's partly because women themselves haven't done anything to deserve it," said Mrs. Martha Evans of Charlotte. She is a state senator.

Women, says Sen. Evans, work to earn money for specific things, such as a new fur coat or a new refrigerator. They only want to work spasmodically.

The reason, said Sen. Nielson, is "partly tradition," and the intensity of this feeling, she said, varies in different parts of the country.

In the Northeast, she said, men are "aware" that their wives are not only wives and mothers but competitors.

"In the South, the men are gentlemen and are sweet to women, and because they act this way they give the impression that they haven't accepted women as true competitors."

"Well!" said Mrs. Robert (Marge) Sosnik, who has her own show on WSJS Radio. "I would say the answer is biological. Man has always been the provider, and woman bears the children and makes the nest. . . . A man might vote for equal rights, but deep down inside him, he'd think otherwise."

Mrs. Scott echoed this. "I think it's because men are men, and women are women. By nature, they're different people."

Rep. Emanuel Celler (D-N.Y.), who spoke last week against the equal rights amendment in the House, also considered the biological differences. He brought down the House with laughter when he said, "There is more difference between a male and a female than between a horse chestnut and a chestnut horse."

LIKES BEING WOMEN

Mrs. Frank Bryant of Boonville, well-known clubwoman and first vice president of the N.C. Council of Women's Organizations, said, "I don't think women want to take men's places. I like being a female, a woman in a man's world. I think this is the way it should be . . ."

Miss Judy Cordell, a young Winston-Salem secretary, said, "This goes way back . . . Men just don't want to give over to the new idea."

"It goes against their ego," said Mrs. Warren. "Let's face it. Men are men, and women are women."

"Maybe," mused Mrs. Hanes, "women didn't want them (their rights) until now." Women, she said, weren't "emancipated" from housework until recently and were used to living in rural areas without cars. Now, in a mobile world, she feels perhaps they are thinking of their rights for the first time.

Mrs. Potter, who favors equal pay for equal work, said that many men feel that women are "not emotionally capable of handling certain positions . . ."

Many women, said Miss Louise MacMillan, the assistant editor of the N.C. Medical Journal, have not been willing to assume the responsibilities of equality. She has known women who have "shied away" from jobs with considerable responsibility.

DO WOMEN CARE?

At least half of the women said they didn't think most women really care about or want equality.

"Only the aggressive woman does," said Mrs. Velma Friende, a school guidance counselor here and a leader in the United Methodist Church.

Whether women will get full equality is not certain yet. The amendment will go next to the Senate, and if it passes there it must be ratified by three-fourths of the states.

In the meantime, most of the women interviewed aren't a bit envious of men, anyway.

Listen to Mrs. Wright, for instance. She generally approves of the amendment, but as far as being envious of men, well . . .

"No," she said. "I like being a girl. I love every minute of it."

OIL INDUSTRY SPOKESMEN AGREE ON FUEL CRISIS

Mr. McINTYRE. Mr. President, 2 years ago my colleagues from New England and I urged the administration, both the outgoing administration of President Johnson and the incoming administration of President Nixon, to act promptly to relieve the pressures which we foresaw operating to deprive the East coast of adequate fuel supplies at reasonable prices.

At that time we were denounced by representatives of the oil industry. We were told that the oil industry was able to supply all of our needs, that the prices our constituents were paying for fuel were and would continue to be reasonable, and that there was no need to make any changes in the system of Federal regulation which had served the oil industry so well in the past.

Two years have now passed, and the chickens have come home to roost. There is a clear fuel oil crisis in New England. That crisis has been recognized in statements from the administration. I am hopeful that the many statements and studies of the administration may even lead to some meaningful action.

Today, the crisis has been finally recognized by the oil industry. About an hour ago, the National Petroleum Council, possibly the most prestigious spokesman for the oil industry in the United States, submitted a report to the Department of the Interior on the fuel outlook for the coming fiscal year.

I quote from one of the conclusions of that report:

Even if unlimited offshore supplies of residual were available, expected available foreign-flag transportation facilities will not be adequate to sustain large increases in U.S. imports in the coming winter (assuming continued closure of the Suez Canal).

The U.S. Government has indicated its concern that there could possibly develop a shortage in domestic supplies of residual and other fuel oils during the fall and winter of 1970–1971. The U.S. petroleum industry shares this concern.

I quote again from the report:

With the wide range in possible results the Committee can not be sure whether the U.S. residual fuel oil requirements will be met in the winter of 1970–1971.

That is, in the coming winter which will soon be upon us—

without extraordinary action by industry and Government.

Mr. President, finally the industry has officially acknowledged the validity of what the Senators from New England have been saying for the past 2 years. I believe that this time, the industry is absolutely correct in its judgment, and I commend the members of the National Petroleum Council for this statement.

There are many additional comments which I intend to make about this report in the weeks to come. However, since I have had such a short time to study it since its receipt by the Government, and since the Senate will soon be recessing for the Labor Day holiday, I now ask unanimous consent that the sections of the report entitled "Foreword, Introduction, Summary and Conclusions," "Most Promising Supplementary Actions," "Other Possible Supplementary Actions," and "Distillate Fuels" be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

SHORT-TERM FUEL OIL OUTLOOK

FOREWORD

The Assistant Secretary of the Interior for Mineral Resources, the Honorable Hollis M. Dole, requested the National Petroleum Council on August 12, 1970, to give an appraisal of the availability of residual and other fuel oils to meet domestic demands through June 30, 1971, considering a variety of alternatives (see Appendix A). The letter of request indicated that the Department of the Interior had been closely monitoring the U.S. energy market for fuel oils since the interruptions in world oil flows beginning in May 1970, and that there had been no clear indication that supplies of residual and other fuel oils, from either domestic refineries or abroad, could meet rising market requirements foreseen. In this light, the Department requested of the National Petroleum Council an appraisal of the prospects for demand and supply of distillate and residual fuel oil for the fall and winter of 1970–1971, as well as its views as to general alternatives available to the Government and possible actions which might be taken individually by various segments of the industry to alleviate the situation.

The National Petroleum Council Committee on Fuels was established under the Chairmanship of Mr. Warren B. Davis, Director, Planning and Economics, Gulf Oil Corporation, and the Co-Chairmanship of the Honorable Hollis M. Dole. The Committee included 22 members, selected on the basis of their training, experience and general qualifications, to deal with the matters assigned, which included expertise in petroleum industry economics, supply and distribution, production, refining, transportation and marketing (a list of the Committee members is included in Appendix B)

The time permitted to prepare this report (20 days) restricted the Committee to an analysis of essentially published data available at the time the request was received and severely limited the degree to which data could be thoroughly checked and evaluated. It was impracticable to attempt detailed industrywide surveys to acquire more recent or detailed statistical data or information. Time was sufficient, however, to permit the development of a consensus as to the validity of judgments based on historical data.

INTRODUCTION

The adequacy of supplies of petroleum to meet U.S. military and civilian requirements has long been a major concern of both the Federal Government and the American petroleum industry. The matter of domestic demand for oil and gas, taken in context with the demand for all other energy sources, is receiving increasing attention. Several factors have brought into focus, in recent months, the domestic fuel oil supply situation.

Residual-type fuel oil is consumed primarily by electric utilities, industry and space heating, and for ships' bunkers. In 1969 some 63% of the total U.S. requirements for residual were imported (about 1.3 million barrels per day), of which only 54,000 barrels per day entered the U.S. West Coast and Gulf Coast, while essentially all the remainder entered New England, the Mid-Atlantic and Florida.

The following occurrences have had particular impact on available supplies of residual to the United States:

(a) There has been a disruption in offshore residual supplies due to abrupt cutbacks in crude oil supplies available from sources in the Middle East and North Africa. What additional crude supplies are

available must be transported around the African continent due to the continued closure of the Suez Canal. This has created a marked strain on ocean-going tanker capacities and has resulted in a worldwide transportation problem.

(b) The relatively recent regulatory developments relating to the composition of fuels or the emissions from their burning, imposed as environmental conservation measures, have resulted in sudden increased demands on the petroleum industry for fuel oils, for the following reasons:

1. More than a decade of excessive regulation has contributed to an impending major shortage of natural gas.

2. Nuclear power plants (for electric generation) have not been completed within the time frame originally planned. For example, had all the nuclear plants planned initially for 1968, 1969 and 1970 been actually completed, then they would have displaced about 265,000 barrels per day of fuel oil equivalent.

3. In anticipation of shifts by the electric power industry to nuclear fuel, and recognizing the trend in air pollution regulations, the coal producers and railroads have not expanded coal production and transportation facilities fast enough to meet the increased demands of the rapidly growing electric power industry. Moreover, the new mine safety laws and wildcat strikes further restricted coal productivity.

(c) Restrictions on the sulfur content of the fuel oils themselves, imposed in a very short time frame in many instances, have resulted in temporary shorter supplies pending time-consuming and costly construction of desulfurization facilities.

As a consequence of the above developments, the U.S. demand for residual fuel oil, which had experienced an average annual growth of 1.7% between 1960 and 1968, grew over 8% in 1969 and is expected to grow at an annual rate of 13% and 11% in 1970 and 1971, respectively.

The present overall energy fuel situation, therefore, is one in which the U.S. has had a relatively large increase in requirements in recent years and has also come to depend heavily on imported residual fuel oil. Such energy problems in the U.S. are further complicated by the fact that the industrial countries of the world are likewise competing for foreign residual fuel oil supplies. Even if unlimited offshore supplies of residual were available, expected available foreign-flag transportation facilities will not be adequate to sustain large increases in U.S. imports in the coming winter (assuming continued closure of the Suez Canal).

The U.S. Government has indicated its concern that there could possibly develop a shortage in domestic supplies of residual and other fuel oils during the fall and winter of 1970–1971. The U.S. petroleum industry shares this concern.

The NPC Committee on Fuels examined U.S. petroleum demand for the years 1968 and 1969 and forecasts of demand for 1970 and 1971, with emphasis on fuel oils, the capacities of U.S. refineries to make fuel oils, and the capacities of U.S and foreign transportation facilities. It has examined the prospects of meeting increased U.S. energy demands with larger volumes of fuel oils manufactured in U.S. refineries, with additional fuel oil imports, and with other fuels.

As the conditions which have created the possibility of a residual fuel oil shortage will continue to exist beyond the time frame of this report, any suggested solutions must be considered in the context of the longer term.

The Committee wishes to emphasize the following points:

1. Emergency actions are inherently expensive. They may require reschedulings, equipment adjustments, new construction, dislocation of personnel and equipment, expensive borrowing of capital, and many other financial and operating actions which inevitably must be reflected in the cost of doing business. Thus, the factors of economics always come to bear on both the industry and the consumer, with the free enterprise system permitting the forces of competition to provide the necessary products to the consumers at the least cost.

2. The long-term stability of energy supplies to meet the Nation's diverse needs appears to be a policy objective of the Federal Government. To achieve this desirable goal it then becomes imperative that the Government adopt wise, firm and consistent long-range energy policies. Individual operators in any industry are motivated and develop their own business programs or plans based not only on existing government policies and regulations at any point in time, but also by what they anticipate will be the future government policies and regulations.

Accordingly, the cause-effect relationship in national energy matters can be anticipated by government policy makers. For example, certain policies of government can and do inhibit exploration efforts for oil and gas in the United States (such as the impact of the Tax Reform Act of 1969 reducing rates of depletion). The result of such policies is seen in the continuing decline in recent years in the ratio of proved domestic petroleum reserves to the U.S. consumption of oil and gas. Likewise, to the extent or degree that U.S. policies permit or encourage dependence on foreign petroleum supplies (for example, residual fuel oil) and transportation systems to move such supplies which are not under effective U.S. control, then it will experience proportionately the vagaries of foreign petroleum sources, particularly under conditions of international tensions or emergencies.

SUMMARY AND CONCLUSIONS

Residual fuel oil

We expect United States residual fuel oil demands which averaged about 2,880,000 barrels per day in the first quarter of 1970 to increase by 260,000 barrels per day to 3,140,000 barrels per day in the first quarter of 1971. Estimates of demand are subject to a number of uncertainties, such as severity of the weather, the level of industrial activity, and the amount of shifting to residual fuel oil usage in the United States in lieu of coal, gas and nuclear power. As a result, the increase in residual fuel oil demand could range from 70,000 B/D to 335,000 barrels per day. The increase forecast in the base case is 9% in the first quarter of 1971 as compared to the 1970 first quarter growth of 18% over 1969. Because refineries supplying residual fuel oil from the Caribbean are all operating essentially at capacity and because there is little or no spare capacity in foreign tanker fleet, there is some doubt as to whether the upper range of the increased volume of residual imports can be brought in.

These forecasts of residual fuel oil demand reflect the best judgment of the Committee. With the wide range in possible results the Committee cannot be sure whether the U.S. residual fuel oil requirements will be met in the winter of 1970–1971 without extraordinary action by industry and Government. A shortfall of up to 250,000 B/D is a contingency which must be recognized.

Most promising supplementary actions

The most promising extraordinary action for providing supplementary residual fuel oil supplies is to run additional crude oil in U.S. refineries and increase residual fuel oil yields. For the level of increases under consideration, it is possible to convert such incremental crude oil runs to nearly 100% residual fuel oil.

The analysis of residual fuel oil supply and demand by districts indicates that possible problems would be confined largely to District I and possibly some shortages in District II. Some additional problems in satisfying fuel oil sulfur requirements will probably occur.

The fuel oil supply for District I from U.S. sources is dependent upon the logistical system in Districts I and III including Texas and Louisiana crude productive capacity, pipeline capacity, refining capacity, and U.S.-flag tanker capacity. An analysis of these components indicates that they could support a supply increase to District I, over projected levels, of about 250,000 B/D of fuel oil made from increased crude production in District III. Much of this additional fuel oil would be low sulfur.

In District II, projected supply about balances demand in total if large shifts from coal to oil do not occur. Nevertheless, low-sulfur fuel oil availability may be a problem in some locations. If a problem does materialize, it should be possible to make up to 115,000 B/D of additional residual fuel oil from increases in U.S. or Canadian crude oil by utilizing spare refinery capacity and shifting yields.

While it is technically feasible to supplement fuel oil availability by running incremental crude oil and shifting yields as outlined above, the economic feasibility of providing larger quantities of fuel oil out of U.S. or Canadian crude oil is a major factor with which refiners would be confronted.

Manufacturing supplementary fuel oil domestically will require physical changes in refinery facilities or operations as well as changes in the logistics system. If this is to be accomplished in time to meet the potential problems this winter, prompt action will be required.

If an incentive program for making low-sulfur fuel oil such as now exists in District V were applied to the whole country, it could be effective only if the quotas were good for several years so the importer might have a chance of using them profitably. Any incentive system would have to be carefully examined to insure that it neither reduced the supply of other products, for example, asphalt, nor unduly distorted the normal economics of refining.

Other possible supplementary actions

1. *Burn unrefined crude.*—While the most economic use of crude would be to process it in refinery equipment designed to utilize the lighter constituents, the feasibility of burning whole crude oil in the event of a shortage of resid was examined. The low flash point of most crude oils would make the addition of safety equipment mandatory. This equipment basically is to prevent the creation of a hazardous, combustible atmosphere in the vicinity of the storage and pumping equipment. It is unlikely that any significant amount of conversion of present resid burning equipment could be accomplished before this winter season. However, the use of crude as fuel could be further examined as a long-range alternate for emergencies or utility peak-shaving, even though this is basically an inefficient utilization of resources.

2. *Relax or delay sulfur restrictions.*—The present availability of both low- and high-sulfur fuel oils is limited. Relaxation of local sulfur restrictions would gain some flexibility, but the net impact on easing the possible overall shortage of fuel oil this winter would be minor. The same is generally true for coal. However, in the case of coal, some delays in imposing sulfur limitations until stack-gas desulfurization is practical may avoid forcing industrial or utility plants to shift from coal to oil.

3. *Obtain waiver under the Jones Act.*—Foreign-flag tankers are in as short supply as U.S.-flag tankers. If the restrictions of the Jones Act were waived to permit use of foreign-flag tankers in coastal service in certain instances, it might provide some flexibility and therefore some relief.

4. *Remove import controls on residual fuel*

oil imported into districts II–IV.—This would not help relieve the possible shortage of residual fuel oil. It would not add to total U.S. imports, and probably would divert imported supply from District I, thus aggravating the shortage there.

5. *Embargo coal exports.*—Nearly all overseas exports of coal are low-sulfur coking coals. Because of the engineering design of existing utility boilers and the combustion characteristics of these fuels, use of these coals for steam purposes poses technical problems that adversely affect their efficient and safe utilization. Existing power plants cannot utilize this type of coal. Therefore, an embargo on coal exports would have no direct benefit.

6. *Use of alternate fuels.*—The availability of coal, gas and nuclear energy to meet increases in the demand for their uses has contributed to the increased requirements for residual fuel oil. None of these three is likely to provide short-term relief to the fuel oil supply problem.

Distillate fuels

The Committee examined the demand and expected supplies of distillate fuel oil for the 1970–1971 heating season. No serious imbalance is indicated between the supply and demand for distillate under anticipated operating conditions and no extraordinary measures should become necessary to meet demands which will result from normal weather conditions.

Assuming normal weather, distillate fuel demand in the first quarter of 1971 is expected to be only about one percent higher than requirements experienced in the first quarter of 1970, which itself was colder than normal. Refinery runs are expected to increase 4–5% over a year earlier. The demand for distillate could, however, be as much as 210,000 B/D if the weather conditions in 1971 should equal the most severe of the last decade, in which case refiners should be able to meet demand, through minor adjustment in yield patterns.

If the weather is significantly colder than normal, distillate supplies will not be large enough to provide a significant replacement volume for residual fuel oil. Potential increased demand for electric utility peak-shaving turbine fuel could also add to the strain on the supply system.

CULEBRA

Mr. BAYH. Mr. President, I have been troubled in the last few months by a situation that demands correction. The situation I am concerned about involves a small island to the east of Puerto Rico named Culebra. It is 7 miles in length by 2 miles in width. Its economy is based on fishing and raising cattle. There is one school, a small church, and 726 people.

The U.S. Navy owns one-third of the island and uses it for bombing and shelling practice for its Atlantic testing range. Because of the Navy's use of the island, the people of Culebra are subject to an unnecessary and dangerous situation.

Since the beginning of this century, the people of Culebra have had the U.S. Navy as their noisy and oftentimes dangerous neighbor. Because of the bombing and constant noise from jet aircraft, the Culebran economy has remained dormant, while generation after generation of Culebran children have left the island to seek their fortune in more hospitable areas of the Commonwealth of Puerto Rico. The naval bombardment has reached such a dangerous level that the people of Culebra have, within the last 9 months, begun to demand the removal of the Navy from their island.

After careful consideration and study of the facts relative to the situation in Culebra, I have come to the conclusion that the Navy must move. First, the Navy's activities represent a high degree of danger to the U.S. citizens living on Culebra. Second, these activities violate the constitutional right of every U.S. citizen to be safe and protected from unnecessary hazards. Third, alternative sites and solutions are available to the Navy that would not endanger the lives or limit the chance for betterment of U.S. citizens.

Having concluded that the Navy should leave Culebra, however, really solves only part of the problem. My desire is to see that the people of Culebra have the opportunity to determine their island's future. I do not believe we can be sure that the residents of Culebra would gain merely from the withdrawal of the Navy—if they are to be the victims of continuing neglect and disinterest or the landscape for ungoverned real estate development.

The most equitable solution presented so far appears to be the resolution offered by my distinguished friend from Massachusetts, Senator KENNEDY. Under this resolution, a five-man commission would be created to study the feasibility of making Culebra a national park. I believe that such an approach may well achieve the objective we would all like to see—a balanced, carefully controlled development of the natural resources and economic potential of Culebra, free from the impact of the Navy and determined by those whose very lives are at stake—the residents of Culebra.

I, therefore, support the efforts to stop all funds going to any military department for the shelling or bombardment of Culebra or any of the adjacent islands. I further urge the passage of the joint resolution introduced by the Senator from Massachusetts (Mr. KENNEDY) which would establish a commission to study making Culebra a national park administered by the Commonwealth of Puerto Rico.

VETERANS' ADMINISTRATION HOSPITAL PROGRAM

Mr. MILLER. Mr. President, much has been written—some accurate, some inaccurate—about the state of our Veterans' Administration hospital program. Allegations have been made that the VA hospitals are neglectful of their patients, our veterans.

An authoritative contribution to this dialog is contained in the September issue of the American Legion magazine. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE TRUTH ABOUT THE VA HOSPITALS—ARE VA HOSPITALS NEGLECTFUL OF THEIR PATIENTS, AS CHARGED IN LIFE MAGAZINE?

(By R. B. Pitkin, Editor, The American Legion Magazine)

The American Legion has been getting distress signals from members asking if a story about the 166 U.S. Veterans Administration hospitals in the May 22, 1970, issue of Life magazine is accurate or misleading.

In a dozen pictures Life showed ten scenes in the spinal injury center of the Bronx VA hospital in New York and two in the Wadsworth VA hospital in Los Angeles. They are two of the oldest hospitals in the system, both rated inadequate by the VA and slated for eventual remodeling or replacement. Life's photos and much of its text portrayed callous neglect of paralyzed veterans, staff apathy, filth, rat infestation and disarray. VA patients were called "Our Forgotten Wounded," and Life said that to be put in a VA hospital was "An Assignment to Neglect." Paralyzed patients were shown lying exposed and mainly naked in open wards; stripped of privacy and dignity; left abandoned and undried in a shower; having to aid one another for lack of staff attention; lying with garbage pails beside what seemed to be their beds; or left helpless for "up to four hours" to be attended for enemas. This story overgeneralized and misshaped a real situation that is neither good nor typical of VA hospitals. As a generality, it better fitted the pre-WW2 VA hospitals, then run as a civil service bureaucracy that was scrapped in 1946. The Administartor of the VA, Donald E. Johnson, of Iowa, advised Life's editors that the photos were staged. Life denied it, and "staged" might suggest actors and false settings. The patients were real and the hospitals were real. But nurses, aides and patients in the spinal injury center of the old Bronx hospital have described some posing, arranging and miscaptioning, if not "staging."

Life's cover photo showed a forlorn patient sitting slumped forward and unattended in a wheelchair, hair hanging over his face, stripped to the waist in a dingy ward—the picture of despair. This view was shot once, says one nursing aid, when she was giving the paralyzed patient a bed bath. She was interrupted to have the patient posed alone before she could put on his jacket and comb his hair. But another employee says that the published photo was taken on another occasion when the patient was in the midst of being dressed, then pictured without his attendant. It appeared under the heading "Our Forgotten Wounded."

A two-page photo of the same patient, alone and apparently abandoned in a shower, was captioned ". . . waiting helplessly to be dried." He was waiting helplessly while a Life crew interrupted his shower, according to his attendant. The attendant said he was shampooing the patient when he was asked to step aside for a picture of just the patient. Two other attendants confirmed that description. Several patients said that being left alone in the shower would be a rare thing.

Patients who were in the enema room of the Bronx hospital, where paralyzed patients who have lost the nerve responses of their colons must sometimes lie for hours on "Stryker frames" for an enema to work, described some other photos in the taking. An employee said that the picture-taking crew hauled a garbage pail away from a curtained corner and put it by one of the patients dozing on a Stryker frame, whose curtain was not pulled around it. The photo crew, said one patient, moved a garbage pail lid and added refuse to the pail. The patient on the near frame said he awoke to find a strange wheelchair patient offering him a cigarette, one garbage pail heaped and placed by his frame, and cameras snapping. As the photo appeared, the cigarette scene seemed to reinforce the idea that the patients could not get staff members to light cigarettes, while the garbage pails supported Life's phrase "a medical slum." Another patient said that he was awakened on his Stryker frame with an offer of a cigarette, but explained he didn't smoke. Life's caption said that these patients were "awaiting treatment" and "because of overcrowding, they must share a corner with garbage pails," and did not identify it as the enema room.

They were not awaiting treatment. The patients on frames were waiting for their

enemas to work. The man offering the cigarette seemed to be truly crowding the scene and he was apparently invited in by the photo crew to offer the cigarette. The garbage pails were in the enema room because they have to be, to receive its unpleasant product which is then removed by the housekeeping department of the hospital. But some say they also collect general ward refuse.

Another Life photo heightened the idea that if the patients don't tend to one another, nobody will. It showed a wheelchair patient throwing a sheet over a bed patient, and Life explained to its readers that ". . . a totally crippled patient must depend on a buddy who still has the use of his arms to get a sheet thrown over him." When the picture appeared in Life the "totally crippled patient" was dismayed. He has been a paraplegic for 26 years, has full use of his arms, lives alone in an apartment, is able to take care of himself, and was then in the Bronx VA hospital temporarily for ulcer surgery. The sheet throwing, he said, was horseplay indulged in at the request of the photographer. He said he did not want a sheet and could have gotten one if he did.

Life said of quadriplegic patient Marke Dumpert, who was featured in many of its photos, that "Dumpert hopes to finish high school, and has a dream of becoming a lawyer, despite his disability. But his will to struggle has been seriously impaired by neglect and frustration."

From this it is not apparent that the Bronx VA hospital has a five-man educational therapy department or that about the time the Life story appeared Dumpert was completing six months of instruction in grammar, literature, math, social studies and science under blind staff instructor Anthony Aliverti. Dumpert sailed through with no grade under 90. He has received his New York State High School Equivalency Certificate and had admission applications in with several colleges last spring. He has learned to type and to turn pages while reading, using a mouth stick.

On these pages and on our cover are shown pictures of 41 of the VA hospitals, and there are 125 more, with new ones going up. No view, either accurate or distorted, of just one section of one hospital can well serve readers as either a good or a bad portrait of the whole system. The spinal injury center in the Bronx is about 1/1250th of the whole.

The VA hospital system today is made up of (1) the dwindling remains of an old, pre-1946 system, and (2) a growing new system of some of the finest hospitals in the world.

Starting in 1946, the new system began to replace the old. In 25 years, 82 brand new hospitals have been added, either as additions or to replace older hospitals. These are, without exception, magnificent. During the same period, 31 of the older hospitals have undergone modern additions and renovations. A total of 106 of the new and the improved hospitals are rated "adequate" by the VA. It is a modest use of the word. Few if any community hospitals can match them in either their facilities or the quality of medical care they give. They are on a par with, or superior to, the hospitals of the great medical centers here and abroad. Sixty hospitals in the system are rated "inadequate" by the VA. Of them eight are rated as "obsolete" and are in line, with six more of the "inadequates," for the speediest replacement possible under the ponderous legislative and budgeting pace of the Congress. Replacing these 14 is a project that will stretch well into the 1980s at the present pace.

The Bronx hospital is among the 60 "inadequates" but not among the eight "obsoletes." It is well located for patients and to command the services of good doctors. It is poorly located to attract nurses, nursing aides, attendants, and others whose VA pay has not been up to the high living costs in New York City. The building's interior is a fright as a piece of hospital architecture. It was built as a huge Catholic orphanage between 1901 and 1903. It was taken over as a veterans hospital in 1922, and D Wing was added in 1940. Of nearly 1,000 patients on any one day, from 90 to 95 may be spinal injury cases. It is a general hospital, and includes psychiatric and tubercular patients. None of the staff there is "neglecting" the patients, but the interior design heaps inconveniences on the whole staff, which is seriously shorthanded.

The devotion of this staff, from Director Dr. Abraham M. Kleinman, down, while working shorthanded . . . working shorthanded in an antiquated building never designed for hospital use, impresses everyone who comes to take a fair look. An aide to Senator Bob Dole, of Kansas, who went there to double check the Life story, put it in a nutshell in a brief report saying that the staff was absorbing the chief punishment of the hospital's handicaps and sparing the patients from most of it.

Many of the paraplegic patients (legs paralyzed but arms normal) speak well of their care there. Life would have rated undiluted applause had it stuck to a valid point it made about the need for more help, especially for quadriplegics, instead of charging neglect at the hospital and identifying exaggerated Bronx conditions with the whole VA system. A quadriplegic cannot move from his neck down, and there is no way that a staff can absorb the punishment that undermanning inflicts upon quads. They must literally ask to have their noses scratched to be rolled over in bed, to be attended for every least thing. They need attendants to do for them the little things that the un-paralyzed do for themselves without even thinking about it. Lacking *constant* attendance, they do not merely suffer physical discomfort, but mental torment. To be a beggar to have your nose scratched when it itches is not just itching. To have to wait even five minutes is humiliation at your helplessness.

On these pages we show a photo of John Pearo, in the Bronx hospital, a quad except for slight use of his right hand. He was provided with an electric wheelchair, with a control in his right hand. Nurse A. T. Campion, R.N., who served five years on the famous international hospital training ship *SS Hope*, asked him if he'd run his wheelchair for our camera. He tooled up and down the hall, zooming from within a fraction of an inch of one wall to a fraction of an inch of the other, wreathed in smiles. "What did the chair mean to you?" asked Miss Campion. "It gave me my liberty back," he told us. "Before then I had to scream for everything." Marke Dumpert, who cannot use either hand, now has a wheelchair run by a microswitch in his mouth.

There were not enough people in the Bronx VA hospital over the last two years to give the quads the full attendance they need, thanks jointly to a staff reduction harking back to the 1968 budget, and to recruiting problems in New York. Congressional committees got going in 1969 to raise the budget, and President Nixon pledged himself to an increase in budget and more staff last April 2.

The problem of more help is not an easy one to solve. The VA pay scale for various attendants is good for many areas of the country, but low for New York and other metropolitan areas where living costs are high. Most of the Bronx employees stay on more out of dedication and the satisfaction of the kind of service they are rendering than for the financial rewards. The place is seriously undermanned for the evening and night shifts, partly because of the difficulty of recruiting at all, partly because of unattractive hours, and partly because of insufficient budgeting by Congress.

The American Legion, other veterans organizations, and many members of Congress have loudly insisted on more adequate operating budgets, particularly for personnel and the putting into use of new medical equipment. In the May issue of this magazine, National Commander J. Milton Patrick asked every Legionnaire and Legion Post to write their Congressmen to ask them to support "sufficient VA funds to keep the high quality of care that has been famous for 20 years." He advised Legionnaires that "the start of decay" was showing "due to repeated cutbacks in staff . . ."

There is no way of knowing how many Legionnaires and Posts actually wrote to their legislators. Congressmen badly need evidence of grass roots support in order to front for an adequate VA budget.

Over the years, the American press has been largely apathetic or hostile to VA appropriations, and has either supported cutbacks or failed to oppose them. Some of the roots of the present difficulties within the system hark back to 1965, when President Johnson ordered a large-scale slash in the VA hospital system. The veterans organization and many members of Congress bitterly opposed the order, and within six months President Johnson rescinded half of the slash, while putting the other half into effect. Thereafter, he supported many veterans programs, and initiated beneficial legislation, though he presided over a 1968 staff cutback that is the main cause of the present problems.

An examination of Life's issues during the six months battle in 1965 shows that it was editorially silent on the whole issue. This could be called a form of "neglect" by the press, but at least it wasn't hostility. The New York Times and some other major newspapers supported the cutbacks and characterized the opposition to them offered by the veterans organizations with the usual cliches about greedy veterans. With year-in-year-out apathy and hostility in the more influential press, it is not surprising that it is extremely difficult for Congressmen to do right by disabled veterans in the annual tugging and hauling over the federal budget. All who care should give them tangible support, which costs 6¢ postage.

Congress should, but seems unwilling to, take a step that would especially help situations like that in the Bronx. It should recognize differences in local living costs, and permit hospital pay scales that are pegged to a local cost-of-living index. Wherever living costs are high, VA hospitals are seriously handicapped in recruiting needed staff. With many categories of good hospital personnel in short supply everywhere, the inability to be competitive locally is a drawback to a hospital which is immediately reflected in what it can do for patients.

Much closer to the Time-Life Building in New York than the Bronx hospital is the magnificent Manhattan VA hospital, opened in 1954. It was not represented in Life's story, but it is one of the finest general hospitals on earth. Its competition for that ranking includes many of the other newer VA hospitals. But, as its Director, John Sheehan, told this writer, it is the very devil to recruit some of the needed people.

"Private hospitals simply raise the rates they charge to patients and pay what they have to for help. We are tied to a nationwide pay-scale, which is pretty good in some places but not here in New York," Sheehan told us.

Nevertheless, the Manhattan hospital has to be seen to be believed. We accosted a patient in one of its sparkling halls who was just up and about after eye surgery. "Do you have any complaints about this place?" he was asked. He exploded. "Anyone who complains about this place ought to be kicked out!" We then identified ourselves as the editor of this magazine and gave him a chance to voice any gripe to 4½ million readers. He identified himself as Lawrence McShay, of Towaco, N.J., a 71st Infantry Regiment veteran of the WW2 European

theater. "I mean it," he said. "Everything about this hospital is fantastic. It's my second time in. I was here three years ago, on my deathbed with pneumonia and complications, and these people saved my life." It says something when an infantryman of any war passes up a chance to gripe.

When Life accompanied its gloomy, special-effects photos with its message that assignment "to a VA hospital" is an "Assignment to Neglect," the copies circulated in Vietnam created in some of the servicemen there a dread of ever having to go to a VA hospital. Perhaps McShay's billigerent defense of the Manhattan hospital may reassure them. Certainly any veteran or serviceman who either must or may go to a VA hospital some day should not be given a bogie-man image of what awaits him there. Needless fear of the institution is not good for someone who is already sick or disabled. One's own spirits and outlook are an important part of restoration to good health, while dread and fear make sickness and disability worse.

Even the gloom of the old Bronx building and the burdens caused by its undermanning are pierced by the tenderness and devotion of the overtaxed staff, the good humor of many of the patients and their appreciation of the excellence of their medical care and training in the face of handicaps. One of the quadriplegics there who was featured in Life is back at his own request after having been transferred to another hospital in a better building.

Richard Carter is shown here in completely candid and undirected photos on pages 8 and 9 as he helps paraplegic Matt Raible break his standing-up record after two years off his feet. Carter has been a corrective therapist in the spinal injury center at the Bronx hospital for eight years. "The pay isn't too much," he says, "but helping these fellows gives you satisfactions that are hard to find in other work." Carter looks as if he might have passed up the world heavyweight championship, he is so burly and powerful. But the tenderness with which he helps Raible shines through in our candid photos of their regular exercise session of 11 a.m., June 24.

Equally attentive to the patients is Carter's corrective therapy teammate, James Ford. On page 10 we show a posed picture of Ford exercising paraplegic Thomas Gary. The photo is posed because Gary insisted that we pose it, so proud was he of the care that Ford gives him. Beside it, we show an unposed picture of Ford putting another paraplegic through his arm-exercise paces. Ford holds up the patient's useless legs while the patient builds up his arm and abdominal strength with pushups.

Vietnam servicemen may believe a statement in Life, attributed to Marke Dumpert, that even the GI humor that men can indulge in under fire is impossible in the Bronx hospital. In Life's photos of Dumpert he appears as a tired, dispirited man. In its shower room photo he seems to be at least 40 years old. In its cover photo where his dressing was interrupted he seems forlorn and forsaken. On page 11 we show an unposed photo of Dumpert who has just cracked a joke about the Marine Corps that set the corrective therapy patients and staff roaring with laughter. That's what Carter and Raible are laughing at in the first photo of them on page 8. Dumpert is actually bright, alert, 21, good-looking, well groomed, and, when not depressed by his terrible injury or the shorthandedness of the hospital, has a sharp sense of humor. He participates in many of the regularly scheduled parties and special events that the Bronx hospital puts on for its spinal injury patients. Thus on May 22 he was one of a party of six who were taken to Aqueduct for a day at the horseraces in a special bus with a hydraulic lift which is regularly used to take the spinal injury cases on outings in the New York area.

None of this is said to make the life of the spinal injury cases or the old Bronx hospital a bed of roses, but simply to tell it as it is, in balance. It is nothing short of a shame that these patients, especially those who cannot use their arms, do not have more attendants—but it is preposterous to pretend that they are "assigned to neglect" or that life is better under fire in Vietnam than in a VA hospital. What is better is to be whole rather than disabled, a fact without bearing on the VA hospitals.

Two other statements in Life that could dismay a prospective VA patient need attention. One was that a totally paralyzed veteran had lain on one side in bed without anyone coming to turn him over from 6 a.m. to 4 p.m. In that period there is a mandatory full day's schedule to be carried out. The statement could only have referred to the refusal of an emotionally upset patient to let anyone touch him (which *has* happened) and not to a refusal of the staff to offer help. The daily routine at the Bronx, as in all hospitals, gets under way at what often seems an ungodly hour of the morning for many patients. Nobody lies in bed unattended all day except at his own insistence. And when that happens it is a staff emergency that can go all the way up to the director if the head nurse cannot persuade the patient to accept care.

And again, Life said of the enema room for spinal injury cases that "patients wait up to four hours to be attended by a single aide." Things are not that bad. The whole enema process for patients with nerveless colons is a tedious, unpleasant bore for patients and attendants alike, due to the nature of the injury. Four hours is maximum for the whole process, from being wheeled to the enema room to being returned to bed after a shower. Most of this exasperating time is spent lying on the Stryker frame waiting for the enema to work, a process that not Life, Congress or the VA can speed up. Nobody waits four hours, or three hours, or two hours, or one hour "to be attended" for an enema. Two to 3½ hours is more common for the entire process. The quads learn to doze or fall fast asleep while on the frame, as two of them have stated they were doing when awakened by the Life crew for the garbage pail, cigarette-offer scene. According to several Bronx patients, the worst delay while *awaiting* an enema is not traceable to staff neglect, but to the slowness of the enemas of those ahead of them to work. A nerveless colon does not react normally.

Just as the revolutionary successful treatment of tuberculosis with drugs was a VA development, so the Veterans Administration is largely responsible for the enormous advances of the last quarter-century in the care and training of paraplegics, quadriplegics, and amputees. Most WWI quadriplegics were dead within five years of the war. Many WW2 quadriplegics are going strong today after 25 years. Nobody has ever found a way to restore the severed nerves of a broken spine. The VA cares not only for war-disabled paraplegics and quadriplegics, but for war veterans who suffer such paralysis in civilian accidents, or from polio or other causes, if they cannot afford their own care (which is astronomical in cost). It returns all of them it can to private life outside of the hospitals, and trains them for a way of life if possible. The war-disabled spinal cases receive a current $400 a month for 100% disability, plus several hundred extra dollars in awards allowed by law because of the special severity of their injuries. Their physical retraining, special equipment, medical care, and further education are free, and special housing and automobiles are provided where applicable. There are other forms of four-way paralysis, such as that caused by multiple sclerosis. If a totally paralyzed service-connected multiple sclerosis case has a family who will keep him at home, the Manhattan VA hospital, for instance, will provide special equipment and send therapists up to 60 miles to their homes to train the family in the ways of care and to keep an eye on the condition of the patient. It will pay a non-VA therapist to do the job if the veteran lives off the beaten track of its own therapists.

Though the VA is doing things like this, and more, and is still in the forefront of world medicine, it is nevertheless hurting.

There has been a steady attrition of staff in the VA hospitals for several years. Without a murmur of protest in the press, the VA medical appropriation as passed by Congress in 1968 required a cutback to the 1966 levels. It was achieved by failing to replace thousands of employees who quit, were discharged or retired.

That made a belt-tightening inevitable, since the influx of new patients from Vietnam service guaranteed an increase of new patients over the 1966 levels.

We wish we could report that Life or any other medium of national influence had spoken up on behalf of a better medical appropriation in 1968 when the damage was done.

An attempt to increase the present VA medical budget failed in Congress last November, and again we can find no word of protest at the time in the media. There was plenty of protest from the veterans organizations and some of the key leaders in veterans affairs in the Congress, including committee chairman Olin E. Teague in the House and subcommittee chairman Alan Cranston in the Senate, as well as from some of the VA medical and administrative staffs.

Last April 2, more than a month before Life's story appeared, President Nixon told the press that he had approved an increase of $50 million in his VA medical care budget for fiscal year 1971—which would make it $210 million more than for 1970—and that he had authorized VA Administrator Johnson to ask Congress for an extra $15 million for the remainder of the 1970 fiscal year. Mr. Nixon gave the background to the press in some detail on April 2. He cited the 1968 cutback and said bluntly that it "deprived the VA's medical care program of several thousand workers in all categories of the health service professions at a time when the VA requirements for such personnel were growing steadily."

VA chief Donald Johnson was the Legion's National Commander in 1965, and led the Legion's fight against the cutback of the VA hospitals of that year. Mr. Nixon named him to head the VA in June 1969. Nixon told the press on April 2 that, after 10 months in office, Johnson had reported to him that "additional funds are required immediately if the VA is to meet its obligations to veterans requiring medical attention."

The President told the press specifically that the VA has not had the funds to open and operate enough treatment centers for the amputee and spinal injury cases coming from Vietnam, where helicopter airlift and rapid evacuation is saving many who would have died on the battlefield in earlier wars. He told them that in two separate actions he had authorized a total increase of 3,500 employees for VA medical operations, perhaps most of whom were only paper additions, due to lack of funds, until June 30.

The VA hospitals have many of the most advanced treatment centers—coronary intensive care units; cobalt cancer radiation units and even three linear accelerator high voltage radiation units that are a step beyond the older cobalt units; organ transplant centers; pulmonary emphysema units and artificial kidney (hemodialysis) units which keep patients with failed kidneys alive by "cleaning" their entire blood supply twice a week.

Many of these units have long been in operation. Some fine equipment is new but unused for lack of current operating funds. John Andreola, of the staff of this magazine, visited the Bronx hospital last winter where

Director Kleinman showed him new equipment stored in crates. Congressional committees in both houses have reported more such unused equipment around the country. President Nixon told the press on April 2 that he wanted to put this equipment into use and open up more special care centers, and what was needed was funds. He pointed out that the VA has to get moving faster in these areas not only for veterans but for all Americans. Acting in partnership with many medical schools and medical centers, it has a leading role in the development of new techniques and new equipment that benefit all medical practice.

The austerity caused by the 1968 cutback to 1966 operating levels has slowed the progress of the VA's celebrated medical research programs, according to conversations that American Legion National Commander Patrick has had with the professionals of many of the hospitals. This adds weight to the President's comments about getting medical advances cracking again as well as more help for overworked patient-care staffs.

Life was silent on the President's press conference, was silent on Johnson's report to the President, was silent on Nixon's projection of VA needs and the needs for funds for them. It did not mention that the Administration was seeking new funds for 1970 or 1971. It mentioned a possible increase of $122 million by Congress for next year and was silent on Nixon's proposal to make it $210 million while $15 million more should augment the VA budget for the dying year.

Congress granted the extra $15 million for the old year, and by June 30 the first 1,000-odd of the new staff members that the President sought were being hired. Rep. Teague in the House and Sen. Cranston in the Senate, with their respective committees, had, along with the veterans organizations, been working hard on an appropriations increase for more than a year.

When President Nixon's April request for an extra $210 million for 1971 over the original 1970 VA medical budget reached the House, the House passed it with an additional $25 million tacked on by Teague. In the Senate, Cranston's committee added another $80 million, and the Senate approved it. At this writing the House and Senate are scheduled to come together to agree on a final figure. If the whole package goes through it would be $315 million over 1970. The VA says that would allow it to add more than 5,000 to its hospital staffs. This should help upgrade the operating performance of the hospitals tremendously.

Perhaps the climate created by Life's article may rate some of the credit if the whole $315 million increase survives the usual tendency to compromise House-Senate-Administration differences at a lower figure. We live in an age when exaggeration seems to get more results than a balanced view of things.

The renovation or replacement of the 60 "inadequate" hospitals is another matter. It moves slowly, so much is involved. There are hospitals in the system whose needs of replacement is both more urgent and simpler than that of the Bronx, and new construction is going on all the time. The San Juan, P.R., and Long Beach, Calif., hospitals are brand new. The old Hines hospital, just outside of Chicago, became completely outmoded. A brand new Hines hospital will probably open up when you read this, or shortly thereafter. The Hines hospital on our cover is the new one, and it should take in its first patient by October at the latest, to be a sister to the magnificent Chicago VA hospital. A new hospital is going up in Tampa, Fla. It ought to, and may, absorb the patients of the old Bay Pines hospital in St. Petersburg, a few miles away.

In many respects, the St. Petersburg hospital is worse off than the Bronx. It is not air conditioned—which makes it beastly in the Florida summer—and it is better located to attract retired doctors than those in active practice, while the Tampa hospital will be tied as a partner to an existing medical institution. St. Petersburg could more easily be renovated to become a VA nursing home, and it may.

Two hospitals new to the system should open in Columbia, Mo., and San Diego, Calif., next year. The Northport, N.Y. and the Lexington, Ky., hospitals will also probably be replaced before 1971 ends. A 250 bed addition to the Seattle hospital is due soon, as is a major addition to the San Francisco hospital. General hospitals at Martinsburg, W. Va., Richmond, Va., Temple, Tex. (its old section), and Vancouver, Wash., are rated obsolete, as are psychiatric hospitals at Augusta, Ga., Gulfport, Miss. (badly damaged by hurricane Camille), Marion, Ind., and Sheridan, Wyo. Plans to replace all of these by 1980 or before, are in various stages. The Richmond replacement has the needed financial OK. Site selection—no simple matter—is being worked out for Richmond. Bids are out for a new hospital at San Antonio.

Vancouver is an example of an "inadequate" hospital with a higher priority than the Bronx. It too is old. It is also poorly located for the best medical practice and not centrally located for the potential patient population. The VA has insisted since 1946 that it wed all of the hospitals it can to a medical school or center, though this is not possible in some areas. It is these partnerships, more than anything else, that raised VA care quality from perhaps the worst in the country to world leadership over the last 25 years. The Army more often places its hospitals for its convenience. Since it commands its own personnel it can take the staff wherever it wishes. The Vancouver hospital was inherited by the VA from the Army. Its replacement, though only in the talk stage today, will probably be located more centrally in the Vancouver-Portland population area.

The Bronx hospital benefits by affiliation with Mt. Sinai hospital medical school and the Columbia U. dental school. The Manhattan VA hospital is tied to the NYU medical school and the city-owned Bellevue hospital, which is operated by NYU under contract. These three institutions, all physically together, attract a concentration of skilled doctors in all specialties and jointly formulate teamwork in practice and medical policy-making.

The huge Bronx building is a puzzler. VA engineers say that the outer shell is perfectly good, and the insides could be torn apart and restructured to make a fine modern hospital. There are few other land sites in New York, if any, that are as conveniently located except at huge cost. So far nobody has any answer to the question: What would you do with 1,000 Bronx patients during the time the insides were ripped out and rebuilt? In the New York area the Brooklyn hospital (another splendid one), the Manhattan hospital, and the fine East Orange, N.J., hospital could hardly take on the Bronx patients for a couple of years even if they shared the load.

There is reluctance to find some less perfect site for a new hospital and close out the Bronx, though in VA gabfests some say that seems the only choice. New York's Castle Point hospital, not far away, is another old one that is due for renovation or replacement, though plans are vague.

Of 31 older VA hospitals that were modernized rather than replaced in the rebuilding that started in 1946, all but seven are rated "adequate" today. Of the seven that are not, perhaps the Wadsworth hospital in Los Angeles is most critical. In spite of a modern addition since WW2 the whole thing is now rated "inadequate," and its older section hardly belongs in such a fine system.

It's clear that before the last 60 hospitals of this huge system are made completely modern a big pile of money must be spent, and each and every one of them will have to fight its way through the annual federal budget debate.

The future construction on which the VA is actively working or specifically planning today has a present estimated price tag of $250 million, spread out from now into the 1980s. It's anybody's guess that with the way costs are going that could double before the work is finished.

During 1969 alone, seven new hospitals were under construction and six, not yet started, were authorized.

Referring to the entire VA hospital system, Life said that its "standards are far below those of an average community hospital" and rated its facilities for long-term treatment and rehabilitation of paralytic injuries as "generally inferior." The VA's hospitals in general are vastly superior to the average community hospital, while the VA is excelled in its long-term treatment and rehabilitation of paralytic injuries by perhaps one or two highly specialized institutions with limited capacity.

There is not a specialty in medicine practiced in the VA in which it is not accredited by the corresponding professional medical group. Nor is this surprising, in view of the partnership established by the VA with leading medical schools and medical centers starting in 1946.

It was not always so. In 1922 the American Legion National Convention asked that the veterans hospitals be wedded to the great medical schools. It was an idea whose time had not come, and the VA hospitals developed between 1922 and 1946 as a closed system of bureaucratic medicine, with doctors on civil service. It was totally unsatisfactory, locking veterans care in the backwash of American medicine.

In 1945, Earl V. Cliff (who died early this summer) revived the idea of tying the VA hospitals in with leading professional institutions in a conversation with Dr. J. A. Pringle, head of the St. Cloud VA hospital in Minnesota.

Cliff, a practicing lawyer of Ortonville, Minn., was an American Legion volunteer rehabilitation leader in Minnesota and nationally. The idea of a medical wedding took fire in Minnesota in 1945–46, and soon Cliff (as the chief catalyst) and Dr. Pringle enlisted the support of the late Dr. Charles Mayo, of the Mayo Clinic; Dr. Harold Diehl, Dean of the University of Minnesota medical school, Dr. Paul Magnuson and others in Minnesota.

Dr. Diehl got his university's consent to team up his medical school with the Fort Snelling VA hospital if Congress and the President would revise the VA system to permit it.

Dr. Paul R. Hawley was then VA medical chief. He was later a director of the American College of Surgeons and head of Blue Cross-Blue Shield.

Using his Legion contacts, Cliff asked Dr. Winfred Rountree, head of St. Elizabeths Hospital in Washington, to propose the idea to President Truman. Dr. Rountree had been the Selective Service medical chief in WW2. Gen. Omar Bradley, then briefly the head of the VA, called in Dr. Paul R. Hawley to hash the idea over. When Hawley endorsed it, Truman named a special medical committee to make final recommendations, including Dr. Mayo and many of the others named here. Mayo, Rountree and others also served concurrently on the Legion's medical advisory committee. The new system went into effect swiftly. In August 1954 Dr. Mayo, writing in this magazine, described the great transformation in these words:

"Nine years ago the Veterans Administration voluntarily abandoned the bureaucratic idea of medicine, which had failed to achieve

medical leadership and could not have cared for the large number of disabled veterans of WW2. . . .

"The remarkable change in VA medicine since then has come about because it has been running away from 'bureaucratic' medicine as fast as it could. For the care of its veteran patients, for the conduct of its new education and research programs, and for the formulation of its medical policy, the VA asked Congress to write a new law to let private medicine assume a huge role in the VA.

"Today, 92 of the VA's hospitals are affiliated with 72 of our leading medical schools and clinics. The schools appoint Deans Committees from their staffs to help guide and formulate VA medical policy.

"To create national VA medical policy, the VA depends largely on two committees of independent physicians, totaling fifty leaders in medical specialties.

"Thousands of nongovernment doctors take residencies in VA hospitals to qualify for specialties, and VA has already contributed to the education of more doctors than are on its entire full-time medical staff.

"Thousands of independent doctors work on a consulting basis in VA hospitals, caring for patients and guiding medical policy.

"Most of the 4,407 full-time VA doctors are now members of the American Medical Association, while more than 11,000 nongovernment doctors participate in the program of the VA hospitals. . . .

"The whole inspiring story of VA medicine since 1946 is a brilliant example of the American way to solve enormous problems—a story of the voluntary teamwork of all concerned to accomplish what neither government nor private monopoly could ever accomplish alone. . . .

"I am proud of the care we are now giving our veterans. Some of my pride is personal because I played a small part as one of the outside physicians who were invited to aid the medical program for veterans.

"More of my pride is professional. Our hospitals for veterans have helped raise the standards of my profession.

"Part of my pride is patriotic. I am proud that my country and the men of my profession have not forgotten, in peace and security, the awful obligation that we placed on millions of boys and young men in the prime of their lives, when they stood between ourselves and national ruin—and stood well. It is fitting, in time of peace, that if they now stand on the brink of ruin through failing health, we as a nation do not entirely forget them."

That was said by Dr. Mayo in 1954.

The essential problems of VA medicine in 1970 are two in number.

The first is to finish modernizing a system in which 106 hospitals are superlative while eight are obsolete and 52 are not fully up to the VA's exacting standards. To this end, construction is continually under way—which is not to say that good medicine cannot be and is not practiced in old buildings. In fact, when the American Medical Association's Joint Commission on Hospital Accreditation surveyed the antique Bronx hospital last December, it commended it on the "high quality" of the care given, old building or no. The Joint Commission could be called the high court of hospital evaluation in the land.

The second basic current problem is to maintain an operating budget to fit the same exacting standards.

Whether the House and Senate will approve the full $315 million increase for 1971 is not known at this writing. If they do, it will not be evident until some time next year if this is enough, in view of spiralling hospital administration costs, and new federal pay raises which any appropriations increase must absorb.

The painful cutbacks in staff in recent years have not been due to a dollar reduction in budget, but to a failure of the budgeting to keep abreast of needs. Each year, VA medicine has received more operating money from Congress, but not enough more to meet the higher costs of just exceeding 1966 levels. Specific help from the opinion-forming news media at appropriation time each year has been lacking. The Congressional veterans committees and the veterans organizations have pretty much gone it alone to rally support at that key time each year when the money was being handed out.

IS FOREIGN POLICY THE PREROGATIVE OF THE MILITARY?

Mr. HARTKE. Mr. President, during the June debate on my amendment to limit military aid to Greece, I was disturbed that military considerations seem to dominate this country's foreign policy toward Greece.

Evidence of this approach was the fact that when the amendment was called up for a vote on June 29, the only administration paper in opposition to it was prepared by the Department of Defense. I would have thought that the State Department might have had some views on this matter.

In foreign policy, military factors are of course important. But as we have learned elsewhere, undue emphasis on military factors can be, in the long run, self-defeating. It can lead to policies that have disastrous military consequences.

I ask unanimous consent that an analysis of U.S. policy toward Greece be printed in the RECORD. The analysis, prepared by Dr. Theodore A. Couloumbis, a professor of international affairs at American University, and Dr. Nikolaos A. Stavrou, a professor of political science at Howard University, focuses on precisely this problem of military dominance of U.S. foreign policy. It deserves our close attention.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

THE MILITARY ARM OF OUR FOREIGN POLICY TAKES OVER ITS DIPLOMATIC BRAIN

Greece provides an excellent case study of a country where US foreign policy has been dominated by military considerations and has been executed by men in olive drab rather than diplomatic charcoal gray. This reverses popular assumptions such as "foreign policy is the business of diplomacy—at least in peace time," "civilian control over the military," and "foreign policy is a careful mix of political, military, strategic, economic and ideological considerations." Even a cursory look at the nature of the post-war relationship between the US and Greece is sufficient to demonstrate the structural reasons for this phenomenon.

The United States inherited responsibility for the protection of Greece and Turkey via the Truman Doctrine in 1947. Greece was threatened then by an internal attempt of her communists to take over power by guerrilla warfare, while Turkey was facing strong pressures by the USSR to modify the status of the straights which control the gateway to the Black Sea and the heartland of the Soviet Union. The United States poured huge sums of money in military and economic aid in both countries) amounting to over 4 billion dollars) and guaranteed their Western orientation through bilateral military agreements as well as insisting on their inclusion in NATO.

The battle against internal and external communism was won and the two nations proceeded with the most pressing task of economic reconstruction and development. While under the US nuclear umbrella Greece and Turkey have related with the US in cultural, economic, political but preponderantly in a military fashion. A few indicators are sufficient to demonstrate the all-pervasiveness of military interrelationships. Throughout the post-war years while Greece and Turkey marched forward on the road to development—the United States decreased and eventually in the case of Greece terminated its economic aid. On the contrary military aid through grants, soft loans and underpriced surplus sales continued strong.

Another most eloquent indicator is provided by the statistical figures of Greek personnel training in the United States. Two to three percent per year of the entire Greek officer corps of 11,000 receive their training at various levels in United States installations. This, over a period of twenty to thirty years, amounts to an overwhelming number of American-trainees. The assumption, of course, follows that there builds a special camaraderie and dependency among the two sets of military men which over the years becomes virtually unbreakable.

Another most interesting observation flows from the following statistics: Of the total number of Greek personnel receiving training in the US the crushing majority have been members of the Greek armed forces while only a negligible minority have been selected from the various purely civilian bureaucratic agencies in Greece. Greek officers and soldiers have often worked intimately with their American counterparts in a number of NATO installations and commands at regional headquarters such as Naples, Ismir, Washington, D.C., or Brussels. The presence of American bases and personnel in Greece, the frequent visits of the 6th Fleet discharging large numbers of eager sailors in search of rest and recreation, frequent joint NATO exercises, or the US overseas armed forces radio network beaming Americana tirelessly on to large Greek audiences—all these factors make for a giant profile for the American military presence. Naturally it should not go unstressed that even the Greek Central Intelligence Agency (KYP) was established by its American counterpart and prior to the coup of April 1967 was financed directly by its American sponsors.

Theoretically, American policy in Greece is executed by the country team headed by the American ambassador. It includs sections drawn from the foreign service, defense, other departments having advisory roles in Greece (such as Agriculture or Commerce) and of course the Intelligence agencies. The statistics provided above, showing the overwhelming importance of military contacts between Greeks and Americans quickly lead to the conclusion that US military personnel hold the high cards in the decision-making mix emanating from the country team. The effectiveness of the US military input to policies toward Greece is reinforced by the virtual independence from civilian control which the Greek armed forces have enjoyed throughout the post-World War II period. This conclusion is strengthened by the views of most Greek political circles who articulate on the subject of Greco-American relations. People like Constantinos Karamanlis, Eleni Vlahou, Andreas Papandreou, George Mylonas, Mikis Theodorakis and other political exiles, currently working for the restoration of Democracy in Greece, are agreed in one basic assumption. That the US military arm is the only influential, if not decisive, instrument of US foreign policy in Greece. They argue that the US either engineered the Coup of April 21, 1967, or at least remained benign in its inaction before the suspension of democratic freedoms in Greece. All these political people are definitely agreed that the US has since that time quietly supported

the military junta of Greece, in the interest of maintaining (or not endangering) US strategic interests: namely American bases and personnel in Greece as well as access rights to airports, overflight rights for the much restricted American military aircraft, and welcome and restful environment for the sea-weary crews of the 6th Fleet operating in the Mediterranean sea.

If we accept for a moment the premise that US military considerations outweigh all other factors in the determination of our policy in Greece, let us look into the substance of our foreign policy (word as well as action) with respect to this country. At its cautious best our policy toward Greece can be described as one of painful dilemma. On one side we deplore the "temporary" (nothing is temporary until it is ended) suspension of democratic freedoms and civil rights in Greece and urge sincerely that democracy should be restored in the not too distant future. On the other hand, we point up the vital strategic location and importance of the Greek real estate and the fact that the military government has been fulfilling its NATO obligations with religious exactness.

These obligations presumably involve a welcome stance vis-a-vis U.S. military presence in the Greek territorial complex, a willingness to devote a large part of the governmental budget to defense spending (the possibility that large portions of the defense expenditure will be used for internal control rather than external deterrence must be taken into consideration here), and correct attitudes of silence if not enthusiastic approval with respect to the much-beleaguered U.S. policies in Indochina. Last but not least, the unstated but very thankful approval of the U.S. goes to the Papadopoulos government for his prudent (some say defeatist) policies vis-a-vis the potentially explosive Cyprus issue which could engulf Greece and Turkey in war (over control of Cyprus) thus scuttling the south-eastern flank of NATO at the great glee of the Russian bear which is comfortably acclimating itself to swimming in the warm waters of the Mediterranean sea.

The military spokesmen of our foreign policy vis-a-vis Greece, however, go a step further than stating the two horns of this dilemma. They unwittingly at times and consciously at other times perform the role of public relations good-image-makers for the Greek regime in the United States. A classic example of this role—on the unwitting side—is the constant comings and goings of minor and major officials of the U.S.-NATO establishment visiting Greece, inspecting sites, kissing babies, and invariably posing in smiling, cordial and warm stances for the ever-present photo-reporters to immortalize. These pictures are prominently displayed by the pro-government newspapers in Greece, transmitting with a picture rather than a thousand words a simple message to the war-weary Greece public: UNCLE SAM LIKES US! (Alfred Friendly in a recent column published by the Washington Post claims that Ambassador Tasca has put a virtual stop to this practice.)

On the more serious and formal side, one discerns the Pentagon's position on the Greek regime following statements made by Defense officials before the various committees and subcommittees as well as plenary sessions of the two houses of Congress. A classic example of this attitude is exemplified by the Defense document presented in evidence by Senator Strom Thurmond before the U.S. senate debate on Senator Hartke's amendment that would have suspended military aid to Greece pending the restoration of democracy there.[1] The document eloquently identifies the essence of the American dilemma, but goes considerably further than that. It accepts the good faith of the Greek regime with respect of its oft-announced intentions of restoring Democracy to Greece, and alludes to a time-table which has been allegedly set by the Greek government (namely the end of 1970) as a reasonable time-limit for the application of the 1968 constitution and presumably the announcement of elections which would be the most unequivocal sign of the return of democracy in Greece.

What is remarkable about the naivete of this document is the innocent and unhesitating trust with which the intentions of the Papadopoulos government are accepted without reservation.

If one examines briefly the record of the Papadopoulos regime in its over three years of governance he will quickly come to the conclusion that the Pentagon's overoptimism with respect to the intentions of the Greek regime is not warranted. The old theoretical maxim that actions speak louder than words has been disregarded by the pentagonal thinkers who have elected to emphasize only the rhetoric. Let us look at the record: The regime came to power in 1967, charging the imminent takeover of communists and the rampant corruption of the parliamentary regimes. Neither of these charges being proven, the regime has dropped them and has adopted new, flexible, abstract and theoretical justifications for its stay in power. For instance the objectives of the regime include such long-range goals as the reshaping of the Greek social and political edifice, the re-education of the Greek public so as to introduce civic maturity among them, the transition of Greece from the status of developing to that of a developed country. All these could be (if taken seriously) twenty to a hundred year projects. The regime has spoken with many and forked tongues regarding how these grandiose objectives will be brought to bear. Some call the regime a "parenthesis" which should give way to civilian, representative rule as soon as possible, while others have opted for the deep, surgical objectives which should write if not a new chapter, at least a new paragraph in Greek history.

The most authoritative spokesman of the regime, P. M. Papadopoulos, has spoken unequivocally about return to democracy on a healthier foundation. The actions of his government, however, make its intentions appear suspect at best. After three years have elapsed since the April 67 takeover, the country is still under the shadow of martial law and strict military control of the governmental apparatus. Even if certain ministries have been entrusted to various civilian personalities, it is a common secret in Greece that the General Secretaries of each ministry act as the revolutionary watchdogs in the bureaucratic apparatus. These men are invariably retired military officers that enjoy the strictest confidence of the revolution, if they are not already members of the revolutionary council. The latter quietly passes on matters of highest policy for the Greek nation.

Papadopoulos announced with great fanfare the return of Greece to constitutionalism very early in the game. A new constitution was drafted, and considerably elaborated on, after the unsuccessful coup d'etat of King Constantine in December of 1967. This constitution, which limited the powers of the King, weakened the authority of parliament and reinforced the powers of the executive, was put to the vote of the Greek people in late September 1968. The main catch was that the vote took place under strict conditions of martial law and that an embarrassing majority of over 92% of the Greek people not only voted for the constitution but simultaneously voted for a provision which would keep their own civil rights and freedoms in the freezer until the Revolution deemed it safe or proper to permit a thaw. It was unabashedly claimed by some proponents of the Revolution that the Greeks had voted freely for their own political castration and for the perpetuation of martial law.

Although the new constitution has been put into effect, its provisions are always subject to the highest or revolutionary law of the land which simply restated reads: Nothing is sacrosanct if it endangers the "national security". The Papadopoulos government proved that, when it ignored the decisions of Greece's highest administrative court and forced its chief justice, Stasinopoulos, to resign. Nothing illustrates this hybrid and uncertain freedom that the Greeks are allegedly regaining gradually, than the fashion with which the matter of freedom of the press has been handled. Early in 1970 preventive censorship was lifted and the new law defining the rights and duties of the Greek press went into effect. For many eager to be emancipated publishers, the new law proved worse than pure and simple military censorship. The philosophy of the new law was the imposition by members of the press of "constructive self-restraint." As long as the press did not publish anything that could be construed as "awakening old political passions", or reporting on questions dealing with national defense and security, or reporting on suicides, or presenting news in a fashion promoting a "defeatist, antinational" spirit, they were free to write and publish anything they wanted, but then face the consequences, if they broke the elaborate and flexibly interpretable law.

The examples of half-measures, empty gestures, structurally attractive laws that would not be applied are too numerous to mention in this short article. Suffice it to say that the new "progressive" legislation being carved out of the revolutionary committees limits the right of trial by jury, shackles the educational system under which strict military scrutiny, has abolished all local representation from mayor to monarch and has replaced elected local officials with centrally appointed ones, has purged the armed forces and the bureaucracy, as well as effectively blocked the right of labor strikes, the continuation and maintenance of political parties and the development of even the most rudimentary internal opposition. A regime which has repeatedly and continuously urged modernization and development has also seen fit to decrease the years of obligatory, free and public education from nine to six. A summation of the picture just painted indicates that there is a tremendous gap between promises and delivery of goods, between rhetoric and action.

The Pentagon, by choosing consciously to ignore the double standard if not doubletalk of the Greek government is rapidly becoming identified as an accomplice among the preponderance of the Greek politicians and naturally the public. An accomplice, that is, which is responsible for the perpetuation of unnecessary dictatorial conditions in their country. The long term consequences of this attitude are clearly apparent. The United States is losing the natural support of the great preponderance of the Greek political spectrum. This will mean that if and when a popular regime comes back to power the favorable position that the US has enjoyed in Greece since 1947 may be seriously jeopardized. This then creates a thankless situation where the US will be required to support a dictatorial government against the pressures of the Greek people as well as international public opinion in order to maintain its strategic interests on the Greek real estate. The premise of this paper is that this is an impasse which the United States can avoid because Greece today provides the US with a credible, popular, pro-western alternative to the currently governing Greek junta.

What is this alternative and how can it be brought about? The alternative is the transition from the present impasse to a

[1] The measure was narrowly defeated 50 to 42. It is indeed unique that 42 U.S. senators voted against aid to the Greek nation since the days of the Truman Doctrine in 1947.

situation where the electoral process will permit the Greek people to elect a representative and legitimate government. How can this transition be brought about and what leverage, if any, does the US possess in the situation? The US, although our policy makers will argue to the contrary, possesses still considerable leverage in Greece. The early part of this paper emphasized the parallel relationship and the comaradery between the military establishments of the two countries. Strong, clear-cut statements backed with appropriate action (such as increments of aid, and support in international questions) are adequate to oblige the Papadopoulos government to deliver the goods that it has obliquely promised from the beginning of their takeover. Failure of Papadopoulos to comply would raise serious and divisive questions within his revolutionary council. Regardless of the exact nature of the 1968 constitution (much depends with respect to constitutions on how and by whom they are interpreted), the present government must be persuaded to apply it without further procrastination.[2] The pentagon appears to have adopted this attitude by announcing that December 1970 is a "reasonable deadline for the complete application of the constitution. This means in effect the lifting of martial law, the permission of political parties to restructure themselves, and most importantly the announcement of elections within 1971.

Now, many critics of the regime may question the legitimacy of the elections to be held under possible conditions of intimidation and fraud. This must be avoided at all costs if the Greek situation is to find an evolutionary way out of its present impasse. Once the constitution is applied and elections announced the present regime must give way to an interim or transitional or service government made up of representative personalities from the spectrum of the Greek political world (which in its overwhelming preponderance is pro-western). This government which should not stay in power more than six months will administer fair and impartial elections. The members of this government, will therefore be excluded—par excellence—from running in the elections of 1971. The members and the supporters of the present regime will be free to form their own political party (if they desire) and seek for the first time an honest mandate from the Greek people. Naturally prior to the elections, martial law will have been lifted, political prisoners will have been freed, the press will have been unshackled and campaigning will be thoroughly secure from harassment from any source. Naturally order and justice will once more revert to police and civilian authorities, and the armed forces will not in any way intervene in the political process. They will revert to their traditional role of defense, and deterrence from external rather than internal sources of threat.

There are serious indications that the great preponderance of the Greek politicians are ready to support such a compromise solution. The solution is indeed a compromise. The present regime and its supporters, who came to power by illegal means, will be allowed not only to go unpunished but to form a political party of their own and seek the vote of the Greek people. Naturally there are many hot-heads who would like to see the Junta members prosecuted and perhaps executed, but this is the kind of attitude that leads the country inexorably toward confrontation and civil war rather than genuine compromise and return of the responsibility for the future to the most legitimate arbiter: The Greek People!

The pressure of the US must be substantive and relentless. The Greek government must be positively encouraged to do no more than it has promised to do in its most benign moments. The US has the leverage among the Greek military establishment, the solution has the support of the overwhelming preponderance of the Greek political world, whether at home or in exile, and the Greek people will be once more given a chance to decide for themselves without the bloody and unpredictable cost of a revolutionary, resistance movement against the Junta.

Greece does not need to become another Vietnam to be restored to democracy. There are many, safe and alternative ways to avert violence in a war-tried country, and to divert the energies of a very talented people toward the positive goals of economic and social development, and pluralist, democratic polity—in short a Greek polity. The task is complex and difficult. There must no longer be self-appointed "saviors" for the country, which after all has enjoyed a consistently high economic development rate in its post-war years under parliamentary regimes.

The peaceful transition outlined above will save the much-harassed American policymakers from many headaches which are currently besetting them with respect to Greece. Our domestic, liberal opposition that points to Greece as an example of exporting dictatorship to protect dubious at best military interests will be pacified if not satisfied. Our NATO allies which have all but ostracized Greece from their political forums, will stop pressuring the US with regard to fostering the perpetuation and growth of a dictatorial regime. Fears that a Vietnam scenario will develop in Greece will be put to rest. Western and US strategic interests will be equally well served by representative governments, as it has been demonstrated aptly from 1947 to 1967. Finally some of the latent fears that the Greek regime will become progressively "nasserized" or "papadopoulized" and will start flirting with Moscow in order to secure its internal political survival from external (Western Pressures) will be permanently laid to rest.

The paradoxical conclusion of this paper is that the US by paying greater attention to political factors in the determination of our foreign policy toward Greece, will protect even better our short as well as long range strategic objectives in this most vitally located area of the Mediterranean Sea. By abandoning sterile, shortsighted, tactical objectives on the Greek situation the United States will gain a significant victory in the political, economic as well as the strategic dimension.

The time is ripe today for the US to intensify its pressures so as to convince the present government that it must take its chances with the verdict of its own people.

Theodore A. Couloumbis, Ph. D., Associate Professor, School of International Service, American University.

Nikolaos A. Stavrou, Ph. D., Assistant Professor, Department of Political Science, Howard University.

[2] There are those having fears that certain provisions of the 1968 Constitution would allow for repressive conditions to obtain *ad infinitum*. The compromise would have the first post-junta elected Parliament exercise its power to review and revise the Constitution.

POLLING WOMEN ON HER ROLE

Mr. ERVIN. Mr. President, the Washington Post for August 24, 1970, contains an article entitled "Polling Women on Her Role," written by George Gallup. Dr. Gallup's poll indicates that the overwhelming majority of American women would prefer my proposed amendment—Senate Joint Resolution 231—over the House-passed Equal Rights amendment—House Joint Resolution 264.

It is not surprising that this should be so.

The House-passed amendment is designed by its proponents to abolish all legal distinctions between men and women, no matter how necessary or reasonable such distinctions may be, and to compel Congress and the 50 States to make all future laws applicable to men and women in exactly the same way, no matter how irrational such action may be.

My amendment will abolish all unfair legal distinctions made between men and women without subjecting women to compulsory military service and without depriving women of the protection given them by laws which are reasonably designed to promote their health, safety, privacy, education, or economic welfare, or to enable them to perform their duties as homemakers or mothers.

I ask unanimous consent that Dr. Gallup's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

POLLING WOMAN ON HER ROLE

(By George Gallup)

PRINCETON, N.J.—"Like all mothers, I get fed up with being cooped up in the house. I'd probably even enjoy a part-time job, but I wouldn't change roles with my husband for one minute."

A Hatboro, Pa., mother of three small children talks about her role in life.

"You hear a lot of talk these days about equality for women," she added. "Single girls may find some discrimination in the business world, but I'll bet most women are fairly satisfied with what they are doing."

She would probably win her bet, according to the results of a special Gallup survey just completed which focused on the attitudes of American women toward their role in life, interest in working and job discrimination.

Two-thirds of American women, mothers included, believe they get as good a break in the world today as men do. However, among those who have attended college, from whose ranks the women's liberation movement has drawn much of its support, far fewer (53 per cent) believe they get as good a break as men.

Moreover, the survey finds that a majority of women feel that members of their sex have it somewhat more difficult when it comes to reaching the upper echelons in business.

Women are now organizing in city after city—publishing handbills, taking out full-page newspaper ads, picketing and threatening court suits. On Wednesday, the National Organization for Women (NOW) will lead a nationwide distaff strike for equality with men.

The feminists are protesting what they regard as "intolerable discrimination" against them in industry, government and the professions.

Here are some of the other highlights of this Gallup survey:

Among the two-thirds of American women (67 per cent) who are presently not working in jobs outside the home, the weight of preference is not to work. Among those women who do crave outside employment (27 percent), most would choose a part-time job over a fulltime position.

Reasons cited by women not now working who want outside employment divide mainly between those who "need the money" and those who admit to being bored at home.

Although 65 per cent of U.S. women be-

lieve they get as good a break in life as men, a majority believe women do not have the same chance as men to become corporate executives. Among women in the higher educational brackets (those who have attended college) the overwhelming majority of 75 per cent believe women are held back from top business positions because of their sex, while among those who have gone only to grade school, 36 per cent hold this view.

The survey was conducted in more than 300 scientifically selected sampling points July 10–12. Following are the questions asked of the 778 women interviewed. The results are shown by all women, women who have children under 21 and by the respondent's educational level.

In your opinion, do women in the U.S. get as good a break as men?

	Percent	
	Yes	No
All women	65	35
Women/children under 21	66	34
Women/attended college	53	47
High school	68	32
Grade school	69	31

Do you wish you had a part-time or full-time job outside your home, or not?

	Percent				
	Yes, part	Yes, full	No	Have job	No opinion
All women	19	8	40	32	1
Women/children under 21	20	9	37	32	2
Women/attended college	11	9	34	43	3
High school	21	8	39	31	1
Grade school	20	8	50	22	

If a woman has the same ability as a man, does she have as good a chance to become the executive of a company, or not?

	Percent		
	As good	Not as good	No opinion
All women	39	54	7
Women/children under 21	33	60	7
Women/attended college	22	75	3
High school	39	54	7
Grade school	54	36	10

Do you think women could run most businesses as well as men, or not?

	Percent		
	Yes	No	No opinion
All women	55	40	4
Women/children under 21	53	43	4
Women/attended college	53	42	5
High school	56	40	5
Grade school	55	38	7

Which do you think has the easier life in the U.S. today—men or women?

	Percent		
	Men	Women	No opinion
All women	30	46	24
Women/children under 21	31	49	20
Women/attended college	28	44	28
High school	30	50	20
Grade school	34	39	27

Have you ever wished you belonged to the opposite sex?

	Percent	
	Yes	No
Women	16	84
Men	4	96

TEXAS STUDY GIVES RETIRED BUS RIDERS' VIEWS

Mr. WILLIAMS of New Jersey. Mr. President, transportation is acknowledged to be the second major problem facing older Americans today, following close on the heels of inadequate income and health costs and delivery.

Indeed, it seems to be a vicious circle: inadequate income keeps older people from using public transportation that is too costly, and this forced immobility keeps them from seeking medical attention, which is also too costly. Chronic illness may worsen, therefore, causing older people to be even more hesitant about using outmoded, cumbersome public transportation systems to reach markets, clinics and other vital destinations.

Although the recent workshop on "Transportation and the Aged" sponsored by the Administration on Aging, Department of Housing and Urban Development and the Department of Transportation, is an encouraging sign of an emerging awareness of this problem within the Federal Government, there is very little research in this area to date.

The Administration on Aging, through title IV of the Older Americans Act, has funded five research and demonstration projects. The results of these few pilot projects have provided an overview of the problem, as well as some direction toward improving existing transportation systems and thus alleviating some of the transportation difficulties for the elderly—and for all who use public transportation.

One such project—a survey of elderly bus riders in San Antonio, Tex.—cited in the July 10 issue of Passenger Transport.

The article, entitled "Texas Study Gives Retired Bus Riders' Views," merits widespread attention. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TEXAS STUDY GIVES RETIRED BUS RIDERS' VIEWS

SAN FRANCISCO, CALIF.—A survey of aged bus riders in the San Antonio (Tex.) area has been made by Frances M. Carp of the Langley Porter Neuropsychiatric Institute, department of mental hygiene in this city.

The subject group was made up of 283 men and 426 women, all retired San Antonio residents. The average age of the respondents was 67½. About 82% were 65 or older. Their median income was $1,400 (slightly higher than the national average for people 65 and older).

Over a third of those surveyed said that they had "Never" ridden the bus, even occasionally. Another 20% said they took the bus about once a week.

Nearly 10% of respondents did not know the location of the bus stop nearest their home.

The most common use of the bus according to the survey, was for visits to the doctor (19%) and shopping for items other than groceries (18%).

SIGNIFICANT VARIABLES

The most significant variables in bus ridership were car ownership, location of residence and distance to the bus stop. If the respondent owned a car, lived on the outskirts of the city and was a considerable distance from a bus stop he was much less likely to be a bus rider than the average retired person.

Of course all three of these variables tend to be related since suburban areas have fewer bus stops and a higher automobile ownership.

Also significant was the ethnic group the respondent belonged to. The survey established three groups: what the study termed Afro-Americans (Negroes), Mexican-Americans (Spanish-speaking people of Mexican ancestry) and Anglo-Americans (everybody else).

Afro-Americans and Mexican-Americans tended to use the bus more often than Anglo-Americans. The Afro-Americans used the bus most often with the Mexican-Americans second.

Half the Anglo-Americans "Never" took a bus, not even occasionally, and less than 10% of them usually rode on a bus more than once a week.

A third of the Mexican-Americans and a quarter of the Afro-Americans "Never" took a bus.

Among users of the bus system the most commonly cited disadvantages were that buses were too infrequent (90%) and were not always headed to the desired location (41%).

The most commonly cited advantage of the bus system according to the retirees was the mobility offered ("It takes me where I want to go") which was cited by 40% of the bus-riding respondents. Also cited favorably were safety and economy (22% for each).

About 47% of the respondents who rode buses recommended rerouting, such as establishment of a cross town service that would not require changing buses downtown.

Only an extremely small number of those surveyed complained of rudeness on the part of the bus operator and the great majority responded quite positively about driver courtesy and driver safety.

Further information concerning the study can be obtained from Frances M. Carp, Langley Porter Neuropsychiatric Institute, 401 Parnassus Ave., San Francisco, Calif. 94122.

TWO FACES OF SOVIET COMMUNISM

Mr. DODD. Mr. President, the American press on August 29 reported a speech by Leonid I. Brezhnev, Soviet Communist Party leader, which, on the surface, was full of good intentions and peaceful expressions. If this statement could be taken at face value, then there would be every reason to be hopeful about the prospects for peace in the Middle East.

Mr. Brezhnev was reported as saying:

It is our profound conviction that an end to the conflict in the Middle East would meet the vital interests of both the Arab countries and of Israel . . . there are opportunities now for approaching the settlement of the Middle East conflict from the position of realism and responsibility . . . what is needed now is not new provocations and subterfuges designed to circumvent or violate the cease-

fire agreement but an honest observance of the agreement reached and real steps in favor of peace.

The address was obviously intended for consumption in the United States and the Western World. But in their Arabic language broadcasts to the Middle East, the Soviets play a quite different tune.

An item in the August 26 Baltimore Sun started out with this paragraph:

Moscow's Arabic broadcasters pursued both an anti-American and an anti-Israel line today as administration sources stressed that the outcome of Middle East peace talks, begun in New York yesterday, will depend in large measure on what influence Moscow brings to bear on the Arab side.

Arab broadcasters, according to the article, are being told by the Kremlin radio that the United States is "playing a hypocritical game" and that there is an "American-Israeli alliance that seeks to strengthen imperialist positions." The article went on to say that, while Cairo from time to time credits the cease-fire to United States' initiative, Moscow consistently refers to it as an arrangement "forced" upon Israel by Egypt's Soviet-backed power. Soviet broadcasters and newspapers apparently make a policy of not mentioning that Secretary of State Rogers and the Nixon administration were the originators of both the cease-fire and the New York talks.

The question arises: Which of Moscow's two conflicting voices is one supposed to believe? And the further question arises: How much trust can we actually put in Soviet pledges of assistance in keeping the peace of the Middle East?

Mr. President, I ask unanimous consent to have printed into the RECORD the two articles to which I have referred.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

BREZHNEV BACKS CEASEFIRE

(By Bernard Gwertzman)

Leonid I. Brezhnev, the Communist Party leader, gave strong Soviet backing today to the current Middle East peace efforts and called on all sides for "an honest observance" of the 90-day cease-fire agreement.

"It is our profound conviction that an end to the conflict in the Middle East would meet the vital interests of both the Arab countries and of Israel," he said in a nationally televised address.

Mr. Brezhnev was speaking in Alma-Ata, the capital of Soviet Kazakhstan, in central Asia, at ceremonies marking the 50th anniversary of Communist rule there. . . .

. . . his words were the strongest yet by any Soviet leader in support of the movement toward a political settlement.

He indirectly rebuked the Palestinian guerrillas, the Iraqis, the Chinese and hard-line Israelis, all of whom opposed the cease-fire, which began Aug. 7.

"Only a little step toward peace has been made so far in the Middle East," he said, "but this step has already met with sharp opposition from supporters of continued military actions and from all adherents of an aggressive course."

He said: "It is very important now for the peace forces in the Middle East not to let go of the initiative in settling the conflict, and not to allow the foes of peace to blow up the agreement reached or use it to cover up their aggressive designs."

Referring to charges and countercharges by Israel and Egypt of cease-fire violations, Mr. Brezhnez seemed to urge an end to bickering by both sides, a position also taken publicly by United States officials.

"There are opportunities now for approaching the settlement of the Middle East conflict from the position of realism and responsibility," he said. . . .

"What is needed now is not new provocations and subterfuges designed to circumvent or violate the cease-fire agreement but an honest observance of the agreement reached and real steps in favor of peace," Mr. Brezhnev said.

The party leader said, however, that the Soviet concept of a settlement was the same as that of the Arab states—that Israel must withdraw her forces from all Arab territories occupied in the 1967 Arab-Israeli war.

MOSCOW'S ARABIC RADIO STILL ATTACKS U.S.

WASHINGTON.—Moscow's Arabic broadcasters pursued both an anti-American and an anti-Israel line today as administration sources stressed that the outcome of Middle East peace talks, begun in New York yesterday, will depend in large measure on what influence Moscow brings to bear on the Arab side.

Egyptian, Jordanian and other Middle East listeners were being told by Kremlin broadcasters that the United States is playing a "hypocritical game," that Israel's agreement to take part in the New York talks was "only a formal concession" and that there is an "American-Israeli alliance that seeks to strengthen imperialist positions."

The Soviet broadcasts also included passages bearing upon a hope expressed by administration sources that Moscow might some day join Washington in contributing manpower to an observer force that would supervise enforcement of any Arab-Israeli settlement the New York talks may produce.

Quoting from Pravda, official daily newspaper of the Soviet Union's ruling party, the broadcasts reflected Egyptian government criticism of the Nixon administration for having suggested that the Soviet Union as well as the United States undertake comparable supervision of the current cease-fire and standstill agreement between Egypt and Israel.

"American diplomacy obviously made a step backward," one such Soviet broadcast said, "when the Department of State asserted . . . that allegedly there are 'certain proofs' of violation by Cairo of the terms of the temporary cease-fire. . . .

"This statement was regarded in the United Arab Republic as a reflection of Zionist pressure upon the United States government and also as a testimony that the government of the United States is not capable of opposing this pressure."

There has been, however, no mention in the Soviet press or in either foreign or domestic broadcasts from Moscow of the suggestion, attributed by Cairo to Washington, that the Soviet Union match the United States's current aerial reconnaissance in the Suez Canal area.

The Egyptian government included in a domestic broadcast five days ago this statement:

"Cairo does not agree that U.S. satellites or U-2 espionage planes should monitor the cease-fire line. The UAR communicated this rejection to the United States when it learned of the U.S. desire in this respect . . . the UAR explained that any such action by the United States would help Israel . . . and that the least it (the United States) could do would be, or pretend to be, neutral."

Unlike Cairo, which from time to time credits the cease-fire to "United States initiative," Moscow consistently refers to it as an arrangement "forced" upon Israel by Egypt's Soviet-backed power. No mention has been made by Soviet broadcasters or journals of either William P. Rogers, Secretary of State, or the Nixon administration as originator of both the cease-fire and the New York talks.

NEW JERSEY POLISH AMERICAN DAY

Mr. WILLIAMS of New Jersey. Mr. President, last month, I had the honor of participating in a Polish day celebration at Falcons Camp, Somerville, N.J. The activities of the day brought home very forcefully the truth that the varied backgrounds and cultural heritages of America's people gives strength to our Nation.

It was my honor to present to Mr. John J. Wolczanski, general chairman of the New Jersey Polish-American Day celebration, a mememto of the ceremony in which a bronze tablet in memory of Ignacy J. Paderewski was dedicated in 1963 by President Kennedy at the U.S.S. *Maine* Memorial at Arlington National Ceremony.

I ask unanimous consent to have printed in the RECORD a report of the events of New Jersey Polish-American Day.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the News Tribune, August 4, 1970]

8,000 ATTEND POLISH DAY FETE

More than 8,000 persons attended a Polish Day celebration held at the Falcons Camp, Somerville. Area members of the New Jersey Polish-American Congress, the Polish Veterans Post 40 of Perth Amboy, the Polish Veterans Post 208 of South River and the Pulaski Club of Perth Amboy attended.

A special presentation was made to John J. Wolczanski of Perth Amboy, executive vice president of the Polish-American Congress who served as general chairman. He was presented with an inscribed picture of a dedication service performed by the late John F. Kennedy at the gravesite of Ignacy J. Paderewski, who died in 1941.

Paderewski, a Polish statesman, composer and classical pianist, was interred in Arlington National Cemetery, Washington, D.C., in what the then president Franklin D. Roosevelt explained was a "temporary interment in this country until a time when Poland was free."

U.S. Sen. Harrison A. Williams, D-N.J., who made the presentation to Walczanski and was the main speaker at the Polish Day celebration, said, "But Poland is not free. Paderewski rests here and we are proud to have him here."

Williams gave Wolczanski a picture of the dedication of a tablet in memoriam to Paderewski at the USS Maine Memorial at Arlington. The ceremony had been performed May 9, 1963. In making the presentation, Williams acknowledged Wolczanski's "assistance in making this dedication possible."

A welcoming address was given by Reinhold W. Smyczek of Old Bridge, president of the Polish-American Congress.

The Rev. Eugene Prus, pastor of St. Stephen's Roman Catholic Church, Perth Amboy, gave the invocation. American and Polish national anthems were sung by Capt. Richard Winowski.

Speakers, in addition to Sen. Williams, included Arthur R. Sypek, president of the New Jersey Freeholders Association; Marian Swiecicki of the writing staff of the New York Nowy Swiat newspaper; Stanley Maziarz of

Trenton; and Alfred Zlenowicz of Hillside, president of the Polish Falcons District 1.

A memorial Mass was conducted at the camp's chapel for the late Gen. Wlaydyskaw Anders of the Polish Army who died recently while in London, England. Celebrant was Missionary Father Zdislaw Kokowski of the Shrine of Our Lady of Czestohowa in Doylestown, Pa.

MARK TRICE

Mr. PELL. Mr. President, all of us who serve in the Senate, I believe, regard the Senate as an institution with a life of its own that transcends the lives and careers of those who are a part of it.

Few men, however, have been as much a part of this great institution as Mark Trice. In 50 years of service to the Senate, he has seen Senators come and go; he has seen the pendulum of public opinion swing repeatedly, sweeping national leaders in and out of political power; and he has seen national policies as well as politicians come and go.

I am delighted that his long and faithful service to the Senate has been so appropriately recognized, and I extend to him my warmest congratulations and best wishes for the future.

THE FOLLY OF UNDISCIPLINED RADICALISM

Mr. McGOVERN. Mr. President, I ask unanimous consent that a letter I mailed on August 31 to congressional student interns, including a statement of my views on the folly of undisciplined radicalism, be printed at this point in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

AUGUST 31, 1970.

DEAR SENATE AND HOUSE INTERNS: I wish to use this letter to convey my appreciation and admiration for you for working to improve both the polices and procedures of our national life. I am sure that the viewpoints of students working with Senators and Congressmen this summer have varied widely. But it is significant that you share in common a belief that for all its shortcomings our political system still provides a useful opportunity for an individual who wishes to make a constructive effort. I commend you for your faith and for your effort.

May I take this opportunity to thank especially those of you who gave your time and effort to the issues associated with the so-called Amendment to End the War. I regret that a heavy schedule did not permit me to grant interviews to many of you who visited my office.

In recent months I have been increasingly disturbed by those young people who, unlike yourselves, have resorted to acts of violence and disruption against our society. My thoughts on this subject are contained in the attached statement: *The Folly of Undisciplined Radicalism*. I would appreciate learning of your reaction to this statement.

Sincerely,

GEORGE MCGOVERN,
U.S. Senator.

THE FOLLY OF UNDISCIPLINED RADICALISM

The recent bombing of the Math Center at the University of Wisconsin, which claimed the life of a young researcher, is one of a series of violent acts which underscore the folly of undisciplined radicalism. Bombings in various parts of the country have come with alarming frequency in recent months. These tactics and the wild rhetoric that has afflicted some revolutionary groups are apparently based on the notion that the ends justify the means.

But the bombers, and other irresponsible advocates of violence, threaten all that is decent in our society. They sometimes claim to be operating as anti-war agitators. But we cannot end violence abroad by practicing it on each other here at home. Indeed, the tactics of violence only ensure a self-defeating counter-reaction that leads not to peace and justice but to conflict and repression.

I regret that some radical youth leaders have lost contact with both reality and their own professed idealism.

Radical theoretician Tom Hayden's recent remarks to the National Student Association Congress, as reported in the Washington Star of August 19, 1970, illustrate the point.

In glorifying the recent kidnapping of a California Judge which led to his death and that of three other people, Hayden endorses the very barbarism that he professes to despise.

In claiming that Panther leader Huey Newton was released from prison because of the guerrilla kidnappers of Uruguay and Brazil, Hayden has gone beyond the limits of either reason or honesty.

Newton was released not because of Latin American kidnappers, but because an American court gave him the beneficial protection of our judicial system, and found error in his trial.

The great weakness of many American radicals such as Hayden is that their vision is limited only to the weakness of our society. Even though their own freedom depends on the American legal and political system, they use that freedom to proclaim the worthlessness of the system that makes their protest possible.

At the same time, they naively imagine that the revolutionary society they advocate would measure up fully to the lofty ideals of its architects.

Thus, the American radical all too frequently wears one set of blinders that enables him to see only the disappointments and ugliness of our society, while another set of blinders enables him to see only the virtues of the Utopian alternatives he reads about in radical literature.

Normally, he is comforted in his blindness by the affluence and relative security provided by the system he condemns.

What I personally resent most about some American radicals is their willingness to jeopardize the chances of constructive change by flaunting their own foolish and destructive tactics. They have invited the so-called hard hat reaction to the peace effort by such antics as displaying Vietcong flags, disrupting courtrooms, shouting obscenities and other obnoxious patterns of conduct. Instead of building a broader base on the nearly universal hunger of man for peace, they seem determined to isolate the peace movement from any kind of effective relationship with other human beings.

This kind of reckless political action may be enjoyable for affluent youth cut off from the real world, but it is a grave injustice to those who seek an end to the war and misery. The irresponsible militant "doing his thing" at a peace rally or in a courtroom is undermining those dedicated to the long, hard effort to influence public opinion toward peace and justice.

The Jerry Rubins and the Abbie Hoffmans have done all right for themselves doing their own thing. They have made themselves into nationally known personalities complete with lucrative fees. But they have discredited in the public mind legitimate efforts for peace and justice.

I repudiate the tactics of the Jerry Rubins and the Abbie Hoffmans. And I repudiate the foolish words of Tom Hayden, spoken in praise of the California court tragedy and the Latin American kidnap killers. Their antics betray the hundreds of thousands of concerned people, young and old, who have worked and talked and walked for peace and justice. They betray the thousands of people young and old who work for candidates dedicated to a better society. They betray those in public life who have invested their lives in the cause of a more humane and peaceful society. And, they betray their own hopes for a more harmonious world based on the brotherhood of man.

UNEMPLOYMENT JUMPS SHARPLY FOR MATURE WORKERS

Mr. WILLIAMS of New Jersey. Mr. President, despite the urgent employment needs of middle-aged and older persons, the United States still does not have a clear-cut, effective policy for maximum utilization of individuals now regarded as "older workers."

The price the Nation pays for this inaction is a growing dependency ratio of nonworkers to workers.

Recently the Senate Labor and Public Welfare Committee took potentially far-reaching action for the middle-aged and older worker when it reported out the Employment and Training Opportunities Act, S. 3867.

One major feature—which I cosponsored with the Senator from West Virginia (Mr. RANDOLPH) and the Senator from Massachusetts (Mr. KENNEDY)—authorizes the establishment of a mid-career development service program to provide training, counseling and other supportive services directed at the special needs of persons 45 years and older.

Various indices suggest that the critical period in the worklives of adults occurs during their late forties or early fifties. For this age group several discernible trends become evident:

Joblessness begins to rise;

Duration of unemployment increases sharply;

Labor force participation declines; and

Poverty increases.

In the face of mounting widespread unemployment, the impact upon mature workers and their families has been especially severe.

From January 1969 to July 1970 unemployment for persons 45 and older jumped precipitously from 596,000 to 967,000—about a 62-percent increase.

During this period, long-term unemployment—15 weeks or longer—nearly doubled, from 115,000 to 226,000.

Yet, in far too many instances the employment and training needs of older workers have been overlooked or ignored under present manpower programs.

The midcareer development service program can help to assure that adequate resources for training and supportive services are devoted to the pressing and growing employment problems of the mature worker.

An excellent article in the August issue of the Typographical Journal discusses the need for reshaping our thinking and attitudes about middle-aged and older workers.

Mr. President, I commend this article to Senators and ask unanimous consent that it be printed in the RECORD.

There being no objection, the article

was ordered to be printed in the RECORD, as follows:

SCIENCE OF "IDUSTRIAL GERONTOLOGY" INCREASINGLY IMPORTANT TO WORKER

In this time of rapid movement of events and ideas new words and terms are frequently devised because the old expressions are just not adequate.

This is true of an entirely new field which embraces the employment and retirement problems of middle-aged and older workers. It has been given the intriguing name industrial gerontology.

There is already a National Institute of Industrial Gerontology which is funded by a grant of the Department of Labor to the National Council on the Aging.

The director of the institute is Norman Sprague, who defines industrial gerontology as a "new applied science . . . of aging and work."

"Industrial gerontology begins where age, *per se*, becomes a handicap to employment," he says. "Age discrimination in employment may start at 35 or 40 in some industries and occupations and begins to take on major dimensions when a person reaches the age of 45."

Sprague's definition appears in the preface of a new book, "Toward an Industrial Gerontology," by Harold L. Sheppard of the W. E. Upjohn Institute for Economic Research. The book consists largely of a set of essays or papers which were presented at a 1968 seminar sponsored by the National Council on the Aging, on industrial gerontology.

The seminar took place several months before the law prohibiting discrimination in employment because of age became effective.

The participants in the conference were pioneers in this new science long concerned with such problems as employment assistance for older workers, continued employment, pursuit of new skills, and, generally, all the barriers which workers find in relation to work as they continue to grow older.

Everyone who works for a living must be concerned about the science of gerontology since growing older is an essential part of life.

Within the science of gerontology is a question that has been the subject of serious debate within the industrial community and within the labor movement—compulsory retirement. There are many advocates and many positions on this issue.

Sheppard, in his essay, suggests that "preretirement attitudes and preparations should be examined as possible influences on the work behavior of older workers."

More importantly, he says there is no basis for believing "retirement patterns and preference for retirement will continue as they are."

He raises the question of whether it is not possible that under conditions of a general inflationary trend, for example, "older persons would want to work longer to replenish their eroded assets or to guard assets threatened by rising prices."

Sheppard develops other questions, too. For example, he noted that 20 to 30 years from now older workers may not actively seek the "release" from work to the same degree that workers do today. He pointed out that in higher-educated, white-collar and professional areas, the percentage of workers in their 70's in the labor force remains quite high.

"There is a great danger," Sheppard writes, "stemming from the fact that policies affecting the work-play-retirement patterns of future generations of the older population are grounded into today's and yesterday's factual situations—situations which may no longer prevail in future decades."

He observes that with the "process of aging," slowing down and the cultural stress on the prolongation of life, the trend toward early retirement may be reversed on some jobs.

This thoughtful question, of course, is only one small but nevertheless important facet of the science of industrial gerontology.

Among other areas it is concerned with aptitude testing of middle-aged and older workers, with job counseling, vocational training and placement. It also covers job assignments, re-assignment and retention.

There is a deep concentration on the transition from employment to retirement and with industrial retirement, itself. It is concerned with retirement preparation, retirement criteria and retirement income, with public and private pension programs being spotlighted.

The Senate Special Committee on the Aging, in its recent hearings on "Economics of Aging—Toward a Full Share in Abundance" dug deeply into industrial gerontology. It is a science with which those of us who work for a living will become progressively more concerned.

IN MEMORIAM: LEON M. HERMAN

Mr. DODD. Mr. President, just over a year ago, Mr. Leon M. Herman, a noted scholar and Soviet expert who served in the Library of Congress, passed away fom a heart attack. His passing was the occasion for numerous obituaries which praised him for his expertise and the services he had rendered. But it seemed to me at the time that none of the obituaries that were written really did justice to the quality of the man.

In the June 1970 issue of Slavic Review, there appeared an article which, in my opinion, for the first time does justice to Leon Herman. The article was written by Mr. Joseph G. Whelan, one of Mr. Herman's colleagues in the Soviet Affairs Division of the Library.

In his article Mr. Whelan points out that:

Mr. Herman advised and assisted many members and committees of Congress on matters relating to his special field of Soviet economics in East-West trade. He contributed to the work of the Senate committees on Foreign Relations, Aeronautical and Space Sciences, Commerce and the Judiciary.

Mr. Whelan points out that—

The publication of his many studies by these committees testifies to their high regard for his competence in his field.

By his unique professional abilities and extraordinary personal qualities his presence not only enriched the government service, but enriched also the scholarly world; for more than just acting as a conduit of ideas flowing into the government, he was himself a seminal source of influence, generating ideas that spread throughout the nation's scholarly community.

Mr. President, I ask unanimous consent that the full text of Mr. Whelan's article about Mr. Leon Herman be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LEON M. HERMAN, 1905–1969

On May 29, 1969, Leon M. Herman, as president of the Washington Chapter of the AAASS, presided over its annual spring meeting at George Washington University. In the evening he presented a paper on East-West economic relations. This was Mr. Herman's last professional activity: he passed away suddenly and unexpectedly on May 31, stricken with a heart attack while quietly resting at his home in Silver Spring, Maryland.

An eminent specialist in Soviet economic affairs and East-West trade, Mr. Herman had a long and distinguished career in the government service. His interests and activities were far-reaching, encompassing public service to the Executive Branch and Congress, the scholarly community in this country and abroad, and the business world. In the last decade of a professional career that spanned thirty-five years, Mr. Herman had become an internationally recognized scholar-in-government.

As in the case of so many first-generation American scholars of Soviet affairs, Mr. Herman had his beginning in Eastern Europe. He was born in 1905 near Pinsk, Russia, but spent his early years in Kiev before emigrating to the United States in 1921. After completing his undergraduate work at Long Island University in 1932, he eventually went on to the University of Chicago where in 1935 he received his master's degree under the famed Russian specialist, Professor Samuel N. Harper. In the same year, Mr. Herman entered the government service and began a career in the Department of Commerce that was to last twenty-two years. There he specialized in Soviet affairs and foreign trade, and held important posts during his tenure, include the position of chief of the Russian Division, Bureau of Foreign Commerce. In 1957 he left the Commerce Department and began his long association with the Library of Congress as senior specialist in Soviet economics in the Legislative Reference Service.

While at the Library of Congress, Mr. Herman was able to give full range to the many talents, skills, and expertise that he had developed over the years; and it was no doubt there, in the service of Congress, that he was able to make his greatest impact as a scholar of Soviet Affairs. As a senior specialist, Mr. Herman advised and assisted many members and committees of Congress on matters relating to his special field of Soviet economics and East-West trade. He contributed to the work of the Senate Committees on Foreign Relations, Aeronautical and Space Sciences, Foreign Commerce, and the Judiciary. The publication of his many studies by these committees testifies to their high regard for his competence in his field.

Most notable of Mr. Herman's contributions to Congress were the studies on the Soviet economy prepared for the Joint Economic Committee which he had planned and guided from their inception to final publication. His demonstrated capabilities as a director of research and as a contributing scholar were primarily responsible for making these studies the most widely used and authoritative publications on the Soviet economy. Students of Soviet affairs, economists, and foreign policy specialists in this country and abroad have acclaimed them as a primal source for understanding the Soviet economy. Even the Soviet leaders have taken note of them. In addition, Mr. Herman directed the publication of two definitive volumes on the economy of Mainland China, and at the time of his death he was supervising the preparation of a path-breaking study on the economy of Eastern Europe.

As a producing scholar, Mr. Herman was prolific, and his scholarly efforts are recorded in a vast bibliography of published and unpublished writings, compiled during his years of public service. (A commemorative bibliography of his published works has been reproduced in *The ASTE Bulletin*, 11, no. 2 [Fall 1969]: 4–12.) His chapters in books, articles, and reviews in professional journals were numerous. And students of Soviet affairs in the late 1940s will recall with gratitude that it was he was translated the major Russian economic historical opus by P. I. Liashchenko published by Macmillan in 1949.

But Mr. Herman's professional interests were not confined strictly to the government service; they extended far beyond to the field of education, to organizational activity, and to the business community. For many years he was adjunct professor at the American

University's School of International Service. He found time in his busy professional life to lecture widely and regularly, especially at the State Department's Foreign Service Institute and the Defense Department's National, Industrial, Army, Navy, and Air war colleges. Moreover, he was associated with and actively engaged in the work of the Council on Foreign Relations, the American Management Association, and the Committee for Economic Development. In addition, he was a founding member of the Washington Chapter of the AAASS. And, finally, as a long-time consultant in East-West trade, Mr. Herman won the grateful appreciation of the business community, which looked upon him as a skillful interpreter of the Soviet scene and accordingly sought his counsel.

A truly professional man, Mr. Herman moved with an uncommon grace and ease within the government service and between it and the worlds of scholarship and business; and wherever he went those with whom he was closely associated could not fail to feel the impress of the power of his intellect, the depth and breadth of his wisdom, and the vast dimension of his human understanding. In this way, he epitomized the finest of what the intellectual should be in the government service. By his unique professional abilities and extraordinary personal qualities, his presence not only enriched the government service, but enriched also the scholarly world; for more than just acting as a conduit of ideas flowing into the government, he was himself a seminal source of influence, generating ideas that spread throughout the nation's scholarly community.

This is no small legacy for a career that stretched over three decades. Perhaps it is this feature of Leon Herman's life that will be most remembered by his many professional colleagues. But it will be this and the memory of a warm and gentle man that will remain with those who were closest to him.

JOSEPH G. WHELAN,
Library of Congress.

THE CURRENT MOLD OF SDS

Mr. MILLER. Mr. President, in "Case and Comment" for July–August 1970, appears an article by the Director of the Federal Bureau of Investigation, Mr. J. Edgar Hoover. The article also appeared in 38 Fordham Law Review 289, entitled "A Study in Marxist Revolutionary Violence," which traces the development of Students for a Democratic Society. This authoritative article is must reading for all Americans, especially for parents of students and students attending or about to attend college.

I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A STUDY IN MARXIST REVOLUTIONARY VIOLENCE: STUDENTS FOR A DEMOCRATIC SOCIETY, 1962–1969

(By John Edgar Hoover)

People ask, what is the nature of the revolution that we talk about? Who will it be made by, and for, and what are its goals and strategy?

The goal is the destruction of US imperialism and the achievement of a classless world: world communism.

The most important task for us toward making the revolution . . . is the creation of a mass revolutionary movement. . . . A revolutionary mass movement is different from the traditional revisionist mass base of "sympathizers." Rather it is akin to the Red Guard in China, based on the full participation and involvement of masses of people in the practice of making revolution; a movement with a full willingness to participate in the violent and illegal struggle.

The RYM [Revolutionary Youth Movement] must . . . lead to the effective organization needed to survive and to create another battlefield of the revolution.

A revolution is a war. . . . This will require a cadre organization, effective secrecy, self-reliance among the cadres. . . . Therefore the centralized organization of revolutionaries must be a political organization as well as military, what is generally called a "Marxist-Leninist" party.[1]

We must take every opportunity to explain that the state cannot be challenged except through revolutionary violence. This is its nature.

We must study revolutionary principles of organization as Lenin, Mao, and others have written about them, develop collective methods of work and decision-making, and fight anti-communism. . . .

It is part of our function as a revolutionary youth movement. . . .[2]

We're not communist inspired. We're communists. Corrupt, evil and it [our system of government] should be destroyed, in fact smashed.[3]

A disease afflicts America today—the disease of extremism. We see extremism of several varieties: left wing extremism (Old Left and New Left); right wing extremism (Minutemen); black extremism (Black Panther Party); white extremism (Ku Klux Klan and anti-Negro hate groups).[4] The mass media each day is filled with charges and countercharges, with accusations and counteraccusations, with one group bitterly assailing and denouncing another group. All too frequently these verbal assaults are reinforced with violent acts: murder, assault, arson, bombings.

Extremism poses a dangerous threat to the integrity of democratic institutions. Every American should be concerned. When individuals or organizations take the law into their own hands, they render a grave disservice to the concepts of civility and legality which hold our society together. The Greek historian Thucydides many years ago wrote about Athens:

Trust, the main element in high character, disappeared, laughed to scorn, and a convinced, suspicious hostility between man and man everywhere took its place.[5]

Our democratic society is held together by the law—that body of precedents, interpretations, statutes and pragmatic applications which theoretically provides balance, fair play and, to the best of human judgment, justice and dignity to the individual. The democratic process provides for change—but change within the framework of law. "The life of the law," said Justice Oliver Wendell Holmes, "has not been logic: it has been experience."[6] The law is a constantly evolving process which allows errors to be corrected, judgments to be reversed, and new knowledge to be incorporated.

Our society allows and encourages protest and dissent,[7] the opinions of the minority as well as the majority. Every citizen and group has the right (and duty) to point out the many imperfections in society and to take steps to have them corrected. But these steps must be within the democratic process—not in opposition to the law. Civil disobedience, violence and flouting of the law have no place in a democratic society. Free government is tragically weakened when individuals show disrespect for the law, engage in vigilante actions or endeavor to set one element of society against the other. When any group openly proclaims that our government should be overthrown by violence, the time has come to be concerned—and we as a nation have reached that point!

The quotations above[8] reflect the existence in America today of a small group of individuals, primarily college students, who are working for the overthrow of our democratic institutions. A scant two years ago, few Americans had heard of the Students for a Democratic Society (SDS). Today these initials are the trademarks of a movement whose members have developed into embittered, vociferous revolutionaries who have ignited many campus insurrections. They have nothing but contempt for this country's laws.

THE NEW EXTREMISTS

Here is a new type of extremism, an extremism all the more dangerous because it emanates from a group of young people (many of whom are highly trained academically) whose bitterness against their country is so intense that many of them want blindly to destroy without much (if any) thought as to what is to emerge from this destruction. Their ill will is guided more by whim than plan, more by cynical pessimism than hope for a better future, more by the spiteful revenge of the frustrated than by dedication to a noble cause. A type of youthful barbarism[9] seems to have taken hold of this minority (SDS being an extremely small minority of our college generation). Danger arises from the fact that these people in their hatred and anti-intellectualism, will cause great damage not only in the academic community but also in society as a whole.

Let us look briefly at the history and development of the SDS from a relatively obscure and mild campus group to an organization advocating Marxist revolutionary violence. Then let us discuss some of the controlling processes and techniques of the SDS mentality, *i.e.*, the processes which have severed allegiance to this country and to democratic principles.

The history of SDS is brief—spanning a scant seven years. Actually, SDS as we know it today was born at a convention of a mere handful of students meeting at Port Huron, Michigan, in June, 1962.[10] These were the days of the civil rights struggles in the South. Many SDS members and sympathizers had been active in voter registration drives and freedom demonstrations and rallies. Their enthusiasm ran high and it seemed that SDS was to be a militant protest group bent on achieving reforms.

The original ideological framework of the SDS was proclaimed in the so-called Port Huron Statement adopted at the founding convention. Though the statement dealt with many issues of the day, it was characterized by two key words—"participatory democracy"—meaning, among other things, that the institutions of American society should be more open for individual participation and citizens should be encouraged to develop a sense of personal responsibility and concern.

As a social system we seek the establishment of a democracy of individual participation, governed by two central aims: that the individual share in those social decisions determining the quality and direction of his life; that society be organized to encourage independence in men and provide the media for their common participation.[11]

The preamble of SDS's constitution [12] contains this sentence:

It [SDS] maintains a vision of a democratic society, where at all levels the people have control of the decisions which affect them and the resources on which they are dependent.

Following the Port Huron convention, SDS leaders returned to their respective campuses and embarked on an ambitious organizing campaign with the primary objective of "radicalizing" the students.[13] In 1964, the Free Speech Movement erupted at the University of California at Berkeley. Also, there were the Gulf of Tonkin incident (August, 1964) and the escalation of the Vietnam War. New Left leaders began channeling the movement into anti-war activities. The SDS actively participated in the growing student unrest and the demonstrations against

Footnotes at end of article.

the Vietnam War. However, SDS was not yet regarded as a revolutionary, violence-prone group.

In fact, SDS involved itself in community action projects. In the autumn of 1964, SDS reportedly was active in seven such projects.[14] The theory of these projects was to organize the residents of communities around the immediate issues which affected their lives, such as housing, jobs, education, voting rights, and opposition to the war in Vietnam.

The "participatory democracy" theme propounded by SDS brought many enthusiastic responses. "What is the strategy of social change implicit in the concept of participatory democracy?"[15] asks one commentator. He went on to say:

The concept has become important this past winter [1964–1965]. . . . [A] number of SDS leaders have left college and are seeking to apply the idea in Northern ghettoes.

The SNCC [Student Nonviolent Coordinating Committee] or SDS worker does not build a parallel institution to impose an ideology on it. He views himself as a catalyst, helping to create an environment which will help the local people to decide what they want.[16]

Enthusiastically, this commentator could say: "A new style of work, fusing politics and direct action into radical community organization, is emerging in both SDS and SNCC."[17]

But the whole concept of "participatory democracy"—meaning a sincere effort to strengthen democratic processes by increased citizen responsibility—was a mere shibboleth. The seeds of antidemocratic thought contained in the original Port Huron Statement began to sprout, and the SDS (starting around 1966–1967) changed rapidly and perceptibly. It became more militant, more hostile, more anti-everything.

A close observer noted the process:

A year ago SDS was discussing the possibility of a move "from protest to politics." Today, the discussion, and perhaps the decision, is "from protest to resistance." The distinction between politics and resistance is so great as to imply a qualitative change.[18]

This "qualitative change" was fundamental and foreboding: *The SDS had rejected the role of working as a left wing force within the traditional political structure of society.* "Most people in SDS," said one of its national leaders, "are not even vaguely sympathetic to the parliamentary game."[19] Instead, it had cast its lot on a policy of resistance.

No matter what America demands, it does not possess us. Whenever that demand comes—we resist.[20]

A resistance movement, based on the slogan, "Not with my life, you don't," is basic to helping people break out of their own prisons.

Many of us in SDS share a conviction that this is what has to happen. That we must resist, and that people must break free. None of us is sure we can win. All we can say is that there are other ways to lead our lives in the face of the obscenity of what American life is—and that we intend to live them that way.[21]

The dangerous Rubicon of violence had been crossed! Since 1967 the SDS has been involved in an ever-escalating tempo of radical activity. In the spring of 1968, SDS was a spearhead in the violent student demonstration at Columbia University. The 1968–1969 academic year saw SDS violence on many campuses, including the conviction of an SDS member at a Midwestern university under the federal sabotage statute[22] for attempting to bomb a Reserve Officers' Training Corps (ROTC) building on campus. In April, 1969, Cameron David Bishop, an SDS member, was placed on the Federal Bureau of Investigation's (FBI) "Ten Most Wanted" list of criminal fugitives. Bishop was charged with sabotage in the dynamiting of power transmission towers in Colorado.

Footnotes at end of article.

THE ROLE OF THE FBI

The primary responsibility for handling violations of the law in connection with student disruptions rests with local law enforcement. The FBI, as a federal investigative agency, does not possess police powers including guarding buildings and grounds or providing personal protection. The FBI's responsibility is primarily twofold: (1) collection of intelligence data for immediate dissemination to authorized individuals in the executive branch of the government; and (2) securing evidence of any violation of federal laws within its jurisdiction.

Reported incidents attributed to the New Left suggest a few of the more serious federal crimes which some extremists may be disposed to commit. One group of offenses would be directed toward crippling military programs, including such acts as (1) sabotage to ROTC facilities on campus, recruiting stations, and other military installations, or war material (18 USC §§ 2151–56 (1964)); (2) destruction, theft, or alteration of any Selective Service document or record (50 USC App § 462 (Supp IV, 1969); 18 USC § 1361 (1964)); (3) counseling evasion of the Selective Service Act (50 USC App § 462 (Supp IV, 1969)); (4) counseling insubordination or disloyalty of troops (18 USC § 2387(a) (1) (1964)); (5) harboring deserters from the Armed Forces (18 USC § 1381 (1964)); and (6) interference with government communications (18 USC § 1362 (1964)).

Another group of offenses would involve riot and civil disorder such as (1) traveling in interstate or foreign commerce to incite a riot or otherwise encourage, participate in, or commit any act of violence in a riot (18 USC § 2101(a)(1) (Supp IV, 1969)); (2) interfering with any fireman or law enforcement officer on official duty during a civil disorder in any way that obstructs or adversely affects interstate commerce (18 USC § 231(a)(3) (1964)); or (3) interference with the exercise of federally protected rights (18 USC § 245(b) (Supp IV, 1969)).

There are many other possibilities, of course. Among these are (1) advocating overthrow of government (18 USC § 2385 (1964)); (2) desecration of the flag of the United States (18 USC § 700 (1964)); (3) assaulting, resisting, or impeding certain officers of the federal government (18 USC § 111 (1964)); (4) assaulting certain foreign diplomatic and other official personnel (18 USC § 112 (1964)); and (5) threats against the President (18 USC § 871 (1964)).

At the SDS's 1968 national convention in Michigan, a workshop on sabotage and explosives was held. Here participants were told not only how to manufacture Molotov cocktails and incendiary devices but also how they could best be used against the "Establishment."

In December, 1968, the SDS's National Council approved a resolution entitled "Towards a Revolutionary Youth Movement." This resolution stated flatly:

The main task now is to begin moving beyond the limitations of struggle placed upon a student movement. We must realize our potential to reach out to new constituencies both on and off campus and build SDS into a youth movement that is revolutionary.[23]

This is where SDS is today[24]—a youth movement dedicated to a revolution of violence.

The SDS, however, is merely one group in the so-called New Left movement. This movement consists of many elements, for example, anarchists, communists (of various types), hippies, pacifists, and idealists. We must be extremely careful in differentiating and not lump all protesters into the extremist SDS category. Protest is a legitimate function of the university and society as a whole. This nation was built on protest. Many students and adults, for sincere reasons of their own, oppose the war in Vietnam, the draft, and university policies. They have a right to protest within the structure of free government. Great damage can be done by labeling these individuals as SDS members or guilty of advocating revolution. These non-SDSers are frequently manipulated by the extremist minorities, but they should not be summarily categorized as members or sympathizers of SDS.

WHAT THE SDS BELIEVES

Just what processes caused these tragic developments in the SDS? What factors molded the thinking and actions of this extremist minority of young people?

(1) *A basic and fundamental rejection of democratic institutions and values as archaic, irrelevant and meaningless.*

SDS literature is filled with comments contemptuous of democratic institutions and processes. "I don't plan to vote," said an SDSer. "It's no choice—there are three pigs running for president. [W]e denounce the electoral process, it's senseless."[25] "Vote Where Power Is. Our Power Is in the Street."[26] proclaimed an SDS publication. "While courts are still available to us as a means of defense, we should use them to the fullest extent, using the opportunity each time we appear in court to make clear the political nature of the police, courts, and attacks on individuals,"[27] proclaims the Revolutionary Youth Movement II. The law enforcement officer is called a "pig." SDS members taunt, and hurl bitter obscenities against the police officer. In a recent interview SDS leaders were asked:

Question: "How would you describe the government and the structure of this country?"

Answer: "Capitalist, pig, power structure. That's what it is."

Question: "Would you call it a democracy at all?"

Answer: "No."[28]

The whole history of Judaic-Christian culture is ridiculed, mocked and scorned. Out of this rejection of a belief in democratic values, grow dangerous processes.

(2) *Violence as the type of leadership required to effect change in the United States.*

If an individual rejects democratic values, then violence becomes an acceptable means of action. The hatred of the "Establishment" (meaning the government, the military, private industry, and the educational system) is so intense that *any* means of attack is justified.

Until the student is willing to destroy totally and joyfully those repressive structures—to attack and destroy the bourgeois social order—his student movement will always be just that—never truly revolutionary. There can be no liberated university in a dead society. All or nothing. The buildings are yours for the burning, for until they are destroyed, along with civilization and its death, you will not live.

The revolutionary project should be clear to the student—destruction of the university . . . unless the student is capable of destruction as creation, there will be no revolutionary transformation.[29]

To the SDS member, a key feature of this violence is guerrilla warfare. "We are working to build a guerrilla force in an urban environment."[30] He looks upon himself as an extremely small minority in a vast sea of hostile "imperialism," impotent, inconsequential and weak. Revolutionary power can be generated in his eyes, therefore, only through guerrilla tactics.[31] No wonder the guerrilla, the individual who defied the Establishment and fought to overthrow existing society, is a New Left and SDS hero.[32] Very revealing, a guerrilla warfare is a topic of

study in the so-called free universities.[33] Here is a description of one course from a free university catalogue:

URBAN GUERRILLA WARFARE

We will study the aims and techniques of guerrilla warfare in an urban setting: organization, training, propaganda, intelligence and counterintelligence, sabotage, and civilian resistance. We will do this through the use of theory texts, practical manuals, and war games.[34]

The whole concept of violence was tragically emphasized in a recent issue of SDS's *New Left Notes*. Under the caption, "Bring the War Home!," page one carried a full page photograph of a little boy with a big smile placing an object on a railroad track. The description read: "With a defiant smile, 5-year-old . . . shows how he placed a 25-pound concrete slab on the tracks and wrecked a passenger train." [35]

(3) This violence is justified as moral, honorable, the thing to do. This gives SDS violence and potential violence a pseudo-religious fervor, a seeming moral imperative leading to the danger that the uncritical observer may consider the perpetrator as a martyr rather than a criminal.

In one attempted bombing by an SDSer, the culprit, who was apprehended and convicted, said he did not really want to injure any person. He wanted to destroy this ROTC building, he said, as a symbolic act, as his personal protest against the Establishment.

This SDS attitude is reminiscent of previous anarchist criminal activities in this country. Emma Goldman, the well known anarchist leader, has told how she and Alexander Berkman, another anarchist, plotted the murder of a key American industrial leader who, in their eyes, was symbolic of the hated Establishment. Berkman would personally attempt to kill him—not that Berkman had a personal grievance against this man, but that this individual was a "symbol of wealth and power." Berkman would gain nothing personally—nor did he expect anything.[36] To these anarchists, the deed was justified because it would not only shock the Establishment but also would propagate their message to the whole nation. The "message" was as important as the deed. It was for the cause! Goldman adds:

"Our end was the sacred cause of the oppressed and exploited people. It was for them that we were going to give our lives. What if a few should have to perish?—the many would be made free and could live in beauty and in comfort. Yes, the end in this case justified the means." [37]

Some SDS leaders have talked about "the politics of guilt"—meaning that, in their opinion, Americans have troubled and guilty consciences about injustices and inequities in their society. To the hard core SDS members, a policy of violent confrontation (including campus insurrections, bombings and arson) hopefully will bring public sympathy and approval (even if silent).[38] Moreover, it may stir up interest in their cause and even prevent their prosecution later on criminal charges!

As a nation, we must recognize that this style of anarchist violence is a violation of our laws and should be treated accordingly.

(4) *Disaffection from democratic values and a growing tendency toward violence have led to an increasing SDS emphasis on revolution, meaning a qualitative and fundamental change in the economic, political, social and cultural system of this country.*

Not long ago an observer of SDS activities commented that the SDS's attitude toward specific issues, such as opposition to the ROTC, the war in Vietnam and the university system, had become secondary to a bigger, broader, more important goal, namely, revolution.

Today, the SDS is calling into question the entire structure of American society and pronouncing it unfit for survival. The system as a whole, it says, is the enemy, not specific injustices and weaknesses. Accordingly, what is needed is a total purging of what is regarded as "evil," "corrupt," and "degenerate." Apparently, there is to be no compromise, no selection of what is good or bad. The entire apparatus is to be discarded.

Ideologically we began to grasp the idea that the system as a whole was the enemy; tactically we began to try to attack the system as a whole system. We gradually abandoned the notion that if we fought and fought for reforms we might succeed in reforming the system away or that consciousness would somehow arise out of enough local fights so eventually the local rent-strike group would spring into action as a guerrilla force.[39]

Gone are the days of "sewer socialism,"[40] a term used by the SDS to mean reformist efforts on a local basis to improve society. The anti-war demonstrations changed this attitude.

Here in the United States those demonstrations set the terms for the struggle and gave the movement a push in gutsiness and in the targets it chose to attack. Remember the Pentagon and the nearly simultaneous West Coast Oakland Induction Center demonstrations. The slogans, targets, and militancy were almost totally new. We moved from individual acts of moral protest—remember the spring before the draft card burning had been considered the very limit of the movement—to massive attacks on the centers of military power in this country.[41]

The march on the Pentagon (October, 1967), according to the SDS, enabled the Movement to reach out "to millions where our organizing in the past could only reach thousands. . . . The demonstrations had a double effect: They spread the word that it was legitimate to fight and helped create a culture of resistance in which GIs revolted, white working-class gangs turned political . . . ." [42]

The outcome is the current effort by the SDS to develop what is called a revolutionary youth movement (RYM). An SDS faction, Weatherman, issued a position paper which talks about a cadre-type, clandestine organization of revolutionaries under the discipline of centralized leadership. This organization would be buttressed by a revolutionary mass movement. "The most important task for us toward making the revolution . . . is the creation of a mass revolutionary movement, without which a clandestine revolutionary party will be impossible." [43]

Can SDS, with its factionalism and hatred of discipline, create a revolutionary organization? Without it, the revolution cannot be brought about. The SDS militants know that discipline, organization and trained leadership are needed. The very fact that so many SDSers are talking seriously about revolution makes the future one to watch closely.

(5) *"The new left as it has been known during this decade disappeared during the Chicago SDS convention. It is being replaced by Marxism-Leninism."* [44]

This diagnosis by the *Guardian*, the "independent radical newsweekly" which reports New Left activities, identifies a process inherent in SDS even from its early days. SDS (including its many factions) is today Marxist-Leninist oriented.

Factions

A loosely structured group, SDS has always been an ideological potpourri, including several varieties of Marxist positions: Trotskyites (Socialist Workers Party and its youth group, the Young Socialist Alliance), pro-Moscow communists of the Communist Party, USA, and its youth affiliate, the W.E.B. DuBois Clubs, and the Pro-Red Chinese Progressive Labor Party. As time progressed, the Progressive Labor Party (PLP) became extremely strong in the SDS, resulting in a massive factional struggle at the June, 1969, national convention. The PLP faction was expelled and exists today as a rival group claiming that it is the true SDS.[45]

The two National Office factions (Weatherman and RYM II) and the Progressive Labor Party group have both similarities and differences. Because of conflicting claims the task of distinguishing their positions becomes difficult. The *Guardian* of June 28, 1969, however, reporting on SDS's National Convention, sets forth a brief summary of the various viewpoints.

RYM, as the concept is known, seeks to convert SDS into a mass revolutionary organization of youth grounded in Marxism-Leninism and Mao Tse-tung's thought. . . . [T]he RYM group split into two factions known as "weatherman" and RYM 2, based on names of papers submitted to the convention by the two groups.

Both factions agreed on many points, but came to a parting of ways due to different ideas on such questions as black liberation, women's liberation, nationalism, the white working class and action tactics.

Weatherman . . . tends to deny the leading role of the working class in revolutionary struggle. It has been charged with adventurism both for its seeming indifference to white workers and for a shock-brigade action strategy. . . .

Blacks in the U.S. are viewed [by] weatherman as a separate colonized nation within the oppressor country. National liberation for blacks in the oppressor country, it is maintained, cannot be accomplished until capitalism is overthrown. On women's liberation, the weatherman tendency holds that women should be organized around anti-imperialist, antiracist struggles.

RYM 2 . . . sees the proletariat as being the main force in the revolution, while at this stage, revolutionary blacks at home and liberation struggles abroad play the leading role. Blacks, women and students, RYM 2 holds, play a key role in raising the consciousness of the working class by struggling for their own liberation.

Blacks in the U.S. are seen by RYM 2 as a separate nation, but because of the dual position of black workers—oppressed as blacks, superexploited as workers—"their fight for the right of self-determination is a precondition for any kind of socialism in this country." This struggle for liberation, along with women's struggle for liberation from male supremacy and the struggles of youth, is seen as a means of developing proletarian unity and revolution.[46]

As to the PLP (here called PL) the *Guardian* states:

PL, which considers itself the vanguard of the proletarian struggle, sees the working class as the key to revolution. While supporting self-determination, PL insists that national liberation struggles, including the black struggle in the U.S. must have a class character. Juxtaposed to the Black Panther Party slogan, "Power to the people," PL demands "Power to the workers." PL says student actions must be in the objective interest of the working class. . . . Women are seen as superexploited workers, victims of the ruling class—not as being oppressed by men as well." [47]

These groups differ also on tactics (how to bring about the revolution) as well as an overall strategy (the revolution itself). The Weatherman faction is the most militant, believing that direct, forcible, in-the-street guerrilla incidents must be pursued. RYM II, though not disavowing violence, is less militant. Guerrilla-violent tactics, RYM II leaders feel, are self-defeating and will probably alienate both potential recruits and public opinion. RYM II stresses study and

Footnotes at end of article.

education with an emphasis on the classical definition of the working class as the correct means to attain revolution. The PLP follows more RYM's tactics than those of Weatherman. The PLP, basing its position on the historic teachings of Marxism-Leninism, is not opposed in principle to the use of force. However, tactically speaking, it feels such extremist tactics at the present time would do the movement more harm than good.

Perhaps the SDS is the victim of history—that in attempting to bring about a revolution against "capitalist" society, it has partially succumbed to the Marxist-Leninist analysis of "imperialist" society.[48] Marxist terminology, concepts and thought processes permeate SDS revolutionary literature. In fact, the SDS, despite the purported intellectual prowess of its leadership, has not developed on its own an original, self-thought-out revolutionary analysis of capitalist society which would be independent of the historic. Marxist viewpoint! Rather, the SDS and other New Leftists, who consider themselves "youthful" and "modern," have become prisoners of a nineteenth century doctrine!

USING THE "WORKING CLASS"

A key issue pertaining to Marxist doctrine is SDS's efforts to make contact with the "working class," the "industrial proletariat" whom Marx considered as the class destined to carry out the revolution. Can students alone bring about a revolution? Most SDS thinking (especially the PLP faction) says "no." Students must combine with "workers." In the summer of 1969, the SDS instituted a highly publicized "Work In" program[49] whereby SDS members were encouraged to secure jobs in private industry for the purpose of making personal contact with workers. In these contacts they were to attempt to "radicalize" the workers, that is, to convince them of SDS's position on current issues.

There is an abhorrence in the SDS to the Communist Party, USA, which is considered "bureaucratic," "old-fashioned" and "irrelevant." Communist Party, USA, leaders and members have been active in SDS activities, but its leadership is skeptical and critical of many SDS policies.[50] For that reason, some top SDS leaders[51] have publicly identified themselves as revolutionary communists with a small "c," that is, they claim they owe allegiance to the principles of Marxism-Leninism but not to either the Communist Party, USA, or its mentor, the Soviet Union.[52]

Actually, however, all SDS factions are Marxist—with the Marxist contempt for law, the dignity of the individual, and the rights of others. The tragedy of the SDS is that a group of young people, some with personal idealism and sincerity, have "jumped the tracks." They have left the mainstream of the democratic processes which have given life and meaning to the American experiment of government.

These students, many from economically affluent and well-educated families, have actually corrupted idealism and sullied the historic academic search for the truth. Many of their errors come from a shallow intellectualism, a lack of knowledge of history, and an arrogant self-righteousness which leads them to believe they alone know the truth. Dialogue, reason and understanding are scorned as contemptuous bourgeois values. "Non-negotiable demands," pompous generalizations, the simplification of complex issues into irrelevant and pious slogans—all these have propelled the SDS into the wasteland of nihilism, revolution and destruction.

Moreover, in the process they have lost their independence as either thinkers or custodians of the hopes of the future. Why? Because they have been captured by an antiquated totalitarian system known as Marxism-Leninism. In all their talk about being avant-garde, advanced thinkers, the bringers of a "new day," SDS leaders are voices from the past who talk in terms of violence, brute power and destruction. These are the age-old techniques of the conqueror and the criminal. In the name of dissent, SDS attempts to stifle dissent. In the name of an alleged pursuit of "justice," SDS is willing to jeopardize and undermine the accomplishments, values and welfare of a society which today is providing a higher standard of living and greater personal freedoms to its citizens than any society in history.

SOCIETY'S OBLIGATION

Our society has an obligation to face up to the realities of SDS extremism.

First, we must remember that SDS tactics represent a minority sentiment on our college campuses. The 1960's have been an age of protest, of questioning, of asking vital questions about our society. Our colleges have produced an inquiring generation, young people who are sincerely and deeply concerned about problems which arise from a complex, industrialized, urban society. We want this questioning process to continue. We should be thankful for the sophisticated, intelligent, poised generation of young people now coming of age.

Second, adults have a special obligation to establish and maintain a dialogue with the rising generation. All too frequently we in the FBI find a complete lack of communication between parents and young people about the really serious issues of life. Yes, there is talk about a new car or a vacation trip, but amazingly little about some of the basic problems which concern young people today (the war in Vietnam, the draft, race relations, poverty). Often a parent and a child violently disagree—and each goes his own way, preventing the mutual interchange of opinions. The generation gap is, to a large extent, a communication gap.

Third, in discussing the SDS (or any other type of extremism) we must be careful of our facts and not indiscriminately label those whom we do not personally like or whose opinions are unpopular as extremists. We must remember that many non-SDS, moderate students are also protesting about key issues of the day. We should not label these legitimate protests as "SDS extremism" and therefore dismiss them from consideration. The genuine, hard core radical on campus must be distinguished from the legitimate protester.

Fourth, we must remember that the way to combat extremism is not by counterextremism. In other words, one of the dangers of SDS extremism on campuses is that it will engender antidemocratic vigilante and illegal actions against this minority. These extremists can and must be handled under due process of law. There is no room either on or off campus for an antidemocratic backlash.

Fifth, society must take seriously its own weaknesses and work to remedy them, promptly, effectively and fairly. Young people very rightfully hate hypocrisy and sham. The best way to counteract extremism of any kind is through a healthy society with self-creative energies working for constant improvement.

Sixth, the legal profession has a special obligation. It simply cannot remain quiescent about the SDS's stance toward our laws and democratic society. Students in law school, in particular, have an excellent opportunity, through campus media and discussions, to emphasize the sanctity of the law and to explain that violence ultimately is self-defeating. If lawyers do not protest extremist violations of the law, who else is there to defend the law?

Theodore Roosevelt said: "Much has been given us, and much will rightfully be expected from us. We have duties to others and duties to ourselves; and we can shirk neither."[53]

America must face up to the challenge of extremism—lest, step by step, the foundations of the law are eroded to the detriment of all of us. No cement more durable to hold together a free society has ever been found than the law and all the majesty it represents.

FOOTNOTES

[1] You Don't Need a Weatherman to Know Which Way the Wind Blows, New Left Notes, June 18, 1969, at 3, col. 1 (emphasis added).

[2] Revolutionary Youth Movement II, New Left Notes, July 8, 1969, at 5, col. 1. The Students for a Democratic Society (SDS) met in national convention in June, 1969, in Chicago, Illinois. Intense factionalism erupted, and the organization split into two major groups each claiming to be the true SDS. One group is generally known as the National Office faction, the other the Progressive Labor Party. The National Office group, in turn is beset by factionalism and differing viewpoints. One such subgroup is known as the Weatherman group, the other the Revolutionary Youth Movement II, based on the two position papers issued.

[3] Interview with Mark Rudd, SDS National Secretary, on Television Station WJW, Cleveland, Ohio, Aug. 30, 1969.

[4] The Ku Klux Klan has frequently abused the rights of others through extremist and terrorist violence. The brutal murders of Lt. Col. Lemuel A. Penn in Georgia (July, 1964) and of three civil rights workers in Mississippi (June, 1964) are flagrant examples of Klan violence. Extremism denies the legal rights of others (such as the right of assembly, free speech, travel, vote, and the press). On May 2, 1967, a group of Black Panther Party members armed with rifles, shotguns, and handguns invaded the chamber of the California State Assembly while that body was in session to protest pending gun legislation. Obviously, here was an attempt to intimidate the legislative process. In October, 1969, groups of SDS members descended on Chicago, engaging in an orgy of vandalism. These types of hooliganism are a threat to the operation of democratic institutions.

[7] Legitimate protest encompasses a wide variety of choices and techniques, such as writing or visiting your congressman or other elected officials, letters to the editors of newspapers, petitions to legislative or executive bodies, and peaceful rallies and demonstrations. Legitimate protest means, basically, citizens expressing their opinions and views within the framework of the law. Our news media reflect constantly instances of how legitimate protest brings changes in society—ranging all the way from obtaining new traffic signs and playgrounds to changes in national policy. A great strength of our society is its ability to adjust to new problems, issues, and challenges through orderly and lawful change.

[8] See text accompanying notes 1 & 2 supra.

[9] A vivid contrast to SDS extremism is shown by the many examples of student groups which have peacefully sought the correction of alleged wrongs in society and achieved results. Sometimes these groups are interested in strictly local problems (traffic control, local elections, housing). Other times, the campus group is part of a larger off-campus organization (political, economic, cultural).

[10] SDS was originally the youth affiliate of the League for Industrial Democracy. The two organizations, however, parted in 1965.

[12] The full text of SDS's constitution can be found in New Left Notes, June 18, 1969, at 2.

[13] SDS is the most militant of New Left groups. From its early days, SDS was basically an unstructured type of organization with little internal discipline (though this is now changing with some elements in SDS trying to develop a more disciplined cadre type of organization). SDS is held together primarily by national secretaries who travel

extensively. There are an estimated 200 to 250 chapters, varying in size. These chapters are autonomous, doing "their own thing." Very little, if any, control can be exercised by the national headquarters (in Chicago) over these chapters. Membership is difficult to determine because of the loosely knit structure. SDS claims some 40,000 members. In addition, on key issues SDS is able to mobilize the sympathetic support of a large number of non-SDS members, especially on anti-Vietnam and anti-draft issues. The moderate students, however, almost invariably drop away when SDS engages in confrontation and violent tactics. Since the June, 1969, national convention, SDS has become fractionalized, so it is difficult to speak of unitary and national policies.

[24] In October, 1969, the Weatherman faction of the SDS staged a series of violent street demonstrations in Chicago. "Radical members of Students for a Democratic Society," read a news account, "wearing helmets and carrying clubs, ran through this city's near North Side last night, breaking windows, damaging cars and intermittently battling with the police." Chicago Police Battle Radicals, Washington Evening Star, Oct. 9, 1969, at 1, col. 8. The young people who used clubs, chains, and pipes and as a tactic would suddenly break out of a peaceful march into small groups, yelling and throwing stones at anything in sight (so-called "guerrilla tactics").

These demonstrations were the result of careful advance planning by Weatherman. Members were encouraged to come to Chicago for violent confrontations. For example, in the September 20, 1969, issue of New Left Notes, an article was carried entitled: The Time is right . . . for fighting in the street. This article stated: "It is a war in which we must fight. We must open up another front against US imperialism by waging a thousand struggles in the schools, the streets, the army, and on the job, and in Chicago: October 8–11." New Left Notes, Sept. 20, 1969, at 6, col. 2. Another heading read, "The time is right . . . for violent revolution." Id. at 10–11. Still another article dealt with how to dress for the violent confrontation ("Wear a motorcycle helmet or surplus army helmet." "Wear protective clothing. Wear hard shoes, never wear sandals! Wear shirts and jackets with tight cuffs and high collars for protection against gas." Id. at 14) and how to behave medically ("Don't panic if you see someone with blood streaming from the head." "Never try to remove a bullet that is still in the body." "Get a tetanus shot." "If you do go to a hospital, treat the doctors and nurses there as if they were pigs." id.).

[28] Interview with Mark Rudd, SDS National Secretary, and two other SDS leaders, on Television Station WJW, Cleveland, Ohio, Aug. 30, 1969.

The transformation of SDS into a more violent posture has caused many moderates and genuine liberals to drop out of the movement. A New Leftist paper comments: "Middle-class liberals, who once predominated in the organized antiwar movement by sheer numbers and political influence, are now a minority, though the decline in influence has taken over-long. The 'hard-core' radicals of last August in Chicago and January in Washington are now ascendant, not simply relative to the liberal shambles but absolutely, in terms of numbers and influence." Viewpoint, Guardian (Independent Radical Newsweekly), April 12, 1969, at 12, col. 1.

[29] Destructuring of SDS 7 (1968) (Leaflet distributed at SDS National Convention, June 9–15, 1968, East Lansing, Mich.).

[30] Hofmann, The New Left Turns to Mood of Violence in Place of Protest, N.Y. Times, May 7, 1967, § 1, at 1, col. 3 quoting G. Calvert.

[31] Here are the tactics of Weatherman as personified in the violent confrontations which took place in Chicago in October, 1969. Weatherman is gambling that guerrilla tactics, on the street violence (as in Chicago), will pay it high dividends in the radical left extremist movement: (1) by attracting recruits and validating militant street warfare as the best means of revolutionary action, and (2) by providing on the spot training for the building of a cadre revolutionary organizaton. Will it succeed? Hopefully, this militant Weatherman approach will be self-defeating, that more moderate student groups will arise, and that democratic methods of protest will prevail. Much will depend on the students on campus themselves.

[32] Fidel Castro, Ché Guevara, Ho Chi Minh, Mao Tse-tung are the tactical-ideological heroes of the New Left. SDS and other New Left literature carries extensive and favorable comments about them (including quotes from their writings and speeches). The Guardian, for example, devoted considerable space to what were reported to be unpublished documents from the Bolivian notebooks of Ché Guevara. These dealt with Ché's plan for guerrilla warfare. Urban Guerrilla warfare. Che's Plan, Guardian (Independent Radical Newsweekly), July 20, 1968, at 13.

[33] These are a haphazard assortment of classes on a variety of topics relating to the radical movement open to students (and others.) Instructors may be faculty members, students or off campus personalities. Classes are largely freewheeling discussions and have no official connection with the university.

[37] Id. at 88.

[38] SDS has had both successes and failures. At some campuses during the 1968–1969 academic year, SDS was able to mobilize successfully a large number of students on certain issues. Sometimes SDS exploited sensitive issues on the campus (as dormitory regulations, the unpopularity of some administrative decisions on personnel, a failure of communications between the administration and students) of deep concern to many students. In such instance, SDS was able to gain the support temporarily of moderate students, students who were interested exclusively in campus reform, not disruption or revolution. Failures of SDS have been a growing extremism, an inability to maintain moderate support, and difficulty in attracting non-college (working) youth.

[39] Look At It: America 1969, New Left Notes, Aug. 15, 1969, at 9, col. 3.

[40] SDS's exact words in speaking about "sewer socialism" are: "We had, in fact, overcome localism, provincialism, and tendency for 'sewer socialism'—the term for those in the era of Socialist organizing before the First World War who wanted to concentrate on local issues, prove that socialists could deliver street lights faster than the bosses could, and to build socialism in one city." Id. at 12, col. 2.

[44] Viewpoint, Guardian (Independent Radical Newsweekly). July 5, 1969, at 12, col. 2.

[45] The "PLP problem" had been brewing for a considerable period inside SDS. In a pamphlet on why SDS expelled PLP, published by the National Office of SDS, these comments are found: "SDS's differences with PLP were not differences 'within the movement' or 'within SDS.' They are principled differences on what the movement is about, where and what the international struggle is about, and who the sides of it are. Since the PLP opposes revolutionary nationalism on the part of the colonized peoples; opposes the self-determination of black people within the United States . . . then they are in no sense a part of the people's movement, but in fact serve the enemy of the people." New Left Notes, Sept. 12, 1969, at 2, col. 3. In this connection, the Guardian, reporting on the 1969 national convention, talks about a "virtual ultimatum" from the Black Panther Party (and some other groups) demanding "that SDS purge itself of tendencies opposing their line on self-determination of oppressed peoples (including the right to secession). While insisting that it supports self-determination, PL[P] has stated that 'all nationalism is reactionary,' including the nationalism of oppressed minorities within the oppressor nation." SDS ousts PLP, Guardian (Independent Radical Newsweekly), June 28, 1969, at 3, col. 3.

In addition to these differences, there were problems of personal power (i.e., which leaders were to dominate). Actually, the voting strength of PLP was strong, and anti-PLP elements feared that PLP might even take over.

[46] SDS ousts PLP, Guardian (Independent Radical Newsweekly), June 28, 1969, at 3, col. 3, 11, col. 1.

[47] Id. at 11, col. 1.

[48] SDS's Marxism is not yet an exact replica of the historic doctrines of communism. Marxism-Leninism, for examples, does vaguely paint a future society after the revolution which, it is claimed, will bring a more abundant, just and harmonious life. The SDS, however, reflects little interest or concern about any society which would come after the revolution it proposes to bring about. Its main purpose is to destroy what now exists. In this aspect, SDS is closer to anarchism than Marxism. SDS, as an activist group, appears to have adopted those concepts, principles, and slogans of Marxism-Leninism which can best be used as destructive weapons against the "Establishment"—as "class struggle," "dictatorship of the proletariat," "imperialism." "[W]e live in a period when capitalism has developed into its highest stage—worldwide imperialism—and that because of this development the class struggle has become a worldwide struggle often manifesting itself in people's wars." Education Secretary's Report, The Boston Strangler: A Paper Tiger, New Left Notes, July 8, 1969, at 3, col. 1.

SDS talks about the need to wage armed struggles for liberation and overthrowing the capitalist order. The RYM II statement says: "In order for the U.S. proletariat to play its historic role, it must be led by a party of revolutionaries, organized on the basis of democratic centralism, guided by the science of the proletariat, the teachings of Marx, Engels, Lenin, Stalin and Mao. The party must be able to apply these teachings to the specific conditions of the U.S., in order to import class consciousness into the spon-

taneous struggles of the proletariat." Revolutionary Youth Movement II, New Left Notes, July 8, 1969, at 5, col. 4.

[49] The SDS circulated a "Work-In Organizers Manual" designed to aid SDSers in obtaining jobs. The Manual sets forth data on how to find a job, how to dress, what to say and not to say, and how to behave. "Try to make a few friends among the workers that might last beyond the summer. Two or three—or even one. And try to get their addresses and phone numbers before you leave the job. . . . Join the bowling league or the baseball team. Avoid running home at the end of the day to the 'safe' company of your old friends and political buddies. . . . Go to the bar or whatever hang-out they go to after work. . . . If you can't hold your liquor, don't make a fool of yourself trying to be what you think is 'one of the boys.' Get to work early—sit around and talk. This is very much worth the extra effort." Students for a Democratic Society, Work-In Organizers Manual 4 (1969). Actually, this Manual was originally prepared (1967) by the Progressive Labor Party and distributed as "The Vietnam Work-In Organizer's Manual." PLP elements in SDS took the original manual, put on a new cover, and introduced it as an SDS Work-In guide.

[50] See the articles by Bettina Aptheker, well-known leader of the Communist Party, USA, in the Party's theoretical journal, for an analysis of the Communist Party's view of the SDS and the New Left. Aptheker, The Student Rebellion, Part I, 48 Pol. Aff., Mar. 1969, at 15; Aptheker, The Student Rebellion, Part II, 48 Pol. Aff., April, 1969, at 12. Aptheker welcomes the "student rebellion," but deplores what she calls "petty-bourgeois radicalism" in the movement. She feels the New Left does not have a correct analysis of Marxism-Leninism and in reality is merely "playing" with revolution. In the Party's eyes, revolution is a "serious business" and must be prepared for through careful study and planning. Aptheker's conclusion is that there "is an urgent need for ideological and political leadership from the Communist Party and from a Marxist-Leninist youth organization." Aptheker, The Student Rebellion, Part II, 48 Pol. Aff., April, 1969, at 12, 59.

[51] Bernardine Dohrn and Mike Klonsky, SDS leaders, were quoted as calling themselves "revolutionary communists" in Guardian (Independent Radical Newsweekly), June 22, 1968, at 4, col. 1.

[52] Bettina Aptheker in her articles in Political Affairs is worried about the anti-Communist Party and anti-Soviet sentiment in the New Left. See note 50 supra.

FINDING DIGNITY IN WORK

Mr. WILLIAMS of New Jersey. Mr. President, John W. Edelman has been a long-time friend of the elderly through his years as president of the National Council of Senior Citizens. However, his work with the National Council of Senior Citizens represented a second career for a man who had been previously a tireless worker in the trade union movement and a pioneer in advancing Federal legislation to provide a decent way of life for millions of union members, most notably as legislative representative for the Textile Worker's Union.

A man who "retires" to a second career can never really stop being productive. And Mr. Edelman, although he has "retired" from his post as president of National Council of Senior Citizens—he now holds the title of President Emeritus—is still working diligently to advance the cause of older Americans.

As guest columnist for Theodor Schuchat's syndicated column which appears in the North American Newspaper Alliance papers, Mr. Edelman has written a knowledgeable review of a new and important book entitled "Toward Industrial Gerontology." As the title implies, the book is primarily concerned with the older worker, preparation for retirement and retirement income. Mr. Edelman, with his background in aging and in industry, is eminently qualified to review this publication. "Toward Industrial Gerontology" deserves careful attention as a publication at a time when "retirement" is occurring earlier and earlier in life. With the advent of the "younger" or middle-aged retiree, the problems of the retirement years will become increasingly complex. The publication has been edited by Dr. Harold Sheppard, well-known social scientist with the Upjohn Institute for Employment Research who also lent his considerable expertise to the Senate Committee on Aging's year-long study of "Economics of Aging: Toward a Full Share in Abundance" during 1969.

Mr. President, I ask unanimous consent that Mr. Edelman's review, entitled "Finding Dignity in Work," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

RETIREMENT AND YOU—FINDING DIGNITY IN WORK

(By John W. Edelman)

(NOTE.—John W. Edelman of Arlington, Va., is an expert on retirement. After retiring from a lifetime as a labor organizer and Washington spokesman, he spent a fruitful second career as head of the million-member National Council of Senior Citizens, of which he is now president emeritus. As guest columnist this week, he reviews an interesting new book.)

I assume that you react more or less instinctively, as I do, against a technical term such as "industrial gerontology".

I rationalize my reaction against this sort of lingo simply because most of the stuff I have read in recent years while seeking enlightenment on the problems of the elderly, if written under the heading of gerontology, has been almost invariably stodgy, pretentious, or muddy in relation to the immediate needs and interests of older persons. So, I tend to ignore anything that is labeled "gerontology".

But now comes along a smallish book, a symposium edited by Harold Sheppard and entitled "Toward Industrial Gerontology". The book is from the Schenkman Publishing Company, Cambridge, Mass. 02138, and the price is $7.95.

Hal Sheppard, of all the people I have worked with in recent years—either in relation to the problems of aging or, earlier, on matters concerning unemployment, manpower and so forth—has one of the liveliest and most penetrating minds I have encountered. He is fully qualified as an expert, a social scientist and a scholar.

A few years ago, Sheppard was with the U.S. Area Development Administration, where he immersed himself in the complexities of disappearing or shrinking industries and economically depressed areas, with their attendant human problems.

Later, when I retired and became active with the National Council of Senior Citizens, I met Hal at the National Council of the Aging, at the Senate Special Committee on Aging, and the W. E. Upjohn Institute for Employment Research.

One of the chapters in Sheppard's collection, written by Norman Sprague, defines the term "industrial gerontology" as follows:

"Industrial Gerontology is concerned with the aptitude testing of the middle-aged and older worker, with job counseling, vocational training, and placement. It is concerned with job assignment, reassignment, retention, and redesign. It is concerned with the transition from employment to retirement and with industrial retirement itself. It is concerned with retirement preparation, retirement criteria, and retirement income, with public and private pension programs."

This volume contains 14 papers on various aspects of retirement by experts (most seem to warrant the title, though a few seem merely addicted to the use of difficult verbiage) at seminars sponsored by the National Council on the Aging.

A chapter by Dr. Sidney A. Fine, on "Older Workers in Pursuit of New Careers," I found most interesting. He writes, "(Seniors) may be tired and frustrated with the work-life they have experienced and thus may wish to make a change from situations of depersonalization and alienation that often characterize modern industry . . . to a situation involving some interest in and concern about people.

"It is as though the older worker suddenly realizes that half his life has gone and all there is to show for it are some material things."

There is, he says, an urge to do something worthwhile, but the author points out that, as a rule, a drastic cut in salary is the price paid by skilled workers taking jobs in social service agencies.

I recall a Congressional hearing a few years ago on the subject of shrinking employment in the textile industry. A famous carpet manufacturer in New York State had moved south, leaving his aging work force stranded.

One small group of former carpetmakers who testified told about being hired as attendants at an institution for delinquent children which had been at the point of shutting down due to inability to find suitable help.

One of the witnesses, a man in his sixties, well-preserved and forceful, told the Senator who was presiding that there was only one drawback to this new career, which he enjoyed greatly otherwise and regarded with pride.

He said he found it most painful to face his former fellow-workers downtown on a Saturday night because they, after several years of layoff, were still idle and deteriorating for lack of anything to do.

WHY REPLACE THE B–52?

Mr. GOLDWATER. Mr. President, the argument against development of the B–1 is usually introduced by the statement, "now I'm not against bombers, they are useful in a mixed force deterrent, but the B–52 is doing a good job and I've been told that it will last for a long time to come—maybe as long as we still have a need for bombers." This argument infers that the validity of the TRIAD force is tenuous at best and the need for a manned bomber could abruptly disappear at some time in the foreseeable future. A set of assumed circumstances which could lead to such a conclusion is difficult to imagine.

That the manned bomber adds visibility, credibility, and unique flexibility to our strategic nuclear deterrent force in an assured destruction role is unquestionable. The continuing need for a manned bomber for this and other tasks

is implicit in President Nixon's Foreign Policy Report to Congress in February 1970, wherein he stated:

. . . The overriding purpose of our strategic posture is political and defensive: to deny other countries the ability to impose their will on the United States and its allies under the weight of strategic military superiority. We must insure that all potential aggressors see unacceptable risks in contemplating a nuclear attack, or nuclear blackmail, or acts which could escalate to strategic nuclear war, such as Soviet conventional attack on Europe.

Inherent in this broader purpose of our strategic forces is a capability to conduct a limited, controlled nuclear exchange, which hopefully could be terminated before it escalates to an all-out exchange. This task requires weapon systems capable of avoiding undesirable damage and which contribute to careful conflict management during periods of tension and hostilities short of total retaliatory war—and which have capabilities which make a counterforce option feasible at various levels of intensity. Such capabilities can best be provided by the manned bomber because it, alone among the TRIAD force elements, offers a practicable and complete control of weapons all the way to the target and the ability to withhold decision to expend to within a few seconds of weapon detonation. Missiles, once launched, are irrevocably committed and they impose on the opponent a very compressed reaction time—both factors which serve to invite uncontrolled escalation. Bombers, on the other hand, can be launched and recalled. They can attack designated targets with greater precision—that is, there is less chance of their going astray and much higher confidence that they will accomplish their specific destruction task and effect only the destruction desired—and they provide the opponent with much more time to consider his response, or to react in a deliberate, carefully controlled manner. The manned bomber is, in fact, the only strategic weapon system we have that can attack any target anywhere in the world from the Continental United States with either nuclear or iron bombs, and that offers national leaders strategic options short of spasm nuclear war.

Since there is no rational reason to believe that national security requirements, outlined by the President in the statement quoted above, will appreciably decrease in future years, the need for the manned bomber is assured to continue for an indefinite period. If one accepts that there is a continuing need for the bomber, the only remaining concern is how best to maintain a viable bomber force. The first consideration here is that our current strategic bomber, the B–52, is aging and cannot be expected to last indefinitely while the need for a bomber can. Even with progressive modifications to prolong airworthiness and mission effectiveness, the B–52 will one day wear out. Although we have some confidence that with present usage rates and operating in the currently used flight regime, the newer B–52's—G and H—can continue to fly into the 1980's without major structural modifications, this confidence is based on predictions that are at best more art than science. The fact remains that the B–52 was not designed to operate in the low altitude environment which is required against current enemy air defenses and when an aircraft must consistently fly in a regime for which it wasn't designed, catastrophic structural failure is always a possibility because true flight stresses cannot be absolutely predicted or duplicated in ground tests.

Maintaining a flyable bomber fleet, unfortunately, is only a part of the problem. The other part, and perhaps a more important consideration, is maintaining the survivability and effectiveness of the bomber fleet. In the years from 1962 through the current year, nearly $3 billion has been spent on the B–52 fleet for correcting deficiencies or increasing capabilities to meet a changing threat. These modifications have allowed the B–52 to remain capable against the current threat, but it still remains an aging bomber designed in the 1950's for high altitude penetration and which performs marginally in range and speed at low altitude requiring increasing tanker support as the threat advances. It is not unreasonable to predict that required modifications on the B–52, including those programed or planned, will cost much more than $3 billion in the next decade because historically modification costs rise sharply as an aircraft reaches advanced age. It is also important to note that these large amounts could be required without significantly improving the B–52's overall performance or enhancing its effectiveness.

For effectiveness in meeting the projected threat nearly as well as the B–1 design, the B–52 will need improvements in both prelaunch survivability and penetration capability. Prelaunch survivability will require improved response time, capability for wider dispersal and perhaps even airframe hardening to reduce required safe escape distance.

Modifications to provide such capabilities might include quick-engine start equipment, high-lift flaps, improved landing gear flotation, afterburners for engines or higher thrust engines and improved ground support and more reliable aircraft systems to allow autonomous operation from austere dispersal bases. For sustained penetration effectiveness, the B–52 would require modifications to increase low altitude range and speed, plus avionics and airframe improvements to allow flight at lower altitudes. The range and speed requirements infer a new engine requirement, but could also include a requirement for increased tanker support through increased numbers of existing tankers or the development of an improved tanker. Finally, penetration aids of various sorts could be required which would continually displace part of the B–52's destructive payload capacity.

There is a continuing need for the manned bomber. It may be needed indefinitely because it is the most versatile strategic offense system that we possess. Considering all of the possible costly improvements required to make the B–52 viable against the threat in the future, the progressively decreasing payload to accommodate performance improvements and aids to penetration, the rapidly approaching limit of the growth potential within the basic design, and the remaining unknown probability of airframe failure, it is simply more economical to plan a replacement for the B–52 rather than to continue to modify it. Sheer logic dictates that the bomber fleet be updated in the most practical manner possible. The development of the B–1 represents the most economically feasible means to achieve that end.

I ask unanimous consent that a table on the subject be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

COST OVER THE YEARS FOR STRUCTURAL AND CAPABILITY MODIFICATIONS TO THE B–52 FLEET

MN	Modification	Series	Prior	Fiscal year 1969	Fiscal year 1970	Fiscal year 1971	Total
63	APN–69 radar beacon	D	$0.6				$0.6
1000	Low level	C–H	331.3				331.3

THE HOUSING PRIORITY

Mr. SYMINGTON. Mr. President, for several years, many of us in the Senate have spoken of the "priorities" of our Nation, believing that increased attention and resources must be given to resolving our problems in the United States. My efforts in representing the interests of Missourians have long recognized the fact that domestic needs are being curtailed at the expense of questionable commitments abroad.

Warning signs persist: Our educational system is extremely underfinanced; our law enforcement and criminal justice system needs more support as well as reform; poverty as a way of life is still too much with us; and the shortage of decent, standard housing for all Americans is becoming increasingly acute.

I list these areas of concern, among others, as one who has faith in the ability of this great Nation to face the challenges before her. Optimistically, I see America, through the efforts of her people, as abundantly capable of providing each of her citizens with the basic guarantees of life, liberty, and the pursuit of happiness.

Yet, this will not come easy. We must continue to inform ourselves of the nature of these challenges so that we can more adequately cope with the problems of the present as well as plan for our future well-being.

So today I would take this opportunity to focus on what is surely one of the Nation's most pressing and fundamental needs—standard, decent shelter at a reasonable cost.

As we are all now well aware, on August 11 President Nixon vetoed the congressionally approved fiscal 1971 appropriations for education and for the Department of Housing and Urban Development and several other governmental agencies. The HUD appropriations included increased levels of funding for urban renewal programs which are so desperately needed.

By vetoing both of these bills, the President stated that he was "saying no to bigger spending and no to higher prices in the interest of all the American people." Yet during the same week his administration actively advocated the expansion of new military systems requiring $1.5 billion in outlays for fiscal 1971. Such a structuring of priorities leaves room for improvement.

On August 13 the Congress successfully overrode the veto of the education appropriation bill, but the House vote on the housing funds bill fell 63 votes short of the required two-thirds. That bill must now return to committee, with programs to continue operating at fiscal 1970 levels.

With this in mind, the housing crisis we are now experiencing illustrates in concrete fashion what I mean when I say we need to reorder our priorities in this great Nation of ours.

In 1950 we were the world leader in production of housing, building at a rate of 16 units per thousand. Today—we are averaging 6 units per thousand, below the output of Japan, Russia, and most western European countries.

The demand for housing permeates all sectors of America. While the poor and our minority groups suffer most, middle class Americans are also finding it increasingly difficult to afford and find decent housing.

And while the needs of the central cities, especially our urban ghettos, demand immediate attention, the issue is no less sensitive with respect to rural dwellings.

The Housing and Urban Development Act of 1968 set a national goal of 2.6 million new and rehabilitated housing starts a year. Two million new housing units are needed to house the new households entering the market and to replace the existing units that are destroyed or lost each year. An additional 600,000 units a year are needed to begin an orderly program for replacing the substandard housing now occupied by low- and moderate-income families. Yet we seldom build more than 1.6 million conventional units a year. In 1968, we had 1,540,000 housing starts and that figure went down to 1,496,000 starts in 1969. Actual housing starts for the first 6 months of 1970 were down nearly 19 percent from the same period in 1969. In the past 3 calendar years our total number of housing starts, about 4,350,000, has not even kept pace with the 5 million required to meet the needs of new households. The consequences of this meager production would have been far more serious if the mobile home industry had not stepped in to help meet some of our needs.

Since most Americans do not live in new housing, we must also concern ourselves with the condition of the existing housing stock. Here, too, we confront a gloomy picture. The 1960 census of housing indicated that 24 percent of all occupied housing units were deteriorated, dilapidated, or lacking in some or all plumbing facilities. The situation in Missouri is even worse. The 1960 census of housing showed that 34 percent of Missouri's housing units were deficient.

Not only are we not building enough housing units, but rising costs are pricing an increasingly larger percentage of our citizens out of the housing market. We are presently experiencing a higher price tag than ever before on the land, money, labor and materials necessary to fulfill our housing needs.

One of the fastest rising major cost elements in home construction is land. Land is available—but at exorbitant rates. The price of land has increased at an average 15 percent per year since 1965. Land increased by 12 percent each year for the 1960-70 period. This situation indirectly pressures builders to put larger and more expensive homes on the available acreage—catering to the more affluent. The price of land, alone, amounts to 25 percent of the total sales price of a new home.

Materials and labor have also increased steadily during recent years, yet their rise has been less inflationary than the rise in the Nation's cost of living for the same period. The increase in the cost of living has moved upward since 1963 at

an annual rate of 3.28 percent—Consumer Price Index. At the same time the square footage cost of all houses increased by 3.22 percent.

And yet the most serious problem facing prospective homebuyers has been the cost and availability of mortgage credit.

Interest rates have jumped more than 60 percent in the last 5 years. Not since the days of the Civil War have these rates been so high.

For most Americans, it would be difficult to buy one's own home on today's market. At today's prices, a $20,000, 30-year mortgage will cost the eventual homeowner more than $38,000 in interest payments alone. A $20,000 home—with a $58,000 price tag.

In conjunction with these historically high interest rates, the tight money policies of our present administration have left the housing industry unable to compete with the shorter term, more profitable returns of business, installment, and personal loans.

Residential housing has been especially hardhit. Since 1966 there has been available to new residential borrowing less than 20 percent of all available investment funds. Treating housing as if it were expendable, it is a sad commentary when our Nation's "priorities" place builders and homeowners at the end of the credit line.

The effect of these economic policies can be seen through the present median sales price for new homes—slightly over $25,000. Given the traditional figures that 20 to 25 percent of a family's income is devoted to housing—families with incomes under $8,000 are virtually excluded from the housing market. According to 1969 estimates, this would mean that 63 percent of Missouri's families cannot afford to finance a new home, as compared to a national percentage of 56 percent.

Even if a person can afford to pay the high interest rates, the policies designed to stop inflation have made mortgage money so scarce that many prospective purchasers cannot find lenders who will loan them the money.

Most serious of all is the plight of those who occupy the lower end of the economic ladder. The National Commission on Urban Problems, chaired by my former colleague, Paul Douglas, of Illinois, found that families with incomes below $6,500 find it difficult to buy or rent decent, standard housing at market rates. The Kaiser Committee found that private enterprise at maximum efficiency simply cannot produce housing at rates which the poor can afford. A resource report of the National Commission on Urban Problems stated that there were some 13,600 large families in the St. Louis area who were unable to find or afford adequate housing—16,729 poor families—with 66,300 children—but only 3,118 living units available to them. We must face the fact that subsidies for some families will be necessary if we are to reach the goal of a decent home for every American family established in the Housing Act of 1949.

Legislatively, programs to produce needed housing have come forth. The Emergency Home Finance Act of 1970 is now law, making additional funds available for the home mortgage market. Especially helpful will be the authority given the Federal Home Loan Bank Board to issue up to $3 billion a year in housing certificates, the proceeds from which will be deposited into a middle-income housing fund. All of these funds are to be used in making residential mortgage loans, with reduced interest rate charges to homebuyers staying within established purchase price limits.

During the first session of this 91st Congress we passed a mortgage credit bill granting the President wide discretionary authority to instruct the Federal Reserve Board—FRB—to regulate terms, amount and interest rates on all forms of credit. Laying unused as yet, this affords the President an excellent opportunity to selectively restrain the borrowing powers of less essential segments of the economy.

As mentioned earlier, the veto of fiscal 1971 appropriations for the Department of Housing and Urban Development is unfortunate. The level of funding delegated to urban renewal programs by the Congress exemplifies the increasing efforts on our part to give a higher priority towards resolving the problems of our urban environment, not the least of which deals with housing. Under the guise of labeling these urban renewal programs "inflationary," the administration seems not to share this Congress degree of commitment.

Especially critical to meeting our Nation's housing needs are the Federal assistance programs under the 1965, 1968 and 1969 Housing Acts for low and moderate-income families. These programs must be more adequately funded. Public housing programs are in desperate financial straits—primarily because of spiraling costs. More than 200 local authorities at present are unable to meet operating expenses without increasing rent beyond their low-income tenants' ability to pay. Housing authorities in several metropolitan areas, including St. Louis, have gone broke, and the treasuries of 40 more are near depletion. As short term solutions, these local authorities will require increased Federal Government appropriations to cover their deficits.

For most of us, statistics are rather cold and abstract, and do not translate easily into the human problems that are hinted at in the statistics. What does this crisis in housing mean in human terms?

For young married couples, it means their dream of a home of their own must be postponed indefinitely.

For the executive who is transferred to another city, it means a financial loss and a great deal of worry. To buy a new home at the high prices now prevailing, he has to sell his present home at a jacked-up price. Current financing difficulties make this very difficult to do. As a consequence, more and more companies are finding it necessary to help smooth the housing problems of employees when they are transferred.

For the ghetto child, it means growing up in a crowded tenement with rats, roaches and plaster falling from the walls.

For elderly citizens, it means struggling to find decent shelter with retirement income that is increasingly inadequate in the face of spiraling housing costs.

For the blue collar worker, it means spreading blight and deterioration that threatens to destroy the value of the home into which he has placed his life savings.

The housing problem touches all of us in a very direct way.

In the words of Preston Martin, chairman of the Home Loan Bank Board:

> Of our various goals, housing is perhaps the most pervasive and fundamental. . . . The place a man lives is more than just another commodity, service, or possession; it is a symbol of his status, an extension of his personality, a part of his identity, a determinant of many of the benefits—and disadvantages—of society.

With all this in mind, it is essential that decent, standard housing at a reasonable cost be made available where needed. Too many of our people are paying for their housing out of the total fabric of their lives.

Directing our Nation's resources toward solving our housing needs is not a matter of charity. Rather, it is a necessity if we are to achieve the security and prosperity which rightfully belongs to each of our citizens.

FISH PROTEIN CONCENTRATE AND THE SCHOOL LUNCH PROGRAM

Mr. PERCY. Mr. President, adequate nutrition is, of course, a prerequisite of all human activity. Unfortunately, all too many people, both here and abroad, suffer from malnutrition due to a deficiency in protein. As a consequence, millions of children either fail to reach maturity or do so as physically or mentally stunted individuals.

The development of fish protein concentrates, FPC, has played, and no doubt will continue to play a major role in the elimination of this form of malnutrition. FPC is made from fish which have heretofore been considered either unpalatable or otherwise unfit for human consumption. These fish are ground into a flour which is odorless and tasteless and which is acceptable to all ethnic groups and faiths. Used to supplement other sources of protein, FPC promises to correct protein deficiency at a cost of approximately one-half cent per person per day.

Mr. President, an article recently published in the Chicago Sun-Times reported that FPC may now be used in this country as a supplement in the school lunch program. I think that this development is both encouraging and gratifying in light of the arduous efforts of my distinguished predecessor, Senator Paul H. Douglas, to obtain acceptance for FPC as suitable for human consumption.

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Chicago Sun-Times, Thurs., Aug. 13, 1970]

FISH CONCENTRATE TO PACK PROTEIN IN SCHOOL LUNCHES

(By William Hines)

WASHINGTON.—The world's largest caterer of school lunches is prepared to start fortifying prepackaged meals with a nourishing but controversial "fish flour" as soon as a reliable supply is established, a nutritionist for the Philadelphia-based company said Wednesday.

ARA Services Inc. is negotiating with Nabisco-Astra, a consortium of the National Biscuit Co. and the Swedish Astra industrial group for a steady supply of EFP-90, a protein concentrate made from eviscerated herring, Mrs. Edythe Robertson revealed. The protein-rich substance will be added to such foods as pizza and baked goods, she said.

Mrs. Robertson and officials of the U.S.-Swedish combine discussed at an international food technology meeting here plans to put the fish protein concentrate on the school lunch market.

RESTRICTED IN U.S.

Development of a large-scale fish protein industry in the United States has been held back by highly restrictive Food and Drug Administration regulations. A product known as Whole Fish Protein Concentrate can be sold here only in 1-pound packages labeled "for household use only."

This has made it impossible for manufacturers to put the powder where it would do the most good—in the hands of bakers and other food processers who can use it to reinforce the nutritional value of their products.

EFP-90, which is more than 90 per cent animal protein, can be used in commerce because it is made of fish from which the viscera have been removed. Noneviscerated fish are a common item of interstate commerce under FDA regulations in the form of canned sardines.

FORTIFIED FOODS OK'D

Mrs. Robertson said that this year for the first time the Department of Agriculture announced that fortified foods can be used in "Type A" school lunch. This lunch provides one-third of the minimum daily requirement of protein—the equivalent of two ounces of meat. Any additive not specifically forbidden may be used, and EFP-90 is not forbidden, she said.

"In a few years there will be 55,000,000 children getting school lunches at a cost of $7 billion at 1968 price levels," Mrs. Robertson said. "Animal protein is now 60 per cent of the cost of the meal, and we've simply got to hold costs down."

Fish protein as an additive will solve this problem, Mrs. Robertson continued, and according to nutritionists who attended a press briefing the "fish flours" are the only animal-protein additive in sight. Vegetable, fungal and even bacterial protein concentrates are being developed but none offers the nutritional advantages of proteins derived from fish.

5 MILLION A DAY

Mrs. Robertson said her company is "the largest contract feeder in the world," prepackaging about 5 million schools lunches a day.

Per Hoel, Swedish president of Nabisco-Astra, said the concentrate costs 48.5 cents a pound FOB Swedish ports in lots of 16 metric tons (35,000 pounds).

Dr. Ernest R. Pariser, vice president of Cardinal Protein Ltd., of Canso, Nova Scotia, said his company soon will begin producing fish protein concentrate from the filleting waste of edible fish. There are no marketing limitations in Canada and the product can be used by processors, Pariser added.

One small U.S. plant is in operation in Massachusetts and another is about to start up at Aberdeen, Wash. Each will use a variation of a process sanctioned by the government which uses whole fish but of only certain prescribed species.

NOT FOR SUPERMARKETS

Nabisco-Astra's vice president, an American Nabisco executive named Harry J. Watson, was asked how long it would be before foods containing fish protein would be featured on supermarket shelves.

"It's unlikely that you'll see any of those products for a long time," he told reporters. "But the chances are that if you travel to another country you may see them very soon."

Nabisco representatives passed around samples of some of 34 products made with varying amounts of EFP-90. One of these was animal crackers said to contain 16 per cent protein. In shape, texture and taste they were virtually undistinguishable from ordinary animal crackers.

None of the products is in commercial production and Nabisco spokesmen said their company was moving cautiously into the protein-spiked food market. One reason is that an article inadequately market-tested before general release might be a disaster not only in its own right but for other fish-protein items as well. The other is concern for the general goodwill value of the Nabisco brand name.

HUMAN RIGHTS AND THE ENVIRONMENT

Mr. PROXMIRE. Mr. President, the most fundamental human right is the right to a liveable environment—an environment which is free from noxious pollutants of the air and water. Man cannot fully enjoy life when he is threatened by environmental crises. It is just recently, however, that we have come to recognize this fundamental right to clean air and water. Just a few years ago, the air and the water were considered free economic goods to be despoiled at will. It was reasoned that since the air and water really belonged to no one individual or group of individuals, they were to be exploited without restriction.

Unfortunately the air and the water can assimilate only so much waste. We cannot dump virtually unlimited quantities of waste products into them and just expect these pollutants to magically disappear. If we allow just a few individuals to take advantage of the limited ability of the air and water to assimilate wastes, we will be depriving millions of others of their fundamental right to a clean, healthy environment. Personal freedom does not include the right of one individual to trample on the rights of others. When a polluter dumps waste into a public waterway he is transferring the damages associated with that pollution to down stream users. He is forcing them to pay the cost of waste disposal. The same thing happens when a large factory pours pollutants into the air which are carried further downwind and are deposited on automobiles, houses and other buildings. The polluter rarely assumes the cost of clean-up or pays the medical bills of those afflicted by various respiratory diseases. In both of these cases, the polluter is clearly abridging the rights of others to clean air and water. Our main job now is to restore the fundamental principle that the polluter must be responsible for cleaning up his own wastes. This will restore balance to the system. Currently the public is not only bearing the brunt of the pollution but also the cost of clean-up. We must reverse this situation. All of us have an equal right to the enjoyment of the air and water.

AIKEN SCHOOL DRESS CODE

Mr. THURMOND. Mr. President, I wish to commend the Aiken, S.C., school officials for their reasonable and forthright approach to the increasingly controversial problem of student appearance.

A news article published in the Aiken Standard of August 21, 1970, outlines the dress code enacted by the Aiken school authorities for use in the secondary schools.

Mr. President, I ask unanimus consent that the article, entitled "Dress Code Emphasizes Reasonableness," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DRESS CODE EMPHASIZES REASONABLENESS

Proper atmosphere—one that is quiet, orderly and peaceful—is essential to education, Aiken school officials say.

The manner of student dress and personal appearance contribute to either a good or a poor learning atmosphere, they say.

For this reason a written dress code to be used in secondary schools has been formulated this year.

The code emphasizes "reasonableness, not inches," said School Advisory Board member, James Conaway.

No one is going to go around with a ruler measuring dress or hair lengths, he explained. But the "bizarre or disruptive" will be prohibited.

"We have to accept contemporary standards, but not the extremes," he said.

The code says specifically, "each student shall be expected to dress in an appropriate manner avoiding extremes either in clothing or personal appearance."

Parents have been asked to cooperate with the school in upholding the code which stresses health, safety and environment.

The code requires:

Shoes to be worn at all times while on school property.

Clean, orderly hair which must not obstruct eyes or face.

Socks for boys.

That boys' shirts which are designed to be tucked in be tucked in at all times.

Prohibited for girls are:

Excessive jewelry or make-up.

Slacks, shorts, jeans, suit pants or other clothing which may be revealing or provoking.

School officials point to Aiken's reputation for having "one of the best local school systems" in the state in stressing the need to prevent interference with the educational process. Its schools have produced a high percentage of merit and national achievement finalists as well as graduates who become Phi Beta Kappas in college, they stress.

NO AMERICAN MERCENARIES

Mr. CHURCH. Mr. President, in a forthright editorial entitled "Include Us Out," the Salt Lake Tribune praises the Senate's recent efforts to bar the use of

U.S. funds to hire out other nationalities to fight for us in the Indochina war. The Tribune argues that the prohibition to pay for mercenaries in the Senate-passed Cooper-Church amendment and the Fulbright amendment to the military procurement authorization bill "is a sound piece of advice" which the House of Representatives should adopt and the administration should follow out in Southeast Asia.

I ask unanimous consent that the Salt Lake Tribune editorial of August 23, 1970, be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

INCLUDE US OUT

Argument over the Cooper-Church amendment tied up the Senate for 34 days and by the time it was approved most of its impact was lost because American troops had been withdrawn from Cambodia as President Nixon had promised. The amendment was intended to prevent future involvement in Cambodia by forbidding the President to spend funds to retain U.S. forces in that country, send military advisers there, provide air support for Cambodian forces, or pay for advisers or troops that other nations sent to help Cambodia. But the amendment is merely an expression of Senate opinion, not a law, since it has not been accepted by the House.

Now Sen. J. W. Fulbright, leader of the opposition to the administration's Indochina policies, has succeeded in winning Senate approval of another restrictive amendment. Moreover, he didn't even have to put up a fight. The Senate agreed by a unanimous voice vote.

The Fulbright amendment prohibits the use of U.S. funds to pay foreign troops fighting in support of Cambodia and Laos. Thailand has been talking about dispatching 5,000 "volunteers" if Washington will foot the bill. And the South Vietnamese general staff favors an incursion into Laos on the same terms. But the senators obviously feel that such commitments could well lead to direct U.S. involvement.

Fulbright explained that the amendment would prevent the South Vietnamese or the Thais from "building up a full-fledged partnership with the government of Cambodia and drawing us in." Sen. Barry Goldwater, who is as far from being a dove as anyone can get, agreed. The Thais are free to do anything they want on their own, he explained.

The South Vietnames government, because of its partnership with the United States in fighting the Communists, exerts considerable influence on American foreign policy. The Fulbright resolution would make "include us out" the rule to be applied to possible future partnerships in Indochina.

The House ought to follow the Senate's lead. This is not a dovish or a hawkish or a partisan issue, as the unanimous Senate vote demonstrates. On the contrary, it is a sound piece of advice which now needs House concurrence to assure it will be heeded.

MACARTHUR'S FINEST LEGACY

Mr. PROXMIRE. Mr. President, in Wisconsin, Gen. Douglas MacArthur is considered among the State's foremost sons. He is most often thought of as a great soldier, a leader of men. Perhaps the biggest parade ever staged in Wisconsin for a hero was staged for MacArthur when he returned from Korea.

As with all great men, his name did not escape controversy. But what may have escaped him is all the credit that is his due as a statesman for his role in shaping the government of postwar Japan.

It was 25 years ago this week that MacArthur landed near Tokyo to begin his duties as the supreme commander of a vanquished nation. Don Oakley, in the Washington Daily News, wrote of MacArthur's accomplishments there in commemorating that anniversary.

The reforms and the constitution brought to Japan under the general's direction are recounted by Mr. Oakley, who notes that that constitution—

Established in law an array of civil liberties that went beyond even the U.S. Bill of Rights. For instance, Japanese women were given legal equality; the right of unions was affirmed; the right of teachers to voice their opinions was recognized, and war was banned except in self-defense.

Despite the fact that the Japanese Constitution was written by foreigners, Mr. Oakley points out, it has never been amended.

Those basic liberties given the Japanese by MacArthur are his finest legacy. Truly, the Old Soldier's memory will never die. And we should not let it fade away.

Mr. President, I ask unanimous consent that Mr. Oakley's column be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MEMORIAL TO MAC

(By Don Oakley)

The 25th anniversary of the Japanese surrender in World War II was, quite properly, much observed around the nation a little while ago.

Little notice was taken of the 25th anniversary of an event which was the sequel to the first and which was to prove to be fully as significant.

Aug. 14, 1945, marked the ending of a war; Aug. 30, 1945, marked the beginning of the building of a peace. It was on the latter day that Gen. Douglas MacArthur landed at Atsugi air base near Tokyo.

To this one man was handed a war-devastated nation of 90 millions to do with virtually as he wished. Probably no man in history ever wielded such absolute power over so many human beings. Certainly no man ever exercised such power so wisely.

Helped by the peculiar psychology of the Japanese, who accepted conquest as resolutely as they had attempted to conquer others . . . MacArthur imposed sweeping reforms which revolutionized Japanese life.

He instituted a land reform program, one of the most successful ever undertaken, liberating peasants from their rural landlords and giving them their own property.

He transformed Japan's ancient divine emperor into a constitutional monarch and for the first time, a human being.

He presented Japan with a written constitution which gave her a parliament-cabinet government patterned on European lines and established in law an array of civil liberties that went beyond even the U.S. Bill of Rights.

For instance, Japanese women were given legal equality; the right of unions was affirmed; the right of teachers to voice their opinions was recognized, and war was banned except in self-defense.

Japan today, with one of the smallest defense budgets in the world, is the third largest industrial nation and is out-Yankeeing the Yankees in many global markets.

Gen. MacArthur cannot be credited with this prosperity, of course. The energetic Japanese had something to do with it.

The best memorial to Gen. MacArthur—and to the nation which produced him—lies in the fact that Japan has never amended his constitution. Japan remains one of the few countries in the world whose basic laws were largely written by foreigners.

Many Americans took the 25th anniversary of the surrender as an occasion to voice repentance over our dropping of the atom bomb on Japan.

If confession is good for the soul, we ought to remind the world of what we did after the bomb.

HUGH O'BRIAN YOUTH FOUNDATION VISIT TO CAPE KENNEDY

Mr. PERCY. Mr. President, On July 12, 1970, I had the opportunity, together with Dr. Thomas Plans and Sponsor Hugh O'Brian, to address 60 high school sophomores who were participating in a space seminar at NASA's John F. Kennedy Space Center in Florida.

The seminar was sponsored by the Pepsi-Cola Co. and the Hugh O'Brian Youth Foundation in cooperation with the Exploring Division of the Boy Scouts of America and the National Aeronautics and Space Administration.

On the basis of their school leadership community service, and a 400-word essay entitled "What is Man's Future in Space?", 60 young men—one from each State and 10 from various foreign countries—were chosen to fly to the Space Center for an intensive, weeklong seminar dealing with every phase of the space program.

In addressing these students, I emphasized the many practical byproducts we have gained as a result of space exploration. While many Americans have objected to the space program on the grounds that it is too costly and diverts too many resources badly needed to solve problems here on earth, most of us recognize the undeniable benefits derived from the space program. The successes of space exploration have increased our hope, our ability, and our national resolve to face and overcome new and chronic earth problems.

The space program will undoubtedly continue to have a broad impact on our society, our technology, our industrial economy, and our planetary environment. The areas in which we can expect benefits include communications, medicine, meteorology, aviation, and space photography.

Yes, there have been many more significant and far-reaching implications of our space exploration than the ability to display a few moon rocks. It was my privilege to explain these advantages to these young men.

I have received letters from 45 of these young men, as I asked them to convey their feelings concerning the direction of our future space exploration.

The participants in this seminar possess a keen awareness and understanding of our space program. Their views provide a unique insight which I feel

would be beneficial and interesting to my colleagues in evaluating future NASA programs. I ask unanimous consent that four of these letters be inserted into the RECORD.

Mr. Hugh O'Brian is to be commended for his initiative in conceiving of this conference and personally participating with this outstanding group of young men throughout the week at Cape Kennedy.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

SHAMOKIN, PA.,
August 10, 1970.

Hon. CHARLES H. PERCY,
U.S. Senate,
Washigton, D.C.

MY DEAR SENATOR PERCY: It was an extreme pleasure seeing and hearing you on July 13, 1970 at the "Hugh O'Brian-Pepsi-Cola" Space Seminar. Your impressive speech has enlightened me and, I'm sure, the other sixty-six young men who participated.

The space seminar, with the cooperation of NASA, Hugh O'Brian Youth Foundation, Pepsi-Cola Co. and the Boy Scouts of America, was a great success. I feel that this "once in a lifetime" experience will never be forgotten by any of the young men who attended. The great interest created among us was overwhelming.

From my arrival until the final departure, I enjoyed every exciting minute. The NASA staff gave us a better understanding concerning the "how" and "why" of the space program. During this week of intense study, we learned practically everything about the operation of the Kennedy Space Center; yet we were still bursting with more questions. The men who accompanied us were always willing to listen to our comments and to answer any questions that we had on our minds. Their cooperation contributed much to the success of the seminar.

Upon my return home, I immediately felt so much more involved in NASA's space program—so much more itnerested in man's future in space. No-one knows what may happen in later years—Will man be able to survive on this planet? Will over-population and pollution endanger our environment to the extent, perhaps, where we'll have to find some other suitable place to exist?

These and many other questions must be considered now! Many of our present "insignificant" problems may confront us sharply in the future. This is why we are compelled to have a strong space program and really plan our future in space. The deep exploration and inhabitance of other planets could not only provide us with a place to survive in case of an emergency, but also contribute a vast amount of technology and advancement. Computers and various satellites have added infinitely to the growth of our nation and the entire world.

It would be very detrimental to decrease (to any great degree) the research connected with the space program. Therefore, we must, as space ambassadors, inform the public about the benefits and future values that the space program can give us. In this way, we can "sow back" the wonderful things we get out of life. Our well-being can be preserved (with the help of God) by directing our efforts to man's future in space.

Respectfully,

PETER A. EICHEN,
Pennsylvania Space Ambassador.

OMAHA, NEBR.,
July 27, 1970.

Hon. CHARLES H. PERCY,
U.S. Senate,
Washington, D.C.

DEAR SIR: During its history, the National Aeronautics and Space Administration has achieved some of the greatest goals of all mankind. The well publicized goals like landing on the moon are well known but the more important achievements of advanced knowledge, improved technology, and human understanding are unknown to much of the general public.

Although many other programs have contributed to our recent avalanche of new knowledge, the space program best typifies the search by man for the unknown facts of his environment. From the discovery of the Van Allen radiation belts by our first satellite, Explorer I, to the new facts concerning the moon brought back by the recent Apollo missions, the space program has led the race for new facts in every aspect of our life. Man's exploration of space has created the new fields of space radiation, space geophysics, and exobiology and has added new meaning and importance to the fields of biology, communications, meteorology, oceanography, and earth resources. We are in the journey of success and cannot stop now and be content with a token goal.

A new technology equal to the level of our advanced knowledge has also evolved during the years of the space program. Our national goal of landing on the moon has served as the stimulus for this new technology. To make our goal possible, we developed new materials and methods that can be used for many practical earth applications as well as their function for space. Space technology has helped us greatly in the varied fields of medicine, communications, transportation, electronics, computer design, and engineering. We would be betraying ourselves and our future if we failed to take advantage of the rare opportunities we now have.

The human understanding brought about by the space program can be traced to the people who have created reality out of an unbelievable dream. At Kennedy Space Center and Air Force Station, there is a contagious sense of enthusiasm, pride, and reverance. These people have represented our nation in its quest for leadership in space and they know that greater things are achievable. Their enthusiasm to fulfill these goals is only outmatched by their new understanding of man and his relatively small environment called Earth. The workers of the space age have viewed the whole world as an oasis in the desert of an infinite space. This new perspective gives them a greater regard for themselves, their world, and their neighbors. They are awed by this feeling and proud of their success in accomplishing their jobs. This human understanding will be shown to be more important in the years to come.

When one first encounters the people who brought about the knowledge, technology, and understanding of the space age, a sense of sorrow for the misconceptions of the nation toward the space program is felt. This feeling quickly leaves and is replaced by an intense desire to help install and promote the benefits of the space age. Our nation and the world need to share and use the knowledge, technology, and outlook of the space age. If this was done, there would be no question as to the necessity of the space program.

Sincerely yours,

RICHARD B. MINTZ,
Nebraska representative, NASA Space Seminar.

MALIBU, CALIF.,
July 30, 1970.

Hon. CHARLES PERCY,
U.S. Senate,
Washington, D.C.

MY DEAR SENATOR: As a participant in the recent Pepsi-Cola—Hugh O'Brian Space Seminar, I am writing to thank you for taking time out of your busy schedule to address us at Cape Kennedy earlier this month. I believe you are one of the leaders America needs to overcome its current plague of polarization, and I would like to pledge to you now any support I may be able to offer you in the future.

During the seminar, I was inundated with valuable information. Now that I have had a few days to reflect on the total experience, several major points stand out.

First among these is the wealth of opportunity available in the space program. Through NASA and the entire aerospace industry, there are places for virtually every field of endeavor. Because of this, there is opportunity for thousands, regardless of their chosen professions. Indeed, without these people and their diversified talents, there would be no American footprints on the moon.

The second thing I discovered was the number of benefits from the space program. The sum of Man's knowledge has doubled in the last decade, because of the space program. This new knowledge has given men, in general and as individuals, numerous benefits. One of the contributions to all of mankind is the possibility of direct communications by satellite with any part of the world, making education possible for many underprivileged nations. Also, new satellite-oriented weather prediction can save thousands of lives and millions of dollars annually. Space technology may help solve today's transportation and pollution problems, while making life and farming on the ocean floor a reality. Space has sparked new innovations in education, many centered around the use of computers, which, spurred by the needs of space exploration, have revolutionized modern industry. Photographic satellites not only help us better develop our natural resources, but also, by detecting new military installations, have helped observe treaty signatories, so that peace may be maintained between nations.

The list of general benefits is truly endless. Similarly, the benefits of space to the individual are multitudinous. Materials technology needed to protect our spacecraft has created new ceramics, metals and plastics, whose derivatives can be found in any modern home. The need for light-weight, nutritious foods for the astronauts has given us freeze dried meats, vegetables and drinks.

Space is also a cornucopia of medical benefits. A recent NASA publication listed some eighty-eight different new developments, including sensors which detect when a patient's breathing is abnormal; biocompatible carbon materials which can provide rejection-proof artificial organs; new computer techniques that provide clearer x-rays than ever before; an eye-switch-operated wheelchair to give new mobility to victims of paralysis; and new medical monitoring systems, developed originally to safeguard our astronauts in space, which allow simultaneous observation of many critical patients by a single physician.

The final, and most frightening, idea that stands out in my mind is the limited future now in store for the space program. I believe we will continue to need a strong space program in the future for many reasons. First, we cannot stop white progress and knowledge are accelerating. We live in an age when, due in part to the space program, to stop is to regress. We cannot afford to give any nation another technological headstart, such as the Soviet Union had with their Sputnik in the early days of space exploration.

Second, we cannot give up the benefits we are deriving from the space program. Also, would not our economy be endangered if the thousands of technically trained people currently employed in the aerospace industry were left unemployed or forced to accept less skilled jobs?

Another major reason for a strong space program is that it could someday replace

War in international philosophy. Space can act as the technological catalyst in much the same way as the military has in the past, with far greater benefits and much less destruction. The space program can also help keep peace by channeling international technology to beneficial uses, rather than to annihilation.

Finally, we must "leave ourselves an out," as a nation. We do not now need a military base in orbit or on another planet, but we may in the future. We do not now need to leave an uninhabitable Earth and colonize another planet in order to survive, but this possibility is certainly looming in the years ahead. Only a strong space program can provide us these options in the future. And, in today's unstable world, how dare we remove from ourselves the possibility of any of these situations, when such options are provided by the space program and may someday be imperative for our very survival?

In the last analysis, the most important single result from the space program, for both mankind in general and men as individuals, may be that space has given us new horizons. Looking ahead from the moon, we can see the whole universe at our feet, if we but continue the effort, looking back from space, we can see that all men are in the same position, all fellow voyagers on the spaceship Earth. We can see how imperiled is our own "life-support system," our polluted environment. And we can see how petty are all the little conflicts, between men, between ideologies, and between nations.

Neil Armstrong has said, "The Space Age may be the time when men begin to understand one another." With the help of forward-looking legislators and a continued strong space program, we can make this vision a reality.

Thank you again for your interest.

Sincerely yours,

TODD GARVIN,
Representative, State of California, Explorer Space Seminar 1970.

JULY 24, 1970.

Sen. CHARLES PERCY,
U.S. Senate, Senate Office Building, Washington, D.C.

DEAR SENATOR PERCY: I have recently completed a one week stay at the Kennedy Space Center during which time I participated in a study of our space program. After consolidating the facts I gained during that week with those which I had personally contacted earlier, I have remained convinced of the inevitability of space exploration but, more importantly, I have realized the full value of space endeavors as well as the great potential that this frontier holds. I recognize that I hold merely one opinion among many, yet I still feel a responsibility to relate that opinion to others. That which follows is a sincere attempt to do just that.

Contrary to what many might expect, I was impressed by neither the sophisticated hardware needed for the program nor by the specific knowledge required to create the program in the first place. What did impress me were the limitless benefits of the program which could be directly applied to man and his ways of life. Some of these would have been difficult for me to recognize and even more difficult to appreciate had I not visited the Space Center. In this sense, the past week has been particularly enlightening for me.

For instance, I had been aware of satellites and their use as a relay station for television, telephone, etc. Yet, I had not appreciated their value as a tool for bringing quality education to underprivileged countries. To have tried to provide this service by conventional means would have necessitated a large commitment of manpower and funds. Such a program alone would have lacked the permanence that a satellite offers.

I had also recognized satellites as instruments that could be used for continuous mapping of the earth. However, I had not appreciated what value this could have in providing advance warning of hurricanes and other severe weather occurrences. I find impossible to express what this means to man, for how can one measure the importance of saving human life? And for that matter, how can one measure the effect of improved weather forecasting on business, agriculture, and all of man's activities?

An equally impressive aspect is the progress made in the field of medicine as a result of the Space Program. Of the complex systems used to monitor the astronauts much is directly applicable to everyday use and more is of value in modified form. Improved monitoring systems, more precise methods of measurement, artificial organs with greater reliability—one can't measure their value on a monetary scale. And as throughout the space program more advances lie in the waiting for someone to apply them to the chief beneficiary—Man himself.

I conclude with an advantage that I have found to be the most difficult to grasp. Man's realization of his relative smallness amongst the infinite vastness of the universe has had a unifying effect bonding the peoples of the world into one. Through no other means can I see as hopeful a future for men to overcome their differences than through a cooperative space program initiated by, funded by, and whose benefits will be shared by all the nations of the world as one.

WADE HILLMAN,
Representative, Pepsi Cola and Hugh O'Brian Space Seminar.

ADMIRAL MOORER'S FAREWELL

Mr. ALLEN. Mr. President, Alabama's and the Nation's Adm. Thomas H. Moorer recently assumed the chairmanship of the Joint Chiefs of Staff, America's highest military post. In so doing, he relinquished the title of Chief of Naval Operations and a naval career spanning 41 years. The following message to the men and women of the U.S. Navy was Admiral Moorer's final communication from their commanding officer.

George Washington's final order to the Armies of the United States and Robert E. Lee's final order to the Army of Northern Virginia have become a part of the Nation's history.

It is my belief that Admiral Moorer's farewell message will occupy an important place in the annals of the U.S. Navy and that it will serve as an inspiration and a guide for all who read it, whether they be servicemen or civilians.

Robert E. Lee said:

Duty is the sublimest word in the English language.

Admiral Moorer uses a more encompassing word, "responsibility," which would embrace "duty" and more.

I ask unanimous consent that Admiral Moorer's farewell to the naval forces, as published in the Birmingham News of August 30, 1970, be printed in the RECORD.

There being no objection, the farewell message was ordered to be printed in the RECORD, as follows:

[The Birmingham (Ala.) News, Aug. 30, 1970]

ADMIRAL MOORER'S FAREWELL: "RESPONSIBILITY" KEY WORD TO GUIDE MODERN LIVES

After more than 41 years of serving in our Navy, I will soon assume the responsibilities of Chairman of the Joint Chiefs of Staff. I am deeply honored that our Commander-in-Chief has shown his confidence by appointing me to this position. At the same time, I will miss the degree of personal contact and close affiliation which I have been privileged through the years to have with officers and men throughout the Fleet and Shore Establishment of the U.S. Navy. The past 41 years have convinced me that our Navy has been made great and will remain great so long as we have dedicated people of all ranks and rates who put service before self, country before comfort, and responsibility before personal convenience—and before what is phrased these days as "doing your own thing." In what is now a different age, the concept of duty has lost none of its importance. It retains its age-old significance in the survival of a free society.

I would like to share with all of you some thoughts on values which I have cherished through the years—beliefs which have not changed in my mind since I was a boy in Alabama, and particularly those which are related to personal responsibility. I hope these thoughts will also be meaningful to you, not only in your activities as Navymen, but also in your everyday life as Americans.

In saying this I fully recognize the large-scale changes which have taken place during the 20th century. When I was a young man, consciously or unconsciously, strong home patterns, strong patriotic feelings, and strong beliefs in traditional religion provided a sort of conscience and care for our total society. The belief in God and Country was adequate to provide the binding cement necessary, particularly in our American way of life.

The kind of responsibility I have in mind leans not so much in the direction of obligation as it does toward concern. It includes knowing to whom one is responsible. It implies caring enough to become involved in discharging these responsibilities.

There is also what can be termed responsibility to tradition—the act of taking hold of the torch passed from one generation to the next, and then moving purposely ahead to achieve higher goals. One of the most common links between generations is the knowledge that the results you want most are the same general aims and results your elders started out to achieve.

Thus, the object is not to discredit and destroy, but to analyze and reject the worthless while continuing to build on that which is consistent with your own goals. You cannot destroy growth and still continue to grow. You cannot keep the ball rolling if you tear the cover off and beat the stuffings out of it.

There is a great difference between discrediting something and offering honest criticism. For instance, public dissent and debate, including public assembly and protest, are part of the American way of life. They are characteristics of an alert and vigorous people. We teach our citizens to have convictions. We urge them to voice these convictions.

Unfortunately, somewhere along the line, something has been forgotten by a great many of our people. There is no quick, easy, and absolute solution to many of the world's problems. But I think we can test the course we are taking toward solutions, at any given time, simply by asking, "Is this consistent with what we are, with what we stand for?" This process is something we must work on

every day. Remember, we live in a real world, not a dream world. Dreams have no limits; the real world has practical limits or at least limitations. Above all, we must distinguish between the world of our dreams and aspirations and the tough, cruel, demanding world of reality where advantage, gain, and privilege are accompanied by work, sweat, tears, and accountability for our actions.

A second responsibility is the one we all have to the society of which we are a part. We cannot try to wash our hands free of involvements in matters happening around us. We cannot try to wash away the stains of our own misdeeds.

You might ask, "Am I my brother's keeper?" The answer is "yes," and the same thought holds true for us as a nation. Over the years while we have been making our freedom more secure, we have learned that if freedom is to endure, it must be shared. We know that when any nation's freedom is denied, ours is threatened. We know that freedom has no sign on it reading, "Made in America" or "Reserved for Americans." Freedom is not free nor does it mean freedom from restraint—freedom means the supremacy of human rights everywhere.

Our support goes to those who struggle to gain those rights and to keep them. I believe that free men throughout the world must work and fight together for what they believe, or soon they will have no cause for which to work, fight or believe.

Closely related to our responsibility to society, are our responsibilities to this great nation of ours. In my opinion, the first step a man should take in sizing up his responsibilities is to stop thinking of our country in terms of "they" or "the government." Instead of trying to place the blame or burden on the "theys," we ought to think more in terms of our own personal involvement. After all, in America the government is we, the people.

In the Pentagon, I spend a sizable portion of my time trying to track down this elusive man "they." We must zero-in on specific organizations and individuals, and not simply make random reference to some unidentified and probably non-existent source of an alleged difficulty.

As a good American, you cannot be indifferent. Your first duty as a citizen is to be alert and interested in public affairs. No discussion of responsibility to the nation would be complete without mention of military service, because national defense is a prerequisite to everything we aspire to as individuals and as a country. As President Nixon has said, if we do not provide for adequate national defense, all other problems are moot.

More specifically, our Armed Forces form a shield behind which all else operates. If you will look at a map of the globe and then remember where our forces are—in Europe, in Southeast Asia, in Korea, and in our outlying states—you will see that they are positioned to dissuade the forces of aggression while we work by other means to achieve a just and lasting peace. They are there to help establish an environment of stability under which free men can determine their own course. They are there to permit orderly, political change.

Nor are our motives entirely altruistic. Freedom is on the line for America, too; certainly there is no more important vocation or profession than to serve in the defense of our great nation.

Therefore, I think those who seek to demean the uniform and degrade this service can well live to regret their actions, because without a strong leadership in the Armed Services, the strength of our country will quickly decline.

The final responsibility I have in mind is the one you have to yourself. Personal responsibility begins with integrity, which is simply another word for personal honesty. Without integrity, all the other qualities of your personality do not amount to much, for the dishonest individual will use his good traits only when they suit his convenience. You cannot be a dishonest person and hope to be a responsible person.

Standing right at the heart of responsibility for one's self is the simple opinion: "What am I for?" We hear a great deal today about what people are against, but only a few ever stand up and tell us what they are for. After you can name and justify to yourself the things you stand for, the next step is to consider what you must do to support and foster those things. In those words, you must decide what you are for and then be for it.

On 2 July of this year I will take over my last assignment as a military officer. As I pass into what one might call the twilight of my career and look about the world full of war and the threat of war—as I look at the nation and see the bitterness of faction against faction and growing disrespect for law and order, I often wonder if everything my generation has attempted to do has been worth the effort. But, soon, I realize that it has, because our nation is stronger today than ever before.

We, as a people, face our problems more squarely than others. We are more willing to talk to one another, if even at the top of our voices sometimes. Above all, in America there is much more than regret. There is less cause for remorse than rejoicing. It will always be so long as, but only so long as, we have men and women willing and prepared to accept responsibility.

So you can approach the future with hands idle in your pockets, or busy rolling up your sleeves. You can stand there on the sidelines and criticize, or you can become involved in constructive. The man who turns away from responsibility will have much company, but not of his own choosing. He will be with birds of his own feather and they will deserve each other. A man who cares enough to become involved picks his company from among the finest.

Unlike many things a man aspires to, no one has to wait long for responsibility. Responsibility begins wherever you find it and you find it whenever you begin to look for it. You begin to look for it that very day in which you realize how important it is for you to care about the world and the people who live in it.

To each of you, with whom I have had the honor and privilege to serve in our great Navy through the years, I wish Godspeed and a great future. My thanks, continuing confidence, and admiration to each of you for your dedicated contributions to making—and keeping—our Navy the finest and strongest in the world.

MIKE MANSFIELD REPORTS FROM WASHINGTON

THE MANSFIELD RECORD AGAINST CRIME, DRUGS, FILTH, AND VIOLENCE

Mr. MANSFIELD. Mr. President, crime drugs, filth, and violence are national problems. They are among the gravest issues facing our State and the Nation today. Crime and violence, drug addiction, obscenity, and raw pornography affect all. They ravage, in particular, those who visit and reside in our crowded urban centers.

To combat crime, to curb violence and drug traffic and to end the spread of filth and pornography will take the boldest and most dedicated efforts. There must be stiffer penalties for drug pushers, better facilities for addicts, more police on the beat and compensation for crime victims. The fight includes steps that may not be the most politically expedient. They are steps that must be taken nonetheless. The fight involves the support of anticrime measures that must be tested constitutionally; measures like preventive detention and no-knock entries. The fight will also involve updating crime programs that are not always popular; programs like the gun law revisions of 1968. But doing only what is popular or expedient will not solve the problems of crime, drugs, filth, and violence.

For my part in this essential effort, I have acted in three ways: First, I have authored or been a principal sponsor of crime-fighting and antiobscenity proposals; second, I have voted for every major anticrime, antidrug, and antipornography measure that has come before the Senate; third, as the majority leader of the Senate, I have helped to bring about Senate passage of nearly all major proposals to curb crime, drug abuse, and pornography pending in the Congress. Here is the list:

MANSFIELD SPONSORED OR SUPPORTED ANTI-CRIME AND PORNOGRAPHY PROPOSALS

1. MANDATORY SENTENCES FOR GUN CRIME (S. 849). The Mansfield Mandatory Sentence bill would deter the use of guns by criminals. It would impose mandatory jail sentences for the criminal's choice of that weapon in committing his crime. The sentence would be served IN ADDITION to the term served for the crime itself. This bill has passed the Senate unanimously. The crime law planned for the District of Columbia has also adopted the Mansfield Mandatory Sentence approach.

2. THE HRUSKA-MANSFIELD PRISON REFORM MEASURE (S. 2875) calls for a major overhaul of our penal institutions to convert them from graduate schools for crime and violence to institutions where criminals will have a chance to be rehabilitated.

3. THE MANSFIELD ANTI-PORNOGRAPHY PROPOSAL (S. 3220) would compel mailers of obscenity to warn addressees of the potential pornographic nature of the enclosures. Recipients could return the offensive material and the sender could be penalized. Hearings on this Mansfield bill are scheduled before the Senate Post Office Committee.

4. THE GOLDWATER-MANSFIELD ANTI-OBSCENITY AMENDMENT to the Postal Reform bill forbids the shipment of obscene materials through the mail where the addressee asks for such a ban. The Mansfield proposal above, goes one step further by placing the burden entirely on the pornography mailer.

THE SENATE'S ANTI-CRIME AND DRUG CONTROL RECORD INCLUDES THE FOLLOWING ACHIEVEMENTS, ALL SUPPORTED OR SPONSORED BY THE MAJORITY LEADER:

OMNIBUS CRIME CONTROL AND SAFE STREETS ACT OF 1968—establishes broad new program of law enforcement assistance at all levels of government;

COMMISSION ON NOXIOUS AND OBSCENE MATERIALS;

GOLDWATER-MANSFIELD ANTI-OBSCENE MAIL AMENDMENT—to the Postal Reform Act (H.R. 17923);

ORGANIZED CRIME CONTROL;

DRUG CONTROL;
DISTRICT OF COLUMBIA COURT REORGANIZATION;
PUBLIC DEFENDER, DISTRICT OF COLUMBIA;
CRIMINAL LAW REVISION, DISTRICT OF COLUMBIA;
JUVENILE CODE, REVISION
OMNIBUS JUDGESHIP BILL;
FEDERAL IMMUNITY OF WITNESSES;
SOURCES OF EVIDENCE;
CORRUPT ORGANIZATIONS ACT;
CRIMINAL JUSTICE ACT AMENDMENTS; and

1968 GUN CRIME LAW—updated and replaced 30 year old gun laws in an effort to keep guns out of the hands of the drug addict, the lawless, the criminal, the untrained and the incompetent.

As these measures take hold, only time will tell the extent to which they will help to stem or even reverse the crime rate. In any event, proposals to fight crime, to curb drug traffic and violence and to put the lid on filth and obscenity will continue to be at the top of the Mansfield agenda.

SPECIAL REFERENCE TO THE LAW AIMED AT CRIMES COMMITTED WITH GUNS

The 1968 Gun Crime law was enacted to help in the fight against crime and violence. In 1968 the Federal Bureau of Investigation and the National Association of Chiefs of Police pleaded for revisions in gun laws that had been on the books for 30 years or more. To save lives and to crack down on criminals, drug abusers and fugitives, I supported the 1968 Gun Crime law. My decision to support the measure was made in a sincere effort to push the war on crime, the war against the killers and cripplers and maimers of innocent citizens. I am persuaded that the law will assist in the war on crime.

There has been much confusion about gun laws; about what they do and what they do not do. There has been much misinformation. The record should be clear and the facts should be known.

THE FACTS ABOUT THE GUN CRIME LAW

1. ITS PROPER FUNCTION. Gun legislation is to cope with crime and violence not to tread on the rights of bona fide users of guns. This was the intent of Congress in 1968 in revising the gun laws. I believe in a continuous review of the 1968 changes and all other gun laws. I believe in adjusting any portions which prove only an annoyance to decent citizens, and of little use as weapons against crime. Congress has already been able to eliminate parts of the 1968 law which were shown as ineffective deterrents to crime. For example, the Bennett-Mansfield Amendment repealed the ammunition section of the 1968 Gun Crime law for rifles and shotguns. If adopted, the McGee-Mansfield Amendment will repeal the provisions for .22 caliber ammunition.

2. THE GUN CRIME LAW OF 1968 SOUGHT TO UPDATE THE EARLIER FIREARMS LAWS ENACTED BACK IN 1934 AND 1938. Since 1938, when the Federal Firearms Act was enacted, Federal LICENSES have been required for all gun and ammunition dealers. The 1938 law also required the REGISTRATION of guns and ammunition as the Secretary of the Treasury directed. Federal orders issued under the 1938 law contained WELL OVER 100 DETAILED REQUIREMENTS covering the sale of guns and ammunition including (1) a full and adequate description of each firearm; (2) the manufacturer; (3) the manufacturer's serial number; (4) the caliber of gauge; (5) the model and type; (6) the name and (7) address of each person from whom received, together with (8) the date of acquisition; (9) the disposition made including (10) the name and (11) the address of the person to whom sold and (12) the date of disposition. Violators of the 1938 law could be jailed for 5 years and fined $2,000.

An even earlier Federal gun control law was the National Firearms Act of 1934. It imposed, among other things, REGISTRATION AND LICENSING RESTRICTIONS on persons possessing sawed-off shotguns or rifles, machine guns, gun mufflers, or gun silencers.

3. WHAT IS THE LAW ALL ABOUT? The 1968 Gun Crime Law (supported by the FBI and the National Association of the Chiefs of Police) replaced and updated gun laws passed in 1934 and 1938, laws which had been on the books for more than 30 years. It actually TOOK OUT REGISTRATION features, while imposing mail order restrictions and encouraged more effective state and local gun crime measures.

[Prior to 1968, state and local gun laws were easily avoided through mail order purchases or by shopping in states or places nearby for "Saturday Night Specials" where there were no gun restrictions.]

4. WHO IS COVERED? The 1968 Gun Crime Law precludes gun sales ONLY TO DRUG ADDICTS, MENTAL INCOMPETENTS, FELONS, FUGITIVES, AND INDIVIDUALS CONSIDERED DANGEROUS. Sales are also banned to minors. A law-abiding gun owner can purchase and use any gun. He can hunt and teach proper weapons handling to his children and others.

5. HOW IT WORKS. To set apart known addicts, criminals and other dangerous persons, records of name, age and address, height and weight, race and place of birth (THAT'S ALL) are obtained when a gun is sold. This identification is exhibited much in the same fashion as is required in obtaining BANK LOANS, INSURANCE, AUTOMOBILES, VOTING REGISTRATION and—as in the case of minors—buying ALCOHOLIC BEVERAGES. The effectivenes of this or any other law will depend upon the vigilance of law enforcement agencies. Note that the fugitive who was cited in the killing of three persons and a judge recently in a California courtroom shoot-out was identified through a gun-purchase record.

6. IS IT CONSTITUTIONAL? The Second Amendment says, "A well regulated Militia, being necessary to the security of a free State, the right to bear arms, shall not be infringed." As read by the Courts this Amendment bars the Federal government from disarming law-abiding citizens who wish to purchase and use ordinary weapons in order to shoot and to hunt, to protect themselves and others and to protect their property and the property of others. THIS IS THE LAW!

But the Second Amendment does NOT say—and the Courts have so read it—that the Federal government and even the State governments CANNOT IMPOSE REASONABLE REQUIREMENTS IN AN EFFORT TO KEEP GUNS OUT OF THE HANDS OF THE LAWLESS, THE CRIMINAL, THE INSANE, THE ADDICT and so forth. That is what the government—Federal, State, and local—has been striving to do since at least 1934.

To repeat, the issue has been tested several times, in the past 30 years. Each time the Supreme Court has ruled that reasonable efforts to keep guns out of the hands of drug addicts, criminals, the lawless and other dangerous persons do not violate the Second Amendment to the Constitution.

7. WHAT THE LAW DOES NOT DO:

(a) It does NOT confiscate weapons;

(b) It does NOT compile or make gun owner lists available;

[As a convenience to gun dealers a computer list of licensed DEALER addresses (NOT OWNERS) is retained by the Treasury Department in order to notify DEALERS (NOT OWNERS) of all gun law regulation changes. Under the Freedom of Information Act some forty or fifty of these lists have been sold (at $140 apiece). It is understood that the list purchasers were mainly gun dealers and political organizations interested in seeking funds and support against gun crime law supporters. It has been held that listing OWNERS AND COLLECTORS would constitute an invasion of privacy. I agree.]

(c) It does NOT preclude the law-abiding gun owner from purchasing or using weapons;

(d) It does NOT prevent young people (under 18) from shooting, hunting and learning proper handling of weapons;

(e) It does NOT cost gun purchasers one cent.

8. WHY VOTE FOR IT? My vote was not a vote FOR banning guns; it was a vote AGAINST guns in the hands of the drug addict, the criminal and the incompetent. It was a vote against all who seek guns to murder, cripple, rob, rape, and maim. And it was a vote for apprehending them as well. It is easy to talk about rising crime rates but, if we intend to do something about them, we must be prepared to do what is necessary, notwithstanding the political consequences.

9. "GUNS DON'T KILL PEOPLE—PEOPLE KILL PEOPLE." But people using guns do kill—and rob, rape, maim and assault. These are the unthinking and the malicious who have no business obtaining weapons. They should not be permitted access to guns. The 1968 law is aimed solely at those people who used guns in 1968 to commit 99,000 robberies, 65,000 assaults and 9,000 murders in this nation. Last year alone 83 police officers were shot to death by the gun-toting criminals. In some of our cities shooting policemen has become commonplace. Ask them or their survivors how they feel about responsible firearms legislation.

Unfortunately, people elsewhere do not always have the gun training and supervision that is commonplace in Montana which would enable them to think prudently when handling a gun. Sensible gun-users are asked by the law to make a sacrifice, therefore, for the good of the nation; the kind of sacrifice that is asked of the responsible licensed automobile driver. They are not asked to accept gun confiscation or repressive gun law. I made certain that the revisions of 1968 contained the following proviso: "That no undue or unnecessary Federal restrictions be placed on law-abiding citizens with respect to the acquisition, possession, or use of firearms. . . ." That was my view when I voted for this measure. It remains my view.

10. THE NEXT STEP IS THE MANSFIELD MANDATORY JAIL SENTENCE BILL. Almost three-fourths of the Senate supported the 1968 Gun law to help the fight against crime and violence. The Mansfield gun sentence bill is another vital anti-crime tool and if enacted will impose mandatory prison sentences against those who commit crimes using a gun. This mandatory sentence would be imposed separately and solely against the criminal for his choice to use a gun. The bill has already passed the Senate unanimously. I have every hope that it will be passed by the House and signed by the President.

11. WHAT ABOUT AMMUNITION? (A) THE BENNETT-MANSFIELD AMENDMENT struck down an ammunition regulation never intended by Congress. In the so-called ammunition provision, the Treasury Department called for the collection of a great deal of specific data covering each sale of ammunition. This was tantamount to registration; it was neither intended nor suggested by Congress. As a result, the law-abiding gun-owning public was burdened immensely in efforts to purchase ammunition. There was no corresponding benefit. The Bennett-Mansfield amendment repealed this provision for rifle and shotgun ammunition. Similar action should be taken and will be spurred by me whenever the intent of Congress is not being served or when the law appears not to meet the objectives sought. (B) THE McGEE-MANSFIELD AMENDMENT to cover twenty-two ammunition and ammunition for other revolvers and pistols has been introduced and co-sponsored by

twenty-nine other Senators to seek to do the same as the Bennett-Mansfield amendment did in the rifle-shotgun area. It is our hope that, like the Bennett-Mansfield amendment, the McGee-Mansfield amendment will be passed by the Congress this year and enacted into law.

12. IS THE 1968 LAW HELPING TO CONTROL CRIME? (A) The Treasury Department reports a 313% increase in arrests for gun crime violations in the first year and one-half after the 1968 revisions went into effect; (B) The first year (1969) also showed for the first time NO INCREASE over the previous year in the rate of murder by guns (65.4%). As already noted, the fugitive cited in the killing of the persons and a judge recently in a California courtroom was identified through her gun record; this and other cases indicate the effectiveness of this updated crime-fighting tool.

13. OUR OBJECTIVES. All of us seek solutions to crime and an end to violence. We do so with every consideration for the protections guaranteed the criminal under the Constitution. Just as emphatically, however, must the rights of the victim of crime be safeguarded. It is the victim who too often in the past has been neglected. Our first concern should be for him, for his suffering, his safety, and the safety of his family and neighbors. To that end, I shall continue to devote my best efforts and to give not only my industry but, in behalf of the people, my best judgment as well. That is what I have endeavored to do ever since I have been a member of the Congress of the United States.

PURSUIT OF A POSTSECONDARY EDUCATION

Mr. PELL. Mr. President, as chairman of the Subcommittee on Education it is my long-range objective to insure that every American who wishes for and is capable of a postsecondary education should have the opportunity to pursue it, whether at a college or vocational school. As a taxpayer I would like to see this accomplished at a minimum expense to the Federal Government. Nevertheless, I believe that there is a definite role for the Government to play to insure this goal.

The present approach of Federal aid to postsecondary education is three pronged. Grants under the economic opportunity and work study programs are available for the most needy students. Three percent direct governmental loans—National Defense Education Act loans—are also available to these students and those from a somewhat higher income level. The guaranteed student loan program—in which the student takes a 7-percent loan from a private bank with the Government paying the interest while the student is in college and paying the bank an incentive to equal the current rate of interest—is available to the student from a middle-income family.

Much discussion of the present aid program has been engendered by the administration's proposed revision of it. The revision would eliminate the 3-percent direct and 7-percent subsidized loans by setting up a mechanism under which the student would take a loan at his bank and shoulder the total cost of that loan himself. This new plan was said to be in the interest of economy. Let us analyze the revision from the point of the Government and the student.

From the Government's point of view there appears to be a savings, for the subsidy and incentive costs would be done away with. However, it should be clearly noted that the NDEA loan program with its low 3-percent cost to the student will ultimately be cheaper to the Federal Government. Both the capital and interest of an NDEA loan return to the Federal Government, working in somewhat the same way as the Federal highway trust fund. For example, a $100 million loaned directly by the Government at 3 percent will return to the Federal Government in the future. The program not only pays for itself, but generates income and it will recycle funds for future loans.

From the viewpoint of the student it is clear a 3-percent loan is more desirable than the current 7 percent of the guaranteed student loan program, or one at the market rate that the administration proposes. The payout under the present guaranteed student loan program and those to be expected under the administration's revision constitute a budget drain lost forever.

Let us take a simple case which could well occur if the administration bill were enacted, or if the present outload of the NDEA 7-percent loan and grant program continues. If a young man were from a family with more than a $10,000 a year income level and borrowed $2,000 a year to further his education, he would be holding at the end of his college career $8,000 worth of loans, at a market rate of let us say 8 percent. If he married a girl who financed her education in the same manner, that young married couple would have a $16,000 debt at 8 percent which would have a marked effect on their future life.

I do believe that within the three pronged package approach I spoke of earlier the present guaranteed students loan program has a place. The subsidized 7-percent loan is one which should be utilized by middle-income students and those who wish to go to the more expensive colleges. And from the viewpoint in relation to immediate expenditure, the volume of loans is great.

The question has arisen, however, as to the position of the private lending institution in this program. Evidence before the Subcommittee on Education indicates that there well may be a need for a secondary market facility at which the banks could rediscount the guaranteed student loan paper. Witnesses expressed their urgent hope for this facility. I personally would be loath to see a new Federal bureaucracy develop, for the servicing of these loans through some quasi-public organization. I would rather see us proceeding in the form of a warehousing account in the Treasury Department if such a facility is needed.

It should also be noted that while the banking community has in the main done a laudable job in participating in the guaranteed student loan program, this participation has not been universal. Witnesses from two States indicated that no student from their State that they knew of ever went without such a guaranteed student loan. However, this is a voluntary program and I would hope that nonparticipating banks would become involved. And, with this in mind, it is also my hope that those banks which reserve this Government-guaranteed no-risk loan for their own business communicants would broaden the scope of lending.

Finally, I would like to point out that should an immediate emergency develop in the student loan area, a warehousing provision would not immediately ease it. There is, however, presently on the books unfunded authorizations for the educational opportunity grant program, the work-study program, and the National Defense Education Act loan program which would more than take up the slack and relieve pressure being experienced by the guaranteed student loan program.

An accompanying table showing certain figures will not only show the administration's poor commitment to the present program, but also demonstrate the available authorization which could be utilized in an emergency situation. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

FEDERAL STUDENT ASSISTANCE PROGRAMS—FISCAL YEAR 1971

Program	Type of assistance	President's budget	Authorization	Appropriation	Additional loans/grants which could be appropriated
National defense student loans	Direct Federal loans	$176,925,000	$375,000,000	$246,000,000	$130,000,000
Educational opportunity grants	Grants	77,500,000	170,000,000	59,614,000	110,386,000
Guaranteed student loans	Insured private loans.	145,400,000	(1)	145,400,000	(2)
College work-study	Part-time work	154,000,000	320,000,000	160,000,000	160,000,000
Total (excluding guaranteed loans)		408,425,000	865,000,000	465,614,000	400,386,000

[1] Such sums as may be necessary.

CONQUEST OF CANCER—A NATIONAL GOAL

Mr. CRANSTON. Mr. President, on Friday, August 25, the Senate agreed to House Concurrent Resolution 675, which establishes the conquest of cancer as a national goal. I wish to comment briefly on the significance of this declaration of purpose by Congress.

The resolution marks the year 1976 as the target date for the liberation of all

people from fear of this dread disease. In view of the prevalence of cancer and its toll on national productivity and health, this would be a particularly appropriate commemoration of the 200th anniversary of this country's independence.

Cancer is the second leading cause of death in the United States. This year about 960,000 Americans will receive treatment for cancer and 330,000 will die. There will be approximately 625,000 new cases this year. According to present rates, one in four persons now living will contract some form of cancer at some time in their lives. These glaring statistics tell more eloquently than any rhetoric I can muster why we must establish such a special priority for ending the cancer scourge.

By approving this resolution, the U.S. Congress has undertaken an obligation of great magnitude for a substantial duration. While the measure itself neither establishes a program nor appropriates funds, it does commit us to act promptly and generously to provide the necessary resources to achieve our vitally important goal.

An intensive study of how to achieve this goal is already underway. Under the able leadership of the chairman of the Labor and Public Welfare Committee, the distinguished senior Senator from Texas (Mr. YARBOROUGH), the Senate on April 27, 1970, passed Senate Resolution 376, authorizing the committee to expend $250,000 to conduct a thorough study of current research activities on cancer and to determine how these efforts can be better organized and intensified. As a member of the Health Subcommittee of the Labor and Public Welfare Committee, it was my privilege to cosponsor this study resolution.

A special panel of advisers, consisting of 26 eminent medical and lay leaders, was appointed by Chairman YARBOROUGH in May. I am delighted that three distinguished Californians are serving on this panel; they are: Dr. Henry S. Kaplan, chairman of the Department of Radiology of the Stanford University Medical Center; Dr. Joshua Lederberg, professor of genetics at Stanford University School of Medicine; and Mr. Lew Wasserman, president of the Music Corporation of America, Inc., of Universal City, Calif. This distinguished group has already held three full meetings and numerous subcommittee meetings. Their report with recommendations will be made to the committee by the end of this year, and the committee will report to the Senate no later than January 31, 1971.

The conquest of cancer by 1976 is a formidable challenge even for a nation with the audacity and resourcefulness to place a man on the moon. Conquering cancer may well be an even more difficult task.

Achieving victory over cancer will not be as dramatically and precisely marked as the first footprint on the moon. The term "cancer" describes a number of diseases, all characterized by the unrestrained growth of cells which, if left untreated, kill the patient. In view of the diversity of cancer types—several hundred have been identified—a single cure for all cancers is highly unlikely. However, the results of current research in prevention, detection, and treatment are encouraging.

Evidence indicates that we are at the threshold of discovering the relationship of viruses to cancer. The development of vaccines for some forms of cancer now looms as a possibility. Other promising avenues for research lie in chemotherapy. Four kinds of cancer previously considered incurable can now be cured by the use of chemicals alone. The most baffling and basic question remains how normal cells become malignant. Research in molecular biology and recent discoveries in that field may offer hope of progress on that basic front.

Federally supported cancer research has amounted to nearly $1.5 billion over the past 10 years. This research has provided promising leads. However, the productivity of medical research, like that of most human endeavors, is directly proportional to the effort put into it. If we are dedicated to eliminating cancer, as House Concurrent Resolution 675 says we are, we must dedicate substantial resources to the conduct of research, training for research, and construction of research facilities and equipment.

We have not done this. Over the past few years appropriations for the National Cancer Institute have not increased enough even to compensate for inflation. We cannot permit this to continue.

In 1968, the National Cancer Institute appropriation was $183 million; in 1969 only $185 million. In 1970 the allocation was $180 million, and this year the budget request is $202 million.

In testimony before the Labor-HEW Subcommittee of the Senate Appropriations Committee in June of this year, I urged the appropriation for fiscal year 1971 of at least a 20-percent increase over 1970 for the National Cancer Institute. The action of the House on July 23, 1970, which provides for $227 million for this fiscal year is most encouraging.

Mr. President, now that we have resolved to make the conquest of cancer a national goal to be achieved by 1976 and have established the special Labor and Public Welfare Committee study on how to do it, we must view these and related appropriations in a new light. We must be prepared to think and act boldly and imaginatively, and be willing to increase substantially our appropriations for cancer research, training and facilities construction in the next 5 years.

Words about millions of dollars and hundreds of thousands of dead and dying fail to capture the absolutely devastating human tragedy wrought by this capricious disease. That tragedy is especially heartbreaking when it strikes children. And the facts are that more schoolchildren in our country will die of cancer this year than of any other disease.

The impact of cancer in human terms was graphically illustrated to me by Dr. Richard Wolk of San Rafael, Calif., as I listened to his testimony last December before the Labor-HEW Appropriation Subcommittee. In early 1969, Dr. Wolk's son Brian, then 9 years old, was stricken—hopelessly and helplessly—with leukemia. In pleading for more cancer research funds, Dr. Wolk spoke eloquently of the desperate hope which sustains thousands of parents as they fight and pray for their children's lives. He said:

> Well, it is an uncanny mixture of faith, hope and love. Our children's trusting love gives us the power to nurture them, to comfort them, and to protect them. Our children's hope, that they can be as healthy as their playmates, gives us energy to work toward that goal. And we parents have faith that this nation's biomedical technology will soon produce more effective control for childhood cancer. If not for our children, perhaps intensive research can provide help for those five thousand other American school children who might otherwise die in 1970.

House Concurrent Resolution 675 offers some congressional response to the pleas, hopes, and prayers of the parents and brothers and sisters and other loved ones of those young and old whose lives are slowly being drawn out of them by cancer. By adopting this resolution we in the Congress have in a small way echoed the sentiments that Dr. Wolk expressed to me in describing why he had recently given up his general practice to accept a fellowship in medical oncology—the study of tumors—at Mt. Zion Medical Center in San Francisco. He said:

> I want to take part in the action as the conquest of cancer is achieved.

MEMORIAL DAY SPEECH BY REAR ADM. ERNST RUTH, JR., USNR, RETIRED

Mr. MONTOYA. Mr. President, I ask unanimous consent to have printed in the RECORD a speech made by Rear Adm. Ernst Ruth, Jr., U.S. Naval Reserve, retired, given on Memorial Day, at the National cemetery in Santa Fe, N. Mex. This stirring address raises many of the important problems facing our Nation today. A speech such as this that raises so many issues is seldom supported in all points by any single person. We will all however, agree that it is necessary to air these issues and to present our various views in an open discussion. The necessity for free discussion and the free exchange of ideas is in fact one of the major points of Admiral Ruth's address. I therefore submit for the RECORD this address given by a man who has served his Nation well.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

MEMORIAL DAY 1970

Thank you Mike, Governor Cargo, mayor Gonzales, friends.

As long as anyone of us here can remember—on this day in May each year people gather together in just such groups as ours today—in every town, hamlet and city in this country to honor the memory of those men who have fought for our country and have died—we are gathered here in one of the national cemeteries—those hallowed plots of ground which the people have dedicated in so many places in this country and in foreign countries—where our soldiers and sailors can find a final resting place and having found their place of rest, we the living, can come to them to honor their memory—many of you here today have dear ones, sons, fathers, husbands, brothers lying beneath these markers—all of us have friends

to remember and together we honor the memory of their unselfish service to us—memory—what do we remember—why what we remember is history.

In our almost two hundred years as a nation we have been threatened many times by forces that would destroy our unity, take our territory, deny us access to the oceans of the world—at each of these threats we as a united people sent our armed men to put down these threats and the markers on these graves recite for us the chronicle of brave men who died that we may live on as a nation.

In these present days we are threatened from within by divisive forces that we do not fully understand—we do not understand the war in Vietnam—we recall that in previous calls to arms the country was fully informed about the enemy and why we were in the conflict—in the Vietnam war we are resisting aggression against our country—we are maintaining access to the oceans of the world—we are resisting forces which would disrupt our unity—I say to you that three administrations have failed to adequately explain to the American people the nature of this war—I also say that previous administrations have failed to prosecute the war to the fullest capabilities of our armed forces and have failed to interdict the supplies going to the enemy which have served to prolong this conflict—we are unwilling to identify our adversaries—we use the word "communism" and "communist" in generic context which no longer has the meaning that we intend in this context except that it is still analogous to world domination—even within the so called "communist countries" it has been redefined and continues to be defined and argued there—what we can be sure of is that our adversaries regardless of the label are Russia and China there are the countries that are threatening us—they try to impose their style of government on weak countries—wherever in this world a powerful nation imposes its will on others by taking away freedom on action our Nation is threatened because we do not have free access to the people and their products of commerce, to their ideas nor do such subject people have access to us—in Vietnam it is not Hanoi who is the aggressor it is Russia and China and we are fighting there to resist their aggression against our country—history tells us all too clearly that we were attacked in 1941 and our sailors lying at rest in the bowels of the USS Arizona in Pearl Harbor in our sister state Hawaii, their silent voices shout out to us that we were attacked by an aggressive country from across the Pacific who also wished to extend its imposition of power on other countries as it had done in Manchuria and particularly to deny America access to the western oceans.

No independent nation can continue to exist and retain its power without having other nations or grouping of nations constantly looking for ways to weaken that power—for a moment let us consider the meaning of the word "power"—we speak of America as the most powerful nation on earth—power for America can be defined, and is best defined, as the ability to use all of our resources in concert to maintain the freedoms which our constitution guarantees—so if we are the most powerful nation this means that we are able to maintain more freedoms in America against all agressions from inside or outside this country than any other country in the world—I say to you that I believe sincerely and adamantly that we are the most powerful country in the world and derive our power from the freedoms that we maintain, it seems timely and appropriate for the detractors of the power of our constitutional systems in this country to be forced to prove their case rather than that the others of us should think we must write apologies or talk softly of justifications.

The face of happenings in the world where peoples freedoms are tampered with or taken away how can anyone of us in this country feel that we must apologize to any one—it is also timely and appropriate that our elected officials at all levels stand up to the maintenance of orderly processes of government and involve themselves directly in confrontation of the attacks on our freedoms. Power then in America comes from a multitude of sources and in the final confrontation with a nation who would challenge us we resort to military force and that is why we are here today to honor those who were called on to exert this kind of power—military force has changed since the first men were laid to rest here. The weapons of the 1800's were overshadowed by the big berthas of the German army in WWI. These massive guns yielded to the "A" bomb of WWII and today the "H" bomb possessed by 5 countries all of whom can deliver it if they choose—the tools of war today are truly awful, truly terrible, truly monstrous—are we to be deterred from protecting ourselves from aggressive threats because these weapons are monstrous—are we to say to our adversaries, we will not maintain the best final military defense it is possible for us to do. We have not said this, our adversaries know that we will maintain any necessary defenses—they are now deploying additional naval forces and moving their air forces into strategic areas, confident that the stalemate of nuclear response has been established they will use the more conventional weapons to gain their ends of aggression. To retain the power to protect our freedoms we must as a nation be ready to respond to aggressive actions no matter what form they take. These aggressive actions are not always in the form of military pressures—these actions may be and are taken in the realms of undermining our civil government. They can be effective when a few teachers or professors in our secondary schools or colleges teach the overthrow of our constitutional guarantees. Such aggressive actions are nurtured by college administrators who are either afraid of personal confrontation or are artlessly credulous or craftily naive. Not only do these administrators not protect our freedoms but they destroy the objectivity of colleges and universities. These institutions for learning can not function as such if they become centers of political agitation. The administrators and trustees of these institutions must expel the leaders of this rebellion and all of the rebellious members. At the centers of learning in America we must reestablish the freedoms so that those who are paying and struggling for an education to better confront this fast moving world can get on with learning. And I am not talking here of the freedom of expression, no, I maintain that any student if he has the time or desire may listen to poems or join the ROTC program, do anything that increases his knowledge, he must not be kept away from his classrooms or from any access that is normally and lawfully available to any student, and when there he will allow others full freedom of their expression. If these freedoms are not maintained why should any funds, private or public, be devoted to the maintenance of these institutions.

You the parents of the children of this generation must try to understand what are the problems and hang ups that confront these children. These children are thrust into this present era wholly defenseless. When you where young you could go to your parents for counsel in the problems of your day, but today not only do the children not know the answers but neither do their parents. Your children beg you to interpret the new and terrible forces that are rampant in the world. You must make it clear to them that only in the atmosphere of freedom and personal liberty can these young people unmask the hypocrisy of those in authority, or identify those enemies who would destroy us—they must understand that it is only by destroying our freedoms that we as a nation can be destroyed—if you as parents do not counsel your children then they will learn from others and they may never know what our freedoms are—above all you—you as a parent must take a stand as these men lying beneath these markers took their stand.

I say to the young people here today and everywhere in this land—do not be misled by those who tell you that history is for the birds—every man lying in this cemetery whether he fought in the war of 1840, Korea or Viet Nam died for you. You young men and women did not suddenly appear on the scene as if never before was there anything, the creation happened only once but the drama of life has been played for eons. Each succeeding generation has added its contribution to the script. It just happens that those writing the script in the last 30 years have interjected a whole array of new situations into this drama of life. The television that you stare at, the radio you listen to—the atom and hydrogen bombs were not invented by your parents—they simply put them together. If Sir Isaac Newton, or William Roentgen, or Marie Curie or Steinmetz or Gallileo, or Euclid or thousands of others in scientific history had not contributed their bit to unlocking the workings of the universe then your forebears could not have put these new elements into our life—but if our forebears had not assembled these things—then you young people would have had to do it. And believe me you would have and your children would wonder why and you would have to explain—there is a lot you will have to explain to your children and I say that you had better get on with it so that you do a better job than we are doing for you now—you young people of this generation have been pampered and are ill prepared for the toughness that you find in the world, and I believe that you are in revolt against this pampering. In your veins runs the blood of action, the excitement of the pioneer, physical action, in New Mexico people experienced these things only yesterday—but today excitement must take a different direction, you are the generation which will set the new directions in America and therefore in the world—the measure of the success of your direction will be your understanding of history's lessons so don't waste your precious time protesting things you can't possibly understand unless you have spent your hours in study of the past. You should be Ralph Naders delving into the workings of our present forms of government. You should be studying the philosophical history of our country so that you could know the origin of our laws and our institutions. You have to know these things in order to change things for the better, you must not be surprised if you find violent opposition to the violence that is happening—and one other thing must be said, we hear that there is only a small minority of the youth in this country who are the radicals depending on force and destroying property—and that the majority are too busy with their studies to confront these radical young people.

I ask you to take the time to address the administrators of your colleges and universities, the trustees and the alumni, and petition them to expel the leaders of the rebellion, otherwise you may well find that the public will no longer provide the funds that make it possible for you to pursue your education. If you are not willing to make the effort now it may be impossible to do later. The time has come to step forward out of the silent baffled majority and reclaim yourselves.

And so today we pay reverent tribute to these men lying here—they tell us that finally a nation maintains its strength, its fiber, its laws and its territory only through armed men taking a stand.

I do not want to equate the sacrifice of these men with the confusion of terms we

hear today. Words like, relevant and meaningful, miss the tone of their sacrifice. They gave their lives for that precious gift which transcends the senseless violence of the mob, the haughty hypocrisy of the official who refuses to be involved in real human problems, the stern arrogance of the young and the old when they refuse to appreciate mutual values. They died for the special God-given right we all possess. The right to seek our destiny independently but under the mantle of just laws. They died in the hope that all men would have the right to property, to liberty, to equal treatment, to redress for injury and the deep concern of the officials who represent them in the nations forums. These men die in vain if we here and throughout this broad land, become indolent in looking at our world. If we judge every student by his hair style rather than his life style—if we assume that those who take arms in the military services are evil because arms are evil—if we deny liberty because some use it beyond reasonable bounds—in effect if we think in such a shallow way that we can label everyone as exactly right or wrong, rather than recognize the infinite complexity and beauty of human life then we fail these men, for it is through indolence and intolerance and the negligence that these bring that the very heritage of these brave men will be threatened—God grant that it is never our lot to abandon that heritage.

SENATOR CHARLES E. GOODELL HOLDS LONG ISLAND HEARING ON UNEMPLOYMENT AND ECONOMIC CONVERSION

Mr. GOODELL. Mr. President, yesterday I held public hearings on the subject of rising unemployment on Long Island. I called these hearings to focus public attention on the effect Federal cutbacks in defense and space spending have had and will have upon employment. Nassau County was chosen as the site for these hearings because the impact of such cutbacks has already been felt by Long Island residents.

I ask unanimous consent that my statement at the hearing be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

OPENING STATEMENT OF SENATOR CHARLES E. GOODELL AT LONG ISLAND FIELD HEARING ON UNEMPLOYMENT AND ECONOMIC CONVERSION

We are here today because we are concerned with people, unemployed people. We are concerned with people who work in defense production, research and war-created industry—and now find their jobs threatened as a result of cutbacks in defense spending.

A look at the Defense budget for the current year reveals a reduction of over $5 billion. Today we feel the impact of that cut. Skilled scientists, engineers, and production workers—men who never were jobless before and never expected to be unemployed in their lives—suddenly find themselves without jobs. No one knows this better than the people of Long Island.

The problem—the loss of jobs by skilled and hard working people through no fault of their own—is plain enough. We need solutions. I am holding these hearings to learn what the solutions should be.

Before beginning these hearings, however, I would like to mention a few initial steps I have taken for coping with the problems of finding jobs and minimizing local economic disruption as a result of actual and anticipated reductions in defense spending.

A JOB BANK FOR NASSAU AND SUFFOLK

I would like to announce that my staff and representatives of Governor Rockefeller's office have undertaken a joint effort to establish a Job Bank for Nassau and Suffolk.

The New York State Employment Service has indicated it will apply to the United States Department of Labor to obtain Federal funding for this Job Bank. I have written the U.S. Secretary of Labor requesting that the Department expedite the request. Unofficial indications make me optimistic that the funding will be forthcoming.

The job of Job Banks is to match vacancies with job applicants, and people who have skills with industries that need these skills. The crucial advantage of Job Banks is that they use the resources of computer technology to perform their function of linking people with jobs, instead of the hit-or-miss methods of want ads and employment bureaus.

A Job Bank has a particularly important role to play in an area such as Long Island—where older industries are laying off skilled workers, while newer industries are moving in and being developed that need men with precisely these skills. It can match the engineer or technician who has lost his job in the aerospace industry with the new water pollution research firm that is looking for a man with his engineering or technical expertise.

Job Banks already exist in this state in Syracuse and Buffalo. I am hopeful that one will soon exist in Long Island.

I have long been involved in building a better job market for our nation. I was principal author of the Manpower Development and Training Act of 1962. As a member of the House Education and Labor Committee, I helped to author the legislation adopted in 1968 to provide Federal funding for the initial development of a nationwide system of Job Banks.

AN ECONOMIC CONVERSION COMMISSION

I have co-sponsored legislation to set up a National Economic Conversion Commission to study and recommend policies and programs to be carried out by the Federal government in education and retraining for occupational conversion. This bill is presently before the Government Operations Subcommittee on Executive Recognization. Unfortunately, no hearings have been scheduled by that Subcommittee. This delay has caused other Committees to take on the job of looking into what can be done to check adverse effects of cuts in defense spending as they related to employment and the economy. The Labor and Public Welfare Committee is proceeding with their hearings. As a member of the Banking and Currency Committee, moreover, I am pressing for hearings on the subject before the Subcommittee on Production and Stabilization, of which I am the ranking member.

PRESIDENTIAL REPORT ON MILITARY SPENDING AND THE ECONOMY

As a member of the Subcommittee on Production and Stabilization, I have been seeking ways to minimize the harmful effects of this inflationary economy and the disruptive effects of reductions in national defense expenditures on local employment and economic growth.

In July this year, I proposed legislation to require an annual Report on Military Expenditures and the Economy. I proposed that a report—separate and distinct from the President's annual Economic Report—be prepared to focus specifically on the impact of national defense expenditures on wages, prices, employment and the economy of the nation, states, and local communities. Included in the Report would be specific programs and policies in economic conversion which the Administration proposes to institute to ease joblessness and economic slowdown as a result of defense cutbacks. The Senate failed to pass my proposal for this annual Report on Military Expenditures and the Economy. As a result, I am conducting my own hearings to find out what impact defense cutbacks and reductions in space spending, are having in New York and what can be done about that impact.

DEFENSE SPENDING TRENDS

At the moment, defense spending continues to take the lion's share of the Federal budget. This year's Defense Budget totals nearly $71 billion. Of the "controllable dollars," in the Federal budget, those that can be readily adjusted and redirected, over 66 per cent are earmarked for defense spending.

This year's Federal budget shows only about $70 billion "controllable dollars." Of this, $48 billion are devoted to defense as contrasted to $22 billion for all other civilian programs, including health, education, housing, job training, and natural resource development. While "controllable dollar" outlays for defense have been reduced about $3 billion, spending for civilian programs has increased by only $200 million.

What this means is that out of every $1.00 of tax money paid to the Federal government last year, 48 cents are earmarked for defense spending.

Last Friday, the Senate rejected an amendment which would have placed a ceiling on defense expenditures at $66 billion. The forecast, then, is for defense expenditures totalling about $71 billion. Included are investments in new weapons systems such as ABM and MIRV.

All national postures are subject to change. The President has promised to move the defense policy of this country from war to peace. He has promised to move from an inflationary economy to one of healthy growth.

We must adapt our thinking and actions to the realities of changing times.

Part of the changing reality, as President Nixon has stated, is that this nation is in transition from a wartime economy to a peacetime economy. The President has spoken plainly and he is most certainly right in saying that we must take action now to deal with the problems of an economy transition.

One of the major problems we face in this economic transition is the lack of *nationwide* collective concern over what it entails. Contrasted to local outcries, the nation as a whole is slumbering in a fool's paradise, content that "business as usual" will proceed at the Pentagon. At the moment, there might seem on the surface to be some grounds for this complacency because of the enormous size of the defense budget, and in the fact that budget which, like fat anywhere always seems to come back regardless of efforts to slim down.

Nevertheless, there are efforts being made to trim the size of the Defense budget and reallocate savings to domestic priority programs. In the Congress this is being done by a group of military economizers, and this group is growing.

Beyond cutting dollars from defense, however, Congress simply must plan now to meet the severe economic problems in many parts of the country, particularly those areas which have experienced rapid build-ups because of the war in Vietnam and those which have large amounts of workers whose livelihood depends on defense-related work.

NEED FOR CONGRESSIONAL ACTION

If Congress does not act in a more meaningful way than it has this session, no action will be taken until 1971. This delay could be disastrous for areas affected by massive industrial layoffs related to the defense and aerospace cutbacks.

The reason given to explain why Congress has not acted more decisively on this serious problem is that unemployment problems related to defense cutbacks tend to be considered "local" problems. It is said that no lobby in Washington is concerned about conversion of our economy; that problem is too complex and the overall impact too remote.

These kinds of explanation contribute to the fool's paradise of complacency over changing realities and pressing domestic needs.

THE UNEMPLOYMENT PROBLEM IN LONG ISLAND

I am here because I know that attention focused on the employment problems on Long Island will contribute to public understanding that the impact of Defense cutbacks are not remote; they have arrived. I hope that attention on the problems of Long Island will increase pressure for the Congress to act on plans for economic conversion.

I am here because we cannot allow Long Island to become another California or Seattle, and because I believe people here are prepared to give public officials the guidance they need to develop proper solutions to defense-related and space-related unemployment.

Many people have given their life's work in service to the defense and security of our nation. I feel strongly that we owe them rewards for their work; not the punishments of insecurity and unemployment.

THE ISSUES TO BE CONSIDERED AT THIS HEARING

The question with which a public official must cope is not always: "Shall I act?" but rather "How?"

I am holding this hearing on Long Island because I want to know from those closest to the problems of Long Island employment, answers to the following questions:

(1) Which part of the labor force is/or will be most affected by present and future reductions in space and defense spending?

(2) Is Defense spending the most critical issue on Long Island in terms of joblessness and lack of new employment opportunities?

(3) Should we begin now to invest government spending more heavily in the development of goods and services aimed at internal domestic needs; what impact would this shift in spending have on industry and employment on Long Island?

(4) Is there existing legislation that presents barriers to economic conversion?

(5) In view of anticipated savings in government spending from cuts in war costs, how can these savings be spent to minimize disruptions in employment and industrial development?

(6) What legislation should be adopted to help assist in meeting problems faced by labor and industry on Long Island and across the nation?

I am hopeful that ideas and facts brought out at this economic conversion hearing will give those of us in government, industry, and labor as well as our private citizens, a clear indication of the direction in which we must proceed not only on Long Island and in New York, but throughout the nation.

AMERICA'S ERODING RESEARCH COMMITMENT, A PRESCRIPTION FOR SECOND PLACE

Mr. MONTOYA. Mr. President, I come from a State where research is a very important, meaningful word. New Mexico has been the site of an assemblage of scientific minds rarely matched in world history. Construction of the first atomic weapons was only the first scene in an unfolding drama that has had international repercussions. Since that time, New Mexico has become the site of a world renowned research effort. It has placed America in the forefront of several critically essential fields while giving us military power the world regards with awe. I have supported that effort over the years.

Twenty-five years was how long it took to bring these many minds together, build the facilities and equip them. Silently they have labored. Unheralded in the main, their accomplishments have changed man's history. This was all made possible by a commitment on the part of our Government to excellence in research. The Congress backed that commitment, even though there were some who opposed those of us who pushed hardest for it.

Such excellence in one area has been matched by similar commitments by our Government in other scientific endeavors. Until the effect became cumulative. Until America stood preeminent in scores of scientific fields. Until, even with a running start for our chief competitor, President Kennedy could guarantee and America could deliver the goods in a race to the moon. History will never remember who finished second. But a thousand years hence they will know who was first.

In medicine, we scored first after first, causing revolutions in curing traditional ills of man—earning plaudits from generations to come. In physics. In chemistry. In astronomy. In biology. In every field where the Government committed funds and support. And results appeared each year in terms of lives saved, mankind advanced, frontiers blazed, Nobel Prizes awarded.

It has been a continual source of pride to me to have played a small role in all this. Each time we had a measure in front of us calling for greater research and development effort, there was some struggle put up by those who wanted to sell such work short. Yet now all this progress is in jeopardy.

Dr. Lee DuBridge, President Nixon's own science adviser, has publicly stated that cuts in Federal funds for research can turn the United States into a second-class nation in many critical fields. Research budgets across the land have been cut with a meat ax in the past year and a half. The Federal Government provides the major share of support for research in all fields. Effects of tight Federal budgets and inflation have been felt in every research laboratory. Universities are dipping into limited capital funds. Substantial numbers of medical schools are in difficulty. Many senior scientists have seen research abilities limited because of this. Today's budget stringencies will show up in later years in the form of reduced national capability in science and technology. In my own State of New Mexico, the NASA installation at White Sands has been practically wiped out. At the Los Alamos Laboratories, a 5-percent cut in personnel has been instituted, and worse is expected. The same 5-percent cut has been placed in effect at Sandia, one of the Nation's most critically important centers for top secret work.

Now there is a recommendation afoot that would, if acted upon, bring about some consolidation of the Kirtland Air Force Base, Sandia, and Manzano complex. It took 25 years for the Nation to assemble the complexes in my own State I am referring to. Before the horrified eyes of veteran observers this series of facilities and research teams is being dislocated and disassembled in less than 2 years.

Scientific groups which have worked together for years are being broken up in New Mexico because of such cuts. Men who have worked as teams in surroundings conducive to excellent results watch helplessly as they are scattered to the winds. When researchers are let go, when medical schools are threatened with bankruptcy, when top secret research facilities are cut to the bone, when research teams are ruthlessly broken up, then we are on the way down. Never has a powerful country indulged in such an orgy of self-destruction than we are now doing by eviscerating its total research effort. Our people are suffering for it daily. People are dying uselessly because of it. Our economy is suffering because of it. Our status as a first-class nation is fading because of it.

Mr. President, the Soviet Union is not standing still while we make further research cuts. They are building science cities. Their technical institutes bulge with eager students. Their research institutes work day and night. And we? We debate whether or not to aid medical students. Whether or not to keep a facility open. My State's congressional delegation had to grope around the Nation in desperation to keep a unique primate colony and laboratory open at Holloman Air Force Base near Alamogordo.

Finally, we found a sponsor in the form of the Albany Medical School of Union College. Is it sense to allow such a facility to stand in such jeopardy? Then so will the Washington Monument sprout wings tomorrow and fly to California. Mr. President, we must halt the momentum of these cuts in basic research. We must reverse the trend of the past 2 years. If not, we are courting eventual national disaster.

Our technological mastery has allowed American industry to produce a series of products the world demands. Through sales of such work abroad, we have maintained our status as a "have" or "creditor" nation. Other countries are broadening and deepening research efforts. Only massive endeavors by this Nation, backed by Government assistance for research, can keep our technical supremacy in various fields intact. Further, through such broad-based research, we have kept the lead in the defense area. What we will fail to do through peaceful research will also affect defense systems of the next decade. Both are inextricably intertwined.

Voices of warning emanate from practically every corner of the national research and scientific community. It is time we heeded them.

CULEBRA III

Mr. GOODELL. Mr. President, on August 13, I introduced an amendment to the military procurement authorization bill, amendment No. 838 to H.R. 17123, which would prevent the Navy from con-

tinuing its practice bombardment of the Puerto Rican island of Culebra.

That amendment was originally cosponsored by Senator CRANSTON, and gained on the day of its introduction the cosponsorship of Senators HUGHES, JAVITS, and KENNEDY. It subsequently gained the cosponsorship of Senators CASE, COOK, EAGLETON, GRAVEL, HART, METCALF, and YOUNG of Ohio.

Representative JORGE L. CÓRDOVA, the distinguished Resident Commissioner of the Commonwealth of Puerto Rico, supported the Culebra amendment in a letter to me of August 10. I ask unanimous consent to have that letter's text printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., August 10, 1970.

HON. CHARLES E. GOODELL,
U.S. Senate,
Washington, D.C.

DEAR SENATOR GOODELL: I have received a copy of the amendment to H.R. 17123, the military procurement authorization bill, which you propose to introduce in order to ensure the termination of the Navy's use of the island of Culebra as a target.

Since early 1969 I have been exposed to Navy briefings on the importance of Culebra to the Atlantic Fleet. Recently I participated in the hearings of the Real Estate Subcommittee of the House Committee on Armed Services on the subject of Culebra, and visited Culebra with members of the Subcommittee. I remain unconvinced that Culebra is essential, or even important, to our national defense.

What is important not only to the 726 citizens on Culebra, not only to the four million Puerto Ricans in Puerto Rico and on the mainland, but to our entire nation, is that the dignity and the integrity of the 726 Culebrans be respected and maintained.

Because of this, I am in full agreement with the language and intent of your proposed amendment. As you know, at the time H.R. 17123 was considered and approved by the House of Representatives, during April and the first week of May of this year, there appeared to be a good chance that the problem would be solved without having to introduce legislation such as you now propose. However, this has not been the case, the Navy has of late assumed a position of utter and arrogant intransigence, and it is my opinion that passage of your proposed amendment is necessary.

In Puerto Rico opposition to the Navy's use of Culebra as a target has been unanimously expressed by all political parties. I hope that your amendment will also receive the necessary bipartisan support to ensure its passage. I will be glad to cooperate with you in order to secure approval of your amendment by a majority of your colleagues in the Senate.

Sincerely,

JORGE L. CÓRDOVA.

Mr. GOODELL. Mr. President, I indicated on August 13 that the Subcommittee on Military Construction of the Senate Armed Services Committee, a subcommittee ably presided over by the distinguished Senator from Washington (Mr. JACKSON), was inquiring into the Culebra situation in executive session. It was my hope then that the results of that subcommittee inquiry would include Navy withdrawal from Culebra.

In a statement of August 27, Senator JACKSON indicated that he had requested the Navy to answer a number of questions regarding Culebra no later than September 2. Presumptively he and the subcommittee will be inquiring further into the matter based upon the information which the Navy will transmit to them.

I have conferred today with the distinguished mayor of Culebra, the Honorable Ramón Feliciano. We have jointly concluded that hope remains for the emergence of a negotiated settlement between the subcommittee and the Navy, a settlement which will result in Navy withdrawal from Culebra. I am, therefore, withdrawing my amendment 838 to the military procurement authorization bill, and reintroducing, on behalf of myself and the previously cosponsoring Senators, that same measure as an amendment to H.R. 17604, the military construction authorization bill.

It is my expectation that that bill will come to the Senate floor for a vote in late September. Mayor Feliciano and I have concluded that floor action on Culebra should be deferred further until then, in order to give the subcommittee several more weeks to resolve the issue. Let it be crystal clear, however, that, if the Navy continues its obduracy until the time that the construction bill is brought to the floor, and if the Jackson subcommittee will not, by then, have succeeded in inducing the Navy to terminate its bombardment of Culebra, then I will offer this amendment for a vote on the floor of the Senate.

I ask unanimous consent that the text of the amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT TO H.R. 17604

On page 49, after line 22, add a new section as follows:

"SEC. 661. None of the funds authorized to be appropriated by this Act or by any other law shall be used for research, development, test, evaluation, personnel training exercises, or the procurement of weapons or other supplies by any military department if such activities include the naval shelling or air bombardment of the island of Culebra (located off the east coast of the Commonwealth of Puerto Rico), of any of the keys adjacent to such island, or of any waters within three nautical miles of such island."

On p. 49, line 23, delete "611" and insert in lieu thereof "612."

SENATOR GORE AND TENNESSEE

Mr. GORE. Mr. President, the supreme reward for service in the U.S. Senate is the satisfaction of serving well one's fellow man, of having represented the best interest and the enlightened will of the people of one's State and of one's country. In this regard, I have experienced both joy and pride.

Yet a contrary point of view regarding my service has been advanced.

So, I have examined the record for the last 8 years. The record speaks distinctly in my behalf. On hundreds and hundreds of votes I have, I believe, represented my State and my country. On only a very few votes, perhaps on no more than 10, have serious questions been raised.

Even so, all public records belong in the public domain and each is properly subject to question.

The record is my fort and my strength. From the record, I have identified my votes and the votes of my colleagues from Tennessee on 50 important issues. I ask unanimous consent that this record appear in tabular form in the RECORD.

There being no objection, the tabulation was ordered to be printed in the RECORD, as follows:

OFFICIAL VOTES ON 50 IMPORTANT ISSUES

	How—			
	Senator Gore voted	Senators Kefauver, Walters, Bass, or Baker voted	A majority of Congressmen, other than Congressman Brock, voted [1]	Congressman Brock voted
1. To override Veto of Education Appropriation (1970)—Funds for all education programs for 1971: elementary, high school, college, and vocational education.	Yea	Nay	Yea (7 to 1)	Nay.
2. Elementary and Secondary Education Act Extension (1970)—Grants to States for elementary and high school education.	Yea	Yea	do	Nay.
3. To Override Veto of HEW Appropriation (1970)—Overturning Presidential veto of bill allotting funds for all programs of Department of Health, Education, and Welfare: health services, mental health research, rehabilitation.	Yea	Nay	Yea (4 to 3)	Nay.
4. To Override Veto of Medical Facilities Act (1970)—Overturning Presidential veto of Hill-Burton Act extension. This program extended Federal aid to communities for building hospitals and nursing homes.	Yea	Nay	Yea (6 to 1)	Nay.
5. Voting Rights Act Extension (1970)—Extension of 1965 Voting Rights Act including provision for allowing 18-year-olds to vote.	Yea	Yea	Yea (5 to 3)	Nay.
6. Coal Mine Health and Safety Act (1969)	Yea	Yea	Yea (6 to 0)	Nay.
7. Water Resource Development Study (1969)—Established research program to study methods of preserving adequate supply of clean water for industrial and recreational uses.	Voice vote (Senator Gore supported).		Yea (8 to 0)	Nay.

OFFICIAL VOTES ON 50 IMPORTANT ISSUES—Continued

	How—			
	Senator Gore voted	Senators Kefauver, Walters, Bass, or Baker voted	A majority of Congressmen, other than Congressman Brock, voted [1]	Congressman Brock voted
8. Labor-HEW Appropriations (1969)—Funds for all Department of Health, Education, and Welfare programs and for all programs of the Department of Labor including vocational education and retraining programs.	Yea	Yea	Yea (5 to 0)	Nay.
9. Department of Transportation Appropriation (1969)—All programs of the Department of Transportation including air safety and airport construction aid, and highway safety and highway beautification programs.	Yea	Yea	Yea (8 to 0)	Nay.
10. Education Centers for the Handicapped (1969)—For development of teaching methods and materials for the handicapped.	Voice vote (Senator Gore supported).	do	do	Nay.
11. Economic Opportunity Act Extension (1969)—Continuation of Headstart program, legal services, alcoholic and drug rehabilitation, health services, and other Office of Economic Opportunity programs.	Yea	Yea	Yea (5 to 2)	Nay.
12. Arms Control Agency Extension Act (1968)—To extend the Arms Control Agency for two years	Voice vote (Senator Gore supported).	do	Yea (5 to 3)	Nay.
13. Interior Department Appropriations (1968)—Including Fish, Wildlife, and Forestry Conservation Office of Coal Research, Bureau of Mines, and Bureau of Indian Affairs.	do	do	Yea (8 to 0)	Nay.
14. HUD Appropriation (1968)—Funds for all programs of the Department of Housing and Urban Development including urban renewal, basic water and sewer grants and model cities funds. Also included funds for civil defense, veterans' benefits, Appalachian aid, and the space program.	Yea	Yea	do	Nay.
15. Food Stamp Amendments (1968)—Extension and expansion of food stamp program	Voice vote (Senator Gore supported).	do	do	Nay.
16. Agriculture Appropriation (1968)—Funds for all Department of Agriculture programs for 1969	do	do	do	Nay.
17. Housing and Urban Development Act (1968)—Increased urban planning and mass transit aid, increased college housing aid and extention of programs of 1965 Housing Act.	Yea	Yea	do	Nay.
18. Supplemental Appropriations (1968)—Funds for disaster relief, veterans' benefits, airport and highway aid, narcotics control, medicare, nursing student aid, Teachers Corps and education programs for the handicapped.	Yea	Yea	Yea (7 to 0)	Nay.
19. Model Cities Appropriation (1967)—Funds for model cities projects	Yea	Yea	Yea (5 to 3)	Nay.
20. Elementary and Secondary Education Amendments (1967)	Yea	Yea	do	Nay.
21. Appalachia Development Act Extension (1967)	Yea	Yea	Yea (8 to 0)	Nay.
22. Agriculture Appropriation (1967)—Funds for all Department of Agriculture programs for 1968	Yea	Announced for	do	Nay.
23. Elementary and Secondary Education Amendments (1966)	Yea	Yea	Yea (5 to 3)	Nay.
24. Supplemental Appropriation (1966)—Funds for veterans' benefits, aid to medical and college libraries and vocational education.	Yea	Yea	Yea (6 to 2)	Nay.
25. Urban Mass Transportation Act (1966)—Authorized aid to State and local governments for mass transit systems and research.	Yea	Absent	Yea (4 to 3)	Nay.
26. Minimum Wage Act (1966)—Increase minimum wage and extend coverage to workers not previously covered.	Yea	Yea	Yea (5 to 3)	Nay.
27. Demonstration Cities Act (1966)—Established model cities program	Yea	Yea	Yea (4 to 3)	Nay.
28. Omnibus Rivers and Harbors Act (1965)	Voice vote (Senator Gore supported).	do	Yea (6 to 2)	Nay.
29. Health Professions Education Assistance Act (1965)	do	do	Yea (5 to 2)	Nay.
30. Medicare (1965)—Health insurance for the elderly	Yea	Yea	Yea (6 to 2)	Nay.
31. Food and Agriculture Act (1965)—Combined feed grains, cotton and wheat price-support programs. These programs were in effect practically unchanged through 1970.	Yea	Yea	Yea (5 to 3)	Nay.
32. Agriculture Appropriation (1965)—Funds for all Department of Agriculture programs for 1966	Yea	Yea	Yea (8 to 0)	Nay.
33. Appalachia Development Act (1965)—Construction of highways, industrial parks, hospitals, schools, water and sewer systems, and other facilities in order to encourage development of industry and trade.	Yea	Yea	do	Nay.
34. Housing Act (1965)—Established or extended programs for urban renewal, college housing, and water and sewer system construction aid.	Yea	Yea	Yea (6 to 2)	Nay.
35. Supplemental Appropriation (1965)—Funds for social security, air pollution, mental health and medical student aid.	Voice vote (Senator Gore supported).	do	Yea (5 to 3)	Nay.
36. Establishment of Department of Housing and Urban Development (1965)	Yea	Yea	do	Nay.
37. Elementary and Secondary Education Act (1965)	Yea	Yea	do	Nay.
38. Labor-HEW Appropriation (1964)—Funds for all programs of Department of Health, Education and Welfare and Department of Labor.	Voice vote (Senator Gore supported).	do	Yea (6 to 1)	Nay.
39. Food Stamp Act (1964)—Program for relief of needy families and relief of agriculture over-supply problem.	do	do	Yea (6 to 2)	Nay.
40. Combined Cotton and Wheat Act (1964)—Wheat and cotton support program including relief for domestic cotton mills.	Yea	Yea	Yea (7 to 1)	Nay.
41. Agriculture Appropriation (1964)—Funds for all Department of Agriculture programs for 1965	Voice vote (Senator Gore supported).	do	Yea (6 to 1)	Nay.
42. Economic Opportunity Act (1964)—Provided work-study program for college students, "Operation Headstart" for pre-school children, adult education programs and other Office of Economic Opportunity programs.	Yea	Yea	Yea (6 to 2)	Nay.
43. Library Services Act (1964)—Extension of program to provide aid for construction of community libraries.	Voice vote (Senator Gore supported).	do	Yea (5 to 1)	Nay.
44. Agriculture Appropriation (1963)—Provided funds for all Department of Agriculture programs for 1964	Yea	Yea	Yea (8 to 0)	Paired against.
45. Supplemental Appropriation (1963)—Provided funds for social security and public health programs, veterans' benefits, Federal prisons, the National Park Service, and educational television.	Voice vote (Senator Gore supported).	do	Yea (7 to 1)	Nay.
46. Arms Control and Disarmament Agency (1963)—Provided funds for operation of this agency	Yea	Yea	Yea (6 to 2)	Nay.
47. Air Pollution Control Act (1963)—Authorized aid for State and local pollution control programs and research programs.	Voice vote (Senator Gore supported).	do	Yea (7 to 1)	Nay.
48. Feed Grains Act (1963)—Provided price supports for corn and other feed grain producers	Yea	Yea	Yea (5 to 3)	Nay.
49. Area Redevelopment Act (1963)—To encourage industries to locate in economically depressed areas	Yea	Yea	do	Nay.
50. Health Professions Education Assistance Act (1963)—Medical school construction and assistance to medical students.	Yea	Yea	do	Nay.

[1] Includes pairs and announced positions.

EWING WINS BABE RUTH WORLD SERIES

Mr. WILLIAMS of New Jersey. Mr. President, in a hard-fought double header, Ewing Township, N.J., won the Babe Ruth World Series last weekend. The team, having lost one game to their opponents earlier in competition, had to make it two straight to clinch the championship. They did just that, winning the first game by shutting out the opponents 1–0. The second game was won by the margin of 7–2.

I am very proud of these fine young New Jerseyites and congratulate them on being No. 1. I also wish to take this chance to comment on the hard work, dedication, and sacrifice that made this championship possible. Bringing this title to New Jersey and to Ewing Township took some doing. The raising of funds for regular competition plus those extra demands of the trip out to California was a community affair.

In addition, special mention should be made to the guidance and dedication provided by Joe Sgro and his staff—Reggie Bentivogli and Carl Gray.

Mr. President, this is indeed a proud moment for these young men and for all of us from New Jersey. However, there is something here for all of us to learn. These young men won because they were willing to put in the work and polish the natural talent necessary to be the best. I am sure that their success on the field is just one example of their striving for excellence. While congratulating them, I know we will all learn from them and

others of the younger generation who have given us occasion to be proud.

CONGRATULATIONS TO THE CHAMPS

Mr. WILLIAMS of New Jersey. Mr. President, it is a pleasure and an honor to inform the Senate that the World Little League series champions of Wayne, N.J., came to Washington yesterday.

Their host here is their Congressman, BOB ROE, Democrat of the Eighth District. I understand a fine time is being had by all and that the Wayne champs are able to get in some sightseeing while in Washington.

These fine young New Jerseyans defeated their opponents 2–0 in a hard-fought battle. The game, in Williamsport, Pa., last weekend, was attended by over 3,000 residents of Wayne.

All of us appreciate what it means to be the very best there is. These young men have proven their worth—they are champs. I salute them and wish them well. May their victories on the playing field be the measure of their future successes in life.

I ask unanimous consent that a story from the Sunday Record of August 30, by Ron Drogo, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LITTLE LEAGUE CHAMPIONS: WONDERFUL WAYNE

(By Ron Drogo)

WILLIAMSPORT, PA.—The big bats of Wayne N.J., were stilled yesterday, but little Dave Shaver made sure the Jersey champs became the World Little League champions.

Shaver, who had only one infield hit in two previous Series games, lashed a two-run double to left-center in the second inning to give Wayne a 2–0 victory over Campbell, Calif., in the World Series final.

Shaver's hit and some sparkling defensive play made Steve O'Neil a winner although he struggled throughout. The righthander allowed six hits, walked two and left nine California runners stranded, six of them in scoring position.

"With Steve far from his best and our big hitters handcuffed, I never believed we could win," said Manager Gene Cancellieri. "But our defense was great and little Davy really came through."

Shaver's two-bagger, a liner which bounced past centerfielder Kevin Linnane, scored Ron Webb and Bob Houghton, both of whom had singled.

Wayne got just one more hit, Mike Fantau's fourth-inning single, off big Tom Davis.

"We weren't ready for a pitcher that good," Cancellieri said. "He was just fantastic. I can't believe we did it."

Davis fanned 12, including Len Fruci three times. Fruci brought a .600 batting average into the final and had hit 11 homers in 14 games, including two here.

DEFENSE AIDED O'NEIL

O'Neil, who had no-hit Valleyfield, Que., Can., Wednesday, really didn't have much. But the Wayne defense helped him out of serious jams in the first two innings.

Two bloop singles put Campbell runners on first and second with two out in the first. But rightfielder Fantau made a fine one-handed catch of Hank Rowland's liner to end the threat.

In the second, the losers loaded the bases with one out. But O'Neil fanned Steve Esau and Shaver made a running catch of Ricky Roth's liner in right-center.

The Californians had runners on in every inning except the sixth. O'Neil retired the side in the final inning on a come-backer and two strikeouts.

"I felt a little tired and stiff," O'Neil said. "I just couldn't throw hard at all."

"He was quite nervous before the game," Cancellieri said. "And he was tired because he usually gets more than two days rest."

Davis was overpowering with his fastball and added to its effectiveness with a good off-speed curve. Craig Kornfeld, Fruci, Mark Epstein, and O'Neil, the heart of the Wayne lineup, got just one hit. That was an Epstein single with two out in the first.

"He stopped our meat," Cancellieri said, "but our balance was the key."

Shaver, the little centerfielder who hadn't gotten many hits or much recognition, was the boy who brought the Little League World Series championship to New Jersey for the first time since 1949 when Hammonton won it.

"I can't believe it. It's great, but I just can't believe it," said Cancellieri.

TOURNEY NOTES

Nicaragua took third place by beating Highland, Ind., 3–0, in morning consolation game . . . More than 20,000 people watched final, many of them sitting on grassy hill behind outfield fences . . . Wayne pitchers, O'Neil and Kornfeld, did not allow a run in three World Series games . . . The new champs leave for Washington, D.C., today and have audience with President Richard Nixon tomorrow.

AUTHORIZATION OF APPROPRIATIONS FOR MILITARY PROCUREMENT AND OTHER PURPOSES

The ACTING PRESIDENT pro tempore. The hour of 9 o'clock having arrived, the Chair lays before the Senate the unfinished business, which will be stated.

The legislative clerk read the following:

A bill (H.R. 17123) to authorize appropriations during the fiscal year 1971 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces, and for other purposes.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. The question is on agreeing to amendment No. 862.

THE M'GOVERN-HATFIELD AMENDMENT

Mr. PERCY. Mr. President, I do not intend to vote for the McGovern-Hatfield amendment. I have had grave reservations about it from its inception as an effective means of ending the war. Although its authors have made commendable and frequent efforts to modify its most controversial features, I still feel it would detract from our efforts to negotiate a settlement of the war which would end the war, not just American participation in the war.

I take second place to no Senator in my deep desire and commitment to end the war in Vietnam. I have believed for many years that the war has not been in our national interest, does not affect our own vital national security, and should be ended.

I continue to believe that the way to end the war is to promote meaningful negotiations, and I am not dissuaded by the failure so far of the Paris talks, because the recent appointment of Ambassador Bruce and the return to Paris of Xuan Thuy have set the stage for a new era in the negotiations. I have been doing everything I can to urge the President, Secretary Rogers, and Dr. Kissinger to give Ambassador Bruce a green light for peace.

The administration will have to introduce new positions if meaningful negotiations are to be realized. Now is the time. Once again, I renew my call for the appointment of a United Nations or other appropriate representative to help arrange a cease-fire in Vietnam and the opening of an international conference, all-Asian or otherwise, to end the war.

THE M'GOVERN-HATFIELD AMENDMENT—A REASONABLE TIMETABLE FOR WITHDRAWAL

Mr. SYMINGTON. Mr. President, last May the original text of this McGovern-Hatfield amendment was presented to Congress and the American people.

At that time, many voiced their approval of this amendment. Others, however, although they favored the idea of setting some sort of timetable for the withdrawal of troops from Vietnam, had objections to some of the provisions contained in the original amendment.

During the intervening 3 months, supporters of the amendment have worked earnestly to develop language which would meet most of these objections, without sacrificing the original intent.

I believe the time devoted to this end has proven to be well worth the effort and commend the final product the Senate has before it today.

This amendment, as now drafted, should go a long way in answering any questions which some had about the earlier version; and all Senators who are interested in preserving the role of the Senate in matters of foreign policy should support it.

Some criticized the withdrawal date of June 30, 1971, in the original amendment as a "cut-and-run" policy; but the December 31, 1971, date for "orderly termination of military operations" and "the safe and systematic withdrawal of remaining Armed Forces" can hardly be characterized in any such manner.

Surely, 16 more months for the orderly termination of this costly war, one that has now dragged on for more than 5 years, is a reasonable timetable.

In addition, of particular concern to many with respect to the original version was that it would "tie the hands" of the President, militarily as well as diplomatically.

That concern has been laid to rest.

The amendment now provides that if the President finds in meeting the termination date of December 31, 1971, the Armed Forces of the United States are exposed to "unanticipated clear and present danger," he may suspend the withdrawal for 60 days; and so report these findings to Congress within 10 days

in order that Congress can authorize a further extension.

Diplomatically, I believe the setting of a withdrawal date, combined with this provision of flexibility, could well provide a long overdue stimulus to the progress of the peace talks in Paris.

On the one hand, the setting of a specific withdrawal date will serve notice to the Government of South Vietnam that U.S. Armed Forces will not be on the Asian mainland for an indefinite period of time; and that it will, therefore, be in their best interest to seek an early negotiated settlement of the war on the best terms possible.

Until the United States takes such a firm position, why should the South Vietnamese be overly concerned about the progress of the negotiations?

On the other hand, the flexibility which the sponsors have built into this amendment gives the President a strong negotiating hand with the North Vietnamese and Vietcong. They have no guarantee that if they "wait it out" until December 31, American military forces will have been withdrawn. The President alone can delay the withdrawal by 2 months; and if found necessary request Congress to delay it even longer should the enemy launch a new offensive that would endanger the safe withdrawal of our troops.

The major intent of this amendment, however, is to give the Senate an opportunity to exercise its rightful role in the formulation of foreign policy—to share with the President the responsibility for a plan to bring about the orderly end to direct American military involvement in Southeast Asia.

An overwhelming majority of the American people seek this goal; and I believe the chances for obtaining it are far better if the Congress and the administration work together toward this all important objective.

I believe this amendment provides the Senate with an opportunity to exercise responsibly its role in foreign policy; and would hope, therefore, that it be adopted.

Mr. McGOVERN. Mr. President, I yield myself 2 minutes to reply to the excellent statement of the Senator from Missouri, who is a senior member of the Committee on Foreign Relations and the Committee on Armed Services. I commend him for the support that he brings to this amendment.

As the Senator knows, during most of the discussion and debate, the amendment has had a number of critics but very few positive defenders of our present course in Vietnam. Very few people understand why we have become so heavily involved in Indochina.

Most of the opponents of the amendment have contented themselves largely with criticism of the amendment, without making very much of a defense of the alternative, which is what is taking place in Vietnam now.

Does not the Senator think that the burden of proof really ought not to be on those who call for underinvolvement, who call simply for flexibility for the President, who are opposed to the surrender of the constitutional responsibilities that are placed on Congress? It seems to me that the burden of proof ought to be on those who, according to a recent projection by two defense experts, recommend a situation in which we would keep a residual force in Vietnam over a period running, perhaps, to 1975, which could lead to the death of another 15,000 Americans and the expenditure of another $50 billion.

The PRESIDING OFFICER. The time of the Senator from South Dakota has expired.

Mr. McGOVERN. I yield myself an additional minute.

Does not the Senator think that the burden of proof ought to be on those who defend that kind of course rather than the termination of the war?

Mr. SYMINGTON. If I may answer somewhat indirectly, under the Constitution Congress should have some say as to where, when, and how the youth of America are to be sent to fight and die for this country. We have had more than half a million Americans in Germany for over a quarter of a century. We have had some 60,000 military in Korea for over 20 years. We have hundreds of thousands in Southeast Asia. This policy will break the back of the economy of the United States if we are not more careful.

It is such world "baby sitting" policies which make it impossible in my State of Missouri to have adequate schools, adequate hospitals, adequate control of pollution, adequate care for our aged and ill. Too many people in my State live in a manner in which they should not live as citizens of the most prosperous Nation in the world.

As has been well said, all this is now getting to the point where we are taking money from the poor people in a rich country so as to give it to the rich people in poor countries.

The PRESIDING OFFICER. The time of the Senator from South Dakota has again expired.

Mr. McGOVERN. Mr. President, I yield 5 minutes to the distinguished Senator from Oregon.

Mr. HATFIELD. Mr. President, I, too, wish to express my appreciation for the eloquent statement by the distinguished Senator from Missouri (Mr. SYMINGTON) because it contributes greatly to the debate that has been taking place on the floor of the Senate.

Let us put aside all the rhetoric about whether or not we are supporting the President and whether or not we are undermining the negotiations in Paris or whether or not we are retreating into a new isolationism. These are not the real issues; they are not what are at stake here today. Rather, let us simply examine what the amendment prescribes. It says that the Congress supports the President in his currently announced withdrawal plan, that the Congress believes that the withdrawal should be completed by the end of 1971—an opinion shared by the majority of Americans—and that if the President finds it necessary or advisable to maintain troops beyond that time, then he should simply obtain the authorization of the Congress.

To be opposed to that proposition is to believe that the executive branch should be able to chart any course of policy in Indochina and maintain any level of troops there into 1972 and beyond without the Congress saying a single word.

It is the difference between those who would yield to the idolatry of the Presidency, those who would grant what amounts to one-man rule, and those who believe in the wisdom of the constitutional process which is designed to guide this country.

We who support the amendment believe that we have been granted, by the people and by our Constitution, an obligation and a duty to exercise a role in the determination of the policies guiding our Nation. We have constructed the amendment not to be in opposition and confrontation to the Executive, but simply as a means to share in the responsibility which is ours.

Today, we shall choose to assume that responsibility, or to continue to abdicate it.

The future of our institutions is at stake this morning. We have a chance to begin the renewal of our constitutional system. We have a chance to demonstrate that Government is truly by the people and for the people.

The PRESIDING OFFICER (Mr. HUGHES). Who yields time?

Mr. STENNIS. Mr. President, I yield myself 4 minutes.

This highly important amendment is, I think, as grave a matter as we could possibly have to consider in connection with the war in Vietnam. No one is happy about the war. Everyone wants the winding down and termination to be successful and to be as early as possible. I stated my main points yesterday, as I see it, that the pending amendment is constitutional. It is a limitation on the expenditure of appropriated funds, and Congress has the sole power under our system to appropriate money. Therefore, it can put limitations on that money.

The goal being the same, however, the real question is how to do it. I think that as of now the program of Vietnamization and withdrawal is fairly successful. I think that the power of the South Vietnamese Army is growing. I was skeptical about the matter at first. However, my opinion now is that the South Vietnamese Army is growing and really developing after all these years. It is now showing a capacity to meet these situations which, if it continues to improve, will perhaps be successful.

I frankly said all the time that we may reach a point where, if we withdraw troops too soon, we will leave the ones who are left behind in jeopardy. That is a key decision that will have to be made.

I think the difficulty of all these things is compounded if, in a feeling hardly of emotion, we attempt to help the situation by freezing in concrete here the termination date.

I think that no Chief Executive of the Nation can be effective as a negotiator or peacemaker or in the conduct of a war if he has one of his hands tied behind him. We had a policy that had our boys' hands tied behind them in the battlefield. Now, this amendment unmistakably ties the President's hand behind him. He is

trying to get the boys out with his left hand. But he has to keep this mailed fist in position.

The President has been wise to say, "I am not closing the door on aggressive action if it is necessary."

That is just commonsense. I am not an expert.

The PRESIDING OFFICER (Mr. HUGHES). The time of the Senator has expired.

Mr. STENNIS. Mr. President, I yield myself 1 additional minute.

The PRESIDING OFFICER. The Senator from Mississippi is recognized for 1 additional minute.

Mr. STENNIS. Mr. President, I plead with the Senate that as of now we should not stampede. Let us go right on down the road we are going, retaining whatever power the Chief Executive has as a negotiator and as a peacemaker. He is a man of discernment.

We should let him use whatever discretion he can exercise. We should not only let him do that, but we should also keep the responsibility on him.

I feel that the President is trying to do everything he can. If I did not feel that way, I would not say what I am saying.

I think that sometimes we need someone to rock the boat, but not now in this matter.

I hope that by a clearcut, clean, and large majority the Senate rejects the amendment.

The PRESIDING OFFICER (Mr. HATFIELD). Who yields time?

Mr. McGOVERN. Mr. President, I yield 3 minutes to the Senator from Iowa.

The PRESIDING OFFICER. The Senator from Iowa is recognized for 3 minutes.

Mr. HUGHES. Mr. President, I thank the distinguished Senator from South Dakota.

My contribution here this morning will be brief. I think that over the course of the year and 8 months that I have been a Member of the U.S. Senate, this particular subject matter has had the greatest debate of any subject matter that has been discussed before the Senate.

I think that the pros and cons of the question before us today are probably as clearly put before the American people as any other question has ever been.

I simply believe that the distinguished Senator from Oregon put the question very clearly when he asked if, in the minds of the American people, we, the elected representatives of the people in the U.S. Senate, wish to take this action to bring a logical conclusion to the war in Indochina.

This method, I believe, can totally disengage our troops from the war in Indochina and can do it with the fullest protection for American men involved in the combat area. It can also guarantee sanctuary to the civilians in that area, if they wish sanctuary and are in fear of their lives after we leave. And it will permit us to do our utmost to exert pressure for the repatriation of our prisoners of war who may be lodged in any of those nations.

We would be saying to the American people that these are the goals and these are the dates which allow enough latitude for the President to adjust to whatever problems might arise in the meantime. But we should act to achieve the maximum disengagement and withdrawal from this conflict. I think this is ultimately important in this soul-searching time for our Nation.

I have the greatest respect for the distinguished Senator from Mississippi, the chairman of the Armed Services Committee, and value his opinions highly, and also those of my other distinguished colleagues who have stated the other side of this issue.

I believe that we have demonstrated before the people of America that it is vitally important to say not only to our Nation but also to the world that we are ending this conflict, that we are going to negotiate a peaceful settlement, that we are going to withdraw all of our troops, and that Asian peoples, with the support we can give them, are going to have to take on the responsibility of their own conflict.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. Mr. President, I yield 3 minutes to the senior Senator from Vermont.

The PRESIDING OFFICER. The Senator from Vermont is recognized for 3 minutes.

Mr. AIKEN. Mr. President, Senators HATFIELD and McGOVERN are to be commended for their efforts to bring the war in Indochina to an early conclusion.

The debate on their amendment has been very much worthwhile.

It does not appear, however, that approval of this amendment would be any assurance that their objective could be attained.

Congress cannot fix a specific date for final withdrawal of our forces. I have always held the position.

President Nixon has announced his intention of withdrawing our troops at an early date and is effectively working toward this objective.

Let us look at the record to date.

On June 8, 1969, the President announced that 25,000 troops would be withdrawn before August 31, 1969.

This commitment was kept.

On September 16, he announced that another 35,000 troops would be withdrawn by December 15.

By November 27 this commitment was met, 3 weeks ahead of schedule.

On December 15, he announced that another 50,000 troops would be withdrawn by April 15, 1970.

That commitment was also kept.

On April 20, 1970, he announced that 50,000 more troops would be out by October 15 of this year plus 100,000 more by the last of April 1971.

The present rate of withdrawal indicates that this commitment will also be kept.

At this rate of withdrawal and considering all factors involved, I doubt that the adoption of the Hatfield-McGovern amendment would speed up the rate of our disengagement in Indochina.

A resolution expressing the sentiment of the Congress that the earliest possible withdrawal with safety is our goal would be more desirable and would indicate cooperation between Congress and the White House.

With 549,500 as the base figure, total withdrawal on current announced schedule by next spring will be 265,500 or nearly one-half the total in less than 2 year's time.

I believe that President Nixon fully intends to keep his promise to end this war and that adoption of the Hatfield-McGovern amendment would not enhance the prospects for an earlier end to our involvement in Southeast Asia.

The PRESIDING OFFICER. Who yields time?

Mr. McGOVERN. Mr. President, I yield 3 minutes to the Senator from Texas.

The PRESIDING OFFICER. The Senator from Texas is recognized.

THE AMENDMENT TO DISENGAGE OUR TROOPS FROM VIETNAM

Mr. YARBOROUGH. Mr. President, yesterday I placed before the Senate petitions bearing the names of more than 10,000 persons from my home city of Austin, Tex., requesting that all American troops be withdrawn from Southeast Asia by June 30, 1971. We are now about to vote on a request to the President to withdraw such troops by December 31, 1971. In so doing, we are asking the President to carry out his pledge to the American people in 1968 to settle the war in Southeast Asia. All the Hatfield-McGovern amendment does is to request the President to settle the war more than 2 years after he promised to settle it.

The President won the 1968 election by 0.43 percent—less than one-half of 1 percent—by promising to settle the war. What is wrong with voting, nearly 2 years after the promise was made, to ask the President to settle it? It should help him; he can point to congressional action as demanding and requesting it. We take the political responsibility off his back and place it on our own. This I am willing to do.

The war is not an Indochina war; it is an American war, fought in every instance by Americans and their hired mercenaries, South Vietnamese, Korean, Philippine, Thai—save only a token force of Australian and New Zealanders. We have poured over $110 billion into Indochina, have lost over 338,000 of our men dead and wounded, more than twice our losses in the Korean conflict and more than our total losses in World War I.

We have killed hundreds of thousands of South Vietnamese civilians and wounded over a million more. We have burned their villages, poisoned their fields and forests, virtually destroyed their civilization. The civilized world stands shocked at our ruling that it is proper and legal for an American military man to kill 18 women and children if he suspects that they sympathize with the Vietcong.

Who wants us in South Vietnam? Not the South Vietnamese people, not the

North Vietnamese people, not the Vietnamese people. Our own polls show that they want us out. Then what validity is there in our continuing to stay, to send back a long casualty list each week of American boys dead and wounded because we hire people to kill their own people, and some of our own are lost in the process.

It takes courage to vote for this measure—far more than to vote against it. Wayne Morse, Joe Clark, Ernest Gruening, and I are examples of the price one risks in voting against those who make billions off this unwise, stupid war. A director of Lockheed Aircraft ran against me and spent $6.5 million to gain my seat. That is a small price to pay if it gains one vote in the Senate for those who want this war to continue. But I have a faith that right makes might, and that right and wisdom will prevail here in the Halls of the Congress, as I believe it now does in the hearts and minds of the American people.

We have a chance today to vote for our little, timid request to the President to do by 1972 what should have been done 10 years earlier. The measure is years late, but it is never too late to start on a course of wisdom and justice.

Neither side here has a patent on patriotism. It is just as patriotic to oppose the senseless killings and the monstrous concentration jails of Vietnam, as it is to support them. A percentage of Americans taught the pleasure of killing in Vietnam will be unable to reorient themselves on their return to America, and murder in the street will continue here. Those who live by the sword will perish by the sword. As wise old Ben Johnson said:

Fear to do base unworthy things, is valour;
If they be done to us, to suffer them
Is valour too.

Mr. President, again I repeat my support for amendment No. 862, to end the war in Indochina, of which I am a cosponsor. In the last 10 years, this war, like a large and terrible cancer, has spread over the face of Southeast Asia, until today it is being waged not only in Vietnam, but in Cambodia and Laos as well. If it is not soon brought to an end, it may tomorrow engulf all of Asia. During these years, Congress has discussed and debated extensively the legal, economic, and moral aspects of the war, but despite our seemingly endless talk, Congress has shown very little desire to exercise the power expressly granted to it by the Constitution, and bring this tragic chapter in the history of America and the world to a close.

The amendment that is now before us offers an opportunity for each Member of the U.S. Senate to go on record as to whether he wishes to continue this terrible military involvement which has killed and maimed thousands of young Americans, ruined our economy, and sapped our national spirit, or take the action necessary to bring the war to a prompt and orderly end. Having carefully studied the information, such as it is, that has been presented to Congress regarding our involvement in Southeast Asia, and having personally toured the battlefields of Vietnam, I have come to the firm conclusion that I would be untrue to my duty to the people of the United States, to the citizens of Texas, who have elected me as the trustee of their public will, and to my conscience, if I did not give my full support to this reasonable and courageous effort to end America's involvement in this war and save the lives of our gallant troops.

The terrible truth which we in this country must face is that the Indochina war is a mistake. It is not a Democratic mistake or a Republican mistake, but rather an American mistake. It resulted from and has been prolonged by our blind obedience to a foreign policy that simply cannot work in the nuclear age. Instead of recognizing our blunder, both the Democratic and Republican administrations have continued to follow these outmoded theories with the result being a wider and more costly war.

During this tragic period in our history, attempts are constantly made to justify our continued involvement in this military misadventure. The American people have been subjected to a continuing flow of speeches, programs, conferences and promises regarding the war. Out of this war has come a series of words and slogans such as "pacification" and lately "Vietnamization" which are ushered in with great pomp and ceremony, only to evaporate in the hard light of reality. The American people have had their patience and trust strained to the breaking point. They are no longer willing to accept without question such shallow and fruitless plans for ending the war as Vietnamization or put their trust in so-called secret plans such as the one to which President Nixon continually refers. What they want is positive proof that Congress will put a stop to the killing of Americans in Indochina.

The amendment we have offered gives our people the action they call for. Since it is obvious that the administration does not know how to end this war or lacks the will to do so, it is Congress' responsibility to end it and end it now.

Our country cannot continue to bear the cost of this immoral and fruitless conflict. As of August 22, 1970, the Department of Defense reports that 43,418 of America's finest young people have died in battle in Southeast Asia. Another 8,425 persons have perished as a result of disease and injuries sustained in these foreign lands. This means that over 51,000 young lives have been abruptly ended before they reach their most productive years. In addition to the tragic loss of life, over 287,000 of our servicemen have been wounded, some crippled for life. Another 1,556 of our troops are either missing or prisoners of war. This is twice as many dead and wounded as we suffered in the Korean conflict, and more than our total casualties in World War II.

We can only wonder what the world has lost by the death of these young people. The man who could have cured cancer might have been among them. We will never know how many potential teachers, lawyers, doctors, engineers, scientists, and artists we have lost. Nothing we can say can ever bring the dead back to life or restore the wounded and crippled to health. We can, however, insure that no more of their generation will be sacrificed in this purposeless struggle.

In addition to the terrible loss of life, this war has played havoc with the economy of the Nation and halted progress in many vital domestic areas. Never in the history of our Nation have we been subjected to runaway inflation and rising unemploymnet at the same time. The cost of the war is being felt on every domestic front. There is not enough money to build and expand medical schools, so that doctors can be trained to treat our sick. Students cannot obtain loans to continue their education. Colleges and universities are turning away students because they cannot build facilities to accommodate them. The average American cannot purchase a suitable home or borrow money from a bank without paying interest at the rate of 9 to 10 percent a year.

In 1969, the Government admitted spending $29 billion on the Indochina war. This year it plans to commit another $20 to $25 billion on this struggle. Let us stop and think what this money could be used for in this country. As one author has suggested, the cost of 1 month of the war by itself could provide enough food to end hunger among 10 million Americans, finance the annual cost of State and local police forces, and train 100,000 scientists. The cost of 1 year of the war would be more than sufficient to double the social security benefits of 20 million Americans.

Instead of spending America's tax dollars where they would benefit the majority of our people, the administration continues to throw billions on the blood-soaked battlefields of Vietnam, Cambodia, and Laos, while attacking funds for education and health as inflationary. War is inflationary, the most inflationary of all physical governmental actions. Education is not inflationary.

The recent veto of the education appropriations bill is an example of how distorted our goals have become. The bill that passed both Houses of Congress was a modest measure, only $4.4 billion, in comparison to the great need for increased education in America. Although the President considers the expenditure of $88 per student so inflationary that he must veto this bill, he has shown no reservation whatsoever in paying $120 a month to each Thai, Korean, and Philippine lieutenant fighting in Vietnam. This administration, whose total budget request for health programs averages only $35 per person, does not mind paying sergeants in the Thai Army that fight in Vietnam $60 per month. The payment by our Government of combat allowances to the so-called volunteer forces of Thailand, South Korea, and the Philippines that serve in Vietnam which are higher than those we pay our own troops is one of the most shocking disclosures of this war. The American public would never had known that we are literally bribing other Asian nations to fight with us in

this war, unless the distinguished Senator from Arkansas, Senator FULBRIGHT, had not made this practice public. Since these facts have been poorly publicized in many of the newspapers of this country, I ask unanimous consent to have the following comparative tables, originally introduced by Senator FULBRIGHT, printed at this point in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

PHILIPPINE FORCES SENT TO VIETNAM[1]

	Monthly base pay and quarters allowances paid by Philippines	Monthly per diem and overseas allowances paid by United States	Monthly total
Brigadier general	$305	$210	$515
Colonel	235	195	430
Lieutenant colonel	195	180	375
Major	153	165	318
Captain	125	150	275
1st lieutenant	102	135	237
2d lieutenant	90	120	210
Master sergeant	53	76	129
Sergeant 1st class	53	45	98
Corporal	43	36	79
Private 1st class/private	43	33	76

[1] The average monthly per capita Philippine income is $16.67.

THAI FORCES IN VIETNAM[1]

	Monthly base pay paid by Thailand	Monthly overseas allowance paid by United States	Monthly total
Lieutenant general	$370	$450	$820
Major general	330	390	720
Special colonel	240	330	570
Colonel	190	300	490
Lieutenant colonel	140	240	380
Major	98	180	278
Captain	70	150	220
Lieutenant	50	120	170
Master sergeant	48	69	117
Sergeant	38	60	98
Corporal	33	50	83
Lance corporal	30	45	75
Private	26	39	65

[1] The average monthly per capita Thai income is $13.92.

Note: Quarters and rations paid by United States for both Thai and Phillippine forces.

Source: Department of Defense.

U.S. PAY OVERSEAS ALLOWANCES[1]

	Monthly average base pay[2]	Monthly overseas allowances[3]	Monthly total
Lieutenant general	$2,426.70	$65.00	$2,491.70
Major general	2,180.20	65.00	2,245.20
Colonel	1,425.30	65.00	1,490.30
Lieutenant colonel	1,209.30	65.00	1,274.30
Major	962.40	65.00	1,027.40
Captain	870.00	65.00	935.00
1st lieutenant	731.40	65.00	796.40
Master sergeant (E-9)	903.60	22.50	926.10
Sergeant (E-5)	395.40	16.00	411.40
Corporal (E-4)	330.60	13.00	343.60
Private (E-1)	124.50	8.00	132.50

[1] The average monthly per capita U.S. income is $285.08.

[2] U.S. Armed Forces are paid according to the number of years of service they have accumulated. Thus, there is a varying pay scale within each rank. The above figures were supplied by the Department of Defense based on the average number of years a person has served when he attains the given rank.

[3] In addition to the above amounts, which represent an allowance for "combat pay," the salaries of enlisted men serving in Vietnam are exempt from income tax and officers' salaries are exempt up to $500.

Rank	Thai forces in Vietnam: Annual overseas allowances paid by United States	Thai forces in Vietnam: Exceeds the annual per capita GNP of Thailand ($130) (times)	U.S. forces in Vietnam: Annual overseas allowances paid by United States[1]	U.S. forces in Vietnam: Annual overseas allowances U.S. forces would receive[2]
Lieutenant general	$5,400	41	$780	$150,470
Major general	4,680	36	780	132,120
Colonel	3,600	27½	780	100,925
Lieutenant colonel	2,880	22	780	80,740
Major	2,160	16½	780	60,550
Captain	1,800	14	780	51,380
Lieutenant	1,440	11	780	40,370
Master sergeant	828	6	270	22,020
Sergeant	720	5	192	18,350
Corporal	600	4½	156	16,515
Private	468	3½	96	12,845

[1] In addition to the above amounts which represent an allowance for "combat pay," the salaries of enlisted men serving in Vietnam are exempt from income tax and officers salaries are exempt up to $500.

[2] If paid in same ratio to annual per capita GNP of the United States ($3,670) as Thais are paid.

Note: Figures in columns 1 and 3 are from Defense Department. Figures in cols. 2 and 4 are arrived at by relating the Defense Department figures to the annual per capita gross national product of the United States and Thailand. The GNP figures used are from the World Bank Atlas 1969 and are for the year 1967, the most recent year for which accurate figures are available.

Mr. YARBOROUGH. Mr. President, the use of mercenaries in this war only underscores the futility of the entire operation. This type of hoax only widens the credibility gap that now exists in the minds of millions of our citizens.

The impact of this war cannot be measured strictly in terms of casualties incurred and dollars spent. The harm that has been done to our national will and spirit is beyond calculation. Not since the Civil War has this country been so divided and confused. With every day that the war continues, these divisions grow wider and more serious. In this time of crisis, the Nation cries out for strong moral leadership. But instead of talking sense to the people, the present administration only adds to the turmoil in the country by trying to convince our people that the prolonged plan of indefinite involvement called "Vietnamization" and fruitless excursions into Cambodia and other countries will bring what is styled as "peace with honor." The truth is that this so-called "peace with honor" is nothing more than a hollow slogan designed to intimidate concerned citizens into remaining silent on this matter. From the actions and policies of this administration, it is apparent that their concept of peace is total annihilation of the enemy, regardless of the cost. Or as stated in the words of an ancient Roman philosopher, "They make a desert, they call it peace." Such a policy will not only fail, but will no longer be tolerated by the American people.

Instead of "bringing us together" as promised in his campaign, the administration is fueling the fires of those forces who would suppress all free discussion and debate of this question. Even the Vice President of the United States has stooped to unleasing unwarranted and vicious attacks on anyone, including the Senators who support this amendment, who raises his voice against the fallacy of these polices. I know from personal experience the impact of these attacks. In my campaign for reelection, I was the subject of relentless barrages of false and malicious propaganda by those merchants of hate whose sole purpose was to distort and twist my work for peace. However, no public office or personal honor is worth the life of a single American. Therefore, regardless of the cost to me personally, I shall not relent in my efforts to rescue this country from this cruel war.

Mr. President, the amendment we are supporting presents a prompt and efficient means for ending this war. It calls for:

First, reduction in troops in Vietnam to a level of 280,000 by April 30, 1971;

Second, complete withdrawal of all American forces by December 31, 1971; and

Third, authority for the President to extend the withdrawal deadline by 60 days if our troops are exposed to a clear and present danger during the withdrawal process.

It is not a defeatist proposal, but rather a constructive plan for ending the war and freeing our resources to be used to battle against hunger, poverty, sickness, and ignorance.

In the final judgment of history, the greatness of a nation will not be measured by its ability to inflict misery, but by its ability to do good. Let us put an end to this war and enter a new era of American greatness.

Mr. President, I ask unanimous consent to have printed in the RECORD an editorial entitled "The Amendment To End the Shell Game," published in the Washington Post this morning.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE AMENDMENT TO END THE SHELL GAME

Over the weekend the Associated Press invited Senators McGovern and Griffin to argue for, and against, the so-called Amendment to End the War and while we don't agree with all of what Senator McGovern had to say (and least of all with the patently spurious title that has been given to this measure) we find ourselves disagreeing with just about everything Senator Griffin said. When his argument is not merely specious it turns upon itself in a way which seems to us worth noting as the Senate comes up to today's final vote.

What Senator Griffin winds up saying, on behalf of the administration, is that "There is no need at all for a law or anything else seeking to accomplish *what is already being done.*" He quotes Mr. Nixon as saying that his administration "has adopted a plan which we have worked out in cooperation with the South Vietnamese for the complete withdrawal of all U.S. combat forces on an orderly, scheduled timetable." He quotes Secretary Rogers as saying that this process is "irreversible"—that it "contemplates the complete withdrawal of the troops in Vietnam." and he acknowledges that a large part of this withdrawal, and therefore an important part of the timetable, has already been publicly announced; by next April, "an additional 150,000 troops will have come home."

So there is apparently no harm in the President's fixing some deadlines, a full year ahead, and in making flat and final commitments to eventual, total withdrawal. But

when the Congress proposes to fix a timetable which is no more binding, in effect, than Mr. Nixon's timetable, and is in fact quite consistent with it, this becomes "dangerous" and "disruptive" and a clear signal to the Communists that they "need not negotiate seriously, that they could attain by default what they could not win on the battlefield." The Communists, Senator Griffin tells us, have "in an infinite degree the capacity to walk with time."

Well, so they do. And so they can also read, which means that they can probably tell the difference between a piece of legislation which is open-ended, as currently revised, obliging the President only to ask for more time if he wishes to extend the deadline, and a public presidential commitment which is "irreversible." As a practical matter, the amended McGovern-Hatfield provision requires the President merely to do what he would have to do in any case to get the money he would need to stretch out the war; he would have to ask. When we are talking about an adversary with "an infinite . . . capacity to walk with time," McGovern-Hatfield offers no more incentive for stalling on negotiations than the President's own promises.

So our answer to Senator Griffin is very simple; if there is no *need* for a law to accomplish *what is already being done*, there can equally be no *harm* in a law which seeks only to accomplish *what is already being done*. The McGovern-Hatfield proposal does not, after all, *require* the President to follow a congressional timetable if he can improve upon it—although Senator Griffin seems to be arguing that it would. All it really does, in its present form, is to reinforce the President's announced intentions with a statement of similar intent on the part of Congress. In this sense, just because the amendment accepts the President's current sense of timing without foreclosing the need for a stretchout later on, it is as much an expression of support as it is a restraint. It is a sharing of responsibility, long overdue in this divisive and tormented undertaking, and it is beyond our comprehension why the President should not positively welcome it—above all, at a time when he and his lieutenants are at great pains to prove to us and to our adversaries that things are going our way. Our casualties are down, drastically, which is the most effective evidence we could have that the burden of the war is being transferred progressively to our South Vietnamese allies; the enemy, for reasons not yet entirely clear, is not pressing the war with the same old intensity; the South Vietnamese army is performing better every day, we are told. The Vice President is returning from an Asian tour aglow with progress reports.

If things were going badly, if there were ominous indications of an enemy buildup, if there were any real doubt in the minds of administration officials about their ability to make good on their timetable—that would give us all pause. But if that were the case, it would be all the more reason for the administration's being under some requirement to say so—to tell us what is going on, to prepare us for new adversaries, to rally support in the face of new challenges—which is all that McGovern-Hatfield in its final form would now require. It would oblige the executive branch to come clean with the rest of us so that we don't learn, as we did on April 30 of this year, for one example, of a crippling adversity in Cambodia, which was not worth mentioning in a full-dress Vietnam report 10 days earlier.

That is what has robbed our efforts of force and conviction—the endless shell game with public opinion, which only serves to bring on the great political upheavals when the hard facts can no longer be suppressed. The President blames the war critics for this; the Vice President finds it close to treason. But the process of public disillusionment over this war does not begin with the disillusioned; it has always begun with dissembling by the government. And the main virtue of the McGovern-Hatfield amendment is not that it will end the war, which it does not guarantee, but that it will require a certain degree of candor about the war, if our effort or our fortunes should take a bad turn, while imposing no real limitations on the President if things go well.

Mr. McGOVERN. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time be taken equally from both sides.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. McGOVERN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. McGOVERN. Mr. President, I yield 5 minutes to the majority leader, the distinguished Senator from Montana.

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. MANSFIELD. Mr. President, we are on the verge of a vote which will stand stark in the light of the continuing tragedy in Indochina. The vote is sought as a step toward peace in a time of war. Despite incessant talk of the one we remain enmeshed in the other. In my judgment, therefore, it is a necessary step.

We are still in Vietnam. We are still in Laos, deeper perhaps, than a year or 2 ago. The lives of Americans are still risked over Cambodia where they were not risked a year ago. The zone of combat, in short, does not contract; it expands. The war goes on.

To be sure, as Americans have been withdrawn in the tens of thousands, the tempo of ground combat has slowed. To be sure, in consequence, the rate of American casualties has dropped. As Commander in Chief, the President deserves every credit for bringing about this reverse thrust. He deserves every support in continuing to press the military withdrawal. Nevertheless, we cannot ignore the fact that despite his efforts, the totals of American dead and wounded continue to rise every day. They rise relentlessly, from week to week. As of August 22:

Wounded	287,216
Combat dead	43,412
Non-combat dead	8,392
Total dead	51,804
Total casualties	339,020

That was a week ago. Since then others have died; others have been wounded. What will the totals be when they are reported as of August 29? What of the week after? And after that? Where is the end, Mr. President, where is the end?

The Senate cannot evade its share of responsibility for the answer to such questions. The dead and wounded are not the President's obligation alone. The burden falls on all of us. What we do or do not in conjunction with the President, in the end, will determine the end of the road.

We cannot say, "Leave it to the President," and then wash our hands of the matter. The Senate so said at the beginning of this ill-fated military involvement, a half decade ago. We left it to a President. We raised no caveat. All in the name of leaving it to the President, we endorsed a war which we did not expect to begin. In the same name, by rejecting Hatfield-McGovern, will we now hail an American military withdrawal which has yet to take place?

We do not confront this vote on Hatfield-McGovern lightly or suddenly. It has been coming for a long time. In a legislative sense, it has been coming ever since last year when the Senate sought, in the Cooper-Church amendment on Laos to restrain the deepening involvement in Indochina. Then on June 24 the Senate voted for the Dole amendment, 81 to 10 to repeal the Tonkin Gulf resolution. In a legal sense that may have been redundant but, in my judgment, it was not a useless gesture. The repeal of Tonkin served notice once and for all that whatever its initial responsibility, the Senate was henceforth disassociating itself from a course of policy which had enmeshed us and was tending still to plunge us deeper into Indochina. Then, on June 30 the Senate voted 58 to 37 for Cooper-Church on Cambodia. In so doing, the Senate sought to establish a legal barrier to the enlargement of the commitment of American lives and resources as the Vietnamese tragedy expanded into that country.

I am only too aware that these actions to date have had a limited effect. The Senate's repeal of the Tonkin Gulf resolution has not yet brought an end to the involvement in Vietnam. Nor did the first Cooper-Church terminate our involvement in Laos. Even now, a creeping commitment is underway in Cambodia notwithstanding the Cooper-Church amendment. But who is to say these Senate measures were without effect? Who is to say to what other places and depths in Asia the inertia of present policy would have carried this Nation without the resistance of the Senate?

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MANSFIELD. May I have 2 minutes?

Mr. McGOVERN. I yield 2 minutes to the Senator from Montana.

Mr. MANSFIELD. We come, now, to Hatfield-McGovern. I respect the President's sincerity in opposing this amendment just as I do his intentions with regard to this tragic conflict. I know that he desires to restrain the involvement, to end the war and to hasten the American withdrawal.

I do not question the President's will or skill in conducting foreign policy and as Commander in Chief in the pursuit of these ends. I would seek only to reinforce them, as the Constitution intended, by

the exercise of the separate Senate function of advise and consent in concert with the President's powers. With all due respect, the difficulties are such, in my judgment, as to require a joint effort of this kind if there is to be an orderly termination of this conflict.

The Hatfield-McGovern amendment offers an opportunity for concerted action. It offers an opportunity to strengthen the President's efforts both abroad and at home in seeking to speed up the drawndown of American forces. It offers, therefore, an opportunity to reduce more rapidly toward zero the level of American casualties. It offers an opportunity to hasten our military exit from the Southeast Asian mainland where we had no vital interests which required us to lodge our military strength in the first place.

To bring to an end a mistaken policy; to save American lives, to help restore the inner unity of this Nation—reasons enough to support Hatfield-McGovern. I will vote for this amendment.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. Mr. President, I yield 4 minutes to the Senator from Arizona (Mr. GOLDWATER).

Mr. GOLDWATER. Mr. President, I do not think there is any question in any Senator's mind that this has been a wrong war. I do not think the idea of our getting into it was particularly wrong, but we never meant to win this war, and when you do not mean to win a war, for God's sake, do not get into a war. This is the first war in the history of our country which history will say we lost because we did not go into it with the will on the part of any President who participated in getting us into the war to win it. We could have won it. We could have won it 6 years ago, and in my opinion, had we used our power correctly, the war might never have started. But we allowed it to start.

It has been an expensive war, one of the most expensive in our history, not just in money, because that becomes an inconsequential cost when we compare money against men. It has divided our country as probably no war in the history of this country except the War Between the States has divided us. And it need not have divided our country had we gone into this war and had we made a decision to go into the war and at the same time made up our minds to win the war.

I hope that never in the history of this country will anything like this ever again be perpetrated against the American people. I think it has been a shame and a crime. I think history is going to blacken the names of those Presidents who got us into this position and refused to do anything about it.

It has weakened us in the eyes of the world. As I talk to friends around the world, it shocks me to hear what people are saying about the United States and the United States inability to make up its mind, inability to separate national politics from international policy, international policy on which depends the whole peace and freedom of the world. And yet we do not seem to have the courage—if I may say, the guts—to stand up and face it.

It rather sickens me to hear amendments coming up like this. I know it is perfectly within our constitutional rights to offer amendments like this, to control the spending by the President so that we might end the war, but I have to remind us that our President inherited these wrongs. He did not create them. He is the first President we have had to do anything about changing those wrongs. He is the man charged with the responsibility of going to war and emerging with peace.

We have some constitutional rights in this general area but, Mr. President, they are very, very fuzzy, and I would suggest to those who are constantly bringing up this type of amendment that they do as I have so often suggested—if they are not happy with the warmaking powers of the Congress, if they are not happy with the strategic, tactical, and force level decisionmaking powers of the Executive, let us offer constitutional amendments to the people to correct that. If we are not happy with the powers given to the President as Commander in Chief under the Constitution, then let us change it by constitutional amendment. Let us not try to get it changed by congressional edict.

I hope the amendment is soundly defeated. Even though I recognize the right of Senators to offer it, I think it comes at a poor time in our history, when we are trying to engage the enemy in meaningful talks. I do not think we are giving our negotiators any kind of handle at all. I hate to say this, but we are helping Hanoi every time we seek to hamper the President in ending a war that need never have started. I said that 6 long years ago, but, unfortunately, people would not listen.

Mr. STENNIS. Mr. President, I yield 4 minutes to the Senator from Kansas (Mr. DOLE).

Mr. DOLE. Mr. President, we have about concluded the Madison Avenue effort costing hundreds of thousands of dollars to sell the so-called "end the war" amendment which I have designated the "lose the peace" amendment—to the U.S. Senate. For the first time in history, U.S. Senators have raised funds directly to be used to lobby their follow Senators. It is fair to say, excluding those who have Presidential ambitions, the vote today will for all practical purposes be a vote of confidence or no confidence in the Vietnamization policy of President Nixon.

The various versions of the so-called "end the war amendment" should prove to everyone the impossibility and the impracticability of attempting to fix a date. While the sponsors would impose a fixed date on the President, it is interesting to note that they have had difficulty arriving at a date themselves.

First the war was to end on December 1, 1970; then December 31, 1970; then April 30, 1971; then December 31, 1971; and now March 1, 1972.

It seems strange, indeed, that the sponsors, having used five different, arbitrary dates in an effort to attract more votes, would now seek to hamstring the President who has been extracting us from South Vietnam.

I can imagine what the critics would be saying if President Nixon had changed his mind five different times on troop withdrawals or on South Vietnam policy.

The hard facts are that the President and only the President is the Commander in Chief—that the President and only the President can negotiate peace, and that despite the appeal of the so-called "end the war" amendment—which I designate the "lose the peace" amendment—it can best be characterized as a shallow appeal to the emotions and anxieties of good Americans who are weary of 7 years of war.

Politics might dictate supporting the amendment, but I believe the great majority of Senators have confidence in President Nixon's policies because he is demonstrating that we may achieve peace with honor—rather than retreat and defeat.

To those who say that 40 votes would be a moral victory, I say 40 votes for the amendment would be a moral defeat for this country.

Mr. STENNIS. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Mississippi has 18 minutes.

Mr. STENNIS. How much time does the Senator from South Dakota have?

The PRESIDING OFFICER. The Senator from South Dakota has 5 minutes remaining. Who yields time?

Mr. STENNIS. Mr. President, I yield 2 minutes to the Senator from Pennsylvania.

Mr. SCOTT. Mr. President, as I said yesterday and take this occasion to repeat, the attempt to determine how one extricates oneself from an unpopular war is difficult enough for the agency of government which is charged with the conduct of the war and with the extrication from it—namely, the executive department, under the Commander in Chief.

That difficult job is being well handled. The deescalation is going on according to plan and promise. The plans were announced and the promises have been kept. The credibility is good.

The American people clearly have accepted the fact that this is being done as well as it can be done, by one who was not initially responsible for the condition, but who inherited it, who grasped this particular nettle and is seeking to meet his responsibility for the security of the Nation and its Armed Forces by putting an end to this war as readily as it can possibly be managed.

I do not believe that any person in this Chamber could do as well. Certainly not under these circumstances. I do not quite understand why it becomes so necessary to establish a series of calendar dates. If the first date was good, why did they not adhere to it? If the second date is good, why not adhere to it? If they can get the prisoners of war out, let them tell us how they can do it. If they cannot get the prisoners of war out, why not be candid about it?

But in truth and in fact, to extricate

ourselves from the fantasy which has suffused and perhaps confused this debate, the only proper solution, I think, is to send word to the other nations of the world that they can still trust us, that we keep our promises, that the Senate of the United States has not been asked to take over the conduct of the war, that the President is doing what he undertook to do, and that this amendment is unnecessary and mischievous.

The amendment does serve to advance, of course, the popularity of individuals, who can manage considerable full-page publicity out of it; but aside from the ointment which it pours upon the individual and the aroma which may be sniffed by the gullible public, the amendment does harm and no good.

I, therefore, ask that it be defeated.

Mr. STENNIS. Mr. President, I yield 2 minutes to the Senator from Colorado.

Mr. DOMINICK. Mr. President, I have had the opportunity to listen to a good deal of this debate. One of the things that has intrigued me about the amendment is that it is billed as an end-the-war amendment.

Well, if we are going to end the war at the end of 1971, why do we not end it now? Why give the enemy 18 months' advance warning, so they can start killing more American men? It does not make any sense to me to say "You have 18 months' leeway to try and knock us off, and we will then get out."

Obviously, everyone wants to end our American presence in Vietnam as quickly as we can. It is equally obvious that if we are going to give the enemy 18 months' advance notice of what we are going to do, it will be impossible to achieve anything at the peace talks in Paris, and it will further endanger the process of withdrawal and Vietnamization under the program of the President. It will give the enemy a chance to build up tactically, so that he can use his own initiative wherever he feels like it and it will prohibit us from taking any action to upset enemy offensive buildups.

It just seems to me that when U.S. Senators try to act as tactical generals, at a time when we are fighting a war some seven or eight thousand miles away, we are making about as bad a mistake as anyone could make. So I hope my colleagues will vote with me to defeat this amendment.

Mr. RANDOLPH. Mr. President, today the Senate will vote on the McGovern-Hatfield amendment to establish a timetable for the withdrawal of American forces from Indochina. The language of the amendment is directed toward bringing to an end the involvement of U.S. forces—active combat and support personnel—in Vietnam and the other Indochina countries by not later than December 31, 1971. The major goal of the amendment—as stated by the sponsors—is to end the war in Vietnam. These objectives are earnestly desired by all Members of this body and by millions of Americans of all ages and social status. Let us hope that there is no implication in the title of this proposal, "An Amendment To End the War", that proponents want to end the conflict in Vietnam and that the opponents do not. It would be a tragedy if this impression were assumed by the people of this country.

All Senators must face the question of whether the pending amendment is the proper way and the best method of effecting American withdrawal and bringing peace to Vietnam. As have other Senators, I have faced that question. I have given it painstaking study. My conclusion is that the McGovern-Hatfield amendment will not achieve the totally desirable objectives.

It is my belief that the establishment of a fixed timetable by law will remove from the President of the United States critical flexibility which he needs in terminating American involvement, in pursuing the Paris peace negotiations, in shifting more responsibility to South Vietnam, and in securing a peaceful settlement. Any serious consideration of ending the Vietnam conflict must take into consideration progress on all of these fronts. I do not feel that the proposed timetable does this.

It has been argued that the revised amendment which allows the President sixty extra days in case of an emergency when "members of the American Armed Forces are exposed to unanticipated clear and present danger" provides the Chief Executive with needed flexibility. There is indication that some persons may have changed from a position of opposition to one of support based on this change. It is my evaluation that the adding of sixty days does little to enhance the options of the President. The fact remains that the timetable is established—give or take sixty days. While giving authority to the President to suspend the date of withdrawal of American forces, the amendment provides that he "may", within 10 days after the suspension, submit recommendations, including a new withdrawal date. It is stated that this is another concession to allow flexibility for the President and to lessen the rigidity of earlier versions of the pending amendment. I do not question the sincerity of the sponsors of the amendment. They are honorable and patriotic men. I find little in this provision however, which adds to the President's options or which changes the rigid nature of the otherwise fixed timetable to which he must adhere.

Realistically, if the Congress were to act on a proposal submitted by the President under the previously mentioned provision he would be required to begin an early campaign to secure support for his proposal. As the withdrawal date came closer, the chances of his presenting to the Congress a recommendation to change the date would diminish substantially. Thus, it is very questionable whether this provision could ever be used by the President if the need developed and if he chose to act.

I have stressed the issue of the President's flexibility. My reason for this is twofold: The President is required to bear the burden of implementing American policy on the battlefield and at the negotiating table. He is the leader responsible for the continuing decisions which must be made as the United States disengages from Vietnam. The Congress does not share and cannot share in the exact decisionmaking process and the McGovern-Hatfield amendment is certainly not written to provide detailed congressional guidance in those decisions. I think Senators will agree that such an amendment could not be written.

The establishment of a fixed timetable is just that—a timetable only. And within the limits of the timetable there is much remaining that is open to question. The President is basically left to confront and cope with those questions.

This is not to say that there must be complete freedom of action by the President or that the Congress should not become actively involved in determining future U.S. policies. The Senate advocated such action in passage of the Cooper-Church amendment for which I voted. But congressional activity in this area must be viewed in the context of the particular issue. In my opinion, the enactment of Cooper-Church was based on a different set of circumstances and to achieve a different objective. It was legitimate legislative action to establish the guidelines under which the President could move into Cambodia in the future. But the Congress does not take action merely to assert congressional authority. This should not be the end objective. So much of the debate has focused on this question that the impression is abroad that congressional authority is the only issue involved. The proposition that passage of the McGovern-Hatfield amendment would result in the sharing of responsibility for what happens next in Vietnam has been overemphasized. There is no doubt that passage of the amendment would place in the Congress a greater responsibility for the final outcome of the conflict—the manner in which the United States disengages and how a settlement is secured. However, there are degrees of responsibility. In the final analysis the major burden and the responsibility fall upon the President.

I have noted that the President is charged with the responsibility of conducting negotiations for the United States. He has been criticized for supposedly having downgraded the efforts to secure a negotiated settlement in the Paris peace talks, particularly because of the long delay in the appointment of a permanent negotiator. I certainly agree that the President should have moved more rapidly to name a representative to the peace talks and to bolster emphasis on and determination to try harder for a negotiated settlement. The stalemate in Paris has been extremely discouraging, but we must not write this effort off as hopeless. We must continue to hope and work for new initiatives.

There is considerable disagreement on the possible impact of the pending amendment on the Paris negotiations. Supporters of the amendment have contended that it would help to reach a negotiated settlement by forcing North and South Vietnam to confront the realities of ending their own war. I do not concur. Rather, it is my belief that the fixed timetable under which the President must proceed would eliminate any incentive on the part of North Vietnam to negotiate a final settlement. North Vietnam would have the knowledge of and

the fact of a fixed timetable. And it would be in a law mandated by the Congress—not negotiated by the President. I do not see in this posture any reason why the enemy would then rush to negotiate a settlement.

Mr. GRIFFIN. Mr. President, from the outset—from the time when the original version of this amendment was first presented to the Senate—there has never been any serious question about the outcome. The debate has been extended and the public relations efforts have been intense. But, in my opinion, no one really believed that this proposition would ever become law. Even if the amendment were to pass the Senate, it would not survive a conference with the House of Representatives—and everyone knows that.

So, the only real point of all of this long debate seems to be related to psychological impact. It is rather ironic but predictable, perhaps, that as we are about to vote and the outcome is quite clear an effort is being to portray rejection of this amendment as some kind of a victory for those who have championed it. I say this with the greatest respect for those who sponsored the amendment. Their motives and intentions are honorable.

However, at the same time, rejection by the Senate of this amendment will not be a victory in any sense, psychologically or otherwise, for those who have sponsored and advocated this amendment. The vote of the Senate will be, and it should be portrayed to the country and the world as a vote of confidence for President Nixon.

The PRESIDING OFFICER. The Senator's time has expired.

Who yields time?

Mr. McGOVERN. I yield 1 minute to the Senator from New York (Mr. GOODELL).

Mr. GOODELL. Mr. President, we are nearing a historic vote, a vote for a reassertion of congressional responsibility over the issues of war and peace, a vote to set a fixed date to end our involvement in the war in Southeast Asia, a vote to assist the President, if you will, in removing our troops for us to share the burden and pain of removing those troops.

From a handful of supporters last fall, we now will have a substantial number. I do not regard the vote, whatever it be, as a victory unless we win. But I think it is measurable and significant progress toward peace, measurable and significant progress toward the rightful assertion of congressional authority over the issues of war and peace.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. I yield myself 4 minutes.

Mr. President, I have been here several weeks, and so many other things have been going on that we have had scant attendance and seldom little contribution at the end of the debate, but this is an exception. Some excellent statements have been made here this morning, even though they were compelled to be brief. I am very gratified, and I thank those who have spoken this morning in opposition to the amendment.

True, it is a historic vote. For the first time, if this amendment is adopted, we will have voted to change direction in the midst of a war.

Mr. President, I have said before, but I say again, that if we are going to take away the discretion of the President of the United States in times of stress, regardless of who he is, take away his judgment, his power to act, and strip him of his responsibilities to be our negotiator, our terms maker, our peacemaker; if we are going to take away the symbol of our Nation, and that is what our Chief Executive is; if we are going to put him under a shroud, put him under the cold hand of death so far as his discretionary powers are concerned—if we are going to do that and immobilize him, then we ought to immobilize every single military man we have in Indochina, but not on the date contained in this amendment. I would advocate starting our withdrawal within 30 minutes after this vote is taken. I mean every word of that.

If the legislative body is going to resolve against our position in everything that comes with judgment and discretion, then I do not have the heart to continue to tell those boys that they are fighting for something worthwhile.

So I believe it is all or nothing today, and I think that ought to be clear and unmistakable.

No one has more respect than I do for those on the other side and for their great sincerity. I repeat over and over that it is a question of judgment.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. STENNIS. I say that this is a matter of judgment, not a question of patriotism. They are as patriotic as I am.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. STENNIS. I beg the Senator's pardon. I have to continue. My time is running.

So my parting word is that if we are going to immobilize the power of our Government at the White House, immobilize the President, who is the natural leader, then let us immobilize our Army and really come home.

I have no doubt that when the showdown comes on this vote, there will be, as there should be, a smashing majority, opposed to this amendment, regardless of its good intentions.

I yield to the Senator from Arkansas.

Mr. FULBRIGHT. I just wanted to express my deep appreciation to the Senator from Mississippi and his colleagues who have assured us that they do not think that those of us who support this amendment are unpatriotic. I think they are very generous in saying that they do not think we are unpatriotic citizens of this country.

Mr. ALLOTT. Mr. President, I rise to greet, and urge the defeat of, this piece of Senate business which was dealt with so brusquely the last time it made an appearance in our midst.

Senators will recall that this amendment was shunted away by its proponents when I tried to get it voted on in June. Still, I want to salute the sponsors of this amendment for allowing it to see the bright light of day. I am only perplexed as to why they now consider it a suitable time to discuss it. After all, 9 weeks ago our attempt to deal with this amendment was represented as a crime against humanity.

I suppose something must have changed. Perhaps the planets are in some especially appropriate conjunction. Perhaps the supporters of the amendment know a rule that is relevant—something like the rule for telling the months during which one may or may not eat oysters. That might explain why they were so desperately anxious to avoid voting on this in June. However, in the hurly-burly of modern life it is nice to see that the supporters of this amendment have a leisurely attitude. They are not to be rushed. They do not surrender to the sense of urgency that pervades so much of modern life. The pace with which they approach their cherished amendment has the stately grandeur of a graduation procession. Only the playing of "Pomp and Circumstance" is missing.

Mr. President, it is well known that I considered it appropriate to act on this matter some time ago, during the extensive and properly comprehensive debate on American foreign policy and the constitutional powers of the Commander in Chief. But it could well be that, by modern standards of "relevance," this amendment is more "relevant" right now. Surely the last thing one wants to do is get caught athwart this week's standards of relevance, so I yield, relatively cheerfully, on this point. However, I wonder if the same tolerance is prevailing among all the persons who have been following the promises made by the supporters of this amendment.

On May 2, Senators McGOVERN, HATFIELD, HUGHES, and GOODELL held a press conference at which they announced their intention to submit this amendment. In their joint statement at that time they said:

> The time has come for Congress to face a historic constitutional choice.

That was 17 weeks ago. Nine weeks ago I urged these Senators to allow the Senate to face this historic choice about which they feel so strongly. They would not hear of it. The junior Senator from South Dakota became very exercised and used very strong language about those who would hasten the process of facing this choice.

On May 7, Mr. President, the junior Senator from South Dakota made a speech in which he assured the generous financial supporters of this amendment that the vote on the amendment would come "in approximately 30 days."

After 54 days had passed I did my best to enable the distinguished junior Senator from South Dakota to get on with the business he and his contributors think so important. I urged that we vote on his amendment on June 29. But Senators will not soon forget the vivid way in which the junior Senator from South Dakota expressed his lack of enthusiasm

for voting on his amendment—even though a vote at that time would have come 24 days later than he originally promised.

On May 24, the Sunday New York Times carried a full-page advertisement asking for money to finance agitation on behalf of the "Amendment To End the War." A huge headline on the advertisement assured contributors that the amendment would come to a vote by July 1. On June 29, I gave the supporters of the amendment a last chance to make that advertisement honest. Senators will recall the colorful language this educed from the junior Senator from South Dakota.

Still, better late than never. The distinguished junior Senator from South Dakota, I am sure, has now determined that it will be appropriate to vote on this amendment approximately 60 days after the date promised in the advertisement.

So now, after all the delay, we come up to what promises to be a fairly short debate followed by a predictable defeat for the amendment. After the properly thorough debate on Southeast Asian policy during May and June, it is hardly necessary for us to rehearse our respective views.

Mr. President, least of all is there need for me to meet this meandering amendment with fresh zest and spirited debate. I have spoken on this amendment at greater length and with more seriousness than have most of its proponents.

On June 25, when I introduced an amendment with the same wording as this amendment, there was talk about it being "premature" to vote. At that time I said this:

Mr. President, let us all face some elementary facts. Every Senator is a responsible citizen. Every Senator is a responsible member of the Senate. Every Senator has been pondering the difficult problems of American disengagement in Vietnam for years. I very much doubt that there are any Senators who are not clear in their own minds as to where they stand on the so-called "Amendment to End the War."

Mr. President, it has also been rumored that it is premature to consider this measure now because the McGovern-Hatfield Amendment, of which this is a true copy as to its contents, was due to be revised in some particular. I do not know whether the rumored revisions are more than rumors. I do know two things.

First, if some Senators want to introduce a revised version of the so-called "Amendment to End the War," then they may do so.

Second, I know that a lot of money has been raised from television shows and newspaper advertisements on behalf of the Amendment on which my Amendment is modeled. The money has come from people who sent money to support appeals for that "Amendment to End the War." These appeals have been going on for nearly two months. I think the people who expressed this support deserve to have a prompt vote on the amendment they sent money to support.

Now, I understand that the junior Senator from South Dakota would rather prefer to bring a matter exactly like this before the Senate a little later in the year. Of course it is his privilege to do so. He can bring it up, with his name on it, whenever the spirit moves him. But I should have thought the spirit would move him rather more quickly than it now appears.

At that time, Mr. President, I voiced my puzzlement as forcefully as I could. I said this:

The junior Senator from South Dakota has spoken with admirable energy and astonishing frequency on the subject of squarely confronting what he considers the vital issues of the day. He has not been reluctant to share with a wide public his opinion that it is time for the American people, and especially the Senate, to stand up and be counted on controversial matters.

Given the fact that the junior Senator from South Dakota thinks his amendment is vital to the future of the Republic; and given the fact that he is ardently in favor of hastening consideration of vital matters in this chamber; and given the fact that he is anxious to stand up and be counted on the question his amendment touches; given all this, then I should think I am doing the junior Senator from South Dakota a distinct favor by doing what I can to expedite a vote on his amendment.

In my remarks of June 25, I expressed my views on the constitutional issues involved in the related debates we have been having this spring and summer. I said this:

Let me be very clear. I am convinced that the various measures designed to dictate disengagement policy to the President raise serious constitutional issues. In fact, I am convinced that they involve serious constitutional transgressions. They violate the spirit and the letter of the Constitution.

With regard to the spirit of the Constitution, one thing is very clear. Our Constitution is a product of the eighteenth century. According to some people, this makes the Constitution hopelessly out of date. I respectfully disagree. I say that our Constitution was a product of the richest period of political philosophizing the world has ever seen. I know that our Constitution was the product of the greatest single deliberative body in the history of human politics—the Constitutional Convention of 1789. I know that the very heart of the political philosophy embodied in the Constitution is the idea of the separation of powers. The towering figures who drafted our founding document understood the overriding necessity for a rational division of labor among political men and institutions. I respectfully suggest that the legislative amendments designed to circumscribe and fetter the President violate the spirit of this Constitution.

Mr. President, in addition, these amendments violate the letter of the Constitution. The Constitution stipulates, and nearly two centuries of precedent attest, that the President is the Commander-in-Chief and that, once troops are committed to battle, the responsibility for their intelligent use falls on the President.

No Congress has failed to understand this and I am confident that when, in a very short while, we put this pending amendment to a vote, this Senate will demonstate that it understands the letter and the spirit of the Constitution. This Senate will demonstrate that it understands the facts of our relevant constitutional history. The Senate will demonstrate that it has no appetite for hasty and reckless tampering with our settled constitutional arrangements. The Senate will demonstrate that it has no desire to undertake an unprecedented usurpation of Presidential power at a moment when the President is engaged in the delicate task of extracting this Nation from a war he inherited. The Senate will demonstrate its accord with the Nation's public opinion as measured by every poll—the opinion that the accepted role of the Commander-in-Chief should not be mutilated by the Senate. The Senate will demonstrate all these things by rejecting this amendment.

Mr. President, in that same speech I explained why I thought an amendment of this sort would damage the Paris peace talks. I said this:

Obviously, there is little talk now because the other side does not want peace on any terms other than its own. What we must ponder is the possibility that, were we in the enemy's position, we would behave in exactly the same way as long as the United States Senate had failed to act on a measure that would make it unnecessary for the enemy to negotiate.

Is it not clear that this would be one of the most noxious effects of passing this measure? Is it not clear that this measure would make it unnecessary for the enemy to ever get serious about reaching a negotiated settlement to the war? Is it not clear that this amendment would only prolong the violence and killing in Asia.

Further, is it not clear that passage of this measure by the Senate will have somewhat the same terrible effect even if it is not passed by the House? Is it not clear that the enemy will take this as a sign that the American Government has no expectation that meaningful talks will ever take place, in Paris, or anywhere else? This is why I oppose this amendment on two grounds. First, it tampers with proven constitutional arrangements as regard the vital powers of the Commander-in-Chief. The second reason for opposing the amendment is that it would have a dangerous effect, should its provisions ever become law. These provisions cut the ground from under our judicious withdrawal policy, a policy that is designed to give Vietnamization a fighting chance to succeed.

The vital question here is what would a rash and inflexible withdrawal timetable do to the Vietnamization program which alone can guarantee that our many sacrifices have not been in vain.

Mr. President, in my remarks of June 25 I reviewed the long history of American concessions and warned that another concession in the form of an amendment such as this would not serve the cause of peace. I said this:

We have agreed to fourteen holiday ceasefires. Our enemy violated every one of these and even launched the infamous Tet Offensive of 1968 during such a holiday cease fire.

We worked for the neutralization of Laos. But the enemy kept 67,000 troops in that country.

For years we were told that meaningful negotiations would begin if only we would make some gesture of willingness to negotiate. We made numerous such gestures, in public and private, through regular and irregular channels, and the Communists still showed no inclination to enter into meaningful negotiations.

We were told that meaningful negotiations would begin if only we limited the bombing of North Vietnam. We did so, but the meaningful negotiations did not materialize.

We were told that meaningful negotiations would begin if only we stopped all bombing of the North. We did so, and still meaningful negotiations did not materialize.

We were told that meaningful negotiations would begin if only we could get the South Vietnamese to participate. We did get them to participate, and still there have been no meaningful negotiations.

We were told that meaningful negotiations would begin if only we would agree to the inclusion of representatives of the Viet Cong in the negotiations thereby tolerating the fiction that the Viet Cong are truly independ-

ent of North Vietnam. We did agree to include the Viet Cong in the negotiations, and still there have been no meaningful negotiations.

We were told that meaningful negotiations would begin if only we began to withdraw some troops from South Vietnam. We began withdrawing troops and still no meaningful negotiations began.

Most recently (and most implausibly) we have been told that meaningful negotiations would begin if only we would send a "top level" personage to head our negotiation team in Paris. Now I reject the idea that Mr. Phillip Habib is not a top level American official. But in any case, it is important to notice that we have had first Ambassador Averill Harriman and then Ambassador Henry Cabot Lodge at the head of our Paris delegation, and still there have been no meaningful negotiations.

Mr. President, the lesson is clear. America has been conciliatory. We have gone beyond the call of duty—sometimes beyond the bounds of prudence—to encourage the enemy to begin meaningful negotiations. I hope we shall continue to make every effort to get the negotiations off dead center. But all of us who hope for some peaceful resolution of the current conflict should note three things.

First, the many American concessions so far have been taken at the initiative of American Presidents. They have been exercises of the Commander-in-Chief's traditional latitude.

Second, if meaningful negotiations are ever going to come about, it is not unlikely that they might come about as a result of other Presidential initiatives regarding the use of American forces.

Third, if meaningful negotiations do not come about, it will be all the more crucial to preserve the Commander-in-Chief's flexibility and maneuverability as he works to achieve a safe and honorable non-negotiated American disengagement in that area.

Mr. President, again the next day, June 26, I urged the Senate to bring this matter to a vote, and to remember the real nature of the differences that divide us. I said this:

There is a curious irony here. It is rare that Senators become so deeply divided on constitutional issues. Yet the current deep division stems from a relatively minor disagreement over means to an end.

Let us be very clear about this. One hundred United States Senators long for peace. They share with the President an intense desire to free American men from dangerous service in Vietnam. The differences that divide us are real enough, but they concern questions of means.

Three days later, Mr. President, I again urged the Senate to allow this measure to come to a vote. I expressed the fear that any reluctance to vote on this—especially any reluctance on the part of the most vigorous proponents of the amendment—might be construed by the watching American people in a way detrimental to the good name of the Senate.

I explained that some persons might think that Senators were trying to delay a vote on this not to expedite Senate debate, but only to facilitate a gigantic advertising campaign designed to merchandise the amendment. I took note of the fact that the proponents of the amendment had already raised approximately half a million dollars for their advertising budget and I said this:

I am uneasy about an attempt to treat a piece of Senate business like a brand of toothpaste. I do not think huckstering has a place in our legislative process. And I am especially firm in my belief that the Senate's order of business should not be bent to conform to the prerequisites of any advertising campaign.

This resort to advertising raises some questions. Are the American people supposed to have their political judgments manipulated by Madison Avenue? And are we in the Senate supposed to hold our breath until the campaign has run its course, and then trim our convictions to suit whatever wind has been made to blow?

Let me answer these questions with three statements.

I do not think the American people like seeing legislative proposals merchandised like potato chips.

Second, I am sure the American people cannot be manipulated.

Finally, the Senate will not allow Madison's Republic to be governed by Madison Avenue. This is world's greatest deliberative body, and it does not need or appreciate advertising bombardments. Senators are elected to exercise their judgment, not to conform their decisions to generated passions.

In this regard, I am reminded of Winston Churchill's comment when in the dark days of September, 1941, he urged American leaders not to allow their decisions to be swayed by the fluctuations of the Gallup poll. Churchill put it this way: "I see (it said) that leaders should keep their ears to the ground. All I can say is that the British nation will find it very hard to look up to the leaders who are detected in that somewhat ungainly posture."

Mr. President, the American people do not expect Senators to adopt that ungainly posture. I am sure Senators have settled opinions on the pending Amendment and are ready to vote. To them I suggest Mark Twain's advice: "Always do right. You will please some people and you will amaze the rest."

Mr. President, these were my views 2 months ago. At that time, it was already past the date on which the sponsors of the amendment had promised their cash-paying supporters that a vote would be held.

These were my views then, and nothing has happened to change my views.

In fact, only three things have changed that are at all relevant, and these three things buttress the case for defeating this amendment promptly and decisively.

First, we have appointed a new and indisputably eminent chief negotiator for our delegation at the Paris peace talks. This is a time for forebearance as Mr. David Bruce takes up the arduous task of being civil and constructive with the obdurate Communist negotiators. This is no time to undermine Ambassador Bruce and the President who sent him. This is no time for the Senate to recommend a sudden lurch in the steady, effective policy of disengagement.

The second relevant thing that has happened since I stated my views on this subject is that the President has met his commitment to remove all American troops from Cambodia. The President gave his word and he kept his word, just as he has been keeping his word on every aspect of his announced policy disengaging America from the war he inherited. Thus, Mr. President, I conclude that the course of events in recent months has confirmed what most of us have never had any reason to doubt: the President can be relied upon to continue to fulfill his solemn commitment to withdraw American forces, and it is insulting as well as imprudent to bind him to a rigid timetable.

Mr. President, the third thing that has happened since I urged the Senate to vote promptly and negatively on this amendment is that the amendment has been altered. This raises an interesting point with regard to all the fund raising that took place before the amendment began to mutate.

That is, the people who sent in the money paid for a product that has since been taken off the market. It would seem that if a person orders a shirt he should not get a blouse.

I understand that the persons who have altered the amendment say that one important alteration—an extension of the deadline for achieving withdrawal—was necessitated because the amendment was not voted on as soon as they had anticipated. To which the proper answer is: Indeed it was not voted on as soon as they promised, but whose fault is that?

Again, I assume Senators recall the exuberant language with which the junior Senator from South Dakota greeted my attempt to help him bring his amendment to a vote in the time period he seemed to favor.

Actually, Mr. President, it is perfectly clear that the proponents of this amendment are marching to the beat of a different drummer. Indeed, the drummer to which they are marching is a drummer understood as a traveling salesman.

It is interesting that the supporters of the amendment are relying on short 30-second commercials. It is delightful to learn that the proponents of the amendment, who only a month ago were unwilling to vote because—they said—the vast complexity of their amendment, and the subtlety of its rationale, was such that they needed a huge amount of time to deploy it all, have now managed to boil it all down to the point where they can get their message across in 20 seconds.

Mr. President, one really must chuckle at some of the ironies in this.

First, it is no secret that this amendment is the current focus of interest in some liberal circles. Yet for years these circles have been warning the Nation about the large and pernicious influence of advertising.

The second irony has to do with their lament that they must present their views in commercials because they are not given enough exposure on television. I say this complaint is ironic because I so frequently see these Senators making this complaint—on television. This spectacle reminds me a bit of the student radicals who are constantly telling network newscasters that no one is listening to them—while ten million viewers listen to them.

The sponsors of these commercials are not having them shown in the Washington area, and that is unfortunate. Judging by the one I have seen, they are somewhat more diverting than the usual run of commercials.

This is not to say that they are substantial contributions to public enlightenment.

The one I have seen pictures a group of 12-year-old boys playing in a field. This commercial, which is about 12-year-olds, and must have been designed by 11-year-olds to appeal to 8-year-olds, presents an altogether pleasant scene, and is accompanied by an unexceptional message: Would it not be nice if these young men would grow to maturity in a peaceful world?

To which question the answer is "Yes." To which answer the response is: What has this homily to do with clarifying the best strategy for peace?

The Senators explain that they need to run these advertisements because they do not get as much television time as the President of the United States. That may be true—just as it is true that they do not get as much pay, votes or furnished rooms as the President of the United States. But it is not self-evident what all this has to do with justifying the practice of commercializing the legislative process.

So far as I can tell, the complaint registered by some of these Senators is really that the television networks do not treat them like the President of the United States. This network behavior is understandable because none of these Senators is President of the United States—although some of them were doing their best to change that situation. Therefore the criticism of the networks by these Senators is hard to comprehend.

Anyway, I suspect that these Senators get a good deal of time on network television.

Each of the three major networks carries a news interview show each Sunday. Senators feel free to accept invitations to appear on these shows, and frequently do appear. By tradition, the President does not appear on such shows.

Each of the three major networks has a late evening "talk" show that runs an hour and a half. Senators frequently appear on this kind of show. Presidents do not.

In addition, there is a fourth "talk" show—the "David Frost Show"—that is widely syndicated throughout the Nation. Senators frequently, and Presidents never, appear on this show.

Finally, the National Educational Television network has a variety of public affairs shows on which Senators frequently appear.

In short, it is well known that the networks have not been reluctant to provide forums for those Senators who are critical of the President and his policy for dealing with the war he inherited. Consider what this means in terms of television exposure for those Senators who are currently backing the amendment to end the war.

The President, whose traditional powers are at stake, opposes the amendment. Those Senators who not only support the amendment, but who support it so fervently that they want to be listed as cosponsors, number 25.

Now a conflict that pits 25 cosponsors and some other supporters against one is hardly unfair to the 25 plus persons, even when the one person is the President.

I would wager that if you totaled up all the time the President has taken on network television since coming into office—excluding press conferences, where he must conform to the wishes of the press, and excluding film clips of ceremonial activities—you will come up with a total of television time that is much smaller than the total television time enjoyed by those who oppose the President today by supporting this amendment.

Just consider the television fare of recent days. On Sunday, August 23, Americans could have watched a half hour of the distinguished junior Senator from Arkansas on NBC's "Meet the Press." Then, with a flick of the wrist, the miracle of modern communications enabled viewers to see the distinguished junior Senator from South Dakota on ABC's "Issues and Answers." True, the junior Senator from South Dakota was not alone; the distinguished junior Senator from Kansas was present. But that is just a hazard of free debate, and it certainly does not lend support to the idea that the junior Senator from South Dakota is having trouble getting himself on television.

Anyway, last Saturday evening Americans could have seen a debate on the war. The debators included—the junior Senator from South Dakota. Yesterday evening viewers could have seen two Senators whose views on the war span the spectrum from A to B. These two were the junior Senator from Arkansas and—the junior Senator from South Dakota. And there is more to come. This Friday evening viewers can see two Senators discuss the war. The Senators will be the junior Senator from Maryland and—surprise—the junior Senator from South Dakota. Perhaps on his Friday broadcast the junior Senator from South Dakota will discuss all the difficulties he has getting on television.

Meanwhile, we can get on with the business of dealing with this amendment I urge its decisive defeat.

Mr. MATHIAS. Mr. President, the ultimate question that a member of the U.S. Senate, or for that matter, any other American, must ask when considering the Hatfield-McGovern amendment is "How will this affect the safety and security of America?" All partisan temptation, all personal risk, all individual bias has to be subordinated to the answer to that overriding question.

I was an early, visible and vocal supporter of President Nixon's policy of gradual withdrawal from Vietnam. It seemed to me that a new administration charting a new course, headed in the right direction, should be fully supported. Acting on this position, I introduced last year a resolution calling for congressional ratification of the Nixon policy.

At that time I did not, however, fully appreciate the difficulties that lay ahead of President Nixon. His inheritance of gags, hobbles, and infirmities from preceding administrations has made this job impossible even for a President. At home he is exposed to the argument, pressure, and influence of those who still think no stake is too high to risk in achieving a solution by force. Overseas he is at the mercies of both a foe and an ally who share a common reluctance to negotiate an end to the war. The Government in Hanoi can trigger greater military effort and deeper involvement on our part by rattling its own sabers. The Government in Saigon can attain the same object by resting on its arms.

It is time to take the President off the spot where he is subject to pulling and hauling from so many directions.

We can remove the temptation from friend and foe alike to entice us deeper into the swamps. We can do so by embodying into law in a constitutionally proper way the President's proposals for removal of troops between this date and next April, and adopting a national policy to govern our conduct thereafter, with proper provision for alteration if events require it. Such a course might encourage negotiations. At the very least it is a positive step toward ending our participation in the war.

That is what the amendment before us would do. The language of the amendment follows:

AMENDMENT TO THE MILITARY PROCUREMENT BILL, H.R. 17123

At an appropriate point in the bill insert the following:

"1. In accordance with public statements of policy by the President, no funds authorized by this or any other act may be obligated or expended to maintain a troop-level of more than 280,000 armed forces of the United States in Vietnam after April 30, 1971.

"2. After April 30, 1971, funds herein authorized or hereafter appropriated may be expended in connection with activities of American armed forces in and over Indochina only to accomplish the following objectives:

"(a) the orderly termination of military operations there and the safe and systematic withdrawal of remaining armed forces by December 31, 1971;

"(b) to secure the release of prisoners of war;

"(c) the provision of asylum for Vietnamese who might be physically endangered by withdrawal of American forces; and

"(d) to provide assistance to the Republic of Vietnam consistent with the foregoing objectives.

Provided however, That if the President while giving effect to the foregoing paragraphs of this section, finds in meeting the termination date that members of the American armed forces are exposed to unanticipated clear and present danger, he may suspend the application of paragraph 2(a) for a period of not to exceed 60 days and shall inform the Congress forthwith of his findings; and within 10 days following application of the suspension the President may submit recommendations, including (if necessary) a new date applicable to section 2(a) for Congressional approval."

The first clause places Congress on record in support of the President's declared objective of reducing the United States troop level in Vietnam to 280,000 men by next April 30. The second clause places Congress on record in support of terminating U.S. military operations in that troubled nation by the end of 1971, while providing specific assurance that we will do whatever necessary to guarantee the safety of our troops, the release

of prisoners of war, the provision of asylum to Vietnamese who might be physically endangered and the grant of assistance to the Government of South Vietnam in pursuit of the same aims. In addition, it provides the flexibility of an extension to February 29, 1972, of our withdrawal if necessary to assure the safety of our troops. And, it provides a clear avenue to the enactment of further extensions of the U.S. troop presence if the President and Congress shall deem it necessary.

President Nixon and his advisors deserve the commendation of the Congress and the thanks of a grateful nation for turning around the long escalation of our involvement in Indochina; present and planned withdrawals will bring the U.S. troop level from well over 500,000 2 years ago to at most 280,000 by next spring. The Senate took an important first step in participating in this change in policy when it repealed the Tonkin Gulf Resolution of 1964, a policy statement obtained under dubious circumstances by a previous administration, and which, by its language, left open the possibility of unending warfare involving the United States in Indochina.

Now, we must take the second step, endorse the President's announced withdrawal plans and free the President from possible entrapment by all and foe alike in order that he may complete an orderly withdrawal by the end of next year if possible, extending our presence for a longer period if it shall be deemed necessary, by the President and Congress.

This amendment, then, seems to be a proper course and I shall support it.

Mr. JORDAN of North Carolina. Mr. President, today the Senate faces another major decision on the Vietnam war.

It is by no means the first question to be posed by this long and costly conflict. Nor is it likely to be the last.

But for many reasons it could be a most crucial one.

It is also a most difficult one because it hinges primarily on how to reach a goal rather than on the issue of what the goal should be.

The vote today on the McGovern-Hatfield amendment will not be for or against peace in Southeast Asia.

It will, instead, reflect a thoughtful judgment by each Member of this body on whether setting a specific timetable for ending our combat role there will help or hinder the quest for that peace.

This issue is too vital to warrant hasty conclusions or pat answers and is so complex as to guarantee honest and unresolved differences of opinions in the Senate and in the country.

Speaking as one fully committed to ending our part in the Southeast Asia conflict as soon as it can be responsibly accomplished, I find the "end the war" characterization of the McGovern-Hatfield amendment an appealing one. I am in complete accord with that avowed purpose.

It is only because I seriously doubt that it would achieve the intended result without unwanted effects that I find myself unable to support it.

My primary reservation turns on whether, in seeking to set a December 1971 deadline for ending this country's combat role, the amendment could endanger the chance for earlier termination while increasing the cost in lives and money by reason of the delay.

I question too the effect which adoption of the amendment might have on the naturre and terms of any subsequent peace settlement.

Either or both of these unwanted eventualities could result from an action stripping this country's Paris negotiators of any real bargaining power and leaving Hanoi with no requirement except to hold on until the deadline and then set its own terms.

Granted that the amendment would allow the President to postpone the deadline if a clear new danger became evident, the practical effect would be altered little since the request for delay could be expected only a short time in advance of the original target date.

To the degree that it lessened pressure on the Communists to negotiate, the amendment would also diminish the prospect for improved treatment and possible release of prisoners of war whose plight is of such serious concern to all of us.

In summary, it seems to me the practical effect of the amendment could be almost the complete reverse of its intended purpose by limiting the President's options and that of the U.S. negotiators in their efforts for a military scaledown and an acceptable peace settlement.

Even without the amendment I think Congress has already made clear its desire for a settlement of the Vietnam issue and its intention of taking a part in that settlement.

This war has been going on for over 7 years now. I think the Senate has already told the President and the world it wants the negotiators to get down to serious bargaining in Paris and to reach an agreement that will bring our boys home long before the deadline which this amendment proposes.

Mr. HARRIS. Mr. President, as a cosponsor of the McGovern-Hatfield amendment to end the war, I rise to speak in support of its adoption.

The objective of this amendment is supported by most Americans. The main issue is no longer whether to continue the war; it is now how to end the war—how quickly we should and must extricate ourselves from a bad situation.

The supporters of the McGovern-Hatfield amendment believe in the moral, economic and political necessity of bringing this conflict to as rapid a conclusion as possible. The amendment accomplishes this purpose and at the same time is sufficiently flexible to answer many of the problems that might be presented by the withdrawal.

This proposal does not advocate precipitate withdrawal. It would permit a force level of 280,000 troops in Vietnam on April 30, 1971, with a systematic withdrawal of the remaining troops by December 31, 1971. The 280,000 force level by April 30, 1971, is consistent with the schedule of withdrawal already announced by the President.

Nor is there a failure in this proposal to recognize the need to provide for the safety of our troops while the withdrawal is conducted. The amendment specifically provides that funds may, after April 30, 1971, be expended to insure the "safe and systematic withdrawal of remaining Armed Forces."

The amendment also makes provisions for funds after April 30, 1971, that might be needed to secure the release of prisoners of war.

Attention in the amendment has also been given to the fear that a withdrawal will lead to a blood bath. While the history of other conflicts in Vietnam does not support these fears, and while the McGovern-Hatfield amendment does not provide for overnight withdrawal, the amendment does permit funds to be used after April 30, 1971, to provide "asylum for Vietnamese who might be physically endangered by withdrawal of American forces."

Attention to the fear of many that when we get down to the final termination date, additional time may be needed and to cut off all support as of that date would be unwise, likewise has been given in the amendment. Added to the original McGovern-Hatfield amendment is a provision granting to the President the power to suspend the December 31, 1971, deadline for 60 days, and if he believes the 60-day period may need to be expanded he could, within 10 days after he exercises his option to extend the withdrawal date, submit to Congress his recommendations along with a revised deadline.

Thus, Mr. President, many of the fears that have been expressed about any plan of withdrawal, have been met by the safeguards of the McGovern-Hatfield amendment.

The President, as I stated earlier, has stated that he desires to have the level of troops down to 280,000 by April 30, 1971—the McGovern-Hatfield amendment provides for the same level. The President has announced that he will get us out of Vietnam and bring our involvement in the conflict to an end—this is, of course, the primary objective of the McGovern-Hatfield amendment. The primary difference in what the President proposes and the McGovern-Hatfield amendment is the setting of a date for final withdrawal of troops. This difference is one which, I believe, is significant.

Former Secretary of Defense Clark Clifford has outlined the desirable results that would follow from the setting of a timetable and has argued the necessity of this approach. He believes, and I agree, that only through an announcement of systematic withdrawals will we convince Saigon that their government must become a more popularly supported government, and that they have got to take on more responsibilities themselves.

Mr. Clifford has further stated that chances for meaningful negotiations now with Hanoi may be increased by a fixed schedule, indicating that they are actually going to be eventually met with the prospect of dealing with a purely local, popularly supported government in the south.

In any event, our staying in Vietnam

will not insure the accomplishment of any objective we may have had in becoming involved in the conflict. As Mr. Clifford stated in his landmark article in Foreign Affairs:

> In the long run, the security of the Pacific region will depend upon the ability of the countries there to meet the legitimate growing demands of their own people. No military strength we can bring to bear can give them internal stability or popular acceptance. In Southeast Asia, and elsewhere in the less developed regions of the world, our ability to understand and to control the basic forces that are at plan is a very limited one. We can advise, we can urge, we can furnish economic aid. But American military power cannot build nations, any more than it can solve the social and economic problems that face us here at home.

If the South Vietnamese Government cannot stand on its own feet by December 31, 1971, and at that time offer to the people of South Vietnam the right of self determination, it never will be able to do so.

This Nation has already lost 43,000 young men and spent $140 billion in the hopes that at some time in the future the problems of South Vietnam will all be solved. That is enough.

Nor can the growing social and economic needs of our own people continually be pushed aside.

In 1968, Congress passed the Housing and Urban Development Act which established the national goal of 26 million new housing units over the next decade, including 6 million units for low-income and moderate-income families. But we have not begun to approach our goal. Instead, we have fallen backward—since January 1969 housing starts have dropped by 37 percent.

Our educational needs are equally great. The National Advisory Commission on Civil Disorders pointed to the failure of education in the slums and ghettos of America. Overcrowded classrooms, poorly equipped schools and a lack of sufficiently trained teachers all have contributed to the growing chaos and violence in the classrooms. Yet, at the same time, urgently needed school bond issues are being defeated in communities throughout the Nation—not as a rejection of America's pride in education, but as a reaction to the increasing tax burden in local communities. This unfortunate development threatens the education of children in all sections of the country, black and white, rural, urban and suburban.

The Nation's level of health care is also slipping. Better availability of health care for all Americans at a price they can afford must be an immediate goal of this Nation and must be given urgent attention.

Greater resources to fight crime are required. More policemen, improvement in salaries for our law enforcement officials, the streamlining of our judicial system to break the bottlenecks to swift justice, and the reform of our penal system are in great need of full support.

To some extent these urgent domestic needs are all casualties of the war in Vietnam and have caused us to suffer greatly. The people of Vietnam have suffered even greater losses. To a lesser extent, all the people of the world have suffered. Surely much of this suffering can be eliminated if we enact the McGovern-Hatfield proposal and, as Mr. Clifford has suggested, "depend upon the ability of the countries there to meet the legitimate growing demands of their own people."

The question of the constitutional role of Congress in the making of foreign policy has been discussed in the debate. The distinguished Senator from South Dakota (Mr. McGOVERN) addressed himself to this question in an excellent manner on Friday of last week. An examination of the Federalist papers and other writings make clear the responsibilities of Congress. An excellent article on this subject in volume 50 of the Boston University Law Review, page 40, states:

> The grants of the war powers to the Congress are juxtaposed to references to the power of the purse. Thus, Congress raises and supports armies, but no appropriation for the military may be for a period longer than two years. Congress provides and maintains the Navy. In particular, the two-year limitation indicates that the Framers intended the appropriation power be used to ensure civilian control over the military. Jefferson expressed this relationship between the appropriation power and the presidential power in the strongest terms:
>
> "We have already given, in example, an effectual check to the dog of war, by transferring the power of letting him loose from the Executive to the Legislative body, from those who are to spend to those who are to pay."

Passage of this amendment would be consistent with other recent actions taken by the Senate to fulfill its constitutional role in the making of military and foreign policy—the national commitments and the Cooper-Church resolutions are prime examples.

Finally, Mr. President, by passage of the McGovern-Hatfield amendment we would give support to the President's announced intention of withdrawing our troops from Vietnam and thereby make it implicitly clear that all of us will share the responsibilities; we would present a united front of bipartisan action to the world—a unity of purpose and aim. I believe the editorial writer of the Washington Post in an August 28 editorial was correct in stating:

> Orderly termination of the war as soon as feasible ought to be the joint policy of the two political branches, and it is doubtful that there will be a better opportunity than the present to make it so.

I urge the adoption of the McGovern-Hatfield amendment.

Mr. JACKSON. Mr. President, our objective, shared by the administration and by a great majority of the Congress and the American people, is to speed the withdrawal of American forces from South Vietnam consistent with the policy of leaving the people of South Vietnam sufficiently strong to defend themselves. It is important to move toward the goal of ending our combat operations in Vietnam as rapidly as possible and in a responsible manner that is likely to bring genuine, durable peace in Vietnam and not a larger war later.

Mr. President, the issue posed to the Senate by the McGovern-Hatfield amendment is whether its adoption will advance or worsen the prospects for American withdrawal from Vietnam and the negotiation of an honorable settlement in Paris.

I believe, Mr. President, that the "amendment-to-end-the-war" will not achieve that objective. The supporters of the amendment have failed completely to convince me that the total number of lives lost in this tragic conflict will be fewer if the amendment is passed than if we carry out an orderly withdrawal in the absence of statutory compulsion. It is entirely possible, for example, that passage of the amendment will serve, not to shorten the war, but to deepen the intransigence of the North Vietnamese at Paris and further liberate their armed forces to concentrate on the destruction of innocent civilians in Cambodia and Laos.

As our withdrawal proceeds, the only leverage we have with which to promote the chance of a negotiated settlement lies in the uncertainty that surrounds the President's timetable. This leverage applies not only to Hanoi—which must view with displeasure our efforts to strengthen the South Vietnamese—but also to Saigon whose cooperation will be essential to any negotiated settlement. If we establish a date certain for the withdrawal of the last American soldier, our capacity to influence the South Vietnamese will vanish. And what is worse, the spirit of cooperation essential to the collaborative training mission of the Vietnamization program may be turned, instead, to enmity and bitterness.

For this reason, I believe it is mistaken to asume that if the McGovern-Hatfield amendment were adopted Vietnamization could go forward successfully in the months before December 31, 1971. It might well collapse entirely under the burden of a seriously demoralized South Vietnam and an invigorated North Vietnamese military force.

Moreover, Mr. President, I am opposed to the rigid inflexibility that would result from the legal requirements that all armed forces be withdrawn by December 31, 1971. I can imagine contingencies in which lives—American and Vietnamese—could be saved by retaining the freedom to keep highly specialized military advisers, on a volunteer basis, at their posts after this arbitrary date. Medical corpsmen, for example, may well be on the job saving lives on December 31, 1971. Specialists in aircraft maintenance, reconnaissance, the utilization of sophisticated electronic systems, and so forth, may be required—and may be able to perform important duties in a safe and secure environment. Their efforts, which would be terminated under the McGovern-Hatfield amendment, may prevent the very loss of life its sponsors have taken as their declared objective.

My own view is that the McGovern-Hatfield amendment is no way to negotiate with Hanoi. It would fix a withdrawal schedule for the President by law, removing once and for all the President's options. What sort of a signal is that to give the North Vietnamese? What incentive would Hanoi have to negotiate a settlement if the President is under Congressional mandate to meet a

deadline for evacuation, even the somewhat extended deadline in the amended version of the McGovern-Hatfield amendment?

I do not believe the adoption of the proposed amendment will bring closer the objectives the great majority of us seek.

Mr. President, the appointment of David Bruce as our top negotiator in Paris presents a new opportunity to make a determined effort to break the stalemate in the Paris talks.

As I have said on a number of previous occasions, we should take advantage of this new opportunity to offer a proposal in Paris to start negotiations for a standstill overall cease-fire.

I am glad to see that the New York Times in the last few days has also come to the view that an initiative for a standstill cease-fire in Vietnam is a promising and wise alternative to the McGovern-Hatfield amendment.

As part of a negotiated political settlement, we should promptly urge in Paris:

A formal proposal for an internationally supervised cease-fire by all parties throughout Vietnam specifying provisions for the international peace-keeping machinery to oversee the cease-fire, the withdrawal of outside military forces within a specified time of the effective date of the cease-fire; the protection of minorities, with safeguards to guarantee all South Vietnamese freedom of speech, assembly and the press; and protection against terrorism and political reprisals;

Free and open internationally supervised elections in South Vietnam, with all agreeing to accept the results of the elections.

I shall vote, Mr. President, against the pending amendment; and I would urge my colleagues seriously to consider a negotiated cease-fire, and to affirm the wisdom of such a course.

Mr. MILLER. Mr. President, the pending amendment by Senators McGOVERN, HATFIELD, and others has been revised in a desperate effort to pick up additional votes. Amendment 609 has now become amendment 862. When experienced Capitol Hill observers unanimously agree that no matter what happens here in the Senate, the amendment has not the remotest chance of approval by the House of Representatives, one wonders why all of this effort, time, and publicity have been expended on it.

If the reason is to try to mislead the voting public into thinking that those who are for the amendment are "anti-war" Senators and those who oppose it are "pro-war" Senators, one can only conclude that the proponents have the utmost contempt for the intelligence of the voters. Most of the public understand very well that every Member of the Senate hates war—and especially those of us who have served in one. But that does not cause a reflex response to support a proposal that is deceptive in title and specious in content.

Legislators are very familiar with the old tactic of puting a nice-sounding label on a bill or amendment for the purpose of attracting support. We are also familiar with the fact that it isn't the label that counts, but the content of the proposal. If, indeed, this was a genuine "end the war" amendment, it would have passed both Houses long ago. But it is not. And cutting through to its essence, it is clear that it is a peace at any price proposition. The hatred of war does not compel one to embrace peace at any price.

The quickest way for this war to end is through negotiations genuinely entered into by the opposing sides. It is true that the meetings in Paris have been unproductive thus far, notwithstanding all of the false optimism generated over them by former President Johnson. However, it is well known that the principal reason for their failure has been the belief of the North Vietnamese that all they had to do was be patient, and they would win the war in Washington—just as they did in Paris during the war with the French. The key to this strategy is a continued high level of American casualties. Vietnamization is the answer to that, and all evidence demonstrates that our casualties are steadily going down. By the time most of our ground combat troops are out of Vietnam next spring, we may expect our casualties to be very small. And as the North Vietnamese see this trend, we may expect them to become more serious about negotiations.

I join with most Americans in the hope that this war will be ended soon through the negotiation procedure. But I must warn that, if this pending amendment is adopted, there would be no incentive for the enemy to negotiate. All he would have to do is wait patiently until all American troops are out, as the amendment provides and the enemy has ample patience. Thus the amendment's fatal defect is that it would kill the possibility of ending the war through negotiations—and ending it much sooner than the amendment would do, incidentally.

The proponents argue that the Congress should share the responsibility for ending the war with the President. It is true that we have that power, and it is true that we exercise it through the appropriations process. That is not the point. The point is whether it is wise for us to use that power. If the war was getting bigger and worse—as it did for 5 long years before President Nixon took office, I myself would advocate use of that power. But when our new President has reversed the tragic trend and is moving us in the right direction, I do not believe it is prudent to use our power in the manner being proposed.

Moreover, I find it most interesting that those who support this amendment were, with rare exceptions, strangely silent during the 5 years when this war grew bigger and worse. Where were they then with their end the war amendments? It may be said that not until we had a new President—a Republican President—did they think it was timely to seek to share the responsibility for ending the war. If that new President was moving us in the wrong direction, or maintaining the status quo, such an excuse might be acceptable. In the present state of affairs, however, it strains the credulity of a majority of our fellow citizens.

Mr. HART. Mr. President, today the Senate can begin to reassert its proper role in determining the foreign policy of the United States.

Today, the Senate has the opportunity to take a step toward ending U.S. involvement in a war which has claimed 43,000 American lives and 285,000 wounded Americans.

We can take those steps by approving the McGovern-Hatfield amendment which defines the limits of our efforts in Indochina.

In brief, the amendment says:

First. No funds to support more than 280,000 armed service personnel in Vietnam after April 30, 1971.

Second. After April 30, 1971, funds can be used only to complete withdrawal by December 31, 1971, and to secure release of prisoners of war, to provide asylum for any Vietnamese who feels physically threatened by our withdrawal, and to aid the Republic of Vietnam in programs consistent with those goals.

Mr. President, I would like to address myself to three points raised by this amendment:

First. Would the amendment undercut efforts to negotiate a settlement to the war?

Second. Would the amendment "tie" the President's hands in protecting our troops?

Third. Would the amendment infringe on the constitutional powers of the President to conduct a war?

Mr. President, it has been argued that to announce a withdrawal date would take the pressure off the North Vietnamese to negotiate.

However, the President, correctly I believe, has already announced an irreversible policy of withdrawal. While the date for complete withdrawal, if one has been selected, has not been announced, it seems to me that if the McGovern-Hatfield amendment undercuts negotiations, so too does the administration's policy.

However, it seems to me that both the administration's policy of withdrawal and the McGovern-Hatfield amendment could be a spur to negotiations.

The fact is that as long as our Nation has been willing to fight the battles, the Saigon government has shown little interest in negotiating a settlement. If we tie our withdrawal schedule to progress Saigon makes in building its ability to carry on the war, then our withdrawal schedule will be determined by those who prefer our men to fight their battles.

On the other hand, if we set a date certain for withdrawal, the Saigon government will be on notice just how much longer it has to get its house in order or to begin meaningful negotiations.

And certainly, it can hardly be argued that a withdrawal spread over 15 months does not give Saigon long enough to assume the burdens of Vietnamization, particularly in light of the facts that we have given Saigon governments more than $6 billion in direct military aid since 1950 and Saigon now has more than 1 million men under arms.

If Vietnamization of the war is a proper policy, another 15 months of American presence in Vietnam surely will give

it time to succeed if it ever is going to succeed.

The McGovern-Hatfield amendment then is not a change of policy but rather a speed-up of the administration's announced plan, which brings me to the question of tying the President's hands.

The language of the amendment makes quite clear that the President can pursue any plan in the interest of safeguarding our troops. Equally important, he can extend the withdrawal timetable by 60 days by informing Congress additional time is needed.

And if still more time is needed, the President can come to Congress to ask for a further extension.

That requirement brings me to the question of the authority to declare war and the Constitution.

The writers of the Constitution clearly wanted the power to put this Nation into war in the hands of Congress.

While the Constitution gives the President, as Commander in Chief, authority to conduct the day-to-day tactics of a war, the Constitution empowers the Congress to declare war, to raise an army, to appropriate funds for an army, but not for more than 2 years at a time.

The limit on appropriating funds for not more than two years seems to me to reflect the importance the writers of the Constitution placed on having the decisions of war or peace in the hands of the Members of Congress rather than in the single pair of hands of a President.

Congress then is acting within its constitutional responsibilities to require that the executve branch come to Congress if it believes our participation in the conflict must be extended beyond a certain date.

It seems to me any administration should welcome this approach, for it insures that future decisions affecting the course of our action in Vietnam will be shared by both branches of Government. Such a sharing will do much to increase the acceptance of any such decisions.

Mr. President, after pursuing a war effort which has cost this Nation 43,000 lives, 285,000 wounded and $140 billion, it is long past the time that Congress and the Executive join in bringing an end to that effort.

I would say that even if the funds spent on the war were not so vitally needed here at home.

I would say that even if the war spending were not the main cause of an inflation which greatly dilutes the quality of life in our Nation and efforts to improve that quality.

I say that because in lives and treasure we have more than lived up to any commitment we had to give the Saigon government time to build a stable peace, and under this amendment, that government will still have 15 more months to meet its commitments to those Americans who have lost their lives or have been wounded.

To those who fear a "bloodbath" may follow our withdrawal, I would say history does not indicate that will happen. Equally important, the war already has caused an estimated 300,000 civilian deaths and more than 275,000 civilian casualties. That bloodbath will continue, perhaps at a reduced rate, as long as the fighting continues.

Mr. President, it is time that the Senate takes a step toward exercising its constitutional role in this tragic conflict, and take that step by setting a limit on our participation in the war.

Mr. McINTYRE. Mr. President, I rise in support of this amendment. My support is based on two convictions:

First, indefinite continuation of this war will threaten the internal stability, even the security of our Nation.

Second, we got in this war together; and we must get out of it together.

We have all seen the damage this war has done to our Nation. It has caused the deepest internal division since the Civil War. This division has torn up our cities, our institutions, our families. It has set father against son, brother against brother, and average American against himself as he has struggled to come to terms with this war.

The average American, like myself, supported our intervention step by step. And even when he saw optimistic report after optimistic report crumble to dust, he continued to hope for the best.

He has wrestled with his conscience over the rightness, the wrongness or the effectiveness of our presence in Vietnam and now he has concluded that we must withdraw.

The average American, the middle American if you will, has come to this conclusion because it is his son who dies in Vietnam, his community which suffers because the costs of the war preclude meeting urgent domestic needs, his pocketbook which is squeezed hardest by war-inspired inflation—and his pride in what he wants our Nation to be which is confronted by his awareness of what this war has led us to do.

The average American knows that the furies abroad in our land have their roots in this war. He knows it is time to get out of that war before our nationhood itself becomes the ultimate victim of it.

Indeed, in a Nation which is polarized in so many ways, the deep desire for peace in Southeast Asia is perhaps the most broadly American feeling in our land today.

This amendment at its heart reflects that desire for peace by setting a reasonable date for our withdrawal.

It also recognizes that the only sure way we can realize such a peace at home and abroad is to seek it together.

Four administrations, both parties, the Congress of the United States—share responsibility for an involvement in Vietnam.

There is no room for any partisanship here. In particular those of us who are Democrats must remember that this is not Mr. Nixon's war. He inherited it from us.

And I want to make it clear now as I have since he has become President that I support our President in his efforts for peace. I have also pledged to defend him in the future against attacks from those in either party who in latter, more difficult stages of our withdrawal, might be tempted to try to accuse him of having "sold out" in Vietnam.

I am pleased that this amendment approaches this problem in such a broad spirit of bipartisanship. It enjoys the support of Members of both parties here in the Senate just as it does in my own State.

This amendment also recognizes the responsibility for peace and war which Congress and the President shares under the Constitution. This has been essential for my support.

It scrupuously does not interfere in the President's responsibilities or prerogatives as Commander in Chief.

As is constitutionally proper, it speaks only to the broadest of long-range policy questions and leaves all tactical, operational, and administrative matters to the President.

It recognizes that the Commander in Chief should be able to make exceptions to this broad policy unilaterally to protect our troops if they are exposed to unanticipated clear and present danger.

It provides funds for the President in support of our efforts to release our prisoners of war, to protect those Vietnamese who might be endangered by our withdrawal, and to continue our assistance to the South Vietnamese so that they can defend themselves.

It supports and shares the responsibility for implementing the President's stated policy of withdrawing to the level of 280,000 troops by April 30, 1971.

Finally, it recognizes that it is not enough to support the President in his efforts for peace; every Member of Congress, indeed every citizen, must help the President to achieve peace by accepting his appropriate share of the constitutional responsibility for making the tough decisions which must be made if we are to extricate ourselves from Vietnam.

In sum, in its present moderated form, it seeks to find a common constitutional and policy ground on which this Nation can move together in a responsible, bipartisan, and determined search for peace.

THE AMENDMENT TO END THE SHELL GAME

Mr. MUSKIE. Mr. President, this morning's lead editorial in the Washington Post is one of the most cogent and forceful arguments I have read in favor of the McGovern-Hatfield amendment. Cutting through much of the rhetoric and misinterpretation to which this amendment has been subject, the editorial concluded:

> . . . the main virtue of the McGovern-Hatfield amendment is not that it will end the war, which it does not guarantee, but that it will require a certain degree of candor about the war, if our effort or our fortunes should take a bad turn, while imposing no real limitations on the President if things go well.

I ask unanimous consent that this editorial, "The Amendment To End the Shell Game," be reprinted in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE AMENDMENT TO END THE SHELL GAME

Over the weekend the Associated Press invited Senators McGovern and Griffin to argue for, and against, the so-called Amendment to End the War and while we don't

agree with all of what Senator McGovern had to say (and least of all with the patently spurious title that has been given to this measure) we find ourselves disagreeing with just about everything Senator Griffin said. When his argument is not merely specious it turns upon itself in a way which seems to us worth noting as the Senate comes up to today's final vote.

What Senator Griffin winds up saying, on behalf of the administration, is that "There is no need at all for a law or anything else seeking to accomplish *what is already being done.*" He quotes Mr. Nixon as saying that his administration "has adopted a plan which we have worked out in cooperation with the South Vietnamese for the complete withdrawal of all U.S. combat forces on an orderly, scheduled timetable." He quotes Secretary Rogers as saying that this process is "irreversible"—that it "contemplates the complete withdrawal of the troops in Vietnam." And he acknowledges that a large part of this withdrawal, and therefore an important part of the timetable, has already been publicly announced; by next April, "an additional 150,000 troops will have come home."

So there is apparently no harm in the President's fixing some deadlines, a full year ahead, and in making flat and final commitments to eventual, total withdrawal. But when the Congress proposes to fix a timetable which is no more binding, in effect, than Mr. Nixon's timetable, and is in fact quite consistent with it, this becomes "dangerous" and "disruptive" and a clear signal to the Communists that they "need not negotiate seriously, that they could attain by default what they could not win on the battlefield." The Communists, Senator Griffin tells us, have "in an infinite degree the capacity to walk with time."

Well, so they do. And so they can also read, which means that they can probably tell the difference between a piece of legislation which is open-ended, as currently revised, obliging the President only to ask for more time if he wishes to extend the deadline, and a public presidential commitment which is "irreversible." As a practical matter, the amended McGovern-Hatfield provision requires the President merely to do what he would have to do in any case to get the money he would need to stretch out the war; he would have to ask. When we are talking about an adversary with "an infinite . . . capacity to walk with time," McGovern-Hatfield offers no more incentive for stalling on negotiations than the President's own promises.

So our answer to Senator Griffin is very simple; if there is no *need* for a law to accomplish *what is already being done,* there can equally be no *harm* in a law which seeks only to accomplish *what is already being done.* The McGovern-Hatfield proposal does not, after all, *require* the President to follow a congressional timetable if he can improve upon it—although Senator Griffin seems to be arguing that it would. All it really does, in its present form, is to reinforce the President's announced intentions with a statement of similar intent on the part of Congress. In this sense, just because the amendment accepts the President's current sense of timing without foreclosing the need for a stretchout later on, it is as much an expression of support as it is a restraint. It is a sharing of responsibility, long overdue in this divisive and tormented undertaking, and it is beyond our comprehension why the President should not positively welcome it—above all, at a time when he and his lieutenants are at great pains to prove to us and to our adversaries that things are going our way. Our casualties are down, dramatically, which is the most effective evidence we could have that the burden of the war is being transferred progressively to our South Vietnamese allies; the enemy, for reasons not yet entirely clear, is not pressing the war with the same old intensity; the South Vietnamese army is performing better every day, we are told. The Vice President is returning from an Asian tour aglow with progress reports.

If things were going badly, if there were ominous indications of an enemy buildup, if there were any real doubt in the minds of administration officials about their ability to make good on their timetable—that would give us all pause. But if that were the case, it would be all the more reason for the administration's being under some requirement to say so—to tell us what is going on, to prepare us for new adversities, to rally support in the face of new challenges—which is all that McGovern-Hatfield in its final form would now require. It would oblige the executive branch to come clean with the rest of us so that we don't learn, as we did on April 30 of this year, for one example, of a crippling adversity in Cambodia, which was not worth mentioning in a full-dress Vietnam report 10 days earlier.

That is what has robbed our efforts of force and conviction—the endless shell game with public opinion, which only serves to bring on the great political upheavals when the hard facts can no longer be suppressed. The President blames the war critics for this; the Vice President finds it close to treason. But the process of public disillusionment over this war does not begin with the disillusioned; it has always begun with dissembling by the government. And the main virtue of the McGovern-Hatfield amendment is not that it will end the war, which it does not guarantee, but that it will require a certain degree of candor about the war, if our effort or our fortunes should take a bad turn, while imposing no real limitations on the President if things go well.

Mr. DODD. Mr. President, the impression has been conveyed by some of the backers of the McGovern-Hatfield amendment that their amendment offers the only possible way of terminating our involvement in Southeast Asia, and that the alternative to their amendment is an indefinite prolongation of the Southeast Asia conflict.

They convey the impression, in short, that they want to end the war, whereas those who oppose them do not want to end the war.

Nothing could be further from the truth than this juxtaposition.

The fact is that every single member of the Senate and every patriotic American wants to end the war and wants our American boys back home from Southeast Asia as soon as possible.

But the manner in which we go about disinvolving ourselves is all important. It can make the difference between a crushing military and diplomatic defeat and the achievement of a settlement that offers substantial hope for the independence of Southeast Asia.

The administration last year committed itself to a progressive disinvolvement in Vietnam, to be paralleled by a progressive strengthening of the South Vietnamese forces so that they could take over the burden of battle in an orderly manner as we withdrew.

Over the first 10 months of this program, more than 115,000 combat troops were withdrawn.

In April of this year the President committed himself to the further withdrawal of 150,000 American troops over the following 12-month period.

The expectation is that all ground combat forces will be out of Vietnam sometime in 1971. But air support and logistical support units and American military advisers might still remain for some time, in a carefully measured tapering off process. This would give the President flexibility and enormously strengthen our posture in dealing with the North Vietnamese Communists.

The McGovern-Hatfield amendment would completely deny the President this flexibility, because it calls for the withdrawal of all American forces, lock, stock, and barrel, from all of Indochina by December 31, 1971.

Although what seems to be involved is a simple and perhaps not too substantial difference in timetable, the rigidity of the McGovern-Hatfield amendment makes it a formula for defeat and disaster.

It would reduce the possibility of any progress at the Paris conference, because all the Communists would have to do would be to sit back and wait for the fixed date on which the last American serviceman would be withdrawn from Vietnam.

It would completely nullify the very real possibilities that exist of a peaceful settlement of the Vietnam conflict.

It would deprive us of any leverage we may today possess in seeking to negotiate for the liberation of the American captives now in Communist hands. Indeed, I do not think it an exaggeration to say that the McGovern-Hatfield amendment would seal their doom.

The amendment to end the war has been dubbed by certain critics "The Amendment to Lose the Peace." I do not think that this play on words overstates the case in any way.

The fact is that the sponsors of the amendment more or less frankly admit that their measure would probably lead to a Communist takeover in Vietnam and Southeast Asia.

The junior Senator from Rhode Island has even suggested that Communist governments in Vietnam and Southeast Asia might be preferable to weak pro-Western governments which will require our continuing support.

The principal sponsors of the amendment have not gone quite this far. But, recognizing the fact that hundreds of thousands of Vietnamese may fear for their lives if their amendment were to become law and if the Communists were then to take over, they have suggested that we should be prepared, together with other nations, to open our doors to all Vietnamese who might prefer asylum abroad.

The Vice President has already asked the pointed question:

How many Vietnamese refugees is the Senator from South Dakota willing to accept in his State?

This question has to be carried several stages further if the sponsors of the McGovern-Hatfield amendment really mean what they say about offering asylum to all of those who would want to flee if the Communists took over.

The sponsors of the amendment are obviously thinking in terms of some scores of thousands of Vietnamese refugees, or of one or two hundred thousand at the most.

This is an impossibly low figure when one recalls that there were almost 1 million refugees from North Vietnam in just over 6 months after the Ho Chi Minh takeover. Moreover, millions of South Vietnamese have put their lives on the line against the Communists, in the government service and in the armed forces. Putting these two facts together, there is every reason to believe that the number of South Vietnamese who would want to leave their country if the Communists took over would run into the millions.

Who is going to accommodate these millions of South Vietnamese?

And who is going to accommodate the millions of Laotians and Cambodians and Thais who may come after them?

Where does the process stop?

I say that the so-called humanitarian solution proposed by the sponsors of the McGovern-Hatfield amendment is utterly unrealistic and would, in practice, turn out to be a sordid fraud on the peoples of Southeast Asia.

The only way that the lives and safety of these millions of Southeast Asians can be assured is by keeping Southeast Asia free.

I do not understand the reasoning of those Senators who insist that in South Vietnam we can bug out or raise the white flag, or call it what you will, and emerge from this with enhanced credibility rather than reduced credibility.

Four successive American Presidents, in scores of consecutive statements, have committed the United States to help the people of South Vietnam withstand the onslaught of Communist aggression. If we now forget about these solemn commitments and simply pull out completely on a fixed date as the amendment proposes, do not imagine that we can do so without a fearful cost in honor and in credibility.

The high cost of surrender in Vietnam has been underscored by some of our best and wisest friends in Europe. The London Economist, which is internationally recognized as one of the free world's foremost political reviews, had this to say on the subject.

> It is arguable that the cost of victory, in terms of bloodshed, is proving to be too great; but the cost of betrayal could be even greater. After backing so many rickety regimes through thick and thin, it would be tragic if they were to ditch this much better government to let the Liberation Front in. It is an illusion to imagine that the United States can agree to a compromise peace that would amount to a sell-out and retain any credibility in Asia. Nor in Asia alone; for in this shrunken world credibility is indivisible.

And I should like to quote once again the bitter words written several years ago by a prominent Filipino writer, Vincento Villiman. This is what he said:

> The abandonment of Vietnam would be an indelible blemish on America's honor. It would reduce America in the estimation of mankind to a dismal third-rate power, despite her wealth, her culture, and her nuclear arsenal. It would make every American ashamed of his Government and would make every individual American distrusted everywhere on earth.

The justification offered for the McGovern-Hatfield amendment is that it will save lives by ending the war more rapidly.

This is the same kind of fateful illusion that led Neville Chamberlain and the other well-intentioned appeasers of the pre-World War II period to believe that they could save human lives by avoiding war in 1938.

The price they paid for this fateful illusion was World War II.

You do not save lives by destroying the credibility of the United States, because it is this credibility more than any other single factor that preserves the larger peace of the world.

World war is less likely so long as we conduct ourselves in a manner which persuades both our friends and our enemies that we will honor our commitments and that, in the words of our martyred President John F. Kennedy, "we are prepared to pay any price and bear any burden" to do so.

But if we raise the white flag in Vietnam and accept the humiliation of this unprecedented military and political defeat, no ally thereafter will be able to take our word seriously, and our enemies will have an equal disregard for us.

In such a situation, our enemies might easily make a miscalculation that would lead to Armageddon. It could happen in the Middle East. It could happen in Berlin. It could happen at half a dozen other points.

Historically, the loss of credibility by a major power has resulted in more than one major war.

It has been argued, for example, that Germany invaded Belgium in World War I because they did not find it credible that Great Britain would honor her commitment to defend that country.

The failure of Britain and France to honor their commitment to Czechoslovakia during and after the Munich crisis destroyed their credibility in the eyes of Hitler. He therefore felt free to move against Poland in 1939, in the confidence that there would be no war despite the Anglo-French commitments to Warsaw.

And the Korean war might very well have been avoided had we made it unmistakably clear in advance of the war that we would not tolerate a Communist effort to take over South Korea by force.

Unfortunately, certain careless statements that were made and certain actions that we failed to take, combined to convince the Communists that an American defense of South Korea just was not credible.

Historically, it can be demonstrated that millions of human lives have been lost as a result of lack of credibility or the loss of credibility. And those who are willing to surrender American credibility in the name of saving human life in Vietnam, may, if they have their way, bring on a catastrophe which will again consume millions of human lives, men, women, and children.

I have said that there is reason for hoping that the Vietnam war will terminate in a peaceful settlement if we do not commit the folly of legislating a fixed date of withdrawal, as this amendment asks us to do. There are many reasons why I believe this to be so.

First of all, there is the terrible bloodletting which North Vietnam has brought upon itself. According to reliable estimates, their losses in the Vietnam conflict exceeds 600,000 men, which would be the equivalent of more than 8 million men for a country like the United States.

As much as they may strive to conceal it, there are many evidences of exhaustion today in the Hanoi dictatorship. Among other things, it is clear that powerful members of the Politburo in Hanoi believe that they would be much better advised to try to take over South Vietnam via the political route, rather than continue indefinitely this inconclusive and frightfully costly conflict.

Second, there is the growing success of the Vietnamization program.

Third, there is the massive victory scored by the allied forces in their action against the Communist sanctuaries in Cambodia.

Fourth, there is the increasing difficulty which the Communists are finding in their Cambodian operation. A surprise conquest of Cambodia is no longer possible. The Cambodian army is getting arms and shaping up. But even more important, according to all correspondents, the North Vietnamese invasion has given birth to a fierce patriotic resistance among all sectors of the population.

Finally, Hanoi is haunted by the ever present specter of the Sino-Soviet conflict.

This conflict has intensified in recent years to the point where all-out war has become a serious possibility. Indeed, some of the leading China experts in the free world are convinced that such a conflict is all but inevitable, and that it will probably erupt within the next several years.

Whether it is inevitable or not, I do not presume to say. But certainly, Hanoi is aware of the intensification of the conflict.

It is aware of the open preparations for war that have been reported on by numerous observers in Northern China.

It is aware of the massive buildup of Soviet military strength, now estimated to total more than forty divisions on the Chinese frontier.

And it knows, far better than we can know, what totalitarian Communist regimes are capable of.

For all of these reasons, the members of the Hanoi Politburo must worry day and night over the possibility that the Sino-Soviet conflict will erupt in open war. For, if it does erupt, and if at that time they are still bogged down in South Vietnam, then their time will have run out. There would be virtually no possibility of military support from the two warring Communist superpowers, and their diplomatic leverage in the Paris talks would fall close to zero.

I am convinced that the North Vietnamese leaders have thought of these things and I am also convinced that more than one of them has argued that perhaps they ought to try to achieve a settlement while there is still peace between the Soviet Union and Red China, rather than risking the possibility that, if they

persevere too long, catastrophe may overtake their own enterprises on the simmering Sino-Soviet frontier.

I hope the Senators will decisively reject the McGovern-Hatfield amendment and that they will support the President in seeking American disinvolvement from Indochina under conditions that will assure the continued freedom of these proud and ancient peoples.

Mr. SPONG. Mr. President, peace is our goal in Southeast Asia; the ways and means of achieving it, our dilemma.

Congressional participation in the formulation of the ways and means is our right and responsibility; evaluation of the proposals advanced and their implications, our obligation.

I seek an end to the hostilities in Southeast Asia, but I have reviewed the McGovern-Hatfield amendment and have concluded that it will not accomplish the goal we seek.

It would, instead, forestall any slim chance for a negotiated settlement that might exist. Its inflexibility might preclude actions necessary to facilitate disengagement. And, it is questionable whether the course proposed, more than the course now pursued, would contribute to an end to the conflict and the establishment of peace and stability in Southeast Asia.

Thus, while sharing a goal with the authors of the amendment, I do not share their confidence in the ways and means advocated and, therefore, voted against the amendment.

It is my hope that there will be a sense-of-the-Senate resolution offered after the Labor Day recess which I can support that will not infringe upon the constitutional prerogatives of the Chief Executive and yet will state what I believe to be the desire of the Senate and of the President himself for an early and orderly disengagement from Indochina.

Mr. DOLE. Mr. President, the eagerness today of some Members of the Senate to take over control of foreign policy plus the duties of the President as Commander in Chief is exceeded only by the lethargy they showed during the decade of the 1960's when John F. Kennedy and Lyndon Johnson were slowly but steadily involving us in an Asian land war.

Had they been as zealous about their asserted prerogatives and as conscientious about their constitutional responsibilities in those days as they are today, President Nixon would never have inherited this war and would never have been faced with the task—which he is carrying out magnificently—of extricating us from this Kennedy-Johnson disaster in such a way as to retain America's credibility in the world and the American people's respect and confidence in themselves.

I would like to cite a series of dates and events to show how we got into this war, while a Democrat-controlled Congress either stood idly by or lent aid and support to the kinds of actions which those same Democrats now say are either wrong or circumvent the Constitution and the prerogatives of the Congress.

On May 5, 1961, President Kennedy says United States considering use of U.S. military forces to help the Republic of Vietnam. It is interesting to note that only 3 months earlier the total Vietcong strength was estimated by the Republic of Vietnam at 10,000 men.

On December 4, 1961, President Kennedy informs President Diem that the United States is prepared to participate in an increased effort with South Vietnam, and that U.S. uniformed forces would participate in operational missions with Vietnamese forces.

February 14, 1962, President Kennedy says U.S. troops are instructed to fire to protect themselves if fired on.

February 22, 1963, the Department of Defense states U.S. pilots flying many operational missions and are authorized to make tactical strikes.

July 27, 1964, the Pentagon announces several thousand additional U.S. advisers will go to Vietnam.

August 2, 1964, U.S.S. *Maddox* on patrol in Gulf of Tonkin attacked by three North Vietnamese PT boats.

August 4, 1964, U.S.S. *Maddox* and U.S.S. *Turner Joy* attacked by five North Vietnamese PT boats.

January 1, 1965, U.S. military strength in Vietnam reaches 23,000.

March 8, 1965, elements of first Marines land in South Vietnam.

July 28, 1965, President Johnson announces U.S. troop strength in Vietnam will rise to 125,000.

January 1, 1966, U.S. military strength reaches 184,000.

February 1, 1966, U.S. troops in South Vietnam number 201,000.

May 1, 1966, U.S. troop strength reaches 252,000.

September 1, 1966, U.S. troop strength reaches 306,000.

November 1, 1966, U.S. troops in South Vietnam now number 350,000.

May 1, 1967, United States now has 460,000 troops in South Vietnam.

January 1, 1968, United States now has 486,000 men under arms in South Vietnam.

February 1, 1968, we pass the half million mark. There are 510,000 American fighting men in South Vietnam.

April 1, 1968, troop limit for South Vietnam upped to 538,500.

October 31, 1968, just before the presidential elections, President Johnson orders a complete cessation of air, ground, and naval bombardment of North Vietnam.

December 1, 1968, U.S. military strength in Vietnam is 538,000 men.

Finally, on February 28, 1969, our troop strength hits 542,000.

Mr. President, that was the peak. From that day onward U.S. efforts to disengage honorably and credibly and responsibly from Vietnam have been increasingly successful.

By June 13, 1969, the President was able to have the Secretary of Defense announce the first redeployment of troops from South Vietnam—25,000 men.

The rest, of course, we know. Continuing withdrawal to where there will only be 280,000 Americans—or less—in South Vietnam by the end of next spring. This is nearly a 50-percent reduction from the peak number.

Mr. President, as we have watched the President unwind this war, we have seen casualties decline markedly. They have run under the 100-a-week mark now for the last 8 weeks, thanks largely to the President's decision no longer to allow the North Vietnamese sanctuary in Cambodia.

Vietnamization is proceeding better than our experts had dared hope, as is shown by the successes of the South Vietnamese troops and since the Cambodian operation began.

Reports from former pessimistic viewers of the South Vietnamese scene are now generally optimistic.

The President has assured us that American fighting men will continue to come home and that we will have peace in South Vietnam.

The President said yesterday:

> So far as the United States involvement is concerned in Vietnam, peace is certain.

Mr. President, let me continue with a few more comparisons. For instance, the costs of the war in Vietnam. The full cost in fiscal year 1968, the last full Johnson year, was $26.5 billion.

This fiscal year it is $23.2 billion. Substantial further reductions are expected in fiscal year 1971.

Casualties are most important. In 1968, we suffered 14,592 casualties. Under President Nixon, these were reduced in 1969 to 9,414. Through July of this year, they were reduced further—to 3,207—too many, a substantial reduction.

Let us look at draft calls which are a good indicator of which way we are going. In 1968, 299,000 men were called. This year 163,500 will be called.

The total military and civilian manpower of the Defense Department has declined by 680,000 men since 1968.

Procurement has been cut by 20 percent, meaning that the Defense labor force has been cut back 600,000 workers.

For the first time in 20 years, we are spending more on human resources than on defense.

Mr. President, it is clear the President is unwinding this war. It is equally clear that he is turning this Nation into the paths and pursuits of peace.

Actions, unreasonable actions, actions that can only lead to defeat and disaster.

Why?

Where were those voices of "peace now" in the 1960's?

The fact is, Mr. President, those voices carping against the President today belong largely to the same persons who must share the blame for the disasters of the 1960's.

They not only let it happen; they abetted it.

Now they have seen their failures. And now they cannot stand to see the President's successes.

By shouting loudly for more they seek to obscure those successes.

Mr. President, it will not work. The Nation has seen what happened in the 1960's. They have seen what the President has done in the 1970's.

There are those who would not give him the chance to complete the task of undoing the errors of the past.

But the American people will not be fooled, and most of the Members of Congress will not be fooled.

They will give him that chance.

He is leading us down the road away from war, the road toward peace with honor and justice.

The American people are a fair people. They will not ask for more.

They are a proud and responsible people—they will not settle for less.

Mr. COOPER. Mr. President, I ask unanimous consent that there be inserted in the body of the RECORD a statement issued to the press on the Hatfield-McGovern amendment.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR COOPER

Senators Hatfield, McGovern, Cranston, Hughes, Goodell and Javits deserve the appreciation of the people for their efforts to bring to the Congress and to the President their deep conviction, shared by millions, that the war in Vietnam should be brought to a close.

As it has been for all members of this body, my chief concern for many years has been the war in Vietnam, draining the resources and life of our people. It remains, I am sure, the chief concern of our country.

The majority of the Senate has sought to halt its spread, as evidenced by the approval of amendments last year to prohibit the use of ground forces in Laos and Thailand and, this year, to prevent the commitment of our country to the defense of Cambodia without the approval of the Congress. I have thought there is a legal distinction between these past amendments and the present amendment. The former dealt with the commitment of our country in a new war without the approval of the Congress. The latter deals with the conduct of the war until the final day of withdrawal. But I do not labor this legal point for the objective in both cases has been to end our involvement in Vietnam.

Nevertheless, I shall vote against the Hatfield-McGovern amendment. My chief concern has always been and remains that a settlement of the issues of Vietnam and of Indochina and the end of all fighting should be secured by negotiations. For this reason, several years ago, with other members of the Senate, I joined in urging a cessation of the bombing of North Vietnam to ascertain if it were possible to enter negotiations. Unhappily, despite the able and devoted efforts of Ambassadors Harriman, Vance, Lodge and Habib, the Vietnamese refused to negotiate.

Now, President Nixon is making a new initiative toward negotiations. He has stated that he has given new and flexible instructions to another able and skilled representative of our country, Ambassador Bruce. The sponsors of the Hatfield-McGovern resolution urge that its adoption would promote negotiations between North and South Vietnam. The Administration's position is that it would inhibit negotiations. No one can predict which is correct, but the President is in control of negotiations, their conduct is in his hands, and I believe that he should be given the opportunity and the mandate to secure a settlement. Whether our course should be withdrawal by Vietnamization or withdrawal under this resolution, I believe that without a settlement, fighting and instability will continue in Southeast Asia after our withdrawal.

Today, I believe that negotiations will have the better chance if the amendment is not adopted. I urge the Administration to devote greater efforts to negotiations for a settlement in Vietnam and Indochina.

Mr. DOLE. Mr. President, I received a very forcefully worded and concise statement of opposition to the McGovern-Hatfield amendment. It is remarkable in that its brevity adds to the impact of its message by saying in a few words all that is really necessary to know about the amendment.

The statement was in the form of a telegram from J. Milton Patrick, national commander of the American Legion. It was sent from Portland, Oreg., where the Legion is holding its national convention.

I believe Mr. Patrick's statement expresses the feelings of millions of Americans, both members of the Legion and other citizens.

I ask unanimous consent that the text of the telegram be inserted in the RECORD at this point.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

AUGUST 27, 1970.

HON. ROBERT DOLE,
U.S. Senate,
Washington, D.C.:

The American Legion strongly opposes the Hatfield-McGovern amendment to FY-71 military procurement authorization act, This amendment would compel the United States to withdraw forces from Viet Nam and ham-string the President's efforts to achieve a just and honorable peace in that war torn country. The action called for by this amendment would in effect hand over all Indochina to Communism and make a terrible mockery of the sacrifices we have made to insure the right of South Vietnam to self determination. We urge you to oppose the passage of the Hatfield-McGovern amendment and to encourage your colleagues to do likewise.

J. MILTON PATRICK,
National Commander of American Legion.

Mr. McGOVERN. Mr. President, the vote we are about to cast could be one of the most significant votes Senators will ever cast.

I have lived with this vote night and day since last April 30—the day before the Cambodian invasion—the day this amendment was first submitted.

I thank God this amendment was submitted when it was, because, as every Senator knows, in the turbulent days following the invasion of Cambodia and the tragedy at Kent State University, this amendment gave a constructive rallying point to millions of anguished citizens across this war-weary land.

I believe that, along with the Cooper-Church amendment, the pending amendment helped to keep the Nation from exploding this summer. It was the lodestar that inspired more mail, more telegrams, more eager young visitors to our offices, more political action, and more contributions from doctors, lawyers, workers, and housewives than any other initiative of Congress in this summer of discontent.

Now this question is about to be resolved. What is the choice it presents us? It presents us with an opportunity to end a war we never should have entered. It presents us with an opportunity to revitalize constitutional government in America by restoring the war powers the Founding Fathers obliged the Congress to carry.

It gives us an opportunity to correct the drift toward one-man rule in the crucial areas of war and peace.

All my life, I have heard Republicans and conservative Democrats complaining about the growth of centralized power in the Federal executive.

Vietnam and Cambodia have convinced me that the conservatives were right. Do they really believe their own rhetoric? We have permitted the war power which the authors of the Constitution wisely gave to us as the people's representatives to slip out of our hands until it now resides behind closed doors at the State Department, the CIA, the Pentagon, and the basement of the White House. We have foolishly assumed that war was too complicated to be trusted to the people's forum—the Congress of the United States. The result has been the cruelest, the most barbaric, and the most stupid war in our national history.

Every Senator in this Chamber is partly responsible for sending 50,000 young Americans to an early grave. This Chamber reeks of blood.

Every Senator here is partly responsible for that human wreckage at Walter Reed and Bethesda Naval and all across our land—young men without legs, or arms, or genitals, or faces, or hopes.

There are not very many of these blasted and broken boys who think this war is a glorious venture.

Do not talk to them about bugging out, or national honor, or courage.

It does not take any courage at all for a Congressman, or a Senator, or a President to wrap himself in the flag and say we are staying in Vietnam, because it is not our blood that is being shed.

But we are responsible for those young men and their lives and their hopes.

And if we do not end this damnable war, those young men will some day curse us for our pitiful willingness to let the Executive carry the burden that the Constitution places on us.

So before we vote, let us ponder the admonition of Edmund Burke, the great parliamentarian of an earlier day:

A conscientious man would be cautious how he dealt in blood.

Mr. MANSFIELD. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER (Mr. SPONG). All time on the amendment has now expired.

The question is on agreeing to the amendment (No. 862) of the Senator from South Dakota (Mr. McGOVERN) and the Senator from Oregon (Mr. HATFIELD).

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LONG (when his name was called). On this vote I have a pair with the Senator from Utah (Mr. Moss). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." I withhold my vote.

The rollcall was concluded.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Nevada (Mr. CANNON), and the Senator from Utah (Mr. Moss) are necessarily absent.

I further announce that, if present

and voting, the Senator from Nevada (Mr. CANNON) would vote "nay."

Mr. GRIFFIN. I announce that the Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Oregon (Mr. PACKWOOD) is necessarily absent.

If present and voting, the Senator from South Dakota (Mr. MUNDT) and the Senator from Oregon (Mr. PACKWOOD) would each vote "nay."

The result was announced—yeas 39, nays 55, as follows:

[No. 278 Leg.]

YEAS—39

Bayh	Hatfield	Montoya
Brooke	Hughes	Muskie
Burdick	Inouye	Nelson
Case	Javits	Pastore
Church	Kennedy	Pell
Cranston	Magnuson	Proxmire
Eagleton	Mansfield	Ribicoff
Fulbright	Mathias	Schweiker
Goodell	McCarthy	Symington
Gravel	McGovern	Tydings
Harris	McIntyre	Williams, N.J.
Hart	Metcalf	Yarborough
Hartke	Mondale	Young, Ohio

NAYS—55

Aiken	Ervin	Percy
Allen	Fannin	Prouty
Allott	Fong	Randolph
Baker	Goldwater	Russell

Eastland	Murphy	
Ellender	Pearson	

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Long, against.

NOT VOTING—5

Anderson	Moss	Packwood
Cannon	Mundt	

So the McGovern-Hatfield amendment (No. 862) was rejected.

Mr. STENNIS. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. SCOTT. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

HATFIELD-M'GOVERN PLAN OUR BEST HOPE

Mr. YOUNG of Ohio. Mr. President, 39 Senators today in giving their support of the Hatfield-McGovern amendment have spoken out in clear and convincing terms that the United States must disengage and withdraw our combat troops from Vietnam next year. There were six absentees. Fifty-five Senators voted "no."

In my judgment, Mr. President, while we Senators who supported this amendment represented approximately 42 percent of those Senators present and voting, I am personally convinced that a clear majority of American people, if a referendum were taken, would urge that we withdraw all of our fighting men from Southeast Asia next year.

It is unfortunate, Mr. President, that we have been maintaining in power a militarist regime in Saigon which lacks the support of South Vietnamese people and has undertaken no land or other reforms whatever.

Michael Harrington, nationally known columnist, in a recent column, "Hatfield-McGovern Plan Is Our Best Hope," commented that the United States is the tool of Thieu and Ky. He wrote of the arrogance of the leaders of the Saigon regime. It is well known that Ambassador Ellsworth Bunker and other American officials in Saigon have catered unduly to Vice President Ky and other Saigon militarists we are maintaining in power. I ask unanimous consent, Mr. President, that this column be inserted in the RECORD at this point as a part of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HATFIELD-MCGOVERN PLAN IS OUR BEST HOPE

(By Michael Harrington)

According to Hanoi the government in Saigon is an American puppet. However, I think that the North Vietnamese have got the relationship backwards and that the United States is the tool of Thieu and Ky.

When for example, Richard Nixon indicated that this country would accept a political settlement which might bring the Communists into the South Vietnam government, Thieu snapped back that there would be no coalition under any terms. Semanticists were then summoned to prove that Nixon's tough line and Thieu's tougher line amounted to the same thing.

I cite the arrogance of our "men in Saigon" because it relates to the Hatfield-McGovern proposal to get America out of Vietnam by the end of 1971. For paradoxically, the only hope of achieving what the United States claims it wants in that unhappy land—a political settlement, not a military victory—depends on taking the Hatfield-McGovern approach.

As long as this country does not fix a time limit for withdrawal, there is no real pressure on Thieu and Ky to undertake the reforms which are an absolute pre-condition to any settlement. Those include freeing the political prisoners, and allowing open debate in the upcoming election and not discovering—as Thieu and Ky did in the last campaign—200,000 misplaced, pro-regime ballots, long after the polls were closed.

Up until now, the Saigon government has not given the least hint that it will do such things. Instead, every time there is an even moderately conciliatory statement from the White House, our "puppets" usually outshout and prevail over the President of the United States. And with Vice President Agnew's recent speech in which he all but urged military victory in Vietnam, the line of the Saigon hawks is now apparently the policy of the American government.

In this context, it must be understood that the Hatfield-McGovern proposal does not advocate that we simply walk out of Vietnam without a thought for the consequences. It gives us, rather, the possibility of confronting Thieu and Ky with the clear choice of either accepting a political settlement or going it alone. In that sense, it is a valiant effort to confer some meaning on the more than 40,000 American lives—and the many more Vietnamese lives—that have been lost in the slaughter.

I say this believing that the United States never should have backed French colonialism in Indochina from 1945 to 1954; never should have supported Diem's mandarin dictatorship from 1955 to 1963; and never should have committed its power since 1963 to the present to generals who fought against their own country's independence. But the question then arises, how should we extract ourselves from the tragedy in which we never should have been involved in the first place? Hatfield and McGovern have an answer; Nixon does not.

For if we are not ready to lean on Thieu and Ky and get them to accept a political settlement which includes the Viet Cong, then the only alternative is to continue to support them in an unconscionable, unwinnable war and the only way we can convince our arrogant allies in Saigon that we are serious is to tell them the date on which we are leaving.

According to James Reston there is a faction within the Nixon administration which understands this point. But if ever there was an issue that transcends partisan loyalties, this is it. It would completely transform the debate if a man, or men, of conscience high in the administration would publicly state that the Hatfield-McGovern approach is a genuine strategy for peace and not the sell-out the Agnews try to make of it.

Mr. JAVITS. Mr. President, as an epilog to the vote on the Hatfield-McGovern amendment, I wish to say that I think the vote settled nothing in a definitive sense as regards the role of Congress in this matter.

It is clear to me that somehow or other, we have to find a way to join the President and Congress in establishing what will be our national policy in bringing this war to an end, now that the Senate has voted to terminate the Gulf of Tonkin Resolution.

I shall offer my contribution in this connection. I have authored a bill to divide the war powers between Congress and the President. That is a long-term matter, and my bill excludes Vietnam—which I feel is sui generis in a legal sense.

I shall propose a resolution to express those major sentiments of the sentiment which I feel were obscured by the final vote on the McGovern-Hatfield amendment.

Now that the Senate seems to have rejected the concept of legislating a withdrawal date, I think it is practical to propose a resolution based on the President's policy, as well as policy developed here. Its purpose would be to commit the President and Congress to a common expression of what should be the policy for withdrawal, the way it should be done, and the conditions under which it should be done in respect to Vietnam. This has now become urgent in my judgment.

I thank the Senator for yielding.

AMENDMENT NO. 754

The PRESIDING OFFICER. Under the previous order, the Senate will now turn to the consideration of amendment No. 754, as modified, of the Senator from Wisconsin (Mr. PROXMIRE), with a time limitation of 1 hour, 30 minutes to the side.

Amendment No. 754, as modified, reads as follows:

At the end of the bill add a new section as follows:

"SEC. . No funds appropriated pursuant to this or any other Act may be expended after the date of enactment of this section for the purpose of sending to South Vietnam, Laos, or Cambodia, any person inducted into the Armed Forces of the United States under the Military Selective Service Act of 1967, or any subsequent Act providing for the conscription of persons into the Armed Forces, unless funds are specifically authorized to be expended for such purpose by law hereafter enacted. The preceding sentence shall not apply in the case of any person in-

ducted into the Armed Forces of the United States under the Military Selective Service Act of 1967, or any subsequent Act providing for the conscription of persons into the Armed Forces, who (1) volunteers for duty in South Vietnam, Laos, or Cambodia, or (2) has voluntarily extended his military service obligation after having been inducted into the Armed Forces."

Mr. STENNIS. Mr. President, I yield myself 2 minutes.

The PRESIDING OFFICER. The Senator from Mississippi is recognized for 2 minutes. The Senate will please be in order.

Mr. STENNIS. Mr. President, if I may have the attention of the Senate, I point out that the Senate is considering the amendment of the Senator from Wisconsin, with the debate limited to 30 minutes to each side. There will then be a vote. The next amendment will be the Muskie amendment, with 2½ hours of time, and there will be a vote on that amendment.

If we can just stay with this matter, Mr. President, I think it is possible—although we do not know—that we might have some time yielded back.

Mr. NELSON. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order. Senators will take their seats or retire from the floor.

Mr. STENNIS. Mr. President, I am just making the point that it is possible that time can be yielded back by both sides on these amendments. That would make the votes on the amendments come earlier than otherwise and would move us along that much faster. I think there is a possibility of that perhaps on all of these amendments.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. STENNIS. Mr. President, I yield myself an additional 2 minutes.

The PRESIDING OFFICER. The Senator from Mississippi is recognized for an additional 2 minutes.

Mr. STENNIS. Mr. President, I yield 1 minute to the Senator from Washington.

The PRESIDING OFFICER. The Senator from Washington is recognized for 1 minute.

Mr. MAGNUSON. Mr. President, I wish to point out, with respect to the last vote, that today is election day in Nevada. The Senator from Nevada (Mr. CANNON) is unable to be here. I want the RECORD to show that.

I would have gladly paired with him or with the Senator from Oregon, who, I understand, is on an airplane and because of some problem could not get here. However, it would not have made any difference on the vote. The vote was very decisive.

I want the RECORD to show that these two Senators made every effort to be present but were unavoidably detained.

Mr. STENNIS. Mr. President, I yield back whatever time I have remaining.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

Mr. PROXMIRE. Mr. President, I yield myself 7 minutes.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized for 7 minutes.

Mr. PROXMIRE. Mr. President, I want it understood that the amendment is amendment No. 704, as modified on August 31, 1970.

The PRESIDING OFFICER. The Senator is correct.

Mr. STENNIS. Mr. President, may we have order so that the Senator may be heard?

The PRESIDING OFFICER. Senators will take their seats or retire from the floor. The Senate will be in order before we proceed further with the consideration of this amendment.

The Senator may proceed.

WHY PROXMIRE-NELSON-HUGHES AMENDMENT SHOULD BE PASSED

Mr. PROXMIRE. Mr. President, on behalf of myself, Senators NELSON, HUGHES, CHURCH, CRANSTON, GOODELL, MCGOVERN, YARBOROUGH and YOUNG of Ohio, I have offered the amendment.

Draftees bear an unfair burden of both the fighting and the dying in Vietnam. Listen to these facts:

Draftees make up only 11 percent of all those in the military forces. But draftees make up 25 percent of the troops in Vietnam. More than that, last year they suffered 40 percent of the combat deaths in Vietnam. In the first 3 months of this year, they suffered 46 percent of the combat deaths in Vietnam.

This situation is unfair, improper, and wrong. It should be corrected. It must be changed.

This amendment does not say, bring all the 107,400 draftees home today.

All it provides is that after the enactment of this bill no funds can be used to send a draftee to Vietnam, Cambodia, or Laos, unless specifically authorized by Congress or if he volunteers to go.

This would put the draftee on a par with those who enlist in the military. The reason the draftee bears such an unfair burden of the fighting and dying is that the volunteer or enlisted men in the military get to choose their training and specialty. The practical effect of that is to exempt them from combat duty if they choose. And, in the past, Regular Army men in Vietnam could escape combat duty by reenlisting in the Army. These are the reasons why the draftee has borne the overwhelming burden of the fighting.

The time has come when this can be done. It is both possible and practical.

The President has announced that we are going to withdraw 265,000 men from Vietnam by next spring. This means that these 265,000 men will not have to be replaced in Vietnam.

In addition, last May Secretary Laird announced that by the end of this fiscal year, June 30, 1971, and possibly before, American ground troops in Vietnam will not be assigned to combat missions.

So with withdrawal of the troops, and consequently a far smaller call for replacements—with combat missions ended—and this was the prime function of draftees that is to serve in combat—with these missions ended, the need to send draftees to Vietnam disappears.

Result there are more than sufficient forces to meet the lower troop levels in Vietnam.

Mr. PASTORE. Mr. President, will the Senator yield for a question?

Mr. PROXMIRE. I yield.

Mr. PASTORE. Does the Senator have any figures or statistics on how many draftees are sent to the European theater as against the number that go to Vietnam?

Mr. PROXMIRE. I would be very happy to get that figure for the Senator. Of the draftees, a very much larger proportion are sent to Vietnam than are sent elsewhere.

Mr. PASTORE. I would like to know the proportions.

Mr. PROXMIRE. As far as those figures are concerned, I do not have them before me, but I will try to get them and supply them to the Senator in a few minutes.

Mr. PASTORE. I thank the Senator.

Mr. PROXMIRE. Mr. President, let us face it. The division and bitterness that has characterized the past few years, that has enfeebled our country, that has resulted in so much of the moral and morale collapse on our campuses and among so many of our youth, has been the Vietnam war and especially the overhanging, nightmarish threat for the young man, and for his mother and his father, of being drafted, sent to Vietnam, put into combat, and killed.

This amendment would go a long way toward ending this nightmare. The traumatic fear of death in Vietnam for unwilling draftees would be over. And just as important the sense of guilt that haunts tens of thousands of our young who have found ways to avoid this nightmare—the evasion of draft duty to avoid the possibility of death—this too would be ended.

Mr. President, this is a practical amendment. It is a just amendment. It would end a discrimination no man can explain or rationalize. How in the world can we condone a system that results in draftees constituting 11 percent of the Armed Forces but—more than twice as many—25 percent of the troops in Vietnam and an incredible—this year four times as many in proportion to their numbers—46 percent of the deaths in Vietnam?

If this amendment passes would there be enough troops to man Vietnam until we get out.

First, troops in Vietnam are being steadily drawn down so that replacement demands are rapidly diminishing.

Second, the combat activities are swiftly decreasing for American forces and the Secretary of Defense has announced they will stop next June 30 or earlier.

Third, only 3 percent of all our military forces—that is of all American military personnel are draftees in Vietnam. So obviously nondraftee military personnel is available in spades now, and the need for combat troops is rapidly diminishing.

Fourth, since 1964 some 275,000 Army military men have volunteered to go to Vietnam. In view of the rapidly diminishing need for American combat troops, volunteers for combat could supply much of the remaining need.

And, fifth, nothing but nothing would be more likely to reduce the division and bitterness that has plagued this country than the passage of this amendment that would end the long nightmare for so

many thousands of young men and their mothers and fathers who dread the specter of their boy being drafted, sent to Vietnam, put into combat, and killed.

Mr. STENNIS. Mr. President, I yield 3 minutes to the Senator from Ohio.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. SAXBE. Mr. President, I think this amendment points up that in any war it is the young who die. I do not support the amendment but I do recognize that if we continue to have this war, if we continue our wars all over the world as we have in the last 100 years, it is going to be the young and it is going to be the draftee. The majority of casualties are the riflemen. In the very nature of our Armed Forces, the riflemen are the lowest ranking soldiers in any echelon of our troops.

My son, who is in the Marines, wrote to me recently and said that old soldiers never die, it is the young ones.

It points up the fact that war, in itself, is based upon the service of young men who do not enlist, who sometimes are used for cannon fodder, but in all cases are the ones who bear the brunt of service.

If we are really interested in keeping young men out of war we will wind up this war. If we are really interested in stopping the shipping of draftees all over the world we will pull in our horns to the point where we have sufficient professional soldiers—mercenaries, if you please—to answer the needs of this country.

Mr. PELL. Mr. President, will the Senator from Wisconsin yield to me?

Mr. PROXMIRE. I yield to the Senator from Rhode Island.

Mr. PELL. Mr. President, I have not made up my mind on this amendment. While this amendment sounds fair and just, it would also remove the pressure to end the war. At present, the only thing that is really getting the country upset about the war is the draft, unfair and unequitable as it is, because young men are being drafted and then sent to Vietnam.

I have heard it said that only two of Harvard, Yale, and Princeton graduates have been drafted and then killed in combat in Vietnam. That may be so, but, let us remember that it is the draft itself that has made war so dreadfully unpopular. If that cause of unpopularity is removed, would not doing so extend the war?

Mr. PROXMIRE. The Senator from Rhode Island raises the question that was asked in connection with the volunteer army. I think in this case the answer is "No, it will not." There is no question that one of the principal reasons the American public is opposed to war is the fear that our sons will be sent to Vietnam and killed. That has been a factor. But at the same time the present use of draftees represents a mechanical device to get expert soldiers for Vietnam. We do not get them from the Regular Army or through people who enlist. People are drafted into the Army but it has been known among young people that the best way they can avoid going into combat in Vietnam is to enlist, so the military now has devices to attract people to the military forces. The amendment would stop the use of this device.

For that reason, it seems to me the present system is a way to continue the war. The more we can move into a situation where one goes into combat in Vietnam only if it is on a more or less volunteer basis, it seems to me the farther we move away from the practicality of continuing the war in Vietnam.

I would like to support the position—but I do not think it would be practical—that a distinguished conservative commentator is said to have supported, and that is to send only volunteers to Vietnam. That might end the war. There were a number of volunteers, men who were Senators and Congressmen, in World War II, but not a single Member of Congress, none has wanted to go to Vietnam. In this way, if those who are forced to go into the military are not required to go to Vietnam and fight, it seems to me we are more likely to end the war, by simply making it more difficult for us to continue it.

Mr. PELL. Mr. President, I had the Library of Congress ascertain for me the percentage of veterans in the Senate and then the percentage of veterans in the Senate who sponsored the Hatfield-McGovern amendment. It was very interesting. The percentage of veterans in the Senate is 71 percent, but the percentage of veterans who cosponsored the Hatfield-McGovern amendment was 88 percent. So there is some truth in what the Senator has said.

Mr. PROXMIRE. I thank the Senator.

Mr. President, I yield the floor.

Mr. STENNIS. Mr. President, I yield 4 minutes to the Senator from South Carolina (Mr. THURMOND).

Mr. THURMOND. Mr. President, the pending amendment No. 754 would prohibit the sending of draftees to Vietnam, Laos, or Cambodia unless such draftees volunteer for this duty or extend their military service obligation.

Mr. President, this amendment should be opposed for a number of reasons. While I recognize the distinguished Senator from Wisconsin feels his amendment would not disrupt U.S. plans in Indochina, as announced by the President, I cannot agree with him.

First, passage of this amendment would make it impossible to meet our manpower needs in Indochina as we carry out President Nixon's plan of troop reduction. At present only 4 percent of personnel requirements for ground combat in Vietnam are met by enlistees who volunteer. We may as well face it, the tough job of the infantryman is not a sought-after role. Such duty is unpopular with American youth in this war as has been the case in most other wars.

If replacements to complete our commitment in Vietnam are cut off it would be necessary to extend tours of those draftees now in Vietnam. It would not be fair to ask these men to shoulder a disproportionate share of the tough job the infantryman bears.

Furthermore, the United States would have to reduce the time between Vietnam tours for our servicemen. This would aggravate the reenlistment problem and possibly drive from the service some well trained men who would remain in uniform otherwise.

Second, Mr. President, passage of this amendment would result in increased draft calls at a time when the President is trying to reduce them. Many men volunteer for the Army now in hopes of avoiding combat duty. Thus, if you remove the possibility of combat duty for the draftee this would reduce the incentive for a man to enlist voluntarily.

Defense Department officials estimate that at least half of all volunteers enlist because of the pressure of the draft. Thus, it is easy to see draft calls would have to increase sharply to meet military personnel requirements.

Finally, Mr. President, the Senate would be establishing an Army of men who live by different requirements. Some would have to face the hard task of combat, others would not. By such an action we would create conditions which would split our Army wide open. Those required to bear arms in Indochina would resent those who were not.

As our manpower requirements in Vietnam are reduced we should be able to reach the point soon where our personnel needs for combat troops would be small. By the middle of next year our fighting men in South Vietnam will be acting mainly in a defensive role.

Mr. President, if such a precedent as that proposed by the authors of this amendment is accepted it could lead to far reaching problems.

For example, draftees might also wish to be exempt from all hazardous duty, including riots and other internal disorders. There may be no end to the demand for exemptions.

Mr. President, we are a proud nation and a great people. Let us stand together in these trying times. Our men in uniform stand as one force, bound together by common goals and ideals. If we accept this amendment the divisions we have seen in our streets could erupt within our defense forces. By rejecting this amendment we can assure continued unity and the accomplishment of a tough job nearly completed.

Mr. STENNIS. Mr. President, I yield 5 minutes to the Senator from Arizona (Mr. GOLDWATER).

Mr. GOLDWATER. Mr. President, I certainly recognize what the Senator from Wisconsin is trying to do. I only wish it were possible for me to support the amendment, because just last week I worked diligently, along with many other Senators, trying to establish a voluntary military force. I think it would work.

Again, this amendment at the present time I see as tying the hands of the Commander in Chief, and, in addition to that, and more important probably, tying the force level decisions of the Joint Chiefs of Staff.

I do not believe the "nightmare," as the Senator termed it, is necessarily Vietnam; I think it is the draft itself. While some young men complain about that, generally I have found that the complaint of young men is against being drafted and having to spend a period of their lives away from home and away

from school doing something that they do not particularly want to do. The objections to going to Vietnam or elsewhere around this globe are not as loud or as numerous as they are to being drafted.

I see this amendment as unfortunately at the present time tying the hands of those who have to make the decisions.

I believe, for example—and I know the Senator from Wisconsin has supported me in this—that a voluntary military, had we approached it in the proper way, prior to the unfortunate war in Southeast Asia, probably would have provided all the forces we needed to fight a war of that size.

I may sound as if I am about to vote for the amendment, but I assure the Senator I am not. Had we not engaged in warfare over there, which to me was unfortunate, we would not have needed to draft young men at all had we had a volunteer force. But we decided to use ground forces there, which is not conducive to our type of living or our kind of fighting or our type of equipment. But that decision was made. That decision is still standing, and I am afraid we are going to have to use draftees over there.

I hope by the time the draft law ends in June of next year, the President can say, "Fine. We have this down so we would not send draftees to Southeast Asia."

Mr. PROXMIRE. Mr. President, will the Senator yield to me 1 minute, on my time?

Mr. GOLDWATER. I yield.

Mr. PROXMIRE. I would like to ask of the Senator from Arizona, since his objection is principally directed toward tying down the military, whether the principle of not using draftees is a sound one.

I ask the Senator if he does not recognize that the number of draftees in Vietnam, in relationship to our whole military force, is only 3 percent.

Mr. GOLDWATER. I recognize that.

Mr. PROXMIRE. Furthermore, the Secretary of Defense has announced that we are going to stop combat missions in 10 months. Furthermore, he is withdrawing 260,000 troops, so that the replacements will have to be very few. Under the circumstances, does it not seem logical that we can find that small number of volunteers to send there; and if not, end that feature of the draft which, according to my constituents, is giving the young people of this country the most concern: the prospect of being killed or badly wounded in Vietnam?

Mr. GOLDWATER. Mr. President, I might say to the Senator that the prospect of being killed or badly wounded is never tasteful to anyone, whether 18 or 180 years old.

I regret having to get back to this, because it may sound a bit like a personal bone I am chewing, but during the years when Robert McNamara was Secretary of Defense, we never had an adequate force structure, and when the war in Vietnam came along, we robbed the forces of NATO to send to Southeast Asia. Practically our whole force of trained men, at one time, were in Vietnam. Had we, during the unfortunate years of McNamara, paid some attention to force structure and training, we would not have been as bad off.

I agree with the Senator that 3 percent is not a large number, and one would think we could find volunteers to fill that number of places. Personally, I would hope so. I would hope that by next year, the President would have reduced the number of combat soldiers to the point where all we have over there are the GI's with their rifles guarding the supplies, the air bases, Naval installations, and communications installations.

If that happens, I think the President would be the first one to say, "Let us confine our Southeast Asia troops to volunteers."

But if we tie his hands now, and say we have a time certain past which no draftees can go, then, if he runs into this problem of July 1, and he says we have to extend the draft even in a limited way, and we say here today, "Fine, you can do that, but you cannot use those men where you want to use them," we tie his hands.

Mr. PROXMIRE. We do not say he cannot do it, but he has to come back to Congress in order to do it.

Mr. GOLDWATER. He has to come back to Congress in order to do it anyway. Even had we passed the bill the other day he would have had to come back.

Mr. PROXMIRE. Mr. President, I yield 10 minutes to the Senator from Iowa.

Mr. HUGHES. Mr. President, I thank the Senator from Wisconsin for his fine work in this fine effort. I join him as a cosponsor in supporting this amendment.

Mr. President, this amendment is vitally necessary to correct a gross inequity in our Selective Service System. I have long favored substantial draft reform, and I hope that the Senate will be able to take action on that matter early next year. In the meantime, I believe that we can now take a significant step forward by ending involuntary service in Vietnam.

The inequities of the present system have been detailed by the distinguished Senator from Wisconsin in his remarks on this amendment. I would remind the other Members of the Senate of these startling facts: Draftees comprised 88 percent of our infantry riflemen in Vietnam last year, while first-term Regular Army men comprised 10 percent of the riflemen. And Army draftees were killed in Vietnam last year at nearly double the rate of nondraftee enlisted men.

The inequity is undeniable. It was even admitted, although anonymously, by a Defense Department manpower expert. He told the National Journal:

> We recognize the inequity this causes in a shooting war, but we don't know what to do about it.

Mr. President, we do know what to do about it: give the draftees a choice about fighting in Indochina.

The inequity goes deeper than a preference for volunteers over draftees because of the disparities in the groups actually drafted. Draft Director Curtis Tarr has said that in some affluent areas—where the white, middle-class, college-bound students live—up to 70 percent of the young men find some way or another to avoid military service. But in rural areas and among the poor, that figure is only 30 percent. Thus, over twice as many young men with better access to lawyers and to sympathetic doctors can find loopholes to avoid combat.

The Defense Department contends that with an amendment such as ours:

> Morale in the Armed Forces would be lowered under conditions where some must assume an inordinate share of our nation's combat burdens simply to spare others.

That, Mr. President, is the situation today.

Perhaps we have a choice between inequities. How shall we resolve it?

Should we say that the draftee, although he might not favor the war, should be sent into the front lines because he did not have the foresight or advice to volunteer? Or should we say that the volunteer, although he may now know what he is getting into, should be forced to prove his professionalism by laying his life on the line?

This judgment on equity is difficult to make, so we should consider other factors.

One is the feasibility of limiting combat roles to volunteers.

Last spring, the Secretary of Defense said that he hoped to phase down to an all-volunteer force in Vietnam by the middle of 1971. Now—was it because of the alleged "success" of the Cambodian invasion?—Mr. Laird has retreated from that position.

I believe that the plan is still feasible, and the able senior Senator from Wisconsin (Mr. PROXMIRE) has given the figures to prove it.

Such a plan would have important and significant "anicillary benefits," to use a term now much in vogue at the Pentagon.

One such benefit is that, if only volunteers are sent to Indochina, we are likely to have career-minded soldiers who are better trained and more highly motivated than draftees.

Another benefit was cited in a thoughtful letter to me last month by an Air Force officer. He wrote:

> Requiring only career military personnel to serve in the war zone . . . would give the Pentagon a powerful incentive to end the combat as soon as possible.

The pending amendment is feasible. It would not require the immediate withdrawal of all nonvolunteers; it would only forbid the future sending of them.

The Pentagon estimates that about 1,800 men are required each month to replace rotating ground combat troops and that only about 800 volunteer each month. Are the men in the Pentagon so dubious of their own justifications for the war that they do not believe that, from our population of over 200 million people, 1,000 more men each month will volunteer to fight in Vietnam? Perhaps they could improve their persuasiveness by changing their policy—or by ending the war.

This amendment is fully within the constitutional powers of the Congress. In 1940, Congress prohibited the sending of draftees beyond the western hemisphere. In every postwar draft law, we

have prohibited sending men overseas without a prescribed minimum of training.

We can draw a lesson from European experience. In France and Germany, an act of parliament is required for conscripts to serve outside the country.

During what was only the first Indochinese war—1947 to 1954—the French were so divided that parliament never approved such a law. As a result, that conflict was fought by career military men and volunteers.

In France's next major effort to preserve its empire—in Algeria—the question did not arise legally because Algeria was considered part of metropolitan France. Yet the disagreements over that war were so profound that the fourth republic was toppled by a military coup—and General deGaulle rose to power.

That experience shows, I believe, that no nation can fight a war when it is deeply divided over its wisdom or justice. Using draftees only adds to domestic dissent and to the likelihood of political chaos.

There is also a moral factor which compels us to adopt this amendment. Our Indochinese war has divided our country more profoundly than any other public issue since the Civil War.

We can no longer calm the rising discontent—especially among the young who are being conscripted to die in this war—by shouting criticisms from our middle-aged safety.

It does our country no good to impugn the courage or integrity of those who go to great lengths to avoid military service.

We cannot ask the young to be united behind a war which has divided us so much.

We cannot ask them to accept uncritically the justifications for actions which so many of us find incredible or unacceptable.

We cannot even ask them to fight a war, because we have never followed the constitutionally required steps to declare the Indochinese conflict a war.

What we can ask of the young men of this country, however, is the same considered judgment that all other citizens are forced to make: If we favor the war, to support it; if we oppose the war, to deny our support.

In recent months, I have received a number of illuminating letters from combat soldiers in Southeast Asia. The tone of the letters is thoughtful, not complaining.

One theme runs through all of these communications—the idea that the young people of this Nation would willingly unite to defend our country if they truly felt our national security was endangered. In this undeclared war, they do not feel that our national security is imperiled. Nor do they believe it is in our national interest to try to determine, by military force, the political destinies of all of the countries of Southeast Asia.

I believe these young people have a case. I urge the Senate's support of this amendment to end sending draftees to Vietnam.

We got into Vietnam by political and diplomatic decision. We ultimately are going to withdraw from Vietnam by political and diplomatic decision. It is no use—in fact, it is injust—to simply cry out against military leaders who, in the first place, advised us not to be involved and, in the second place, have undoubtedly been hampered in what they considered their best advice by the political intervention.

So, in the final analysis, the decisions that must be made are going to be made in Congress, in this determination. I urge the Senate to adopt this amendment on draftees in Vietnam.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. HUGHES. I yield.

Mr. PROXMIRE. Did I correctly understand the Senator to say that in his judgment something like 1,000 replacements a month would be all that would be necessary under the circumstances?

Mr. HUGHES. That is correct.

Mr. PROXMIRE. It is a very interesting fact. The Senator pointed out that there are 200 million people in this country. I might also point out that 3 million are members of the Armed Forces. If out of that number we cannot get this tiny fraction, a fraction of 1 percent, to go to Vietnam, it raises very serious questions as to whether we should not find some way of terminating the Vietnam war much more rapidly.

Mr. HUGHES. As indicated, a total of 1,800 are needed, and approximately 800 volunteered, and they needed a thousand draftees to implement that on a rotating basis. I agree with the Senator from Wisconsin.

Mr. PROXMIRE. I thank the Senator for a very powerful statement.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. Mr. President, how much time do I have remaining in opposition to the amendment?

The PRESIDING OFFICER. The Senator from Mississippi has 15 minutes remaining. The Senator from Wisconsin has 8 minutes remaining.

Mr. DOMINICK. Mr. President, will the Senator yield me 3 minutes?

Mr. STENNIS. I yield 3 minutes to the Senator from Colorado.

Mr. DOMINICK. I thank the Senator from Mississippi.

Mr. President, I had not planned on engaging in a debate on this particular amendment, but I have been listening to the speeches that have been made; and I think that one of the things that the distinguished Senator from Iowa, for whom I have great respect, misses in his argument is the question of who is a draftee and who is a volunteer in this day and age.

We can say that only 3 percent of the forces are actually draftees; and, technically speaking, that is correct. But there are many men in the armed services or in the National Guard or in the Reserves who went in so that they would be volunteers and would get into the area they wanted, rather than be a draftee. If there had not been a draft, they would not have gone into service.

I happen to know this. My son happened to be one of them, so I can say it very easily. He served in Vietnam for a year. He was a volunteer. He was a volunteer because he found that, although he did not like the military, there was less harassment in Vietnam and a better chance to accomplish something than there was if he was just in a home base over here. The military experience of 2 years that he had, obviously did not do him any particular harm, but it was not something that he liked. He had not wanted to be there, or to be any part of it. He got in because, as I said, he felt that otherwise he was going to be subject to the draft. There are many people in this category.

So if we suddenly take just the draftees and say that they do not have to go but that the fellows who have volunteered in lieu of the draft do have to go, we will have to draft many more people and we will have many more problems. We will have, as the Senator from South Carolina so aptly said, a two-system division within the Army, as to who is going to perform respective types of services. It seems to me that that would be very inequitable, when we are faced with this difficult psychological problem as well as a difficult military problem.

I just wanted to put that into the RECORD. I thank the Senator from Mississippi for giving me the time.

Mr. PROXMIRE. Mr. President, I yield myself 1 minute to reply to the Senator from Colorado.

The President's Commission on an All-Volunteer Armed Force stated that in recent years approximately 500,000 men a year have volunteered for military service. Although some of these volunteers volunteered only because of the threat of the draft, the commission found that the best estimate is that at least half, 250,000, are true volunteers.

The reply to the Senator from Colorado, it seems to me, is that it is true that young people can volunteer for the National Guard or the Reserves; they can volunteer and get a particular assignment; and that is exactly the problem that this amendment tries to meet. Those people are exempt from combat. If not exempt, their chances of getting into combat are much less, while the men who are drafted are now put into combat in great numbers; 11 percent of the Armed Forces are draftees; 46 percent of the deaths in Vietnam are draftees. This terrible injustice is what we are trying to overcome.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. I yield myself 10 minutes.

Mr. President, we are getting right down to the nub of things now. It has been agreed in all the debates. On a volunteer army, on the end-the-war amendment, that we want the war to end, that we would like to have a volunteer army. But, by a vote of 52 to 35, we decided that it was not wise now—in fact, that it was impossible now.

With respect to the McGovern-Hatfield amendment to end the war, everyone wants the war to end; but the judgment of this body was, by a vote of 55 to 39, that that was not the way to do it, by putting it in writing and stereotyping and limiting the President on the floor of the Senate.

We decided to stay in Vietnam, under the conditions, in debate, and we would like to say that we are going to stay but that we are not going to require anyone except volunteers for Vietnam to go to Vietnam. I am sure that we would get a hundred votes for that, if we were expressing our wishes. But, again, the realities must be considered. The realities do not permit it.

Mr. President, the effect of this amendment simply would be to stop effective military operations in Vietnam, and I believe that I can explain why. Overall, approximately 8,000 of the 21,000 monthly replacements for the Army to Vietnam are draftees. That is 8,000 and 13,000, to make a total of 21,000. It is estimated that half of the 13,000 are draft inducted—induced to volunteer by the draft; and that is a very respectful term to be used. It is a matter of choice. Some would just rather go when their time comes under the regular turning of the wheel in the Selective Service. Others would rather go ahead. But from the realities of these figures, it is readily evident that there would be insufficient replacements to continue present operations even on the phased-down basis which is now in progress.

Let me refer to a crucial element of combat replacements. I brought this up during debate on the volunteer army.

These are the boys in the infantry, armor, and artillery units—and let me first observe just what the significance is of being assigned to this particular type of activity. In fiscal year 1970, 10 percent of all Army personnel in Vietnam—about 48,000 men—were riflemen—those who carry their gun in their hands, who bear the brunt of every attack, and whose lives are constantly at stake. This group, constituting only 16 percent of the Army in Vietnam, took 54 percent of all the casualties.

If we include all of the infantry skills, that is, those who handle the mortars, assist with the tanks, et cetera, this group constituted 22 percent of all the Army in Vietnam in 1970 and this group took 67 percent of all the casualties. These are the men, Mr. President, who bear the heaviest burden of war.

Mr. President, I want to speak now to the Vietnam monthly requirements for these combat elements—infantry, armor, and artillery. For August 1970, the monthly replacement requirements for this total group is 6,500 men. It is expected that this monthly figure will go down to 3,600 in May 1971.

Now let me state that the total monthly production for the Army worldwide is 7,500 men and, as I have indicated, 6,500 men go to Vietnam.

Where do these men come from, Mr. President, for these combat elements? Out of the 7,500, 5,100 are inductees or about two-thirds. Twenty-one hundred are volunteers with no particular skill choice but are placed in these combat elements after training. Three hundred are volunteers with a combat skill.

Mr. President, those figures are taken from the record. That is not an estimate. That is the record of what has been going on.

The Army has made some rather intensive studies of what would occur on the premise that we make no involuntary assignments to Vietnam or that we send no draftees to Vietnam. In either case, Mr. President, the result is the same. The total number of monthly replacements who could be expected to go to Vietnam under these conditions would range from 400 to 700 men. Three hundred of these would be the combat skill volunteers, with the remainder out of the other volunteer group. In other words, Mr. President, out of a present requirement of 6,500, and out of a May 1971 requirement of 3,600, only about 400 to 700 men would be available. We can always say this estimate is too low but even if we double it, the results are the same. The combat units in Vietnam could not continue to operate. Keep in mind that we have a 1-year tour in Vietnam and there must be the monthly replacements coming in for those who have served their required period of service.

The result of this amendment would be such that in a very short period of time we could anticipate a near breakdown of the combat elements of the Army in Vietnam. Among the several dire results is that the thousands of Americans who are already there, would have their lives placed in jeopardy. Under these circumstances I do not see how the Senate, by any stretch of the imagination, would be acting responsibly in adopting this amendment. I, therefore, urge amendment No. 754 be voted down.

Mr. President, these facts are sordid. I wish they could be to the contrary. I wish we could give this group some element of reasonable hope and practicality that the plan would work. But the overwhelming facts are to the contrary. The conclusion is inescapable, that as long as we have to continue the war, we must have the selectees, and we are going to have to send some of them to Vietnam. We pray that all will come back, even though we know that some will not. But, as long as the fighting goes on over there, I think it would be a debacle in Vietnam and in this country, should this amendment be adopted and become law.

Mr. President, I yield back such time as I did not use.

Mr. PROXMIRE. Mr. President, I yield myself the remainder of my time.

In reply to the Senator from Mississippi, we fought for, and, from my standpoint, we lost the volunteer army amendment. But this amendment would not end the draft. It would provide that draftees would still be brought in as needed. But they would not be sent to Vietnam.

It is possible. The statistics are overwhelmingly clear that it is possible to stop sending draftees to Vietnam now.

After all, they constitute, in Vietnam, 3 percent of the whole of our military force. Why can we not send some from the 97 percent available, if, as the Senator from Iowa has pointed out, the replacements are only 1,000 a month? That is not much of a drain out of a 3-million-man military force and out of 2½ million men who are volunteers.

There is a simple reason why. The argument made by the Senator from Mississippi is the one that the Pentagon has been making against this kind of amendment. They argue that this would disrupt the skills they now have in the military. What that means and as translated is that the skill the draftees have is carrying a rifle or a mortar, or serving in light artillery, and getting into combat and getting killed.

What happens is that those voluntary enlisted are given a choice. They can have vocational training and they can be put into something that keeps them out of combat, or some kind of training that they can use in later life. Those who are drafted are not given that kind of choice. They go into the area available because it is not chosen—to wit, combat—infantry and the much greater prospect of death.

We know that those in the military forces get about eight weeks' training When I was in, in 1941–1946 it was a sixteen weeks' training period. It is not a high skill but it is certainly respectable and a very vital skill to defend one's country. Nevertheless, it is possible for the military to change this. They have all the flexibility, and time, and all the personnel, to make the change. The system that now permits those who reenlist for three years to get out of combat makes it necessary for those who decide to do this to take their chances. Those chances are not increasing but diminishing sharply. Combat missions are to be ended at the end of this fiscal year, June 30. Personnel needs in Vietnam of all kinds are diminishing. This is the time when we can act and we must act now. We are facing a most troublesome school year just coming up in this country.

This is the kind of amendment that could help enormously toward easing the kind of serious problem we face.

Let me sum up by pointing out that the troops in Vietnam are being steadily drawn down and replacement demands are rapidly diminishing. Combat activities are decreasing for American forces. The Secretary of Defense has announced that it will stop next June 30 or earlier. Only 3 percent of all military forces—that is, of all the American military personnel—are draftees in Vietnam, so that the number of draftees for military personnel is available now, and the need for combat troops is diminishing. Since 1964, 275,000 Army military men have volunteered to go to Vietnam.

In view of the rapidly diminishing need for American combat troops and the fact that volunteers for combat could supply much of the remaining need, few if any actions, Mr. President, perhaps nothing would be more likely to reduce the division and the bitterness that is plaguing this country today than the adoption of this amendment.

It would end the long nightmare for so many thousands of young men, and their mothers and fathers who dread the prospect of their boy being drafted and sent to Vietnam and killed.

I realize—most of us realize—that the chances of that happening now are less than they used to be—that they are rather small. But that is not much com-

fort to the young man, or to the mother and father, who may be drafted.

We are in a position where we can provide, with the passage of this amendment, a great advantage for the country and the ending of a long nightmare.

Mr. KENNEDY. Mr. President, I cannot support the amendment of the Senator from Wisconsin. The amendment suggests that only professional soldiers could fight our Nation's battles and that civilian inductees would be insulated from combat duties. And, as I have said on many occasions, I think it is unwise to free all but a relatively small number of volunteers from the possibilities of having to serve on the battlefield.

Under this amendment, any young man who is drafted would not have to serve in Indochina. This is directly contrary to one of the primary purposes of the draft—which is to assure that the burdens of war are, to the greatest extent possible, shared equally by all our citizens.

I also have the feeling that this amendment would be self-defeating and would create enormous confusion. The draft would become the haven for war-dodgers and the number of volunteers would rapidly decline. In all probability, it would soon become necessary to subject draftees to combat duties once again. We would be right back where we started with a great deal of dashed hopes and administrative inconvenience.

Mr. MUSKIE. Mr. President, the Proxmire amendment poses a difficult issue for a Senator who is opposed to our continued involvement in the Indochina war: If we are opposed to a continuation of the fighting and the killing, why should we send young men who have not voluntarily accepted the risk to fight in Vietnam?

If the vote on the Proxmire amendment were treated as a symbolic gesture, the vote would be an easy one for me. I would vote for the amendment. But the vote is much more than a symbol; it is a statement of policy, affecting not only the Indochina war, but broader questions of national defense manpower.

I have spoken against our indefinite military involvement in Southeast Asia. I have submitted a resolution calling for a declaration of peace and steps to end the fighting and the killing. I have supported the McGovern-Hatfield amendment. But I voted against the proposal to create an all-volunteer army at this time, because I believe it would increase—not decrease—the danger of a repetition of our involvement in Vietnam, Cambodia, and the rest of Indochina. Having followed that path, which I believe to be the most consistent and logical path of opposition to military adventures and increases in the risks of war, I cannot support the Proxmire amendment, worthy as its objectives are.

Mr. President, there is a danger that as the level of combat for our ground forces drops, the temptation to hang on in Vietnam, propping up the Thieu-Ky regime, will grow. If we substitute volunteers for draftees, the danger will be greater, for the public cost of the war will be less obvious. If we are going to end the killing of American men in Indochina, Mr. President, let us end the killing of them all, not some. And let us do so in such a way that we increase the chances for an end to the killing of the people of that area, and help lay the groundwork for a negotiated settlement. Let us not be diverted from that goal by stratagems which cut our costs, but do not go to the heart of the problem. Let us work to end the war, and end it soon.

Mr. NELSON. Mr. President, in the muddy fire bases and in the thick, steamy jungles where the ugly warfare of body counts and kill ratio is being fought in Vietnam and Cambodia, the prospects of an end to the fighting tomorrow or even next summer have a cynical, unreal ring.

To the young soldiers and marines who spill out of helicopters with thumping rotors kicking up dust and debris, ready to lift quickly in case of attack, war is present and endless.

By ever-increasing numbers, the young men who make up the units that seek out and destroy the suspected sanctuaries of the elusive Vietcong guerrillas are not the volunteer soldiers of 5 years ago, but the draftee, who in most cases would have finished his schooling or started a family and a career had he not been drafted.

And he goes to fight with a good chance of not returning from a confusing, unpopular war that no rational man wants to see continue and that nearly every American leader in and out of Government says must come to an end.

He is fighting and sacrificing his life in a war Congress did not declare. In a war that grew to full scale as the country first sent economic and military assistance to the shaky government of South Vietnamese President Diem after the French colonial rule ended in 1954, then sent advisers, then volunteers, and then the draftees.

The draftee, as so often has been the case in this country's wars, is an efficient, economical source of manpower. He can be quickly trained and is inexpensive because he falls into the lower ranks. At present, it is estimated that it costs only $6,200 a year to maintain a foot soldier.

With the overwhelming bulk of the draftees—some 95 percent—going into the Army ground forces, the draftee's chance of becoming a combat soldier is very good. With the reenlistment rates of regular Army soldiers dropping from a normally stable level, the draftee, while numbering only one-third of all the troops in Vietnam, is bearing an increasingly heavier share of the fighting and now is representing almost 65 percent of the total of the men dying in the Southeast Asian war.

The likelihood of a draftee ending up in a combat rifle company is also increased by the fact that the enlisted or volunteer soldier has the first choice for the technical and support jobs available. It is estimated that it takes about 10 men outside the immediate combat areas to support one rifleman in combat.

Since he makes up two-thirds of the total of all men going into the Army, increasing numbers of draftees are being sent to Southeast Asia.

The Marines, an almost totally volunteer force, and the Army are handling the bulk of the fighting in Vietnam. Since 1965, when we first committed ground combat troops to Vietnam the reenlistment rates of the career soldier plunged along with the increase in the war's unpopularity.

In 1965, the reenlistment rate for the Army was 47.4 percent. According to recent Department of Defense figures for fiscal year 1969, it has dropped to 30.1 percent. For the Marines, it was 34.3 percent in 1965. By fiscal 1969, it had fallen to a dramatic 14.7 percent.

The reenlistment figures are even dwindling for the Air Force and Navy. The Navy has experienced a drop from 40.4 to 34.5 percent, and the Air Force from 61.4 to 54.3 percent during the same period.

On April 23 of this year, the President sent a message to Congress proposing an end to the draft. He said the draft "must be phased out, so that we can be certain of maintaining our defense strength at every step . . . as we move away from reliance on the draft, we must make provisions to establish a standby draft system that can be used in case of emergency." In addition, last May, Secretary Laird stated that by the end of fiscal 1971, we will have some ground forces in Vietnam, but they will not be assigned a combat mission.

The goal of an all-volunteer Army, which I have strongly supported, is the concern of many Congressmen. But that goal seems to be slipping farther and farther away as this country places greater reliance on the draftee to fill the widening gap left by the diminishing reenlistment rates.

That problem, like so many of the others—domestic and foreign—presently plaguing this Nation, is tied tightly to the undeclared war in Vietnam that is tarnishing the Nation's image, draining our resources, and destroying the morale of young and old alike, both within and outside the armed forces.

Amendment 754, which I have coauthored with Senators PROXMIRE and HUGHES, will provide that after the date of enactment of the military authorization bill, no funds may be expended to send draftees to South Vietnam, Cambodia, or Laos unless they volunteer for such duty.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I ask for the yeas and nays.

The yeas and nays were not ordered.

Mr. BYRD of West Virginia. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that

the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. All time has expired. The question is on agreeing to amendment No. 754, as modified, of the Senator from Wisconsin. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Nevada (Mr. CANNON), the Senator from Utah (Mr. Moss), the Senator from Georgia (Mr. RUSSELL), and the Senator from Maryland (Mr. TYDINGS) are necessarily absent.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON) would vote "nay."

Mr. GRIFFIN. I announce that the Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Oregon (Mr. PACKWOOD) is necessarily absent.

If present and voting, the Senator from South Dakota (Mr. MUNDT) would vote "nay."

The result was announced—yeas 22, nays 71, as follows:

[No. 279 Leg.]

YEAS—22

Church	Hatfield	Pastore
Cranston	Hughes	Percy
Fulbright	Inouye	Proxmire
Goodell	Mansfield	Ribicoff
Gravel	McCarthy	Yarborough
Harris	McGovern	Young, Ohio
Hart	Mondale	
Hartke	Nelson	

NAYS—71

Aiken	Ervin	Montoya
Allen	Fannin	Murphy
Allott	Fong	Muskie
Baker	Goldwater	Pearson
Bayh	Gore	Pell
Bellmon	Griffin	Prouty
Bennett	Gurney	Randolph
Bible	Hansen	Saxbe
Boggs	Holland	Schweiker
Brooke	Hollings	Scott
Burdick	Hruska	Smith, Maine
Byrd, Va.	Jackson	Smith, Ill.
Byrd, W. Va.	Javits	Sparkman
Case	Jordan, N.C.	Spong
Cook	Jordan, Idaho	Stennis
Cooper	Kennedy	Stevens
Cotton	Long	Symington
Curtis	Magnuson	Talmadge

Dominick	McGee	Williams, N.J.
Eagleton	McIntyre	Williams, Del.
Eastland	Metcalf	Young, N. Dak.
Ellender	Miller	

NOT VOTING—7

Anderson	Mundt	Tydings
Cannon	Packwood	
Moss	Russell	

So Mr. PROXMIRE'S amendment (No. 754), as modified, was rejected.

Mr. STENNIS. Mr. President, I move now to reconsider the vote by which the amendment was rejected.

Mr. GRIFFIN and Mr. THURMOND moved to lay the motion on the table.

The motion to lay on the table was agreed to.

Mr. MUSKIE obtained the floor.

Mr. MANSFIELD. Mr. President, will the Senator yield to me briefly?

Mr. MUSKIE. I yield.

Mr. MANSFIELD. Mr. President, I would like to have the attention of the Senate. The Senate will note that this vote was completed a half hour before it was supposed to take place. It is quite likely that the same occurrence will take place on the Muskie amendment, which will be the pending business. So I would urge Senators not to stick too closely to the 2:30 time stated on the charts on their desks and to keep in mind that this vote may take place at 2 o'clock, or even before that time.

I thank the Senator from Maine for yielding.

AMENDMENT NO. 811

The PRESIDING OFFICER (Mr. EAGLETON). Under the previous order, the Chair wishes to lay before the Senate the pending amendment, amendment No. 811, offered by the Senator from Maine (Mr. MUSKIE). There are 2½ hours of controlled time on the amendment, divided equally between the Senator from Maine (Mr. MUSKIE) and the Senator from Mississippi (Mr. STENNIS).

Amendment No. 811, as modified August 31, 1970, is as follows:

On page 7, line 6, strike out the period and insert in lieu thereof a colon and the following: "*Provided*, That none of the funds authorized by this Act may be expended for the procurement of DD 963 class destroyers unless (1) the prime contractor with whom the United States contracts for the construction of such destroyers is required under the terms of such contract to subcontract to another United States shipyard and (2) the total number of such destroyers set forth under the terms of the prime contract is divided substantially equally between the prime contractor and subcontractor."

The PRESIDING OFFICER. Who yields time?

Mr. MUSKIE. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. MUSKIE. Mr. President, I yield myself 10 minutes.

As the debate reopens today on my amendment to divide the 30-ship, multibillion dollar DD–963 procurement, between two American shipbuilders, let me make clear the real issue at stake, and the main thrusts of my proposal.

First, it must be clearly understood that this is not a Bath amendment, as it has been described in the press this morning, but, rather, the amendment would give every qualified destroyer builder a fair shake, in open competitive bidding, at half the ships in the program. It is expected that bidders will compete from Washington State, California, Louisiana, Virginia, Massachusetts, and Maine, as they did in the course of the competition up to this point.

Second, that this is an economy amendment, whose objective it is to reduce the long-term costs of constructing destroyers in the DD–963 program and other combatant ship programs.

Third, that even the short-term cost increase which might result from a division of the contract will fall far short of the figures suggested by the Navy and my distinguished colleague from Mississippi, Senator STENNIS.

Fourth, that it would be a dangerous precedent to award the entire class of complex destroyers to one shipbuilder under a high risk "cradle to the grave" concept which is at present completely untested in the procurement of combat Navy ships. The cost of such a policy could well be a concentration of all our destroyer building capability in one yard and the destruction of potential competition.

Fifth, that the well publicized problems associated with overconcentration of defense contracts under one corporate entity must be avoided in the DD–963 program to minimize the possibility of overruns and slipped schedules.

Sixth, that this amendment comes as no surprise to the Navy or Litton Industries.

Seventh, that the House of Representatives military procurement bill, which was passed before the award of the contract, included language similar to my amendment, and indeed Litton's contract with the Navy includes language designed specifically to implement my amendment without delay or disruption to the program.

Eighth, that the weight of evidence since the DD–963 program was first planned, in 1966, has swung to such a degree that it is no longer prudent to award a single contract for 30 ships as it may have appeared 3 or 4 years ago.

Ninth, that acts of God, labor difficulties or mismanagement can disrupt any single facility and could endanger our entire destroyer program for the 1970's unless the contract is divided.

And finally, that the overwhelming evidence clearly indicates that the national interests can be best served by dividing this huge multibillion dollar procurement, which will span the next 10 years.

Mr. President, let me just repeat that my amendment would support:

The concept of a single design for all 30 ships, which the Navy desires;

The utilization of a central procurement group to purchase 30 ship sets of machinery and equipment, which the Navy desires;

The standardization of ships within a class, which the Navy desires;

The economies of series production of a large number of ships, which the Navy desires;

The transfer of a reasonable degree of responsibility from the Navy to the contractor, which the Navy desires.

And the modernization of more than one shipyard, which the Navy desires;

Mr. President, my amendment does not stop there. It also supports:

A broader and less risky distribution of defense contracts;

The maintenance of a competitive shipbuilding environment;

And the lowest long-range ship procurement cost to the Government.

My amendment is workable and it is cost effective.

Mr. President, after World War II throughout the mid-1960's the Navy came to Congress annually with requests for funds to purchase destroyers in lots of one, two, or three. This policy was fraught with problems, but virtually every representative of the Department of Defense argued that this was neces-

sary in order to maintain our mobilization base and spread economic benefits.

In 1970, with changing threats, we may be justified in changing the character of that mobilization base and unquestionably we should encourage new procurement techniques which will result in better ships at lower costs. But a reduction from 10 or 11 destroyer builders to one, when the Navy talks of replacing a large percentage of our entire destroyers, makes no sense at all.

It is my opinion that in attempting to correct the deficiencies of earlier procurement policies the Navy has overreacted and gone too far in the other direction. It is certainly a far cry from contracting for one, two, or three destroyers worth perhaps $50 million, to a contract for all 30 destroyers worth over $2 billion. And these are not small ships. In World War II they would probably have been called light cruisers.

It has been argued that dividing the DD–963 contract will increase the cost in the 30 ships at issue over $225 million and some have even suggested $600 million. These have been described as scare figures and in my judgment that is an apt description. The fact is that any increase would result primarily from two 15-ship learning curves rather than one 30-ship learning curve.

While no firm estimates have been made, my sources indicate the increased costs from two learning curves rather than one would be $91 million, if my amendment is implemented as intended. In addition, there may be other start-up costs and management costs to the Navy from having a second shipbuilder in the program. However, there are mitigating factors, and a reasonable range of possible increased cost by a division of this program might be in the order of $80 to $120 million which would be funded over 5 years. To put this in perspective let me note that under the Litton contract costs could increase $387 million while still providing a profit of $107 million.

This is a relatively small investment to make on a 30-ship program now projected to cost the Navy many millions of dollars. And the cost benefits from healthy competition would accrue to the Government's advantage on 20 planned follow-on ships and other Navy programs for years to come.

Before concluding my opening remarks there is one aspect of my amendment which should be clarified. There may be a false impression that the dollar value of the contract would be divided equally between the prime and the subcontracting shipyard simply because each would be building 15 ships.

In actuality the prime contractor would be responsible for the entire ship design, the procurement of essentially all material, and the construction of half the ships. This package would include approximately 75 to 80 percent of the dollars spent in the entire program. The subcontracting shipyard would be paid primarily for the labor expended on the construction of 15 ships, which would equal approximately 20 to 25 percent of the total contract price.

My fellow Senators, experts such as those on the Fitzhugh blue ribbon defense panel appointed by the President, as well as the General Accounting Office, cite the risks of overconcentration and the need to maintain competition. Even the Senate-House conferee's report on this bill last year stated in part:

> The conferees strongly point out the necessity of developing and maintaining the shipbuilding capability for all kinds of combatant and support ships on the east coast, the west coast and the gulf coast.

These, Mr. President, are my arguments in behalf of the amendment. And I repeat, in closing this opening statement, that this is not a "Bath amendment." It is designed to open up 15 ships in this procurement to competitive bidding, because of the national interest involved.

The PRESIDING OFFICER. Who yields time?

Mr. MUSKIE. Mr. President, I yield 10 minutes to the distinguished Senator from New Hampshire.

Mr. McINTYRE. Mr. President, I congratulate my neighbor from the State of Maine upon this amendment. As he knows, I serve on the Armed Services Committee, and one of our procurement problems today is in the area of the CVAN. That is one of our giant carriers. We are currently producing two, I believe, of the Nimitz class. All of us on the Armed Services Committee have been staggered by the tremendous costs of these carriers—$500 million to $550 million to $600 million to $625 million.

I know that the Senator from Maine has suffered with me through the agonizing period when New York Shipyard and Portsmouth were brought under the gun. But today, to build a CVAN carrier, we really have only one shipyard, Newport News, that has the capability and the expertise to build this giant, sophisticated carrier.

Some years ago, there was a possible competition from New York Shipyard. Today there is no competition. The one supplier is Newport News.

I would want to amend my remarks by saying that in the event of an emergency, we would beef up some of the other yards in the country, public and private, to take on this gigantic task. But it is a one provider; it is a one supplier; and the costs have gone up and up, almost out of sight.

So that this year, the third carrier planned, the CVAN No. 3—Nimitz No. 3—is not in the bill that is being debated today.

So, as the concept of the one manufacturer, the one provider, goes on and competition drops by the wayside, we do not effect in the long run what we had hoped to do.

Mr. MUSKIE. The Senator has brought out the point that I think is the key element of this amendment—the importance of maintaining competition. When we contemplate the award of a total destroyer program over a time period that would span most of the next decade, thus depriving any other destroyer builder yard of the opportunity to maintain its expertise and capability and manpower for this purpose, what we are doing is considering the question of concentrating our entire destroyer building capability in one yard, with all the consequences for cost and competition that that implies.

Mr. McINTYRE. Mr. President, I am a cosponsor of the pending amendment, which was submitted by the distinguished junior Senator from Maine (Mr. MUSKIE), and also cosponsored by the distinguished senior Senator from Maine (Mrs. SMITH), the distinguished Senator from Vermont (Mr. AIKEN), the distinguished Senator from Rhode Island (Mr. PELL), the distinguished Senator from Michigan (Mr. HART), the distinguished Senator from New Jersey (Mr. WILLIAMS), the distinguished Senator from Wisconsin (Mr. PROXMIRE), and the distinguished Senator from Ohio (Mr. YOUNG). The amendment asks that two shipyards be used for construction of 30 new DD–963 class destroyers instead of the one shipyard called for in the Navy contract for the recent award.

I believe we may have gone too far in one direction in our procurement policy of recent years. Earlier we had the policy of spreading awards to many suppliers so that our shipbuilding potential and expertise could be developed in many places. This procedure brought about some more competition between yards and kept costs relatively low. The procurement costs for some ships were somewhat reduced over the years while the cost of most military procurement was rising.

This same procedure, however, caused many problems:

Awards were spread among so many shipyards that no single yard felt it could fully justify the costs of building the most modern facilities. Shipbuilding facilities did not keep up with the state of the art.

Moreover, it was necessary for the Navy to develop and fund a number of expensive monitoring staffs to follow the building of the ships in several yards.

And it was difficult to fully utilize standardization procedures when several shipyards were engaged in production.

Because of these problems, the Navy changed course and began to use fewer and fewer shipyards for construction. This reaction, I believe, has gone too far in the recent award of the 30 DD–963 program to a single shipbuilder.

I am supporting the pending amendment, offered by my good friend, the Senator from Maine (Mr. MUSKIE), because I believe the single supplier concept raises problems which can better be met by dividing the shipbuilding between two yards.

Specifically, the problems I see are:

First. When a contract is placed solely with one shipyard the area surrounding the installation experiences a period of boom to be followed, when the contract is completed, by serious economic and job problems. I can speak personally about this phenomenon for I have seen what cutbacks have meant in the seacoast area of New Hampshire as phaseout has taken place at the Portsmouth Naval Shipyard during recent years. But if large contracts are split between two areas, the impact of completing them will fall less heavily on any single locality.

Second. Splitting the workload also

lessens the chance that an act of God, mismanagement at one yard, a strike or other problem might seriously delay completion of the work in question. The devastation recently caused by Hurricane Celia on the Gulf Coast and by other hurricanes in recent years in the same area clearly illustrate what might happen if this total contract were placed in one basket.

Third. Under the single supplier award for the building of these destroyers we would, in effect, be placing all of our expertise in the building of destroyers in one location. If, at some time in the future, we have a sudden need for the construction of destroyers or a requirement for a rapid expansion of destroyer building we may find that this one yard is incapable of fulfilling our demands. We should not place our defense structure in this kind of possible jeopardy. It might take years to restructure the skilled teams necessary to staff the additional facilities in case of need. Having staffs at two installations to fulfill this destroyer contract would be a hedge against such future difficulties.

Four. The argument can be made that placing the award with a single company would effect some savings. However, it can also be argued that the lack of competition, particularly in future years when new ships are built in this and similar classes, may well lead to higher and higher costs.

I hope, Mr. President, that the amendment will have strong support. My concern is not with the ability of the present recipient of the award. My concern is helping, if I can, to keep our defense structure strong. I believe the Muskie amendment will help to do just that, and I urge its support.

I thank the distinguished Senator for yielding to me so that I might bolster his arguments.

Mr. MUSKIE. I thank the distinguished Senator from New Hampshire.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. I yield 5 minutes to the Senator from South Carolina.

Mr. THURMOND. Mr. President, I strongly believe that it would be a very serious mistake for the Senate to adopt the Muskie amendment which calls for the Navy DD–963 contract to be divided among contractors other than the bid winner. This amendment, should it become law, would set an extremely bad precedent and throw the entire military contracting procedures into chaos. It would make a mockery of our defense contract machinery. More important, however, it would introduce politics and political considerations directly into defense procurement. For that and other reasons, it is a dangerous amendment which should not be seriously considered.

Let me remind the Senate of the amendment we recently had before us by the distinguished Senator from Delaware (Mr. WILLIAMS). The purpose of that amendment was to preclude the making of announcements of defense contract awards by Members of the Congress. The primary reason advanced in support of the amendment was that it raised the suggestion of political influence if Members of the Congress were permitted to make such announcements. We all agreed that this was a bad practice, and the amendment was unanimously adopted.

Mr. President, we have before us an amendment which would disrupt the award of the DD–963 destroyer contract which has been made on its merits by the Navy. While I can understand that the author of the amendment wants some of the business to go to his State, the procedure which he would have us follow does far more than "suggest" political interference in defense contracting. His amendment, if adopted, would be political interference of the most direct and blatant type because the Senate, or a majority of it, rather than the Defense Department, would have passed final judgment on a military contract award.

I hope my colleagues will look to the future and realize that if we establish the precedent that we are going to interfere with and set aside contract awards in such cases, we are inviting more trouble than can possibly be imagined. If this precedent is set defense contracts will no longer be awarded on the merits of the proposals and on the basis of the lowest and best bid. If such a policy is set contracts will finally be determined by who has the most votes or most political influence in the Congress of the United States. This will inevitably result in political logrolling of the worst type and would open the door for all types of undesirable practices.

If we adopt this amendment, Mr. President, we might as well add another amendment to the bill to the effect that no contract award by the Defense Department or any other Government agency shall be final or binding until it has been submitted to and approved by the Congress. If we interfere with one Government contract award, certainly we are taking upon ourselves the responsibility to look at others. There is certainly no reason to single out this contract. So far as debate here shows, its handling has been free of wrongdoing or irregularity.

Mr. President, I think that we should all realize the trouble that we are inviting if we should adopt this amendment. I do not believe that we want to disrupt the established procurement and contract selection processes. Congress should not get into the contract award process and I trust that the amendment will be rejected.

Mr. MUSKIE. Mr. President, will the Senator from South Carolina yield?

Mr. THURMOND. I am pleased to yield to the Senator from Maine.

Mr. MUSKIE. I should like to remind the Senator from South Carolina that the issue raised by him was first raised in the House and was included in the House version of the present bill before the contract was awarded.

The PRESIDING OFFICER. Who yields time?

Mr. MUSKIE. I yield myself 2 minutes.

The PRESIDING OFFICER. The Senator from Maine is recognized for 2 minutes.

Mr. MUSKIE. It was incorporated in the bill before the award was granted. As I argued yesterday, the consequences to the national interest of implementing Department of Defense procurement policy of awarding 30 ships to a single yard are so important to the country that the Navy should have withheld the award so that the contract negotiations at issue could be raised. Since the Navy did not, I do not think the point made by the Senator from South Carolina is relevant or applicable. I did not press the Navy to make the award prior to full consideration by Congress or raise the policy involved in the amendment. The award was made after it was raised. I think the Senate has every right to consider the issue on the merits, and by merits I mean the consequences to the Nation of the award of a destroyer program of 30 ships to a single shipyard. Obviously, on any award of this magnitude, everyone in this Chamber whose State may be involved is interested in the result.

I concur in the principle incorporated in the Williams amendment, cited by the Senator from South Carolina that to the extent possible political influence should be divorced from the awarding of contracts, but here we have a mixed bag. The question was raised and, I repeat, it was incorporated by the House in the form of an amendment to the bill before the contract was awarded. I think that dilutes the force of the Senator's argument considerably.

The PRESIDING OFFICER (Mr. HOLLINGS). Who yields time?

Mr. THURMOND. Mr. President——

Mr. STENNIS. Mr. President, I yield 2 minutes to the Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina is recognized for 2 minutes.

Mr. THURMOND. Mr. President, in response to the distinguished Senator from Maine, the Senator from South Carolina would say that the ground rules for the competition provided that the contract would be awarded to a single successful contractor. No changes in the ground rules were made at any time during the competition. The Litton Co. submitted the lowest bid, a bid of $9 million per ship lower than the competitor, or an aggregate of $270 million lower. The competitor had a chance to bid. Both had the opportunity to bid. Both studied this matter for a long period of time. Litton was the lowest bidder. Now, would not this destroy companies from coming in and bidding, if you will, Mr. President, letting them bid, and then saying to the loser, after the bid is over, "Although you are not the lowest bidder, we will let you share in the contract anyway." Where would we get companies to come in and submit a bona fide bid—the best bid, the lowest bid, the final bid, if they know they will have a chance later on to share in the contract anyway?

To me, it is perfect nonsense. To me, the Navy has followed the only logical procedure; namely, they have let a contract to a company that is $270 million lower than the competitor. I would say that there is no merit in the position of the Senator from Maine.

Mr. MUSKIE. Mr. President, will the Senator from South Carolina yield?

Mr. THURMOND. I am pleased to yield to the Senator from Maine.

Mr. MUSKIE. Mr. President, I yield myself 2 minutes for the purpose of responding to the Senator from South Carolina.

The PRESIDING OFFICER (Mr. HOLLINGS). The Senator from Maine is recognized for 2 minutes.

Mr. MUSKIE. Mr. President, first of all, this procurement competition has proceeded over a period of 4 years. Throughout that time there has been widespread speculation, well known throughout the industry, that although it was directed to the objective of a single yard, the award conceivably would have to be split, not so much because of its magnitude but because of the national interest. I am sure that speculation was as well known to Litton Industries as to Bath and the other four shipyards involved in the competition at one point or another.

Second, the blue ribbon panel that was appointed by President Nixon about a year ago recommended that contracts for shipbuilding of this magnitude should be split. Indeed, the McNeil subcommittee on that panel recommended that no contract of this type involve more than 10 ships. That was known within a week after the award. That raises the national interest issue which I am seeking to raise here today.

Finally, I repeat that the House spelled out this issue before the contract was awarded. I can therefore say to the Senator from South Carolina that the Senate is a perfectly appropriate forum to consider national security policy which has such consequences for the Nation. I believe that it deserves to be considered on its merits. The Muskie amendment does not propose to divide the contract between Litton or Bath. The Muskie proposal is that 15 ships remain with Litton and that the other 15 ships be subject to open competitive bidding which, presumably would elicit bids from the other five shipyards involved in the competition at one point or another and conceivably others. Bath may not be the winner. Other shipyards are well aware now of the economic bases of the two bids submitted and are in a position to bid competitively for the other 15 ships.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. I yield 2 additional minutes to the Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina is recognized for 2 minutes.

Mr. THURMOND. Mr. President, in response to the Senator from Maine, I would say that the Wyman amendment has not been adopted, and is not law; that the recommendations of the blue panel commission have not been put into operation and they are not the law; that the Navy followed the law, in that it called for bids, and the Navy let the contract to the low bidder. That was the law. That was the law then and it is the law now. Everyone had a right to come in and bid. Litton came in and submitted the lowest bid.

Now the Senator from Maine would come in and say, "Let us open it up and give it to others," after Litton was the lowest bidder, $9 million per ship lower than the other competitor, with a saving on the 30 ships of $270 million.

I say that this would be the most dangerous precedent Congress could establish. I would say further, when any company is dissatisfied, if they can run to Congress and say, "We did not get the bid but we want it anyway and therefore we want you to pass an amendment or a law to let us share in the contract," if we ever establish that kind of precedent in Congress, we are treading on dangerous ground.

Mr. STENNIS. Mr. President, I yield 5 minutes to the Senator from Arizona.

The PRESIDING OFFICER (Mr. HOLLINGS). The Senator from Arizona is recognized for 5 minutes.

Mr. GOLDWATER. Mr. President, without casting any aspersions, or making a remark in a facetious way, I believe that I can participate in this debate freely because we do not make destroyers in Arizona.

Mr. President, having spent a good part of my life in business, and having spent a part of my life in this body watching procurement procedures, I can certainly understand the concern of the distinguished Senators from Maine—both of them. I can understand the concern of others, too, who might see in this award something damaging to the shipbuilding companies who have not been successful. Even though I can understand this concern, I believe it is an unwise procedure.

We have a similar situation developing, I must say, in the aircraft industry. Mr. President, I spent last Saturday in the portion of southern California that has been dominant in space manufacture. There is very heavy unemployment out there now. Very few things are being manufactured in the space field at this time.

I would be the last one to suggest that because of this and because of the efforts to keep companies going and spread the business around that we should take the bid away from a successful bidder and divide it up and say to him, "You can keep 50 percent of the bid. But the other 50 percent must go out for further bidding."

I must say that I know of nothing in the contract that would prohibit Litton from saying to any other ship company, "Look, we have the contract for all of these ships. If you build them at our bid price, we would be glad to do business with you." I see nothing wrong with that. I do not think that ought to come out of any legislative decision of the Congress.

We have shipyards in the far west, in the southern part of the United States, in the northeast, and in the eastern part of the United States. They all need business.

I must say that this Senator from a desert State is most concerned about the state of the merchant marine. I think it is deplorable. I think the fact that we are way down on the list of the world's shipbuilders is deplorable. But we have to recognize the fact. And if we want to do something about it, we should do it. But this is not the way to do it.

As I mentioned earlier, we have aircraft companies in our country that have no business. We have that giant company, Boeing, making the C–47 and, hopefully, the SST. However, a large block of the Members of Congress are opposed to that.

Would it be proper for us to say to North American, the successful bidder on the B–1 contract, "Look, your friend Boeing has a high unemployment rate. We are going to reopen the bids on the B–1. You can keep half of them. But we will allow other companies to bid on the remainder, even though the bids might be higher than your successful bid."

Litton made a bid that was substantially lower than those of other companies.

We have a similar situation developing with trucks. The military is buying trucks, and we find fewer and fewer suppliers. We used to have dozens of firms that would bid on trucks. Today, there is a relatively small number.

Speaking again from the standpoint of a Senator who has been in business and has engaged in bidding and has sat in the committee and on the floor and watched our procurement proceed, although I have to agree with the Senator from Wisconsin that we have practiced procurement in a very unwise manner, I do not think that this is unwise.

The bid was open to all companies. One company, Litton—a relatively small shipyard—was successful in underbidding the other companies.

I do not know how we can do this. We cannot do it legally.

The question pops into my mind, having made a contract for the ships with Litton, how can we, in essence, break that contract by law?

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. GOLDWATER. I will yield in a minute.

We can do it. There is no question of that. But is it right? Would we not be subject to suit?

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. GOLDWATER. I yield.

Mr. MUSKIE. Mr. President, as I have indicated in the record, the contract was written to provide for a split in the event of a legislative mandate, anticipating the possibility that the House amendment might become law.

There is a provision in the contract to implement such legislative provision, if adopted.

Congress, through adopting my amendment, would be moving in the direction anticipated by the contract and would be implementing the terms of the contract. We would not be breaking the contract.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. STENNIS. Mr. President, I yield 1 additional minute to the Senator from Arizona.

The PRESIDING OFFICER. The Senator from Arizona is recognized for 1 minute.

Mr. GOLDWATER. Mr. President, as I said before, there is certainly nothing to prevent us from doing this in a legislative way. But I think of the consequences for Litton if they had already proceeded with construction under their contract. This might cause them losses for which they could sue.

This is something that has concerned me about the C–5A program. We have never gone into it. How much would we be liable for?

I am not speaking as a lawyer, because I am not one. Let us say that they had made provisions for starting construction. We could not say to them, "We will divide the contract up among other companies, even though their price might be higher than the bid Litton submitted."

I do not see how we can do this from an ethical standpoint. Certainly we can do anything we want. But I think we would be paying more than if we had stuck to the contract.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. GOLDWATER. I have no more time.

Mr. MUSKIE. Mr. President, I yield myself 1 minute.

The PRESIDING OFFICER. The Senator from Maine is recognized for 1 minute.

Mr. MUSKIE. Mr. President, I want the record to be clear. The following is from the contract signed by Litton:

> The government shall have the right to require the contractor to subcontract the construction of a quantity of complete vessels as may be necessary to comply with the legislation referred to in the premises hereof. The contracting officer may require a contractor to solicit all shipbuilders of naval ships systems . . . a possible list for destroyers of one or more subcontractors.

That is from the contract itself. My amendment is directed to implement the bidding procedures anticipated in the contract itself for a quantity of complete vessels, using the contract language, as indicated by Congress. If Congress acts favorably on my amendment, it will do what the contract anticipates.

Mr. GOLDWATER. Mr. President, will the Senator from Mississippi yield me 1 minute?

Mr. STENNIS. Mr. President, I yield 1 minute to the Senator from Arizona.

The PRESIDING OFFICER. The Senator from Arizona is recognized for 1 minute.

Mr. GOLDWATER. Mr. President, if what the Senator says is true, then I see no need for legislative action on this matter. I question whether it is wise and whether it can be done in view of the low bid we have had on this destroyer and whether it is ethical, even though it is written into the contract.

Mr. MUSKIE. Mr. President, may I say in response that what the Senator is saying is that even though there is a provision in the contract that anticipates possible legislative decision on the contract and even though this award to a single shipyard for the entire destroyer building program for the seventies is obviously of the first magnitude in the national security field, it is inappropriate for the Senate to consider this policy and make a judgment on it.

I do not agree with the Senator.

Mr. GOLDWATER. Mr. President, I must say that I do not agree with the Senator from Maine. I think we would open up a real Pandora's box.

We do not make destroyers in Arizona, but we do make other things.

While I do not accuse the Senator of being interested in the matter because of one shipyard located in Maine, I can understand his concern as I can understand the concern of any Member of Congress over high unemployment in his State occasioned by the loss of a contract or by decreased prices.

I feel that the amendment is unwise. That is the reason I oppose it.

Mr. MUSKIE. Mr. President, I yield myself 1 minute.

The PRESIDING OFFICER. The Senator from Maine is recognized for 1 minute.

Mr. MUSKIE. Mr. President, first of all may I say to the Senator that when this procurement competition began over 4 years ago, I indicated to Secretary McNamara, who was responsible for the concept, my very real reservations about the wisdom of a single shipyard procurement for a contract of such magnitude in the national security field. My record on that is clear.

Speaking of a Pandora's box, if the Litton contract is completed in accordance with the single shipyard award, I will be interested in seeing what kind of a Pandora's box we have when the 21 ships are open to competitive bidding and there is only one shipyard available.

Then, we can decide which was the Pandora's box.

Mr. GOLDWATER. The Senator and I agree on one point. We both agree Secretary McNamara was unwise.

Mr. MUSKIE. I think the Senator is unwise in agreeing with Mr. McNamara.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. Mr. President, I yield myself 10 minutes.

The PRESIDING OFFICER. The Senator from Mississippi is recognized for 10 minutes.

Mr. STENNIS. Mr. President, I think the facts have been fairly well developed here in the debate and in matters that have been placed in the RECORD. One thing is outstanding and incontrovertible about this matter and I think it largely decides this issue. From the very beginning the Navy had made up its mind, and so announced, that it wanted to award a contract for these destroyers, and that the winning bidder would get the entire contract. The idea was that they could get more ships for their money. That was put into writing in the very beginning in the invitations that went out to shipyards to compete. It has been reiterated over and over again. They first had six; they reduced that to three; then they eliminated the third, and the two remaining bidders ran head and head for a year—Bath and Litton-Ingalls.

Of course, they knew and expected that the winner was going to get the full amount, and the bids were based on that fact. Their bids were bottomed on it and that was the basis on which they were bidding.

It has been stated that it was understood or talked about in the trade that there was going to be a division. I do not see how that could be classified as true. Both of them were figuring their heads off trying to get the contract for the 30 destroyers, should Congress authorize the full 30 destroyers. That was the only issue with those bidders. The figures were based on that understanding. They knew what they were doing, of course, with all their competence. They knew exactly what they were doing. They were operating under the law and the Navy was, too. There is no proof here that there is any fraud or that the Navy or the bidders failed to follow the procurement law Congress has laid down.

Along the way, just before it was over, and just before their bids did become final, this amendment was filed in the House of Representatives. It would make some kind of uncertain change about it. There is no debate on that amendment or explanation such as we are having here. If there was a vote it was formal; the chairman said he would take the amendment.

But the bid dates were running out and the day was approaching when the Navy had to act or those bids would not be valid or binding any more. That was the idea months and months before this was to become final. That was the reason for having a clause in there that if Congress should pass legislation on the subject then the Navy could ask the successful contractor, whoever it was, whether it was Bath or Litton—both of them were in the running then—to open it up, whatever the conditions might be, but that it might increase the cost. Everybody knew that and the Navy understood it. That is why there is an estimate placed on the amendment from the House of Representatives that it would cost a minimum of $225 million extra.

But at any rate, the only matter before us now is the Senate amendment. The Senator from Maine (Mr. MUSKIE), the author of this amendment, and his cosponsors knew that Litton was going to be the prime contractor. They got the bid and got it on 30 ships but now it is asked, "Would we let them have one-half, just one-half?"

But when he asked for one-half, he agrees that the company is all right, that they have the capability, that the contractor is all right, that there is no fraud, and that the law was followed. Otherwise he would not have agreed to do that. But he said that they want one-half. They do not say one-half at the bid Litton put in or that the price would be the same as Litton put in. No, they do not say that.

That is the first question many Senators ask me when I tell them the facts.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. STENNIS. I shall yield in a moment. I wish to finish my thought.

They would open it up and ask for one-half of the ships. When the Senator is asked whether that would be at the same price as it was to the low bidder, we are told that the answer is no.

When the question is asked at what price it would be, we are told, "We do not know."

That is why I say the best estimate on this matter is that it would cost from $225 million to $300 million. It could cost as high as $600 million. That would be the price if we went back and said that we were going to start over and have two designs, 15 ships under one design and 15 ships under another design. Frankly, the form of the Senator's amendment now does not propose that, but in the original form it did.

I am glad to yield to the Senator from Maine.

Mr. MUSKIE. I want to be sure I understand one of the Senator's points. I understand the Senator objects to the fact that my amendment provides for open competitive bidding to decide the that would be released from the contract.

Mr. STENNIS. I make the point there is no shipyard, Bath or any other shipyard, that states, "Yes, we will take 15 at the price the Government already has for those 15."

Mr. MUSKIE. Mr. President, will the Senator yield again?

Mr. STENNIS. I yield.

Mr. MUSKIE. What would be the Senator's comment on the provision in the contract between Litton and the Navy which provides if such a division is directed by Congress that there should be open competitive bidding to decide the distribution of the 15 ships?

It seems to me that contract provision reflect that that way of dealing with the problem is the best way in the judgment of both Litton and the Navy. Does the Senator disagree?

Mr. STENNIS. I know that that is the method adopted, but as a practical matter, the Senator is asking that this matter be disemboweled and torn up so that some other shipbuilder could build some of the ships but when the question is asked at what price it would be we are told, "We do not know. It is going to be competitive. We do not know if it will be as low as this or not."

I judge that Litton would be left out of the competition. I hear reports that many shipyards think they will get in on that. I do not know that; nobody knows. But it will cost more money. We have spent 5 weeks trying to reduce the amount of money to be spent for these military articles and now we are going to put in a provision and the only evidence is that it would cost nearly one-quarter of a million dollars for the same number of ships.

Mr. MUSKIE. Mr. President, will the Senator yield further?

Mr. STENNIS. I yield.

Mr. MUSKIE. I assume the Senator is not saying that this provision in the Litton-Navy contract is impractical. The Senator applied that adjective to my amendment; because it would open up 15 ships to competitive bidding. If it is impracticable as contained in my amendment, then I take it it is impracticable in this provision of the contract.

The second point I make is that any estimates of the increased cost, when what is involved is the price that would be set as a result of open, competitive bidding, is an attempt to look into the future as a result of the competition and what the result of the competition will be. I must say I do not have that kind of vision, and I doubt if the Senator has.

Mr. STENNIS. That is exactly what we had—open competition on the bids, looking for the best deal for the Federal Government. This competition was between six, to start with, three later, finally two. The award went to the one that was low. Now the Senator's amendment proposes to tear that up and say that we are going to have competitive bids for the second 15.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. STENNIS. I will not yield just now.

I do not think we are going to find that the bids for the second 15 are as good as the bids we have for the 30.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. STENNIS. Yes, I yield.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. Mr. President, I yield myself 5 minutes.

Mr. President, with all deference to the Senator, I must get along to other points. I want to show him courtesy——

Mr. MUSKIE. Mr. President, will the Senator yield? I am sure the Senator does not want it to appear that he is making the point in this way, as I understand it; but the Senator is saying that the competition up to this point has resulted in the lowest possible bid, but that if we use the same process to get the lowest possible price for the Government on the 15 ships, it would not result in the lowest possible bid. How going through the same process would result in two diametrically opposite results is beyond me.

Mr. STENNIS. As I know my eighth grade arithmetic and with what commonsense I have, if we stand right here now, the Navy has the lowest bid it will ever get on the 30 ships. Call it what you will, it calls for less money in the contract the Navy already has than any others. No one has shown anyone will even take that contract at the price Litton proposes to get on the second 15.

Mr. MUSKIE. Has anyone made that offer?

Mr. STENNIS. Everybody wants to get in on it, but no one makes the proposal.

Mr. MUSKIE. Are such proposals being invited?

Mr. STENNIS. Not officially, and not even in argument. No one has said it believes we could get a better bid for the second 15 than the Navy has.

Mr. MUSKIE. Has anybody been solicited?

Mr. STENNIS. That is academic.

Mr. MUSKIE. I think not. Can the Senator expect anyone to come forward with bids with any idea that the 15 ships would be open to such bids?

Mr. STENNIS. What the Senator from Maine means and what I mean are so clear that I think, if we may, we should pass on to some other points.

I shall not be contradicted in saying flatly that if this award goes some other way, it is expected to cost more money. The original contract, in talking about this opening up, said the parties recognized—who were the parties recognized? The parties to the contract, Ingalls and Bath Co.—will require equitable adjustments in the terms and conditions of the contract.

That is a nice way of saying it will cost more money. That is what the letter I put in the RECORD the other day said, that the Muskie amendment in its present form is going to cost more. I will read the paragraph:

> The actual impact of the proposed amendment will not be known until the government negotiates with the prime contractor, but it is clear that the cost could be substantially higher than even the $225 million increase which has been estimated for up to a 20–10 split of the program. Without a significant increase in program funding, the use of a second ship builder will substantially decrease the number of ships the Navy will be able to procure.

All Senators are put on notice, then, that if we get into this matter, we are going to have to increase the money substantially higher than the $225 increase which is estimated for the 20–10 split—either that or we will get fewer ships for the same money. That is plain commonsense. One does not have to go to the Naval Academy or anywhere else to arrive at that conclusion. That applies whether one goes to the grocery counter or anywhere else.

Mr. President, I want to move on, if I may. The most serious matter I think Senators have before them, in addition to the extra money, is that we would be converting ourselves into a kind of supreme committee to pass on the change or altering or modifying and the awarding of contracts. That is what it is. This has all been done according to law, and the award went to this group because it had the lowest bid.

Call it what you will, the proposal here is that we want a part of that contract set aside, when the Government has done the best it can, even if it costs more. We do not want this contract.

Here is a list of contracts coming on: Take the B–1. Major contracts are coming up on ongoing bombers. It is in research and development now. That is so unless it is stopped along the way by the Congress. That has now gone to North American Rockwell, in California.

The F–14 aircraft, Grumman in New York State. That is one that was let a year ago, or a little more.

We find ourselves just sucked into a vortex by every disappointed contractor who finds one reason or another to get his Senator to offer an amendment to have the contract reviewed in the congressional halls because he failed to get the contract.

There are always some pros and cons, arguments back and forth, some points being good and strong, and some others being weak.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. STENNIS. Mr. President, I yield myself 5 additional minutes.

We are plowing right into that particular situation without warning.

F–15 aircraft. McDonnell Douglas, Missouri.

A WACS aircraft. Boeing, Washington.

The MBT–70, main battle tank. General Motors.

There will be others on ships.

Our function, as I see it, in the absence of fraud, is to lay down the law and, under the law, the Navy, the executive branch, and the Defense Department operate and carry out the law and make those awards.

We really adopted, by unanimous vote on a rollcall, an amendment offered by the Senator from Delaware, in which Congress said:

> We are going to prohibit you from even telling us where that award is going until you announce it to the general public.

Now we come right back around, here, and say we are going to get in here and review these contracts, and change them.

On this 2-yard proposition, I am certainly not blind to the proposition that we want sources for our production. I know in this case I had no idea who would get this contract, but the Navy, in its judgment, decided to try out this 1-yard concept for some ship, and they tried it out on one that was not awfully difficult, and got this good price, and everyone knew what they were doing. Congress knew it, and had passed on it, in a way, time after time, and they saved this money.

There are modern methods of building ships involved here, and the Navy got the benefit of them in this contract. I think the Federal Treasury is entitled to the benefit of what looked like a mighty good figure. We have spent all these days here, Mr. President, arguing over the money in this bill. The committee spent months and months, and we reduced this bill by $1.3 billion. Senators have almost endlessly offered amendments from the floor to reduce it more. One Senator, in particular, proposed a $5.2 billion reduction, I believe it was. After a fine, vigorous debate, my good friend from Maine—I say friend, and I mean it—jumped in and voted for that reduction. That was last Friday, less than a week ago.

Now, the substance of this amendment is, "Well, we are going to put about a quarter of a billion dollars more into this contract, for just one type of vessel."

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. STENNIS. In just a moment. "And let it be carried on off, with good luck to everyone."

I do not criticize the Senator for what he has done. The very opposite. But where are we going? What do we mean by these things, anyway?

I think the die is already cast. The measurements have been taken. The law has been followed. Bath and Litton had their day in court when they made their bids, and under the rules, they knew they could not both win. They went into that situation as free American citizens. They are bound by the result.

We do not change the rules in the middle of a ball game. That is an old American principle of fairness. This amendment does not even seek to change the rules in the middle of the game, but after the ball game is over and the score has been announced. Then, this proposal says:

> Well, we are going to get up different rules; we are not going to let that go through.

I yield to the Senator from Maine.

Mr. MUSKIE. I should like to make one or two points. Would the Senator like to yield on my time?

Mr. STENNIS. Yes. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Mississippi has 37 minutes remaining.

Mr. MUSKIE. All right; I yield myself 2 minutes on my time, to respond.

First, we are concerned about savings in the military defense field. We are concerned not only with savings in this year's budget, but in the long term; and I think a great deal of the debate that has taken place last summer and this summer in the area of military spending has focused on the long-term cost implications of national defense to a greater extent than ever before. What my amendment focuses on is the long-term cost consequences of this award.

The second point I would make, and very briefly, is this: The Navy Department reserved its option, right up until the award, to award it either to one source or to two or more. It was clear that this was a possibility. If the Navy reserved the right to decide the question at the moment of the award, certainly the Senate and Congress had a right to consider the policy at the same time, and that is what the amendment on the House side did. It raised the issue just about the time that the Department of Defense was resolving the issue in its own councils.

The Senator is saying that although Congress raised the issue before the award was made, the Navy, by its unilateral act, could foreclose Congress from any further consideration of that policy by awarding the contract before Congress could determine the issue. That is the issue here; not the question of "changing the rules in the middle of the game." The issue I am talking about was in process and should have been considered fully, not only in the Department of Defense, but in Congress, before the contract was awarded; and I do not think Congress should be foreclosed at this point.

Mr. President, I yield 10 minutes to the distinguished Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, the distinguished Senator from South Carolina spoke about how this amendment would involve logrolling and political pressure. If he means that this amendment represents a congressional challenge to military procurement, I say it is about time that, on the basis of our disastrous experience with the military handling of procurement, Congress took some interest in procurement. I do not think we have taken enough. The Under Secretary of Defense said the other day in a speech that was heard throughout the country that our procurement is in a mess, that we overspend and underperform, and that we need a drastic shakeup, in effect.

Mr. President, I would not be in favor of the Muskie-Smith amendment if it would not save money, in my view. I think it will save money. The reason I say that is because, in my opinion, that amendment will help to prevent another C–5A situation from arising.

We know about the $2 billion overrun—the two thousand million dollar overrun—on that one weapons system. Anyone who has followed the C–5A affair must be dismayed at the manner in which the DD–963 destroyer program has been handled so far. It is as if one were witnessing a modern variation of a Greek tragedy. The details of this procurement may differ somewhat from other major weapons systems, but the disastrous outcome is quite predictable. At the very least there will be massive cost overruns, all or most of which will be absorbed by the Federal Government and paid for by the American taxpayer. In all likelihood, there will be significant delivery delays. In addition, we can expect degredation of the original contract performance specifications, or performance failures, or both. These problems are the hallmarks of the modern major weapons system, especially evident in the procurement of ships.

In the first place, we already find the same pattern of cost growth or cost overruns in the planning and contract definition stages of the DD–963 that is so typical of military procurement. In 1967, the Navy estimated the cost per ship at $35 million. In 1969, the unit cost had increased to $68 million. The most recent official cost estimate is $83 million per ship. Even this estimate seriously understates the known program costs for the DD–963. Components such as the LAMPS helicopter, scheduled to be installed on these ships, have been entirely omitted from the official cost estimates. Moreover, the most serious cost overruns in weapons programs have occurred during the production phase, and production of the DD–963 has not yet begun. In my judgment, a cost estimate of $110 million per ship would not be unreasonable.

Second, the award of the DD–963 and the events leading up to the award bear striking similarities to the award of the C–5A contract. It will be recalled that there were three major contenders for the C–5A contract and that in the early rounds of the bidding, Lockheed proposed neither the lowest bid nor the best proposal from a technical standpoint. Yet, in the last round, Lockheed's bid was sharply reduced below its two rivals. In retrospect, in light of the enormous overruns in the C–5A, Lockheed's low bid can only be categorized as a buy-in. In other words, it appears from the evidence that Lockheed deliberately underpriced its proposal, knowing that actual costs would greatly exceed its bid. In the vernacular of the defense industry, Lockheed "took a dive" or "bought in" in order to get the C–5A contract.

The facts that have emerged in the DD–963 program suggest another buy-in. Up until the last round of bidding, Litton's proposal was almost identical to its rival. In the last round, however, Litton's bid suddenly nosedived. An examination of the breakdown of Litton's price proposals indicates, as Senator

MUSKIE pointed out yesterday, serious inconsistencies that can be reconciled only by assuming that the eventual final costs will be far higher than Litton's proposal.

The type of the contract used in the DD–963 program is also strongly reminiscent of the C–5A. Once again, we have a fixed-price incentive contract with firm price commitments on the part of the contractor. At the same time, we have a provision in the contract entitled "Incentive Price Revision—Successive Targets" which permits future repricing of the contract. A similar clause, called the repricing formula, was incorporated in the C–5A contract. It was the repricing formula which completely undermined the so-called fixed-price aspects of the C–5A contract and which permitted much of the C–5A cost overruns. The successive targets feature of the DD–963 program, in my opinion, is the Navy's version of the repricing formula which came to be known as the golden handshake.

In these and other respects, the DD–963 contract bears all of the significant attributes of a total package procurement. Of course, since the revelations of the C–5A contract, total packaging has been roundly condemned by the administration, high officials in the Defense Department, and the defense industry, and the Navy would be the first to deny that the DD–963 is a total package procurement. Nevertheless, the essential elements of total packaging exist in this case.

But what is most disturbing about the program is the fact that it has been concentrated into the hands of a single contractor. Although it would be unfair of me to criticize Litton's capability, or its performance thus far in this program, it should be pointed out that Litton is primarily an aerospace conglomerate, that it purchased the firm that is to perform this program only a few years ago, and that it has therefore only limited experience in the shipbuilding field. Yesterday, Senator MUSKIE went into the serious backlog that exists in Litton's shipyard, a backlog totaling over $1.5 billion. According to Senator MUSKIE, Litton is already stretched beyond its ability to perform. The question that we must ask ourselves today is whether Litton will, in the next few years, do to the Federal Government and the taxpayer what Lockheed has done to the Federal Government and the taxpayer. Having become the sole source producer of the DD–963, as well as other weapons programs, will Litton one day inform the Government that unless Litton is bailed out of a multihundred million dollar cost overrun, it will halt production of its weapons programs? Will Congress be faced with yet another ultimatum to bail out a defense contractor or risk the loss of programs deemed necessary to the national security?

In my judgment, the present DD–963 contract has already taken us far down the road toward a Lockheed C–5A situation. The only way to avoid this situation at this late date is to follow the procedures set forth in the Muskie-Smith amendment. The way to prevent the further concentration of ship construction in the hands of one contractor is by opening up this program to further competition.

In conclusion, I want to express my complete dissatisfaction with the handling of the DD–963 program. As I have indicated, the contract used is very much like the C–5A contract and will undoubtedly result in problems similar to those encountered in the C–5A. A more serious shortcoming, however, has been the failure on the part of the Navy and other proponents of the DD–963 to demonstrate a military requirement for this program. For example, the interrogation of Admiral Sonnenshein, commander, Naval Ship Systems Command, with respace to this program, consisted of less than three pages in the hearings of the Senate Armed Services Committee. The committee's report discusses this program in five lines in which it states only that the new class of destroyers will be heavier than the present destroyer and will be fast enough to escort attack carriers. It seems incredible to me that a program which will cost over $2½ billion can be ushered through the Congress with so little discussion and consideration. Any civilian program of even a fraction of the size of the DD–963, intended to result in social benefits to the American people, would receive much more careful scrutiny, and possibly a Presidential threat of a veto in this period of cost cutting and budget trimming.

Mr. MUSKIE. Mr. President, I should like to express my appreciation for the contribution the Senator has made this morning.

I think the entire country is aware of the public service which the Senator has rendered in his extensive inquiry, extending over many months now, into the cost implications of our procurement policies in the national defense field. I want to take this opportunity to pay my tribute to him, because I think that as a result of that experience, the Senator's views on this amendment are most important to the Senate and to the country.

Mr. PROXMIRE. I thank the Senator. I think this is an excellent amendment, and I am very happy to support it.

The PRESIDING OFFICER. Who yields time?

Mr. MUSKIE. Mr. President, I wonder whether my distinguished colleague from Maine wishes to speak at this time.

May I, at the outset, express my appreciation to my colleague for the tremendous amount of work and effort she has provided in connection with this matter from the very beginning. I think she has raised questions and answers which are useful not only to the people of our State but also to the Senate and country in connection with this procurement. I should like to take this opportunity to express my public appreciation for that work.

Mrs. SMITH of Maine. Mr. President, I shall be very brief. Perhaps 2 minutes will be all the time I shall require, for the information of my distinguished colleague. I am deeply grateful for his generous and kind words.

Mr. President, I have on five previous occasions set forth in detail my reasons for urging that this destroyer procurement be divided. On June 29, 1970, when I discussed the aspects in detail; on August 18, 1970, when I disclosed for the first time the McNeil staff study report to the Blue Ribbon Defense Panel condemning ship procurement of more than 10 units in one yard; on August 20, 1970, exposing the lack of credibility in Navy Department contradicting estimates of extra cost stemming from split procurement; on August 26, 1970, revealing the shocking and incredible refusal of the Attorney General's Office to investigate indicated violation of the law in this procurement; and on August 27, 1970, reporting on the GAO report and its joining me and the McNeil staff study report in condemning the procurement policy of placing the award of so many ships in one yard at considerable risk to national security interests.

I will not repeat today the details of my contentions on these occasions as they have been before the Senate for a sufficient length of time for full consideration. But I do want to make final comment on the lack of credibility in Litton's price.

In the first place, on the "best and final offer" Litton amazingly and without explanation reversed its prior economic assumptions in order to make the drastic reduction in its price. In the second place, detailed audits were not made on the final prices prior to the award. These two factors will retain a cloud over the credibility of the Litton price for many years to come, especialy since under the contract the Navy let, Litton can recover for any economic forecasting error it has made with little loss of profit and can overrun its target costs by $387 million and still realize a profit of $107 million.

The PRESIDING OFFICER. Who yields time?

Mr. MUSKIE. Mr. President, I suggest the absence of a quorum, the time to be taken out of my time.

Mr. STENNIS. Mr. President, I will share that time.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HANSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. CRANSTON). Without objection, it is so ordered.

Mr. STENNIS. Mr. President, I yield 5 minutes to the Senator from Wyoming.

The PRESIDING OFFICER. The Senator from Wyoming is recognized for 5 minutes.

Mr. HANSEN. Mr. President, I rise to express my very strong opposition to the amendment offered by the distinguished Senator from Maine (Mr. MUSKIE). This amendment asks us to repudiate the contract which the Navy has awarded for the new DD–963 class destroyer program to Litton-Ingalls and require that one-half of the 30 ships involved be subcontracted to another shipbuilder. I certainly hope the amendment will be defeated. Aside from the very adverse ef-

fect which its adoption would have on the DD–963 program by increasing costs and delaying delivery of ships, I am almost appalled at the thought that Congress should step in and require a subcontract in a procurement matter which has been legally and regularly conducted by the Navy and which has resulted in the award of a contract after more than 2 years of intense industry competition.

I strongly believe, Mr. President, that it would be most improper and would set a very dangerous precedent indeed for the Congress to intervene in a procurement matter such as this, particularly since the fact that Ingalls Shipbuilding Division of Litton Systems, Inc., had both the best technical design and the lowest bid by far is not questioned. As a matter of fact, about the only criticism which the Senator from Maine has been able to make of this contract award is that all of the 30 destroyers are to be constructed by a single shipyard and that he feels that it would be dangerous to contract such a large portion of the shipbuilding program to one contractor.

It is my understanding, Mr. President, that the DD–963 program was deliberately intended by the Navy and the Defense Department to be a major departure from prior ship procurement programs. This procedure was followed in recognition of the rising costs of ships and as a result of a determined effort to reduce ship operating costs by having them as nearly identical as possible. Since the Navy realized early in its consideration of the DD–963 program that significant savings would result by designing the destroyer for low production costs and building the ship in large production lots, the basic ground rule was established that the production responsibility—that is, the entire contract award—would be limited to a single contractor. The Ingalls shipyard was selected as the contractor after a very careful analysis of its proposal and all aspects of its capability to do the job, including its detailed management plans, production plans, schedules, and labor force. The Navy concluded—and correctly so, I believe—that Ingalls was fully capable of doing this job.

The Navy estimates that if the Muskie amendment is adopted the actual cost of the program will be increased by a minimum of $225 million, depending on a number of factors. It is a fact that Litton was more than $270 million lower than Bath for the 30-ship program. Those of us who so strongly advocate economy in Government and in defense procurement certainly should not vote for an amendment which could increase the procurement costs by a quarter of a billion dollars or more. The use of a second shipbuilder would substantially decrease the number of ships the Navy will be able to procure unless we provide a significant amount of added funding for the program. This is directly contrary to the expressed desire for a reduction in military spending which has been repeated and reiterated so many times during the last several weeks.

In addition, if I understand the Muskie amendment, it would contemplate that all ships would be constructed under a single design, presumably Litton's. It also contemplates that there would be competitive bids from shipyards approved by the Department of Defense. If only one design is to be used—and this, of course, would be desirable from the standpoint of bringing about standardization—it would entail delaying procurement of ships from the second source until a bid package is available from Litton. This would involve about a 2-year delay in the contract award for the second 15 ships. The Navy needs these new destroyers just as quickly as possible in view of the everincreasing submarine threat by the Soviet Union, and we should not impede their construction and delivery.

Mr. President, while Litton-Ingalls was lower than Bath on the final bid by about $9.2 million a ship, I understand that the award was not based on price alone, although, of course, price was a significant consideration. I understand that there were five separate categories and that the award was based on full consideration of all of these categories. The Navy has advised, and I think this is very significant and should be emphasized, that in all five categories Litton's proposal was judged superior. The degree of superiority varied depending on the category but at no point was there a reversal of the relative position. These categories were known to all contractors from the day they entered the competition. The evaluation within these categories was based on a comparison with predetermined standards which were established prior to receipt of the proposals and prior to the start of the evaluation. No reversal of position has occurred as a result of the extensive reviews of the source selection conducted by the Secretary of the Navy and the Secretary of Defense prior to receipt of approval to proceed with the award of the production contract.

The clear fact is that not only were the ground rules not changed to the detriment of Bath or any other bidder, but there was no change whatsoever after February 15, 1968 when the request for proposals were issued.

In summary, Mr. President, the DD–963 destroyer program originated in December 1966. From its inception the Navy intended to award the entire contract to a single shipyard. This was well known and well recognized, both by the Department of Defense, the Congress and by the competitors. Not until this year has the Senate been asked to legislate or mandate a subcontract of the prime contract. I think this proposal is entirely too late. The award has been made to the shipyard which won the competition because it had the lowest and best bid. If subcontracting half of the ships is so meritorious and necessary, I fail to understand why the Senator did not attempt to mandate this prior to the selection of the winning contractor. Until this year—until the award was made—the Senator apparently was entirely content to proceed on the Navy's prescribed "winner take all" basis. Repudiation of these procurement processes and source selection procedures would, in my judgment, establish a very dangerous precedent that could have very serious repercussions indeed.

In conclusion, Mr. President, I am convinced that this amendment is without merit. As I have said, I believe it will set a very dangerous precedent in the procurement field and would mean that no contract award by the Defense Department would have finality until Congress has passed upon it. This would mean that none of the military departments could be sure as to how to proceed or whether their findings as to the best and lowest bidder would be final, even in cases where the procurement procedures were entirely legal and regular. Since I think we would live to regret the adoption of this amendment, and that it would destroy the integrity of the established procurement processes, I urge that it be defeated.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. HANSEN. I have just a few minutes.

Mr. MUSKIE. Mr. President, I yield myself 1 minute on my own time.

The PRESIDING OFFICER. The Senator from Maine is recognized for 1 minute.

Mr. MUSKIE. Mr. President, this is a question which I have asked other Senators on the Senator's side of this issue. Does the Senator know of any basis in terms of figures submitted by the two final bidders upon which such estimates of increased costs could be put? I know of none. I have searched for it. I have asked for it. I thought that since the Senator made the point over again, that he might have it.

Mr. HANSEN. Mr. President, as nearly as I can respond to the Senator from Maine, let me say that if the bid proposals that have been submitted by Litton Ingalls are compared with those submitted by the other contractors, I think it is not unreasonable, based upon the fact that each ship would cost $2.9 million extra, that $225 additional will be spent.

Mr. MUSKIE. Mr. President, was the Senator aware that my amendment provides that 15 ships go, not to Bath, but to open competitive bidding? Was the Senator concluding what the results of that bidding would be?

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. STENNIS. Mr. President, I yield the Senator from Wyoming 2 additional minutes for additional colloquy if he needs it.

The PRESIDING OFFICER. The Senator from Wyoming is recognized for 2 additional minutes.

Mr. HANSEN. Mr. President, let me say that one thing that disturbs me most about this matter is that this contract has been entered into legally, in complete conformity with regulations and with the procedures set forth by the Department of Defense. I think that now to step in and say, "We will vitiate the contract and take half of the ships which have been awarded to Litton Industries and have rebidding on them," would do great violence to the whole bidding system.

It is well documented that once a final bid proposal has been made, to then throw it out to new bidding and to ask for a rebidding does violence to the sys-

tem. It would not only result in bad faith on the part of the Government but would also be a gross injustice to the original bidder. Such a procedure, if it were to be followed repeatedly, I should think, would most certainly result in a diminishing interest on the part of bidders. It would result in rising costs to the Government in the procurement of all of the materials which it may require from time to time.

That is the thrust of my argument. The Senator from Maine misunderstands me completely if he thinks that my concern may be quibbling over whether it would be $225 million, $235 million, or $250 million.

The point I am trying to make is that this is a very serious proposition to say that we will vitiate the contractual procedure that has been agreed upon.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. HANSEN. I have no further time.

Mr. MUSKIE. Mr. President, I yield myself 2 minutes to direct a question to the Senator.

The PRESIDING OFFICER. The Senator from Maine is recognized for 2 minutes.

Mr. MUSKIE. Mr. President, the Senator is making the point, but he did not answer the question.

The argument of the Senator from Mississippi has very clearly pointed out as the key element of his opposition a possible price increase that might result.

The Navy has given us no basis to have a firm figure of projected increased or decreased cost.

The only figures submitted by the two bidders were on 30 ships. The figures the Senator submits show an increased figure of $225 million.

My amendment provides that the building of these 15 ships will be open to open competitive bidding.

If what the Senator is telling me is that the result of that bidding is foregone and foreclosed and that it will result in a price increase of $225 million, I then have a question as to whether the bidding which resulted in this award might not have resulted in a higher price than we ought to pay.

My amendment provides for open, competitive bidding and the throwing around of figures like $225 million up to $600 million, which has been used by the Navy, is not responsive to the substance of the amendment.

Mr. HANSEN. Mr. President, if the Senator would yield, I am not certain whether the Senator was asking me a question or making a statement.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MUSKIE. Mr. President, I yield myself 1 minute.

The PRESIDING OFFICER. The Senator from Maine is recognized for 1 minute.

Mr. MUSKIE. Mr. President, I took 2 minutes time to respond to the Senator and to invite any comment he might wish to make. I would have asked a question if I had been speaking on his time. Since I was speaking on my time, I made a response to him and invited any response that he might wish to make.

Mr. President, I yield 4 minutes to the Senator from Massachusetts.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized for 4 minutes.

Mr. KENNEDY. Mr. President, I am a supporter of the amendment.

I commend my friend and colleague from the State of Maine for bringing this matter to the attention of the Senate this afternoon.

I think this matter is of great significance, not just in terms of this particular contract, but more generally with respect to the kinds of procedures we will follow over the period of the next several years as we continue to develop these various new weapons systems.

Mr. President, I heard the splendid statement of the Senator from Maine earlier. I think it was most convincing and most compelling.

I think that over the period of the last couple of years, the Senate has been made increasingly aware of the problems many large defense contractors have in fulfilling their responsibilities under contractual arrangements with the Department of Defense.

This matter has been, I think, best demonstrated by the distinguished Senator from Wisconsin (Mr. PROXMIRE) who has reviewed in considerable detail the fact that single source contract have in many instances had enormous cost overruns and have not met the criteria demanded by the Defense Department.

I think the alternative which is presented here by the distinguished Senator from Maine is in the national interest no only with respect to this contract, but as a procedure to follow in the future.

In terms of the cost factor, the Senator from Maine, I think, effectively rebutted the argument that the purchase of all 30 destroyers from a single source would necessarily be less expensive. But the point I find to be very compelling is that we have to think in terms of the long-range cost of contracts for destroyers and other ships. What will this award mean in the future? What will it mean that 5 or 7 years from now when the requirements of our defense posture may mandate that we purchase additional destroyers or ships we will find out this Mississippi yard is the only yard in our country prepared to do the required work, the only yard that has the technique, skill, and manpower to do the job. We will then be in a bind. I think it is appropriate for us to think about the future in our consideration of costs.

So, Mr. President, I rise this afternoon to say that I share the sentiments which have been expressed so well by my colleague from Maine. I think the case for his amendment has been substantiated and is very strong.

I find that the report of the blue ribbon Fitzhugh Commission appears to endorse the sentiments which have been so eloquently stated on the floor of the Senate this afternoon by the Senator from Maine. I would urge Senators to consider favorably this amendment for the reasons stated, because it does protect the national interest and it does strengthen the whole system of contracting arrangements between contractors and the Department of Defense.

I ask unanimous consent that my brief prepared statement be placed in the RECORD at this point.

There being no objection, the statement by Senator KENNEDY was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR KENNEDY

Mr. President, I strongly support the amendment of the Senator from Maine. In my view we can most efficiently meet our national security needs by building the DD 963 destroyers at more than one shipyard.

In recent years we have seen that even the largest defense contractors can woefully mismanage an important weapons contract. Such mismanagement can cost the American taxpayer billions of dollars. It can delay production of weapons systems for years.

The possibility of mismanagement is greatly increased when only one contractor has the capability of producing the plane or the ship that the Pentagon needs. The contractor has no fear of competition. It knows that if expenses soar, the Pentagon will have little choice but to bail it out.

The DD 963 contract places the production of thirty new destroyers in the hands of only one company. In addition, it forecloses competition for future contracts since it deprives shipbuilding facilities in Maine, Massachusetts and elsewhere of the opportunity to modernize and gain valuable technical know-how. From now on the Pentagon will have to rely on a single contractor to meet the nation's needs for destroyers.

This is as unnecessary as it is unwise. There are several shipyards which are able to build the destroyers the Pentagon requires. In Maine there is the Bath Iron Works. In Massachusetts there is General Dynamic's Quincy Shipyard. This Yard has demonstrated its capabilities by building destroyers, carriers, submarines—every class of naval vessel. With Yards such as these there is simply no need for the Pentagon to turn over all production of destroyers, now and in the future, to just one company.

The current situation is an invitation to mismanagement. The amendment introduced by Senator Muskie, on the other hand would insure that additional shipbuilding facilities participate in the production of the DD 963 and retain the capability to compete for future contracts. I therefore urge my colleagues to adopt this amendment.

Mr. KENNEDY. Mr. President, will the Senator yield further so that I might ask several questions?

Mr. MUSKIE. Mr. President, I yield 2 minutes to the Senator from Massachusetts for that purpose.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized for 2 additional minutes.

Mr. KENNEDY. One of the questions which has been brought up by the Senator from Wyoming and the Senator from South Carolina is whether this is an appropriate time for the consideration of this amendment. Is it too late to raise these issues after the contract has been awarded? Could the Senator amplify briefly his earlier arguments on this point?

Mr. MUSKIE. Mr. President, the point made by the Senator from Mississippi and his colleagues is that the awards having been made, Congress should not move in to upset them lest the precedent invite political influence in the future to achieve similar results.

Well, this is not that case because here,

at a time when the contract had not been awarded, the House of Representatives attached a similar amendment to the bill and it is still there. The Navy at that time had still preserved to itself the option of awarding the contract to one yard or more than one yard. Since the Navy itself had that under consideration, it was timely that Congress at the same time have it under consideration; but before Congress could resolve the issue here, the Navy moved in and awarded the contract. That is different than the situation the Senator from Mississippi and other Senators have been arguing.

I say that since the issue was raised in Congress before the award was made, it is appropriate for Congress to resolve it, and that is what the amendment would permit.

Mr. KENNEDY. As I understand it, one of the most important facets of the amendment is that it would permit competitive bidding for the building of these last 15 destroyers by a number of different yards around the country. I think all of us are aware of the great work done by Bath in Maine. They obviously would be one of the contenders.

The thrust of the amendment is to open up the opportunity for bidding from a variety of different private companies and to get the lowest possible cost for these additional 15 destroyers. Is that correct?

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MUSKIE. Mr. President, I yield 3 additional minutes.

The PRESIDING OFFICER. The Senator is recognized for 3 additional minutes.

Mr. MUSKIE. Bath would undoubtedly be one of the bidders. There might be up to four others that were involved in the earlier stages.

First, on the basis of actual cost, independent of economic factors, Bath's costs were actually lower than Litton's on the final round.

On the economic factors, when the procurement was completed and the ships built and paid for, they are likely to even off between yards because the economic payments are related to national indices on labor and material. This suggests that Bath is one of the companies in a position to bid in at least as low as Litton has.

The second point is this: All potential bidders are now aware of the outcome of the bidding and the economic basis upon which the two yards submitted their bids. In other words, other yards know what Litton is going to get. With that situation, it seems to me that the opportunity for competitive bidding is more likely to produce a lower figure than a higher figure on the balance of the ships.

Mr. KENNEDY. The thrust of the argument is that with this kind of competitive bidding for the remaining 15 ships, we might be able to save money, that if this award were to go to Bath, or General Dynamics in Massachusetts, or any other shipyard, it could very well mean that these next 15 ships could be built at a lesser cost and the savings would inure to the taxpayer.

Mr. MUSKIE. That is conceivable. The one offsetting factor is that a shorter learning period would be involved for Litton and the other yards. That would tend to increase the cost per ship. But I think that could be offset completely and may be more so by the competitive factor we discussed; at least that is speculative.

Mr. KENNEDY. Finally, I wonder if the Senator would comment on the long-term impact of this contract award. We have heard so much during the course of this debate that we are really saving over $200 million because Litton had the lowest bid, and that we should be grateful for those savings.

However, does not the Senator share my concern that at some time in the future, when the Navy will need additional destroyers, the situation might be quite different. Does not the Senator agree that there will then be one yard that will be able to say to the Federal Government, "Either you are going to pay this amount or you will not have the ships you want, at least you will not have them in the time that you want."

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MUSKIE. Mr. President, I yield myself 2 additional minutes.

The PRESIDING OFFICER. The Senator from Maine is recognized for 2 additional minutes.

Mr. MUSKIE. Mr. President, I think the Senator is correct. Let us consider Bath as one potential bidder. It has been almost completely a destroyer building yard. They have built 160 destroyer types. They have a reputation beyond that of any other company in the history of the Navy.

If this award to Litton sticks, it means that for 8 years, at least, no other destroyers will be available for bid by that or any other yard. It is highly unlikely to me that the destroyer building capability of Bath could be sustained for the 8-year period, because what are involved are skilled workmen who have been working on destroyers for decades, expertise, use of the organizational structure which has been erected to build a destroyer. If in that 8-year period Bath must shift to other types of ships in order to maintain its existence, then its destroyer building capability will be reduced. That is a capability which the Navy has always valued, and which will be in jeopardy as a result of this policy.

That may or may not be in the national interest. I have a parochial interest, but I think there is a national interest in sustaining that capability in this as well as other yards. If we destroy that capability, then, 8 years from now, or any such time as 20 destroyers—the target was 50 originally—are submitted for bid, it may well be that Litton can name its own price, and that is not likely to be in the national interest.

Mr. KENNEDY. I thank my colleague.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. MUSKIE. I yield myself 30 seconds.

Mr. KENNEDY. I feel that Senator MUSKIE's case is convincing. I think it has been stated extremely effectively. I would urge my colleagues to support the amendment.

I thank the Senator from Maine.

Mr. MUSKIE. I thank the Senator from Massachusetts.

Mr. STENNIS. Mr. President, I yield myself 2 minutes for the time being.

As I understand the situation now, so far as the Senator from Maine and I know, we have no other speakers except the two of us.

Mr. MUSKIE. The Senator is correct.

Mr. STENNIS. We have discussed this matter, and after I make a few remarks with reference to some of the comments that have been made, the Senator from Maine suggested, and I agreed, that we could have a quorum call and have it announced through the speakers that we are going to yield back all of our time except for 5 minutes to each of us to complete our statements.

Mr. MUSKIE. Yes, Mr. President, that procedure has been discussed, and it is perfectly agreeable with me.

Mr. STENNIS. So, unless something intervenes that we do not know about now, we can follow that procedure.

Mr. President, I yield myself 5 minutes.

Some points have been made by Senators.

I just want to reply. I say in all fun here that I have thoroughly enjoyed our two friends here who are really versed in shipcraft and who have ascertained that the second 15 ships could probably be built at a lower price than Litton has bid. Litton's price, though, is $9 million under the price of Bath Iron Works, as they stand now.

I say that in half fun, because the very thing we are talking about, competitive bidding, is the thing that has been going on all this time, furiously, on these identical ships. These bids were firm bids and represented hard money.

I do not see any fault with the fact that the Navy made some kind of estimate, in response to official requests, to give us some kind of picture as to what it probably would cost to split the contract up. Neither one of those bidders has given an estimate. They have not been called on to give estimates, as I understand. So the only word we have is the word of the Navy here.

May I refer to the remarks of the Senator from Wisconsin just briefly? He said that he studied the contracts and he said that he did not want another C–5A contract. I am sorry the Senator was called away from the Chamber. The contract has been through the mill of the General Accounting Office. They were familiar with the C–5A. There is not a word of their analysis that makes any similarity in any way with the C–5A. The Senator said this was the Navy version of the golden handshake. With all due deference, I have to judge that to mean that was an attempt to "smear" the contract.

No one has found anything like that,

including the General Accounting Office people.

We had the C–5A matter up. It was debated on its merits. The $200 million in controversy was in the bill. The Senator from Wisconsin did not offer an amendment to strike it out. I think we should move on from there .

I regret that the Senator's remarks could not have been based on a further analysis. He talks about massive overruns and the way the DDT has been handled so far. Almost everyone will agree that the Government received a rather good contract, lower than Bath expected it to get by $9 million a ship, and they have not had a chance to proceed with any kind of start on construction.

Mr. President, it is easy to get up here and cut loose and start charging people with things. Someone quotes Mr. Packard about how terrible things were in the Pentagon. Mr. President, do you know who had the final say on that contract? Mr. Packard, the same man who is quoted here about the iniquities and inequities and gross abuse and everything else wrong. This is the same man who passed on this contract. It had to come across his desk and he had to exercise surveillance over it as the effective, strong right arm in these matters for the Secretary of Defense.

This matter has gone through the regimes of some of our best officers. Take Admiral Moorer. The Senate unanimously confirmed his nomination after President Nixon named him as Chairman of the Joint Chiefs of Staff. Admiral Moorer was Chief of Naval Operations, the highest office in the Navy. Two Secretaries of the Navy have sat on this problem, the last one being a very fine Secretary and former Governor of Rhode Island. So these charges that are just thrown around here do not have the force of proof. They are just talk.

I pass on to more important matters.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. STENNIS. If we are going to hold ourselves to 5 minutes, I cannot yield.

Well, I will yield to the Senator.

Mr. MUSKIE. I am not aware that I made any charges against anybody. I focused my argument on national interest questions as I see them. I am not interested in inpugning the motives of anyone, including the Senator from Mississippi.

Mr. STENNIS. No. I thank the Senator. I think I said the Senator from Wisconsin had quoted Mr. Packard and talked about all the things wrong with the Pentagon. He happened to be the very man who exercised surveillance over this very contract, and to that extent it is his product and has his approval.

This is no new kind of contract. This contract has been in use for years. It is under this type of contract that the Navy received bids on the A–7, the tactical air fighter. We are calling them up now as fast as we can; the UAG weapons control system, under which Pratt & Whitney supplies engines for the F–14 and the F–15.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. STENNIS. I yield myself 2 minutes.

These are the most modern aircraft we have. The Air Force used this type of contract for years.

This is no golden handshake contract.

This type is old, and worn, and used, and tried, and tested, and has proved to be reliable.

Mr. President, let us talk about this single builder approach being an unsound approach.

A basic aim of this plan was to provide shipyards with programs of sufficient size and stability to permit the most economical ship procurement, and to provide incentive to the shipbuilders to undertake modernization of their facilities.

That is exactly what it is doing. In the final analysis, with the Navy falling behind in keeping up its requirements for new construction, the Government would be better off to apply the dollars which would be required to split the DD–963 program toward procurement of additional ships, and so forth. I shall not go any farther into the details.

I say the Navy made a judgment on this matter, and the way the bids came in proves the soundness of that judgment.

Mr. President, if we are able to reach this agreement, I would have 5 minutes under it, and for the time being I would yield.

The PRESIDING OFFICER. Does the Senator ask unanimous consent?

Mr. STENNIS. Let us see what the Senator from Maine says.

Mr. MUSKIE. Mr. President, I yield myself 1 minute to respond.

The Senator has, of course, again raised points that I would like to cover, but I think I can do so in the 5 minutes we each have agreed to allot ourselves after the quorum call.

May I suggest to the Senator that the quorum call be a live quorum, so that Senators will have time to get here? We are advancing the time by an hour.

Mr. STENNIS. If the Senator will yield, let us say it will be a rather slow quorum call, but not make it live. It might take an unusual amount of time.

Mr. President, with that understanding, with the time to be charged to both sides, I suggest the absence of a quorum.

The PRESIDING OFFICER. Does the Senator ask that there then be 5 minutes for each side, after the quorum call is concluded?

Mr. STENNIS. We have agreed to that.

The PRESIDING OFFICER. That would require unanimous consent.

Mr. MUSKIE. Yes, we have agreed to yield all our time except 5 minutes.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MUSKIE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. CRANSTON). Without objection, it is so ordered.

Mr. STENNIS. Mr. President, do I correctly understand that we are now in the process of closing the debate on this amendment with 5 minutes for each side, all of the time remaining thereafter to be yielded back?

The PRESIDING OFFICER. That is the order.

Mr. STENNIS. Mr. President, I yield myself 5 minutes.

We have had a great deal of discussion about the single award to a single shipyard, and about the value of having more than one mobilization base.

Let me point out clearly now that the materiel, the subcontracting, the work, and all the other things that go to make up this order are scattered through 45 States of the Union—45 States. The labor and the products that will come under the subcontracts will take 60 percent of the money. So it is no longer true that the mobilization base is the shipyard alone.

America's great mobilization base is the one that produces these products all over the Nation. The shipyard at Pascagoula, Miss., under the present contract, is the assembly point where some of the work will be done, of course. But the making of a destroyer, which is not a complicated ship, does not require a great deal of time, under present, modern conditions, in any shipyard.

I have before me a letter that I wish to refer to briefly. I shall read a part of it. It relates to the solemn obligation of the Acting Secretary of the Navy to give us an estimate—and it is the only estimate we have—about what the impact will be if the present contract is divided. The entire letter was placed in the RECORD the other day, but I shall read a few lines from it. After a review of the matter, here is the significant paragraph:

> The actual cost impact of the proposed amendment—

That is the Muskie amendment—

> would not be known until the government negotiates with the prime contractor—but it is clear that the costs could be substantially higher than even the $225 million increase which has been estimated for up to a 20/10.

Mr. President, that is the big point here. More than $225 million—considerably more—higher—is almost certain to be the added cost if this amendment should be adopted.

The Government already has a contract for the production of the ships.

To sum up the matter, the Bath bid was something like $275 million over and above the Litton bid. Had it not been for the Litton bid or someone else's bid, under Bath's, Bath could have walked off with the $275 million, based on a 30-ship program.

Because the Bath bid was that much higher—and I say that with all respect—Bath prompts an amendment here in the Senate and asks it, by its vote, to set aside the contract and let Bath have a full chance at it—let Bath

and others—let Bath or someone—Bath and others, I would say, take another chance to get to the bidding again and maybe walk off with even a higher bid than it did on the original 30 ships—I mean higher than the Bath bid.

We have no assurance of what would happen, but they want to get another shot at it. I do not blame them for that. My point is, they have had their day in court. They have had their chance.

Is it right for the successful bidder to be penalized in order to help Bath or anyone else?

Mr. President, last year the Congress authorized and appropriated funds for the first increment of a new class of destroyer, known as the DD–963 class. The fiscal year 1971 defense authorization bill now before us contains a request for the second increment of six of these ships. This program is considered one of the most urgent within the Department of Defense. The multiyear contract for 30 of these ships has recently been awarded to Litton Systems, Inc., Ingalls Shipbuilding Division, after 3 years of planning and over 2 years of intense industry competition. Mr. President, I would like to expand for a few minutes on why we need these ships, what they are like, and what they are intended to accomplish.

Most of the Navy's destroyer force consists of ships whose basic design stems from the late 1930's and whose construction was completed in the early 1940's. All of these older ships have been modernized to the extreme limit permitted by their basic hull and machinery. They are now incapable of being updated with today's weapons and electronics. This means that, unless replaced, substantial numbers of our destroyers will find themselves inadequate if they should have to deal with the modern submarines, warships, and missiles being deployed by the Soviet Union.

As of August 1 of this year there were 112 World War II destroyers in the fleet—almost two-thirds of the current general purpose destroyer force. These old destroyers were modernized in the late 1950's and early 1960's. This program was designed to extend their useful life for 8 years against the expected threat. A large number of these ships have now exceeded their extended life period. Though modernized, these ships do not have the basic electrical power and space to accommodate the new weapons and electronics capable of countering the Soviet threat of the 1970's and 1980's. Further modernization of these ships is not feasible. These World War II destroyers, even those that have not exceeded their extended life period, are only marginally effective with respect to the rapidly increasing Soviet threat.

I have a table, Mr. President, showing the age comparison of United States and Soviet destroyer-type ships and I ask unanimous consent to have it printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

AGE COMPARISON OF UNITED STATES/SOVIET [1] DESTROYERS

	Age (years)				
	0 to 4	5 to 9	10 to 14	15 to 19	Over 20
Guided missile destroyers: [2]					
Soviet	8	16	11	(3)	(3)
United States	6	30	15	3	(3)
Destroyers: [2]					
Soviet			50	45	(3)
United States			8	8	[4] [5] 112
Escort ship:					
Soviet	(3)	(3)	30	15	
United States (DE's)	23	8	10	3	
Patrol escort:					
Soviet	25	35			
United States	(3)	(3)			

[1] Although the Soviet destroyer force is, in general, new and modern, they are rapidly retiring their oldest destroyers (none are over 20 years old) and replacing them with new units. At the same time in order to keep up with improved technology and threats, the Soviets are continually updating and modernizing their newer classes of ships.

[2] This comparison does not include the Soviet classes of escort and patrol escort ships. The Soviets employ these ships in a manner comparable to the U.S. employment of destroyers.

[3] None.

[4] 99 of the 112 destroyers are 25 years old.

[5] All 112 were modernized in the late 1950's and early 1960's.

Mr. STENNIS. Mr. President, this new class of ships, the DD–963 destroyer, will be the first major warship in the history of the Navy to use marine gas turbines for propulsion. This system will enable the ship to react more quickly in emergencies and will drive the ship faster than any destroyer we now have at sea. It is expected that the DD–963 will have a speed in excess of 30 knots. They will have sufficient speed and endurance to escort attack carriers.

This program is considered to be one of the most urgent within the Defense Department. Its urgency stems directly from our country's need for a Navy second to none. Let me expand for a few minutes on why this need is so pressing at this time.

Today Soviet units can be found deployed in all the world's oceans. Their submarine force alone numbers about 375 highly capable ships, many of them nuclear powered. When we remember that in late 1942 the Germans, with only about 69 submarines at sea in the Atlantic, succeeded in almost severing our vital sea lines communications, we can begin to grasp the scope and magnitude of the threat confronting our Navy. It could be fatal to underestimate this threat. Sealanes can be maintained only by a dedicated modern Navy with adequate resources in terms of modern ships and aircraft. This submarine threat generates an urgent requirement that the United States must have capable, up-to-date antisubmarine warfare units. The backbone of any antisubmarine warfare force is the destroyer. It is the ship which has tne speed and sea-keeping qualities to keep up with our fast task forces and high speed, high value military convoys. It is the ship which must be able to carry out its antisubmarine warfare mission at high speeds in all sea conditions anywhere in the world. The destroyer force has always been and will continue to be known as the "work horse" of the Navy. A modern, capable destroyer force composed of adequate numbers of ships is more essential to our country's defense today than ever before.

Briefly, our Navy requires destroyer types to support several elements of our seapower. Included as one of the more important requirements is operating with and as a part of the combatant task forces, including the attack carrier forces, amphibious forces, and hunter-killer forces which constitute the spearhead of the Navy's offensive power. All of these ships and forces must be protected against submarine, surface and air attack so that they can carry out their missions. Coupled to the major protective functions are several other requirements for destroyers, such as naval gunfire support during amphibious operations, offensive action against surface ships, blockades, and search and rescue work.

The most pressing need is for replacements for the large bloc of World War II multipurpose destroyers still active in our fleet. These ships were built well before most of the men manning them were born. Our last new destroyer was a 1953 design and it is in this type that the Navy is most deficient. Most of us are aware of the serious obsolescence problem we have in the fleet, but few seem to realize just how acute this situation is with respect to the Navy's destroyers.

Let me say that I have personally been on some of these old destroyers and I know that the living conditions on them are almost a disgrace. Efficient galley and messing arrangements, modern berthing, air conditioning, reading areas, toilet and shower facilities are a must if we expect to retain highly trained officers and skilled technicians.

Unless replaced, substantial numbers of our destroyers will be inadequate if they should have to fight the modern submarines, warships and missiles being deployed by the Soviet Union. That is why we so urgently need the DD–963 class destroyers. While a one-for-one replacement of the old ships is not contemplated, the Navy has consistently reported to Congress the requirement for a minimum of 50 new multipurpose destroyers. This is less than half of the World War II ships which must be retired. The contract signed in June was for 30 ships which is about as many as the Navy desires to commit to a single design. A new or modified design is contemplated for the balance of the ships required.

The DD–963 is going to be a very impressive, forward-looking ship. First of all, it will incorporate outstanding sea-keeping and endurance characteristics. As I have already stated, Mr. President, this new class of ships will be the first major warship in the history of the Navy to use marine gas turbines for propulsion. This will give it many advantages over other types of propulsion systems and will drive the DD–963 faster than any destroyers we now have at sea. The gas turbine propulsion system is not unproven. All components, turbines and propellers, are at sea now.

The DD–963 is a multipurpose ship with a primary mission of antisubmarine warfare. The weapon systems

planned for the ship are the most modern equipment available in this country today. This equipment, including the long-range sonar, antisubmarine warfare weapons and gun and missile batteries, have already been tested at sea and demonstrated their capability and readiness for use in the DD–963. The DD–963 is not a research and development program—it is a ship production program. Only equipment already tested will be installed. At the same time the ship is being designed with sufficient electrical power, weight and space reservations and other features to insure that as new weaponry is developed, in the years ahead, they can be installed without ripping the ship apart with costly conversions.

For antisubmarine warfare, the ship will have a long-range sonar and the most favorable noise characteristics at high speeds—25 knots and higher—ever projected for a surface warship. This ship will carry about twice the antisubmarine warfare weapon load of that in our most recent class of destroyers. The DD–963 will also have a helicopter facility for manned helicopters. The facility will include a hangar, and is expected to operate two helicopters under normal conditions. These helicopters will extend the ship's antisubmarine warfare attack capability well beyond the horizon.

For defense against air and missile threats the ship will have a long-range air search radar, a new gunfire control system of great accuracy and quick reaction capability, Sparrow missiles, and 5-inch projectiles.

The ship will have a full shore bombardment capability, including two 5-inch lightweight guns—the first new major shipboard gun system produced by our Navy in 18 years. A comparison of DD–963 gun range capability and the gun capability of various Soviet cruisers and destroyers indicates that the DD–963, with its new rocket-assisted projectiles, will outrange all except the *Sverdlov* cruiser.

Of importance to the young men who will man these ships, the living conditions in the DD–963 class will surpass those of any previous destroyer. Noteworthy also is the fact that the ships incorporate equipment to overcome air and water pollution.

From the beginning, the basic aim of the DD–963 program has been to procure, through series production, a large number of identical destroyers which meet the Navy's operational requirements at minimum life cycle cost. The plan always has been to award a multiyear contract to a single shipbuilder. This will minimize the cost growth, delays, claims and inefficiencies. The currently approved procurement plan beginning in fiscal year 1970 avoids peak funding, insures proper ship construction economies, and delivers the ships at least cost to the Government.

Mr. President, I stress that the expanding Soviet threat to our sea lines of communications requires our Navy to be equipped with modern antisubmarine warfare forces of which destroyers are the backbone. The Soviet submarine force each year, in its pattern of operations, is extending its patrols for longer periods, in greater numbers, and at greater distances than ever before. It is apparent to me, Mr. President, that to maintain our sealanes of communication, in light of this growing Soviet capability, requires a modern Navy with up-to-date ships and equipment. The DD–963 destroyer program will provide a significant step in this direction. We need it and we need it just as soon as possible. I hope that the Senate will not impede this program in any manner.

In conclusion, Mr. President, and as evidence of the problem which we face, I call attention to an article which appeared in the Washington Post on August 28, 1970, stating that the authoritative Jane's Fighting Ships said that the United States and British fleets are being reduced below danger levels while the Soviet Navy undergoes "spectacular" growth. In particular, I would like to call attention of the Senate to one statement made in Jane's Fighting Ships:

> The problem the U.S. Navy faces is still the encroaching obsolescence of much of the fleet. The replacement of these worn out ships and aircraft is expensive under present market conditions, but cannot be further delayed if the Navy is to have the combat capabilities which the United States can rely on in the future.

Mr. President, I ask unanimous consent to have the entire article printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Aug. 28, 1970]

JANE'S CALLS SOVIET FLEET'S GROWTH "SPECTACULAR"

LONDON, Aug. 27.—The U.S. and British fleets are being reduced below danger levels while the Soviet navy undergoes "spectacular" growth, the authoritative Jane's Fighting Ships said today in its 1970–71 edition.

"There is no hiding place from the hammer and sickle," Editor Raymond Blackman said in a foreword.

The U.S. Atlantic Fleet is stretched thinly to maintain a Mediterranean presence and is unable to maintain the desired capability, he said.

Blackman argued that Soviet naval activity throughout the world—pursued with technical confidence and operational competence, imagination, ingenuity and flexibility—adds up to a Soviet drive to attain supreme sea power.

Meanwhile, Britain's naval planners have had the dual tasks of reducing the British fleet to its lowest peacetime level and creating from what remains a fleet adequate for the envisaged needs of the late 1970s and the 1980s, Blackman wrote.

He said of the American navy:

"Those of responsible opinion in the United States are worried about the military posture and budget of the U.S. Navy, which is considered to be inadequate to meet world-wide national and international commitments, or even to compensate for the natural wastage of an aging fleet, an alarming proportion of which was built during the 1939–45 war emergency . . .

"The problem the U.S. Navy faces is still the encroaching obselescence of much of the fleet. The replacement of these worn out ships and aircraft is expensive under present market conditions, but cannot be further delayed if the Navy is to have the combat capabilities which the United States can rely on in the future."

Blackman asserted that "in the Atlantic, U.S. Navy resources are stretched thinly to maintain the 6th Fleet in the Mediterranean as well as a modest force in the Middle East . . . The Navy has been unable to maintain the modernity, readiness and capability of the Atlanta Fleet at the desired level."

The PRESIDING OFFICER (Mr. CASE). The time of the Senator from Mississippi has expired.

Mr. DODD. Mr. President, will the Senator from Maine yield for a question?

Mr. MUSKIE. I yield.

Mr. DODD. I should like to say to the Senator from Maine that I come from a shipbuilding State, too. We have a long history in the construction of ships. I have read as carefully as I could what the Senator has said. He makes sense. There is one thing that bothers me about the situation. Litton is the designer, am I right about that?

Mr. MUSKIE. The Senator is correct.

Mr. DODD. Does the Senator think that the designer of a vessel should be given special or extra consideration? Under the Senator's amendment, as I read it, he would not get anything for having designed the ship, which I take it is a good design.

Mr. MUSKIE. Let me say to the Senator that under the amendment, Litton would remain the prime contractor. Litton would be responsible for the entire ship design and for the procurement of essentially all the materiel and construction of half the ships. Litton's share under my amendment would involve something like 75 percent to 80 percent of the dollars. Bath's share of the subcontract, or whatever other yard it might be under my amendment, would have a share of 20 percent to 25 percent of the dollars.

In the rest of my argument I can pinpoint the significant points.

There is just one issue in this debate, whether it is in the national interest over the next 10 years to concentrate all our destroyer building program in one shipyard.

The points raised in the course of this debate by the Senator from Mississippi and others are these:

One, he raises the point, is it fair for the Senate and Congress to consider this issue at this time.

May I say to the Senator that this issue was raised by a House amendment adopted by the House to the bill, before an award was made, and at the time when the Navy itself was considering the options of awarding a contract to one shipyard or more than one shipyard. It is appropriate in a decision of such serious consequences to national security that not only the Navy but also Congress would, as a whole, share in setting a policy which will determine who will build the destroyers for the next decade and, in effect, determine where the destroyer building capability of the country will be concentrated.

The second question which has been raised in this debate is the question of cost, whether a division of the contract would increase the costs.

May I say to my colleague that under the amendment, the 15 ships which would be taken from under the Litton contract would be awarded on the basis of open, competitive bidding.

On this point, may I say to the Sen-

ate that Bath, as one of the bidders, submitted a bid which, on the basis of all the factors except the projection of the economic increases, presented costs lower than Litton's. The entire $276 million difference was represented not in terms of the final cost to the Government, but in the difference of the two shipyards in projected increases relating to economic factors. Over the period of the contract, those differences would disappear because they are related to the national indices of material and labor costs that would apply to both shipyards.

Mr. SCOTT. Mr. President, on June 24, 1970, the majority leader on nationwide television made some statistics available regarding the amount of money being spent by the present administration on human needs.

On August 20 in Los Angeles, the Vice President spoke about the emphasis this administration is placing on adequately funding programs designed to aid all our people.

A few days after the Vice President's speech, I indicated on the floor of the Senate to the majority leader that for each thousand dollars of expenditures a certain amount was being channeled into the fields of health, education, urban renewal, the environment, and education for the handicapped. I said at that time that I believed this administration had allocated for each thousand dollars more moneys for these programs than for the previous 4 fiscal years.

Under a previous order, I ask unanimous consent to insert in the RECORD at this time a series of tables which, with but one exception, indicate that this administration is devoting a greater share of each thousand dollars spent than the previous administration did in the past 4 fiscal years.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR MANSFIELD IN CONGRESSIONAL RECORD [1]—STATEMENT: FOR THE COMING YEAR, OF EACH $1,000

	1966	1967	1968	1969	Estimated in 1971 budget 1970	1971
About $7 is requested for health and mental health research:						
Health Services and Mental Health Administration (organization total including administration):						
In millions of dollars	724	1,077	1,181	1,349	1,468	1,558
Per $1,000 of total outlays	5.38	6.81	6.60	7.31	7.42	7.76
Total health function (650):						
In millions of dollars	2,543	6,721	9,672	11,696	13,265	14,957
Per $1,000 of total outlays	18.89	42.47	54.08	63.37	67.03	74.50
About $7.50 for elementary and secondary education:						
Appropriation account—elementary and secondary education:						
In millions of dollars	815	1,266	1,417	1,830	1,796	1,822
Per $1,000 of total outlays	6.05	8.00	7.92	9.92	9.08	9.08
Subfunction 601 (elementary and secondary education):						
In millions of dollars	1,804	2,439	2,595	2,480	2,668	2,710
Per $1,000 of total outlays	13.40	15.41	14.51	13.44	13.48	13.50
About $5 for urban renewal for our cities:						
Urban renewal appropriation account:						
In millions of dollars	357	445	437	572	1,049	1,082
Per $1,000 of total outlays	2.65	2.81	2.44	3.10	5.30	5.39
About $4.50 for air and water pollution:						
Account: Air pollution control	(20.9)	(30.7)	(38.6)	(56.9)	(79.7)	(104.2)
Water Pollution Control Administration	(116.5)	(130.2)	(184.1)	(214.9)	(258.0)	(465.0)
Rural water and waste disposal grants	(.1)	(11.1)	(29.4)	(27.9)	(34.0)	(30.8)
Total of above, in millions of dollars	138	172	252	300	372	600
Per $1,000 of total outlays	1.02	1.09	1.41	1.63	1.88	2.99
Pollution (including above, and also pesticides, radiation, solid waste, noise, and thermal):						
Total outlays, in millions of dollars	(2)	(2)	(2)	763	885	1,380
Per $1,000 of total outlays	(2)	(2)	(2)	4.13	4.80	7.48
About $1.40 for vocational education:						
Subfunction 603 (excluding adult education):						
In millions of dollars	136	250	265	262	266	274
Per $1,000 of total outlays	1.01	1.58	1.48	1.42	1.34	1.36
About $0.50 for education for the handicapped:						
Account: Education for the handicapped. Plus: Printing house for blind; technical institute for deaf; secondary school for deaf; Gallaudet:						
Total, in millions of dollars	20	29	46	64	88	99
Per $1,000 of total outlays	.15	.18	.26	.35	.44	.49
About $2.40 to assist State and local governments in their fight against crime:						
Per concept used in Special Analysis M (Federal programs for the reduction of crime):						
In millions of dollars	(2)	(2)	(2)	104	288	518
Per $1,000 of total outlays	(2)	(2)	(2)	.56	1.46	2.58
Outlays for the law enforcement assistance program:						
In millions of dollars	1	6	8	29	178	368
Per $1,000 of total outlays	.01	.04	.04	.16	.90	1.83
Over $375 for military defense:						
Defense function:

Note: 1970 and 1971 had allowances for contingencies and pay raises.

The PRESIDING OFFICER. All time has now expired.

Mr. STENNIS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Mississippi will state it.

Mr. STENNIS. What is the parliamentary situation? What is the pending matter?

The PRESIDING OFFICER (Mr. CASE). The question is on adoption of amendment No. 811, as modified August 31, 1970, by the Senator from Maine.

Mr. STENNIS. In other words, a straight vote of "yea" for the amendment and "nay" against the amendment; is that correct?

The PRESIDING OFFICER. That is the customary procedure.

Mr. STENNIS. I thank the Chair.

The PRESIDING OFFICER. All time on the amendment has now been yielded back.

The question is on agreeing to the amendment of the Senator from Maine (Mr. MUSKIE), No. 811, as modified by him on August 31.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. RIBICOFF (when his name was called). On this vote I have a pair with the Senator from Nevada (Mr. CANNON). If he were present and voting, he would vote "nay." If I were at liberty to vote, I would vote "yea." I withhold my vote.

The rollcall was concluded.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Nevada (Mr. CANNON), the Senator from Hawaii (Mr. INOUYE), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Utah (Mr. MOSS), and the Senator from Maryland (Mr. TYDINGS) are necessarily absent.

Mr. GRIFFIN. I announce that the Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Oregon (Mr. PACKWOOD) is necessarily absent.

If present and voting, the Senator from South Dakota (Mr. MUNDT) would vote "nay."

The result was announced—yeas 29, nays 62, as follows:

[No. 280 Leg.]

YEAS—29

Aiken	Hatfield	Pell
Boggs	Javits	Prouty
Brooke	Kennedy	Proxmire
Case	Mansfield	Schweiker
Church	Mathias	Scott
Cooper	McGee	Smith, Maine
Cotton	McIntyre	Williams, N.J.

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Ribicoff, for.

NOT VOTING—8

Anderson	McCarthy	Packwood
Cannon	Moss	Tydings
Inouye	Mundt	

So Mr. MUSKIE's amendment (No. 811), as modified, was rejected.

Mr. STENNIS. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 868

The PRESIDING OFFICER (Mr. CASE). Under the previous order, the Senate now turns to amendment No. 868, proposed by the Senator from Arkansas (Mr. FULBRIGHT). Under the unanimous-consent agreement, the time has been equally divided, 20 minutes to a side.

The clerk will state the amendment.

The assistant legislative clerk read as follows:

On page 18, line 7, insert "(a)" immediately after "SEC. 501.".

On page 18, between lines 21 and 22, insert the following:

"(b) The provisions of subsection (a) of this section shall become effective only in the event that H.R. 15628 of the 91st Congress, a bill amending the Foreign Military Sales Act, or other legislation authorizing funds for the fiscal year beginning July 1, 1970, for carrying out the Foreign Military Sales Act, fails to be enacted into law within fifteen days after the sine die adjournment of the second session of the 91st Congress. The Congress declares that enactment of subsection (a) of this section as a part of the Act authorizing funds for military procurement rather than as a part of an Act relating to foreign military sales or foreign assistance shall in no respect be considered as a precedent to be followed by the Congress in the future."

The PRESIDING OFFICER. The Senate will be in order. The Senate is not in order.

The Senator may proceed.

Mr. FULBRIGHT. I yield myself 15 minutes.

Mr. MANSFIELD. Mr. President, will the Senator yield briefly to me?

Mr. FULBRIGHT. I yield.

Mr. MANSFIELD. Mr. President, I have an amendment that is drafted as a substitute for the Fulbright amendment. Rather than offer the amendment as a substitute, I can offer it as a separate amendment to the bill, with the proviso that the same 20-minute limitation will apply, or even less.

I ask unanimous consent that when the Fulbright amendment is disposed of my amendment be eligible at that time for a 20-minute time limitation on its own bottom.

The PRESIDING OFFICER. Is there objection to the request of the majority leader? The Chair hears no objection, and it is so ordered.

Mr. JACKSON. I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. STENNIS. Mr. President, may we have order so we can hear the Senator?

The PRESIDING OFFICER. The Senate will be in order.

Mr. FULBRIGHT. Mr. President, the purpose of the amendment is twofold. One, to protect the jurisdiction of the Committee on Foreign Relations. Contrary to allegations, it does not go in any way to the substantive issue of providing arms for Israel.

Two, to give the opportunity to the Senate to review and understand how unrestricted existing laws are relating to the availability of money for giving or selling arms, to foreign countries.

It is amazing how far Congress has gone over the years in removing any really effective controls on the disposition of arms around the world.

Section 501 of the current bill contains an open-ended and unrestricted authorization for the "transfer to Israel by sale, credit sale, or guaranty, such aircraft, and equipment appropriate to use, maintain, and protect such aircraft, as may be necessary to counteract any past, present, or future increased military assistance provided to other countries in the Middle East." The provision clearly deals with policy and substantive matters within the jurisdiction of the Foreign Relations Committee.

If this section were introduced as a bill, there is no question but that it would be referred to the Foreign Relations Committee for consideration, not to the Armed Services Committee.

The Standing Rules of the Senate confer jurisdiction on the Foreign Relations Committee for the following subjects, among others:

First, foreign loans. Section 501 clearly authorizes foreign loans; and

Second, relations of the United States with foreign nations generally. Section 501 involves most delicate relations between the United States and Israel, other nations in the Middle East, and with the Soviet Union.

If the Armed Services Committee is to justify any claim to jurisdiction over arms sales to Israel, or any other country, it must do so under its jurisdiction over matters involving "common defense generally." It can hardly be argued that "common defense" relates to a country with which the United States is not joined by a security treaty. All other subjects over which the Armed Services Committee is given jurisdiction by the Senate rules are irrelevant to this issue.

In the past there have been occasions when questions arose concerning a possible overlap in the jurisdictions or interests of the two committees. The Committee on Foreign Relations has always tried to lean over backwards to be accommodating in such cases. We have either asked the Armed Services Committee to sit with us, as in the hearings on the Nuclear Test Ban Treaty, or arrangements have been worked out for joint or serial referrals, as with the resolution concerning troop deployments in Europe. On matters where both committees have had an interest the Foreign Relations Committee has tried hard to establish an atmosphere where comity and courtesy prevailed instead of insisting on strict adherence to the letter of the jurisdictional rules.

But we are not dealing here with a case of overlapping or questionable jurisdiction. Both the Senate's rules and traditional practice give unquestioned jurisdiction to the Committee on Foreign Relations over foreign arms sales matters. Prior to 1968, when the Congress passed the Foreign Military Sales Act, arms sales to foreign countries were authorized by the Foreign Assistance Act, the successor to the old Mutual Security Act. Since the days of the Marshall Plan all military aid matters have been subject to yearly review by the Foreign Relations Committee.

The bill to authorize the annual credit sales ceilings, under the permanent Foreign Military Sales Act, was the subject of nearly 8 weeks of debate in the Senate earlier this summer. It should be remembered that the delay in passage of that bill was due to a filibuster by administration forces, not by any action on the part of committee members. I point out that that bill, H.R. 15628, contains not only an authorization of $600 million in credit for arms sales abroad but also a section pertaining directly to arms sales to Israel. That section, approved in the Senate by a vote of 59–1, expresses the sense of Congress that "the President should be supported in his position that arms will be made available and credit provided to Israel and other friendly states, to the extent that the President determines such assistance to be needed in order to meet threats to the security and independence of such states." The section also states that "if the authorization in the Foreign Military Sales Act . . . should prove to be insufficient to effectuate this stated policy, the President should promptly submit to the Congress requests for an appropriate supplementary authorization and appropriation." I might note that while the Military Sales bill was being debated in the Senate, and before the defense authorization bill was reported, I wrote to the Chairman of the Armed Services Committee to express my committee's concern over this invasion of its jurisdiction. In that letter, which I ask unanimous consent to have printed in the RECORD at this point, I urged members of the Armed Services Committee to introduce an amendment to the Military Sales bill if they thought that this language was not strong enough, or if the authorization were not sufficient. No such amendment was ever proposed.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON FOREIGN RELATIONS,
Washington, D.C., June 26, 1970.

The Honorable JOHN STENNIS,
Chairman, Committee on Armed Services, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: At a Foreign Relations Committee meeting on June 24 there was discussion of an amendment to the Defense Procurement Act which, according to press reports, was adopted by your Committee. The amendment to which I refer authorizes the President to transfer to Israel by sale or other credit means such aircraft and equipment as may be necessary to counteract increased military assistance provided by other countries in the Middle East.

Members of the Committee on Foreign Relations appreciate that our respective Committees occasionally have situations in which questions arise relating to Committee jurisdiction. And, as you know, there have been several occasions in the past when we have asked the Armed Services Committee to sit with us on borderline cases, or, when without precipitating discussion of jurisdictional questions we have arranged for joint or serial referrals. Indeed, I believe the Mansfield resolution with respect to troop deployments in Europe (S. Res. 292) has been referred to our Committees jointly.

Thus, it is with the utmost respect for the jurisdictional rules of the Senate that on behalf of the Committee on Foreign Relations I suggest the amendment to which I have referred concerns a subject within the jurisdiction of the Foreign Relations Committee on the grounds that the amendment relates to "foreign loans", "relations . . . with foreign nations generally", or "commercial intercourse with foreign nations."

I might add that the bill now before the Senate, H.R. 15628, to amend the Foreign Military Sales Act (a bill considered for a number of years by the Foreign Relations Committee) deals rather precisely with the subject of cash and credit sales of military equipment to foreign nations. In fact, Section 5 of that bill as favorably reported by the Committee on Foreign Relations expresses the sense of Congress that "the President should be supported in his position that arms will be made available and credits provided to Israel and other friendly states, to the extent that the President determines such assistance to be needed in order to meet threats to the security and independence of such states." That section continues, noting that "if the authorization in the Foreign Military Sales Act . . . should prove to be insufficient to effectuate this stated policy, the President should promptly submit to the Congress requests for an appropriate supplementary authorization and appropriation."

If the foregoing language is not forceful enough in the opinion of Members of the Committee on Armed Forces, I should think that an amendment to the pending bill would be a more appropriate vehicle for bringing the subject before the Senate than an amendment to the Defense Procurement Act.

I bring these views to your attention for such use and consideration as you may think proper.

With best wishes,

J. W. FULBRIGHT,
Chairman.

Mr. FULBRIGHT. Mr. President, contrary to the assertion by the Secretary of Defense, the foreign military sales bill now in conference contains ample funds for providing additional planes to Israel, if the President has decided that it is in the national interest to do so, as Secretary Laird's letter implies. There is no limit on how much of the $600 million authorization in the bill the President can use for Israel.

Secretary Laird said, in his letter to Senator STENNIS:

The requirements of Israel have increased significantly since 25 February 1970 when our Foreign Military Sales Congressional Presentation Document was submitted.

At no time since then—until yesterday—has the administration suggested that a supplemental authorization for Israel might be needed, despite the fact that the military sales bill did not pass the Senate until June 30. If the administration wants additional aid for Israel they should follow the traditional, straightforward procedure of asking for a supplemental authorization instead of using this back-door approach, which evades the scrutiny of the Foreign Relations Committee.

This move appears to be the foot in the door to a general attempt to transfer all military aid and sales matters to the Armed Services Committee—because the Foreign Relations Committee has been too critical of current arms aid policies. Of course, the bureaucracy would like to have free access to the Defense Department's budget for the arms giveaway and sales programs. This may be the opening wedge to that unless the Congress is permitted to work its will on the military sales bill.

One other point concerning the alleged need for additional authority to give Israel arms. There are a number of sources for providing arms even if the military sales bill is not enacted. Let me mention but a few and I will insert in the RECORD more detailed information:

First. Purchase through credit from the Export-Import Bank, following a Presidential determination;

Second. Use of military grant aid funds—$350 million authorized for fiscal year 1971;

Third. Use of the $300 million "drawdown" authority under section 506 of the Foreign Assistance Act;

Fourth. By declaring arms and equipment "excess," as was done last year with jets for Taiwan;

Fifth. Purchase through commercial channels with credit extended by private banks; and

Sixth. Purchase under sections 21 and 22 of the permanent Foreign Military Sales Act which, in effect, permit the Department of Defense to act as Israel's purchasing agent.

Israel will get the arms she wants, if the President wants to give them. There should be no doubt about that.

The military sales bill, however, is still very much alive, and I have no doubt that the conferees will meet again shortly after the end of the House recess. For the Senate to approve section 501 as written under these circumstances would be both premature and a direct violation of the jurisdiction of the Foreign Relations Committee.

My amendment would not strike section 501 from the bill nor would it diminish its authority. It would merely make the authority of section 501 conditional on the Congress' failure to pass a military sales bill before adjournment. And it would insure that the inclusion of a military sales item in this bill will not be considered as a precedent for the handling of future military sales legislation, so that the traditional jurisdiction of the Foreign Relations Committee over this subject will be preserved.

The 90-day cease-fire in the Middle East will not expire until November 5, after the Congress has adjourned.

Although, as Secretary Laird has said, arms deliveries to Israel may continue during the cease-fire period they will not be affected in any way by the withholding of this authority for only a matter of a few weeks. Any arms deliveries during this intervening period were financed long ago and have been in the pipeline for some time. We are dealing here with financing for items to be delivered well in the future, not immediate requirements. So as a practical matter there is no need for additional arms sales authority until well after the time when it will be known definitely whether the conferees on the military sales bill can reach agreement.

Mr. President, this amendment does not in any way affect the substance of section 501. To charge that it does so is but a "red herring" to divert attention from the real issue. It has nothing to do with whether the United States will or will not provide jets to Israel, or the number that may be provided. It relates only to a matter of jurisdiction. The Senate has already passed a bill which authorizes funds for selling aircraft to Israel. That bill is in conference.

All my amendment does is to stop the rug from being pulled out from under that conference. It is not merely the jurisdiction of the Foreign Relations Committee at issue here; it is the preservation of the comity and mutual respect between committees so essential to the proper functioning of the Senate. I hope that the amendment will be considered in that light.

Mr. President, I ask unanimous consent to have printed in the RECORD a compilation of the sources for supplying arms to Israel even if the military sales bill in conference does not pass the Congress.

There being no objection, the compilation was ordered to be printed in the RECORD, as follows:

STAFF MEMORANDUM—SENATE COMMITTEE ON FOREIGN RELATIONS

Subject: Possibilities of Supplying Jet Aircraft to Israel.

Without passage of the pending Foreign Military Sales Bill, Israel could receive jet aircraft from the United States under any of the following:

1. *Private Commercial Channels:* Assuming the State Department would provide the necessary export license, Israel could purchase any jet aircraft directly from the U.S. manufacturer. The terms and conditions of the sale would be subject to negotiation. Israel has purchased military equipment through these regular commercial channels.

2. *Foreign Military Sales Act of 1968:*

(a) Sections 21 and 22 provide the President with the authority to sell defense articles or services on a regular commercial basis. The purchaser has up to 120 days after delivery to make payment. Israel is eligible to purchase defense articles on these terms.

From 1965 to 1969, Israel used this method more than any other to purchase U.S. military equipment.

(b) Section 32 prohibits the Export-Import Bank from extending credit to a less-developed country for the purchase of military equipment. However, for purposes of distinguishing between developed and less-developed countries, EX-IM Bank officials follow the interest equalization tax provision of the Internal Revenue Code.

Aside from some 20 countries listed under this provision as economically developed (Israel is not listed as one of them), the President determines which countries are categorized as developed and which are less developed. *Israel is presently categorized as "less developed."* But it could be categorized as "developed" if the President so determined. Such a determination by the President would make Israel eligible for EX-IM Bank credits.

In talking with the Treasury Department about the categories of developed and less-developed countries under the interest Equalization Tax provision, it was apparent that the determination of these categories is not based on economic criteria alone. I was told, for example, that Iran and Libya are categorized as "developed" while, as stated above, Israel is categorized as "less developed." I asked Treasury how this could be in view of Israel's greater economic development, relative to both Iran and Libya, and I was told that there are "other factors" that entered into determining the two categories and that they are considered on an inter-agency basis.

3. *Foreign Assistance Act of 1961, as Amended:*

(a) Section 504 authorizes an appropriation for military grant aid of $350 million for FY 1971. The President could use any or all of this amount for supplying Israel with military equipment. The House has passed the Foreign Aid Appropriations Bill for FY 1971, including in it the full $350 million for military grant aid. The bill is pending in the Senate. Foreign aid expenditures are now being made under continuing resolution.

(b) Section 506 gives the President "Special Authority" to draw from Department of Defense stocks an additional $300 million for military assistance during the present fiscal year providing he determines such action "vital to the security of the United States." Any or all of this amount could be used to meet Israel's requirements. This provision is subject to subsequent reimbursement from future MAP appropriations.

In considering (a) and (b), it is well to recall that, under the Foreign Assistance Act, "The President is authorized to furnish military assistance on such terms and conditions as he may determine . . ." Assuming Israel preferred to purchase jet aircraft (as versus receiving them gratis), the President has the authority to provide up to $650 million in *credit* to Israel for the purchase of such aircraft. He could provide any or all of this amount on, say, a 40-year basis at 2 percent interest.

Moreover, the President could provide Israel with jet aircraft on a *loan* basis. In other words, the President could loan Israel a squadron of Phantom jets, and has the authority to determine the terms and conditions of the loan arrangement.

(c) Under section 503 the President can provide "excess defense articles" for purposes of military assistance. For all practical purposes there is no limitation on the amount of surplus equipment that can be given away or sold in any fiscal year. (You will recall that this authority was used during the last fiscal year to give Taiwan a number of F–100s and F–104s after the Senate refused to authorize an additional $54.5 million in military aid to that country. So far as I know, there are no F–4s in the excess stockpile, but a squadron of them could be declared excess, as witness the F–100s and F–104s.)

The FY 1971 Military Authorization Bill, reported July 14, authorizes the sale of jet aircraft to Israel. Section 501 of the bill provides as follows:

"The Congress views with grave concern the deepening involvement of the Soviet Union in the Middle East and the clear and present danger to world peace resulting from such involvement which cannot be ignored by the United States. In order to restore and maintain the military balance in the Middle East, by furnishing to Israel the means of providing for its own security, the President is authorized to transfer to Israel, by sale, credit, or guaranty, such aircraft, and equipment appropriate to use, maintain and protect such aircraft, as may be necessary to counteract any past, present, or future increased military assistance provided to other countries of the Middle East. Any such sale, credit sale, or guaranty shall be made on terms and conditions not less favorable than those extended to other countries which receive the same or similar types of aircraft and equipment."

It should perhaps be emphasized that until there is a change in the Administration's policy even the passage of the Military Sales Bill would not secure for Israel the Phantom jets she has requested. Likewise, as the abovementioned possibilities indicate, the President has considerable leeway under existing law to meet Israel's request—but, again, before any of these possibilities are open to him, there must be a change in policy.

I certainly think, for orderly procedure, that this amendment ought to be adopted. It cannot possibly prevent the sale of weapons to Israel.

Mr. GOLDWATER. Mr. President, will the Senator yield for a question?

Mr. FULBRIGHT. I yield.

Mr. GOLDWATER. Is the main thrust of the Senator's amendment to the point that he feels that his committee should have jurisdiction over sale of arms to foreign countries, rather than the Armed Services Committee?

Mr. FULBRIGHT. It is not that I feel that; it is the rules of the Senate which specifically spell it out, and that has always been true up until this session.

Mr. GOLDWATER. Does the Senator's amendment clarify that point?

Mr. FULBRIGHT. If the Foreign Military Sales Act does not pass—I think it will, of course, but if it does not—this section 501 will go into effect. It does not change it. But the orderly way is for completion of congressional action on the bill, passed by the Senate, which provides authority for $600 million in sales. In addition to that authority the President also has the right to sell through the Import-Export Bank, the right to give arms away through the grant aid program and there are other means available. Even those items that have a limit are very large. This amendment does not in any way prohibit Israel from getting her jets. All my amendment seeks to accomplish is to insure orderly procedure.

Mr. GOLDWATER. If the Senator's amendment is accepted, it would not affect sales to any country, not just Israel, but any country, for example sales to Libya that we have made?

Mr. FULBRIGHT. It would not affect it. This amendment is related specifically to Israel, but it would not affect the sales to Israel, which are the only ones the Jackson amendment was directed at. The other one comes under the bill, the one in conference, which, as the Senator knows, is hung up primarily over the Cooper-Church amendment. We had several conferences, but the House went out of session, as the Senator knows. We will meet again, no doubt, as soon as they come back.

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield.

Mr. SCOTT. In the letter of the Secretary of Defense to the chairman of the Armed Services Committee, he says:

Israeli requirements for military credit may be filled from the President's budget if the Jackson Amendment prevails. This will not be the case, however, if Mr. Fulbright's amendment to the Jackson Amendment is adopted, and I urge your opposition to such adoption.

He points out that:

There is, additionally, the question of timing of fund availability for Israel. The long deferral in Congressional approval of fiscal years 1970 and 1971 FMS legislation has already delayed important programs in about a dozen countries including Israel. Moreover, delay until fifteen days after the sine die adjournment of the Congress could mean that vital funds would not be available for the maintenance of the military balance in the Middle East, a policy to which the United States is committed.

Would the Senator comment on that?

Mr. FULBRIGHT. Well, I am not quite sure what he means by the President's budget.

But as to use of the existing authority, they are already supplying arms through the regular sales program as the Senator well knows. I have another letter which the Secretary marked "confidential." The one from which the Senator quoted is for immediate release. I got one today marked "confidential" which I can show the Senator, but cannot put into the RECORD under existing law.

I do not know whether he meant to use the word "sell" or "give," because there is authority from various sources which I have outlined making arms or aircraft available to Israel.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. FULBRIGHT. I yield myself 4 minutes.

The Senator knows that last year, when we turned down special funds for Taiwan, they turned around and made the planes available to Taiwan under the excess program, which they could do for Israel. I only cite that to illustrate that, in the case of a real emergency, the President can use that authority. He can also furnish them $300 million in arms, if it is an emergency, pending a supplemental appropriation, or whatever orderly way he might wish to follow.

What is involved here is whether there is to be an orderly procedure for the authorization and control of these various programs for selling and giving away arms. We suggested to the Armed Services Committee that they offer an appropriate amendment to the sales bill, and they did not choose to do it.

The provision involved here is an open-ended authorization, without any limit or restriction whatever. There is no limitation for the number of years the authority will be in effect. They just say, "Whatever you want to give them—$10 billion or $20 billion—go ahead if you want to."

Normally we do not do that for anyone, anywhere. We certainly do not do it for domestic programs.

Mr. SCOTT. Does not the Senator know that under the Foreign Military Sales Act, language, one-half of the amount which it is intended to give to the Israeli defense will not be possible? Not more than one-half can be made available under the present Military Sales Act alone.

Mr. FULBRIGHT. I do not think that is correct. I think it is a question of the discretion of the President, if the Sen-

ator is talking about grants or sales. If it is credit sales, he can use the Export-Import Bank, for example. All he has to do is declare that Israel is a developed country. He can supply them through the Export-Import Bank, if he wants to, a billion dollars worth, or more.

Mr. SCOTT. All the Jackson amendment says is that he can help Israel to the degree to which assistance is committed; and under the Senator's amendment, the Senator says he cannot. Is that correct?

Mr. FULBRIGHT. The law is available. I have the details; the Senator himself can interpret it. He does not have to take my word or that of the Defense Department.

Mr. STENNIS. Mr. President, I yield myself 1 minute in opposition to the amendment.

Referring now to title V, page 18 of the bill, which is section 501, I was opposed to this as an amendment to the bill, and voted against it in the committee. However, a majority of the committee voted for it, and I stand by the committee in support of that section now.

The Senator from Washington was the author of the amendment in committee, and I ask unanimous consent that I may now turn over all the time in opposition to the amendment of the Senator from Arkansas, now under consideration, to the Senator from Washington.

The PRESIDING OFFICER. Without objection, the Senator from Washington is recognized.

Mr. JACKSON. Mr. President, how much time? Twenty minutes to the side?

The PRESIDING OFFICER. The side in opposition to the amendment has 19 minutes remaining.

Mr. JACKSON. Mr. President, I yield myself 8 minutes.

Mr. President, the issue before us is a simple one: will the Senate now provide the President with the authority he needs to implement our long-standing policy in the Middle East, a policy based upon support for the security of Israel and the maintenance of a military balance in the Middle East?

That there exists a consensus among us as to the wisdom and importance of this policy is a certainty affirmed by five Presidents and more than three-fourths of the current membership of the Senate.

The distinguished Chairman of the Foreign Relations Committee has said that his amendment is nothing more than an effort to protect the jurisdiction of his committee. To the people of Israel, and to the citizens of the world whose security rests on the avoidance of war in the Middle East, the Senator's amendment is more than that. It would deny or delay the absolutely essential authority upon which we can provide, on favorable credit terms, the aircraft and other equipment necessary for the defense of Israel and for the stability of the Middle East.

Section 501 of the Defense Procurement Act contains a policy statement of great importance. It is a policy statement that echoes the sentiments of 81 Senators who have expressed themselves in letters to the President or the Secretary of State. Section 501 would enable the President to respond positively to their expressed view, and to give effect to their collective request. I ask, Mr. President, that the names of Senators who have called upon the President or the Secretary of State to provide adequate military aid to Israel be inserted in the RECORD.

There being no objection, the names were ordered to be printed in the RECORD, as follows:

James B. Allen (D-Ala.).
Gordon Allott (R-Colo.).
Howard H. Baker, Jr. (R-Tenn.).
Birch Bayh (D-Ind.).
Wallace F. Bennett (R-Utah).
J. Caleb Boggs (R-Del.).
Quentin N. Burdick (D-N. Dak.).
Harry F. Byrd, Jr. (D-Va.).
Robert C. Byrd (D-W. Va.).
Howard W. Cannon (D-Nev.).
Clifford P. Case (R-N.J.).
Marlow W. Cook (R-Ky.).
Norris Cotton (R-N.H.).
Alan Cranston (D-Calif.).
Thomas J. Dodd (D-Conn.).
Peter H. Dominick (R-Colo.).
Thomas F. Eagleton (D-Mo.).
Paul J. Fannin (R-Ariz.).
Hiram L. Fong (R-Hawaii).
Charles E. Goodell (R-N.Y.).
Albert Gore (D-Tenn.).
Mike Gravel (D-Alaska).
Clifford P. Hansen (R-Wyo.).
Fred R. Harris (D-Okla.).
Philip A. Hart (D-Mich.).
Vance Hartke (D-Ind.).
Spessard L. Holland (D-Fla.).
Roman L. Hruska (R-Nebr.).
Daniel K. Inouye (D-Hawaii).
Henry M. Jackson (D-Wash.).
Warren G. Magnuson (D-Wash.).
Barry Goldwater (R-Ariz.).
Ernest F. Hollings (D-S.C.).
Willam B. Saxbe (R-Ohio).

Mr. JACKSON. Mr. President, I also ask unanimous consent to have printed in the RECORD a letter from the Secretary of Defense to the chairman of the Armed Services Committee, dated August 31, 1970.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF DEFENSE,
Washington, D.C., August 31, 1970.

HON. JOHN C. STENNIS,
Chairman, Committee on Armed Services, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: I oppose the Fulbright Amendment to Section 501 of the Military Procurement Authorization Act currently in debate.

The Fulbright Amendment states that Section 501, the Jackson Amendment, will not become operative unless the Foreign Military Sales Act fails to become law. This implies that the provisions of the FMS Act adequately meet the credit needs of Israel. This implication is strengthened by Mr. Fulbright's comment that the FMS Bill "contains ample funds for that purpose".

This is not the case and I must urge disapproval of the proposal.

The requirements of Israel have increased significantly since 25 February 1970 when our Foreign Military Sales Congressional Presentation Document was submitted. In the light of this requirement, I believe that we must provide credit to Israel in a substantially larger amount than we have anticipated. When the Conference Committee approves the FMS legislation, we expect to be able to provide less than one-half of Israeli requirements from funds contained therein.

Israeli requirements for military credit may be filled from the President's budget if the Jackson Amendment prevails. This will not be the case, however, if Mr. Fulbright's amendment to the Jackson Amendment is adopted and I urge your opposition to such adoption.

There is, additionally, the question of timing of fund availability for Israel. The long deferral in Congressional approval of fiscal years 1970 and 1971 FMS legislation has already delayed important programs in about a dozen countries including Israel. Moreover, delay until fifteen days after the sine die adjournment of the Congress could mean that vital funds would not be available for the maintenance of the military balance in the Middle East, a policy to which the United States is committed.

With regard to arms deliveries to Israel during the 90-day cease-fire, we are taking such steps as are necessary to assure that the arms balance does not tip against Israel. FMS legislation or other credit arrangements for Israel should, therefore, not be delayed further, and we must assure that the total available credit is adequate to maintain a balance subject to rapid change.

We have hope, of course, along with Senator Fulbright, that the cease-fire will hold and will lead to lasting peace. Our aid policy is based upon and acts in support of this common objective.

Sincerely,

MELVIN R. LAIRD.

Mr. JACKSON. The precise effect of the pending amendment would be either to kill or delay the crucial authority contained in section 501.

Mr. FULBRIGHT. Mr. President, will the Senator yield at that point?

Mr. JACKSON. I yield.

Mr. FULBRIGHT. How does it kill it?

It says specifically it is not to be effective unless the Foreign Military Sales bill does not pass. That bill contains a great deal of authority.

Mr. JACKSON. But if the conference committee reaches an agreement that is approved by both bodies and sent to the President, then that supersedes section 501.

Mr. FULBRIGHT. That is right. But that is——

Mr. JACKSON. And I want to point out right here and now, the real issue is the amount of credit that will be available for Israel's needs; and under the Military Sales Act, taking together fiscal 1970 and fiscal 1971, there simply are no funds available to fulfill future commitments to Israel. All the money has been obligated by agreement covering the 13 nations. This is the crux of the issue.

Mr. FULBRIGHT. Assuming that that is true—I do not agree that it is true, because there are other sources—is not the orderly way, which the Senate follows in every case I know of, to ask for a supplemental? Does the Senator know of any precedent in which Congress or the Senate has ever authorized an unlimited appropriation, as this amendment does, for any country in the world?

Mr. JACKSON. I cannot cite a specific precedent.

Mr. FULBRIGHT. It never has.

Mr. JACKSON. The point is that this is an unprecedented situation, and the truth is that, under the military sales authorization, if it goes through, for fiscal 1970 and 1971, a total of $500 million——

Mr. FULBRIGHT. It is $600 million.

Mr. JACKSON. All right. The Senator knows the total amount. All he has to do is check. Only $500 million has been authorized for appropriation. No funds are available to take care of ongoing commitments. This refers to past commitments. The authority would cover agreements already entered into.

Mr. FULBRIGHT. The Senator knows that the President has discretion to shift that. If he wants to give it to Israel, he can.

Mr. JACKSON. They have already entered into agreements with the other 12 countries, and there is no authority available. This is the heart of the issue. The authority under the Military Sales Act is not sufficient to meet this immediate problem.

Mr. FULBRIGHT. Why did not the Senator follow the usual practice and ask for a supplemental? That is what is done in every other similar case of which I know. To go to a different committee and give an open-ended authorization, without any ceiling whatever, I think is unprecedented, for a domestic or a foreign program.

Mr. JACKSON. The Senator knows that this is not self-executing. Funds are or must be appropriated to carry out the terms of this provision.

Mr. FULBRIGHT. Then, the Senator is saying that the authority is of no significance. Did the administration request this amendment?

Mr. JACKSON. No; they did not.

Mr. FULBRIGHT. The Senator initiated it?

Mr. JACKSON. That is correct. I initiated it in the Armed Services Committee, in light of the crisis we face in the Middle East.

I just want to say to my good friend that I thought—that the Senate ought to take a little more initiative in matters pertaining to the security of the country, and this is exactly what we did. We did not stand by and wait.

I did consult informally with representatives of the executive branch, and they welcome this additional authority in light of the crisis in the Middle East.

With respect to the jurisdictional question, I want to say that these committees overlap. Both committees get into areas that pertain to problems of the other. I am trying to take care of an immediate problem, a critical situation, which demands action.

Mr. FULBRIGHT. This is not overlapping. What the Senator is proposing is that the Foreign Relations Committee give up jurisdiction over foreign military sales. That can be accomplished in an orderly way, but until it is, I think the Senator will have to agree that he knows of no precedent by which, under similar circumstances, the administration does not ask for a supplemental, which is the right way to do it. We have that in domestic or foreign matters. We do not go around a committee which has jurisdiction and put in this kind of open-ended authorization.

Did the Senator conduct hearings on this authorization? Were there any hearings on it?

Mr. JACKSON. No hearings were held on it. It was discussed twice at length in committee, with 17 senators present.

Mr. FULBRIGHT. There were no hearings; yet, it is an unlimited authorization. It could be $10 billion if they wish. This is a practice which, I submit, is entirely contrary to the traditions and practice of the Senate—or of either body, for that matter. It is a matter of no hearings but an authorization of an unlimited amount.

Mr. JACKSON. Let me say that the Appropriations Committee—I want to emphasize again—must appropriate the funds that are necessary. The letter from the Secretary of Defense amply answers all questions about the administration's position. They support it. I think this amendment is vital to our own security.

Mr. FULBRIGHT. Mr. President, will the Senator yield for one other comment, for a half minute?

Mr. JACKSON. I yield for a half minute, because I do want to yield time to other Senators.

Mr. FULBRIGHT. I want to refer to the letter I put in the RECORD on June 26. I wrote to the chairman of the Armed Services Committee, having heard about this, and suggested that if the language in the existing bill, the Foreign Military Sales Act, is not broad enough to cover the situation—I will read from the letter:

If the foregoing language is not forceful enough in the opinion of members of the committee on Armed Forces, I should think that an amendment to the pending bill would be a more appropriate vehicle for bringing the subject before the Senate than an amendment to the Defense Procurement Act.

If the foregoing language is not forceful enough in the opinion of Members of the Committee on Armed Forces, I should think that an amendment to the pending bill would be a more appropriate vehicle for bringing the subject before the Senate than an amendment to the Defense Procurement Act.

In other words, I suggested in June that they follow the usual procedure. There certainly is no disposition in the Foreign Relations Committee or anyone else I know of to deny Israel what is needed, but the objective is merely to retain the orderly procedure.

Mr. JACKSON. Mr. President, most Senators are realists. Had we proceeded to attach this amendment to the Military Sales Act, it would have failed utterly to aid Israel; because some of us were aware that this particular act, the Military Sales Act, was going to be tied up indefinitely. I was aware of this; and when I offered the amendment in the Committee on Armed Services, I did so for the purpose of trying to get action, so that the President of the United States would be in a position to grant the aid he needs. I think that events since then have clearly sustained my position.

Mr. President, if the pending amendment were adopted, and if the Foreign Military Sales Act, or similar legislation, were to be enacted into law, section 501 would die at once. The result would be to deny to the President the authority he needs to carry out our policy of providing Israel with the tools she needs to provide for her own defense. If, on the other hand, the Foreign Military Sales Act fails to be enacted into law, the effect of the pending amendment would be to delay to a date uncertain the authority contained in section 501. Either result is undesirable; neither has any redeeming value, save as a senseless obstruction to important legislation that is supported by the administration, the Congress, and the American people.

I am hopeful, Mr. President, that the House and Senate conferees will achieve a compromise in their deliberations, and that they will thereby prepare the way for the Foreign Military Sales Act to be enacted into law. I am convinced that the interest of the Senate in seeing its version of the Foreign Military Sales Act emerge from conference is adversely affected by the pending amendment. This is so because the pending amendment provides that if the conference does produce agreement, Israel will have available to it only the severely limited credits contained in the Foreign Military Sales Act, rather than the adequate credits available under section 501.

I believe, Mr. President, that the Foreign Military Sales Act is inadequate for the purpose of assisting Israel to maintain the military balance on which her survival—and our vital interests in the Middle East—is based. There are several reasons why this is the case and why, therefore, section 501 is vital:

First, the total authority to appropriate in the Foreign Military Sales Act is only $250 million for each of fiscal 1970 and 1971, a sum small in itself and one which must serve the credit needs of approximately 13 nations. The Israeli

share of these funds is but a fraction of the total and has been negotiated for the purpose of meeting Israeli obligations for equipment agreed to in earlier years. In fact, Mr. President, there are no funds available to Israel under the Foreign Military Sales Act to meet the sharply increased requirements arising out of recent Soviet aid to the Arab States.

Moreover, Israel has outstanding obligations to make repayments on prior arms transactions that today constitute a severe burden on an economy already laboring under a defense budget that consumes more than a quarter of her GNP, the equivalent of a $300 billion U.S. defense budget. In addition, Mr. President, total immediate Israeli needs are several times greater than the entire authorization for Israel in the Foreign Military Sales Act, and these needs are subject to rapid increases as the military balance in the Middle East is in a state of continuous adjustment.

Finally, I am bound to say that I anticipate additional Israeli requirements for credit aid. The repeated violations of the cease-fire—each time they occur—raise the costs to Israel of maintaining an adequate defense. This financial burden on Israel is matched, I believe, by an equal burden on the United States to provide, on favorable terms, the equipment necessary to offset the effects of clandestine military activity to which Israel is now unable to respond as a result of their adherence to the terms of the cease-fire. We can never offset the price in Israeli lives that may have to be paid to restore the deteriorating military balance. The provision of adequate credit aid is the very least we can do.

Second, section 501 would be necessary even if the authority contained in the Foreign Military Sales Act were substantially greater than it in fact is. This is so because the terms under which credits are made available through that act are wholly inappropriate to pressing Israeli needs. Repayment, for example, must be completed within 10 years. There can be no departure from this statutory provision. Moreover, it is standing practice under the Foreign Military Sales Act to charge rates of interest equal to the prevailing cost to the Treasury. Both of these conditions, in the present case, are prohibitive. Israeli foreign exchange reserves are such that it is impossible for them to meet their defense needs on a cash sale basis. Ten year and cost-to-the Treasury terms are only a marginal improvement, given the serious state of the Israeli economy.

It is for these reasons that I introduced section 501, with the intention that credits be made available to the extent necessary to effect the policy stated in section 501. Moreover, I anticipate that my intention to have credits made available on substantially more favorable terms has proven essential and will be so regarded by the executive branch. I have in mind a period for repayment on the order of 25 years or more, and rates of interest that would be negligible—and certainly concessionary.

It was also my intention that the executive branch should place a broad interpretation on the terms "equipment necessary to use, maintain, and protect [such] aircraft" so that equipment such as ordnance, ECM, maintenance and repair facilities, reconnaissance devices, defensive missiles and the like are included, as well as vital advanced aircraft. This is in recognition of the fact that the security of Israel is dependent upon the unchallenged superiority of the Israeli Air Force.

The Israelis have said that they will not be another Czechoslovakia and we alone are in a position to help them restore and maintain the military balance. I might add that the fate of Czechoslovakia in 1938 is as real to the Israelis as the fate of Czechoslovakia 30 years later, in 1968.

We cannot escape the fact that the Soviets have manifested an interest in the Middle East since Czarist times, and they would be involved there today even if Israel did not exist. Moscow is aggressively exploiting the tragic conflict between Arabs and Jews to strengthen the Soviet position in the Middle East and to destroy Western influence in the area. We must recognize the threats to our own security that result from Soviet designs in that region. The Mediterranean is of crucial strategic interest to all NATO nations, including the United States. The Middle East is a gateway not only to the Persian Gulf but to the Indian Ocean and North Africa. We have important political interests in the Middle East where we have good friends, including Israel and a number of nations in the Arab world. We, and especially our NATO allies, have vital interests in the area.

Mr. President, the chairman of the Foreign Relations Committee has expressed the view that, were it not for the fact of cultural and sentimental relationships between the United States and Israel, the question of who controls Israel would not involve a direct threat to the United States. For the reasons I have just suggested, I simply cannot agree with this view.

But I wish to add, Mr. President, my deep belief that the cultural and sentimental ties of which the Senator speaks are a tribute to the open identification of the American people with the ardent desire of the Israeli people for freedom, peace and security. Far from lamenting the fact that we as a nation are moved to a common bond with this liberal democracy in the Middle East, I am proud that our sentiments lie with the impulse to democracy and justice wherever in the world these values are to be found. So long as we retain our determination that free men desiring to remain free and independent will strike the sentiments of the American people, we and the free world will survive and flourish.

Mr. President, I, for one, could not find it in my conscience to ask the Israelis to allow another day to pass, while they continue to support our peace initiative at great risk to their survival, without assuring them that we will stand by our commitment to help them maintain the military balance in the Middle East. Section 501 offers such assurances by granting the President the authority he needs. Seldom in the history of our country have the dictates of national prudence and honor been so congruent. Seldom has an issue so clear and direct been within the power of the Senate to resolve.

Mr. President, I yield 2 minutes to the Senator from Texas.

Mr. TOWER. Mr. President, section 501 of the military procurement bill was agreed upon in the Armed Services Committee after considerable discussion. It was not intended nor should it be interpreted as an effort to usurp the jurisdiction of any other committee. Rather, it was approved as a measure necessary to provide the executive branch of our Government with sufficient flexibility to meet its Mideast commitments.

I do not intend to resurrect the debate on the Foreign Military Sales Act at this time. It is sufficient to say that that legislation simply does not contain adequate authorization of funds to meet the present and expected credit requirements for military equipment purchases of the Israeli government. According to Secretary Laird, in his August 31 letter to Senator STENNIS, we can expect to be able to provide less than one-half of Israel's requirements from funds contained in the Foreign Military Sales Act. Furthermore, the FMS bill must also provide assistance for some 12 other countries.

Section 501, however, would enable the United States to sell to Israel aircraft and equipment necessary to maintain and protect such aircraft, if it deems it necessary to do so. Retention of section 501, unamended, would give the executive authority to provide aid consistent with its commitment to Israel without having to wait and see whether the Foreign Military Sales Act ever emerges from conference.

Mr. President, the Mideast ceasefire is tenuous. I believe that a firm reaffirmation of the U.S. determination to rebuff Soviet adventures in the Mideast will do much to preserve the ceasefire and bring about peace there. Without altering the military balance in any way, a large vote against the Fulbright amendment to section 501 will provide evidence to the Soviets that the Senate will not let mere technicalities nor jurisdictional squabbles hinder its effort in the Mideast.

In the course of consideration of the military procurement bill, this body has consistently voted in a manner which indicates a determination not to allow this Nation to become a militarily inferior one. This determination, while meaningless without the hardware necessary to implement U.S. policy, will do much to convince the Soviets that it is clearly in their best interests to pursue peace in the Mideast and around the world. We should seize on this one additional opportunity to underline this determination.

We should not be deterred by the jurisdictional argument. As I stated previously, section 501 is not designed to seize jurisdiction from any committee. I would respectfully observe, however, that if the Foreign Relations Committee can call scientists to testify on the technical feasibility of the Safeguard ABM system, there seems little reason why the Armed Services Committee cannot assist in assuring the military security of Israel.

Mr. JACKSON. Mr. President, I yield

2 minutes to the distinguished Senator from Pennsylvania.

Mr. SCOTT. Mr. President, while the failure to pass the foreign military sales bill would damage our relations with several countries, the case of Israel is unique, more urgent, and should be treated in a special manner.

At a time when there is at least some chance for a settlement in the Middle East—based on the initiative of the United States—it is essential that the good faith which Israel has shown by agreeing to the ceasefire and a start of talks not be shaken. Her long-term security must not be endangered as a result of our initiative. Yet, despite the United States repeated efforts to engage the Soviet Union in serious arms limitations in the Middle East, Soviet arms have continued to flow to Egypt in recent months. Even if the foreign military sales bill were passed, it would not be adequate to meet this new situation.

More than dollars are involved in this debate. There are some in Israel who have already expressed doubts about our intention and misgivings about entering into peace negotiations. Failure to provide credit assistance can only reinforce the apprehensions of these skeptics. This could make much more difficult the already difficult task of trying to find a peaceful solution to the problems which have for too long troubled the Middle East.

Even if passed the foreign military sales bill would not be sufficient to deal with the situation created as a result of increased Soviet involvement in the UAR. But adoption of the Fulbright amendment could result in no action on credits for Israel in this session of Congress if the foreign military sales bill is not enacted. The administration would then not be able to make a request before January–February 1971.

This delay could lead to serious financial problems in Israel; it could impair confidence in our good faith. It would come at a most injudicious time—when the urgent need is to avoid actions that would jeopardize the chances of moving toward a peaceful settlement in the Middle East.

Mr. President, one would suspect that the purpose of the amendment is to ease the pressure on some of those in the conference here on the foreign military sales bill who might otherwise be disposed to agree to support it in the conference, if they were to be assured that something would be done with regard to our commitment to Israel. I think it wrong just to attempt to influence another conference by an amendment of this kind, which would force the United States to delay or possibly even to default on some of its commitments to Israel.

Mr. JACKSON. Mr. President, I yield 2 minutes to the Senator from Connecticut.

The PRESIDING OFFICER. The Senator from Connecticut is recognized for 2 minutes.

Mr. RIBICOFF. Mr. President, the pending amendment to section 501 is cast in terms of jurisdictional responsibility. However, its practical effect is to threaten the very purpose of section 501, which is to provide Israel with the means of providing for her own security.

I oppose it for several reasons:

First, the need for assistance to Israel cannot await the condition that section 501 become operative only when foreign military sales legislation has failed. This threatens to defer too long the necessary legislative authority to help Israel.

Apart from excessive delay, the Fulbright amendment does not assure funds sufficient to meet Israel's credit requirements. As it now stands in the conference committee, the foreign military sales legislation will authorize a military credit program in amount no higher than $300 million for each of fiscal years 1970 and 1971. These amounts must be shared by at least a dozen countries. More importantly, Israel's needs have mounted during the last few months far beyond those anticipated last February when the request for foreign military sales legislation was submitted. Those requests contained only nominal amounts for Israel. I must question the suggestion that foreign military sales legislation contains, what Senator FULBRIGHT calls "ample" funds for Israel.

Lastly, the normal credit terms for foreign military sales established by statute are not as flexible as Israel now requires, and section 501 provides.

In summary, approval of amendment 868 would establish that the Senate favors insufficient credit resources for Israel, deferred too far into the future, and on terms inconsistent with Israel's critical financial problems. I urge, therefore, that the pending amendment be rejected.

Mr. President, I cannot be too high in my praise of the distinguished Senator from Washington (Mr. JACKSON), who sought to remedy the situation in Israel as it relates to the United States and the entire Arab world, and I want to commend him for offering this section 501.

Mr. JACKSON. Mr. President, I yield 1 minute to the Senator from New York.

The PRESIDING OFFICER. The Senator from New York is recognized for 1 minute.

Mr. JAVITS. Mr. President, I am a member of the Committee on Foreign Relations and I honor my chairman for raising this issue, as it properly should be raised.

I wish I could go along with him on it but I am sure that everyone would agree that I have an inflexible and moral rule that I do not yield to any given exigency. This is such an exigency. Even if the amendment were not in the bill, or it had gone to committee and been voted on and no one would have voted on it, the exigency is this: It is essential, in my judgment, that the cease-fire is to hold up so that Israel may have at least the feeling that it is not being divested of any arms supplies; otherwise a cease-fire is more likely to collapse because of the time element in the Fulbright amendment and must inevitably result in a delay of indispensable arms supplies to Israel to sustain the peace negotiations.

I shall most regretfully have to vote against the amendment but I do so without in any way considering this a precedent. I am fully confident that the Senate will, when the occasion is suitable, protect the jurisdiction of every committee.

Mr. JACKSON. Mr. President, I yield 1 minute to the Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina is recognized for 1 minute.

Mr. THURMOND. Mr. President, the situation in the Middle East is one of grave concern to all Americans and especially the Congress of the United States.

In the military procurement bill for fiscal year 1971 the Senate Armed Services Committee, recognizing the serious nature of the Middle East situation, took action to meet that requirement.

This was done by authorizing the President to transfer to Israel, by sale, credit sale, or guaranty, such aircraft and equipment to maintain or protect such aircraft, as may be necessary.

Amendment No. 868, as proposed by the distinguished Senator from Arkansas, would strike this section from the bill unless the Foreign Military Sales Act fails to be enacted into law within 15 days after the sine die adjournment of the second session of the 91st Congress.

Mr. President, this amendment indicates that the provisions of the Foreign Military Sales Act are adequate to meet the needs of Israel. The Defense Department takes the position that such is not the case. This is based on the fact that the situation in the Middle East has changed considerably since the first of the year.

Administration requests, incorporated in the Sales Act, were drawn during the first of the year before Soviet intervention in the Middle East. Since passage of the act by the Senate an uneasy truce has developed between the two factions. During this truce Israel has charged that Egypt has strengthened its forces and further affected the balance of power against them.

In order to provide the needed flexibility in the Middle East the President needs the authority contained in the pending bill. It should be remembered that due to various delays funds for both the 1970 and 1971 foreign military sales programs are tied up in the Military Sales Act now in conference. At present the conferees are trying to resolve the differences between the House and Senate bills, the latter containing the Cooper-Church amendment attached by this body.

Thus, many countries which receive assistance under this act, including Israel, have not had the benefit of such help which would normally have been provided in the fiscal year 1970.

For these reasons, Mr. President, I urge the Senate to reject this amendment. By so doing, we would be better able to meet our commitments in the Middle East and thereby help insure peace in that troubled area.

Mr. FULBRIGHT. Mr. President, I want to make two or three points. One is that this could not possibly affect the immediate situation. This money we are talking about is for arms next year or the following year—it has no application to immediate shipments.

Let me make a few more points: There was no formal request for the amendment by the administration. Also there were no hearings on it. The chairman of the committee, the Senator from Mississippi (Mr. STENNIS) opposed it in committee, as he just stated a moment ago.

There is no limit on the authority in the section. Evidently those who oppose my amendment do not have the slightest confidence that the ceasefire will result in a settlement. It means, obviously, that they are getting ready for a major war. At least, that is the way it will be interpreted, I would think, because of the unlimited nature of the arms proposal. Since there were no hearings, I do not know how the Senate could be so impressed with a bill giving unlimited authorization without hearings, and with the chairman opposed to it, as he stated a moment ago, and the administration not recommending it.

Mr. JACKSON. Mr. President, I yield the remainder of my time to the Senator from Kentucky.

The PRESIDING OFFICER (Mr. BELLMON). The Senator from Kentucky (Mr. COOPER) is recognized.

Mr. COOPER. Mr. President, this is a difficult question to vote upon but I support the chairman of the committee. We have been waging this battle not solely on jurisdictional grounds. The question is whether the President should come to Congress and make his proposals to a committee—whether to the Committee on Foreign Relations or the Committee on Armed Services—regarding major supplies and weapons to other countries. That is the issue involved.

I support the proposal that the Senator from Arkansas makes, for the Congress to provide arms for Israel, and agree with his reasoning that it could be interpreted as if the ceasefire would not stand.

Mr. JACKSON. Mr. President, we have taken the initiative now, and the Department of Defense and the administration now agree with the provisions of section 501. I think it is the sort of authority that is needed in light of the present situation.

Thus, I urge that the amendment be rejected.

Mr. SCHWEIKER. Mr. President, I wish to express my opposition to the amendment of the distinguished Senator from Arkansas (Mr. FULBRIGHT).

As a member of the Armed Services Committee, I was one of those who strongly supported section 501 when it was offered as an amendment in our committee by the distinguished Senator from Washington (Mr. JACKSON).

While the matter of foreign military sales might not normally fall within the scope of our work on the Armed Services Committee, I regard section 501 as a critical provision that must be enacted as soon as possible.

The President has stated this country's desire to see the balance of power retained in the Middle East and to help Israel to retain it. However, due to the failure of Congress to pass a Foreign Military Sales Act for either the 1970 or 1971 fiscal year, the President finds that his hands are tied on the matter of selling Israel the additional aircraft it so desperately needs.

The President's hands will stay tied unless we can enact section 501, which gives the President explicit authority to sell to Israel all the aircraft it needs to restore and maintain the military balance. The amendment of the Senator from Arkansas would have the effect of sidetracking section 501 until we see what progress the House and Senate conferees make with the Foreign Military Sales Act, H.R. 15628. But that bill is simply not an acceptable alternative to this section 501.

First of all, this bill has been tied up in conference since the beginning of July, with no clear indication when it will emerge.

Second, this bill, even if it does emerge from conference, will only be an authorization for foreign military sales. If the conferees do not reach agreement until late in the session, it may be too late for the regular appropriation bill to apply and a supplemental appropriation will have to be sought next year by the administration.

Third, and most important, the Foreign Military Sales Act is not going to meet Israel's full requirements for military aid at present. In fact, in the opinion of the Secretary of Defense, Mr. Laird, less than half of what Israel requires could be provided from the Foreign Military Sales Act now in conference. As the Secretary of Defense stated in his letter to our committee chairman, the distinguished Senator from Mississippi (Mr. STENNIS):

> The requirements of Israel have increased significantly since 25 February 1970 when our Foreign Military Sales Congressional Presentation Document was submitted. In the light of this requirement, I believe that we must provide credit to Israel in a substantially larger amount than we have anticipated. When the Conference Committee approves the FMS legislation, we expect to be able to provide less than one-half of Israeli requirements from funds contained therein.

Mr. President, it is clear that if we were to sidetrack section 501, as the amendment of the Senator from Arkansas would do, the military aid so vitally needed from us by Israel would be too little, and too late. Israel has its back to the wall, a situation which, in the past, it has not been able to tolerate for long. It has accepted a standstill ceasefire in the Suez Canal Zone and has accepted, for the first time, some notion of eventual withdrawal from territories it occupies. In return, we have promised Israel that its security, present, and future, would not be compromised. Now it is time to give the administration the authority it needs—and wants—to make good on these pledges to Israel.

In his remarks made on the floor last Friday, the Senator from Arkansas drew the conclusion that as long as the ceasefire in the Suez Canal Zone was in effect, the President would not be deciding to ship additional arms to Israel. Hence the Senator reasoned, it would be all right for section 501 to be shelved at least until November 5, the expiration date for the cease-fire.

Mr. President, as I understand the ceasefire agreement, it applies only to hostilities along Israel's border areas with Egypt, Jordan, and Lebanon. It does not bar measures by either Israel or its Arab neighbors to strengthen their military positions in nonborder locations. In fact, the reports are that the Soviet Union has continued its heavy flow of armaments to Egypt unabated since the standstill ceasefire began.

Thus we are not bound by the ceasefire agreement to refrain from all arms shipments to Israel. And in fact, with the Soviet Union continuing to arm Egypt to the teeth, it seems to me that we have an affirmative duty to supply Israel with the weapons it needs to maintain the balance of power. Thus we need section 501 without any amendments to cripple or delay its operation.

Finally, in this vote, Mr. President, we are going to influence, one way or another, the coming course of events in the Middle East. The President, in his remarks of July 1, announced an American policy of greater firmness toward the Soviet-Egyptian alliance in the Middle East. It was on July 30 that 71 Members of this body wrote to the President extending their support to him in this regard. Now it is absolutely essential that this body declare its support for section 501 as it now stands, so that the President will once again have a solid display of senatorial support for his efforts. Too often in the past our country has failed to speak and act decisively regarding the Middle East crisis. The result of our restraint, instead of a lessening of tensions, has been encouragement of the Soviet-Egyptian alliance to move ahead with more daring steps, embroiling the Middle East in more tension and greater potential conflict. So if we are firm, and if we in the Senate stand firmly behind our President and give him the explicit authority to aid Israel with aircraft, I firmly believe we will be helping to promote the cause of a true, ultimate peace in the Middle East.

Mr. President, I will oppose the amendment of the Senator from Arkansas.

Mr. BAYH. Mr. President, I oppose the amendment offered by the distinguished chairman of the Foreign Relations Committee (Mr. FULBRIGHT). If adopted, the amendment would have the unfortunate effect of either delaying or diminishing military credit to Israel. Neither result is in our national interest. Neither result is consistent with America's oftstated policy of support for the security of Israel, a policy we have implemented by attempting to maintain a balance of power in the Middle East.

The chairman of the Foreign Relations Committee rests his case for this amendment on the grounds that it represents an effort to "protect" the jurisdiction of his committee. As a member of neither the Foreign Relations nor the Armed Services Committee, I find the jurisdictional question much less compelling on its face than the strategic implications of delaying and, possibly, even greatly diminishing the urgently needed credit that could be made available to Israel on the basis of section 501.

The pending amendment is of such profound strategic significance that its

adoption would gravely endanger the state of Israel. First, because of the increasing Soviet military presence in the Middle East and, second, because of continued Egyptian violations of the cease-fire. Ironically, this comes at a time when Israel, with American assurances for its security, has demonstrated its willingness to seek a negotiated political settlement through the Jarring mission. The Fulbright amendment, in effect, would undermine the original American assurances that during the cease-fire the military balance would not be permitted to tip in favor of the Arabs and, as a result, further damage whatever prospects the cease-fire might hold for continued negotiations.

Recent Senate expressions, moreover, reveal that there is overwhelming support in this body for our traditional foreign policy of maintaining a strong and secure Israel as the best deterrent to aggression in the Middle East. About 3 months ago, for example, I joined with 75 colleagues in a letter to the Secretary of State urging the administration to provide Israel with the aircraft needed for its self-defense. And just 1 month ago, 72 of us signed a letter to the President indicating our support for his strong statement of July 1 on the need to maintain a strong Israel.

In addition to these very recent expressions of Senate support for Israel, the Foreign Relations Committee itself has gone on record in favor of assisting Israel in order to preserve the military balance of power in the Middle East. The 1968 amendments to the Foreign Assistance Act, as I recall, included a specific policy statement on Israel. The 1968 act, as reported from the Foreign Relations Committee, expressed the sense of the Congress that the United States should sell to Israel as many supersonic planes as may be necessary to provide it "with an adequate deterrent force capable of preventing future Arab aggression by offsetting sophisticated weapons received by the Arab States and to replace losses suffered by Israel in the 1967 conflict."

In short, Mr. President, the foreign policy issue of whether the United States should assist Israel has long since been determined—and it was determined that we should provide the necessary assistance. The question at hand, therefore, is the extent to which the military credit authorized by section 501 will be needed to restore the military balance of power. That is a decision, it seems to me, that logically should rest initially with the Senate Armed Services Committee.

There is one final point, Mr. President, and that concerns Secretary Laird's letter to the distinguished chairman of the Armed Services Committee, Mr. STENNIS. In opposing the pending amendment, the Secretary pointed out that the Foreign Military Sales Act now in conference does not provide adequate funds for assisting Israel to the extent required. He explained:

> The requirements of Israel have increased significantly since February 25, 1970.

As a result, the Secretary of Defense concluded that "we must provide credit to Israel in a substantially larger amount than we have anticipated." As one Senator who has urged a policy of providing the needed assistance to Israel, I was pleased to learn that during the cease-fire the United States is, in the Secretary's words, "taking such steps as are necessary to assure that the arms balance does not tip against Israel."

The defeat of the pending amendment would strengthen the President's hand in assuring that the military balance does not, in fact, tip against Israel.

The PRESIDING OFFICER (Mr. BELLMON). All the time on the amendment has now expired.

The quesiton is on agreeing to amendment No. 868 of the Senator from Arkansas.

On this question the yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Nevada (Mr. CANNON), the Senator from Utah (Mr. MOSS), and the Senator from Maryland (Mr. TYDINGS), are necessarily absent.

Mr. GRIFFIN. I announce that the Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Oregon (Mr. PACKWOOD) is necessarily absent.

If present and voting, the Senator from South Dakota (Mr. MUNDT) would vote "nay."

The result was announced—yeas 7, nays 87, as follows:

[No. 281 Leg.]

YEAS—7

Church	Fulbright	Williams, Del.
Cooper	Hatfield	
Ellender	Mansfield

Gore	Montoya	Young, Ohio

NOT VOTING—6

Anderson	Moss	Packwood
Cannon	Mundt	Tydings

So Mr. FULBRIGHT'S amendment was rejected.

Mr. STENNIS. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. BYRD of West Virginia. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SCOTT. Mr. President, on another matter, I ask unanimous consent that, following the vote, I may have printed in the RECORD certain material which I have—and I have informed the majority leader on it—which is a reply to a statement made by him on an earlier occasion.

The PRESIDING OFFICER. Without objection, it is so ordered.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT

Congress has failed to enact a Foreign Military Sales Act for either FY 1970 or FY 1971. The USG has therefore been unable to provide Israel credits for military purchases since January 1970.

Nevertheless Israel is confronted by obligations of repayments due on past contracts. Given the "war of attrition" Israel's military requirements have sharply increased, resulting in a severe drain on her foreign exchange.

To provide her some financial relief, we had assured Israel early last spring that we would provide credit facilities of the order of magnitude of at least $100 million.

Moreover, the USG has assured Israel that its security would not be degraded by accepting the ceasefire. The good faith of the U.S. is at stake here.

The U.S. has taken a major peace initiative, and it should be supported.

Israelis are already edgy and some critics in Israel already express doubts regarding our intentions. Failure to provide credit assistance would only reinforce those who question our good faith, and could seriously complicate the difficult peace negotiations.

The FMS bill contains programs furnished in the fall of 1969. They do not reflect increased Soviet involvement and the substantial Soviet deliveries of highly sophisticated equipment since then which threatens to alter the military balance. Even if passed the FMS bill would not be adequate to meet this new situation.

Adoption of the Fulbright Amendment may mean no action on credits for Israel in this session of Congress if the Foreign Military Sales bill is not enacted. The Administration would then not be able to make a request before January–February 1971.

To oppose this provision is not to impugn the Senate's responsibilities in the field of foreign affairs. Indeed the Senate has already endorsed two amendments to the Defense Procurement Act proposed by Senator Fulbright, and the Foreign Military Sales bill remains in Conference due to several amendments that are in dispute.

Mr. MANSFIELD. Mr. President, I call up my amendment.

The PRESIDING OFFICER (Mr. BELLMON). The amendment will be stated.

The legislative clerk read as follows: The Senator from Montana (Mr. MANSFIELD) proposes an amendment at the end of the bill by adding a new section as follows:

> The Congress supports the President's policy of reducing the U.S. force level in Vietnam to not more than 280,000 by April 30, 1971, and will support a Presidential policy of the orderly termination of military operations in Indochina and the safe and systematic withdrawal of all remaining Armed Forces from Indochina by December 31, 1971.

Mr. GRIFFIN. Mr. President, will the majority leader yield for a parliamentary inquiry?

Mr. MANSFIELD. Yes, indeed.

Mr. BYRD of West Virginia. Mr. President, we cannot hear the Senator.

The PRESIDING OFFICER. The Senate will be in order.

Mr. STENNIS. Mr. President, we must insist on order. I have had no notice or hearings on this matter, such as the unanimous-consent request.

Mr. GRIFFIN. Mr. President, the parliamentary inquiry is, under the unanimous-consent request which allowed this amendment to be put before the Senate, who has charge of the time in opposition to the amendment?

The PRESIDING OFFICER. The Chair is informed that the manager of the bill is in charge of the time in opposition to the amendment, if he opposes the amendment.

Mr. GRIFFIN. Mr. President, will the Senator yield for a further parliamentary inquiry?

Mr. MANSFIELD. Surely.

The PRESIDING OFFICER. The Senator will state it.

Mr. GRIFFIN. Under the Fulbright amendment, which I understood this was originally to be a substitute for, and then it was presented separately, amendments would have been in order. I take it that an amendment offered to this amendment would also be in order.

The PRESIDING OFFICER. The Chair is informed that the leader assured him that it was his intention that amendments would not be in order.

Mr. MANSFIELD. Mr. President——

Mr. GRIFFIN. Mr. President, I ask unanimous consent that an amendment——

Mr. MANSFIELD. Mr. President, I am forced to object. I am sorry the Senator did not hear.

May I read what I said? Most of it was written down. I think I spoke fairly loudly and I think the Senate was fairly quiet and that the Presiding Officer took a moment or two before making a decision.

I read:

Mr. President, I have an amendment that is drafted as a substitute for the Fulbright amendment. Rather than offer the amendment as a substitute, I can offer it as a separate amendment to the bill, with the proviso that the same 20-minute limitation will apply, or even less.

I ask unanimous consent that when the Fulbright amendment is disposed of my amendment be eligible at that time for a 20-minute time limit on its own bottom——

Which I could have gotten if I had offered it as a substitute.

Mr. GRIFFIN. Mr. President, I ask unanimous consent that amendments to that amendment be in order, without debate.

The PRESIDING OFFICER. Is there objection?

Mr. MANSFIELD. I object, Mr. President.

The PRESIDING OFFICER. Objection is heard.

Mr. MANSFIELD. Mr. President, I think this is the first time I have ever been forced to object; but I must insist upon the same rights afforded to every Senator under the rules; I do not believe in working under the table or around the ends; I always make every effort to disclose fully to the Senate all my intentions and that includes all Senators who happen to be on the floor or who have expressed interest in a matter. I have never attempted to get by on any other basis. I do not intend to now. I acted in good faith in offering this amendment first as a substitute for the Fulbright amendment and then directly to the bill under the stated terms. I am speaking now in good faith.

What I am trying to do—and the Senator has not even heard the amendment read—is to support the President. That is what the amendment does. I would like to read the amendment, or at least have the clerk read the amendment, so Senators may hear.

May I have it read again, please?

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read the amendment, as follows:

The Congress supports the President's policy of reducing the U.S. force level in Vietnam to not more than 280,000 by April 30, 1971, and will support a Presidential policy of the orderly termination of military operations in Indochina and the safe and systematic withdrawal of all remaining Armed Forces from Indochina by December 31, 1971.

The PRESIDING OFFICER. Who yields time?

Mr. MANSFIELD. Mr. President, I yield myself 2 minutes, but before I do so, and in the interest of comity, I am willing to consider a reasonable extension of debate if further debate is desired.

Mr. STENNIS. Mr. President, if the Senator will yield, without taking any of his time, I feel compelled to say this as the Senator who is managing the bill. This bill has been on the floor for over 5 weeks. It was 5 weeks last Friday. A great number of amendments have been offered. We had unanimous consent to close this thing out following the amendment by the Senator from Arkansas. I have been right here all day. I do not deserve any credit for this, but as evidence that I have been here all day, I have not had lunch.

I was standing here at the time I heard the majority leader, the Senator from Montana, making remarks about the Fulbright amendment. The best I understood, it was something about a possible substitute to the amendment. I had not seen it. I had not been consulted about it. It had not been presented to me.

The PRESIDING OFFICER. On whose time is this statement?

Mr. STENNIS. Mr. President, I ask unanimous consent that I may make a statement without the time being charged.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STENNIS. So I was very surprised. I am opposed to the amendment. I think it is a rerun, without the bite in it and the limitation on funds, of the amendment that we debated here, offered by the Senator from South Dakota and other Senators.

I hope we can defeat the amendment. I think there should be more time than 10 minutes, if desired, on a matter of this importance.

Perhaps the Senator has a suggestion about how much time he desires.

Mr. MANSFIELD. I am open to suggestions.

Perhaps the Senator from Arizona has a suggestion.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. MANSFIELD. Yes; I yield.

Mr. GOLDWATER. Mr. President when I look at the time we have given to other amendments we have discussed today—1 hour, 2½ hours, 40 minutes—in my opinion this amendment, if approved would do far more damage to this bill than any amendment we have had so far, and yet the majority leader wants to give only 10 minutes to a side. I just do not think we can get our points across in that time. This is a very major amendment. I heard the majority leader make his remarks. I thought, as the assistant minority leader did, that he was talking about a substitute to the Fulbright amendment. Had I known what he was offering, I would have objected to it. As the Senator said, he spoke loudly and clearly, but I thought he was speaking about another subject.

I do not think 10 minutes is sufficient. As I have said, it is a very damaging measure to the President's efforts, and also to the Senate's.

Mr. STENNIS. Mr. President, if I may be permitted to make a suggestion, I would have objected to this request if I had heard the unanimous-consent request. But that is past. I think there ought to be an hour to a side, as a minimum, to debate this amendment, because if it is taken seriously, it will go around the world that, if it is adopted, the Senate has bound the President in on these dates. I do not believe the majority wants to do it.

I know many Senators have made plans and under the agreement we are supposed to vote finally on the bill within a few minutes.

We could take 40 minutes to a side and perhaps we could get full expressions in that time.

Mr. MANSFIELD. Will the Senator agree to 30 minutes to a side?

Mr. GRIFFIN. Mr. President, will the majority leader agree that amendments, on some reasonable basis, would be considered?

Mr. MANSFIELD. No; I made the request I did when I did with the specific purpose of having it considered on its own bottom, to repeat my own words. I first drafted the amendment as a substitute amendment for the Fulbright amendment. The unanimous-consent agreement on this military procurement bill did not provide for any additional amendments to be offered today other than those amendments specifically set out in the consent agreement. There was time, however, set aside for amendments to any of these amendments. Thus, in order to offer this amendment it was necessary to draft it as an amendment to one of these specified amendments. I supported the McGovern-Hatfield amendment. But in view of its failure to pass, I believe that this amendment is the next best Senate position.

Under the terms of the overall consent agreement on this military procurement bill, amendments to the Fulbright amendment were limited to 20 minutes of debate. A substitute amendment under the rules of this body need not be ger-

mane to the amendment to which it is offered. Thus, my amendment as a substitute for the Fulbright amendment was in order and limited to 20 minutes of debate. As thus offered, my amendment would not be open to further amendment under the rules of the Senate.

When I asked consent that my amendment be offered after the disposition of the Fulbright amendment rather than before as a substitute must necessarily be, I merely attempted to accommodate Senator FULBRIGHT. The consent request did not take advantage of any Senator.

Mr. GRIFFIN. Of course, it would be considered to any proposed amendment we voted on.

Mr. MANSFIELD. No; I made it on that basis of standing on its own.

I feel a little disturbed, however, about the assertions and implications which have been raised because, as far as I am concerned, I must say they are without foundation and I dislike the idea that something in the way of a gimmick is being attempted, because this is far too important to consider in that manner. When the Senate operates under its rules or under unanimous-consent agreements, they must apply in all situations whether favorable or unfavorable to one's substantive position.

May I ask the Senator if he has any suggestion about the time?

Mr. STENNIS. Mr. President, I propose 30 minutes to a side, with amendments.

Mr. MANSFIELD. No, no; not with amendments. I would rather withdraw this amendment than to give in on amendments. My original substitute amendment would not have provided for amendments and I do not believe that I should be prejudiced by virtue of the consent agreement to permit the Fulbright vote first.

The PRESIDING OFFICER. Is there objection?

Mr. GRIFFIN and other Senators objected.

Mr. MANSFIELD. Mr. President, now I yield myself 5 or 6 minutes.

Mr. GOLDWATER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. GOLDWATER. How much time does each side have?

The PRESIDING OFFICER. Twenty minutes; 10 minutes to a side.

Mr. MANSFIELD. Mr. President, the Senate earlier today refused to use its power over the pursestrings to force a termination of the Vietnam war. The McGovern-Hatfield amendment, of which I was a cosponsor, and which was supported by 40 Senators, would have ordered the termination of all our operations in Vietnam by December 31, 1971. If the McGovern-Hatfield amendment were adopted and were to become law, the full responsibility for the termination of the Vietnam war would have been assumed by the Congress. This is a burden that 40 Senators were fully willing to assume.

However, arguments were raised that the adoption of this amendment would undermine the President and telegraph our intentions to the enemy. I hope that I am clear in my understanding that the policy of this Government is to terminate American involvement in the war in Southeast Asia. I do not know what the McGovern-Hatfield amendment would have telegraphed inconsistent with such a policy.

I believe the McGovern-Hatfield amendment would have been heard not only in Hanoi, but in Saigon as well, and I think its reception in Saigon would have been more meaningful in the implementation of what I hope is this Government's policy to terminate the war; it is what I must believe this Government's policy to be.

Nevertheless, since the McGovern-Hatfield amendment did not pass, and since the Senate is not willing to use the extreme remedy of cutting off funds, and since I believe that Congress does have a role in ending this war, the amendment which I have offered will permit the Senate and Congress to go on record in supporting the President's reduction of forces to 280,000 by April 30, 1971. By adopting this amendment, the Senate will announce, and, if the House approves, Congress will announce that it will support total withdrawal and termination of the military operations in Indochina, and the safe and systematic withdrawal of U.S. forces from Indochina, by December 31, 1971.

With the adoption of this amendment, Congress would tell the President and the country that it is willing to share fully the responsibility for the total withdrawal from Southeast Asia by December 31, 1971. It would in no way pull the rug out from under the President. If he could not complete this withdrawal by 1971, then it would be up to the President, but at least until that time the President would have the full support of the Senate, provided it approves this amendment, and he would be assured that there would be no ragging at him, no criticizing, no bullying, no taking advantage of a Presidential policy of total withdrawal by the date certain.

Perhaps the difficulty with this amendment is its simplicity. I have tried to explain it simply, to prove that there is nothing underhanded about it, there is no gimmickry attached to it, it is offered in good faith, and it is a part of a joint effort on the part of the Senate, at least if it agrees to it, and the administration.

Why should we not share this responsibility? Why should we not support the President? Why should we not say what this amendment says?

Mr. DOLE. Mr. President, will the Senator yield?

Mr. MANSFIELD. Yes, indeed.

Mr. DOLE. Does the Senator have any objection to striking out the words "by December 31, 1971?"

Mr. MANSFIELD. Yes; because if you strike out the date, then it could be 1978, or 1980. Not that it would, but it could be. The amendment would then affirm a policy of withdrawal with no limitation of time to complete the withdrawal.

Mr. DOLE. Well, I say that in good faith, because I think the Senator said this is an effort to support the President.

Mr. MANSFIELD. That is right.

Mr. DOLE. And by striking out those words, I think we go on record in support of the President. I think that is the only amendment the Senator from Michigan had in mind.

Mr. MANSFIELD. Yes, I understood that; I saw the proposed amendment. But with the date stricken from my amendment, the war could go on ad infinitum, into eternity and with congressional sanction.

I think a date in here means something. I think it is in support of what I think the President has in mind and intends to do, and with a date certain we would strengthen his hand.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. STENNIS. Mr. President, how much time do I have?

The PRESIDING OFFICER. The Senator has 10 minutes.

Mr. STENNIS. Mr. President, I shall be quite brief. I yield myself 4 minutes.

As the so-called manager of the bill, I knew nothing about this amendment. If I had heard the request, and had recognized it as a request, I would have promptly objected on the ground that we had already debated that very question, in some different form, for 5 or 6 hours on the McGovern amendment.

Mr. President, with great deference—and I know the Senator from Montana is acting in total good faith—I think his response, here, to the suggestion that this date be struck out, shows exactly what the amendment means, that we support the President to that date and no more, and that is the very thing we have been debating over here for days and even weeks. That is the issue: Whether or not we are going to tie the hands of the man who is Chief Executive to a date.

It is a war we are in. It is not a game of some kind. This is a war. Men are dying. I just do not believe that the Senate ought to do this. It is a rerun of the same thing, without the limitation on the money. The world has already been advised of what a majority of the Senate thought about it. Now, a few minutes later—not days, but minutes—are we going to reverse ourselves here, and vote for language that, by the author's own interpretation, puts on a limitation of time?

I believe not.

I yield 2 minutes to the Senator from Texas.

Mr. TOWER. Mr. President, I believe that the same arguments that lay against the Hatfield-McGovern amendment are applicable and cogent in this situation.

There is no question but that there is a veiled threat—or a not so strongly veiled threat—contained in this amendment that all support for the President will be withdrawn if all U.S. forces are not withdrawn by the end of next year. The amendment says "withdrawal of all remaining Armed Forces from Indochina." It does not even allow for a small residual force of technical advisers, logistical personnel, air personnel, or maintenance forces; it allows nothing. All it says here is that it is Senate policy that there will be absolutely no support of the President beyond the end of next year if there is, indeed, one remaining

American serviceman in Indochina after that date.

Mr. GOLDWATER. Mr. President, will the Senator from Mississippi yield me 3 minutes?

Mr. STENNIS. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 6 minutes remaining.

Mr. STENNIS. I yield 2 minutes to the Senator from Arizona.

Mr. GOLDWATER. Mr. President, I want to look at this thing from the arithmetic standpoint. We are talking about lowering the U.S. force level to 281,000 by April 30, 1971. If we took out all Army personnel, every rifleman and the 6-to-1 backup behind those men on the front line, we would have a total of about 106,000 left; but when we add 22,500 Navy, 48,400 Air Force personnel in South Vietnam and 42,000 in Thailand, and the 36,500 Marines, we get up to a figure of 255,400, which does not give the President any leeway at all.

Mind you, we cannot leave those billions of dollars worth of supplies over there. We are already bringing back the ones we can. We have to protect them. We have to provide some guards for the camps, we have to provide guards for the hospitals, and for all the other installations, including communications and Air Force bases. So, Mr. President, I think this is tying the President's hands in a very dangerous way, because the President is the one who is going to make these force level determinations, not Congress. I say if we want to become the strategic people, the tactical people, the force level people, let us amend the Constitution, because under the Constitution the only power we have is the power of the purse to accomplish this.

I think this is a very dangerous amendment. I think it goes much farther than the amendments we have already defeated, and defeated very easily. So, Mr. President, I am hopeful that this amendment, which came in at the last minute, through the back door, under the mat, will be soundly defeated.

Mrs. SMITH of Maine. Mr. President, will the Senator from Mississippi yield me half a minute?

Mr. STENNIS. I yield 1 minute to the Senator from Maine.

Mrs. SMITH of Maine. Mr. President, I do not see, in all consistency and logic, how anyone who voted against the McGovern-Hatfield amendment could possibly vote for this amendment. It looks to me as though we would be going up the hill and down the hill on the same issue, and I shall feel obliged to vote against the amendment.

Mr. HANSEN. Mr. President, will the Senator yield?

Mr. STENNIS. For a question?

Mr. HANSEN. One minute for a question.

Mr. STENNIS. I yield to the Senator from Wyoming 1 minute for a question.

Mr. HANSEN. Mr. President, would it be fair to assume that if we were to pull out by December 31, 1971, and our prisoners of war were still there, that they would stay there, under the terms of this amendment?

Mr. STENNIS. Well, I think that would be the inference of putting in this time limitation. I certainly do not think it would increase the chances, but would diminish the chances to do something about them. Beyond then, the Lord only knows what would be the situation.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 3 minutes remaining.

Mr. ALLOTT. Mr. President, will the Senator yield for 1 question?

Mr. STENNIS. I yield.

Mr. ALLOTT. Under the amendment which is offered, is it not true that even the Marines in the embassies in Southeast Asia would have to be withdrawn?

Mr. STENNIS. Well, I think so; the inference is that we must get out, although it says here "military operations" and "the withdrawal of all remaining forces." Perhaps so.

Let me make this point, and I yield myself 1 minute to do so: We have a 60-day grace period for the chief executive in the other amendment, and there is no reference here, just to cut off. We have a reference to Vietnamization and that we are going to support that.

I think that this is dangerous language. It nullifies what we have done before and creates doubt as to what it means, which is the best that can be said for it. Its meaning is doubtful.

Mr. PERCY. Mr. President, will the Senator yield?

Mr. STENNIS. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 2 minutes.

Mr. STENNIS. I yield 1 minute to the Senator from Illinois.

Mr. PERCY. Mr. President, I have been in the Chamber since 5 minutes after 8 this morning and just happened to be off the floor when the distinguished majority leader made his unanimous-consent request. I would have objected to it had I been on the floor. I did not understand, even later, in the discussion in the cloakroom, the nature of the request.

I think the majority leader underestimates the impact that this resolution would have. If I were not against it on the basis of its merits, I would oppose it because I do not think that something as profound and as important as this should be debated with 10 minutes on each side.

Mr. STENNIS. Mr. President, how much time remains?

The PRESIDING OFFICER. A total of 6 minutes. The Senator from Mississippi has 1 minute.

Mr. MANSFIELD. Mr. President, to repeat what I said previously, let me state what was a part of the unanimous-consent request. This was not rushed through, believe me.

Mr. President, I have an amendment that is drafted as a substitute for the Fulbright amendment. Rather than offer the amendment as a substitute, I could offer it as a separate amendment to the bill, with the proviso that the same 20-minute limitation apply to my amendment.

As I said, the original amendment was drafted as a substitute to the Fulbright amendment under the terms of the original consent agreement. The time would have been limited to 20 minutes. There would have been no opportunity to have amended the amendment had I offered it as a substitute for the Fulbright amendment. I think I made that very clear when I made my statement.

All I asked was that the vote on my amendment come after the Fulbright amendment, not before it. All I ask now is the same treatment for this amendment that it would have received under the original consent agreement.

When we question the figure of 280,000, I think we ought to keep in mind, if my memory serves me correctly, that that is the figure used by the administration itself, and so is the date. In fact, with exact computations of the administration's statements, the troop level in Vietnam next April 30, will be 277,000.

To those Senators who think that this is a replay in a different form of the McGovern-Hatfield amendment, I would suggest that they vote against this amendment; but they are wrong because that is not only not the intent but not the case, and, as I have said before, I do not believe in making end runs. This is an effort to be of assistance to the President of the United States, to do it on a joint, cooperative basis, and to take some of the strain off him and to assume some of the responsibility for a decision to terminate the war down here. This is, in effect, nothing more than a sense of the Senate amendment, and it is intended to be helpful, believe me, to the President; to provide him with support in any decision to terminate the American involvement in Southeast Asia by December 31, 1971.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. JAVITS. I do not think the majority leader should or needs to stand alone in this matter; and I think that when the votes are taken, he will not stand alone.

Mr. President, The Senator has an absolute right to test the Senate on the issue of whether some Senators voted the other way earlier in the day precisely because it was a mandatory requirement. This is a "sense" resolution.

Also, the Senator is on the right track. We will ultimately have to agree with the President, or this country will be in a bigger shambles than it ever was before in its history. I shall stand with the majority leader, and I am proud to do it.

Mr. MANSFIELD. I thank the Senator.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. AIKEN. I ask the Senator this question: Is there anything in this amendment which would require the President to set the terminal date of December 31, 1971, or any other date, for the withdrawal of troops?

Mr. MANSFIELD. None whatsoever.

Mr. AIKEN. The amendment then says that if the President does set this date—and, I would assume, any other reasonable date—he would have the support of Congress.

Mr. MANSFIELD. That is correct.

Mr. GRIFFIN. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. GRIFFIN. The distinguished majority leader says that he wants to help the President, wants to support the President. His amendment could do exactly that, with the very simple amendment of striking "by December 31, 1971," which is a fixed date, and inserting in lieu thereof "at the earliest practical time."

Mr. MANSFIELD. The Senator has brought that amendment to my attention several times, and so have some of his colleagues. I would prefer to stick to a specific date; and if the President wanted an extension beyond that, I am certain he would have no difficulty achieving that.

Mr. GRIFFIN. Will the Senator yield for a parliamentary inquiry?

Mr. MANSFIELD. I yield.

Mr. GRIFFIN. Mr. President, I addressed an inquiry to the Chair earlier as to whether or not an amendment to the amendment would be in order under the unanimous-consent agreement earlier propounded and agreed to by the distinguished majority leader, affecting this amendment only. As I understood it, a substitute to the Fulbright amendment would have been in order. My parliamentary inquiry is this: Can a substitute be offered to this amendment?

The PRESIDING OFFICER (Mr. BELLMON). The Chair is informed that the majority leader had stated that it was his intention that amendments to the amendment not be in order.

Mr. GRIFFIN. And a substitute would not be in order.

The PRESIDING OFFICER. The Chair has not seen a copy of the agreement.

Mr. MANSFIELD. Mr. President, may I say that the one error I made, and it was unintentional, was not to state what the specific nature of the amendment now pending was at the time I proposed offering my amendment as a substitute. I must express my apologies to all concerned for not doing so.

Mr. SCOTT. Mr. President, will the Senator yield on that point?

Mr. MANSFIELD. I yield.

Mr. SCOTT. I was on my feet, to bring out the same explanation, that when the distinguished majority leader proposed his amendment and offered a unanimous-consent request, he stated that he could have offered it as a substitute to the Fulbright amendment. We had not seen it, nor had anyone else. Had I seen it, I would have moved to assure any Senator the right to offer an amendment.

The PRESIDING OFFICER. All time of the majority leader has expired.

Mr. GRIFFIN. Mr. President, has the Chair ruled on my parliamentary inquiry?

The PRESIDING OFFICER. The Chair has responded to the parliamentary inquiry. The Chair does not rule on a parliamentary inquiry.

Mr. RUSSELL. Mr. President, did the Chair rule that no amendment can be offered to the amendment?

The PRESIDING OFFICER. The Chair stated that it did not have a copy of the agreement.

Mr. GRIFFIN. Mr. President, I send to the desk an amendment to the pending amendment.

Mr. RUSSELL. I understood the Chair to say that the Senator from Montana had stated that amendments would not be in order, but I know of no rule of the Senate that would prevent an amendment from being offered to this amendment.

Mr. MANSFIELD. Mr. President, I believe I asked unanimous consent—unintentionally and not with that thought in mind—that such be the way the amendment would be considered; because, as I indicated, I could have offered it as a substitute to the Fulbright amendment and it would not have been subject to amendment under those circumstances.

Mr. FULBRIGHT. I was sitting here. I heard the Senator. He stated it exactly as he has repeated it here. It was clear. The Senator from Michigan was sitting there. I wondered then why he did not object, but he did not.

The PRESIDING OFFICER. The Chair is advised that no copy of any such agreement was ever presented to the Chair so that it could be examined.

Mr. MANSFIELD. The agreement was made orally.

Mr. FULBRIGHT. I heard it.

Mr. MANSFIELD. The request was made orally, as requests usually are.

Mr. HOLLAND. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HOLLAND. Is it not in order to ask the Official Reporter to report the words of the agreement as agreed to? If so, I make such request.

The PRESIDING OFFICER. Without objection, a copy will be sent to the desk, so that it can be examined.

Mr. SCOTT. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER (Mr. BELLMON). The Senator from Pennsylvania will state it.

Mr. HOLLAND. Mr. President, I ask for an answer to my parliamentary inquiry.

The PRESIDING OFFICER. Will the Senator please state it once again?

Mr. HOLLAND. I understand that I have the parliamentary right to ask the Official Reporter to read to the Senate the exact wording of the request which has been made and agreed to. I make that request.

The PRESIDING OFFICER. The Chair would inform the Senator from Florida that the Official Reporter is in the process of bringing the language in writing back to the Senate.

Mr. HOLLAND. I thank the Presiding Officer.

Mr. SCOTT. Mr. President, renewing my parliamentary inquiry, I ask unanimous consent that debate may proceed for an additional 5 minutes, with the time to be equally divided between the majority and the minority leaders.

The PRESIDING OFFICER. Is there objection?

Mr. TOWER. Mr. President, I object.

Mr. MANSFIELD. Mr. President, I would yield my time to the manager of the bill.

The PRESIDING OFFICER. Objection is heard.

The Chair would inquire was there objection to the request of the Senator from Pennsylvania?

Mr. RUSSELL. Mr. President, will the Senator state the request again, please?

Mr. SCOTT. I will restate it. I ask unanimous consent that debate may be continued for 5 additional minutes, with the time to be equally divided between the majority and the minority leaders.

Mr. TOWER and Mr. RUSSELL objected.

The PRESIDING OFFICER. Objection is heard.

Mr. STENNIS. Mr. President, what time do I have remaining?

The PRESIDING OFFICER. The language in writing from the Official Reporter has just been received. The clerk will please read it to the Senate.

Mr. PASTORE. Mr. President, may we have order in the Senate so that we can hear it?

The PRESIDING OFFICER. The Senate will please be in order. Will Senators please take their seats.

The clerk will proceed.

The assistant legislative clerk read as follows:

Mr. MANSFIELD. Mr. President, I have an amendment that is drafted as a substitute for the Fulbright amendment. Rather than offer the amendment as a substitute, I can offer it as a separate amendment to the bill, with the proviso that the same 20-minute limitation will apply, or even less.

I ask unanimous consent that when the Fulbright amendment is disposed of my amendment be eligible at that time for a 20-minute time limitation on its own——

Mr. MANSFIELD. Bottom only.

The ASSISTANT LEGISLATIVE CLERK. Bottom.

The PRESIDING OFFICER. Is there objection to the request of the majority leader? The Clerk hears no objection, and it is so ordered.

The PRESIDING OFFICER. The Chair requests a brief time to examine the language.

Mr. MANSFIELD. Mr. President, before the Chair rules, would the clerk read that last sentence again—the last two or three words?

The assistant legislative clerk read as follows:

The PRESIDING OFFICER. Is there objection to the request of the majority leader? The Chair hears no objection, and it is so ordered.

Mr. MANSFIELD. I mean my last two or three words.

The assistant legislative clerk read as follows:

be eligible at that time for a 20-minute time limitation on its own bottom.

Mr. MANSFIELD. On its own bottom? I thought I said "on its bottom only." But that is the same thing.

Mr. STENNIS. Mr. President, what time do I have remaining?

The PRESIDING OFFICER. The Senator will please suspend for a moment.

Mr. RUSSELL. Mr. President, may we

have order in the Senate. I find it very difficult to hear.

The PRESIDING OFFICER. The Senate will please be in order.

The Chair would inform the Senate that under the precedents of the Senate—in order that every Member of the Senate may hear the finding, will each Senator please take his seat so that we may have order in the Senate?

The agreement does not specify that other amendments will or will not be in order.

Mr. MANSFIELD. Mr. President——

The PRESIDING OFFICER. It merely states 20 minutes on that particular amendment, to be equally divided. Under the precedents of the Senate, it is stated that likewise an amendment to preclude further debate upon a measure after a certain hour and proceed to vote at the regular parliamentary stage to its final disposition, amendments may be offered thereafter, voted upon, but not debated. Such an agreement providing that a certain hour the Senate shall proceed to vote without further debate upon a joint resolution or any amendment or motion thereto, an amendment offered after that hour must be voted upon without debate.

Mr. MANSFIELD. Mr. President, I withdraw my amendment in view of this ruling that amendments to my amendment would now be in order.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. STENNIS. Mr. President, I want to yield back my 1 minute.

Mr. SCOTT. Mr. President, a parliamentary inquiry. Does the vote now recur—on what amendment?

The PRESIDING OFFICER. Will the minority leader please state his inquiry again?

Mr. SCOTT. In view of the withdrawal of the amendment, what is the parliamentary situation?

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute, as amended.

Mr. STENNIS. Mr. President——

The PRESIDING OFFICER. The Senator from Mississippi is recognized.

Mr. HOLLAND. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Florida will state it.

Mr. HOLLAND. Is my understanding correct that we have yielded ½ hour of debate——

The PRESIDING OFFICER. We have not succeeded in getting the committee amendment in the nature of a substitute agreed to yet. That is the question.

Mr. STENNIS. Mr. President, under the bill now, as filed by the committee, and as amended on the floor, is the parliamentary situation to this effect; namely, that if we get the committee amendement in the nature of a substitute agreed to, that is equivalent to third reading of the bill?

The PRESIDING OFFICER. No further amendments would be in order at that stage.

Mr. STENNIS. Mr. President, I move the adoption of——

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee substitute amendment, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the bill.

The amendment was engrossed and the bill to be read a third time.

The bill was read the third time.

Mr. STENNIS. Mr. President, I ask for the yeas and nays on final passage.

The yeas and nays were ordered.

Mr. STENNIS. Mr. President, may we have order. I yield to the Senator from Missouri (Mr. EAGLETON) 8 minutes.

The PRESIDING OFFICER. Debate is in order for 30 minutes. Who yields time?

Mr. STENNIS. Mr. President, I yield 8 minutes to the Senator from Missouri (Mr. EAGLETON).

The PRESIDING OFFICER. The Senator from Missouri is recognized for 8 minutes.

Mr. STENNIS. Mr. President, may I just say that, having yielded 8 minutes to the Senator from Missouri, I shall then yield 3 minutes to the Senator from South Carolina (Mr. THURMOND) and 1 minute to the Senator from Michigan (Mr. HART), and then I want to take only 1 minute.

The PRESIDING OFFICER (Mr. SAXBE). The Senator from Missouri may proceed.

Mr. EAGLETON. Mr. President, although I opposed any extension of the ABM at this time, I support the Senate Armed Services Committee action which strikes the House-approved administration request to proceed with advance preparation of four area defense sites. An overwhelming majority of the U.S. Senate agrees with the Armed Services Committee report which "affirms its conviction that there is no compelling need to move now to the deployment of an area defense of our population against Chinese Communist ICBM attack."

I fervently hope that the Senate Armed Service Committee upholds the Senate position in conference. That position, in the words of the committee report, states:

> Present circumstances do not justify a diversion of our resources from the primary task of defending the deterrent to the less urgent objective of providing a defense against the evolving Chinese Communist threat. Whether the development of a thin area defense is a wise response to a future Chinese nuclear capability remains to be demonstrated.

The deletion of authorization for this so-called thin shield system is far more important than the $10 million in funding involved. I am sure it is clear to everyone in the Senate that there is an enormous difference between authorizing the four sites for deterrent protection and a fifth site for thin shield or area defense. The authorization of the fifth site would put the Congress of the United States on record as favoring an area defense for the ABM, and an overwhelming majority of the Senate, in my judgment, is opposed to that.

For this reason I am particularly distressed to see a report in Sunday's Washington Post, written by Chalmers L. Roberts, to the effect that a possible compromise between the House position which authorizes eight sites and the Senate position limiting ABM to four sites might be a new authorization to start work on an ABM defense for Washington—ostensibly in anticipation of an arms-control agreement with the Soviet Union limiting ABM's to command and control centers.

Preparation for an ABM around Washington is clearly wasteful at this time. If SALT fails, the four ABM sites will continue. If it is a success, the more than $1 billion we have appropriated this year will, in all probability, not be needed. To continue work on the four Minuteman missile sites to provide defense should SALT fail, at a cost of over $1 billion this year, while at the same time beginning an ABM site around Washington, at an unspecified cost, in the anticipation that SALT will succeed, is clearly unjustifiable.

Quite honestly, I feel that this matter is extremely important and have discussed with Senator STENNS and Senator JACKSON the possibility of a motion to instruct the conferees to insist upon and uphold the Senate position with respect to the number of new sites authorized for deployment and advance preparation in connection with the ABM.

I did so thinking that such a motion would provide them with an important bargaining chip in these most difficult negotiations with the House Armed Services Committee.

Senator STENNIS said that he appreciated the offer, and both he and Senator JACKSON said they would do their utmost to uphold the Senate position.

After rereading the Senate colloquy on this subject, I feel that the distinguished chairman of the Senate Armed Services Committee has made his position clear as well as his determination to hold that position.

In an exchange with Senator BROOKE, who stated his fear that—

> If we go into conference with the House with the Committee bill, there is a possibility, and perhaps even a probability, that we could end up with area defense.

Senator STENNIS reaffirmed that he did not "think there is any probability. My idea is that everything considered, the high probabilities are that that position—the Senate position—would prevail."

As Senator STENNIS pointed out:

> If we are going to go into an area defense, that would be debated in the Senate fully.

I fully concur. And more than the four sites now authorized would be "going into an area defense."

Further, in calling for the rejection of the Brooke amendment, Senator STENNIS stated:

> If the Senator's amendment is rejected . . . everyone connected with this matter will be willing to settle on this for this year in the Senate bill. That is the practical side of it. That is what I am going to fight for. I will tell everyone that.

In fact Senator GOLDWATER, on the floor of the Senate on August 19, acknowledged that even Secretary Laird had accepted the Senate position. Senator GOLDWATER stated:

When the committee came out with the language we arrived at, it ignored that part of it, (area defense) and the Secretary agreed with that, and I feel that is the Secretary's position.

In view of this record, and the possibility that such a move might be wrongly interpreted as impugning the integrity of the Senate Armed Services Committee on this terribly important matter, I will not offer a motion to instruct the conferees at this time.

Mr. President, at this time I ask unanimous consent that the section of the Senate Armed Services Committee report dealing with the ABM be entered into the RECORD.

I further ask unanimous consent that the article by Chalmers Roberts of the Washington Post be entered at this time.

And finally, I ask unanimous consent that excerpts from the Senate colloquy on this subject be entered in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SENATE ARMED SERVICES COMMITTEE REPORT NO. 91-1016, PAGE 19

The Committee has decided to confine the authorization for the continuation of the Safeguard program to those sites devoted to the defense of the deterrent. Thus the Committee has approved continuation of the Phase I sites at Malmstrom and Grand Forks, as well as full deployment at Whiteman and advanced preparation at Warren Air Force base.

In taking this action, the Committee wishes to establish the primacy of active defense to increase the survivability of the land-based deterrent. By striking from the authorization the House approved administration request to proceed now to advanced preparation of four area defense sites, the Committee affirms its conviction that there is no compelling need to move now to the deployment of an area defense of our population against Chinese Communist ICBM attack.

While the impact of the Committee's action on the Safeguard authorization is only $10 million, the long term effect, should this decision be perpetuated in subsequent years, is substantial.

Present circumstances do not justify a diversion of our resources from the primary task of defending the deterrent to the less urgent objective of providing a defense against the evolving Chinese Communist threat. Whether the development of a thin area defense is a wise response to a future Chinese nuclear capability remains to be demonstrated.

It is the Committee's considered judgment that the proposed deployment, sufficient for our national security requirements and conducive to strategic arms control, deserves the full support of the Senate.

From the Washington Post, Aug. 30, 1970

CONGRESS EYES D.C. SAFEGUARD

(By Chalmers M. Roberts)

A start on an anti-missile (ABM) defense for Washington in anticipation of an arms control agreement with the Soviet Union may be approved by Congress this year as a compromise between House and Senate.

This possibility was discussed by Pentagon sources after other administration officials said they do not now consider it essential that Congress approve a full anti-Chinese "thin" ABM system to protect much of the United States.

The House has voted approval of land acquisition for five widely scattered sites, including the national capital area, as a first step in that part of the Safeguard system as requested by President Nixon.

"THIN" DEFENSE STRIPPED

But the Senate Armed Services Committee stripped the entire "thin" defense system from the bill. No move has been made during the current debate in the Senate to reinstate it and none is expected before the $19.3 billion military authorization bill is finally approved and sent to a House-Senate conference to resolve differences.

Sen. Henry M. Jackson (D-Wash.), one of the leading backers of Safeguards but an opponent of the "thin" system aspect, said yesterday he will stand by the Senate version but expects resistance from House conferees to anything but the full "thin" system.

He also said it was "getting the cart before the horse" to compromise on a Washington site because it might fit an eventual strategic arms limitation (SALT) agreement. The prospect now is if there is an agreement it will call for either no ABM defenses in either the U.S. or the U.S.S.R., or for ABM limited to defense of the command and control centers in the two national capitals.

"BARGAINING CHIP"

It is this aspect, however, which gives the compromise idea appeal. The administration had to fight hard to prevent major cuts in Safeguard and did so successfully chiefly by using the argument that the ABM system was a vital "bargaining chip" at the SALT talks.

The argument for Senate approval of ABM defense of Washington would be that it would fit a likely outcome at SALT. If "zero ABM" were called for by a treaty, of course, nothing would be done here and the Moscow ABM system would have to be dismantled.

The administration- and House-approved version of the bill call for initial land purchases and site preparation, authorized at $10 million as a first step, in New England, Michigan-Ohio, the Upper Northwest and the Washington area. The Senate committee turned the fifth initial site, in Wyoming, into a deployment site and authorized advanced preparation work there.

DEFEND MISSILE SITES

The committee rationale was that defense of Minuteman missile sites should come first and that whether the "thin" system to protect the public was "a wise response to a future Chinese nuclear capability remains to be demonstrated."

Last Jan. 30, President Nixon declared that the anti-Chinese "thin" area defense aspect of Safeguard was "absolutely essential," in part to give the United States "a credible foreign policy in the Pacific area." He has never commented publicly on the Senate action striking down that part of Safeguard.

Jackson pointed out what other officials confirm: an effective ABM system to protect the command and control structure in the Washington area would have to be much "thicker," that is have far more defensive missiles, than if it were part of a "thin" anti-Chinese system. The cost would be much higher.

KEY CENTERS INCLUDED

That command and control structure includes the White House, Pentagon and other key installations as well as the alternate headquarters in the nearby Maryland mountains. There also are specially-fitted aircraft for command purposes in an emergency available to the President and other top officials.

One argument for permitting national capital defenses at Washington and Moscow is that this would prevent a small scale Chinese attack from knocking out the government leadership in either capital, thus affording a deterrent to a Chinese attack.

The Soviets at the SALT talks have indicated the possibility of going to "zero ABM" but the limited Moscow-Washington ABM systems are rated a more likely outcome in any treaty.

STATEMENT OF SENATOR STENNIS, AUGUST 19, 1970

That is our policy, in one sentence. We are not an aggressor nation. We have no plans to fire the first shot. We depend, instead, on capable retaliation and confident deterrence to prevent a nuclear war. We want them to realize that we do have this deterrent and the capability of protecting it. I think that is the only real defense we have. Let them know that we are ready and that we have everything that is necessary to protect us.

I have said many times in this Chamber that if we give them doubt on that subject, we invite trouble; and it may be that after they have fired the shots, it will be too late on both sides. I think that millions and millions of lives would be lost on both sides should we ever turn these weapons loose against each other. That underscores the necessity for letting them know all the time that there is no weakness about our position or our capacity.

ARMED SERVICES COMMITTEE POSITION

It was for this reason that the Committee on Armed Services supported that portion of President Nixon's request which provided for the continuation of the Safeguard program to those sites devoted to the defense of the deterrent. In doing so we wished to establish the primacy of active defense to increase the survivability of the land-based deterrent as opposed to increasing our offensive forces to achieve this end. In this regard we shared the President's judgment that defense of the U.S. deterrent in no way jeopardizes the security of the Soviet deterrent and, in fact, provides additional incentives for the Soviet Union to enter a substantial arms limitation agreement.

By the same token, the committee affirmed its conviction that there is no compelling need to move now to the deployment of an area defense of our population against a Chinese Communist ICBM attack by striking from the authorization the House-approved administration request to proceed now to advanced preparation of four area defense sites. That is a horse of another color. That is a defense system for another purpose. In our judgment, the prime threat—the threat that today poses the greatest danger to our security—is the Soviet threat to our strategic deterrent. That is where the soft spot is—the threat to our capacity to retaliate with our ICBM's, our influential deterrent. Therefore, our resources should not be diverted from the primary task of defending our deterrent from this threat. That is my answer. That is the committee's answer to all that has been written and said about our recommendation on that point.

COLLOQUY BETWEEN SENATOR BROOKE AND SENATOR STENNIS, AUGUST 19, 1970

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BROOKE. Mr. President, does the chairman favor an area of defense for the country? Or does the Senator agree that area deployment could well be self-defeating, by forcing the Soviet Union to increase its offensive capabilities to insure that it can retaliate?

Mr. STENNIS. I think, with all deference to the Senator, that is an academic question now. We are not discussing area defense at all under this amendment, or even under the bill.

Mr. BROOKE. Might I point out to the Senator that the House, as I understand it, would grant not only a deterrent defense but also an area defense as well in the bill it passed. If we go into conference with the House with the committee bill, there is a possibility, and perhaps even a probability, that we could end up with area defense. That prompts my question to the distinguished chairman.

Mr. STENNIS. I do not think there is any probability. We would all go to conference to represent the views of the Senate and vigorously represent that position.

My idea is that, everything considered, the high probabilities are that that position would prevail.

I have never been strong for this area defense. However, I do not close the door on it. I do not think that the threat there is imminent.

I think the primary purpose is to put the money on this deployment, as we have now, for these four sites, and perhaps on more.

There is no doubt in my mind about that. That is my purpose. That is what I propose to stay with.

If we are going to go into an area defense that would be debated in the Senate fully. But I do not believe the urgency is there. I do not have really a thought of urgency there. It is something in the future. The Senator is correct. However, this is not the time for it, as I see it.

COLLOQUY BETWEEN SENATOR BROOKE AND SENATOR STENNIS

Mr. BROOKE. Mr. President, I raised this question with the distinguished chairman because he certainly has had a wealth of experience in conference committees.

It is my undrstanding that in conferences sometimes it is customary to split the difference. I am very much concerned that if we were to go into conference with the committee bill and the House bill, we could very well come out of the conference not only with Whiteman but with Warren as well, and perhaps an advanced site in the Northeast and the other areas which would, in effect, give us area defense.

I think that is a matter of very serious concern for our conferees, because of the House action initially.

Let me say to the distinguished Senator that this does not mean that I do not have the utmost confidence in our chairman and in the conferees. I know that they will do all they can to maintain the Senate position. But I wonder, since we have a rather extreme position taken by the House where we would be if a "middle ground" is adopted.

Mr. STENNIS. The Senator is speculating on something here that no one can give an answer to.

I can give an answer as far as attitude is concerned. There is no motive except what I have given for this committee acting as it did in bringing in this recommendation.

No one has in his mind, so far as I know, any idea of having this matter pass the Senate and then going to conference and bringing a whole hog back. There is not the least intention to do that.

If the Senator's amendment is rejected—and I believe it will be—everyone connected with this matter will be willing to settle on this for this year in the Senate bill.

That is the practical side of it. That is what I am going to fight for. I will tell everyone that.

COLLOQUY BETWEEN SENATORS BROOKE, TOWER, AND GOLDWATER, AUGUST 19, 1970

Mr BROOKE. Mr. President, I am very much buttressed by the statement made by our distinguished chairman that he believes that if we should reject this amendment—and I am hopeful that we shall not and I do not expect that we shall—and go to the conference with the committee bill, that he will press for the Senate position.

Mr. STENNIS. There is no doubt about that in my mind. In addition, the Brooke amendment does not have a thing in the world to do with that situation. If we agreed to it or rejected it, the situation would be the same.

Mr. BROOKE. I do not think that is correct. Under the Brooke amendment there is a limitation on sites. You could not go beyond the existing first and second sites of phase I. So I think if we went into a conference with the Brooke amendment, we would be in a stronger position to maintain the distinguished chairman's position than we would if we went in with the committee position. That is my thinking on the subject.

Mr. STENNIS. I thank the Senator. I appreciate his suggestion.

Whatever area defense would come from Whiteman is purely incidental. That is not the object of the site at all.

Mr. BROOKE. I agree it is not the object of the site, but it is there; and I point that out to the distinguished Senator from Texas, who raised the question.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. STENNIS. I yield.

Mr. TOWER. I wish to remind the Senator that the committee rejected area defense. That is the committee position. The bill, as it came out of committee is, indeed, itself a compromise.

Mr. BROOKE. The Senator is correct, but the House did not reject area defense. That is my point.

Mr. TOWER. Since we have rejected it, that is the Senate position and I do not see that going in with the Brooke amendment would give us a better bargaining chip in that connection than the committee version.

Mr. BROOKE. I point out to the Senator, and I hope he understands what the amendment provides, that limitation would be helpful in conference—it would help the conferees on the Senate side to maintain the position which the committee bill has set forth.

Mr. TOWER. Mr. President, will the Senator yield further?

Mr. STENNIS. I yield.

Mr. TOWER. I wish to read the following language from the committee report:

"In taking this action, the committee wishes to establish the primacy of active defense to increase the survivability of the land-based deterrent. The authorization the House approved at administration request to proceed now to advanced preparation of four area defense sites, the committee affirms its conviction that there is no compelling need to move now to the deployment of an area defense of our population against the Chinese Communists ICBM attack."

There is our position.

Mr. BROOKE. That is the committee position. The Senate has not taken a position yet.

Mr. TOWER. If we adopt the committee bill it is the Senate position.

Mr. BROOKE. We have not done that yet.

Mr. TOWER. But the Senator's amendment would put us in no better bargaining position with the House than the committee position.

Mr. BROOKE. I disagree with that; and I make the point my amendment would put us in a better position. Secretary Laird on Sunday stressed that a major reason for going to the Whiteman deployment was to keep open "the follow-on options for either area coverage or for accidental launch coverage."

In my opinion, that is an area defense option. I think the Secretary is keeping clear that option. That is why I asked the question of the Senator that I did.

Mr. STENNIS. We have tried to answer as fully as we know how.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. STENNIS. I yield.

Mr. GOLDWATER. I think I understand what the Secretary is getting at. He made no commitment to area defense, but any weapons planner would be foolish not to be looking ahead. You cannot say that site protection would not provide some area protection. There may be some small town within the radius of the cone of destruction. Whether they like it or not, they might be saved by the ABM designed to protect that particular missile. But I do not think anyone in the weapons business in his right mind would ever stop his thinking at this wall; namely, the protection of a missile site, because when we can prove a missile site protection system will work without danger to a community, we are going to see an about face by small towns and some large cities that now do not want the ABM near them.

I would not advocate that we go into area defense at this particular time, but I think the Secretary would not be acting in the way a Secretary should act if he is not thinking a long way ahead with respect to all problems connected with the ABM, including the possibility at some time of its use as an area defense.

Mr. BROOKE. Of course, any decision is reversible, depending upon the circumstances. As I understand it, he made this decision to go to deterrent defense rather than area defense not so much because people living in these various areas are objecting to it, but because we believe it gives us maximum security.

Our committee discussed that matter thoroughly; and the chairman made clear he supports it. But this language by the Secretary would indicate some possibility he might be seeking to restore that area defense when we go to conference.

I think it is important that we discuss this matter on the floor of the Senate. I am much buttressed by what the chairman has said.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. STENNIS. I yield.

Mr. GOLDWATER. I do not believe the Secretary of Defense is trying to restore anything. The Senator, being a member of our committee, recalls that there was almost universal objection when the Secretary made his report to the so-called Chinese threat, and, in fact, there were quite a few members of that committee that I think would not have supported that. I have my doubts as to what I might have done. But when the committee came out with the language we arrived at, it ignored that part of it, and the Secretary agreed with that, and I feel that is the Secretary's position.

What the House of Representatives does is something else. It will be found the House goes beyond the Senate in practically every area of this bill. We will spend so much money on the B–1 and they are going to spend twice that much. We will have an amendment to strike $284 million from the F–15, but the House will think they should get the whole thing.

I think the Senator's experience on the committee will convince him that the House always goes beyond the Senate in this particular area. So when it comes to the work of the conferees, I do not think the Secretary has any weight at all because I do not think there are many things in this bill from the House that the Secretary either pushed for or did not push for. It is a House bill.

Mr. STENNIS. Mr. President, I yield 2½ minutes to the Senator from South Carolina.

Mr. THURMOND. Mr. President, as the ranking Republican handling this legislation. I wish to take this opportunity to express my appreciation to the Republican members of the committee

who have contributed so much to this debate.

Each member has taken some role in an effort to hold our committee bill intact. I wish to single out Senators TOWER, DOMINICK, MURPHY, and GOLDWATER for their especially active roles. Many hours of preparation, as well as active participation in the debate by the committee members, has strengthened the positions taken by the committee on this important legislation. The junior Senator from Kansas (Mr. DOLE) was a tower of strength on some amendments, as were the minority leader (Mr. SCOTT) and the assistant minority leader (Mr. GRIFFIN).

The ranking Republican on the Senate Armed Services Committee, the distinguished Senator from Maine (Mrs. SMITH) was necessarily absent during the first part of the debate. However, she made a remarkable recovery which enabled her to return to her duties in the Senate soon enough to join with us in fighting to maintain many provisions of the procurement bill. All members of the committee have nothing but respect and admiration for this courageous and intelligent lady.

In particular, I would like to commend our distinguished chairman from Mississippi (Mr. STENNIS) whose leadership as floor manager of the bill has been an inspiration to us all. He has been at hs post here on the Senate floor fighting for this bill for nearly 2 months. Furthermore, he has received substantial support from some of the members of the Armed Services Committee on his side of the aisle.

Before closing, I would like to make one point: The Senate should stop and think what this bill would contain if some of the amendments offered had been adopted. Certainly, the majority of us feel that some of the rejected amendments would have created confusion in the Defense Department and within our military services. We are fortunate in having a military force whose loyalty has never been questioned. I am proud of the way the Senate has stood behind our men and women in uniform during this debate, and I believe this result will be a unifying force for the Nation as well as the miltary.

Mr. STENNIS. Mr. President, I yield 1 minute to the Senator from Michigan.

The PRESIDING OFFICER. The Senator from Michigan is recognized for 1 minute.

Mr. HART. Mr. President, I rise to support the point made by the Senator from Michigan (Mr. EAGLETON). I hope that our conferees, when they go to conference on the bill we have just passed, bear in mind the very strong sentiment in this body against expanding the ABM beyond the four Minuteman sites.

Between the Cooper-Hart amendment and the McIntyre-Brooke amendment, 50 Senators out of 99 voted to limit the ABM to two sites only: Grand Forks and Malmstrom. The Senate Armed Services Committee approved expenditures only at two additional sites—Whiteman Air Force Base and Warren.

Clearly then, in this body there is wide agreement that the Congress should exercise restraint in expanding the system to other areas, and I know the able Senator from Mississippi (Mr. STENNIS) will convey this sentiment to the conferees from the other body in his most persuasive fashion.

TEMPORARY EXTENSION OF CLEAN AIR AND SOLID WASTE DISPOSAL ACT

Mr. RANDOLPH. Mr. President, I ask unanimous consent that the Senate immediately proceed to the consideration of S. 4319, a bill to extend the Clean Air Act, as amended, and the Solid Waste Disposal Act, as amended, for a period of 90 days.

The PRESIDING OFFICER. The bill will be read for the information of the Senate.

The bill (S. 4319) was read the first time by title, and the second time at length, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That pending extensions by Act of Congress of the Clean Air Act and Solid Waste Disposal Act, the authorizations contained in Sections 104(c) and 309 of the Clean Air Act, as amended, for the fiscal year ending June 30, 1970, and the authorization contained in Section 210 of the Solid Waste Disposal Act, as amended, for the fiscal year ending June 30, 1970, shall remain available through November 30, 1970, notwithstanding any provisions of those Sections.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to the consideration of the bill.

Mr. RANDOLPH. Mr. President, I have cleared this matter with both sides. I would like to state to the Senate that our purpose is to provide a further extension because on the 31st of August, the time ran out and we need a further authorization for the solid waste and the air pollution programs in order to continue them at their present level through November 30, 1970. The extension would allow appropriations for this period with the unappropriated balance for the fiscal year 1970 authorizations.

We anticipate completion of congressional action on both the solid waste and air pollution programs prior to the expiration of this extension.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 4319) was ordered to be engrossed for a third reading, was read the third time, and passed.

AUTHORIZATION OF APPROPRIATIONS FOR MILITARY PROCUREMENT AND OTHER PURPOSES

The Senate resumed the consideration of the bill (H.R. 17123) to authorize appropriations during the fiscal year 1971 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces, and for other purposes.

Mr. STENNIS. Mr. President, I yield 2 minutes to the Senator from Arizona.

The PRESIDING OFFICER. The Senator from Arizona is recognized for 2 minutes.

Mr. GOLDWATER. Mr. President, after 5½ weeks on this measure, we are about to pass it.

I take this opportunity to pay my tribute to the chairman of the committee, the Senator from Mississippi (Mr. STENNIS). I have watched him on the floor day after day, sometimes for 8 hours a day, defending a measure that, Mr. President, in my humble opinion, should require less debate than any other measure we consider in the Senate.

The authorization bills are born in the Pentagon. They receive the scrutiny of the President. They receive the scrutiny of the other body. They go to the House and then come to the Senate where expert staff members look at them. They then come to the floor.

I think that we have wasted 5 long weeks. We could have passed this with ease in a week at the most.

To point out some of the foolishness we get into during the consideration of a measure such as this, during the debate on the ABM, I made mention of the fact that tests were contemplated in the near future on the ABM. I was very happy to see in this morning's New York Times an article, the headline of which is, "Army Intercepts Missile in ABM Test Over Pacific."

Mr. President, I ask unanimous consent that this article be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ARMY INTERCEPTS MISSILE IN ABM TEST OVER PACIFIC

WASHINGTON, Aug. 31.—The Army has successfully staged an interception of one of its own intercontinental ballistic missiles. The interception, which took place above the atmosphere, tested a key element of the controversial Safeguard antiballistic missile system.

The test took place over the Pacific Ocean Friday, the Defense Department announced today. The target was the third stage, or nose cone, of a Minuteman 1 missile fired from Vandenberg Air Force Base, California.

After the Minuteman had been fired, it was picked up by a missile site radar 4,200 miles away at the Safeguard test facility on Kwajalein Atoll.

The radar, according to the Defense Department, tracked the incoming nose cone in somewhat the same manner it would track an incoming enemy intercontinental ballistic missile and launched the intercepting rocket.

This rocket, a Spartan missile, which would be used to defend offensive missile sites in the event of a real missile attack, came close enough to have destroyed it if a nuclear warhead had been used, the Pentagon said.

Neither the Spartan nor the target nose cone carried explosive warheads, however, the Defense Department said.

Altogether, the test represented the most advanced simulation of what would happen in a missile attack on the United States if an ABM system was deployed.

It was the first time, for example, that a Spartan missile had intercepted an incoming object. In the past, the 55-foot-long rocket, which has a range of "hundreds of miles," was tested only against static targets in the air.

It is believed that the range of the Spartan is close to 400 miles. Although the altitude of the interception was not released, it has been estimated that, in a real firing, the altitude would be at least 100 miles above the earth's surface.

Defense Department officials said that the test was only a first-time effort and lacked several elements of an attack.

The technicians at Kwajalein had been alerted to the test. In addition, the incoming missile was not accompanied by the kind of penetration aids—such as decoys—that would presumably aid incoming enemy missiles.

In addition, the incoming missile was a simple I.C.B.M. with a single "warhead," whereas the Soviet Union has been testing—but is not believed to have deployed—missiles with multiple re-entry vehicles, that is, missiles with a cluster of warheads.

FIRST IN A SERIES

The test announced today was the first in a series against a target such as a nose cone. Future tests will presumably match the Spartan against more advanced incoming missiles.

The Spartan and the missile site radar form two key elements of an operational antiballistic missile system, but the two other elements—a Sprint missile and a perimeter acquisition radar have borne the burden of opposition arguments against the ABM's effectiveness.

The acquisition radar which has a range of more than 1,000 miles, would, in a fully operational system, pick up the incoming missiles at a great distance and alert the missile site radar.

The acquisition radar, the Army has indicated, is to expensive to test at the Kwajalein site, which is 2,500 miles southwest of Hawaii.

It will be integrated with other elements when the ABM system is made operational, which is scheduled for early 1975 at Grand Forks Air Force Base in North Dakota.

The other original site for the system is at Malmstrom Air Force Base in Montana.

In addition, the Administration has requested—and Congress, after much debate, has approved—$322-million to construct a third site around the Minuteman missile complex at Whiteman Air Force Base in Missouri and to start preliminary work on a fourth site at Warren Air Force Base in Wyoming.

The controversy over the antiballistic missile system has occupied a good deal of the Senate's time, in both hearings and floor debate, this year. A Senate amendment that would have blocked expansion of the program was defeated Aug. 12 by a vote of 52 to 47.

MORE CRITICISM EXPECTED

The successful testing of the Spartan missile is not expected to deter opponents of missile deployment, however.

Dr. Ralph Lapp, a Washington physicist, who has been one of the foremost opponents of the system, said today, for example, that "nobody really believed Spartan was not an effective ABM."

But he argued, the missile would be considerably less effective against a missile with multiple warheads.

In addition, he said, the Sprint missile, a 27-foot-long missile with a range of 25 miles, which would serve as a more effective counter to an incoming enemy missile, has not been tested, as the Spartan has.

The Sprint would be the most effective counter against a "saturation" attack on a Minuteman base because it is believed to be better able to discriminate between a real incoming warhead and a decoy than the Spartan can, he said.

Mr. GOLDWATER. Mr. President, that demonstrates in my mind more conclusively than anything I might say that after this bill has received careful scrutiny of the committees, probably no other bill reaches this floor in more perfect form. I hope next year we can keep this debate to a minimum.

Again I compliment my chairman. He is a man of infinite patience and infinite wisdom. If it had not been for him this bill could have become mangled by worthless amendments.

Mr. STENNIS. I thank the Senator.

Mr. COOPER. Mr. President, will the Senator yield?

Mr. STENNIS. I yield.

Mr. COOPER. Mr. President, I heard just a moment ago the Senator from Missouri discuss a newspaper article by Chalmers Roberts stating that the two committees might agree to an ABM command center for Washington.

I know the action that the Committee on Armed Services has taken and I know that almost one-half of the Members of this body took the position last year that it should not be extended beyond last year.

I asked the Senator if he adheres to the position of the Committee on Armed Services.

Mr. STENNIS. Yes. That would be my position as a conferee, and with great deference to the position of the House of Representatives. Frankly, I think the debate is over on the ABM.

Mr. COOPER. I know that. I was talking about the position of the Senator's committee.

The last 2 years I have been in a position of opposition to the Senator on that particular part of the bill.

Also, I would like to say that I disagree with the Senator from Arizona, as much as I like him and respect him, when he said that a bill of this size should be debated and enacted in a week or so. This bill not only supports a total investment of about $70 billion, but it also affects the security of our country.

I think the debate in the last 2 years, especially that part questioning our weapons systems, has opened up the Department of Defense to the scrutiny of Congress and the public.

Mr. President, having said that, I wish to conclude in saying that I admire and appreciate the hard work and contribution of the distinguished chairman of the committee in managing this difficult bill and the important contributions made by the members of his committee.

The PRESIDING OFFICER. The Senator from Mississippi has 1 minute remaining.

Mr. STENNIS. I thank the Senator for his remarks.

Mr. President, I yield 1 minute to the Senator from New Hampshire.

Mr. McINTYRE. Mr. President, in a very few moments we will conclude debate on the fiscal 1971 military procurement bill, wrapping up almost 2 months of floor action on the bill.

A few words of recognition are in order at this time.

Those of us on the Armed Services Committee have long known the capacity for leadership of the distinguished Senator from Mississippi (Mr. STENNIS)—his deep concern for the national defense, his firm grasp of complicated issues, his organizational mastery, and his seemingly endless patience, as evidenced by his willingness always to attend to the views of others. These and other qualities of this remarkable man have been widely demonstrated in the debate now ended. We are fortunate to have him with us in the Senate.

It has also been both a rare privilege and a wonderful education for me personnally to work once again with the Senator from Mississippi as chairman of the Armed Services Committee's Research and Development Subcommittee. Let me assure my chairman that the cooperation and assistance which he has shown to me and the other members of my subcommittee have been deeply appreciated indeed.

I would like to say a word of thanks also at this time to Mr. Hyman Fine of the Armed Services Committee staff and Mr. Ross Hamachek of my own staff, both of whom aided the subcommittee in its often thorough and painstaking review of this extremely complex and intricate R.D.T. & E. budget.

Mr. Fine came to the committee staff this year after many years as a budget expert on Air Force R. & D. programs. His expertise was of great value to the subcommittee, enabling it to uncover a large number of instances in which the Defense Department simply did not need all the funds it claimed it needed to carry on with given programs. Mr. Fine also left behind when he came to the committee what too many former associates of a given service bring with them—a loyalty to their old employers which transcends the degree of detachment needed to critically assess their funds requests. The subcommittee's action on Air Force R. & D. programs attests well to Mr. Fine's inherent objectivity.

Mr. STENNIS. Mr. President, the bill is now in its last stage before final passage and I would like to make a few concluding remarks.

By way of summary, the military authorization bill now before the Senate recommends $11.9 billion for procurement, $7 billion for research and development, and some $334 million for construction relating to the Safeguard system for a total of $19,242,889,000. These are the same amounts recommended by the Armed Services Committee and represent a $1.3 billion reduction from the administration request.

I want the Senate to know that this bill will be taken to conference with every intention on the part of the Senator from Mississippi of upholding to the extent of his ability the position taken by the Senate on this bill including both the Committee action and the amendments voted on the floor of the Senate. As always, of course, the House will fight hard for its own position but I am confident that a sound bill will emerge from the conference committee. I would also emphasize, Mr. President, that we hope to initiate this conference as soon as prac-

ticable after the recess and conclude the final action on this legislation in order for the Defense appropriations to proceed in as rapid a manner as possible.

Mr. President, the discussion on the Senate floor on this bill represents a debate in the finest traditions of the Senate. The debate has been hard but fair and I think has been extremely helpful to the bill as a whole. I would observe that the Senate started deliberating on this bill July 24 and it has remained the pending business of the Senate until today, September 1, which covers a period of 39 calendar days. There have been 47 amendments or modifications thereto offered. Of this total, 12 have been approved and 15 have been rejected, with the remainder not being called up for a vote. I wish to say that whether these amendments were adopted or rejected, all of them have made a contribution to this bill and, in many cases, the wisdom and experience of those Senators who sponsored amendments—even though they did not pass—provide food for thought on which we can work for the next year.

I wish at this time, Mr. President, to express my thanks for the cooperation which has been extended to the manager of the bill by the Senate as a whole.

I want to especially thank the senior Senator from Maine, Senator SMITH, who has always been most cooperative on every matter including this bill.

We began hearings on February 20th and without the firm support of Senator SMITH, we could not have proceeded as we have. I also extend my thanks to Senator THURMOND, who has been most helpful.

Also, I wish to give special recognition to Senator MCINTYRE, Chairman of the subcommittee on Research and Development, Senator CANNON, Chairman of the Tactical Air Power Subcommittee, both of whom rendered splendid service. I also wish to thank all the members of the committee who have been most cooperative in every way and have actually worked on the bill and on the floor of the Senate.

Lastly, Mr. President, I want to acknowledge the help of the staff on this matter.

The committee staff members who worked and whom I highly commend and warmly thank, are: T. Edward Braswell, Jr., Chief of Staff, Labre Garcia, Hyman Fine, Don Lynch, and Frances Funk.

Preparedness investigating subcommittee members who worked on bill: James Kendall, Ben Gilleas, Ed Kenney, and George Foster.

SEVERAL SENATORS. Vote! Vote!

Mr. STENNIS. Mr. President, I yield back the time I have remaining.

Mr. MANSFIELD. If I have any time I yield back the remaining time.

Mr. GRIFFIN. Mr. President, I wish to take a moment just to pay my respects to the distinguished manager of the bill, the Senator from Mississippi (Mr. STENNIS). He has demonstrated once again what a great American he is, and what an effective legislator he is.

On behalf of many Senators on both sides of the aisle who would like to speak but do not wish to take the time of the Senate, I want to praise the Senator from Mississippi. He has been patient, effective, and always very courteous to all who have participated in this debate. The Senate is indebted to him, and the country is indebted to him.

Mr. President, I wish also to pay tribute to the leadership of the distinguished ranking minority member of the Armed Services Committee, the senior Senator from Maine (Mrs. SMITH), and to the other Republican members of the committee who have worked so hard and effectively. In particular, I wish to commend the Senator from South Carolina (Mr. THURMOND) who has served in a leadership capacity during part of the time this bill has been under consideration.

Mr. MANSFIELD. Mr. President, I would be derelict in my duty if I did not express my respect, admiration, and high regard for the distinguished Senator from Mississippi, who has done a magnificent job in handling a most difficult bill over a number of week—7 in number, I believe.

The outstanding manner in which he managed this very complex and most important measure was exemplary. Over these past weeks while this bill was being debated on the Senate floor, Senator STENNIS once again demonstrated at all times his outstanding legislative skill and ability. With his handling of this authorization he brought his clear and articulate views and his immense knowledge and understanding to the discussion. In large part he was responsible for the thoughtful and high quality of the debate throughout the entire time. We are indebted to him for his great courtesy and all his efforts. He deserves the highest commendation for steering this measure through to overwhelming success.

To be equally commended is the ranking minority Member of the Armed Services Committee, the distinguished Senator from Maine (Mrs. SMITH). As always, her contributions were thoughtful, most perceptive and to the point. Her contribution was immeasurable. She cooperated magnificently to make certain that this bill received the thorough discussion warranted. Her help and assistance was indispensible in bringing about final disposition today. On behalf of the entire Senate, I wish to thank Mrs. SMITH for her unstinting devotion and dedication and for the fine manner in which she lead the discussion.

It is too difficult to single out the numerous other Senators who contributed. Suffice it to say that the cooperation of every member permitted the orderly disposition of the bill. I, personally, am deeply grateful.

Mr. STENNIS. Mr. President, I thank the majority leader.

The PRESIDING OFFICER. Who yields time?

Mr. STENNIS. Mr. President, I would like to borrow 1 minute from the minority leader.

Mr. GRIFFIN. I yield to the Senator from Mississippi.

Mr. STENNIS. Mr. President, we had important help from the committee and the staff in connection with the preparation of this bill and the work that is necessary to be done on the floor of the Senate. I want to publicly thank all of them and the members of the committee who worked so hard in connection with this bill, especially the Senator from Maine (Mrs. SMITH), whose counsel and loyalty have meant a great deal to me.

I had access to my mentor, the Senator from Georgia (Mr. RUSSELL), who was always available with good sound counsel and advice. I call him the oracle.

Mr. President, I ask unanimous consent that the bill be printed with all of the amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. GRIFFIN. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is, Shall the bill pass?

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Nevada (Mr. CANNON), the Senator from Mississippi (Mr. EASTLAND), the Senator from Indiana (Mr. HARTKE), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Minnesota (Mr. MONDALE), the Senator from Utah (Mr. MOSS), and the Senator from Maryland (Mr. TYDINGS) are necessarily absent.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON) would vote "yea."

Mr. GRIFFIN. I announce that the Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Oregon (Mr. PACKWOOD) is necessarily absent.

The Senator from North Dakota (Mr. YOUNG) is detained on official business.

If present and voting, the Senator from South Dakota (Mr. MUNDT), the Senator from Oregon (Mr. PACKWOOD), and the Senator from North Dakota (Mr. YOUNG) would each vote "yea."

The result was announced—yeas 84, nays 5, as follows:

[No. 282 Leg.]

YEAS—84

Aiken	Eagleton	Long

Cannon	Mondale	Tydings
Eastland	Moss	Young, N. Dak.
Hartke	Mundt	

So the bill (H.R. 17123) was passed.

The title was amended so as to read:

An Act to authorize appropriations during the fiscal year 1971 for procurement of aircraft, missiles, naval vessels, and tracked combat vehicles, and other weapons, and research, development, test, and evaluation for the Armed Forces, and to authorize real estate acquisition and construction at certain installations in connection with the Safeguard anti-ballistic missile system, and to prescribe the authorized personnel strength of the Selected Reserve of each Reserve component of the Armed Forces, and for other purposes.

Mr. STENNIS. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. SCOTT. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STENNIS. Mr. President, just for the information of the Senate, we, of course, will go to conference as soon as we can, but I shall not ask the Chair to name the conferees today.

LEGISLATIVE PROGRAM

Mr. SCOTT. Mr. President, I rise to ask the distinguished majority leader if he will tell us what is the remaining order of business for tonight and for tomorrow.

Mr. MANSFIELD. Mr. President, I am glad to respond to the distinguished Republican leader.

TREASURY, POST OFFICE, AND EXECUTIVE OFFICE APPROPRIATIONS, 1971

Mr. MANSFIELD. I move that the Senate proceed to the consideration of Calendar No. 1174, H.R. 16900. I do this so that the bill will become the pending business.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 16900) making appropriations for the Treasury and Post Office Departments, the Executive Office of the President, and certain independent agencies for the fiscal year ending June 30, 1971, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

Mr. WILLIAMS of Delaware. Mr. President, to let the record be straight that there would be objection if based on unanimous consent but it can be put to a vote. Appropriation bills are being taken up the day after they are reported, under a ruling made by the former Vice President, Mr. Humphrey. The Senator from Montana is in order with his motion let it be voted on. I do not question his authority, but I want the record to show that we are not unanimous in our feeling that this is a proper procedure.

The PRESIDING OFFICER (Mr. BELLMON). The question is on agreeing to motion of the Senator from Montana.

The motion was agreed to, and the Senate proceeded to consider the bill (H.R. 16900) making appropriations for the Treasury and Post Office Departments, the Executive Office of the President, and certain Independent Agencies, for the fiscal year ending June 30, 1971, and for other purposes, which had been reported from the Committee on Appropriations with amendments.

Mr. MANSFIELD. I think the Senator from Delaware has a point. I wish it could be cleared up some way, so that this particular question would not come up every time, because we do bring some of these appropriation bills out pretty quickly.

Mr. WILLIAMS of Delaware. That is true in this particular case. I was not questioning the right of the majority leader to establish the business, as he understands; but I do think at some time the Senate would be well advised to amend the rules and put them back where they were prior to that ruling by the former Vice President, Mr. Humphrey, where there would be a 3-day limitation except by unanimous consent, by which of course we could always proceed.

In this particular case, we are asked to vote on a $9.5 billion bill reported out last night, which got back from the printer sometime just before noon today. So Senators are not in the position to consider it intelligently; and technically, they could be caught in the same situation with the defense appropriation bill, a $60 billion or $70 billion bill, being voted on the following day.

I think the rules of the Senate should be amended to take care of the situation, but I was not questioning the right of the leadership to lay down the pending business under the rules of the Senate as they are being interpreted today.

Mr. MANSFIELD. I understand.

LEGISLATIVE PROGRAM

Mr. MANSFIELD. Mr. President, it is our hope that we will be able to finish with this bill tonight. We will come in tomorrow morning; I believe we already have an agreement to that effect.

The PRESIDING OFFICER. At 9 o'clock.

Mr. MANSFIELD. It is estimated that tomorrow when we convene at 9 o'clock we will take up unobjected-to items on the calendar. I ask unanimous consent that that be done.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. There will be no votes tomorrow, and, so far as I know, there will be very little, if any, controversial legislation considered. I do not know yet what will be laid before the Senate to be the pending business when we come back on Tuesday next.

Mr. SCOTT. Is the distinguished majority leader prepared to give us some indication as to matters that are likely to brought up upon our return to the Senate next week, without specifying the order in which they will occur?

I make this request because I have been asked by a number of Senators to ascertain what is likely to be the pending business next week.

Mr. MANSFIELD. Perhaps the survivor annuities, the bill to amend the FDI Act, air pollution control, appropriation bills as ready, hopefully the farm bill, and somewhere in there, the electoral college reform measure.

Mr. SCOTT. The constitutional amendment?

Mr. MANSFIELD. Yes; and later on in the month equal rights for women, another constitutional amendment.

Mr. SCOTT. Which is not to be reported out, I believe, until September 19, however; is that correct?

Mr. MANSFIELD. Around that date; yes. And the one-bank holding company bill; and then I want to confer further the exact scheduling of Senate counsel in the 18-year-old voting case which will come up before the Supreme Court in mid-October, I understand.

Mr. SCOTT. It is my understanding that there is some informal undertaking on the part of the chairman of the Committee on Banking and Currency and its ranking member to bring the one-bank holding company bill up about September 15.

Mr. MANSFIELD. The one-bank holding company bill is on the calendar and will be taken up around that date.

Mr. SCOTT. To bring it up about September 15.

Mr. MANSFIELD. Yes. And I would like to bring the electoral college reform measure up at a reasonable opportunity, because there will be some debate on that, but as of now I do not know just when. Maybe next week, but do not hold me to it.

Mr. SCOTT. I thank the distinguished majority leader.

TREASURY, POST OFFICE, AND EXECUTIVE OFFICE APPROPRIATIONS, 1971

The Senate resumed the consideration of the bill (H.R. 16900) making appropriations for the Treasury and Post Office Departments, the Executive Office of the President, and certain independent agencies for the fiscal year ending June 30, 1971, and for other purposes.

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mr. YARBOROUGH. Mr. President, the Committee on Appropriations has authorized me to present to the Senate its report on the pending bill, H.R. 16900, making appropriations for the Treasury and Post Office Departments, the Executive Office of the President, and certain independent agencies for fiscal year 1971.

Senators will find on their desks copies of the bill and the committee report, together with copies of the hearings, and I will now present to the Senate a brief summary of what is contained in the bill in the way of increases and decreases.

Mr. BYRD of West Virginia. Mr. President, we cannot hear the Senator. I am sitting immediately behind the Senator, and I am having difficulty hearing him.

Mr. YARBOROUGH. I assure the Senator that I am not whispering, either. I am speaking fairly loudly, though I have hesitated to call for order.

The PRESIDING OFFICER. The Senate will be order.

The Senator may proceed.

Mr. YARBOROUGH. The bill which is reported to the Senate provides new budget obligational authority in the amount of $3,016,429,000. This amount consists of definite appropriations in the amount of $1,283,121,000, and indefinite appropriations in the amount of $1,733,308,000. The grand total of titles I, III, and IV—New Budget Obligational Authority—and title II—Authorizations out of the Postal Fund—is in the amount of $9,537,429,000. This amount is an increase of $44,727,000 over the House allowance of $9,492,702,000; $374,892,000 over the 1970 appropriations and $28,614,000 under the estimates for fiscal 1971.

TREASURY DEPARTMENT—TITLE I

The first group of items, Mr. President, are the appropriations for the Treasury Department, which total $1,248,078,000. This is a decrease of $4,473,000 in the estimates and an increase of $25,956,000 compared with the House bill amount of $1,222,122,000. The amount recommended is $78,766,000 over the 1970 appropriation of $1,169,312,000, including supplementals recently enacted totaling $79,222,000. Major increases recommended under title I of the bill are as follows.

Here, Mr. President, are items we put back in the bill that the House of Representatives deleted or increased over 1970.

FEDERAL LAW ENFORCEMENT TRAINING CENTER

For the Federal Law Enforcement Training Center the committee concurred with the House in allowing the full estimate of $5,000,000. That is an increase of $4 million over 1970, to cover the cost of the first phase of constructing and equipping the Consolidated Federal Law Enforcement Training Center at Beltsville, Md., on a federally owned site.

We felt that was necessary, in view of the problems with law enforcement in the country today, and the necessity for building this facility as a proper law enforcement training center.

BUREAU OF CUSTOMS

For the Bureau of Customs, Mr. President, the amount recommended is $137,085,000. This amount is the same as the budget estimate. The House had cut that, and we restored the reduction of $1,585,000 made by the House. The committee allowed 970 new average positions. These were requested by the Bureau of Customs to permit the continued stepped up enforcement efforts to stamp out illegal drug traffic. The increased manpower recruited and trained will aid in further increasing the effectiveness of this important antinarcotics agency. They need this additional manpower at airports because of the vast increase in foreign air travel. They need them along the land borders and need it in my State, along the thousand-mile border along the Rio Grande River. We felt that the budget request was reasonable and we increased the House allowance by $1,585,000.

ONE HUNDRED SEVENTY EXTRA NARCOTICS-CONTROL CUSTOMS AGENTS APPROVED

Mr. GOODELL. Mr. President, I commend the Appropriations Committee, and particularly the subcommittee presided over by the distinguished Senator from Texas (Mr. YARBOROUGH) for having restored to the Bureau of Customs appropriation for fiscal year 1971 the sum of $1,585,000 which the House had cut from the President's budget request. The restoration is included in the Treasury Department appropriation to be voted upon today.

That restoration, in accordance with the recommendation which I made in a letter to the subcommittee on July 27, provides for 170 extra customs agents who can be used to check on the ever-increasing volume of commercial importations into the United States, and particularly on the dangerous importation of narcotics.

As a result of the subcommittee's action, the 340 new agents which the administration proposed—and which the House cut in half—can be hired, and will be heavily employed in the battle against illegal narcotics importation. Those agents are desperately needed in New York City, in which the Justice Department estimates over half this country's addicts live. Rockland County and Dutchess County of New York just recently suffered their first teenage deaths attributed to drugs.

As the Appropriations Committee report notes, customs is one of our key weapons for the interdiction of illicit drug traffic. Virtually all of the heroin, cocaine, hashish, and other narcotics used in this country comes from outside the United States.

In fiscal year 1969, the Bureau of Customs seized more than 310 pounds of heroin, 34 pounds of opium, and 199 pounds of other narcotics, mostly cocaine, were seized.

The 170-man increase in customs agents which the Appropriations Committee has provided over the House allotment will be helpful in decreasing the amount of drugs illegally flowing into the country, and in thus protecting the citizens of New York State and the Nation.

INTERNAL REVENUE SERVICE

Mr. YARBOROUGH. For the Internal Revenue Service the committee recommends a total appropriation of $908,335,000. This amount is $4,473,000 under the estimates, but $48,483,000 over the total amount appropriated for fiscal 1970. The amount recommended is $17,835,000 over the House allowance. Areas of major increase are the revenue accounting and processing and compliance activities, and the amounts recommended should provide for practically all the additional personnel requested.

Furthermore, there is one other item; namely, salaries and expenses, Bureau of the Mint. The House had cut $1,633,000 from the amount requested for the Bureau of the Mint. The Bureau of the Mint estimated that they would need the full amount of the budget estimate—$19,663,000, to enable it to mint 8.7 billion coins estimated to be required this year. The House allowed only enough money for the manufacture of 7.6 billion coins, according to the Department.

Due to the increased use of vending machines, the hoarding of small coins, and others taking many small coins out of circulation, the committee allowed for restoration of the $1,663,000 cut by the House in order to give the Bureau of the Mint enough money to mint the 8.7 billion coins they requested.

All of these items mentioned there for the Treasury Department were raised back to the estimate from the House allowances. The total increase by the Senate over the House for title I—Treasury amounts to $25,956,000. The Department had appealed for restoration of $30,429,000 and the Senate committee restored all of that but $4,473,000.

Mr. President, I ask unanimous consent that the committee amendments as regard to title I, the Treasury Department, be taken up separately and agreed to en bloc, and that title I as thus amended be regarded for the purpose of amendment as original text, provided that no point of order shall be considered to have been waived by reason of agreement to this order.

The PRESIDING OFFICER. Is there objection?

Mr. WILLIAMS of Delaware. Mr. President, reserving the right to object, why the separation of title I from the other titles?

Mr. YARBOROUGH. We knew of no objection in the committee to any items in title I of the bill. There are objections to some of the other items which I wanted to discuss at a little more length.

Mr. WILLIAMS of Delaware. I have no objection to taking them separately. In view of the short time that the committee has had this bill before it, I wonder whether it would be more orderly to explain each amendment as they come and vote on them separately.

Mr. YARBOROUGH. We proposed that the Treasury amendments be agreed to en bloc. We have nine items there. Rather than voting on them en bloc, we would have nine separate votes. Is the Senator suggesting that we have nine separate votes as to the Treasury Department items?

Mr. WILLIAMS of Delaware. I was not suggesting a rollcall vote on each one, but I thought we could have an explanation.

Mr. YARBOROUGH. I have already explained the items in the Treasury Department. I have not touched on the items for the Post Office or the Executive Office of the President.

Mr. WILLIAMS of Delaware. I ask for an explanation on each one separately, in light of the fact that we have had so little time to consider this bill.

Mr. YARBOROUGH. I submit to the Senator that there was a great deal of

noise in the Chamber at the time, but I have just finished explaining them.

Mr. WILLIAMS of Delaware. Let us take them as they come.

The PRESIDING OFFICER. The clerk will state the first committee amendment.

The assistant legislative clerk read as follows:

On page 2, line 7, after the word "expenses," strike out "$9,500,000" and insert "$9,660,000".

Mr. YARBOROUGH. Does the Senator desire the amendment explained?

Mr. WILLIAMS of Delaware. Yes.

Mr. YARBOROUGH. A restoration of $160,000 was asked over the House allowance of $9,500,000. That is for the Office of the Secretary of the Treasury. They asked for 25 additional average positions, and the House authorized 20 of those. The Department stated that the dollar cut of $160,000 imposed by the House reduce their new employment by 14 average positions. That allowed an increase in 1971 employment over 1970 of only 11 average positions, in lieu of the 25 requested. They want the other 14 average positions. They stated that these were required to avoid reduction in the quality of staff assistance and the curtailment of work on tax policy analysis, equal employment, and administrative support. They wanted 14 men for those three categories—tax analysis, equal employment, and administrative support. The subcommittee and the full committee voted for the restoration of $160,000.

Mr. WILLIAMS of Delaware. I thank the Senator for the explanation.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The clerk will state the next amendment.

The legislative clerk read as follows:

On page 2, line 12, after the word "Center", strike out "$1,000,000" and insert "$1,113,000".

Mr. YARBOROUGH. In connection with the request of $1,113,000 for the Federal Law Enforcement Training Center, the House bill authorized only 42 of the 44 average positions requested. They cut out two positions. The Department appeared and testified that cutting those positions would reduce the efficiency and quality of training, and they wanted the $113,000 restored. Of all the items of the Treasury Department, I think the committee questioned that more closely than any other. The idea that $113,000 and two more positions would have that much influence on the training at this Federal law enforcement training center seemed to us to be high. But due to the claims and the necessity for law enforcement at this time in this country, we were unwilling to cut a dollar where they said it would impair the efficiency of their training. It seemed high to us, and we discussed it for more than some of the other larger items. But we voted to increase it, on their plea that they could not train those people in law enforcement as efficiently if we were to cut the $113,000.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The clerk will state the next amendment.

The legislative clerk read as follows:

On page 3, line 6, after the word "and", strike out "thirty-seven" and insert "fourteen".

Mr. YARBOROUGH. The Committee found a discrepancy between the budget estimate and the Department's justification and this amendment corrects it as regards the actual number of vehicles needed.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The clerk will state the next amendment.

The legislative clerk read as follows:

On page 3, line 8, after the word "and", strike out "twenty-seven" and insert "four".

Mr. YARBOROUGH. This is the same as the previous explanation.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The clerk will state the next amendment.

The legislative clerk read as follows:

On page 3, line 11, after the word "of", strike out "$400" and insert "$800".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The clerk will state the next amendment.

The legislative clerk read as follows:

On page 3, line 15, strike out "$135,500,000" and insert "$137,085,000".

THE AMENDMENT DEALS WITH THE BUREAU OF CUSTOMS

Mr. YARBOROUGH. That is an increase of $1,585,000 over the House bill amount of $135,500,000. This restoration was requested to fund 170 additional new positions in the Bureau of Customs. They had asked for a total of 970 new man-years of employment. The Department stated that the House funds allowed only a portion of those and that those cut were needed in the Customs Service. I think they made a good case, in view of the vast increase in air traffic overseas, the problems in smuggling that go on, and their attempt to prevent the bringing of narcotics into the United States. It used to come in by boat, but now it comes in by airplanes, by cars, through the mails, or on the person. With millions of people traveling in and out of this country every year, it is a difficult problem. We felt that they needed the personnel, and the Senate committee raised that to the full amount asked by the Bureau. The big problem now is to uncover narcotics. It has shifted from smuggling just to dodge a tax on imported goods to the bigger thing of smuggling millions of dollars of narcotics. We know of the example of the plane that was caught on Crete which had been flown from the United States and was going to bring in millions of dollars of hashish on one trip.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The legislative clerk read as follows:

On page 3, line 20, after the word "commission", strike out "$18,000,000" and insert "$19,663,000".

Mr. YARBOROUGH. Mr. President, that is an increase of $1,663,000 over the House allowance for the Bureau of the Mint. The Bureau of the Mint stated that there would be required to be manufactured a total of 8.7 billion new coins. The House allowed only enough money to mint 7,600,000,000 coins. We restored the $1.6 million in the Senate committee to permit the minting of the 8.7 billion coins estimated needed for the year.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The legislative clerk read as follows:

On page 4, line 8, strike "$25,500,000" and insert "$26,096,000."

Mr. YARBOROUGH. That is for the Internal Revenue Service, salaries and expenses, and the restoration of the $596,000 by the Senate committee. The House cut this $596,000 and that reduction resulted in the loss of 41 man-years of employment, under their estimate. They stated that these were needed to avoid further reductions in management support and internal integrity programs. The Senate committee, after hearing the voluminous testimony, 1,466 pages of it, went into each one of the items and had three hearings on them.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The legislative clerk read as follows:

On page 4, line 14, after the word "exceed", strike out "$35,500,000" and insert "$36,500,000";

Mr. YARBOROUGH. That item is to permit for the increased hire of temporary employment. The fiscal 1970 limitation for this purpose was $32.5 million. The Department requested an increase to $36,900,000 to provide more flexibility in the assignment of employees during the period of transition to the new service centers at Fresno, Memphis, and Suffolk County, N.Y. They need that money for the transition, for temporary employment. The Senate committee increased the 1970 limitation to $36,500,000 for fiscal 1971.

The PRESIDING OFFICER (Mr. HART). The question is on agreeing to the amendment.

The amendment was agreed to.

The legislative clerk read as follows:

In line 17, after the word "applicants", strike out "$220,000,000" and insert "$222,239,000".

Mr. YARBOROUGH. That restores a House reduction of $2,239,000 in the budget estimate. An increase of the 559 additional new positions was requested for Revenue accounting and processing, Internal Revenue Service. The Department states that the House allowance provides only 229 man-years of the 559 requested. This reduction would require a 3- to 4-month delay in the processing of refunds, returns, delayed billings, and so forth, sent to some 400,000 taxpayers. We felt that Internal Revenue should have enough personnel to avoid that delay. Treasury feels they would save

money by not having any delays in the billings.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The legislative clerk read as follows: On page 4, line 25, after the word "of", where it appears the first time, strike out "$400" and insert "$800".

Mr. YARBOROUGH. This sets a limitation that can be paid for police-type vehicles above the general purchase price limitation. This allows for the purchase of special equipment for police-type vehicles, including air conditioners. Some had a limitation that they could not buy air conditioners in some parts of the Southwest. These specially equipped cars are needed by law-enforcement personnel, and cars without air conditioners are almost unbearable to stay in, especially in the Southwest. We moved to increase the limitation in order to equip the law-enforcement cars with air conditioners.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The legislative clerk read as follows:

On page 5, line 3, after the word "Commissioner", strike out "$645,000,000" and insert "$660,000,000".

Mr. YARBOROUGH. That is for the Compliance Division of the Internal Revenue Service. The House allowed 1,550 of 2,894 new average positions requested. The Department contended that although the House authorized the position, funding for only 732 positions, was provided, thus it would be short 2,162 average positions. The 1970 funding provided for 44,009 average positions. The Department stated that the House bill provides for the funding of only 44,741 average positions rather than the 46,903 requested, and this was not enough and that they could not possibly operate with the collection levels they had previously had, especially in audit and collection of individual income taxes, without this additional personnel.

With the greater number of income tax returns, the larger amounts of money being filed, and the money being claimed in refunds, it requires this additional personnel to do an efficient job. The committee, after hearing all the evidence and the presentations of the witnesses, including the Department's, recommends to the Senate that the Internal Revenue be granted sufficient personnel necessary to do an efficient job in auditing and collection. We know from examples around the world that if people do not have confidence in an efficient, speedy, and impartial tax department, this can undermine the foundation of government. We felt that an efficient tax department was necessary in fairness to everyone, so the committee recommended such a restoration.

Mr. WILLIAMS of Delaware. Mr. President, I want to commend the committee on its action here. It is a step much needed to be taken.

Mr. YARBOROUGH. We cut $4 million of the $19.4 million requested to be restored because of the lapse of time. We allowed $15 million over the House figure. We had a lapse of 3 months there, and then we cut that approximately $4 million—because they cannot hire and train the people now, except for three-quarters of the year. Other than the lapse of time, we granted all that they asked in this account.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The legislative clerk read as follows: On page 5, line 14, after the word "of", where it appears the first time, strike out "$400" and insert "$800"; and, in line 16, after the word "aircraft", strike out "$40,000,000" and insert "$44,600,000".

Mr. YARBOROUGH. The first item is similar to the one previously explained. The second item restores $4,600,000 to the Secret Service for personnel to protect the office of the President, presidential candidates for nomination, and so forth, and we felt that what the group presented showed this protection was necessary.

The PRESIDING OFFICER. The question is on agreeing to the two amendments en bloc.

The amendments were agreed to.

The legislative clerk read as follows: On page 7, at the beginning of line 2, strike out "$50,000" and insert "$100,000"; and, in line 9, after the word "General", strike out "161,000,000" and insert "$163,670,000".

Mr. YARBOROUGH. That, I believe, is for confidential information and is an item under title II of the bill. We move over to the Post Office Department now. We might as well take this up by line items to save time, rather than making a general explanation.

Mr. WILLIAMS of Delaware. I have no objection to the Senator, if he wants to, considering the Post Office, title II, but I do want an explanation of the first item. I will leave it to the Senator's discretion what line items, or whether he wants to consider that section en bloc.

Mr. BOGGS. Mr. President, will the Senator yield? On page 5, I believe we have yet one amendment to take up—lines 16 and 17.

The PRESIDING OFFICER. We have covered that amendment.

Mr. BOGGS. All right. If the chairman would yield further, I at this time move that the amendments to the remaining part of the bill be considered en bloc.

The PRESIDING OFFICER. Is there objection?

Mr. YARBOROUGH. Mr. President, I think the Post Office Department should be considered separately from the Executive Office of the President.

Mr. BOGGS. That will be satisfactory.

Mr. YARBOROUGH. I have no objection to the Post Office amendments being considered en bloc.

Mr. BOGGS. I withdraw my request.

Mr. YARBOROUGH. Mr. President, in the case of the Post Office Department, the committee voted to increase the Post Office appropriations over the House bill by $18,483,000.

I personally voted against this increase in the subcommittee, but was overwhelmingly outvoted. So I offer no motion on the floor.

They stated that they needed 16,643 new positions and the House allowed an increase of $120.9 million over 1970. The House cut the budget estimate of $8,278,259,000 by $42.4 million. They requested a restoration of $36,959,000.

Since the House of Representatives passed on this bill, we are approaching a 3-month lapse due to a number of unavoidable things that delayed final consideration of the bill by the Senate through our subcommittee and full committee.

Even if all the increases asked for in the Post Office Department were justifiable, it seems to me that the amount should be cut by one-fourth because nearly 3 months have gone by. The amount should have been cut before. I personally did not think it was justifiable last year.

The Postmaster General asked for an increase of 1,122 positions in the Post Office Department and in the regional offices in 1970 over 1969. In 1969, the Post Office Department had in its regional offices and the offices of the Postmaster General a total of 8,628 positions. Last year the Postmaster General stated he was going to make the Post Office more efficient. For fiscal 1970, he asked for 1,122 additional positions. Congress granted that request, bringing the total to 9,760 positions for administration and regional operation.

After having been granted the enormous increase of 13 percent, and after having said that it was to be the most efficient operation in the history of the country, I think it has proven to be one of the most inefficient operations that we have had in history.

A citizen from my county, John H. Reagan, did a better job in the confederate union when half of the country was overrun.

The Postmaster General is now asking for 710 additional positions in addition to the 1,122 now on board. I will offer no amendment because we have so few votes to retain our position. However, since nearly one-fourth of the year has lapsed, the amount should be cut by one-fourth. The House cut some. They did not cut one-fourth because they passed the bill on April 13, I believe.

To be candid, there were only three votes in the committee to cut it back to the House committee amount.

I think it is wasteful. However, I want to explain to the Senate what we are doing here in this portion of the appropriation bill.

Mr. BOGGS. Mr. President, I move that the committee amendments be considered en bloc.

Mr. YARBOROUGH. Mr. President, I object. I have no objection to all of the Post Office amendments being considered en bloc.

Mr. BOGGS. I beg the Senator's pardon. I move that the remaining committee amendments in the Post Office section be considered and agreed to en bloc.

The PRESIDING OFFICER. Without

objection, the amendments will be considered and agreed to en bloc.

The amendments agreed to en bloc are as follows:

On page 7, at the beginning of line 2, strike out "$50,000" and insert "$100,000"; and, in line 9, after the word "General", strike out "$161,000,000" and insert "$163,670,000".

On page 7, line 15, after "3109", strike out "$60,000,000" and insert "$65,675,000".

On page 8, at the beginning of line 1, strike out "$6,500,000,000" and insert "$6,517,138,000".

On page 8, line 15, after the word "mail", strike out "$655,000,000" and insert "$659,000,000".

On page 8, line 21, after the word "Government", strike out "$255,000,000" and insert "$259,000,000".

On page 9, line 9, after the word "of", strike out "$400" and insert "$800"; and, in the same line, after the word "vehicle", strike out "$217,000,000" and insert "$219,000,000".

On page 10, line 2, after the word "amended", strike out "$269,825,000" and insert "$252,825,000".

Mr. BOGGS. Mr. President, with the permission of the Senator from Texas, I send to the desk a technical amendment on page 8 to the Post Office section of the bill.

The PRESIDING OFFICER. The Chair is advised that it will require unanimous consent to consider that floor amendment before all committee amendments have been agreed to.

Mr. BOGGS. Mr. President, I ask unanimous consent that this technical amendment be considered and agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment will be stated by the clerk.

The legislative clerk read as follows:

On page 8, line 5, strike out "Bureau of the Budget" and insert in lieu thereof: Office of Management and Budget.

The amendment was agreed to.

Mr. YARBOROUGH. Mr. President, I turn now to title IV of the bill—Independent Agencies. This involves the Administrative Conference of the United States, the Advisory Commission on Intergovernmental Operations, and the Tax Court of the United States.

The committee recommended an increase of $288,000 for the Tax Court. House Document 91–305, dated April 13, 1970, was received in the Senate as it was too late for House consideration. The $288,000 added by the Senate provides for personnel, travel, and related expenses incurred by the Tax Court in carrying out its new small case procedure responsibilities. We passed a Small Case Procedures Act for the Tax Court to bring the court closer to the people.

I move that that increase of $288,000 be approved.

Mr. BOGGS. Mr. President, I concur.

The amendment was agreed to, as follows:

On page 15, line 24, after the word "services", strike out "$3,000,000" and insert "$3,288,000".

Mr. YARBOROUGH. Mr. President, reverting to title III, the Executive Office of the President, I feel that I should call the attention of the Senate to some matters. I shall not make a motion, although I have grave reservations about some of them. We have discussed these matters in the committee. They have been voted on in the committee. That is the reason that I offer no amendment at this time.

I point out that the White House office had a budget obligational authority last year of $3,940,000. This year it is $8,550,000, an increase of $4,610,000 to operate the White House office, more than double the year before.

The reason given was that this was so as to have an honest accounting, that in the past people had been assigned from the Defense Department, the Interior Department, and other departments, and were still carried on the rolls of those Departments and paid by those Departments although they were actually working in the White House.

We made some inquiry into this matter. We were told that situation would have to continue, that some people were assigned for 3 or 4 months from the Defense Department and that they have an accounting problem concerning their status and transferring them over and the White House makes it a temporary rotating thing.

There has been a vast increase in the number of personnel. The White House has moved from the old State Department Building, Treasury Building, and War Department Building and is occupying other buildings around Lafayette Square. I talked to the distinguished Senator from Georgia (Mr. RUSSELL) about this matter. He is chairman of the Committee on Appropriations. Apparently there is a longstanding understanding that they do not question our appropriation request as pertains to the Congress and we do not stop their appropriations.

However, I call to the attention of the Senate that this is more than double the amount for the year before for the same President to run the White House.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. YARBOROUGH. I yield.

Mr. PROXMIRE. Is the Senator saying that the expenses of the White House will be more than doubled in the coming year on the basis of the recommendation of the present administration?

Mr. YARBOROUGH. That is what the figures here indicate. However, the administration contends it will not be.

They state that what they are doing is taking people detailed to the White House from the different bureaus and agencies of the Government, such as the Department of Defense and of the Department of Interior, and that they will be paying them from the White House allowance instead of having them paid by the Department of Interior or the Department of Defense.

Mr. PROXMIRE. Mr. President, this is a very important point. I have great respect for President Nixon and I have said so in my State and elsewhere, and I will continue to do so. But the President made a big issue of economy in Government. Economy must start at the top, if there is to be a believable example for the rest of the country.

As I understand what the Senator has said, the Administration's explanation is that while the cost has doubled, they are no longer borrowing personnel from other offices.

Mr. YARBOROUGH. The Senator is correct.

Mr. PROXMIRE. Did the committee have an opportunity to determine how many people they have borrowed? Was the committee able to determine how much they have gotten in terms of help from other Departments? Second, what kind of report will there be to the country and the Congress, which I think they deserve, as to how this will be true economy, or whether the White House will continue to borrow personnel and add to this expense?

Mr. YARBOROUGH. I cannot answer that because we could not get the hard facts since it is in futuro.

Mr. PROXMIRE. It is not in futuro that they have been borrowing personnel.

Mr. YARBOROUGH. No. I am going to talk about that.

In fiscal 1970 there were 208 personnel funded or paid by the White House; 95 funded out of special project funds and there were detailed from other Federal agencies 273, which is more than the regular employees in the White House.

They expect during fiscal year 1971 to hire or fund 548 regulars from the $8,550,000; that they will have that many regulars.

I am told by knowledgeable people that certain people are detailed from the Department of Defense on a rotating basis every 2 or 3 months and they do not believe it will be feasible or that it will happen. But we do not know until it is happening if it will continue. They say it will not, but they put these people on the payroll and they pay them.

Mr. PROXMIRE. When are those people detailed from other agencies to the White House? When will their services cease so we can follow up to determine whether the White House eliminates them?

Mr. YARBOROUGH. We do not know what date this change would take effect. Presumably it would take effect when it is signed. We tried to put in some control over that. Next year you can, as the Senator is on the committee.

The committee has recommended a commensurate decrease in personnel expenditures by the departments and agencies. If they increase this by $4,610,000, we expect the other agencies to cut their budgets accordingly if the 548 are really to be paid by the White House.

Mr. PROXMIRE. Have there been reports in the past on the personnel they borrow?

Mr. YARBOROUGH. No. One reason we held up the hearings on this matter was that it took me many weeks to get a detailed list.

Mr. PROXMIRE. Will it be possible in the future for Congress to get such a list?

Mr. YARBOROUGH. I think we should. I did receive one, but we had nothing to compare it with. They surrendered this very grudgingly and we understand why. They said that none of their predecessors had filed one.

Mr. PROXMIRE. The Senator is now making legislative history that it is his understanding that the White House in the future will indicate to the committees of Congress when they come up for appropriations the personnel they borrowed from the agencies during the year so we can determine if this is an additional or substitute expenditure.

Mr. YARBOROUGH. I do not know if they promised what they would do in the future. That will be up to the next committee. We got their commitment that they are going to put them on the White House payroll and not detail them from the departments.

I have talked to people who have said it cannot be done on the rotating policy of the Department of Defense; that due to the status of these people, if they were sent on a 2- or 3-month detail, it could not happen.

Mr. PROXMIRE. It seems to me that the country, Congress, and the President would be better served if this were all made public and clear to Congress, the Committees on Appropriation, and the public as to how many people are being used from other departments as time goes on so we can have an accounting, know the situation, and be able to determine it.

Mr. YARBOROUGH. I have a detailed accounting. That is one reason this bill was so late in reaching the floor of the Senate. We demanded it and the White House furnished it reluctantly. They said none of their predecessors had furnished it. One can understand why they were reluctant.

We did not do this to humiliate the White House. When the White House is denouncing Congress for being spendthrift and they say, "Give us a 100-percent increase to run the White House and to raise the number of employees to 548 a year," I felt I was entitled to an explanation. We received a detailed breakdown, and I have it here for the fiscal year 1970.

Mr. PROXMIRE. The chairman is absolutely correct that the circumstances are unusual. I do not think we ever had a situation where we have doubled the amount. Under these circumstances it is proper and right to require a more meticulous and complete accounting.

I congratulate the Senator and I hope we can follow up in the next year to determine the extent to which this was a substitute and the extent to which there was a substantial increase for the White House.

This is important because, after all, Congress and the American people should and must look to the President to set an example in the area of economy.

Mr. YARBOROUGH. I will state why I had misgivings. I shall read certain questions and answers from the hearing record. Mr. Schlesinger was the witness, and he was asked the following questions:

Senator YARBOROUGH. How many military personnel are assigned to the White House on full-time and how many on part-time basis?

Mr. SCHLESINGER. Approximately 170 military personnel are detailed to the White House.

Senator YARBOROUGH. Are they funded out of the funds requested here?

Mr. SCHLESINGER. No, sir.

Senator YARBOROUGH. Then, that is another group which I assume covers the Navy mess personnel, that is not funded out of the amount requested here, in addition to the Secret Service and White House Police, some postal employees, some Interior Department personnel, and employees of other branches of the Government.

Mr. SCHLESINGER. Yes, Mr. Chairman, that is correct.

Senator YARBOROUGH. Well, if you had to pay for all of those out of this appropriation request, that would be one thing, but if these salaries are paid out of other appropriations, you narrow this sum down. If the special projects request for $1.5 million is kept at that level, this becomes a matter of economy, it seems to us.

Mr. SCHLESINGER. The appropriation deals with the White House Office narrowly defined. It does not include certain other agencies located within the Executive Office of the President. For example, the National Security Council has military personnel detailed to it. This does not cover them, but the White House Office does not include those personnel. Any individuals who are part of the ordinary White House Office will be covered by this appropriation.

Senator YARBOROUGH. Now, if this appropriation is adopted this way, for example, the consolidation that the Bureau of the Budget is presenting here, will the White House continue to have personnel detailed on a permanent basis from other agencies after that?

Mr. SCHLESINGER. There will be personnel on temporary assignment, but the practice in the past of permanently assigning people to the White House will be ended.

So we will have this temporary type we have been talking about rotated, but they claim them as permanent personnel.

It took a considerable time after the hearings to get the breakdown of the 548. We have just broken the ice on this. As I have said, we were not attempting to heckle the White House, but the reason we did it was that the Congress has been accused by being spendthrift. I know I have heard it in my State. But the great economizers say they want to approximately double the amount, from $3,940,000 to $8,550,000. I felt we were entitled to an explanation, and this is the explanation we received. But the White House had no figures to compare with them in the past. I do not blame them for being reluctant to furnish figures that their predecessors did not have to. Nobody should blame them for having that reluctance to furnish the breakdown of personnel. I do not blame them for it. I am not going to put that in the RECORD unless a Senator especially requests that it be put in the RECORD.

There is another item, Special Assistance to the President. This is a new item for the Vice President and is $700,000 more than had previously been provided. The only way I could see to keep them from using any number to help them in running for reelection was to provide a ceiling of 39 positions. My fellow Texan, formerly in the White House, was not known as being a modest person in asking for help. Neither was Vice President Humphrey or Vice President Nixon. We had three aggressive vice presidents. But this is an item of 39 new positions, and provides $700,000 for these positions. We have not had an emergency requiring that help. I did not see the proof made for that need as a necessary item, and I offered two amendments in the subcommittee and full committee. They were voted down. So I did not think it was incumbent on me to offer those amendments to the bill on the floor.

Mr. PROXMIRE. How many staff members does the Vice President have now?

Mr. BOGGS. Mr. President, will the manager of the bill yield to me?

Mr. YARBOROUGH. I yield.

Mr. BOGGS. May I suggest that there may be an answer on page 1256 of the hearing record. I read:

Senator YARBOROUGH. But he has had these assistants all along?

Mr. SCHLESINGER. He has.

Senator YARBOROUGH. How many assistants does the Vice President have assigned to him full time now, exclusive of the legislative staff, as Chairman of the National Aeronautics and Space Council, as a member of the National Security Council, and all of these chairmanships, vice chairmanships, and memberships? How many personnel are now assigned full time to him downtown?

Mr. SCHLESINGER. The average number, Mr. Chairman, is 39.

So he is not asking for new personnel. These 39 have been assigned from other agencies and, as pointed out in the colloquy, for the first time an effort is being made to designate where they come from and where they are going.

Mr. PROXMIRE. As I understand it, the Vice President has a legislative staff and he has a number of staff assistants. He has the assistance of the staff members of the various commissions on which he serves if he is working with a particular commission. Is that correct or am I misinformed?

Mr. BOGGS. I understand he has a total of 39. He may have the assistance of the staff members of the various commissions, but they are not assigned to him. They are assigned to the commissions.

Mr. PROXMIRE. In some cases he is chairman of a commission, in which case I assume he can use that staff member for any work of the commission.

Mr. BOGGS. I assume so.

Mr. PROXMIRE. In addition, he has a legislative staff. In addition, it appears, as the Senator from Delaware has said, that he has 39 people who are paid by other departments, but whom he uses.

Mr. BOGGS. That is correct.

Mr. YARBOROUGH. He has 28 assistants on the legislative staff. That does not include secretaries. They are 28 staff members.

Here are the functions that have developed upon the Vice President beginning some years ago. Here is the total number of functions assigned to the Vice President:

Chairman of the National Aeronautics and Space Council.

Chairman of the National Council on Marine Resources and Engineering Development.

Member of the National Security Council.

Member of the Council for Urban Affairs.

Member of the Council for Rural Affairs.

Presidential liaison with State and local officials and supervision of the Office of Intergovernmental Relations.

Vice Chairman of Environmental Quality Council.

Chairman of the Cabinet Committee on School Desegregation.

Chairman of the President's Council on Youth Opportunity.

Chairman of the National Council on Indian Opportunity.

Chairman of the President's Council on Physical Fitness and Sports.

Member of the National Advisory Council of the Office of Economic Opportunity.

Member of the Cabinet Committee on Economic Policy.

Member of the President's Cabinet and acts as chairman when the President is absent.

Mr. PROXMIRE. On each of the commissions on which the Vice President serves as chairman, he has the staff to assist him when he is working for that particular commission. When he is a member of the commission, he has a staff to assist him while doing work for that commission.

Mr. YARBOROUGH. That is correct, like the Environmental Quality Council or the Council on Youth Opportunity. He has 39 staff members and he can assign them to do the work he wants done. Sometimes these councils are created by law, such as the National Advisory Council of the Office of Economic Opportunity. Many of them are created by Executive order. I have omitted the number. Many, like the Cabinet Committee on School Desegregation, are designations by the President without Executive order. Most are by Executive orders or law, beginning with the National Security Act of 1947. So he has a staff. They can serve him on commissions on which he serves.

Taking these 39 and establishing these positions is something new.

Mr. PROXMIRE. We know that the Vice President is a very effective political force. Many people feel he is a more effective political figure than any other person except the President. In fact, as far as many in my State of Wisconsin are concerned, there is no more popular figure than Vice President Agnew. I say that with respect and sincerity. At the same time, if he is going to get 39 staff people entirely assigned to him, as the chairman of the subcommittee has indicated, we ought to have some assurance that they will not be used solely to assist the Vice President in his tremendously effective political work, which many of us in the Senate have reason to disapprove.

I am one of a number of Democratic Senators up for election this year. I am wondering what protection we have in seeing that these 39 employees will be used for constructive work on behalf of the taxpayer and not primarily for political work.

Mr. YARBOROUGH. Well, we Democrats are in the majority in each House, and it seems to me that to give the Vice President 39 more assistants to turn loose on the Democrats, who are acting as though they were a little bit tired of being leaders and chairmen, anyway, or are just tired, if we give him 39 men to beat them with, he might well do it.

Mr. PROXMIRE. Does the Senator from Texas conclude that there is a restraint on the 39 people who are now assigned to the Vice President from other agencies, which restraint would be absent if we agreed to this amendment and provided the 39 people directly to the Vice President?

Mr. YARBOROUGH. That is my interpretation of what we are doing here. If there is any disagreement on it, I invite it, if Senators think it is in error. I see no restraint on the Vice President if we adopt the amendment.

Mr. BOGGS. Mr. President, will the chairman yield?

Mr. YARBOROUGH. I yield.

Mr. BOGGS. Mr. President, I might say that these 39 employees, as I pointed out to the Senator from Wisconsin, reading from the record, are already employees assigned to the Vice President's office, and they are all scheduled employees under——

Mr. PROXMIRE. Civil service?

Mr. BOGGS. Civil service, that is correct; and they are not participating in any fanciful or imaginary political program.

Mr. PROXMIRE. These 39 employees to be provided by this bill——

Mr. BOGGS. They are the same 39 people.

Mr. PROXMIRE. Would they be under civil service, under the Hatch Act?

Mr. YARBOROUGH. I just do not believe the Vice President's assistants, assigned to him by Congress, are going to be under any Hatch Act.

Mr. BOGGS. But these assigned to him now from various departments——

Mr. PROXMIRE. Are now under the Hatch Act, but if they are assigned directly to him——

Mr. BOGGS. They will all be scheduled civil service employees except one, I understand.

Mr. PROXMIRE. And would be under the Hatch Act?

Mr. BOGGS. That is correct.

Mr. PROXMIRE. Is that in accordance with the understanding of the chairman?

Mr. YARBOROUGH. I would say under the law, as scheduled employees, they would be under the Hatch Act.

Mr. BOGGS. They would be under schedule C civil service rating, schedule A and schedule C, and would, therefore, have to be. They are not an additional 39 employees.

Mr. YARBOROUGH. I think we ought to make this record right here, then, before we vote on the remaining amendments. I think we ought to make it clear that it is the interpretation of the Senate that these are scheduled employees.

Mr. BOGGS. Schedule A and C employees.

Mr. YARBOROUGH. I offer in evidence at this time, from page 1260 of the hearings record, the consolidated schedule of permanent positions paid from funds available for special assistants to the President, with the detail of personnel compensation.

Is that the list?

Mr. BOGGS. That is the list.

Mr. YARBOROUGH. I ask unanimous consent that that list be printed in the RECORD at this point, with the understanding that these are scheduled employees under civil service, and that all except that one at the executive level, at $42,500, will be under the Hatch Act, and cannot participate in political activities.

Mr. BOGGS. That is what I understand.

There being no objection, the schedule was ordered to be printed in the RECORD, as follows:

CONSOLIDATED SCHEDULE OF PERMANENT POSITIONS PAID FROM FUNDS AVAILABLE FOR SPECIAL ASSISTANCE TO THE PRESIDENT—DETAIL OF PERSONNEL COMPENSATION

03-22-1454-0-1-903	1969 actual, number	1970 estimate, number	1971 estimate, number
GRADES AND RANGES			
Executive level II, $42,500			1
GS-18, $33,495			1
GS-17, $28,976 to $32,840			2
GS-16, $25,044 to $31,724			1
GS-14, $18,531 to $24,093			3
GS-13, $15,813 to $20,555			1
GS-12, $13,389 to $17,403			1
GS-9, $9,320 to $12,119			4
GS-7, $7,639 to $9,934			8
GS-6, $6,882 to $8,943			7
GS-5, $6,176 to $8,030			4
GS-4, $5,522 to $7,178			2
GS-3, $4,917 to $6,393			4
Total permanent positions			39
Unfilled positions, June 30			
Total permanent employment, end of year			39

Mr. YARBOROUGH. That includes the writing of the political speeches for the Vice President. That is a political activity.

Mr. BOGGS. I do not know what a political activity consists of, Mr. President.

Mr. YARBOROUGH. Well, that is a political activity.

Mr. BOGGS. I do not know what is a political speech.

Mr. YARBOROUGH. You can tell when the Vice President makes a speech whether it is political or not. He does not leave any doubt about it; you are not under any illusions, when he makes a speech.

Mr. BOGGS. But that schedule is a part of the hearing record. I ask that it be made a part of this RECORD also.

Mr. YARBOROUGH. And that is the agreement and understanding as to the meaning of this provision on the part of both the floor manager of the bill and the able and distinguished Senator from Delaware, who faithfully sat through all these hearings and took a very beneficial and active part on this legislation. I want to compliment the Senator for being there at all times, and for his diligent work.

Mr. BOGGS. I thank the Senator.

Mr. PROXMIRE. Is it the Senator's understanding that this means these 39 people could not act in any campaign capacity, such as advance man, writing releases, soliciting funds, or any of these other capacities which are obviously, distinctly, and peculiarly political?

Mr. YARBOROUGH. Certainly soliciting funds is taboo, at the beginning, right off, under the Hatch Act.

Mr. BOGGS. They would be under scheduled civil service regulations, just as any other employee would be.

Mr. YARBOROUGH. The first thing a scheduled employee cannot do is solicit funds.

Mr. PROXMIRE. These other activities could be damaging, too. The Vice President does not need much help in soliciting funds. There are few people in recent years who can solicit the way he can.

Mr. YARBOROUGH. As successfully, the Senator might say.

The PRESIDING OFFICER. The clerk will read the next committee amendment.

Mr. BOGGS. Mr. President, I move that the remaining committee amendments be agreed to en bloc.

The PRESIDING OFFICER. Does the Senator ask unanimous consent that the remaining amendments be considered en bloc?

Mr. BOGGS. Yes.

The PRESIDING OFFICER. Without objection, the remaining committee amendments are considered and agreed to en bloc.

The amendments agreed to en bloc are as follows:

On page 13, line 18, after "$350,000", strike out "to remain available until expended,".

On page 14, line 13, strike out "BUREAU OF THE BUDGET" and insert "OFFICE OF MANAGEMENT AND BUDGET"

On page 14, line 16, after the word "the", strike out "Bureau of the Budget" and insert "Office of Management and Budget".

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. BOGGS. Mr. President, I send to the desk an amendment, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows: On page 16, after line 2, insert the following:

"TITLE V—FUNDS APPROPRIATED TO THE PRESIDENT

"Protection of visiting foreign dignitaries attending the observance of the 25th anniversary of the United Nations

"For expenses necessary to enable the President, through such officers or agencies of the Government as he may designate, and without regard to such provisions of law regarding the expenditure of Government funds as he may specify, to provide adequate security protection to foreign heads of state and other foreign dignitaries while visiting in the United States during or in connection with the 25th anniversary of the founding of the United Nations, $1,650,000."

And on page 16, line 3, strike out "Title V" and insert: "Title VI."

And on page 16, line 4, strike out "SEC. 501." and insert "SEC. 601."

Mr. BOGGS. Mr. President, I would like to give a short explanation of this amendment. We have just received this morning a message to the President of the Senate for the President of the United States requesting an appropriation of $1,650,000 to pay expenses for protection of visiting foreign dignitaries who will be attending the observance of the 25th anniversary of the United Nations. It is expected that about 60 heads of state will be at the United Nations in New York in October and some may arrive in late September. While the executive branch has been aware of the need to provide additional protection under the laws of the land for these official foreign visitors, it had not been decided whether to provide for the extraordinary expenses of additional protection by deficiency funding or a request for a special supplemental appropriations bill. This has caused the delay which resulted in our not receiving this budget request before the Appropriations Committee on Treasury and Post Office met in executive session to mark up the bill now before the Senate.

I think it should be made clear that the $1,650,000 requested is not for the salaries of any additional personnel; it is solely for the travel and other related expenses which will be incurred by the U.S. Secret Service and other agents and agencies of the Government in connection with the assignment of special protective personnel to the task of protecting the visiting heads of state. I understand that the assignment of such personnel will commence in early September and, therefore, there is an urgency for the passage of this appropriation.

Mr. President, I move that the amendment be adopted.

Mr. YARBOROUGH. Mr. President, I accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Delaware.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. YARBOROUGH. Mr. President, if there are no further amendments to be proposed, I suggest a third reading of the bill.

Mr. GRIFFIN. Mr. President, will the Senator withhold that request, and have a quorum call? The Senator from Delaware (Mr. WILLIAMS) is on the phone.

Mr. YARBOROUGH. Does he have an amendment?

Mr. GRIFFIN. He may have. I do not know.

Mr. YARBOROUGH. Then, Mr. President, I withdraw my request for third reading, and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BOGGS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOGGS. Mr. President, the legislation before this body, H.R. 16900, Treasury post office and section of appropriation bill 1971, is a responsible and a responsive appropriations bill, I believe.

It is responsive to our overheated economy in that it does not appropriate any more money than necessary to operate the departments and offices involved efficiently. It is responsive to the needs of the taxpayers in that it provides a sound basis on which those agencies can operate effectively.

This is milestone legislation in one important aspect. It marks the last time the Post Office Department will come before the Congress with a budget request amounting in the billions of dollars.

As we all know, this body on June 30 voted 86 to 11 to create the U.S. Postal Service and give it great latitude in its own operation. Under that legislation, the Postal Service, beginning in fiscal year 1972, will be entitled to an appropriation of only 10 percent of the 1971 figure, amounting to about $825 million if this bill becomes law as now written. That 10 percent was designed to cover the vital public service costs of the mail system.

There are four titles to this bill, of which the Post Office Department is the second. This bill would appropriate $8,235,825,000 for the operation of that Department during fiscal year 1971. That figure is $272,806,000 more than in fiscal year 1970, but $42,434,000 below the budget estimates for fiscal year 1971.

It must be noted that the Department expects to realize $6,521,000,000 in revenues during the year, fixing out-of-pocket expenses at $1,714,825,000.

The increase in the 1971 appropriation amounts to about 3.4 percent of the 1970 budget. Measured against an expected 3-percent increase in mail volume during the year, this leaves a small margin for improvement of vital services.

Title I of the bill appropriates $1,222,122,000 for the Department of the Treasury. This figure is $54,660,000 more than last year, but $30,429,000 below the budget estimates for this year.

There are several noteworthy items in title I.

First, it includes $5 million for first-phase construction of the Federal Law Enforcement Training Center in Beltsville, Md. This center, when completed, will conduct recruit, advanced, specialized and refresher training for enforcement personnel of participating agencies.

Second, the bill provides $135.5 million for the Bureau of Customs, $10,369,000 more than in fiscal year 1970. This appropriation, I believe, is vital if we are ever to cut down on the flow of narcotics into this country and to lessen the customs congestion at our major ports of entry.

Finally, title I provides $890.5 million for the Internal Revenue Service, an increase of $31,143,000 over fiscal year 1970. This appropriation is vital, I believe, if the IRS is to provide prompt refunds and other taxpayer services and to assure compliance with the law.

Title III of the bill provides $30,765,000 for operation of the Executive office of the President. This is $5,451,000 higher than fiscal year 1970, but $190,000 below the budget estimates.

This budget represents an effort by the administration to produce a realistic budget document. It attempts to bring more full accountability into the budget process and to eliminate everywhere possible the reliance upon personnel loaned from other agencies.

And finally, title IV provides funds for several small independent agencies. It would appropriate $3,990,000 for the operation of the Administrative Conference of the United States, the Advisory

Commission on Intergovernmental Relations, and the U.S. Tax Court.

In summation, Mr. President, this bill would appropriate $9,537,429,000 to the agencies involved in fiscal year 1971. That figure is $374,892,000 more than appropriated for fiscal year 1970, but $28,614,000 below the budget estimates for the current year.

I take this opportunity to especially compliment the distinguished chairman and manager of the bill, the Senator from Texas (Mr. YARBOROUGH), on the very fine job he has done and on his attention to his assignment as chairman of this important subcommittee. It has been a pleasure to work with him.

I also wish especially to compliment the members of the Appropriation Committee staff, particularly Mr. Joseph Gonzales, Mr. Clark, and the other members of the staff who worked with them and have been so helpful, for their fine contributions.

Mr. YARBOROUGH. Mr. President, I appreciate the remarks of the distinguished Senator from Delaware, and wish to express my appreciation to him.

In scheduling hearings on the bill, we never had any problem about time insofar as he was concerned. He held himself available at all times, and, as I think has come out here in colloquy about some of the reasons for the delay as we discussed this transfer of funding, a different way of paying the personnel for President and Vice President, we have had a number of things to iron out. They have all been successfully ironed out, and the Senator from Delaware, with his unfailing courtesy, has assisted and was generous in all matters.

I have had the privilege of serving with the Senator from Delaware for years on the Post Office and Civil Service Committee, in addition to the Appropriations Committee, and it has always been a pleasure to serve with him. I would like to add that he hunts in my State, and, now that I am going to have the opportunity to move back there, I hope to have the pleasure of hunting with him in the future.

Mr. BOGGS. I thank the Senator very much.

Mr. YARBOROUGH. Mr. President, if there are no further amendments, I suggest third reading.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendments to be proposed, the question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 16900) was read the third time.

The PRESIDING OFFICER (Mr. HART). The bill having been read the third time, the question, is, Shall it pass?

Mr. WILLIAMS of Delaware. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is, Shall the bill pass? On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Nevada (Mr. CANNON), the Senator from Connecticut (Mr. DODD), the Senator from Mississippi (Mr. EASTLAND), the Senator from Oklahoma (Mr. HARRIS), the Senator from Indiana (Mr. HARTKE), the Senator from Hawaii (Mr. INOUYE), the Senator from North Carolina (Mr. JORDAN), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Montana (Mr. METCALF), the Senator from Minnesota (Mr. MONDALE), the Senator from Utah (Mr. MOSS), the Senator from Georgia (Mr. RUSSELL), the Senator from Mississippi (Mr. STENNIS), the Senator from Maryland (Mr. TYDINGS), and the Senator from Ohio (Mr. YOUNG) are necessarily absent.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON) would vote "yea."

Mr. GRIFFIN. I announce that the Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senators from Colorado (Mr. ALLOTT and Mr. DOMINICK), the Senator from Tennessee (Mr. BAKER), the Senators from Arizona (Mr. FANNIN and Mr. GOLDWATER), the Senator from Hawaii (Mr. FONG), the Senators from New York (Mr. GOODELL and Mr. JAVITS), the Senator from Florida (Mr. GURNEY), the Senator from California (Mr. MURPHY), the Senator from Oregon (Mr. PACKWOOD), the Senators from Illinois (Mr. PERCY and Mr. SMITH), the Senator from Alaska (Mr. STEVENS), and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

I further announce that, if present and voting, the senior Senator from Colorado (Mr. ALLOTT), the junior Senator from Colorado (Mr. DOMINICK), the Senator from Arizona (Mr. FANNIN), the Senator from Hawaii (Mr. FONG), the Senator from South Dakota (Mr. MUNDT), the Senator from California (Mr. MURPHY), the Senators from Illinois (Mr. PERCY and Mr. SMITH), the Senator from Alaska (Mr. STEVENS), and the Senator from North Dakota (Mr. YOUNG) would each vote "yea."

The result was announced—yeas 68, nays 0, as follows:

[No. 283 Leg.]

YEAS—68

Aiken	Gore	Muskie
Allen	Gravel	Nelson
Bayh	Griffin	Pastore
Bellmon	Hansen	Pearson
Bennett	Hart	Pell
Bible	Hatfield	Prouty
Boggs	Holland	Proxmire
Brooke	Hollings	Randolph
Burdick	Hruska	Ribicoff
Byrd, Va.	Hughes	Saxbe
Byrd, W. Va.	Jackson	Schweiker
Case	Jordan, Idaho	Scott
Church	Kennedy	Smith, Maine
Cook	Long	Sparkman
Cooper	Magnuson	Spong
Cotton	Mansfield	Symington
Cranston	Mathias	Talmadge
Curtis	McClellan	Thurmond
Dole	McGee	Tower
Eagleton	McGovern	Williams, N.J.
Ellender	McIntyre	Williams, Del.
Ervin	Miller	Yarborough
Fulbright	Montoya	

NAYS—0

NOT VOTING—32

Allott	Gurney	Murphy
Anderson	Harris	Packwood
Baker	Hartke	Percy
Cannon	Inouye	Russell
Dodd	Javits	Smith, Ill.
Dominick	Jordan, N.C.	Stennis
Eastland	McCarthy	Stevens
Fannin	Metcalf	Tydings
Fong	Mondale	Young, N. Dak.
Goldwater	Moss	Young, Ohio
Goodell	Mundt	

So the bill (H.R. 16900) was passed.

Mr. YARBOROUGH. Mr. President, I move that the vote by which the bill was passed be reconsidered.

Mr. BOGGS. Mr. President, I move that the motion to reconsider be laid on the table.

The motion to lay on the table was agreed to.

Mr. YARBOROUGH. Mr. President, I move that the Senate insist on its amendments and request a conference with the House of Representatives on the disagreeing votes thereon and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. YARBOROUGH, Mr. BYRD of West Virginia, Mr. MCGEE, Mr. MONTOYA, Mr. BOGGS, Mr. ALLOTT, and Mr. FONG conferees on the part of the Senate.

AUTHORIZATION FOR CERTAIN ACTIONS TO BE TAKEN DURING THE LABOR DAY RECESS

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that Senate committees be authorized to report bills, together with minority, supplemental, and individual views on Friday, September 4, 1970, between the hours of 9 a.m. and 1 p.m. o'clock, during the Labor Day recess.

I also ask unanimous consent that the Secretary of the Senate be authorized to receive messages from the President of the United States and the House of Representatives and that the President pro tempore and Acting President pro tempore be authorized to sign duly enrolled bills during the adjournment of the Senate during the Labor Day holiday until September 8.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADJUSTMENT OF GOVERNMENT CONTRIBUTION WITH RESPECT TO HEALTH BENEFITS COVERING FEDERAL EMPLOYEES AND ANNUITANTS—ENTRY OF MOTION TO RECONSIDER

Mr. BYRD of West Virginia. Mr. President, I enter a motion to reconsider the vote by which H.R. 16968 was passed earlier today and I move that the Secretary of the Senate be instructed to request the House of Representatives to return the message on that bill to the Senate.

The PRESIDING OFFICER. The motion to reconsider is entered, and without objection, the motion to instruct the Secretary of the Senate is agreed to.

MILITARY PROCUREMENT AUTHORIZATIONS—ADDITIONAL COSPONSOR OF AMENDMENT

Mr. BYRD of West Virginia. Mr. President, at the request of the majority leader, the Senator from Montana (Mr. MANSFIELD), I ask unanimous consent that his name be added as a cosponsor of the amendment of the Senator from New Hampshire (Mr. MCINTYRE), which was adopted by the Senate on Friday last to the military procurement authorization measure. Through inadvertence, there was a failure to request that the Senator's name be added as a cosponsor at the time when he spoke in favor of the proposal which embraced section 203 of last year's act and the new section 207. The amendment was on page 14, immediately above line 19, of the military procurement authorization bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD of West Virginia. At the request of the majority leader, I ask unanimous consent that the Journal and the permanent RECORD reflect this cosponsorship.

The PRESIDING OFFICER. Without objection, it is so ordered.

FEDERAL SHARE INSURANCE FOR CREDIT UNIONS

Mr. BYRD of West Virginia. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 1140, S. 3822. I do this so that it will become the pending business, with no action to be taken on it today.

The PRESIDING OFFICER (Mr. HART). The bill will be stated by title.

The legislative clerk read as follows:

S. 3822, to provide insurance for member accounts in State and Federally chartered credit unions, and for other purposes, reported with amendments.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

ADJOURNMENT UNTIL 9 A.M. TOMORROW

Mr. BYRD of West Virginia. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in adjournment until 9 a.m. tomorrow.

The motion was agreed to; and (at 6 o'clock and 9 minutes p.m.) the Senate adjourned until tomorrow, Wednesday, September 2, 1970, at 9 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate September 1, 1970:

DIPLOMATIC AND FOREIGN SERVICE

Dwight Dickinson, of Rhode Island, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Togo.

Emory C. Swank, of the District of Columbia, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Cambodia.

Nicholas G. Thacher, of California, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Kingdom of Saudi Arabia.

L. Dean Brown, of the District of Columbia, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Hashemite Kingdom of Jordan.

INTERNATIONAL MONETARY FUND

Charles R. Harley, of Maryland, to be U.S. Alternate Executive Director of the International Monetary Fund for a term of 2 years.

ASIAN DEVELOPMENT BANK

Artemus E. Weatherbee, of Maine, to be U.S. Director of the Asian Development Bank.

DEPARTMENT OF LABOR

Laurence H. Silberman, of Hawaii, to be Under Secretary of Labor.

Peter G. Nash, of New York, to be Solicitor for the Department of Labor.

U.S. ARMY

The following-named officer, under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

To be general

Lt. Gen. Frederick Carlton Weyand, [redacted] Army of the United States (major general, U.S. Army).

Gen. James Karrick Woolnough, [redacted] Army of the United States (major general, U.S. Army), to be placed on the retired list in the grade of general, under the provisions of title 10, United States Code, section 3962.

IN THE AIR FORCE

The nominations beginning with William J. Corrigan, to be major, and ending Alfred C. Schultz, to be 2d lieutenant, which nominations were received by the Senate and appeared in the Congressional Record on Aug. 10, 1970; and

The nominations beginning Rallin J. Aars, to be captain, and ending Thomas D. Edmonds, to be 2d lieutenant, which nominations were received by the Senate and appeared in the Congressional Record on Aug. 10, 1970.

IN THE ARMY

The nominations beginning Alice M. Tate, to be captain, and ending Martin B. Woodruff, to be 2d lieutenant, which nominations were received by the Senate and appeared in the Congressional Record on Aug. 10, 1970;

The nominations beginning Joseph Y. Kurata, to be lieutenant colonel, and ending Michael C. Egan, to be 2d lieutenant, which nominations were received by the Senate and appeared in the Congressional Record on Aug. 10, 1970; and

The nominations beginning Lester W. Abrams, to be colonel, and ending Leroy J. Rosenberg, to be captain, which nominations were received by the Senate and appeared in the Congressional Record on Aug. 19, 1970.

IN THE NAVY

The nominations beginning Joel H. Ross, to be ensign, and ending Robert C. Wisser, to be a permanent lieutenant and a temporary lieutenant commander, which nominations were received by the Senate and appeared in the Congressional Record on Aug. 7, 1970; and

The nominations beginning William Walter Aabye, to be lieutenant, and ending Mary Elizabeth Wuest, to be lieutenant, which nomination was received by the Senate and appeared in the Congressional Record on Aug. 10, 1970.

IN THE MARINE CORPS

The nomination of James H. King, Jr., to be 2d lieutenant in the Marine Corps, which nominations was received by the Senate and appeared in the Congressional Record on Aug. 7, 1970; and

The nominations beginning Kevin R. Danehy, to be captain, and ending Glenwood H. Yopp, Jr., to be 1st lieutenant, which nominations were received by the Senate and appeared in the Congressional Record on Aug. 13, 1970.

SENATE—*Wednesday, September 2, 1970*

The Senate met at 9 a.m., and was called to order by Hon. JAMES B. ALLEN, a Senator from the State of Alabama.

The Reverend Dr. Edgar J. Mundinger, pastor, Christ Lutheran Church of Washington, Washington, D.C., offered the following prayer:

O God, You have urged that prayers and petitions be made for all men. You have invited us to pray for and with one another.

We make our requests for all branches of our government and for those who are Members of this assembly. Help them to see how we depend upon Your mercy and how our strength comes down from above. Enable them to feel the oneness of the human family and to promote it. Encourage them to test the truth of human history and to learn from it. Give them the blessing of sound judgment; the skill to make wise decisions; the patience to await Your time; and then the courage to carry out Your will with dispatch.

Make us all alert to the promptings of Your spirit and ready to serve those for whom Your son died and rose again to give life in fullness and abundance, even Jesus Christ, our Lord. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication from the President pro tempore of the Senate (Mr. RUSSELL).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., September 2, 1970.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. JAMES B. ALLEN, a Sena-

tor from the State of Alabama, to perform the duties of the Chair during my absence.

RICHARD B. RUSSELL,
President pro tempore.

Mr. ALLEN thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Tuesday, September 1, 1970, be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR TRANSACTION OF ROUTINE MORNING BUSINESS WITH STATEMENTS LIMITED TO 3 MINUTES

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senator from Utah (Mr. BENNETT) has concluded his remarks on the bill which will be pending, and after passage of the bill, there be a morning hour for the transaction of routine morning business, with a time limitation of 3 minutes therein.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

FEDERAL SHARE INSURANCE FOR CREDIT UNIONS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 1140, S. 3822.

The ACTING PRESIDENT pro tempore. The clerk will state the bill by title.

The LEGISLATIVE CLERK. A bill (S. 3822) to provide insurance for member accounts in State and federally chartered credit unions and for other purposes.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Montana?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Banking and Currency with amendments, on page 2, line 12, after the word "Rico," insert a comma and "and (2) credit unions organized and operating under the jurisdiction of the Department of Defense if such credit unions are operating in compliance with the requirements of title I of this Act and regulations issued thereunder."; in line 19, after the word "union", insert "or a credit union operating under the jurisdiction of the Department of Defense."; on page 3, line 2, after the colon, insert "*Provided*, That examinations required under title I of this Act shall be so conducted that the information derived therefrom may be utilized for share insurance purposes, and examinations conducted by State regulatory agencies shall be utilized by the Administrator for such purposes to the maximum extent feasible;"; on page 4, line 6, after the word "may", strike out "acquire for protecting the interest of members" and insert "require for protecting the interest of members or to assure that all insured credit unions maintain regular reserves which are not less than those required under title I of this Act;"; in line 18, after the word "pursuant", strike out "hereto" and insert "thereto"; on page 5, after line 17, insert:

"(d) If the application of a Federal credit union for insurance is rejected, the Administrator shall suspend or revoke its charter unless, within one year after the rejection, the credit union meets the requirements for insurance and becomes an insured credit union.

At the beginning of line 23, strike out "(d)" and insert "(e)"; on page 6, line 24, after the word "of", where it appears the first time, strike out "the directors" and insert "three of the officers"; on page 7, line 8, after the word "which", insert "willfully"; after line 16, insert:

"(5) Reports required under title I of this Act shall be so prepared that they can be used for share insurance purposes. To the maximum extent feasible, the Administrator shall use for insurance purposes reports submitted to State regulatory agencies by State-chartered credit unions.

On page 11, after line 4, insert:

"(6)(A) An insured credit union which is closed for liquidation because of insolvency or otherwise is entitled to a rebate of premiums paid by it to the fund. Rebates shall be paid in accordance with regulations prescribed by the Administrator, but no payment of rebate shall be made during any period in which

"(i) a loan to the fund from the Federal Government is outstanding; or

"(ii) the Administrator determines that the payment would unduly jeopardize the financial condition of the fund.

A credit union otherwise entitled to a rebate of premiums shall not lose its entitlement because payment thereof cannot at any given time be made under the limitations prescribed in clause (i) or (ii).

"(B) The amount of rebate of premiums to which a credit union is entitled under subparagraph (A) shall be computed as follows: To the total amount of premiums paid to the fund by the credit union, plus interest on such payments at the average rate of interest earned by the fund on its assets during each of the years in which the payments were made; subtract the sum of

"(i) the credit union's prorata share of the fund's administrative expenses during the period in which the credit union had an insured status;

"(ii) the credit union's prorata share of the net insurance payments (other than those referred to in clause (iii) chargeable to the fund for claims arising during such period; and

"(iii) the net insurance payments chargeable to the fund for claims arising in connection with the liquidation of the credit union.

A credit union's prorata share of the fund's administrative expenses or net insurance payments for any year (or part thereof) shall be determined by dividing the total amount credited to member and nonmember accounts in the credit union at the end of such year (or part thereof), by the total amount credited to all such accounts in all credit unions having an insured status at the end of such year (or part thereof).

On page 13, line 25, after the word "who", insert "knowingly"; on page 15, line 11, after the word "union", strike out "not" and insert "fail"; on page 16, line 21, after the word "term", strike out "net" and insert "normal"; in line 22, after the word "to" where it appears the second time, strike out "2" and insert "1"; on page 19, line 4, after the word "the", strike out "purposes" and insert "purpose"; in line 14, after the word "time," strike out "and"; on page 23, after line 1, strike out "For each day an insured credit union continues to violate any provisions of this subsection or any lawful provision of regulations prescribed pursuant hereto, it shall be subject to a penalty of not more than $100, which the Administrator may recover for his use."; after line 24, strike out:

"(c) Except with the prior written consent of the Administrator, no insured credit union shall establish and operate any new branch or move its main office or any branch from one location to another.

On page 24, at the beginning of line 4, strike out "(d)" and insert "(c)"; in line 5, after the word "under", strike out "subsections (b) and (c)" and insert "subsection (b)"; at the beginning of line 19, strike out "(e)" and insert "(d)"; on page 25, at the beginning of line 3, strike out "(f)" and insert "(e)"; on page 26, line 18, after the word "authority", insert "if any"; in the same line, after the word "union", strike out the comma and insert "if any"; on page 38, line 19, after the word "of", where it appears the first time, strike out "directors," and insert "directors"; on page 39, line 5, after the word "successors", strike out "take office" and insert "have been elected by the members at an annual or special meeting and have taken office. Directors appointed temporarily by the Administrator shall, within thirty days following their appointment, call a special meeting for the election of new directors, unless during the thirty-day period (A) the regular annual meeting is scheduled, or (B) the suspensions giving rise to the appointment of temporary directors are terminated."; on page 40, line 6, after the word "as", strike out "hereinafter"; on page 43, line 2, after the word "has", where it appears the second time, strike out "becomes" and insert "become"; on page 44, line 2, after the word "authority," insert "if any,"; in line 3, after the word "union", strike out the comma and "if any"; in line 9, after the word "authority", insert "if any,"; in line 10, after the word "union," strike out "if any,"; on page 46, at the beginning of line 12, strike out "shall have"; on page 59, line 2, after the word "Act", insert "(formerly section 2 of such Act)"; in line 5, after the word "paragraph", strike out "(3)" and insert "(2)"; in line 7, after the word "paragraph", strike out "(4)" and insert "(3)"; in line 10, after the word "paragraph", strike out "(4)" and insert "(3)"; at the beginning of line 11, strike out "(5)" and insert "(4)"; in line 13, after the word "share,", insert "share"; in same line, after the word "or", insert "share"; in line 18, after the word "member," insert a comma and "and, in the case of a credit union serving predominantly low-income members (as defined by the Administrator), such terms (when referring to the account of a nonmember served by such credit union) mean a share, share certificate, or share deposit account of such nonmember which is of a type approved by the Administrator and evidences money or

its equivalent received or held by such credit union in the usual course of business and for which it has given or is obligated to give credit to the account of such nonmember;"; on page 60, at the beginning of line 3, strike out "(6)" and insert "(5)"; at the beginning of line 11, strike out "(7)" and insert "(6)"; at the beginning of line 16, strike out "(8)" and insert "(7)"; at the beginning of line 18, strike out "(9)" and insert "(8)"; on page 61, line 6, after the word "credit", strike out "union" and insert "union,"; on page 63, line 2, after the word "appears", strike out "therein; and" and insert "therein."; in line 11, after the word "Act", insert "(formerly section 17 of such Act)"; after line 19, strike out:

"15 per centum of gross income until the regular reserve shall equal 5 per centum of the total of outstanding loans and risk assets, then

On page 64, line 4, after the word "per", strike out "centum," and insert "centum or"; in line 5, after the word "per centum", strike out the comma and "or 5 per centum"; in line 8, after the word "of", strike out "5 per centum,"; in line 9, after the word "per", strike out "centum," and insert "centum"; and after line 15, insert a new section, as follows:

SEC. 10. Section 107 of the Federal Credit Union Act, as redesignated by section 1 of this Act (formerly section 8 of such Act), is amended—

(1) by striking out paragraph (7) and inserting in lieu thereof the following:

"(7) to receive from its members or other federally insured credit unions payments on shares, share certificates, or share deposits, and, in the case of credit unions serving predominantly low-income members (as defined by the Administrator), to receive payments on shares, share certificates, or share deposits from nonmembers;" and

(2) by adding at the end of paragraph (8) the following: "and (H) in shares, share certificates, or share deposits of federally insured credit unions;".

So as to make the bill read:

S. 3822

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Federal Credit Union Act, as amended (12 U.S.C. 1751–1775), is further amended—

(1) by inserting immediately above the heading of section 2 the following:

"TITLE I—FEDERAL CREDIT UNIONS";

(2) by redesignating sections 2 through 28 as sections 101 through 127, respectively; and

(3) by inserting the following new title after section 127, as redesignated by paragraph (2) of this section:

"TITLE II—SHARE INSURANCE

"INSURANCE OF MEMBER ACCOUNTS AND ELIGIBILITY PROVISIONS

"SEC. 201. (a) The Administrator, as hereinafter provided, shall insure the member accounts of all Federal credit unions and he may insure the member accounts of (1) credit unions organized and operated according to the laws of any State, the District of Columbia, the several territories and possessions of the United States, the Panama Canal Zone, or the Commonwealth of Puerto Rico, and (2) credit unions organized and operating under the jurisdiction of the Department of Defense if such credit unions are operating in compliance with the requirements of title I of this Act and regulations issued thereunder.

"(b) Application for insurance of member accounts shall be made immediately by each Federal credit union and may be made at any time by a State credit union or a credit union operating under the jurisdiction of the Department of Defense. Applications for such insurance shall be in such form as the Administrator shall provide and shall contain an agreement by the applicant—

"(1) to pay the reasonable cost of such examinations as the Administrator may deem necessary in connection with determining the eligibility of the applicant for insurance: *Provided,* That examinations required under title I of this Act shall be so conducted that the information derived therefrom may be utilized for share insurance purposes, and examinations conducted by State regulatory agencies shall be utilized by the Administrator for such purposes to the maximum extent feasible;

"(2) to permit and pay the reasonable cost of such examinations as in the judgment of the Administrator may from time to time be necessary for the protection of the fund and of other insured credit unions;

"(3) to permit the Administrator to have access to any information or report with respect to any examination made by or for any public regulatory authority, including any commission, board, or authority having supervision of a State-chartered credit union, and furnish such additional information with respect thereto as the Administrator may require;

"(4) to provide protection and indemnity against burglary, defalcation, and other similar insurable losses, of the type, in the form, and in an amount at least equal to that required by the laws under which the credit union is organized and operates;

"(5) to maintain such regular reserves as may be required by the laws of the State, district, territory, or other jurisdiction pursuant to which it is organized and operated, in the case of a State-chartered credit union, or as may be required by section 116 of this Act, in the case of a Federal credit union;

"(6) to maintain such special reserves as the Administrator, by regulation or in special cases, may require for protecting the interest of members or to assure that all insured credit unions maintain regular reserves which are not less than those required under title I of this Act;

"(7) not to issue or have outstanding any account or security the form of which, by regulation or in special cases, has not been approved by the Administrator;

"(8) to pay the premium charges for insurance imposed by this title; and

"(9) to comply with the requirements of this title and of regulations prescribed by the Administrator pursuant thereto.

"(c)(1) Before approving the application of any credit union for insurance of its member accounts, the Administrator shall consider—

"(A) the history, financial condition, and management policies of the applicant;

"(B) the economic advisability of insuring the applicant without undue risk of the fund;

"(C) the general character and fitness of the applicant's management;

"(D) the convenience and needs of the members to be served by the applicant; and

"(E) whether the applicant is a cooperative association organized for the purpose of promoting thrift among its members and creating a source of credit for provident or productive purposes.

"(2) The Administrator shall reject the application of any credit union for insurance of its member accounts if he finds that its reserves are inadequate, that its financial condition and policies are unsafe or unsound, that its management is unfit, that insurance of its member accounts would otherwise involve undue risk to the fund, or that its powers and purposes are inconsistent with the promotion of thrift among its members and the creation of a source of credit for provident or productive purposes.

"(d) If the application of a Federal credit union for insurance is rejected, the Administrator shall suspend or revoke its charter unless, within one year after the rejection, the credit union meets the requirements for insurance and becomes an insured credit union.

"(e) Upon the approval of any application for insurance, the Administrator shall notify the applicant and shall issue to it a certificate evidencing the fact that it is, as of the date of issuance of the certificate, an insured credit union under the provisions of this title.

"REPORTS OF CONDITION; CERTIFIED STATEMENTS; PREMIUMS FOR INSURANCE

"SEC. 202. (a)(1) Each insured credit union shall make reports of condition to the Administrator upon dates which shall be selected by him. Such reports of condition shall be in such form and shall contain such information as the Administrator may require. The reporting dates selected for reports of condition shall be the same for all insured credit unions except that when any of said reporting dates is a nonbusiness day for any credit union the preceding business day shall be its reporting date. The total amount of the member accounts of each insured credit union as of each reporting date shall be reported in such reports of condition in accordance with regulations prescribed by the Administrator. Each report of condition shall contain a declaration by the president, by a vice president, by the treasurer, or by any other officer designated by the board of directors of the reporting credit union to make such declaration, that the report is true and correct to the best of his knowledge and belief. Unless such requirement is waived by the Administrator, the correctness of each report of condition shall be attested by the signatures of three of the officers of the reporting credit union with the declaration that the report has been examined by them and to the best of their knowledge and belief is true and correct.

"(2) The Administrator may call for such other reports as he may from time to time require.

"(3) The Administrator may require reports of condition to be published in such manner, not inconsistent with any applicable law, as he may direct. Every insured credit union which willfully fails to make or publish any such report within ten days shall be subject to a penalty of not more than $100 for each day of such failure, recoverable by the Administrator for his use.

"(4) The Administrator may accept any report of condition made to any commission, board, or authority having supervision of a State-chartered credit union and may furnish to any such commission, board, or authority reports of condition made to the Administrator.

"(5) Reports required under title I of this Act shall be so prepared that they can be used for share insurance purposes. To the maximum extent feasible, the Administrator shall use for insurance purposes reports submitted to State regulatory agencies by State-chartered credit unions.

"(b) On or before January 31 of each insurance year, each insured credit union which became insured prior to the beginning of that year shall file with the Administrator a certified statement showing the total amount of the member accounts in the credit union at the close of the preceding

insurance year and the amount of the premium charge for insurance due to the fund for that year, as computed under subsection (c) of this section. The certified statements required to be filed with the Administrator pursuant to this subsection shall be in such form and shall set forth such supporting information as the Administrator shall require. Each such statement shall be certified by the president of the credit union, or by any officer of the credit union designated by its board of directors, that to the best of his knowledge and belief the statement is true, correct, and complete and in accordance with this title and regulations issued thereunder.

"(c)(1) Except as provided in paragraphs (2) and (3) of this subsection, each insured credit union, on or before January 31 of each insurance year, shall pay to the fund a premium charge for insurance equal to one-twelfth of 1 per centum of the total amount of the member accounts in such credit union at the close of the preceding insurance year.

"(2) Each credit union which was in existence prior to the enactment of this title and which becomes insured under this title after January 1 of any insurance year shall pay to the fund, for the insurance year in which it becomes insured, a premium charge for insurance equal to one-twelfth of 1 per centum of the total amount of the member accounts in such credit union at the close of the month before the month in which it becomes insured, reduced by an amount proportionate to the number of calendar months elapsed since the beginning of such insurance year and prior to the month in which it becomes insured. Such payment shall be made within 30 days after the date on which the credit union receives the certificate of insurance issued to it under section 201 of this title.

"(3) Each credit union which is chartered after enactment of this title and which becomes insured under this title in the insurance year in which it is chartered shall pay to the fund, for the insurance year in which it is chartered, a premium charge for insurance computed in the following manner:

"(A) To the total amount of the member accounts in the credit union at the close of the month in which it becomes insured, add the total amount of such member accounts in the credit union at the close of each succeeding month of the insurance year and divide the total by the number of such months (including the month in which it becomes insured).

"(B) From the figure obtained under subparagraph (A), subtract $10,000.

"(C) Multiply the figure obtained under subparagraph (B) by one-twelfth of 1 per centum.

"(D) Reduce the figure obtained under subparagraph (C) by an amount proportionate to the number of calendar months elapsed since the beginning of such insurance year and prior to the month in which the credit union becomes insured. The figure obtained under this subparagraph is the amount of the premium charge for insurance due to the fund. Such premium charge shall be paid on or before January 31 of the insurance year following the year in which the credit union was chartered.

"(4) When any loans to the fund from the Federal Government and the interest thereon have been repaid and the amount in the fund equals or exceeds the normal operating level, the Administrator may reduce the premium charge for insurance, but not below the amount necessary, in his judgment, to maintain the fund at the normal operating level. Any such reduction shall be effective only so long as the amount in the fund equals or exceeds the normal operating level and no loan to the fund from the Federal Government is outstanding.

"(5) If in any year expenditures from the fund exceed the income of the fund, the Administrator may require each insured credit union to pay to the fund for such year, in addition to the regular premium charge for insurance payable under paragraph (1), (2), or (3) of this subsection, a special premium charge which shall not exceed an amount equal to the amount of the regular premium charge.

"(6)(A) An insured credit union which is closed for liquidation because of insolvency or otherwise is entitled to a rebate of premiums paid by it to the fund. Rebates shall be paid in accordance with regulations prescribed by the Administrator, but no payment of rebate shall be made during any period in which

"(i) a loan to the fund from the Federal Government is outstanding; or

"(ii) the Administrator determines that the payment would unduly jeopardize the financial condition of the fund.

A credit union otherwise entitled to a rebate of premiums shall not lose its entitlement because payment thereof cannot at any given time be made under the limitations prescribed in clause (i) or (ii).

"(B) The amount of rebate of premiums to which a credit union is entitled under subparagraph (A) shall be computed as follows: To the total amount of premiums paid to the fund by the credit union, plus interest on such payments at the average rate of interest earned by the fund on its assets during each of the years in which the payments were made, subtract the sum of

"(i) the credit union's prorata share of the fund's administrative expenses during the period in which the credit union had an insured status;

"(ii) the credit union's prorata share of the net insurance payments (other than those referred to in clause (iii) chargeable to the fund for claims arising during such period; and

"(iii) the net insurance payments chargeable to the fund for claims arising in connection with the liquidation of the credit union.

A credit union's prorata share of the fund's administrative expenses or net insurance payments for any year (or part thereof) shall be determined by dividing the total amount credited to member and nonmember accounts in the credit union at the end of such year (or part thereof), by the total amount credited to all such accounts in all credit unions having an insured status at the end of such year (or part thereof).

"(d)(1) Any insured credit union which fails to make any report of condition under subsection (a) of this section or to file any certified statement required to be filed by it in connection with determining the amount of any premium charge for insurance may be compelled to make such report or to file such statement by mandatory injunction or other appropriate remedy in a suit brought for such purpose by the Administrator against the credit union and any officer or officers thereof. Any such suit may be brought in any court of the United States of competent jurisdiction in the district or territory in which the principal office of the credit union is located.

"(2) Any insured credit union which willfully fails or refuses to file any certified statement or to pay any premium charge for insurance required under this title shall be subject to a penalty of not more than $100 for each day that such violation continues, which penalty the Administrator may recover for his use. The provisions of this paragraph shall not be applicable in any case in which the refusal to pay the premium charge for insurance is due to a dispute between the insured credit union and the Administrator over the amount of the premium charge due to the fund if the credit union deposits security satisfactory to the Administrator for payment of the premium charge upon final determination of the issue.

"(3) No insured credit union shall pay any dividends on its member accounts or distribute any of its assets while it remains in default in the payment of any premium charge for insurance due to the fund. Any director or officer of any insured credit union who *knowingly* participates in the declaration or payment of any such dividend or in any such distribution shall, upon conviction, be fined not more than $1,000 or imprisoned not more than one year, or both. The provisions of this paragraph shall not be applicable in any case in which the default is due to a dispute between the credit union and the Administrator over the amount of the premium charge due to the fund if the credit union deposits security satisfactory to the Administrator for payment of the premium charge upon final determination of the issue.

"(e) The Administrator, in a suit brought at law or in equity in any court of competent jurisdiction, shall be entitled to recover from any insured credit union the amount of any unpaid premium charge for insurance lawfully payable by the credit union to the fund, whether or not such credit union shall have made any report of condition under subsection (a) of this section or filed any certified statement required under subsection (b) of this section and whether or not suit shall have been brought to compel the credit union to make any such report or to file any such statement. No action or proceeding shall be brought for the recovery of any premium charge due to the fund, or for the recovery of any amount paid to the fund in excess of the amount due it, unless such action or proceeding shall have been brought within five years after the right accrued for which the claim is made. Where the insured credit union has made or filed with the Administrator a false or fraudulent certified statement with the intent to evade, in whole or in part, the payment of any premium charge, the claim shall not be deemed to have accrued until the discovery by the Administrator of the fact that the certified statement is false or fraudulent.

"(f) Should any Federal credit union fail to make any report of condition under subsection (a) of this section or to file any certified statement required to be filed under subsection (b) of this section or to pay any premium charge for insurance required to be paid under any provision of this title, and should the credit union *fail to* correct such failure within thirty days after written notice has been given by the Administrator to an officer of the credit union, citing this subsection and stating that the credit union has failed to make any such report or file any such statement or pay any such premium charge as required by law, all the rights, privileges, and franchises of the credit union granted to it under title I of this Act shall be thereby forfeited. Whether or not the penalty provided in this subsection has been incurred shall be determined and adjudged by any court of the United States of competent jurisdiction in a suit brought for that purpose in the district or territory in which the principal office of such credit union is located, under direction of and by the Administrator in his own name, before the credit union shall be declared dissolved. The remedies provided in this subsection and in subsections (d) and (e) of this section shall not be construed as limiting any other remedies against any insured credit union but shall be in addition thereto.

"(g) Each insured credit union shall maintain such records as will readily permit verification of the correctness of its reports of condition, certified statements, and premium charges for insurance. However, no insured credit union shall be required to retain such records for such purpose for a period in excess of five years from the date of the making of any such report, the filing of any such statement, or the payment of any premium charge, except that when there is a dispute between the insured credit union and the Administrator over the amount of any premium charge for insurance the credit union shall retain such records until final determination of the issue.

"(h) For the purposes of this section—

"(1) the term 'insurance year' means the period beginning on January 1 and ending on the following December 31, both dates inclusive; and

"(2) the term 'normal operating level,' when applied to the Fund, means an amount equal to 1 per centum of the aggregate amount of the member accounts in all insured credit unions.

"NATIONAL CREDIT UNION SHARE INSURANCE FUND

"SEC. 203. (a) There is hereby created in the Treasury of the United States a National Credit Union Share Insurance Fund which shall be used by the Administrator as a revolving fund for carrying out the purposes of this title. Money in the fund shall be available upon requisition by the Administrator, without fiscal year limitation, for making payments of insurance under section 207 of this title, for providing assistance and making expenditures under section 208 of this title in connection with the liquidation or threatened liquidation of insured credit unions, and for such administrative and other expenses incurred in carrying out the purposes of this title as he may determine to be proper.

"(b) All premium charges for insurance paid pursuant to the provisions of section 202 of this title and all fees for examinations and all penalties collected by the Administrator under any provision of this title shall be deposited in the National Credit Union Share Insurance Fund.

"(c) The Administrator may authorize the Secretary of the Treasury to invest and reinvest such portions of the fund as the Administrator may determine are not needed for current operations in any interest-bearing securities of the United States or in any securities guaranteed as to both principal and interest by the United States or in bonds or other obligations which are lawful investments for fiduciary, trust, and public funds of the United States, and the income therefrom shall constitute a part of the fund.

"(d) (1) If, in the judgment of the Administrator, a loan to the fund is required at any time for carrying out the purposes of this title, the Secretary of the Treasury shall make the loan, but loans under this paragraph shall not exceed in the aggregate $100,000,000 outstanding at any one time. Except as otherwise provided in this subsection and in subsection (e) of this section, each loan under this paragraph shall be made on such terms as may be fixed by agreement between the Administrator and the Secretary of the Treasury.

"(2) Interest shall accrue to the Treasury on the amount of any outstanding loans made to the fund pursuant to paragraph (1) of this subsection on the basis of the average daily amount of such outstanding loans determined at the close of each fiscal year with respect to such year, and the Administrator shall pay the interest so accruing into the Treasury as miscellaneous receipts annually from the fund. The Secretary of the Treasury shall determine the applicable interest rate in advance by calculating the average yield to maturity (on the basis of daily closing market bid quotations during the month of June of the preceding fiscal year) on outstanding marketable public debt obligations of the United States having a maturity date of five or less years from the first day of such month of June and by adjusting such yield to the nearest one-eighth of 1 per centum.

"(3) For the purpose of making loans under paragraph (1) of this subsection, the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds of the sale of any securities issued under the Second Liberty Bond Act, as amended, and the purposes for which securities may be issued under the Second Liberty Bond Act, as amended, are hereby extended to include such loans. All loans and repayments under this section shall be treated as public debt transactions of the United States.

"(e) So long as any loans to the fund are outstanding, the Administrator shall from time to time, not less often than annually, determine whether the balance in the fund is in excess of the amount which, in his judgment, is needed to meet the requirements of the fund and shall pay such excess to the Secretary of the Treasury, to be credited against the loans to the fund.

"EXAMINATION OF INSURED CREDIT UNIONS

"SEC. 204. (a) The Administrator shall appoint examiners who shall have power, on his behalf, to examine any insured credit union, any credit union making application for insurance of its member accounts, or any closed insured credit union whenever in the judgment of the Administrator an examination is necessary to determine the condition of any such credit union for insurance purposes. Each examiner shall have power to make a thorough examination of all of the affairs of the credit union and shall make a full and detailed report of the condition of the credit union to the Administrator. The Administrator in like manner shall appoint claim agents who shall have power to investigate and examine all claims for insured member accounts. Each claim agent shall have power to administer oaths and affirmations, to examine and to take and preserve testimony under oath as to any matter in respect to claims for insured accounts, and to issue subpenas and subpenas duces tecum and, for the enforcement thereof, to apply to the United States district court for the judicial district or the United States court in any territory in which the principal office of the credit union is located or in which the witness resides or carries on business. Such courts shall have jurisdiction and power to order and require compliance with any such subpena.

"(b) In connection with examinations of insured credit unions, the Administrator, or his designated representatives, shall have power to administer oaths and affirmations, to examine and to take and preserve testimony under oath as to any matter in respect of the affairs of any such credit union, and to issue subpenas and subpenas duces tecum and, for the enforcement thereof, to apply to the United States district court for the judicial district or the United States court in any territory in which the principal office of the credit union is located or in which the witness resides or carries on business. Such courts shall have jurisdiction and power to order and require compliance with any such subpena.

"(c) In cases of refusal to obey a subpena issued to, or contumacy by, any person, the Administrator may invoke the aid of any court of the United States within the jurisdiction of which such hearing, examination, or investigation is carried on, or where such person resides or carries on business, in requiring the attendance and testimony of witnesses and the production of books, records, or other papers. Such court may issue an order requiring such person to appear before the Administrator, or before a person designated by him, there to produce records, if so ordered, or to give testimony touching the matter in question. Any failure to obey such order of the court may be punished by such court as a contempt thereof. All process in any such case may be served in the judicial district whereof such person is an inhabitant or carries on business or wherever he may be found. No person shall be excused from attending and testifying or from producing books, records, or other papers in obedience to a subpena issued under the authority of this title on the ground that the testimony or evidence, documentary or otherwise, required of him may tend to incriminate him or subject him to penalty or forfeiture, but no individual shall be prosecuted or subject to any penalty or forfeiture for or on account of any transaction, matter, or thing concerning which he is compelled to testify or produce evidence, documentary or otherwise, after having claimed his privilege against self-incrimination, except that such individual so testifying shall not be exempt from prosecution and punishment for perjury committed in so testifying.

"(d) The Administration may accept any report of examination made by or to any commission, board, or authority having supervision of a State-chartered credit union and may furnish to any such commission, board, or authority reports of examination made on behalf of the Administrator.

"REQUIREMENTS GOVERNING INSURED CREDIT UNIONS

"SEC. 205. (a) Every insured credit union shall display at each place of business maintained by it a sign or signs indicating that its member accounts are insured by the Administrator and shall include in all of its advertisements a statement to the effect that its member accounts are insured by the Administrator. The Administrator may exempt from this requirement advertisements which do not relate to member accounts or advertisements in which it is impractical to include such a statement. The Administrator shall prescribe by regulation the forms of such signs, the manner of display, the substance of any such statement, and the manner of use.

"(b) (1) Except with the prior written approval of the Administrator, no insured credit union shall—

"(A) merge or consolidate with any noninsured credit union or institution;

"(B) assume liability to pay any member accounts in, or similar liabilities of, any noninsured credit union or institution;

"(C) transfer assets to any noninsured credit union or institution in consideration of the assumption of liabilities for any portion of the member accounts in such insured credit union; or

"(D) convert into a noninsured credit union or institution.

"(2) Except with the prior written approval of the Administrator, no insured credit union shall merge or consolidate with any other insured credit union or, either directly or indirectly, acquire the assets of, or assume liability to pay any member accounts in, any other insured credit union.

(c) In granting or withholding approval or consent under subsection (b) of this section, the Administrator shall consider—

"(1) the history, financial condition, and management policies of the credit union;

"(2) the adequacy of the credit union's reserves;

"(3) the economic advisability of the transaction;

"(4) the general character and fitness of the credit union's management;

"(5) the convenience and needs of the members to be served by the credit union; and

"(6) whether the credit union is a cooperative association organized for the purpose of promoting thrift among its members and creating a source of credit for provident or productive purposes.

"(d) Except with the written consent of the Administrator, no person shall serve as a director, officer, committee member, or employee of an insured credit union who has been convicted, or who is hereafter convicted, of any criminal offense involving dishonesty or a breach of trust. For each willful violation of this prohibition, the credit union involved shall be subject to a penalty of not more than $100 for each day this prohibition is violated, which the Administrator may recover for his use.

(e) (1) The Administrator shall promulgate rules establishing minimum standards with which each insured credit union must comply with respect to the installation, maintenance, and operation of security devices and procedures, reasonable in cost, to discourage robberies, burglaries, and larcenies and to assist in the identification and apprehension of persons who commit such acts.

"(2) The rules shall establish the time limits within which insured credit unions shall comply with the standards and shall require the submission of periodic reports with respect to the installation, maintenance, and operation of security devices and procedures.

"(3) An insured credit union which violates a rule promulgated pursuant to this subsection shall be subject to a civil penalty which shall not exceed $100 for each day of the violation.

"TERMINATION OF INSURANCE; CEASE-AND-DESIST PROCEEDINGS; SUSPENSION AND/OR REMOVAL OF DIRECTORS, OFFICERS, AND COMMITTEE MEMBERS

"SEC. 206. (a) Any insured credit union other than a Federal credit union may, upon not less than ninety days' written notice to the Administrator and upon the affirmative vote of a majority of its members within one year prior to the giving of such notice, terminate its status as an insured credit union.

"(b) (1) Whenever, in the opinion of the Administrator, any insured credit union is engaging or has engaged in unsafe or unsound practices in conducting the business of such credit union, or is in an unsafe or unsound condition to continue operations as an insured credit union, or is violating or has violated an applicable law, rule, regulation, order, or any condition imposed in writing by the Administrator in connection with the granting of any application or other request by the credit union, or is violating or has violated any written agreement entered into with the Administrator, the Administrator shall serve upon the credit union a statement with respect to such practices or conditions or violations for the purpose of securing the correction thereof. In the case of an insured State-chartered credit union, the Administrator shall send a copy of such statement to the commission, board, or authority, if any, having supervision of such credit union. Unless such correction shall be made within one hundred and twenty days after service of such statement, or within such shorter period of not less than twenty days after such service as the Administrator shall require in any case where he determines that the insurance risk with respect to such credit union could be unduly jeopardized by further delay in the correction of such practices or conditions or violations, or as the commission, board, or authority having supervision of such credit union, if any, shall require in the case of an insured State-chartered credit union, the Administrator, if he shall determine to proceed further, shall give to the credit union not less than thirty days' written notice of his intention to terminate the status of the credit union as an insured credit union. Such notice shall contain a statement of the facts constituting the alleged unsafe and unsound practices or conditions or violations and shall fix a time and place for a hearing thereon. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after service of such notice unless an earlier or a later date is set by the Administrator at the request of the credit union. Unless the credit union shall appear at the hearing by a duly authorized representative, it shall be deemed to have consented to the termination of its status as an insured credit union. In the event of such consent, or if upon the record made at any such hearing the Administrator shall find that any unsafe or unsound practice or condition or violation specified in the notice has been established and has not been corrected within the time above-prescribed in which to make such correction, the Administrator may issue and serve upon the credit union an order terminating its status as an insured credit union on a date subsequent to the date of such finding and subsequent to the expiration of the time specified in the notice.

"(2) Any credit union whose insured status has been terminated by order of the Administrator under this subsection shall have the right of judicial review of such order only to the same extent as provided for the review of orders under subsection (i) of this section.

"(c) In the event of the termination of a credit union's status as an insured credit union as provided under subsection (a) or (b) of this section, the credit union shall give prompt and reasonable notice to all of its members whose accounts are insured that it has ceased to be an insured credit union. It may include in such notice a statement of the fact that member accounts insured on the effective date of such termination, to the extent not withdrawn, remain insured for one year from the date of such termination, but it shall not further represent itself in any manner as an insured credit union. In the event of failure to give the notice as herein provided to members whose accounts are insured, the Administrator is authorized to give reasonable notice.

"(d) After the termination of the insured status of any credit union as provided under subsection (a) or (b) of this section, insurance of its member accounts to the extent that they were insured on the effective date of such termination, less any amounts thereafter withdrawn which reduce the accounts below the amount covered by insurance on the effective date of such termination, shall continue for a period of one year, but no shares issued by the credit union or deposits made after the date of such termination shall be insured by the Administrator. The credit union shall continue to pay premiums to the Administrator during such period as in the case of an insured credit union and the Administrator shall have the right to examine such credit union from time to time during the period during which such insurance continues. Such credit union shall, in all other respects, be subject to the duties and obligations of an insured credit union for the period of one year from the date of such termination. In the event that such credit union shall be closed for liquidation within such period of one year, the Administrator shall have the same powers and rights with respect to such credit union as in the case of an insured credit union.

"(e) (1) If, in the opinion of the Administrator, any insured credit union or any credit union any of the member accounts of which are insured is engaging or has engaged, or the Administrator has reasonable cause to believe that the credit union is about to engage, in an unsafe or unsound practice in conducting the business of such credit union, or is violating or has violated, or the Administrator has reasonable cause to believe that the credit union is about to violate a law, rule, or regulation, or any condition imposed in writing by the Administrator in connection with the granting of any application or other request by the credit union, or any written agreement entered into with the Administrator, the Administrator may issue and serve upon the credit union a notice of charges in respect thereof. The notice shall contain a statement of the facts constituting the alleged unsafe or unsound practice or practices or violation or violations and shall fix a time and place at which a hearing will be held to determine whether an order to cease and desist therefrom should issue against the credit union. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after service of such notice unless an earlier or a later date is set by the Administrator at the request of the credit union. Unless the credit union shall appear at the hearing by a duly authorized representative, it shall be deemed to have consented to the issuance of the cease-and-desist order. In the event of such consent, or if upon the record made at any such hearing the Administrator shall find that any unsafe or unsound practice or violation specified in the notice of charges has been established, the Administrator may issue and serve upon the credit union an order to cease and desist from any such practice or violation. Such order may, by provisions which may be mandatory or otherwise, require the credit union and its directors, officers, committee members, employees, and agents to cease and desist from the same and, further, to take affirmative action to correct the conditions resulting from any such practice or violation.

"(2) A cease-and-desist order shall become effective at the expiration of thirty days after service of such order upon the credit union concerned (except in the case of a cease-and-desist order issued upon consent, which shall become effective at the time specified therein) and shall remain effective and enforceable except to such extent as it is stayed, modified, terminated, or set aside by action of the Administrator or a reviewing court.

"(f) (1) Whenever the Administrator shall determine that the unsafe or unsound practice or practices or violation or threatened violation specified in the notice of charges served upon the credit union pursuant to subsection (e) (1) of this section, or the continuation thereof, is likely to cause insolvency or substantial dissipation of assets or earnings of the credit union, or is likely to otherwise seriously prejudice the interests of its insured members, the Administrator may issue a temporary order requiring the credit union to cease and desist from any such practice or violation. Such order shall become effective upon service upon the credit union and, unless set aside, limited, or suspended by a court in proceedings authorized by paragraph (2) of this subsection, shall remain effective and enforceable pending the completion of the administrative proceedings pursuant to such notice and until such time as the Administrator shall dismiss the charges specified in such notice or, if a cease-and-desist order is issued against the credit union, until the effective date of any such order.

"(2) Within ten days after the credit union concerned has been served with a tem-

porary cease-and-desist order, the credit union may apply to the United States district court for the judicial district in which the principal office of the credit union is located, or the United States District Court for the District of Columbia, for an injunction setting aside, limiting, or suspending the enforcement, operation, or effectiveness of such order pending the completion of the administrative proceedings pursuant to the notice of charges served upon the credit union under subsection (e)(1) of this section, and such court shall have jurisdiction to issue such injunction.

"(3) In the case of violation or threatened violation of, or failure to obey, a temporary cease-and-desist order, the Administrator may apply to the United States district court, or the United States court of any territory, within the jurisdiction of which the principal office of the credit union is located for an injunction to enforce such order, and, if the court shall determine that there has been such violation or threatened violation or failure to obey, it shall be the duty of the court to issue such injunction.

"(g)(1) Whenever, in the opinion of the Administrator, any director, officer, or committee member of an insured credit union has committed any violation of law, rule, or regulation, or of a cease-and-desist order which has become final, or has engaged or participated in any unsafe or unsound practice in connection with the credit union, or has committed or engaged in any act, omission, or practice which constitutes a breach of his fiduciary duty as such director, officer, or committee member and the Administrator determines that the credit union has suffered or will probably suffer substantial financial loss or other damage or that the interests of its insured members could be seriously prejudiced by reason of such violation or practice or breach of fiduciary duty and that such violation or practice or breach of fiduciary duty is one involving personal dishonesty on the part of such director, officer, or committee member, the Administrator may serve upon such director, officer, or committee member a written notice of his intention to remove him from office.

"(2) Whenever, in the opinion of the Administrator, any director, officer, or committee member of an insured credit union, by conduct or practice with respect to another insured credit union or other business institution which resulted in substantial financial loss or other damage, has evidenced his personal dishonesty and unfitness to continue as a director, officer, or committee member, and, whenever, in the opinion of the Administrator, any other person participating in the conduct of the affairs of an insured credit union, by conduct or practice with respect to such credit union or other insured credit union or other business institution which resulted in substantial financial loss or other damage, has evidenced his personal dishonesty and unfitness to participate in the conduct of the affairs of such insured credit union, the Administrator may serve upon such director, officer, committee member, or other person a written notice of his intention to remove him from office and/or to prohibit his further participation in any manner in the conduct of the affairs of such credit union.

"(3) In respect to any director, officer, or committee member of an insured credit union or any other person referred to in paragraph (1) or (2) of this subsection, the Administrator may, if he deems it necessary for the protection of the credit union or the interests of its insured members, by written notice to such effect served upon such director, officer, committee member, or other person, suspend him from office and/or prohibit him from further participation in any manner in the conduct of the affairs of the credit union. Such suspension and/or prohibition shall become effective upon service of such notice, and, unless stayed by a court in proceedings authorized by paragraph (5) of this subsection, shall remain in effect pending the completion of the administrative proceedings pursuant to the notice served under paragraph (1) or (2) of this subsection and until such time as the Administrator shall dismiss the charges specified in such notice or, if an order of removal and/or prohibition is issued against the director, officer, committee member, or other person, until the effective date of any such order. Copies of any such notice shall also be served upon the credit union of which he is a director, officer, or committee member or in the conduct of whose affairs he has participated.

"(4) A notice of intention to remove a director, officer, committee member, or other person from office and/or to prohibit his participation in the conduct of the affairs of an insured credit union shall contain a statement of the facts constituting the grounds therefor and shall fix a time and place at which a hearing will be held thereon. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after the date of service of such notice unless an earlier or a later date is set by the Administrator at the request of such director, officer, committee member, or other person, and for good cause shown, or at the request of the Attorney General of the United States. Unless such director, officer, committee member, or other person shall appear at the hearing in person or by a duly authorized representative, he shall be deemed to have consented to the issuance of an order of such removal and/or prohibition. In the event of such consent, or if upon the record made at any such hearing the Administrator shall find that any of the grounds specified in such notice has been established, the Administrator may issue such orders of suspension or removal from office and/or prohibition from participation in the conduct of the affairs of the credit union as he may deem appropriate. Any such order shall become effective at the expiration of thirty days after service upon such credit union and the director, officer, committee member, or other person concerned (except in the case of an order issued upon consent, which shall become effective at the time specified therein). Such order shall remain effective and enforceable except to such extent as it is stayed, modified, terminated, or set aside by action of the Administrator or a reviewing court.

"(5) Within ten days after any director, officer, committee member, or other person has been suspended from office and/or prohibited from participation in the conduct of the affairs of an insured credit union under paragraph (3) of this subsection, such director, officer, committee member, or other person may apply to the United States district court for the judicial district in which the principal office of the credit union is located, or the United States District Court for the District of Columbia for a stay of such suspension and/or prohibition pending the completion of the administrative proceedings pursuant to the notice served upon such director, officer, committee member, or other person under paragraph (1) or (2) of this subsection, and such court shall have jurisdiction to stay such suspension and/or prohibition.

"(h)(1) Whenever any director, officer, or committee member of an insured credit union, or other person participating in the conduct of the affairs of such credit union, is charged in any complaint authorized by a United States attorney or in any information or indictment, with the commission of or participation in a felony involving dishonesty or breach of trust, the Administrator may, by written notice served upon such director, officer, committee member, or other person, suspend him from office and/or prohibit him from further participation in any manner in the conduct of the affairs of the credit union. A copy of such notice shall also be served upon the credit union. Such suspension and/or prohibition shall remain in effect until such information, indictment, or complaint is finally disposed of or until terminated by the Administrator. In the event that a judgment of conviction with respect to such offense is entered against such director, officer, committee member, or other person, and at such time as such judgment is not subject to further appellate review, the Administrator may issue and serve upon such director, officer, committee member, or other person an order removing him from office and/or prohibiting him from further participation in any manner in the conduct of the affairs of the credit union except with the consent of the Administrator. A copy of such order shall also be served upon such credit union, whereupon such director, officer, or committee member shall cease to be a director, officer, or committee member of such institution. A finding of not guilty or other disposition of the charge shall not preclude the Administrator from thereafter instituting proceedings to remove such director, officer, committee member, or other person from office and/or to prohibit further participation in the affairs of the credit union pursuant to paragraph (1) or (2) of subsection (g) of this section.

"(2) If at any time, because of the suspension of one or more directors pursuant to this section, there shall be on the board of directors of a Federal credit union less than a quorum of directors not so suspended, all powers and functions vested in or exercisable by such board shall vest in and be exercisable by the director or directors on the board not so suspended, until such time as there shall be a quorum of the board of directors. In the event all of the directors of a Federal credit union are suspended pursuant to this section, the Administrator shall appoint persons to serve temporarily as directors in their place and stead pending the termination of such suspensions, or until such time as those who have been suspended cease to be directors of the credit union and their respective successors have been elected by the members at an annual or special meeting and have taken office. Directors appointed temporarily by the Administrator shall, within thirty days following their appointment, call a special meeting for the election of new directors, unless during the thirty-day period (A) the regular annual meeting is scheduled, or (B) the suspensions giving rise to the appointment of temporary directors are terminated.

"(i)(1) Any hearing provided for in this section shall be held in the Federal judicial district or in the territory in which the principal office of the credit union is located, unless the party afforded the hearing consents to another place, and shall be conducted in accordance with the provisions of chapter 5 of title 5 of the United States Code. Such hearing shall be private unless the Administrator, in his discretion, after fully considering the views of the party afforded the hearing, determines that a public hearing is necessary to protect the public interest. After such hearing, and within ninety days after the Administrator has notified the parties that the case has been submitted to him for final decision, he shall render his decision (which shall include findings of fact upon which his decision is predicated) and shall issue and serve upon each party to the proceeding an order or orders consistent with the provisions of this section. Judicial review of any such order shall be exclusively as

provided in this subsection (1). Unless a petition for review is timely filed in a court of appeals of the United States, as provided in paragraph (2) of this subsection and thereafter until the record in the proceeding has been filed as so provided, the Administrator may at any time, upon such notice and in such manner as he may deem proper, modify, terminate, or set aside any such order. Upon such filing of the record, the Administrator may modify, terminate, or set aside any such order with permission of the court.

"(2) Any party to the proceeding, or any person required by an order issued under this section to cease and desist from any of the practices or violations stated therein, may obtain a review of any order served pursuant to paragraph (1) of this subsection (other than an order issued with the consent of the credit union or the director, officer, committee member, or other person concerned or an order issued under subsection (h) of this section) by filing in the court of appeals of the United States for the circuit in which the principal office of the credit union is located, or in the United States Court of Appeals for the District of Columbia Circuit, within thirty days after the date of service of such order, a written petition praying that the order of the Administrator be modified, terminated, or set aside. A copy of such petition shall be forthwith transmitted by the clerk of the court to the Administrator, and thereupon the Administrator shall file in the court the record in the proceeding, as provided in section 2112 of title 28, United States Code. Upon the filing of such petition, such court shall have jurisdiction, which upon the filing of the record shall, except as provided in the last sentence of said paragraph (1), be exclusive, to affirm, modify, terminate, or set aside, in whole or in part, the order of the Administrator. Review of such proceedings shall be had as provided in chapter 7 of title 5, United States Code. The judgment and decree of the court shall be final, except that the same shall be subject to review by the Supreme Court upon certiorari, as provided in section 1254 of title 28, United States Code.

"(3) The commencement of proceedings for judicial review under paragraph (2) of this subsection shall not, unless specifically ordered by the court, operate as a stay of any order issued by the Administrator.

"(j) The Administrator may in his discretion apply to the United States district court, or the United States court of any territory within the jurisdiction of which the principal office of the credit union is located, for the enforcement of any effective and outstanding notice or order issued under this section, and such courts shall have jurisdiction and power to order and require compliance therewith. However, except as otherwise provided in this section, no court shall have jurisdiction to affect by injunction or otherwise the issuance or enforcement of any notice or order under this section or to review, modify, suspend, terminate, or set aside any such notice or order.

"(k) Any director, officer, or committee member, or former director, officer, or committee member, of an insured credit union or of a credit union any of the member accounts of which are insured, or any other person against whom there is outstanding and effective any notice or order (which is an order which has become final) served upon such director, officer, committee member, or other person under subsections (g)(3), (g)(4), or (h) of this section and who (1) participates in any manner in the conduct of the affairs of the credit union involved, or directly or indirectly solicits or procures, or transfers or attempts to transfer, or votes or attempts to vote, any proxies, consents, or authorizations in respect of any voting rights in such credit union, or (ii) without the prior written approval of the Administrator votes for a director, serves or acts as a director, officer, committee member, or employee of any credit union, shall upon conviction be fined not more than $5,000 or imprisoned for not more than one year, or both.

"(l) As used in this section (1) the terms 'cease-and-desist order which has become final' and 'order which has become final' means a cease-and-desist order, or an order issued by the Administrator with the consent of the credit union or the director, officer, committee member, or other person concerned, or with respect to which no petition for review of the action of the Administrator has been filed and perfected in a court of appeals as specified in paragraph (2) of subsection (i) of this section, or with respect to which the action of the court in which said petition is so filed is not subject to further review by the Supreme Court of the United States in proceedings provided for in said paragraph, or an order issued under subsection (h) of this section, and (2) the term 'violation' includes without limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding, or abetting a violation.

"(m) Any service required or authorized to be made by the Administrator under this section may be made by registered mail or in such other manner reasonably calculated to give actual notice as the Administrator may by regulation or otherwise provide. Copies of any notice or order served by the Administrator upon any State-chartered credit union or any director, officer, or committee member thereof or other person participating in the conduct of its affairs, pursuant to the provisions of this section, shall also be sent to the commission, board, or authority, if any, having supervision of such credit union.

"(n) In connection with any proceeding under subsection (e), (f)(1), or (g) of this section involving an insured State-chartered credit union or any director, officer, committee member, or other person participating in the conduct of its affairs, the Administrator shall provide the commission, board, or authority, if any, having supervision of such credit union, with notice of his intent to institute such a proceeding and the grounds therefor. Unless within such time as the Administrator deems appropriate in the light of the circumstances of the case (which time must be specified in the notice prescribed in the preceding sentence) satisfactory corrective action is effectuated by action of such commission, board, or authority, the Administrator may proceed as provided in this section. No credit union or other party who is the subject of any notice or order issued by the Administrator under this section shall have standing to raise the requirements of this subsection as ground for attacking the validity of any such notice or order.

"(o) In the course of or in connection with any proceeding under this section, the Administrator, or any designated representative thereof, including any person designated to conduct any hearing under this section, shall have the power to administer oaths and affirmations, to take or cause to be taken depositions, and to issue, revoke, quash, or modify subpenas and subpenas duces tecum, and the Administrator is empowered to make rules and regulations with respect to any such proceedings. The attendance of witnesses and the production of documents provided for in this subsection may be required from any place in any State or in any territory or other place subject to the jurisdiction of the United States at any designated place where such proceeding is being conducted. Any party to proceedings under this section may apply to the United States District Court for the District of Columbia, or the United States district court for the judicial district or the United States court in any territory in which such proceeding is being conducted, or where the witness resides or carries on business, for enforcement of any subpena or subpena duces tecum issued pursuant to this subsection, and such courts shall have jurisdiction and power to order and require compliance therewith. Witnesses subpenaed under this section shall be paid the same fees and mileage that are paid witnesses in the district courts of the United States. Any court having jurisdiction of any proceeding instituted under this section by an insured credit union or a director, officer, or committee member thereof may allow to any such party such reasonable expenses and attorneys' fees as it deems just and proper, and such expenses and fees shall be paid by the credit union or from its assets.

"PAYMENT OF INSURANCE

"SEC. 207. (a)(1) Upon his finding that a Federal credit union insured under this title is bankrupt or insolvent, the Administrator shall close such credit union for liquidation and appoint himself liquidating agent therefor.

"(2) Notwithstanding any other provision of law, it shall be the duty of the Administrator as such liquidating agent to cause notice to be given, by advertisement in such newspapers as he may direct, to all persons having claims against such closed credit union, to present their claims within four months from the date such advertisement first appeared; to realize upon the assets of such closed credit union, having due regard to the condition of credit in the locality; and to wind up the affairs of such closed credit union in conformity with the provisions of law relating to the liquidation of bankrupt or insolvent Federal credit unions, except as herein otherwise provided. The Administrator as such liquidating agent shall pay to himself for his own account such portion of the amounts realized from such liquidation as he shall be entitled to receive on account of his subrogation to the claims of members, and he shall pay to members and other creditors the net amounts available for distribution to them. The Administrator as such liquidating agent, however, may, in his discretion, pay dividends on proved claims at any time after the expiration of the period of advertisement made pursuant to the first sentence of this paragraph, and no liability shall attach to the Administrator himself for as such liquidating agent by reason of any such payment for failure to pay dividends to a claimant whose claim is not proved at the time of any such payment.

"(3) Notwithstanding any other provision of law, the Administrator as liquidating agent of a closed Federal credit union insured under this title shall not be required to furnish bond and shall have the right to appoint an agent or agents to assist him in his duties as such liquidating agent. All fees, compensation, and expenses of liquidation and administration thereof shall be fixed by the Administrator and may be paid by him out of funds coming into his possession as such liquidating agent.

"(b) Whenever any insured State-chartered credit union shall have been closed by action of its board of directors or by the commission, board, or authority having supervision of such credit union, as the case may be, or by a court of competent jurisdiction, on account of bankruptcy or insolvency, the Administrator shall accept appointment as liquidating agent therefor, if such appointment is tendered by the commission, board, or authority having supervision of such credit union, or by a court of competent jurisdiction, and is authorized or permitted by

State law. With respect to any such State-chartered credit union, the Administrator as such liquidating agent shall possess all the rights, powers, and privileges granted by State law to a liquidating agent of a State-chartered credit union. For the purposes of this subsection, the term 'liquidating agent' includes a liquidating agent, receiver, conservator, commission, person, or other agency charged by law with the duty of winding up the affairs of a credit union.

"(c) Whenever an insured credit union shall have been closed for liquidation on account of bankruptcy or insolvency, payment of the insured accounts in such credit union shall be made by the Administrator as soon as possible, subject to the provisions of subsection (d) of this section. For the purposes of this subsection, the term 'insured account' means the total amount of the account in the member's name (after deducting offsets) less any part thereof which is in excess of $20,000. Such amount shall be determined according to such regulations as the Administrator may prescribe, and, in determining the amount due to any member, there shall be added together all accounts in the credit union maintained by him for his own benefit either in his own name or in the names of others. The Administrator may define, with such classifications and exceptions as he may prescribe, the extent of the insurance coverage provided for member accounts, including member accounts in the name of a minor, in trust, or in joint tenancy. The Administrator, in his discretion, may require proof of claims to be filed before paying the insured accounts, and in any case where he is not satisfied as to the validity of a claim for an insured account, he may require the final determination of a court of competent jurisdiction before paying such claim.

"(d) In the case of a closed Federal credit union, the Administrator, upon the payment to any member as provided, in subsection (c) of this section, shall be subrogated to all rights of the member against such closed credit union to the extent of such payment. In the case of any other closed insured credit union, the Administrator shall not make any payment to any member until the right of the Administrator to be subrogated to the rights of such member on the same basis as provided in the case of a closed Federal credit union shall have been recognized either by express provision of State law, by allowance of claims by the commission, board, or authority having supervision of such credit union, by assignment of claims by members, or by any other effective method. In the case of any closed insured credit union, such subrogation shall include the right on the part of the Administrator to receive the same dividends from the proceeds of the assets of such closed credit union as would have been payable to the member on a claim for the insured account, but such member shall retain his claim for any uninsured portion of his account. The rights of members and other creditors of any State-chartered credit union shall be determined in accordance with the applicable provisions of State law.

"(e) Payment of an insured account to any person by the Administrator shall discharge the Administrator to the same extent that payment to such person by the closed insured credit union would have discharged it from liability for the insured account.

"(f) Except as otherwise prescribed by the Administrator, the Administrator shall not be required to recognize as the owner of any portion of an account appearing on the records of the closed credit union under a name other than that of the claimant any person whose name or interest as such owner is not disclosed on the records of such closed credit union as part owner of such account, if such recognition would increase the aggregate amount of the insured accounts in such closed credit union.

"(g) The Administrator may withhold payment of such portion of the insured account of any member of a closed credit union as may be required to provide for the payment of any direct or indirect liability of such member to the closed credit union or its liquidating agent, which is not offset against a claim due from such credit union, pending the determination and payment of such liability by such member or any other person liable therefor.

"(h) If, after the Administrator shall have given at least four months' notice to the member by mailing a copy thereof to his last-known address appearing on the records of the closed credit union, any member of the closed credit union shall fail to claim his insured account from the Administrator within 18 months after the appointment of the liquidating agent for the closed credit union, all rights of the member against the Administrator with respect to the insured account shall be barred, and all rights of the member against the closed credit union, or the estate to which the Administrator may have become subrogated, shall thereupon revert to the member.

"(i)(1) Liquidating agents of insured credit unions closed for liquidation on account of bankruptcy or insolvency may offer the assets of such credit unions for sale to the Administrator or as security for loans from the Administrator, upon receiving permission from the commission, board, or authority having supervision of such credit union, in the case of an insured State-chartered credit union, in accordance with express provisions of State law. The proceeds of every such sale or loan shall be utilized for the same purposes and in the same manner as other funds realized from the liquidation of the assets of such credit unions. The Administrator, in his discretion, may make loans on the security of or may purchase and liquidate or sell any part of the assets of an insured credit union closed for liquidation on account of bankruptcy or insolvency, but in any case in which the Administrator is acting as liquidating agent of a closed insured credit union, no such loan or purchase shall be made without the approval of a court of competent jurisdiction.

"(2) No agreement which tends to diminish or defeat the right, title, or interest of the Administrator in any asset acquired by him under his subsection, either as security for a loan or by purchase, shall be valid against the Administrator unless such agreement—

"(A) shall be in writing;

"(B) shall have been executed by the credit union and the person or persons claiming an adverse interest thereunder, including the obligor, contemporaneously with the acquisition of the asset by the credit union;

"(C) shall have been approved by the board of directors of the credit union, which approval shall be reflected in the minutes of such board; and

"(D) shall have been, continuously, from the time of its execution, an official record of the credit union.

"SPECIAL ASSISTANCE TO AVOID LIQUIDATION

"SEC. 208. (a)(1) In order to reopen a closed insured credit union or in order to prevent the closing of an insured credit union which the Administrator has determined is in danger of closing, the Administrator, in his discertion, is authorized to make loans to, or purchase the assets of, or establish accounts in such insured credit union upon such terms and conditions as he may prescribe. Such loans shall be made and such accounts shall be established only when, in the opinion of the Administrator, such action is necessary to protect the Fund or the interests of the members of the credit union. Such loans and accounts may be in subordination to the rights of members and creditors of the credit union.

"(2) Whenever in the judgment of the Administrator such action will reduce the risk or avert a threatened loss to the fund and will facilitate a merger or consolidation of an insured credit union with another insured credit union, or will facilitate the sale of the assets of an open or closed insured credit union to and assumption of its liability by another insured credit union, the Administrator may, upon such terms and conditions as he may determine, make loans secured in whole or in part by assets of an open or closed insured credit union, which loans may be in subordination to the rights of members and creditors of such credit union, or the Administrator may purchase any of such assets or may guarantee any other insured credit union against loss by reason of its assuming the liabilities and purchasing the assets of an open or closed insured credit union.

"(3) No agreement which tends to diminish or defeat the right, title, or interest of the Administrator in any asset acquired by him under this subsection, either as security for a loan or by purchase, shall be valid against the Administrator unless such agreement—

"(A) shall be in writing;

"(B) shall have been executed by the credit union and the person or persons claiming an adverse interest thereunder, including the obligor, contemporaneously with the acquisition of the asset by the credit union;

"(C) shall have been approved by the board of directors of the credit union, which approval shall be reflected in the minutes of such board; and

"(D) shall have been, continuously, from the time of its execution, an official record of the credit union.

"(b) For the protection of the Fund, the Administrator, without regard to the Federal Property and Administrative Services Act of 1949, may—

"(1) deal with, complete, reconstruct, rent, renovate, modernize, insure, make contracts for the management of, sell for cash or credit, or lease, in his discretion, any real property acquired or held by him under this section; and

"(2) assign or sell at public or private sale, or otherwise, dispose of, any evidence of debt, contract, claim, personal property, or security assigned to or held by him under this section.

Section 3709 of the Revised Statutes of the United States shall not apply to any purchase or contract for services or supplies made or entered into by the Administrator under this section if the amount thereof does not exceed $1,000, or to any contract for hazard insurance on any real property acquired or held by him under this section.

"(c) In connection with the liquidation of any insured credit union, the Administrator shall have the power to carry on the business of and collect all obligations to the credit union, to settle, compromise, or release claims in favor of or against the credit union, and to do all other things that may be necessary in connection therewith, subject to the regulation of the court or other public body having jurisdiction over the matter.

"(d) Money received by the Administrator in carrying out this section shall be paid into the Fund.

"ADMINISTRATIVE PROVISIONS

"SEC. 209. (a) In carrying out the purposes of this title, the Administrator may—

"(1) make contracts;

"(2) sue and be sued, complain and defend, in any court of law or equity, State or Federal. All suits of a civil nature at common law or in equity to which the Administrator shall be a party shall be deemed to arise under the laws of the United States, and the United States district courts shall have original jurisdiction thereof, without regard to the amount in controversy. The Administrator may, without bond or security, remove any such action, suit, or proceeding from a State court to the United States district court for the district or division embracing the place where the same is pending by following any procedure for removal now or hereafter in effect, except that any such suit to which the Administrator is a party in his capacity as liquidating agent of a State-chartered credit union and which involves only the rights or obligations of members, creditors, and such State credit union under State law shall not be deemed to arise under the laws of the United States. No attachment or execution shall be issued against the Administrator or his property before final judgment in any suit, action, or proceeding in any State, county, municipal, or United States court. The Administrator shall designate an agent upon whom service of process may be made in any State, territory, or jurisdiction in which any insured credit union is located;

"(3) pursue to final disposition by way of compromise or otherwise claims both for and against the United States (other than tort claims, claims involving administrative expenses, and claims in excess of $5,000 arising out of contracts for construction, repairs, and the purchase of supplies and materials) which are not in litigation and have not been referred to the Department of Justice;

"(4) to appoint such officers and employees as are not otherwise provided for in this Act, to define their duties, fix their compensation, require bonds of them and fix the penalty thereof, and to dismiss at pleasure such officers or employees. Nothing in this or any other Act shall be construed to prevent the appointment and compensation as an officer or employee of the Administration of any officer or employee of the United States in any board, commission, independent establishment, or executive department thereof;

"(5) employ experts and consultants or organizations thereof, as authorized by section 15 of the Administrative Expenses Act of 1946 (5 U.S.C. 55a);

"(6) prescribe the manner in which his general business may be conducted and the privileges granted to him by law may be exercised and enjoyed;

"(7) exercise all powers specifically granted by the provisions of this title and such incidental powers as shall be necessary to carry out the powers so granted;

"(8) make examinations of and require information and reports from insured credit unions, as provided in this title.

"(9) act as liquidating agent;

"(10) delegate to any officer or employee of the Administration such of his functions as he deems appropriate; and

"(11) prescribe such rules and regulations as he may deem necessary or appropriate to carry out the provisions of this title.

"(b) With respect to the financial operations arising by reason of this title, the Administrator shall—

"(1) prepare annually and submit a business-type budget as provided for wholly owned Government corporations by the Government Corporation Control Act; and

"(2) maintain an integral set of accounts, which shall be audited annually by the General Accounting Office in accordance with principles and procedures applicable to commercial corporate transactions, as provided by section 105 of the Government Corporation Control Act.

"NONDISCRIMINATORY PROVISION

"SEC. 210. It is not the purpose of this title to discriminate in any manner against State-chartered credit unions and in favor of Federal credit unions, but it is the purpose of this title to provide all credit unions with the same opportunity to obtain and enjoy the benefits of this title."

SEC. 2. Section 101 of the Federal Credit Union Act, as redesignated by section 1 of this Act (formerly section 2 of such Act), is amended—

(1) by striking out the word "and" at the end of paragraph (2) thereof;

(2) by striking out the period at the end of paragraph (3) thereof and inserting "; and" in lieu thereof; and

(3) by adding the following new paragraphs after paragraph (3) thereof:

"(4) The terms 'member account' and 'account' (when referring to the account of a member of a credit union) mean a share, share certificate, or share deposit account of a member of a credit union of a type approved by the Administrator which evidences money or its equivalent received or held by a credit union in the usual course of business and for which it has given or is obligated to give credit to the account of the member, and, in the case of a credit union serving predominantly low-income members (as defined by the Administrator), such terms (when referring to the account of a nonmember served by such credit union) mean a share, share certificate, or share deposit account of such nonmember which is of a type approved by the Administrator and evidences money or its equivalent received or held by such credit union in the usual course of business and for which it has given or is obligated to give credit to the account of such nonmember;

"(5) The terms 'State credit union' and 'State chartered credit union' mean a credit union organized and operated according to the laws of any State, the District of Columbia, the several territories and possessions of the United States, the Panama Canal Zone, or the Commonwealth of Puerto Rico, which laws provide for the organization of credit unions similar in principle and objectives to Federal credit unions;

"(6) The term 'insured credit union' means any credit union the member accounts of which are insured in accordance with the provisions of title II of this Act, and the term 'noninsured credit union' means any credit union the member accounts of which are not so insured;

"(7) The term 'Fund' means the National Credit Union Share Insurance Fund; and

"(8) The term 'branch' includes any branch credit union, branch office, branch agency, additional office, or any branch place of business located in any State of the United States, the District of Columbia, the several territories and possessions of the United States, the Panama Canal Zone, or the Commonwealth of Puerto Rico, at which member accounts are established or money lent."

SEC. 3. Section 493 of title 18 of the United States Code (relating to bonds and obligations of certain lending agencies) is amended—

(1) by inserting the words "National Credit Union Administration," following the words "Federal Deposit Insurance Corporation,"; and

(2) by inserting the words "insured credit union," following the words "intermediate credit bank,".

SEC. 4. Section 657 of title 18 of the United States Code (relating to lending, credit, and insurance institutions) is amended—

(1) by inserting the words "National Credit Union Administration," following the words "Federal Deposit Insurance Corporation,"; and

(2) by inserting the words "or by the Administrator of the National Credit Union Administration" following the words "Federal Savings and Loan Insurance Corporation".

SEC. 5. Section 709 of title 18 of the United States Code (relating to false advertising and misuses of names to indicate a Federal agency) is amended by adding after the third paragraph thereof the following paragraph:

"Whoever falsely advertises or otherwise represents by any device whatsoever that his or its deposit liabilities, obligations, certificates, or shares are insured under the Federal Credit Union Act or by the United States or any instrumentality thereof, or, being an insured credit union as defined in that Act falsely advertises or otherwise represents by any device whatsoever the extent to which or the manner in which shareholdings in such credit union are insured under such Act; or".

SEC. 6. Section 1006 of title 18 of the United States Code (relating to false entries in reports and transactions of Federal credit institutions) is amended—

(1) by inserting the words "National Credit Union Administration," following the words "Federal Deposit Insurance Corporation,"; and

(2) by inserting the words "or by the Administrator of the National Credit Union Administration" following the words "Federal Savings and Loan Insurance Corporation".

SEC. 7. Section 1014 of title 18 of the United States Code (relating to false statements in loan and credit applications) is amended by striking out the words "or a Federal credit union" and by inserting the words ", a Federal credit union, or an insured State-chartered credit union" in lieu thereof.

SEC. 8. Section 2113 of title 18 of the United States Code (relating to bank robbery and incidental crimes) is amended as follows:

(1) Subsections (a), (b), and (c) are each amended by inserting the words "credit union," following the word "bank," each place it appears therein.

(2) The following new subsection is added at the end thereof:

"(h) As used in this section the term 'credit union' means any Federal credit union and any State-chartered credit union the accounts of which are insured by the Administrator of the National Credit Union Administration."

SEC. 9. Section 116 of the Federal Credit Union Act, as redesignated by section 1 of this Act (formerly section 17 of such Act), is amended to read as follows:

"SEC. 116. (a) Immediately before the payment of each dividend, the gross earnings of the credit union shall be determined. From this amount, there shall be set aside, as a regular reserve against losses on loans and against such other losses as may be specified in regulations prescribed under this Act, sums in accordance with the following schedule:

"10 per centum of gross income until the regular reserve shall equal 7½ per centum of the total of outstanding loans and risk assets, then

"5 per centum of gross income until the regular reserve shall equal 10 per centum of the total of outstanding loans and risk assets.

Whenever the regular reserve falls below 10 per centum or 7½ per centum of the total of outstanding loans and risks assets, as the case may be, it shall be replenished by regular contributions in such amounts as may be needed to maintain the reserve goals of 7½ per centum or 10 per centum.

"(b) In addition to such regular reserve, special reserves to protect the interests of members shall be established—

"(1) when required by regulation; or

"(2) when found by the Administrator, in

any special case, to be necessary for that purpose."

SEC. 10. Section 107 of the Federal Credit Union Act, as redesignated by section 1 of this Act (formerly section 8 of such Act), is amended—

(1) by striking out paragraph (7) and inserting in lieu thereof the following:

"(7) to receive from its members or other federally insured credit unions payments on shares, share certificates, or share deposits, and, in the case of credit unions serving predominantly low-income members (as defined by the Administrator), to receive payments on shares, share certificates, or share deposits from nonmembers;" and

(2) by adding at the end of paragraph (8) the following: "and (H) in shares, share certificates, or share deposits of federally insured credit unions;".

Mr. BENNETT. Mr. President, I appreciate the thoughtfulness of the chairman of our Banking and Currency Committee, Senator SPARKMAN, in allowing me to report this share insurance bill for credit unions. The fact that he has done so is an indication of the nonpartisan nature of the measure and the complete cooperation which he and other members of the committee have displayed in the consideration of this bill. Indeed, the bill was reported by the committee without any objection after the approval of several amendments which I believe have adapted its provisions to reflect the unique operations and structure of credit unions. At the same time, the bill provides what I consider to be a reasonable assurance that the insurance program will be able to meet demands which may be made on it as the result of the liquidation of credit unions or difficulties experienced by credit unions which require the use of the fund to assist in the prevention of liquidation.

The need and desirability of this legislation, I believe, is self-evident. Credit unions are the only major depository institutions which do not have an opportunity to insure their accounts under a Federal insurance program. We are all aware that the great preponderance of savings in commercial banks and savings and loan associations are insured either under the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation. Some State-chartered banks and savings and loan associations are insured under State or private insurance programs. On the other hand, the only share insurance available to credit unions is that made available to State credit unions through State insurance programs now operating in two States and a private plan operating in one State. These plans are available only to a relatively few credit unions and thus only a very small proportion of the more than $14 billion of savings held by 24,000 credit unions operating in the United States is insured against loss by the saver. Federal credit unions are unique in that they are the only federally chartered thrift institutions that do not provide Federal share insurance protection to their depositors.

Perhaps equally as important is the fact that most credit union members do not know that their savings are uninsured. The returns received as a result of a continuing survey by the National Credit Union Administration indicate that five out of six respondents believed their shares were insured. The overall loss experience in credit unions has been relatively small. Yet the losses which have occurred have weighed heavily on a few credit unions and only a relatively few members. Since many credit unions deal primarily with individuals having limited incomes, it is particularly important that they enjoy the same insurance protection enjoyed by other savers and depositors in other financial institutions.

Recent testimony in our Banking and Currency Committee indicated that credit unions in limited-income areas which are specifically established to assist poor people would benefit greatly from share insurance. Mr. Edward C. Sylvester, Jr., testifying for the Urban Coalition Action Council, testified that the lack of deposit insurance is a serious deficiency. He supported share insurance on the basis that it would provide additional funds for credit unions serving residents in the inner city where it is difficult to attract deposits. He said of share insurance:

It seems to us to be an essential device really to encourage others to participate in credit unions and in making a great deal more capital available to them than they are apt to get through their normal membership activities.

A program of Federal share insurance should also enable the average credit union to be more competitive in attracting savings, thus enabling such credit unions to increase their services to members.

The need for share insurance has been made clear by a study of regular reserves in Federal credit unions published by the Bureau of Federal Credit Unions last year. In the study, the Bureau noted that 1,204 Federal credit unions completed liquidation in the 5 years ending December 21, 1967. Sixteen percent of 189 of these liquidated at a loss to shareholders. Losses to the shareholders, although small in dollar amount, totaled just over 20 percent of shares. The majority of the credit unions which paid less than 100 percent at liquidation were small, according to the Bureau's study. Almost four-fifths of them had assets of less than $25,000. It appears quite clear that the burden of loss falls on the smaller credit union and the small saver. Yet the credit union can and should be most useful to those who have a relatively small amount to save. There are more than 9,500 Federal credit unions with assets of less than $500,000 serving people who may have limited access to other thrift and credit facilities.

Stabilization or liquidation funds have been esatblished by State credit union organizations fo rthe purpose of assisting liquidating credit unions to return 100 cents on their members' share dollars. Despite the beneficial activities of the funds, credit unions continue to liquidate at a loss to their members. In 1969, 31 of the 36 Federal credit unions that liquidated at a loss to shareholders were located in States that had stabilization funds.

The need for share insurance is further indicated by moves within some States for statewide share insurance. State-chartered credit unions in Massachusetts and Wisconsin now have a State plan for insurance of member accounts, and Rhode Island has recently passed enabling legislation of this nature. The State plans, however, have the disadvantage of a restricted membership and of not being available to federally chartered credit unions. Thus, a system which will provide insurance for Federal credit unions and for State-chartered credit unions, if they so desire, is needed.

In addition to share insurance, credit unions which are serving low-income persons need assistance in attracting capital if they are to meet the legitimate needs of their members. Because those who are members have relatively little in savings to deposit in their credit union, the need for loans at reasonable rates of interest by members far exceeds the capital available to the credit union. In order to overcome this deficiency, it is necessary for credit unions serving low-income persons to receive capital from outside sources. Many individuals, financial institutions, and other businesses have expressed a willingness to deposit assets in credit unions serving low-income persons. To make it possible for those who have capital to deposit it in credit unions serving low-income persons, it is necessary to amend the Federal Credit Union Act to authorize credit unions serving low-income persons to accept deposits from nonmembers and to authorize Federal credit unions to place deposits in other insured credit unions.

Mr. President, I do not desire to discuss the provisions of the bill in any detail, but I do believe that it is appropriate to generally outline what the bill contains and discuss briefly some of the considerations of the committee in reporting the bill in its present form.

The bill amends the present Federal Credit Union Act by adding a new title providing share insurance. It also amends the present act by broadening the authority of certain specified credit unions to allow deposits by nonmembers and reduces the regular reserve schedule for Federal credit unions.

INSURANCE OF CREDIT UNION SHARES

The committee bill provides that the Administrator of the National Credit Union Administration insure the member accounts of all Federal credit unions and may insure the member accounts of credit unions organized according to the laws of any State, territory, or possession of the United States, the Panama Canal Zone, and Puerto Rico, as well as nonregulated overseas credit unions operating under the Department of Defense jurisdiction. Authority to insure nonregulated overseas credit unions was added by the committee in response to a request that insurance be made available to four uncharted credit unions serving American military personnel at overseas installations. The committee agreed to authorize such insurance on the condition that these overseas installations meet all the requirements of the Federal Credit Union Act and those addi-

tional requirements made by the Administrator under this legislation.

Applications by State and Federal credit unions for insurance must contain an agreement by the applicant with regard to specific provisions such as examinations and their cost, reserves as required by the Administrator, protection against certain insurable losses, reports, insurance premiums, and permissible securities and accounts.

The committee amended this section of the bill to assure that examinations required by the Administrator and the resulting expense to credit unions be minimized. This was done by requiring the Administrator to so structure presently required examinations of Federal credit unions so that they could be used for insurance purposes. The Administrator is also required to use State examinations to the maximum extent feasible.

The bill as introduced was also amended to assure that reserves required by other than Federal credit unions would not be less than those required under title I of the act for Federal credit unions. The committee decided such a provision was necessary to protect the solvency of the insurance fund as well as a matter of equity that all insured credit unions comply with the minimum net worth reserve requirements contained in title I of the act. State authorities presently determine reserves for credit unions under their jurisdiction and they would continue to determine such reserves. However, the Administrator is authorized to require special reserves on insured non-Federal credit unions in the event reserves required by authorities having jurisdiction over these credit unions are less than those required under title I of the act for Federal credit unions.

Lower reserve requirements on the part of State-chartered credit unions in a particular State would increase the risk to the fund and penalize all other credit unions which pay the same insurance premium but which because of their higher reserve requirements, present a lesser risk to the fund. Authority to establish uniform reserve requirements is also provided the Federal Home Loan Bank Board with respect to State-chartered savings and loan associations insured by the Federal Savings and Loan Insurance Corporation.

Federal credit unions are required to be insured under the act. As originally written, if a Federal credit union application for insurance were denied by the Administrator, the credit union was not given a specific time period within which to qualify for share insurance and thus retain its Federal charter. The committee amended the bill to provide all Federal credit unions with 1 year in which to qualify and become insured. If it did not meet this requirement, its charter would be either revoked or suspended. Under the committee bill, the Administrator could also provide a Federal credit union with partial share insurance up to the extent of its unimpaired share capital.

The committee considered a proposal which would have required the Administrator to grant provisional insurance for not less than 1 year and not more than 2 years to all Federal credit unions which did not meet insurance requirements. This proposal would have provided insurance to credit unions whose capital was impaired or whose financial policies or condition were found to be unsafe or unsound. The committee decided that such a provision would unduly restrict the authority of the Administrator to require such credit unions to meet insurance requirements while unduly jeopardizing the insurance fund and possibly increasing the financial burden placed on all other credit unions. Section 206(d) of the bill provides that when insured status is terminated, all accounts insured as of that date would continue to be insured for 1 year. The proposal rejected by the committee, therefore, would have provided a minimum of 2 years of insurance and possibly 3 years of insurance to credit unions which were unsafe or unsound without authority for the insurance coverage to be withdrawn by the Administrator. The committee provision, on the other hand, provides an opportunity and a strong incentive for unqualified credit unions to become qualified without jeopardizing their ability to attract funds or risking the reserves of the insurance fund.

REPORTS OF CONDITION AND INSURANCE PREMIUMS

The bill authorizes the Administrator to require reports of condition and to require the payment of insurance premiums. A committee amendment assures that reports will be kept to a minimum needed to meet insurance requirements by requiring present Federal credit union reports to be structured so that they can be used for insurance purposes and requiring the use of reports made to State agencies to the extent feasible such reports can be used for insurance purposes. A provision is contained prorating the insurance premium for credit unions which become insured during the insurance year, and in order to avoid the burden of a premium on newly chartered credit unions during their formative period, the bill provides for a deduction of $10,000 of share account liability in computing the first annual insurance premium.

No provision is made in the bill for original capitalization or funding of the credit union insurance fund. This is at variance with other Federal insurance funds which have been established by the Congress and minimizes the burden on the insured institutions.

The annual premium required is one-twelfth of 1 percent. The committee also considered a recommendation that the annual premium be one-twentieth of 1 percent.

Both the one-twelfth of 1 percent and the one-twentieth of 1 percent annual premium rates would produce amounts substantially in excess of the historical losses of Federal credit unions which averaged 0.0089 percent for the period since 1934. Only in 1 year during that period were the actual losses greater than the total income that would have resulted from a premium rate of one-twentieth of 1 percent. It must be remembered, however, that the purpose of the insurance fund is to pay immediately to all savers the amount of their savings up to $20,000 in a credit union and to assist other credit unions over difficult periods so that they will not be forced to liquidate. The temporary cash demands on the fund, therefore, could greatly exceed the amount indicated by the ultimate loss figures. As an example, the disbursements of the Federal Deposit Insurance Corporation during its lifetime have been about eight times as great as the losses.

There was no way for the committee to determine what the demands on the fund will be in the future. It was decided, however, that there is some value in building up the fund during the early years. The committee, therefore, approved the one-twelfth of 1 percent annual premium rate along with language providing for a partial rebate of paid-in insurance premiums to liquidating credit unions. Thus, any surplus produced by the higher premium would ultimately be paid back to a credit union if it liquidates. Under the committee proposal requiring one-twelfth of 1 percent as an annual premium, the National Credit Union Administration estimates that 16 years would be required to build up an insurance fund equal to 1 percent of member accounts in insured credit unions.

The bill as introduced established the normal operating level of the fund at 2 percent of member accounts. The Acting Administrator of the National Credit Union Administration, Mr. J. Deane Gannon, recommended that the normal operating level be reduced to 1 percent and the committee approved such a reduction. Under the bill when the fund reaches 1 percent, the Administrator may reduce the annual rate of premium from the one-twelfth of 1 percent to a level he deems sufficient to maintain an adequate insurance fund. In addition, the committee approved a provision which would under certain conditions entitle an insured credit union which is closed for liquidation to a rebate of its share of the insurance fund after deducting its share of losses and administrative expenses and any claims arising from liquidations. The Administrator is also authorized under this section to increase the annual premium to an amount not to exceed double the regular premium or one-sixth of 1 percent for any year in which the expenditures from the fund exceed the income to the fund.

INSURANCE FUND CREATED

The bill creates a national credit union share insurance fund in the Treasury of the United States as a revolving fund and authorizes the Administrator to use the fund to administer and operate the share insurance program. Authority is also provided for the Secretary of the Treasury to make loans to the fund not to exceed an aggregate of $100 million and to assess interest charges, based on outstanding U.S. debt obligations, for such loans.

EXAMINATION AND REPORTS

The Administrator is authorized to appoint examiners and claim agents who would have power to examine insured credit unions and investigate claims for insured accounts. Provision is also made for acceptance of reports made by or to

any State supervisory agency and for furnishing reports of examination by the Administrator to such authorities.

REQUIREMENTS OF INSURED CREDIT UNIONS

The bill contains requirements governing insured credit unions, including a requirement, unless exempted by the Administrator, that all advertising must contain a statement that member accounts are insured and that a sign be displayed showing that the credit union has such insurance. Written approval of the Administrator would be required for certain mergers, transfer of assets, conversion to a noninsured institution, or employment of persons convicted of criminal offenses involving personal dishonesty or breach of trust. The Administrator would be required to establish minimum security standards and procedures to be complied with by insured credit unions. In establishing such standards, the committee expects the Administrator to take into consideration those factors necessary to make the standards responsive to the circumstances of individual credit unions.

The committee deleted from the original bill language providing for a penalty of up to $100 a day if a credit union does not comply with the requirements stating that member accounts are insured. There was concern by some credit union representatives that the Administrator might impose such a penalty on small credit unions with temporary offices.

The committee also deleted a prohibition against establishing branches or moving an office or branch without approval from the Administrator. Since credit unions are noncompetitive with each other, authority over branching or movement of the main office is not necessary for proper operation of the insurance program. If branching were to affect costs of operation adversely, the Administrator could deal with the problem under other authority in the bill.

TERMINATION OF INSURANCE; CEASE-AND-DESIST PROCEDURES; AND REMOVAL OF OFFICERS

The bill provides for voluntary termination of insurance by State-chartered and nonregulated credit unions. It also provides for termination of insurance by the Administrator after proper notice and hearing. In addition, this section authorizes cease-and-desist proceedings and the removal of directors, officers, and committee members for cause after hearing and with provision for judicial review. In the unlikely event that all directors of a credit union are suspended, the Administrator would be authorized to appoint temporary directors to operate the credit union until new ones were elected by the credit union members.

This authority assures credit union members access to their savings and continued operation of their credit union in the event the entire management of the credit union is suspended. The committee amended this section to provide for an election of new directors by members of the credit union within 30 days after the appointment of temporary directors.

PAYMENTS OF INSURANCE

The bill contains detailed procedures for the closing of bankrupt or insolvent insured credit unions for liquidation, the appointment of the Administrator as liquidating agent, and for the payment of insured member accounts. The Administrator is authorized to appoint an agent or agents to assist him in his duties as liquidating agent. It is expected that the Administrator will use whatever procedures or means he deems appropriate to assist him in his responsibilities as liquidating agent to minimize the burden on the insurance fund. The Administrator, however, is not authorized to delegate his responsibility as liquidating agent.

ASSISTANCE TO AVOID LIQUIDATION

The Administrator is also authorized to make loans to or purchase assets in order to reopen a closed insured credit union or to prevent the closing of an insured credit union.

REGULAR RESERVE REQUIREMENTS

The bill revises the regular reserve requirements for Federal credit unions to provide for a transfer of 10 percent of gross income until the regular reserve equals 7½ percent of loans and risk assets after which a 5-percent transfer of gross income is required until the regular reserve equals 10 percent of loans and risk assets. By comparison, the existing law requires a transfer of 20 percent of net earnings until the regular reserve equals 10 percent of members' shares. Basing the reserve requirement on loans and other risk assets instead of shares will reduce the reserve requirement by about 14 percent for the average credit union.

The provision is generally in line with a formula developed by the National Credit Union Administration after a comprehensive study of Federal credit union losses and reserves. However, the committee amended the formula developed by the Administration in order to reduce the burden of reserve transfers on small, newly organized, or relatively less efficient credit unions.

NONMEMBER SHARES AND INVESTMENTS IN CREDIT UNIONS

Finally, the bill amends the Federal Credit Union Act to allow credit unions serving predominantly low-income members—as defined by the Administrator—to accept funds for nonmembers. Share deposits in credit unions serving low-income members are presently insufficient to meet the needs of their members.

This amendment would make it possible for others who are not included in the "common bond" required for membership, to invest in shares of credit unions serving low-income members and thus assist in providing reasonable cost credit to these individuals. This section also authorizes Federal credit unions to invest in shares of federally insured credit unions.

Mr. President, I am pleased to be able to say that there is no opposition to this bill from the organized credit union industry. This is significant because less than 4 months ago I could not have made such a statement. At that time, when I tried to provide protection for the savings of credit union members, CUNA International, the largest credit union trade association, mustered an organized campaign against the provision. The unfortunate thing about that campaign was that its basis was irresponsible misrepresentation of the proposal. Despite the all-out opposition of CUNA International it failed in the Senate by only a few votes. The only argument against it on the Senate floor was that there had been no hearings by the Banking Committee. There is no doubt in my mind that the test vote in the Senate and the reaction of credit unions throughout the country to CUNA International's opposition were very instrumental in bringing about a change in the association's policy.

Indeed, in May of this year representatives of the credit unions affiliated with CUNA forced a change in the association's official position by a convention vote of almost 2 to 1 in favor of a Federal program providing share insurance for their members. I, of course, welcomed this grassroots support. I also should point out that despite the earlier unfortunate attitude I would like to express here today my gratitude to CUNA for its support of this share insurance proposal.

I also thank the National Association of Federal Credit Unions representing perhaps 10 to 15 percent of Federal credit unions and now a major and responsible voice in the credit union movement. NAFCU has strongly supported the Federal share insurance proposal from the beginning and they, along with individual credit unions throughout the country, deserve much of the credit for this bill protecting the shareholders in America's credit unions.

Mr. President, our hearings on the bill and the deliberations of the committee have resulted in a good bill which will provide the needed protection for savers who place their funds in credit unions.

I believe this protection should have been provided long ago and that there is no acceptable excuse for further delay. I therefore hope that the Senate will approve the legislation so that the more than 22 million members of credit unions, many of whom are in the lower income categories, may receive protection for their savings this year.

Thank you, Mr. President.

Mr. SPARKMAN. Mr. President, the purpose of the bill which is pending Senate consideration, that is, S. 3822, is to establish a Federal system of share insurance for savings in credit unions and the regulatory authority necessary to operate such a share insurance system. In this connection, this legislation is intended to provide the same sort of protection for savings accounts in credit unions as is now provided for savings accounts in banks through the Federal Deposit Insurance Corporation and on savings accounts in savings and loan associations through the Federal Savings and Loan Insurance Corporation.

In general, insurance coverage would be provided for all federally chartered credit unions. Insurance coverage would also be provided for State chartered credit unions and credit unions operated under the jurisdiction of the Department of Defense if those credit unions elected to be covered and agreed to comply with all the requirements of the insurance program.

For the information of the Senate, the Banking and Currency Committee held hearings on this measure on June 18 and 19 and the bill was subsequently reported favorably without objection on August 4.

In addition to the purposes which I have already described, S. 3822 would change certain reserve requirements of Federal credit unions, authorize Federal credit unions to invest in other insured credit unions and would authorize certain Federal credit unions serving low-income persons to accept funds from nonmembers.

Mr. President, I am sure that all the Members of the Senate know that the growth of credit unions in the last three decades has been phenomenal. At the present there are approximately 24,000 credit unions in this country. This is a greater number than all other financial institutions combined. Of the 24,000 some 13,000 credit unions are federally chartered. This is more than all other federally chartered institutions combined. More than 20 million Americans are members of credit unions and their saving deposits exceed $14 billion.

Credit unions in general, and specifically Federal credit unions, are perhaps unique in that today they are the only type of financial institution that do not provide some type of insurance program on savings held by them. In fact, few credit union members realize their savings are uninsured. Thus far, the overall loss of credit unions has been very small and I think this is a point which must be attributed to the successful operation of the entire credit union movement. On the other hand, there have been a few losses and when these losses have occurred they have weighed heavily upon those whose savings were uninsured.

A Federal program of share insurance such as S. 3822 would provide will enable the average credit union to be more competitive in attracting savings thus enabling those credit unions that do participate in the insurance program to increase their services to their members.

During the hearings conducted by the Banking and Currency Committee there was a preponderance of evidence submitted by witnesses indicating the need for the type of insurance program as would be provided by S. 3822.

In that S. 3822 provides for an insurance program for savings that have not heretofore been covered, I believe, it is a good bill and I am very much in hopes that the Senate will give this measure favorable consideration.

Mr. PROXMIRE. Mr. President, the bill reported by the Senate Banking and Currency Committee would for the first time provide Federal insurance for savings deposited in credit unions. Credit unions are the only financial institution whose deposits are not insured by the Federal Government. While the total losses over the years have been quite small, there have been cases where individuals have lost sizable amounts.

For example, during the last 36 years 150,000 members have lost money in liquidating Federal credit unions. It should be emphasized that in three-fourths of these cases, the loss was less than $10. On the other hand, there are 1,430 cases where the loss exceeded $500 and there is one case where the loss reached $9,100.

The small saver is entitled to the same insurance protection when he puts his funds in a credit union as he gets when he saves in a bank or savings and loan association. Despite the remarkable safety record compiled at credit unions, we need to insure that no one who saves in a credit union is subject to losing his savings if the credit union liquidates.

Credit unions are different from banks or savings and loan associations in that the credit union is organized around a common bond of membership such as a factory or office. Thus, if the plant closes down or the office relocates, the credit union is required to liquidate. From 1934 through 1969, over 5,600 Federal credit unions liquidated, an average of 155 per year. Over 4,500 of these credit unions paid 100 percent or more to their depositors, or looked at another way, about 1,100 Federal credit unions liquidated at a loss.

During the last 5 years an average of 247 Federal credit unions liquidated each year. In 1969, 274 Federal credit unions liquidated, 35 of them at a loss to their members which aggregated $95,000.

To some extent, stabilization funds established by State credit union leagues have compensated credit union members for their losses. The total losses at Federal credit unions over the last 36 years totaled $4.9 million of which $1.6 million was returned to members through State stabilization funds. Despite the excellent efforts made by State stabilization funds, they have not been able to cover all of the losses incurred by Federal credit unions. Moreover, given the rapid growth rate of credit unions, the gap between losses and stabilization fund resources may be expected to grow.

The importance of credit unions in the national economy cannot be exaggerated. There are over 24,000 credit unions, both State chartered and Federal chartered. As a matter of fact, there are more credit unions operating today than there are insured commercial banks and savings and loan associations combined.

Over 22 million Americans have their savings in credit unions. These savings total about $14.5 billion and average about $650 per member. Credit unions also play an important role in the consumer credit market. Member loans outstanding are about $13.4 billion which is about 12 percent of all consumer installment loans. At the end of World War II, credit unions held only 4 percent of consumer installment debt. Thus, credit unions have grown in importance, both relatively and absolutely.

Over the last 10 years credit unions have steadily increased their percentage share of consumer savings and consumer loans. Their persistent growth record indicates they are continuing to fill an unmet need among financial institutions. In the last year alone, savings at credit unions jumped 11.5 percent and member loans increased 9.7 percent. If these trends continue, and there is no reason to assume they will not, credit unions will play an increasingly important role in our credit economy.

A program of Federal share insurance will thus place credit unions on a par with other federally insured financial institutions. Share insurance will permit credit unions to continue their rapid rate of growth and assume their important responsibilities throughout the 1970's and 1980's. Share insurance will permit credit unions to compete for funds on a more equal basis so that they may continue making low-cost loans to their members.

Another important advantage of share insurance is that it permits low-income credit unions to attract more funds to serve their members. Credit unions organized in low-income neighborhoods have a heavy loan demand which far exceeds the available supply of savings. Various corporations, churches, financial institutions, and other organizations have indicated they would be willing to deposit their excess funds in low-income credit unions if they could be assured against loss. Thus, Federal share insurance should stimulate the flow of funds to these low-income credit unions.

During the years, the credit union movement was understandably split on the issue of share insurance. Since the credit union movement is essentially a self-help, cooperative movement there has been a certain degree of reluctance to look to the Federal Government for share insurance. It was felt that any share insurance program should be organized and operated by the credit union movement itself without drawing upon the resources of the Federal Government.

On the other hand, others have argued a strictly private insurance program could be prohibitively expensive. The reserves in the insurance fund would have to be large enough to cover all contingencies including the possibility of a prolonged economic slow down. The initial assessments and annual premiums would thus constitute a heavy burden on credit unions.

The subject of Federal share insurance was recently revived by Senator BENNETT as an amendment to a bill establishing an independent National Credit Union Administration which was approved by the Senate on February 5, 1970. The Senate rejected the Bennett amendment primarily on the grounds that hearings had not been held on the subject by the Senate Banking Committee. Senator BENNETT accordingly introduced a share insurance bill on May 11 and this bill, in an amended form, is before the Senate today.

Senator BENNETT is to be congratulated for his leadership in pressing for the adoption of a Federal share insurance bill for credit unions. Since the introduction of the legislation, the Credit Union National Association has voted overwhelmingly to support a program of Federal share insurance for credit unions although they differed with some of the provisions of the original Bennett bill. However, for the first time there was broad agreement on the major objectives of the legislation.

Since the Credit Union National Association represents over 92 percent of the credit union movement in the United States, their decision to support a program of Federal share insurance obviously had a decisive impact on the legislation. The strong support given to the concept of Federal share insurance by

CUNA resolved many of the doubts which had been raised about the need for share insurance and, in my view, led to the unanimous approval of an amended credit union bill by the committee.

While it is hazardous to allocate the credit for a legislative achievement, certainly much of the credit must go to Senator BENNETT for helping to work out a consensus, to Mr. J. Dean Gonnon, Acting Administrator of the National Credit Union Administration, to Mr. R. C. Robertson, president of CUNA International, Inc., and to Mack Rogers, president of the newly organized National Association of Federal Credit Unions. While there are still some differences over certain provisions of the bill, there is a broad consensus on the end objectives.

The bill approved by committee is patterned largely after the deposit insurance program available to commercial banks through the FDIC and to savings and loan associations through the FSLIC.

All federally chartered credit unions would be required to obtain share insurance and State-chartered credit unions could obtain share insurance on an optional basis.

Each member's account would be insured up to $20,000 as is the case for deposits or savings accounts in commercial banks and savings and loan associations.

Premiums for the share insurance would be paid by the credit unions themselves, thus the program would operate without cost to the Federal taxpayer.

In the event the reserves in the insurance fund were inadequate to cover losses, the fund could borrow up to $100 million from the Treasury. Thus the availability of Treasury borrowing authority lends stability to the fund without the need for heavy initial assessments on the members.

The insurance program would be administered by the National Credit Union Administration and the Administrator would be given powers comparable to the FDIC and FSLIC including the authority to issue cease and desist orders.

Mr. President, one of the principal issues before the committee centered on the premiums to be charged for share insurance. The bill originally introduced required an annual premium of one-twelfth of 1 percent of credit unions shares. The Credit Union National Association, in testimony before the committee recommended a premium of one-twentieth of 1 percent. According to figures supplied by the National Credit Union Administration, both the one-twentieth of 1 percent and one-twelfth of 1 percent premium would produce revenues to the fund substantially in excess of the historical record of credit union losses. For example, over the last 36 years, losses at Federal credit unions have averaged less than one-hundredth of 1 percent. Thus, the one-twentieth of 1 percent formula would be over five times the actuarial loss ratio and the one-twelfth formula would be over nine times the actuarial loss ratio.

In view of the remarkably low loss ratios experienced by credit unions, I personally favored the one-twentieth of 1 percent formula. Nonetheless, there was some argument that the reserves of the insurance fund needed to be built up during its early years in order to minimize the possibility of drawing upon the Treasury borrowing authority. For this reason, the committee reached a compromise which assessed credit unions at the one-twelfth of 1 percent rate, but which also entitled insured credit unions to a rebate in the event of their liquidation. The rebate would include all of the premiums paid into the fund by the credit union plus interest, less the credit union's prorata share of the losses and expenses of the fund. Thus, any excess premiums paid by an individual credit union due to the higher assessment rate will ultimately come back to the credit union if it liquidates.

Since credit unions liquidate more frequently than other types of financial institutions due to the closing of an office or plant, it seems reasonable that such a liquidating credit union should be entitled to a rebate of the excess insurance premiums which it has paid.

Mr. President, I believe this bill is a sound and workable bill and will fill a pressing need. I am encouraged that the leaders of the credit union movement and the members of the Banking and Currency Committee are united in their determination to achieve a workable bill this year. I thoroughly recommend the bill to the Senate and hope that it can be signed into law this year.

Mr. BENNETT. Mr. President, I ask unanimous consent that the amendments be considered en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the amendments are considered and agreed to en bloc.

The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. BENNETT. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MANSFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TRANSACTION OF ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. At this time, the Senate will proceed to the transaction of routine morning business, with a 3-minute time limitation on speeches.

DEATH OF JOHN D. RHODES, FORMER CHIEF OFFICIAL REPORTER OF SENATE DEBATES

Mr. MANSFIELD. Mr. President, Mr. John D. Rhodes, former Chief Official Reporter of Senate debates, died on Saturday, August 29, at age 90.

Mr. Rhodes' service in the Senate spanned a long period of our country's history. When he joined the corps of Official Reporters in 1919, the Senate was debating the approval of the Versailles Treaty, which involved the question of the United States becoming a member of the League of Nations. At his retirement, 44 years later, the Senate was preparing to debate the nuclear test ban treaty.

Mr. Rhodes was born in Jackson, Ohio, on January 19, 1880, and moved with his family to Washington in 1886. He was educated in the elementary schools and Eastern High School of the District of Columbia. He then studied law at Columbian University, now George Washington University; was admitted to the bar of the District of Columbia and the bar of the Supreme Court of the United States; and entered upon the practice of law in Washington.

In 1918, Mr. Rhodes served as a captain in the U.S. Army, being assigned to the Judge Advocate General's Corps.

We mourn his death and offer our condolences to the members of his family.

I ask unanimous consent that an article about Mr. Rhodes, published in the Washington Post of August 31, 1970, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

JOHN D. RHODES, 90, SENATE OFFICIAL REPORTER OF DEBATES

(By Stephen P. Caplan)

John D. Rhodes, retired chief official reporter of Senate debates, died Saturday at Sibley Memorial Hospital after a short illness. He was 90.

Mr. Rhodes' career of recording and reporting debates on the Senate floor spanned 44 years, beginning with the arguments on ratification of the Versailles Treaty and U.S. membership in the League of Nations in 1919.

A native of Jackson, Ohio, he moved to Washington with his family in 1886 when his father took a position as head of the files section with the U.S. Patent Office.

Mr. Rhodes attended public schools in Washington, graduating from Eastern High School. He received his law degree from the Columbian Law School, now part of George Washington University, in 1902.

His legal career was short, however, as he became increasingly interested in shorthand, which he had learned as a student to facilitate taking notes in his law courses.

Mr. Rhodes taught shorthand for a short time after graduation and later joined a District law firm that assigned him to attend Senate and House committee debates to record information for the firm.

In 1904, he married the late Jessie MacTaggart, of Washington.

Mr. Rhodes went to the Annapolis State House in 1907 to report one of Mark Twain's last public speeches.

When the U.S. Chamber of Commerce was formed in 1912, Mr. Rhodes was named official reporter for the organization, a position he held until 1930.

In 1919, he joined the Senate reporting staff, recording the speeches of orators such as William E. Borah, Hiram Johnson and Henry Cabot Lodge, and the addresses of visiting heads of state including Winston Churchill and Konrad Adenauer.

At ceremonies honoring his retirement from the Senate reporter's office on July 31, 1963, Mr. Rhodes cited the tumultuous reception of Gen. Douglas MacArthur in a joint session of Congress as his most dramatic recollection.

MacArthur had just been recalled from the Far East by President Truman and at the conclusion of his address to Congress quoted an old barracks room ballad, "Old soldiers never die; they just fade away."

When Mr. Rhodes was being lauded by members of the Senate at his retirement, former Senator Minority Leader Everett M.

Dirksen (R-Ill.) rose and thanked him for making the daily Congressional Record readable, which he conceded was no mean task.

"Congress," said Mr. Dirksen, "is really the home of the split infinitive . . . the place where the dangling participle is certainly nourished . . . the home of the broken sentence . . . where with impunity, we can ignore the colon, we can ignore the exclamation mark and the question mark; and yet, somehow, out of this great funnel it all comes out all right."

Senator Hubert H. Humphrey said of Mr. Rhodes at his retirement: "He started out being good and able and talented, and he has continued to be so each year, and he has improved on that exemplary record."

Mr. Rhodes, who lived at 3535 Williamsburg La., NW., was a member of the National Baptist Memorial Church, Kappa Sigma Fraternity, George Washington Post No. 1 of the American Legion and the Sons of Union Veterans of the Civil War.

He is survived by two nieces and a nephew.

THE FIGHT AGAINST PORNOGRAPHY

Mr. MANSFIELD. Mr. President, on yesterday, I had the opportunity to appear before the Committee on Post Office and Civil Service and there I spoke on behalf of the bill, S. 3220, introduced by the Senator from Arizona (Mr. GOLDWATER) and me. It seeks to face up to the problem of unsolicited pornographic literature being sent through the mails to unsuspecting persons who neither desire nor want it but who, unfortunately, have had no recourse until the amendment to the postal reform bill introduced by the Senator from Arizona (Mr. GOLDWATER), which I cosponsored, as did a number of other Senators, took the first step in facing up to the problem of the invasion of the privacy of one's home in this manner—a manner which, incidentally, puts the U.S. Government, through the Post Office Department, in the position of being the handmaiden in the delivery of this type of stuff, this smut—to people who neither desire nor want it—the type of lewd literature which all too often falls into the hands of children and against which there is not, up to this time, sufficient protection.

Mr. President, I ask unanimous consent to have printed in the RECORD the testimony which I gave yesterday on behalf of the Mansfield-Goldwater proposal.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

THE FIGHT AGAINST PORNOGRAPHY

Mr. Chairman and Gentlemen of the Committee: Among the most basic troubles facing this nation today are crime, violence, and pornography. Many people talk about these subjects but seem unwilling to do anything to curb them. Many people raise Constitutional questions about proposals before the Senate. Constitutional questions which—I might say—have to do with the rights of the accused and the criminal elements more than they do with the Constitutional rights of the robbed, the raped, the maimed, and those who are subject to receiving unsolicited pornographic literature through the mails. I emphasize the word "unsolicited."

I point out that when this type of lewd literature comes through the mails, it is delivered to unsuspecting parents and often times to their children. Just as under the Drug Control Act, the emphasis in this legislation should be placed on and against the "pusher" or peddler of this smut. It is long past the time when we must face up to legislation of this sort and do something about this type of pernicious propaganda. Our people are entitled to privacy within their homes. They should not be assaulted with this type of "literature" and, therefore, their rights to privacy must be maintained.

I mentioned the Constitutional rights we advocate in behalf of the accused, the criminal, the pusher, and the peddler. What about the rights of the innocent and the aggrieved? Should we sit by and quibble over Constitutional questions which the Courts can and should decide while allowing crime to become more rampant, while allowing violence to continue to spread, while we see our police insulted, spat upon and accused of being "pigs" to mention just one of the least obscene epitaphs heaped on them? Or are we going to face up to our responsibilities as Senators and meet these issues head-on in behalf of the people we represent?

As I have said, Mr. Chairman, talk alone is worthless. And sometimes, action is not politically expedient. I believe we owe our primary responsibility to the people of this nation, and I believe too many of us have been derelict in our responsibilities in facing up to these issues of violence, crime and pornography.

The First Amendment to the Constitution is not all-embracing because it has definite limits in the right to exercise the freedoms involved. I believe in the First Amendment but I do not believe it allows any leeway for crime, for license, or for the sending of unsolicited pornographic materials through the mails to the citizens of this country.

As our society enters a new decade, the American people are both confronted with and confused by some of the most complex issues ever faced in our history. Increased crime and drug addiction, a widening gulf between the young and old, between our congested urban centers and the sparse rural areas, student unrest, and the on-going crisis over our foreign involvement; these constitute just some of the problems. One of more recent origin concerns the protection of individual privacy. This right is as fundamental as the safeguards provided under the Constitution. It includes most assuredly the protection of our citizens from unwanted invasions of their privacy in the form of unsolicited, obscene, pornographic materials.

In the past several years there has been a tremendous increase in the indiscriminate mailing of obscene matter through the United States mail. These mailings go out under any number of mailing lists obtained from a variety of sources. In most cases they receive the protection given First Class mailings. These advertisements and circulars are offensive. They shock the general moral standards of most citizens. And there must be some way to protect the individual, especially to safeguard the very young and impressionable against this kind of unwanted solicitation. Doing so while also recognizing the privacy of the United States mails is a difficult task indeed. In any case, I believe that we must hit hard at the purveyor and give the receiver some means of recourse.

My mail on this general subject has been extremely heavy during the past year. I have given the issue a great deal of thought about what must be done.

As a first step, I was pleased that the amendment offered by the distinguished Senator from Arizona (Mr. Goldwater) and myself to the Postal Reform bill was enacted into law. While this measure would penalize the smut panderer if he mailed his unwanted materials to anyone seeking a ban, it still puts the burden on the prospective recipient. As I understand it, it is up to the individual to see that he is listed appropriately with postal officials.

On the other hand, I introduced S. 3220. My bill puts the burden where it belongs—on the peddler and pusher. It would protect a person's right of privacy by requiring that all mailings containing obscene or offensive material be so designated. This would enable the obvious identification of the sender and would also give a person the right to choose and if need be to return the package unopened at the expense of the sender. At the very least, under my proposal, the sender would be more cautious in his mailing methods.

In other words the labeling legislation, as proposed by S. 3220, would give the individual an opportunity to react without being embarrassed or offended. Identification may not be the simplest method, but the problem itself is not simple. I strongly believe it is a step in the right direction—one which protects clearly a basic element in our democratic society, the right of privacy.

I have co-sponsored several other legislative proposals which offer alternative proposals for combating this growth of filth and pornography. I am delighted that these hearings have been scheduled. These Committee deliberations can place the issue in its proper perspective and legislation, hopefully, will be agreed upon soon which will provide complete protection for the unsuspecting boxholder and place on the sender the entire responsibility for keeping this material out of the mail.

As I said, my proposal which amends Postal regulations would compel the filth peddler to mark the envelope he uses—the one that is now often blank—with a warning that the enclosure could be obscene or offensive. With such a warning there can be no mistake. The addressee is fully protected. He would be put on notice, as would his entire family. He would know and his family would know that what is inside may violate his standards of decency and those he wishes to impress upon his children. And that is his right. Such action would protect, not violate, a person's constitutional rights.

May I say that such warning is not new to the legislative field. It has already been imposed by the Congress in the case of cigarettes. Indeed, without even deciding for sure that there is a danger involved in smoking, cigarette manufacturers are compelled to warn each purchaser of a possible hazard. By the same token, under my bill, it need not be decided that the material enclosed is obscene, per se. But if there is that possibility, then the envelope must say in plain and simple words, "The Enclosed Material May Be Obscene or Offensive to the Addressee."

A second feature of my proposal would permit the addressee of obscene mail to return the matter to the sender, without charge. And it is left up to the addressee himself to decide what violates his standard of decency. The return mail fee would be paid by the original sender—the pusher, in other words—with an additional handling charge.

Finally, the violators of either of these provisions would be met with a penalty of $5,000.

My proposal is one which I would like to see incorporated into any pornography control measure, whether it be reported by the Senate Judiciary Committee or the Committee on Post Office and Civil Service. The Senate has already taken action in the area of drug control and crime. To a limited extent it has acted against obscenity. I firmly believe that further steps must be taken to meet head-on the issue of mass mailings of obscene materials—especially to minors and the unsuspecting. I wish to thank the Committee for this opportunity and I commend the Chairman and the members for focusing

much needed attention on this vital problem. I wish to offer the Leadership's cooperation in bringing about early legislative action on this most serious issue.

"GETTING DOWN TO BASICS" AND DR. MOYNIHAN'S SALT LAKE CITY SPEECH

Mr. BYRD of West Virginia. Mr. President, last weekend in Salt Lake City the National Legislative Conference held its 23d annual meeting and the featured speaker was the well-known counselor to the President, Dr. Daniel P. Moynihan.

In his address to the large gathering Dr. Moynihan outlined again the President's desire and interest in the family assistance plan. He likened its passage as a rare issue that comes before the Congress and which separates one era of social policy from another.

In addition, he praised the efforts of Utah's senior Senator (Mr. BENNETT) who is second ranking Republican on the Finance Committee, for his contributions toward drafting an equitable and workable plan.

Dr. Moynihan pointed out that the President and the Senate rely most heavily on the support and counsel of Senator WALLACE F. BENNETT. Dr. Moynihan said:

He is one of the most learned men concerning this enormously, and, at times, discouragingly complex subject.

I think Dr. Moynihan's text of his Salt Lake City remarks should be included in the RECORD as well as an editorial from the Salt Lake Tribune entitled "Getting Down to Basics" which also discusses the speech and the family assistance plan. I ask unanimous consent they be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ADDRESS BY DR. DANIEL P. MOYNIHAN

I have come to Salt Lake City in response to the cordial invitation of Senator Wallace F. Bennett to speak to the 23rd National Legislation Conference which is meeting here this week. I should have been pleased to do so in any event, but am doubly so in the present circumstances.

We are living in Washington through one of those moments that come every one or two generations when legislation of historic consequence is before the Congress. Not just important legislation, or urgent legislation. Matters of that kind are the day-to-day business of the Congress. They are demanding, even exhausting, but in a sense routine. It is only very rarely, once or at most twice in the career of the average legislator, that an issue comes before the Congress which separates one era of social policy from another.

The Social Security Act of 1935 was such a piece of legislation.

The Family Assistance Act of 1970 will be such a piece of legislation.

The principles of the legislation are simple. As President Nixon stated in his national television address a year ago, this legislation would place a floor under the income of every American family with children. Poverty would cease to be a normal condition of any child's life, anywhere in the United States.

The legislation is aimed at helping the working poor. These are the families that try the hardest in America and somehow get the least. For decades now we have been providing income assistance to everyone save those persons who are most likely to benefit from that little bit of help that makes the difference between deprivation and just enough.

The Family Assistance Program has built into it strong work incentives, so that the more a man earns, the more he keeps. It has training and day care provisions, which in themselves would be legislative enactments of major consequence, but are only part of this monumental event.

For generations Americans have been importing social policy. Most of our legislation, even the most advanced, on examination turns out to consist largely of ideas Lloyd George stole from Bismark. With Family Assistance all that changes. President Nixon has taken the lead not just in the Nation, but in the world.

Surprisingly, the costs of the program are not excessive. At the present rate of growth of the existing welfare program, we would be spending more money on AFDC payments by the mid 1970's than we would be on family assistance.

The key idea behind the President's proposal is that we are moving toward an income strategy in dealing with problems of poverty and disadvantage. We are moving away from a services strategy. We believe that what most families need is a decent income. If they can get that through work and income supplementation, the government should leave them alone to run their own lives.

But we do believe there is a government responsibility, and that this is a national responsibility. The key to the New Federalism is not that power will be decentralized, or centralized or mediocratized, if I am correct in recalling that that is a word for middling. It is rather that we hope to assign government responsibilities to that level of government most suited to carry them out efficiently and effectively. In the case of Family Assistance, we have a national program, with national standards. As the President stated when he announced the program, no child is worth more in one state than in another. That is a principle all Americans should agree upon, but somehow American government has never responded to.

We are responding now. In one of the great legislative events of recent times. Family Assistance not only passed the House of Representatives this Spring, but did so overwhelmingly. It is now before the Senate, specifically in the Senate Finance Committee.

The President has every expectation that the bill will be reported to the floor of the Senate, and as he observed in a meeting we held on this subject yesterday at the Western White House in San Clemente, if the whole of the Senate is given an opportunity to vote on this legislation, there is no question but that they will respond as favorably as did their colleagues in the House.

In this matter the President, of course, relies most heavily on the support and counsel of Senator Wallace F. Bennett, who is the second ranking Republican member of the Finance Committee. Senator Bennett is one of the sponsors of the President's legislation, and one of the most learned men concerning this enormously, and at times discouragingly complex subject. If Family Assistance succeeds, the people of Utah will not have to look far to find one of the men who will have made it possible.

It happens that this is the most pressing matter before the Senate at this moment, but it would be a rare moment indeed for a visitor from Washington to arrive in Salt Lake City and not be able to report that some matter of national consequence—one thinks immediately of health care issues—is at issue in the capital and that in one way or another Wallace F. Bennett is involved in deciding the outcome. It is perhaps one of his qualities that he does not always advertise this fact.

It has been said of Washington that it is a city where there is almost nothing a determined and intelligent, and principled person cannot achieve—*if* he is willing to see other men get the credit. It is a truthful saying, and likely to remain such. Still, there are occasions when that fact ought to be acknowledged, and I would hope my brief visit to Utah might be taken as an indication that the President and his Administration have not failed to note the process at work in the person of the Senior Senator from the State of Utah.

[From the Salt Lake Tribune, Aug. 30, 1970]

GETTING DOWN TO BASICS

It is in fact, as presidential adviser Daniel Patrick Moynihan says, "five minutes to midnight" for the administration's bold, new family assistance welfare plan. In an effort to stop the clock President Nixon has agreed to postpone full implementation of the key guaranteed annual income provisions for a year while the program is "field tested" in several areas of the country.

In simplest terms the family assistance program would replace the awkward machinery of the present patchwork welfare system with an income maintenance scheme providing a minimum of $2,465 a year—$1,600 in cash payments and $865 in food stamps—for a family of four with no income. Payments on a diminishing scale would also be provided the so-called "working poor." The plan also would require able-bodied men and women, excluding mothers with children under six, to apply for job training or take jobs if available, and provides certain sums for day care centers for children of working mothers.

Whatever weaknesses are turned up by the tests could be remedied by Congress next year or used by critics to repeal this year's law, though as a practical matter once the welfare plan becomes law it is likely to remain. That prospect is at the heart of the President's willingness to compromise now.

Mr. Nixon's concession, in the form of an acceptance of an amendment offered by Sen. Abraham Ribicoff, D-Conn., is an urgent move to pry the House-passed welfare plan out of the Senate Finance Committee in time for the Senate to act before the 91st Congress adjourns. It is widely felt that if the welfare measure fails to gain approval of the present Congress it may be years before it will be enacted.

The administration estimates that the program would cost $4.1 billion a year above existing welfare costs and would expand eligibility payments to 24 million persons compared with about 15 million eligible under existing programs. Proponents maintain that despite the plan's initial high cost it will in time be more thrifty than the present system because of its job training and employment incentive features. Opponents are divided between those who say the plan doesn't go far enough and those who oppose guaranteed income on principle and say it will cost much more than the administration estimates.

Both views are well represented on the finance committee and between them they have managed to keep the bill from reaching a Senate vote. With time running out Mr. Nixon has agreed to the Ribicoff amendment in hope of swinging enough support in the finance committee to send the bill out.

Mr. Nixon is in a determined struggle to rescue a concept. He appears willing to agree to almost anything reasonable in order to get the idea of a government guaranteed minimum income enacted into law. He is dealing in basics now and the finance committee is going to be forced to do the same. By agreeing to the year of "field testing" to spot weaknesses the President has forced the committee, to decide for or against the

unadorned idea of guaranteed minimum income.

Stripped of arguments over cost estimates and whether the plan goes too far or not far enough, the finance committee will be voting on whether to continue with a cumbersome welfare system which has failed or to embark on a new one of great promise. There is no longer an excuse for delay. The welfare bill should be sent to the Senate and passed forthwith.

ADDITIONAL STATEMENTS OF SENATORS

OPPOSITION TO A 15-PERCENT RAILROAD FREIGHT RATE INCREASE

Mr. JORDAN of Idaho. Mr. President, I wish to address myself today to a subject of great concern to me and to the people of my State. I have noted in the press recently that the chief traffic officers of the country's eastern and western railroads intend to file a request with the Interstate Commerce Commission for an across-the-board freight rate increase of 15 percent. This request will be for an 8-percent increase to be granted immediately with the remaining 7 percent to be added at a later date. This request, I submit, is totally unreasonable. It is much larger than any of the increases that we have seen the railroads receive in the past few years. In fact, during the 7 years prior to 1967 there were no increases in the freight rate structure at all. Suddenly, in 1967, the railroads were off and running with a series of increases granted by the Interstate Commerce Commission.

The first of these successful requests was in 1967, in which the railroads asked for a 6-percent increase in commodity rates and were permitted an increase of approximately 3 percent.

Next, the carriers asked for a 3- to 6-percent increase on selected commodities which was granted as they wished. In 1969, another request was made for a 6-percent increase which was also allowed. Still another of these boosts, which was made on selective commodities as opposed to an across-the-board increase, ranged from a high of 10 percent to a low of 3 percent with the average being about 5 percent.

Finally, the railroads asked for a 6-percent increase earlier this year but the ICC trimmed it to 5 percent, effective in June. The shocking truth is that since 1967 the railroads have requested and received a total of five general freight rate increases. When will this pattern cease? Indeed, the latest 5 percent interim increase is still under review by the ICC. Now the railroads are asking for an unreasonable increase of 15 percent.

In addition, I would also like to point out that services by the railroads have declined as markedly as these rates have gone up. Intercity passenger routes have been cancelled; there is a serious boxcar shortage in some areas; and we have all noted with alarm the mismanagement of the Penn Central Railroad, which finally led to its falling into bankruptcy. Certainly, these events call for a review of our Nation's railroads; but I do not believe that this excessive freight rate increase is the answer.

Moreover, it should be noted that these increases in the past have benefited the larger, more prosperous railroads which actually required this assistance the least.

The farmers in my own State of Idaho will have to bear the burden of the increased costs which will result from this massive freight rate increase. The increase will affect about 175 eastern and 125 western railroads. In addition, the consumer will be forced to pay higher prices for the goods he purchases. This point is especially crucial at a time when inflationary pressures are already being felt in every consumer's pocketbook.

When we consider all of these factors: the recent increases in freight rates; the decline in railroad services; and the general state of the economy; I feel that the proposed freight rate increase is excessive and ill-timed and I ask that the Interstate Commerce Commission not allow such an increase to take place.

CONSERVATION: ITS RELEVANCE IN WYOMING

Mr. McGEE. Mr. President, for 8 years it has been my pleasure to conduct for high school juniors in my State of Wyoming the McGee Senate Internship Contest, which brings to the Nation's Capital one boy and one girl for a week planned to enhance an understanding of the mechanisms and the procedures of the democratic society.

The contest is designed to stir up interest among high school students in national and international questions. Three well-known, nonpolitical people from the State served as the panel of judges in the competition. In their judgment, this year brought the highest level of essays that the many years of the contest have produced.

The subject matter of the required essay this year was conservation, quality living, environmental control. For Wyoming to focus on that question is of great relevance. For here is a part of the world that we call God's country in which one would think there were no pollution problems.

I think what it does say to us in the Rocky Mountain West is that the mistakes of the already polluted parts of the United States may have served as a grim warning to those of us from the high altitudes of the Rockies of at least what to watch for and try to avoid in the future and, at the same time, to come to grips with the first outcroppings of environmental pollution even at the local level.

Of course, it would be impossible for everyone to read all the essays submitted, but I think the most outstanding ones are of interest to us all and should receive wider circulation. For this reason, Mr. President, I ask unanimous consent that two of these essays, written by Judy Ann Wilson, of Cheyenne, Wyo., and Dennis Freeman, of Rock Springs, Wyo., which received honorable mention in the McGee Senate Internship Contest, be printed in the RECORD.

There being no objection, the essays were ordered to be printed in the RECORD, as follows:

CONSERVATION: ITS RELEVANCE IN WYOMING
(By Dennis Freeman)

The third planet in the system of Sol, a third magnitude star on the edge of an obscure galaxy, presents an interesting example of self-extermination. This planet's ecology revolves about the liquid state of water. All forms of life upon this planet, which we will refer to as "Earth" rely upon the availability of hydrogen oxide and various gases in the planet's atmosphere. The one form of life on Earth intelligent enough to perceive this is, strangely enough, the same one that is intent upon destroying it.

These creatures, who refer to themselves as "Humans", have developed a rather advanced technology, and are applying that technology to the speedy extermination of all life on the planet.

Far-fetched? Not in the least. That is just how someone from outside our planet might view our society. We are on the slide down hill. If we don't *do* something concrete, we may very well exterminate ourselves within fifty years.

Yet, in Wyoming, people are apathetic about any type of conservation concerning things other than game and fish. All about them, the environment is being buried in a tomb of pollution, and Wyoming citizens continue to blindly affirm that we have no pollution. First, let's look and see what kind and how much pollution there is in our nation, and then decide how this relates to Wyoming.

Elsewhere in America, pollution is rampant. For instance, the Cuyahoga River, which flows into Lake Erie at Cleveland, is so disgustingly polluted that it has been declared a fire hazard! The Potomac river is nothing more than a moving cesspool. Every day 9.6 billion gallons of industrial waste, and 1.5 billion gallons of sewage are belched into Lake Erie.

Still, Wyoming residents sit back, thinking that all this just doesn't effect them. Let's look at the facts: Each year, the United States (Wyoming included) manages to dump 1.3 billion tons of manure and farm refuse onto the land and into the rivers, deposit 1 billion tons of mine wastes and 15 million tons of scrapped cars on our landscape. In addition, the air that we are expected to breath is blessed yearly with over 142 million tons of *toxic* exhausts from cars and industries. These are *national* figures, and even so-called unpolluted Wyoming contributes to this.

The problem does then affect us. Just how bad is our pollution? Where do our problems lie? Pollution can be separated into three distinct catagories: domestic, industrial, and agricultural. To understand our situation, it is necessary to examine each.

Let's first look at agricultural pollution. With a large agricultural economy, the state has seen the use of large amounts of D.D.T. Some birds and fish in the state already have dangerous percentages of this long-lasting killer in their systems. We cannot take this lightly; in Lake Michigan, D.D.T. is directly responsible for massive numbers of dead fish, and the birds about that area who eat the fish, including the "bald eagle", are not reproducing correctly. The same thing may quite likely happen in the near future in Wyoming. In addition local farmers contribute the 1.3 billion tons of farm refuse annually deposited on our land. This filth is often dumped into rivers and lakes, and even if it is put on the land, it finds its way into the ground water, inevitably reaching our streams and rivers. Perhaps one of the least obvious and yet most insidious forms of agricultural pollution is the use of so-called "red dyed" wheat seed. The preservative on these seeds contains large amounts of mercuric oxide. Like all heavy metals, mercury has a devastating effect on the nervous system when in concentrations of more than

30 or 40 parts per million, and some pheasants in the state, who eat the freshly-sown wheat, have concentrations of 28 or 29 parts per million. The connotations are obvious. Not only may the pheasants suffer, but hunters who eat heavily contaminated birds may show symptoms. Farms and ranches also burn refuse in open air, contributing to the pall of smog which covers even our state.

That is only agricultural pollution; there is still industrial and domestic pollution to discuss. First, industrial pollution. Even Wyoming's limited industry is making a brave effort at upsetting nature's delicate balance. In just the Rock Springs—Green River area, there are five or six plants dumping tons of filth into our air and our water. When Stauffer Chemical Company dumps waste into the Green River, they in effect pollute the entire Colorado River system. When the Quealy coking plant releases its black plume into the air over Rock Springs, they throw away profits: the products they release in the destructive distillation of coal contain many valuable chemicals. This type of situation occurs all over the state. The Platte at Casper looks very little like an upstream river; it is coated with the oil and sludge typical of cities father downstream. Another example of large-scale pollution is the refineries at Sinclair. The prairie downwind resembles a fog bank, but this fog can be lethal. All over this land of wide-open spaces, we are treating those spaces as literal junkyards. The state's industries belch not pounds but tons of filth into our air and dump more tonnage into our waters.

There is still one more contributor to the uglification and intoxication of our state—domestic pollutant release. Wyoming, just as other areas, moves on wheels, and the tonnage of fumes released by motor vehicles reaches into the millions. This is air that we have to breathe. On a still day, the clear air over our cities takes on a yellow-gray tinge. Wyoming residents also improve our trout streams with several million tons of raw sewage annually. Besides being detrimental to Wyoming, this sludge is carried down stream, so that the people of Nebraska, Colorado, Utah, Idaho and Nevada may enjoy our stream additives. Wyoming homes belch sewage into the same rivers they drink from, and introduce poisonous gases into the same air they breathe, and still continue to insist that we don't have a pollution problem.

True, our problem with environmental pollution has not reached the proportions of Los Angeles, Lake Erie, or New York, but that is only further reason for getting rid of our pollution right now, while we still can. If we don't spend a little money and thought now, we'll have to spend huge amounts later.

Experts estimate that to just get a start on nation-wide pollution will require 20 billion dollars over the next four years. Is there a better argument for Wyoming to get to its pollution before it gets that serious?

We will be making an investment in much more than just unclouded scenery and clear waters: we will be buying our very survival. If pollution is allowed to continue, the delicate scale of survival will be tipped. In some areas, this may have already occurred. Once the base of life is gone, the rest will follow quickly. The citizens of our state must awaken to that sobering fact and take quick, effective action. Nothing is at stake but survival!

CONSERVATION: ITS RELEVANCE IN WYOMING

(By Judy Ann Wilson)

By the time you finish reading this first sentence, a new American is born. This birth will initiate a consumptive force on our natural resources 50 times greater than the demand as the same event in India. In his life time he will utilize over 1 million tons of water; 2,000 gallons of gasoline; 10,000 pounds of meat; 28,000 pounds of milk and cream; 9,000 pounds of wheat, and he will inundate 3 acres of productive land. The demand for outdoor recreation will triple by the year 2000.

All too often, life seems to be a struggle of man against nature, where man is the lord and nature is the subject. Survival is a battle of opposition rather than a joint venture between the two. Instead of conserving to the best of our ability our natural resources, wildlife, air and water, and freedom of movement, we are neglecting the responsibility and taking them for granted.

It has been a characteristic inherent to man, to be a wasteful, messy animal. Societies as far back as the Romans have complained of dirty cities, wildlife doomed because of polluted, sewage-filled streams and crop destruction resultant from impurities in the soil.

Because man overpowers his environment not only in ingenuity, but also in sheer numbers, the fight to preserve his surroundings must be foremost to his attention. His response to the crisis at hand, must encompass the totality of the scope. In pursuing the aim of conservation, we have tended to stero-type the need of it to areas such as California and New York, but it is imperative that conservation start right here—here in Wyoming. If America can justifiably be titled "America the Beautiful," Wyoming must uphold the true claim of "Wide Open Spaces," "The Cleanest Air," and "A Hunter's Haven."

The word *conservation* is a concept composed of a variety of special interest definitions. To assess the relevance of conservation to Wyoming, its measures must act as a mirror to reflect the needs and wants of each individual interest group. For instance, to the tourist, conservation may be the preservation of our parks and unspoiled wilderness, to the hunter, the definition is only adequate hunting and fishing, and still another segment of the population is concerned with the natural resources, forests, and minerals. The direction of the public attention plays a vital role in conserving "these interests" through the allocation of the tax dollar in support of maintaining proper facilities.

Wyoming can boast of a living environment second to none in the nation. The abundant wildlife is under the careful eye of the Wyoming Game and Fish Commission, hundreds of miles of water flowing from mountain streams is insured of purity by the organization of the Stream and Pollution Council, air pollution problems are tackled by the Air Resource Council in accordance with the newly adopted Air Quality Standards and the battle of soil conservation and the application of water conservation measures fall into the capable hands of the State Soil and Water Conservation Committee.

These programs allow the success of the Cowboy's State's third largest industry, tourism, which brings into the state annually, large sums of money.

However, conservation is woven inextricably in the lifeblood of Wyoming, its economy and its people. For example, Wyoming has 20,000 miles of fishing streams. It has the largest elk and antelope herd in North America. Petroleum, ore, uranium and valuable material lie deep in the veins of the state. Prudent use of Wyoming's valuable resources, from the clean air, the mountain streams to the phosphates, all play an integral part of the nation's conservation picture.

On the other hand, it is estimated that each antelope is worth over $100.00 to the state as a source of revenue. Studies indicate that the per capita expenditure for soil conservation and water conservation in Wyoming was $1.32 in 1968. This investment returned $118.00 per person through the flow of direct income.

It would be difficult to assess the economic value of the majestic Tetons, or the sprawling Big Horn Mountains, or the vast open grasslands that awe so many visitors, aside from enjoying the direct benefits from our conservation programs in Wyoming.

The future has never been . . . it remains for man to make. A poet once remarked, "The towers of tomorrow are built on the foundations of today." In thirty years, we will be attempting to build towers on what we do today, as we will be turning the corner into the 21st century. In the year 2000, Wyoming's population will be demanding and utilizing even more of our natural resources, recreational benefits, and open spaces than it does today.

Perhaps we can measure with a degree of certainty, the level of quantity for the future, but what is impossible to weigh beforehand, is the quality of the life to come. The quality of your life—as well as mine in the century ahead rests on what we and other Wyomingites do now to preserve the balance of nature and the earth's reserves of our resources. Foresight, legislation, and public awareness will lend support to helpful programs already under way.

While you have been reading this essay, a portion of the 1.6 million people, which join the United State's population annually, have come into the world. Without perservative conservation in Wyoming, these people could soon actively join the unstemmed tide of those already draining our natural resources and damaging our environment.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is concluded.

DIRECT POPULAR ELECTION OF THE PRESIDENT AND VICE PRESIDENT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate turn to the consideration of Calendar No. 1135, Senate Joint Resolution 1. I do this so that it will become the pending business.

The ACTING PRESIDENT pro tempore. The clerk will state the joint resolution by title.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 1) proposing an amendment to the Constitution to provide for the direct election of the President and Vice President of the United States.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Montana?

There being no objection, the Senate proceeded to the consideration of the joint resolution which had been reported from the Committee on the Judiciary with an amendment to strike out all after the resolving clause and insert:

That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States within seven years from the date of its submission by the Congress:

ARTICLE —

SECTION 1. The people of the several States and the District constituting the seat of government of the United States shall elect the President and Vice President. Each elector shall cast a single vote for two persons who shall have consented to the joining of their names as candidates for the offices of President and Vice President. No candidate shall consent to the joinder of his name with that of more than one other person.

SEC. 2. The electors of President and Vice President in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislature, except that for electors of President and Vice President, the legislature of any State may prescribe less restrictive residence qualifications and for electors of President and Vice President the Congress may establish uniform residence qualifications.

SEC. 3. The pair of persons having the greatest number of votes for President and Vice President shall be elected, if such number be at least 40 per centum of the whole number of votes cast for such offices. If no pair of persons has such number, a runoff election shall be held in which the choice of President and Vice President shall be made from the two pairs of persons who received the highest number of votes.

SEC. 4. The time, places, and manner of holding such elections and entitlement to inclusion on the ballot shall be prescribed in each State by the legislature thereof; but the Congress may at any time by law make or alter such regulations. The days for such elections shall be determined by Congress and shall be uniform throughout the United States. The Congress shall prescribe by law the time, place, and manner in which the results of such elections shall be ascertained and declared.

SEC. 5. The Congress may by law provide for the case of the death, inability, or withdrawal of any candidate for President or Vice President before a President and Vice President have been elected, and for the case of the death of both the President-elect and Vice-President-elect.

SEC. 6. The Congress shall have power to enforce this article by appropriate legislation.

SEC. 7. This article shall take effect one year after the 15th day of April following ratification.

LEGISLATIVE PROGRAM

Mr. MANSFIELD. Mr. President, there will be no action taken on the pending business today and no speeches that I know of. However, when the Senate returns after its recess on Tuesday next at 12 noon, that measure will be the pending business of the Senate. It is anticipated that the distinguished Senator from Indiana (Mr. BAYH), the initiator of this measure, in whose committee hearings were held, will be on the floor, as well as other Senators, prepared to begin discussion of this most important constitutional amendment.

I had hoped that we could take up other measures at that time. But in view of the fact that the Committee on the Judiciary has made the stipulation that they would report an equal rights amendment sometime between the 15th and 19th—probably closer to the 19th—I feel that it would be most inappropriate at this time to call it the equal rights amendment, because to do so, I think, would make it subject to extended debate even in the course of taking it up and, when and if that was finally achieved, further extended debate when it became the pending business.

So, with that explanation, I hope it will be understood why one of these constitutional amendments precedes the other. May I say frankly that I am in favor of the Bayh measure for a constitutional amendment seeking to bring about a change in the electoral college in the direct election of the President and the Vice President, and I am also in favor of the equal rights amendment, which I hope will be coming to the floor at an auspicious time.

I had considered taking up the bank holding bill, H.R. 6778; the farm bill, H.R. 18546, which will be reported by the committee shortly; a bill having to do with survivors' annuities, S. 437; and an amendment to the FDIC Act relating to bank records, S. 3678. It is anticipated that sometime between Labor Day and October 15, we shall bring before the Senate legislation having to do with air pollution control and law enforcement assistance amendments.

I believe that we still have six appropriation bills to attend to. I find no fault with the Senate committees. I think they are working as expeditiously and as efficiently as they can. As soon as those bills are reported, we shall try to dispose of them.

I would point out that while we are a little bit behind the House in the matter of appropriation bills, we are considerably ahead of the House in the consideration of bills having to do with crime, pornography, drug addiction, violence, and the like.

If my memory serves me correctly, the Senate has passed 20 out of 21 crime control, drug control, antipornography, and other types of legislation facing up to the problems of rampant crime, increasing violence, and the continued assaulting of policemen. Just a day or two ago, I read the headlines in the newspaper which said that across the country 10 policemen had been shot. Since that time the number has increased almost once again.

I think it is about time that we give to these guardians of law and order, these people who are entrusted with the responsibility of the safety of all people, the kind of respect which is their due and paid the kind of salaries which I think they are entitled to for the dangerous tasks they perform.

I think that people ought to achieve some degree of civility once again—it seems to me to be becoming a lost virtue—some degree of responsibility in its finest sense, and some recognition of the fact that this is one country, regardless of the divisions which are in effect today and that the future of the Republic lies not in further divisiveness, not in increased violence, not in increased crime and drug addiction, not in an increase in pornographic literature, but in a mutual understanding on one another's needs and problems—and we all have them—and a desire to try to bring about a reconciliation to the end that once we are over these dangerous hurdles—like Southeast Asia to mention one example—the difficulties at home can be met and faced up to more squarely and appropriate methods and funds can be used to bring about an alleviation of the situations which call for action. In that way, I think that collectively we can achieve some worthwhile service.

I would hope that neither political party would try to take advantage of any of these issues, knowing that before we are Democrats or Republicans, we are Americans and that the welfare of the country at all times should come ahead of the welfare of either party or any of us as individuals who hold elective office.

So, with those brief remarks, I will only add that hopefully sometime the week after next, and that is the earliest we can get to it, it would be possible to take up the farm bill and, as far as the social security amendments and the family assistance program are concerned, I note that the distinguished Senator from Utah is on the floor. I was wondering if he could give the Senate any information which would indicate when these proposals might be brought up.

Mr. BENNETT. Mr. President, the Finance Committee will finish its hearings on the family assistance plan during the first week we return. Then before meeting in executive session, we will finish the hearings on the social security amendments, with the thought that they will be studied together in committee, but will not be tied together for action on the floor.

It is my understanding that the bills will be reported separately, but after the committee has worked on them at the same time.

My guess is that it will be pretty close to the first part of October before we will be able to report them.

Mr. MANSFIELD. Mr. President, I thank the distinguished Senator from Utah, the acting minority leader, for giving us the latest information at his disposal concerning not only the social security amendments, in which we are all interested, but also the family assistance program which the President has indicated that he would like to have the Senate take action on this year.

I think the President is entitled to that courtesy and that much consideration. While I have some grave questions in my mind about the family assistance program, nevertheless, I would hope that a bill would be reported, debated, and disposed of by the Senate in one way or the other.

I thank the distinguished Senator for giving us this additional information.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. BENNETT. I have some of the same doubts about the program as it is now before the committee, but a number of members of the committee, including the chairman and me, are working rather hard to try to develop alternatives which might eliminate some of the problems that I am sure the senior Senator from Montana sees in the program. As of now I am still optimistic that we will get a program in the Senate.

The ACTING PRESIDENT pro tempore. What is the pleasure of the Senate?

ADJOURNMENT UNTIL TUESDAY, SEPTEMBER 8, 1970

Mr. MANSFIELD. Mr. President, if there is no further business to come before the Senate, I move that the Senate stand in adjournment, pursuant to House Concurrent Resolution 689, as amended.

The motion was agreed to; and (at 9 o'clock and 21 minutes a.m.) the Senate adjourned until Tuesday, September 8, 1970, at 12 noon.

EXTENSIONS OF REMARKS

SENATOR JENNINGS RANDOLPH DISCUSSES INADEQUACY OF THE FEDERAL RESEARCH, DEVELOPMENT, AND DEMONSTRATION EFFORTS ON METHOD TO CONTROL AND ABATE POLLUTION RESULTING FROM FUELS AND ENERGY PRODUCTION—THE ENVIRONMENT IMPACT OF FUELS AND ENERGY PRODUCTION ARE UNACCEPTABLE

HON. JENNINGS RANDOLPH

OF WEST VIRGINIA

IN THE SENATE OF THE UNITED STATES

Tuesday, September 1, 1970

Mr. RANDOLPH. Mr. President, there have been repeated warnings concerning environmental threats to our survival, but it seems that the more intense the atmosphere of crisis, the more quickly concern apparently is deadened. We have learned to live with the constant threat of nuclear destruction, and, until now, we have accepted coexistence with a polluted and crowded environment. But the growing concern for the quality of our environment has been most cogently phrased by Prof. Robert B. Platt, chairman of the department of biology at Emory University, when he expressed:

> The analogy of our western civilization as a great pendulum whose speed and direction of motion through time is determined by the forces of technology and economic determinism on the one hand and the opposing forces of human ecology on the other . . . The forces of technology and economic determinism, fired sequentially by the industrial age, the atomic age and the space age, have pushed the pendulum at an ever-increasing and recently a dizzying speed . . . We now have the knowledge, concepts and attitudes, not only to reverse this motion, but to then push the pendulum back to an equilibrium position which is favorable for human health and happiness. The unknown factor is man's will to do this.

The time has come for our society, its people and institutions—educational, political, and religious—to act to avert further environmental crises and to plan for a future in which man can restore that balance which is essential to quality living. The critical factor in reestablishing this equilibrium will be man's will to create an environment adapted to his physical, psychological, and spiritual needs.

The public demand for environmental quality is no longer based solely on the desire to save the alligator, the wolf, or the spoonbill. Man has joined the list of endangered species.

This realization is immediately apparent in the current fuels and energy crisis. On August 6, the President directed the Domestic Council to study the national energy situation and recommend actions which may be taken to alleviate the short-term acute shortage of clean fuels. In sum, we are faced with two conflicting requirements—to provide reliable sources of electric power while also protecting the health and welfare of our citizens and the quality of our environment.

Securing adequate supplies of fuels, particularly coal, for the next 5 years is one of the most pressing problems facing many electric utilities.

During the past 18 months fuel stocks have reportedly slipped from sufficient coal for at least 90 days' operation to quantities sufficient for only about 40 days' operation. The causes contributing to this serious problem were reported in the April 18 issue of Business Week magazine. They include a willingness of the Japanese to pay high coal prices, a shortage of railway hopper cars, wildcat strikes, and the impact of the Coal Mine Health and Safety Act.

The future, however, looks equally threatening. In the next 15 years the United States will require more petroleum products than have been consumed since the discovery of oil by Colonel Drake in 1859, more natural gas than has been consumed in our Nation's history; and more coal than has been mined in the United States since World War II. Yet, today we cannot meet our current fuel requirements and we are plagued by an environmental crisis. Surely, the need for a national fuels and energy policy cannot be denied.

This situation need not have occurred and cannot be allowed to repeat itself. For many years the future of electric power generation has focused on nuclear power development—or the fast breeder-reactor in particular. Yet, development of the fast breeder-reactor has slowed down and may not be commercially available until the 1990's. By then the world may be running out of economical sources of uranium. Alternative energy supplies, compatible with environmental quality goals must be developed in the interim. Additional reliable and accessible sources of crude oil, natural gas, coal, and synthetic fuels must be developed, as well as more efficient means of utilizing these fuels. Attention must be directed beyond the short-term crisis before us and to the long-term requirements of this Nation and indeed the world.

On July 16, 1970, I introduced S. 4092, a bill to establish a Federal Commission on Fuels and Energy. This legislation is now cosponsored by 60 of my colleagues.

In my introductory remarks, I presented a detailed analysis of the next 30 years' requirements for energy and fuels. A brief summary is appropriate at this point:

Electric generating capacity in the United States has doubled every decade since World War II. This growth reflects population increase as well as an increased standard of living.

For some time to come our ability to meet this growing demand will reside primarily in fossil fuels. Recently, nuclear power has emerged as a competitor in its own right, but installed generating capacity lags behind projected figures. A shift from fossil to nuclear fuels was anticipated, however, and in recent years, there was a reluctance in many cases to develop alternative sources of oil or coal production. The required new mines were not capitalized and opened to the extent originally envisioned. This is part of the fuels crisis that has developed.

Abundant supplies of coal and other fossil fuels are in the ground; our shortcoming is our capacity to extract these resources from the earth and convert them into electricity and deliver the energy to the ultimate consumer.

Accustomed to doubling electric generating capacity every decade, we have lost sight of the fact that today this represents doubling an investment of $100 billion. A single 3,000 MW power station involves 1,000 acres of land, 7 million tons of coal per year, and $450 million in plant and equipment. This entails opening new coal mines, purchasing new coal cars, and building a huge new plant and equipment. It means acquiring sites and rights-of-way for transmission lines and transformers and other equipment; in all a gigantic undertaking.

In the next 20 years we must triple our national power capacity to meet projected population and industrial demands. This may require 250 new powerplant sites with an estimated capital need of as much as $350 billion. Such an expansion will require approximately 8 million acres of land and may require over one-half million miles of high-voltage transmission lines, enough to circle the world four times.

Yet, the electric power industry, with annual revenues of some $20 billion, is, according to the Federal Power Commission, currently spending less than one-half of 1 percent of its gross revenues on developing new and improved methods for the generation and transmission of electric power.

Energy industries and this Nation, and the world, are embarked on a gigantic gamble that we can continue to supply this energy requirement with known and unproven sources of crude oil, natural gas, and coal or other sources of energy such as the breeder reactor, fuel cells, or even the fusion reactor. To lose this gamble would be a catastrophe.

Both fossil and nuclear fuel resources are being depleted at an ever-increasing rate. Accompanying this is a greater potential for deleterious environmental effects and a greater potential for brownouts or blackouts. Major power interruptions as reported by the Federal Power Commission have increased from 148 in the 12 years from 1954 to the end of 1966 to 97 in 1967 alone; 94 in 1968; 85 in 1969; and 43 in the first half of 1970. The historic New York City blackout on June 5, 1967, affected 13,000,000 people, alone.

Mr. President, I offer an explanatory table summarizing power service interruptions from 1954 to 1970 and request unanimous consent to have it printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE I.—POWER SERVICE INTERRUPTIONS REPORTED BY THE FEDERAL POWER COMMISSION, 1954 TO 1970

Year	Number of service interruptions	Number of customers affected
1954 to 60	54	
1961 to 65	64	
1966	30	
1967	97	[1] 14,880,000
1968	94	2,398,000
1969	85	
1970:		
1st quarter	24	483,000
2d quarter	19	347,700

[1] Includes 13,000,000 people affected by the June 5, 1967, "blackout" in New York City.

Source: Federal Power Commission Reports on electric power interruptions, selected news releases.

Mr. RANDOLPH. Mr. President, without question these service interruptions have resulted in part from insufficient planning by the power industry, efforts to preserve the environment, and the strain of extreme heat or cold waves. These combined factors have placed intolerable strains on existing electric power systems. The past should have taught us the importance of better planning and development of power systems with adequate margins of safety.

The security of the United States is entwined by this issue. The principal issue confronting us is how to create an integrated policy for the development of energy and the maintenance and enhancement of environmental quality while minimizing our dependence on uncertain foreign sources of bulk energy.

Let us take the Atlantic seaboard as an example. Federal Power Commission estimates of utility construction along the Atlantic seaboard through 1977 will increase by 24,350 megawatts or 70 percent over 1970. The majority of this growth will be nuclear; 24 percent will be oil fired and only 4 percent coal fired. The bulk of the required oil will come from foreign sources, subject to competitive international energy markets. Yet, each decision, today, may represent as much as a 30-year commitment to this oil supply.

These figures are consistent with individual facility figures supplied to me by the Edison Electric Institute on April 9, 1970, for the period up to 1975. I ask unanimous consent that this material appear at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EDISON ELECTRIC INSTITUTE,
New York, April 9, 1970.

Attention: Mr. Walter Planet.
Hon. JENNINGS RANDOLPH,
Chairman, Senate Committee on Public Works, New Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to your letter of February 27, 1970 to Mr. Barnett, of the National Association of Electric Companies, and the subsequent correspondence between Mr. Walter Planet and Mr. David Toll, we are enclosing data on steam electric power plant fuels for the District of Columbia and eight Eastern states: Connecticut; Massachusetts; Rhode Island; New Jersey; New York; Pennsylvania; Delaware; and Maryland.

The enclosed Attachment A includes information with respect to City, Utility, Plant, Type of Fuel, Amount, and Source or Supplier. Attachment B shows steam electric units or plants under construction or proposed in the District of Columbia and seven states: Connecticut; Massachusetts; New Jersey; New York; Pennsylvania; Delaware; and Maryland. Attachment C offers additional information relative to current and proposed pollutant control devices.

Sincerely yours,
W. DONHAM CRAWFORD,
Managing Director.

ADDITIONAL INFORMATION RELATIVE TO CURRENT AND PROPOSED POLLUTANT CONTROL DEVICES

BALTIMORE GAS AND ELECTRIC

The Company's plan of compliance with the Maryland Air Quality Control Standards provides for substantial additional conversions from coal firing to oil firing during 1970 and 1971.

CAMBRIDGE ELECTRIC

Rehabilitating electrostatic precipitators.

CONSOLIDATED EDISON

In 1969 we were able to purchase 3,900,000 gallons of very low sulphur oil for test purposes. The availability of this very low sulphur oil (0.37%) has been increasing rapidly. Already turbo-generator units 1 and 2 at Astoria (nameplate rating 180,000 MW each) are being fueled with 0.37% sulphur oil. Unit 3 at Astoria (nameplate rating 335 MW) is scheduled to be converted from coal to 0.37% sulphur oil by Oct. 1, 1970 and we plan to convert units 4 and 5 at Astoria (nameplate rating 380 MW each) to burn this very low sulphur oil by the fall of 1971. In addition the company has made a firm commitment that units 6 and 7 which we are pro-

posing to build at Astoria will burn 0.37% sulphur oil.

Refineries are now being built in Aruba and the Virgin Islands to reduce the sulphur content of Venezuelan and Colombian oils to the 0.37% level. In addition, increasing amounts are becoming available from African sources. When more 0.37% sulphur oil becomes available, we will increase our purchases. Nevertheless, we have no way of knowing how much of the oil we plan to purchase in the years 1970–79 will be 1% sulphur and how much will be 0.37% sulphur oil.

To date Consolidated Edison has invested over $150,000,000 to control the emission of pollutants. Much of this money was spent to install and upgrade electrostatic precipitators in the coal burning plants to meet New York City's stringent requirements. Due to this improvement and the purchasing of low sulphur fuels. Con Edison has already done much to improve the quality of the air in the city. According to data from the New York City Department of Air Resources, Con Edison has reduced its emissions of sulphur dioxide by 55% and of ash by 53% over the past three years.

In the 1970's much of our new capacity will be nuclear. Consequently, decreasing amounts of fossil fuel will be required, even though the amount of electricity produced will increase. By the end of the decade, we expect to burn considerably less than half as much coal as in 1969. While we then expect to burn almost 70% more oil than in 1969, we expect most, if not all, of that oil to be very low sulphur oil. Therefore in this decade we believe we will be able to reduce our emissions of both sulphur dioxide and ash to less than 25% of what they were three years ago.

DELMARVA POWER & LIGHT

A precipitator is proposed on Delaware City No. 3 boiler which is currently open for bids that are expected in by end of March, 1970. In addition, in line with policy to reduce air pollution, our plant at Edge Moor, Delaware is being converted to burn 100% low sulphur oil.

GENERAL PUBLIC UTILITIES

Emphasis in planning future generation is on nuclear, natural gas and low-sulphur oil. In addition, existing plants such as E. H. Werner have converted from coal and plans have been made for converting other plants during the next few years.

LONG ISLAND LIGHTING

All of the steam generating units of Far Rockaway, E. F. Barrett and Glenwood Power Stations have been equipped to burn low sulphur (1%) oil. In addition, four old boilers in Glenwood Station are being replaced by new efficient oil and/or gas fired steam generators.

Port Jefferson Power Station, now burning oil exclusively, utilizes combination mechanical and electrostatic dust collectors for air pollution control. Northport Power Station Units 1 and 2, also exclusively oil fired, are provided with efficient mechanical collectors. Unit 3, now under construction, will employ an electrostatic precipitator when firing oil. If plume appearance is improved over Units 1 and 2, electrostatic precipitators will be added to these installations for aesthetic reasons.

Other means applied to reduce air pollution include operating with low excess air and the use of additives when firing residual oil.

NEW ENGLAND ELECTRIC SYSTEM

I. Presently used measures and devices

(a) Electrostatic precipitators and mechanical dust collectors are used to control particulate emission from stacks.

(b) Flue gasses are dispersed from high stacks to reduce ground level concentrations of pollutants.

(c) Coal pile dust abatement is accomplished:

1. In reserve coal piles by surface sealing with an asphalt emulsion.

2. In active coal piles by spraying water onto coal as needed using oscillating nozzles fed from a permanent piping arrangement.

(d) Types of fuel burnt have been changed to include natural gas when and where available.

(e) Participation in ownership of nuclear generating plants.

II. Presently proposed measures and devices

(a) Higher stacks for even better dispersion and further reduced ground level concentrations.

(b) Use of low content sulphur fuel oil during periods of low level atmospheric inversions.

(c) Additional nuclear plant participation.

III. Possible future measures and devices

(a) Use of 100% low sulphur content fuel, if such fuel is made available by the supplying oil or coal companies at reasonable cost.

(b) Use of additional devices with present modes of generation—such as flue gas scrubbers—which devices today are being researched, developed, and a few being already tested in pilot projects.

(c) Use of a basically different mode of generation, such as magneto-hydrodynamics (MHD)—present research indicates that it is a more efficient cycle—therefore, it would produce a given amount of electricity using less fuel (i.e.—less pollution.)

PENNSYLVANIA POWER & LIGHT

We will be able to meet the present regulations of the Commonwealth of Pennsylvania with the exception of Stanton which is due to be shut down in 1972. As to the proposed regulations for Pennsylvania, we believe it will be extremely difficult to comply. Our studies on the present generation of sulphur removal devices leads us to believe it will be four or five years before these or other sulphur removal devices will be delivered for modern fossil fuel plants.

PUBLIC SERVICE ELECTRIC & GAS

In 1969 the Company initiated steps to convert Bergen Generating Station from coal firing to low-sulphur oil. This represented another major effort by Public Service toward the elimination of air pollution. This will leave only two stations in our system which will still burn coal regularly. One of these—Hudson Generation Station—is the newest station in the system and has the most modern and efficient pollution control devices obtainable. The other—Mercer Generating Station—is undergoing a $6 million addition to its electrostatic precipitator installation to bring its performance up to the same high standards of pollution control.

Our construction program provides for nuclear, gas-turbine, and low-sulphur oil-burning units. In this manner we will move further toward our goal of virtually eliminating air pollution by our plants in the future.

NORTHEAST UTILITIES

With respect to devices for controlling air pollution, all Northeast Utilities coal fired production units have devices for removal of particulate matter resulting from combustion. The company is also planning a sulphur removal pilot project and continues to do research on air quality control. In accordance with the proposed directive of the Connecticut Clean Air Commission, Northeast Utilities plans to convert all fossil fuel steam generating units to fuel containing not more than 1.0 percent sulphur as of September 1, 1971.

Mr. RANDOLPH. Mr. President, short of a nuclear attack it is impossible to imagine a worse contingency than a major stoppage of the flow of oil in the United States. This would be analogous to a transportation stoppage, a contingency the U.S. Government has gone to extraordinary lengths to forestall. Any significant failure in crude oil supplies would not only shut down electric power, but would create havoc in our system. Without an alternative fuel the movement of aircraft, trucks, buses, privately owned automobiles, barges, boats, and ships could be halted, and through immobilization of transportation virtually all industry could be shut down. Electric power generation, lacking fuel, would decrease, if not cease, and our economy could descend into utter chaos.

The alternative is to pay a somewhat higher price and encourage the development of our domestic industry and resources—not only of oil and gas but, also, synthetic liquid and gaseous fuels—knowing that regardless of world events our energy supply is secure.

Society's needs are broader than reliable energy alone; they extend to an immediate requirement for "clean" forms of energy for automobiles as well as for electric generating plants. The likelihood of abandoning the current per capita energy production and the accompanying high standard of living is remote. Therefore, the remedy is to coordinate our environmental policies with a compatible fuels and energy policy, where none now exists.

Until recently energy growth has been spurred on by aggressive marketing and promotional rates and Government policies. Such promotional techniques as "Gold Medalion Homes," "All Electric Living," and "Ready Kilowatt" have stimulated consumption to the point that peak energy consumption now occurs in the summer months. Reportedly, 10 years ago, peak loads occurred the week before Christmas; now the high loads are in the summer and the peaks run for 4 months instead of 1 week.

One of the difficulties cited is strongly promotional pricing policies or rate structures. Currently the greater one's use of electricity, the lower the unit cost. In light of the crisis before us there is adequate basis to question how well these rate structures are performing in terms of overall national needs. A national energy policy should consider the benefits to be derived from restructuring electric rates to taper the growth of electric energy consumption in affluent America.

Pricing structures have also emphasized direct costs of energy production, neglecting the indirect social costs such as the impact of energy production on the air, water, and land, and on the people. As steam electric powerplants have increased in size, their environmental impacts have been passed on to the general public as increased air pollution and increased thermal loading of rivers, or "thermal pollution."

The general public, however, has expressed a desire to deal directly with these environmental costs. Utilities are being required to take the necessary measures to protect and enhance the quality of our environment. This will require the expenditure of large sums for air pollution control, for cooling towers to dissipate waste heat, and for power plants and transmission lines more compatible with the surrounding landscape. In turn, these expenditures must be reflected in rate structures.

Additionally, the price of coal must reflect the cost of health and safety measures to protect the health of this work force, vital to reliable energy supplies. The cost of nuclear plants must reflect occupation standards in uranium mines and emissions standards for nuclear power plants, and energy costs must begin to reflect research and development expenditures to perfect new sources of power generation and perfecting means for placing transmission lines underground.

The public should be made aware that low cost nuclear power was possible because the Congress, through the Atomic Energy Commission, subsidized and promoted a multibillion-dollar nuclear power industry. Through 1967, a $2.3 billion subsidy was provided to the civilian nuclear power program. While the benefits of this program appeared high, such selective subsidizing may well have contributed materially to our current energy crisis and retarded synthetic fuel developments.

The public must be made aware that environmental protection will mean higher prices for electricity. I am not sure that this is all bad; the higher prices will reflect the real cost of producing electricity, and instill an awareness that the availability of energy cannot be taken for granted at the flick of a switch.

The immediate question that must be asked is: Can the environment be preserved while providing reliable and adequate energy supplies?

There is an obvious, immediate need for both short-term and long-term fuel planning.

The first task is to understand the environmental implications of the use of alternative fuels. Then the environmental impact of current fuel usage can be estimated and the advantages of alternative fuel patterns determined.

Contrary to popular belief, the controlling of particulate emissions from power production may well require the development of new control technologies. Current techniques for powerplants do not cope adequately with the low-resistivity ashes resulting from the combustion of low-sulfur and cleaned coals or the emission byproducts of such desulfurization processes as limestone injection. Even improving particulate collection efficiencies from an average of 86 percent to 99 percent will not offset the impact resulting from increased growth in generating capacity.

Recently, a new dimension has been added to particulate control. Although control and collection efficiencies continue to rise the fine particulates escape into the atmosphere. These fine particulate emissions are expected to increase fourfold between 1970 and the year 2000.

Because they are easily inhaled and retained in the lungs the fine particulates are most hazardous to public health. They also offer the greatest potential for inadvertent weather modification, particularly near urban areas.

There exists unequivocal evidence that the combustion of fossil fuels has added materials to the atmosphere that are capable of causing global changes in the earth's temperature. The temperature changes that are being discussed are not large and most probably will be felt only over a long period.

Nitrogen oxides are produced by all combustion processes. The current estimate of 9 million tons annually is expected to increase to about 25 million by the year 2000. Currently 30 to 40 percent of these emissions from stationary sources is from power production. This contribution is expected to increase to 60 to 70 percent in 30 years.

The development of technology for controlling nitrogen oxide emissions lags well behind that for sulfur oxides. Although there is considerable potential for improvement in controlling nitrogen oxide emissions from the combustion of oil and gas, techniques for controlling emissions from coal-fired plants are not yet demonstrated in either pilot or prototype stages.

According to the National Air Pollution Control Administration, at the present rate of development it may well be 10 or more years before methods are available to control nitrogen oxide emissions from powerplants. Significant reductions may take even longer unless special attention is given to the development of reliable control alternatives applicable to both new and existing facilities. Nitrogen oxide levels in the ambient air can, therefore, be expected to almost triple in the next 30 years.

Mr. President, at this point, I offer a second table showing projected nitrogen oxide emissions from 1970 to 2000 and ask unanimous consent that it be included in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE II.—PROJECTED ANNUAL UNCONTROLLED NITROGEN OXIDE EMISSIONS, 1970–2000

[In millions of tons per year]

Year	Total emissions		Powerplants emissions	
	With breeder reactor	Without breeder reactor	With breeder reactor	Without breeder reactor
1970	10.8	10.8	4.8	4.8
1975	12.5	12.5	5.7	5.7
1980	14.3	16.0	7.2	8.8
1990	19.5	20.8	11.6	13.2
2000	25.3	27.3	16.5	18.3

Reference: Spaite, P. W. & Hangebrauck, R. P., "Pollution from Combustion of Fossil Fuels", paper presented at National Pollution Control Conference and Exposition, San Francisco, California (Apr. 1–3, 1970).

Mr. RANDOLPH. Mr. President, a more critical and immediate problem is sulfur oxides. Projected emission levels through the year 2000 present a disturbing picture. Electric power production, which now accounts for 70 percent of current sulfur oxide emissions, will amount to 90 percent of anticipated emissions in 30 years.

Although the impact of increased sulfur oxide emissions from power production will not be felt equally in all parts of the country, it is certain that the public which considers present sulfur oxide levels a health hazard, will consider projected increases intolerable.

Methods are under study for controlling sulfur oxides emissions by fuels substitution. For example, replacing high sulfur coal for low sulfur coal; fuel switching, or changing from one fuel to another. For example, switching from coal to gas; or postcombustion or flue gas treatment to remove atmospheric contaminants.

The disturbing fact is the inadequacy of this effort. If we assume that the control processes under industry-supported development are applied as developed—case I—an estimated fourfold to fivefold increase is expected. This represents the current baseline development program.

Under a development program supported jointly by Government and industry—case II—a higher level of control results; even then a threefold to fourfold increase would be expected nationally by the year 2000. This assumes that all anticipated initial commercialization dates are achieved and all the processes under development are successfully developed, which is a rather optimistic view. Mr. President, data supporting these observations are included in table III; I ask unanimous consent it be included in the RECORD at this point:

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE III.—PROJECTED ANNUAL CONTROLLED SULFUR OXIDE EMISSIONS FROM ALL SOURCES, 1970–2000

[Millions of tons per year

Year	Emissions with breeder reactor		Emissions without breeder reactor	
	Case I	Case II	Case I	Case II
1970	37	37	37	37
1975	46	44	46	40
1980	54	46	57	44
1990	78	57	82	62
2000	116	80	126	92

Source: Hangebrauck, R. P. and Spaite, P. W., "Pollution from Power Production," paper presented at National Limestone Institute 25th Annual Convention, Washington, D.C. (Jan. 21–23 1970). Spaite, P. W., and Hangebrauck, R. P., "Sulfur Oxide Pollution: An Environmental Quality Problem Requiring Responsible Resource Management," paper presented at 19th Canadian Chemical Engineering Conference, Canadian Society of Chemical Engineers, Edmonton, Alberta (Oct. 19–22, 1969).

Mr. RANDOLPH. Mr. President, considering the critical nature of this problem, a review of the available control alternatives is warranted.

Two immediately available control techniques are fuel substitution and fuel cleaning. Both these alternatives are limited by available fuel reserves and cleaning capabilities. Low-sulfur fuel substitution will reduce sulfur oxide emissions; however, the general unavailability of low-sulfur fuels and the technological difficulties inherent in desulfurization limit the impact of this alternative.

Although low-sulfur coal—less than 1 percent sulfur by weight—comprises 67 percent—or 522 billion tons—of the total national reserves, only 6 percent—or 44 billion tons—is situated east of the Mississippi River. This geographic dependence severely limits the availability of low-sulfur coals in such critical areas as the Atlantic seaboard.

A considerable Federal effort has been launched to involve the coal industry in coal cleaning; however, there remains some dissatisfaction within the industry. This is understandable in those instances where a coal may be uncleanable, but it

is, in my opinion, an unrealistic viewpoint for the industry as a whole to adopt.

Mr. President, I ask unanimous consent that material on the cleanability of coal in four Appalachian States be included in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF HEALTH,
EDUCATION, AND WELFARE,
April 17, 1970.

To: Mr. Richard Royce, chief clerk, Senate Public Works Committee.

Subject: Coal cleaning.

1. We are making a considerable effort to involve the coal industry in our coal cleaning pilot plant. Plans are now laid to negotiate a $7 million contract for that purpose.

2. There still remains some disaffection with coal cleaning within the coal industry. This is understandable in those cases where the owner of the mine may possess an uncleanable coal. It is not understandable from the broad coal industry viewpoint.

3. Because of your especial interest in activities under the Clean Air Act and particularly Section 104, as well as associated knowledge with the coal industry, I am sending you a copy of a letter from Paul W. Spaite to James R. Garvey together with tabular material entitled "Cleanability of Test Coals From Selected Seams in 4 Appalachian States."

JOHN T. MIDDLETON,
Commissioner.

DEPARTMENT OF HEALTH,
EDUCATION, AND WELFARE,
April 16, 1970.

Mr. JAMES R. GARVEY,
President and Director of Research, Bituminous Coal Research, Inc., Monroeville, Pa.

DEAR JIM: Enclosed you will find further information on the mine testing program. I think the data will answer questions which came up at the April 9th meeting with your Board of Directors.

The table entitled, "Cleanability of Test Coals From Selected Seams in 4 Appalachian States" shows which seams the mines shown on my hand out map were working. Table 1 is a summary showing how many of the 279 mines tested to date are inherently low in sulfur on "cleanable" to less than 1%. Table 2 shows the annual production for the same group of mines. You will note that we have tested mines representing over 240 million tons of annual production and find over 30% are indicated to be less than 1% sulfur or are cleanable to less than 1%. This group represents over 20% of the annual production which was tested.

Thanks again for the opportunity to discuss our programs.

Sincerely yours,

PAUL W. SPAITE,
Director, Bureau of Engineering and Physical Sciences.

CLEANABILITY OF TEST COALS FROM SELECTED SEAMS IN 4 APPALACHIAN STATES

[1] EC—"Easily cleanable" when sulfur is reduced to 1 percent or less and recovery of B.t.u.'s is over 90 percent at top size of 3/8 inch.

[2] C—"Cleanable" when sulfur is reduced to 1 percent or less and B.t.u. recovery is 80 percent at a top size of 14 mesh.

[3] LS—Low sulfur (<1 percent) originally in raw coal.

Mr. RANDOLPH. Mr. President, although the coal supplied from proven reserves often can be cleaned, recent studies indicate that only about 10 percent can be reduced to the equivalent of 1 percent sulfur coal. An additional 12 percent is cleanable to the equivalent of 1.5 percent sulfur coal. Extrapolation of these test results to unproven coal reserves is difficult. Nevertheless, it is apparent that coal cleaning will provide only limited supplies of low-sulfur coal for areas now consuming higher sulfur coals.

As for coal, there is also a limited supply of naturally occurring low-sulfur residual oil in the world. The paradox is that in 1966 the United States produced the largest supply of low-sulfur crude oil—containing less than 0.5 percent sulfur—in the free world. By 1968, however, domestic refineries had decreased their production of powerplant residual oil to such an extent that 65 percent or 422 million out of 680 million barrels of residual oil consumed, were imported. This trend is expected to continue.
